design parameters of uranium oxide (UO_2) fueled water cooled thermionic, for underwater operation, 25:20817(P)
design parameters of zirconium hydride reactors with organic Rankine power cycles, 25:44179
design requirements for reactor, for Orbital Research Laboratory (ORL) missions, 22:1842 (N-67-17520)
design studies of plutonium-238-fueled Stirling, for spacecraft auxiliary power system, 25:42010
design study of 70 to 500 kW(e) thermionic reactor, for electric propelled unmanned space vehicles, 24:29061(R) (N-70-11900)
design study of radiator cooling system for thermionic reactor, for electric propelled unmanned space vehicles, 24:29062(R) (N-70-12176)
design, fabrication, and testing of undersea radioisotope, 22:23217 (CONF-670445-, pp 18.33-54)
design, fabrication, and use of radioisotope-fueled, for land and marine use, guide for safe, 24:20952 (STI/PUB-246)
design, operation, and future uses of, review on, 24:16803
development and operation of RIPPLE marine light offshore at Dungeness, England, 22:12552
development and operation of strontium-90-fueled Marguerite, for marine applications, 24:14177
development and testing of Decomposed Ammonia Radioisotope Thruster, 23:29104
development and use in UK, 24:22899
development and use of RIPPLE, UK program for, 22:8319
development and uses of radioisotope-fueled, for space propulsion, review on, 25:48746
development and uses of RIPPLE, 23:4788
development and uses of RIPPLE, conference on, 22:23227
development and uses of, in England, France, Germany, US, and USSR, 23:21906
development and uses of, in Europe and United States, 23:50052
development and uses of, review of, 23:24385 (CONF-670649-18)
development by USAEC, JCAE hearings on, 22:10168
development by USAEC, JCAE hearings on, 22:10169
development for manned and unmanned space flight, 24:9592 (AGARDograph-123(Pt.1))
development for marine power sources, 22:47287 (AERE-R-5500(Vol.2), pp 462-79)
development for medical uses, 25:39666
development for space applications, 22:7874
development for spacecraft, review on, 25:57671
development of 100 to 1000 MW(e) output, for Aerokern radioisotope thermoelectric generator, 24:5816
development of 2 to 10 kW(e), comparison of energy conversion system components for, 24:14168 (ORNL-TM-2366)
development of 50 MW(t), design and operation of heat pipe radiator for, 21:41101 (UCRL-50294)
development of Brayton-B, for space use with radioisotope, solar, or SNAP-8 reactor source, 25:42008
development of closed Brayton cycle, for use in lunar, space, terrestrial, and undersea environments, 25:42007
development of European, description of programs for, 22:49033
development of gas core, feasibility study for, 24:4104 (AD-692113)
development of incore thermionic reactor, for space applications, 25:26050
development of organic Rankine cycle, for extended space operation, 21:36236(R) (SAN-651-33)
development of organic Rankine cycle, for extended space operation, 21:36235(R) (SAN-650-5)
development of organic Rankine cycle, for extended space operation, 21:36234(R) (SAN-650-4)
development of Poodle, materials and performance tests in, 21:12603
development of Poodle, review of, 21:236(R) (STL-517-0038)
development of promethium-147-fueled Betacel, for biomedical applications, 25:41996
development of radioisotope-fueled, for terrestrial use, 24:22883
development of radioisotope-fueled, for underseas use, recommendations for, 24:29458
development of radioisotope-fueled, for use in space, 24:22882
development of radioisotope-powered, review of, 23:35415 (AD-687131)
development of reactor-powered multiple-stage cesium thermionic converter module, 22:7886
development of RIPPLE, for Danish marine light, review of, 22:28025
development of Romaschka reactor, 21:5674
development of Snapoodle, for production of electric power and thrust, 21:12604
development of thermionic reactor concepts, review of U. S, 25:44169
development of thermionic reactor, critical experiment studies for, 24:7253
development of thermionic reactors for space applications, 23:11318
development of thermionic reactors in Germany, review of, 25:44172
development of thermionic, for space applications, 25:51210
development of U.S., JCAE hearings on, 24:31120
development of undersea radioisotopic, 22:25205 (CONF-670445)
development of, review of, 25:26051
development program for U. S. space, description of, 22:32944
development program for zirconium hydride thermal, thermionic, and advanced liquid metal-cooled fast reactor, description of AEC, 23:11308 (CONF-680419-, pp 41-60)
dimensions for, comparison of heat-pipe and convection-cooled fast alkali-metal-cooled space reactors of outside radius, 23:2092 (UCRL-71206)
dynamics for MPRE, computer program analysis of transient condition, (T), 23:28588 (ORNL-TM-1611)

dynamics of Brayton cycle, for space power systems, analog computer simulation of, 25:42009
dynamics of fast reactors with in-core thermionic converters for, analysis of two region stability and nonlinear, (T), 23:45114(R) (TID-25121)
dynamics of moderated thermionic reactor with heat pipe radiator, (T), 24:38616
economics and performance for land and submarine use, 22:42990
economics and performance of radioisotope, in commercial aviation, 22:42992
economics of radioisotopic and reactor, for undersea uses, 25:44180
economics of RIPPLE, for use as power source for marine warning light, 22:21292
electrical components for, testing of, 21:40654(R) (SAN-679-3)
energy conversion processes for space reactors, review of, 23:11315
evaluation for space vehicle uses in mid-1970s, 24:31111 (AD-701352)
evaluation of radioisotope-powered thermoelectric generators for deep space use, 25:43184 (N-71-16776)
fracture of radioisotopic heat sources for, impacting with earth's surface, calculation of critical impact velocity for, 23:4786
fuel capsule testing for Ripple III radioisotopic generator, 21:39132 (RCC-R-195(Rev.))
fuel capsules for Poodle, creep strain measurements and analysis of, 21:43207(R) (STL-517-0049(Vol.1))
fuel capsules for Poodle, effects of high temperature creep on, 21:12609(R) (STL-517-0049(Vol.2A))
fuel capsules for Poodle, refractory metal cladding for, 21:12587(R) (STL-517-0049(Vol.3))
fuel capsules for RFD-2, reentry and burnup characteristics of simulated, 21:234 (MND-3283-3)
fuel element development for thermionic reactors, review of U. S, 25:44170
fuel elements for 710 Reactor, radiation testing of refractory metal clad tungsten—uranium oxide (UO_2), 24:33457
fuel elements for Medium Power Reactor Experiment, radiation testing of Type 304 stainless steel clad uranium oxide (UO_2) pin type, 24:43767 (ORNL-TM-2859)
fuel elements for MPRE, design parameters for Type 316 stainless steel clad uranium oxide (UO_2) pellet type, 23:28583 (ORNL-TM-1344)
fuel elements for MPRE, fabrication and specifications for Type 316 stainless steel clad uranium oxide (UO_2) pellet type, 23:28582 (ORNL-3902)
fuel elements for space thermionic, uranium oxide (UO_2) loss from vented, (T), 23:28577 (N-69-10099)
fuel elements for space, uranium oxide (UO_2) or uranium nitride (UN) loss from vented, (T), 23:28578 (N-69-10734)
fuel elements for thermionic, design parameters of parallel arranged heat pipe connected, 24:24893(P)
fuel elements for, optimum design parameters for series connected thermionic, 25:18202
fuel elements of, description of melting plug released safety gas coolant for thermionic, 24:24899(P)
fuel release in shallow ocean water, radiation dose probabilities from polonium-210, 21:36176
fuel rod bundles for MPRE, effects of coolant flow distribution on hot spots in, 23:28586 (ORNL-TM-1371)
fuels for gas cooled, evaluation of graphite dispersion, 24:33459
fuels for space, preparation and properties of plutonium-238 dioxide, 24:36523(P)
hazards from random re-entry of, probability of, 21:36273
heat exchangers for, fabrication of, 21:4919 (ORNL-TM-1600)
heat pipe for 50 to 300 kW(e) and 1 to 10 MW(e) Rankine-cycle, design of optimum, (T), 22:42347 (UCRL-71004)
heat pipes for space and undersea, performance of cylindrical, 25:10755 (ORNL-TM-2803)
heat pipes for, development of, 23:6012
heat source for Apollo Mission, development and testing of, 23:29095 (SC-RR-69-125)
heat source for DART I, metallographic analysis of capsule materials for, 25:15837 (MLM-1578)
heat source for, design and safety evaluation of cobalt-60-fueled, 24:14164 (AGN-8341)
heat sources for Ripple, evaluation of radioisotope, 25:42014
heat sources for space, development of cobalt-60 kernel-clustered, 25:42000
heat sources for terrestrial and undersea, conceptual design of large, 25:44553
heat sources for, computer programs for evaluating hazards to man following earth impaction of, 25:26429 (SC-R-710021)
heat sources for, design and fabrication of tantalum alloy T-111 capsules for, 22:47290(R) (AI-AEC-12713)
heat sources for, design and fabrication of tantalum alloy T-111 capsules for, 22:47289 (AI-AEC-12712)
heat sources for, design of plutonium dioxide-fueled, 24:2403
heat sources for, design of plutonium-238 oxide, 23:7706(P)
heat sources for, design, fabrication, and creep testing of tantalum alloy T-111 capsules for, 23:11720(R) (AI-AEC-12753)
heat sources for, development of capsules for large radioisotope, 22:23216(R) (AI-AEC-12642)
heat sources for, development of fibrous-type thermal insulation for, 23:41725 (ALO-2661-12)
heat sources for, development of fibrous-type thermal insulation for, 22:12533 (ALO-3633-5)
heat sources for, development of fibrous-type thermal insulation for, 22:21284 (ALO-3633-7(Vol.1))
heat sources for, evaluation and testing of large radioisotope, 24:36509(R) (SC-PR-70-222)
heat sources for, evaluation of actinide radioisotopes as, 24:2397(T) (ORNL-tr-1495)
heat sources for, evaluation of methods for fabricating plutonium-238-containing cermet, 25:39656
heat sources for, evaluation of transuranium radioisotope, 24:5819
heat sources for, heat protection techniques and vehicle configurations for safe reentry of, 22:30791
heat sources for, production and use of plutonium-238, 24:22895
heat sources for, program for development of plutonium-238 dioxide, 25:39650(R) (LA-4697)
heat transfer analysis of simulated heat source in liquid-filled porous media, 21:36274
isotopic generators for, performance of, 21:45314(T) (JPRS-42391)
jet-condenser for 1 to 15 kW(e) organic Rankine-cycle, design of optimum 0.5 to 0.1 psia turbine exhaust, (E/T), 22:42339 (AGC-3484)
kinetics for SPR-4 reactor, use of ZOOM computer code for calculation of, 22:42344(R) (UCRL-50004-67-3(Pt.1))
kinetics for SPR-6 reactor, use of ZOOM computer code for calculation of, 22:42344(R) (UCRL-50004-67-3(Pt.1))
kinetics of fast uranium nitride fueled lithium cooled reactor in hot startup, (T), 25:18200 (N-70-39389)
mass of space, effects of radiator mass on, 25:54916
materials development and testing for MPRE, 21:13099 (ORNL-3970, pp 185-92)
materials development for, 21:26747(R) (NASA-CR-54358)
mercury Rankine power conversion system, materials evaluation for, 21:6756 (NAA-SR-6321)
mockup of Medium Power Reactor Experiment, design and operation of single-loop boiling-potassium Rankine-cycle, 23:11289 (ORNL-4025)
neutron damage flux in thermionic fast space reactors, effect of moderator incorporation on fast, (T), 23:15696
operating characteristics of 1-V output radioisotope-powered, 23:50035 (CEA-R-3834)
operation and performance in marine navigational aids, 22:42991
operation and performance of RIPPLE, 22:45250
operation of 20 kW(e), analysis of optimum economic, 23:47284
operation of RIPPLE VI, in Swedish lighthouse, 23:50057
performance of 300 kW(e) lithium cooled fast reactor concept with potassium Rankine cycle, 25:44173
physics calculations for conceptual MPRE, 23:28590 (ORNL-TM-1620)
physics measurements for SPR-4, 23:49602(R) (UCRL-50004-67-4(Pt.1))
physics measurements for SPR-5 reactor, description of optimum, 22:42344(R) (UCRL-50004-67-3(Pt.1))
physics measurements for SPR-8 reactor, description of optimum, 22:42344(R) (UCRL-50004-67-3(Pt.1))
physics measurements in uranium carbide (UC)—zirconium carbide (ZrC) and 0.05 MW(e) molybdenum—uranium oxide (UO_2) thermionic reactors, analysis of, (T), 22:32946
physics parameters for generic thermionic reactor, description of, 22:22791 (GA-8309)
power conversion system for, corrosion and mass transfer in mercury Rankine, 23:10157 (NAA-SR-Memo-12505)
power conversion systems for space vehicles, application of Brayton cycle in, 22:7880
power conversion systems for space, conceptual design for liquid metal Rankine cycle, 22:42345 (UCRL-70863)
power conversion systems for space, design parameters of heat-pipe out-of-core thermionic, 22:42346 (UCRL-70984)
power cycles for lithium cooled fast reactor, development of potassium Rankine, 25:41580
power cycles for space power reactors, development of Brayton and thermoelectric, 25:41582
power cycles for space power reactors, development of helium—xenon Brayton, 25:41581
power cycles for, development of radioisotope-fueled organic and steam, 25:26433
power distribution in T-111 clad uranium oxide (UO_2) fueled, effects of nonvented core configuration on optimum radial, 23:43175 (N-69-25305)
power flattening device for radioisotope-heated thermoelectric generator, 21:10553(P)
power flattening in uranium oxide (UO_2) fueled thermionic, calculation of optimum, (T), 24:7256
power production by, development of alkali-metal Rankine-cycle for, 21:38648
power sources for, performance characteristics of, 22:19051
power supply system for space, with liquid metal magnetohydrodynamic converter, 22:47001
power system electrical components for 0.25 to 10 MW(e) space, conceptual design analysis for high-temperature potassium Rankine cycle, 22:42342 (SAN-679-8)
power system for Manned Orbital Research Laboratory, design and vehicle integration of plutonium-238 Brayton, 22:19054
pressure vessels for Poodle, use of CRAB computer program for analysis of creep behavior of thick-walled, 21:43194(R) (STL-517-0049(Vol.2B)(Add.))
pressure vessels for, analysis of creep in, 21:14392(R) (STL-517-0049(Vol.2B))
propellant feed system for, for space application, 21:6149 (STL-517-0034(Vol.2))
propellant feed system for, sensor control components for, 21:6149 (STL-517-0034(Vol.2))
pumps for cesium and potassium Rankine cycle space, design comparison of boiler feed, 22:47000 (ORNL-TM-2086)
pumps for Medium Power Reactor Experiment, performance analysis of jet, 22:24972 (ORNL-3745)
radiation hazards from isotopic—fueled, following reentry from space, criteria for evaluating, 23:50066
radiator designs for SPR-6, analysis of direct-condensing tube-fin and heat pipe, 24:2044 (UCRL-50004-67-1, pp 47-82)
radioisotope heat sources for, evaluation and performance of, 21:24178
radioisotope heat sources for, review of developments in, 22:14733
re-entry penetration in soils, prediction of, 21:19760 (TEI-867)
reactor temperature optimization for 1 MW(e) potassium Rankine cycle, 21:42800
reentry from elliptical space orbit, computer program for computing environment and trajectory for, 24:22879 (SC-M-70-157)
reentry of small radioisotope-fueled, at superorbital velocities, computer calculations of temperature and trajectories for, 25:4221
reentry vehicle for plutonium-238-fueled, conceptual design study of, 23:26458 (N-68-38170)
reliability analysis methods for aircraft and space vehicle, 25:41573 (EUR-4517, pp 329-51)
safety aspects of use of, 25:37815 (EUR-4612, pp 99-113)
safety hazards from radioisotopic, probabilistic method for evaluation of, 21:6521
safety in aerospace mission of 710 Reactor System and STAR-C, 23:21534 (NP-17783)
safety of radioisotope-fueled, for space and terrestrial use, review of criteria for, 24:22884
safety of space fast reactor, effects of control drum and cooling system malfunctions on, (T), 25:46309 (N-71-12568)
shielding calculations for, description of GEISHA-2 computer code for, 22:42344(R) (UCRL-50004-67-3(Pt.1))
shielding for 2.2 MW(t), calculation of optimum configuration of fast neutron and γ, 24:2043 (N-69-35817)
shielding for heat pipe cooled fast reactor, optimization of, (T), 25:41576 (ORNL-TM-3449)
shielding for space reactors, fast neutron spectra in lead and water, (E/T), 25:41571
shielding for space vehicle, optimum design parameters of asymmetric 4π, 25:31640 (ORNL-TM-3368)
shielding for space vehicle, spatial distributions of neutron captures in, (T), 24:33472
shielding for TRIKT-50, description of optimum, design for, 22:25064 (DLR-MITT-66-07, pp 101-10)
shielding of plutonium-238, for artificial heart, (T), 22:31907
shielding of space reactors, properties of lithium hydride for, 21:38645
shutdown cooling of space reactor, sodium loop and radiator for, (T), 25:20805 (N-70-39420)
stability of thermionic, comparison of limiting models for, (T), 24:7255
stability of uranium carbide (UC) fueled fast thermionic, comparison of limiting models for, (T), 24:7259
startup of in-core thermionic reactors, transient response during, (E/T), 25:15401
steam generator for radioisotope-fueled, performance of short reentry tube once-through, 25:41962 (ORNL-TM-3236)
survey of space reactor development, 23:11314
testing at Nuclear Rocket Development Station, estimation of dose to thyroid of infants and whole-body following, 24:48543 (SWRHL-92-r)
testing of DART Minithruster, under impact, pressure, and thermal abort conditions, 25:32128 (SC-RR-710012)
thermal characteristics and thruster performance of Snapoodle, effect of nozzle temperature on, 21:12604
thermal insulation for, 21:24707(R) (ALO-3632-14)
thermal insulation for, 21:24819(R) (ALO-3633-4)
thermal insulation for radioisotope-fueled, development of multilayer-type for use in space, 25:38005(R) (ALO-2832-43)
thermal insulation for RIPPLE, development of microporous, 21:26055
thermal insulation for, development and testing of multifoil-type, 23:2513 (ALO-3632-20)
thermal insulation for, development and testing of multifoil-type, 23:6258(R) (ALO-3632-33)
thermal insulation for, development and testing of multilayer metal foil—refractory, 25:39647 (ALO-3632-20(Rev.1))
thermal insulation for, development of vacuum foil-type, 21:30626(R) (ALO-3634-5)
thermal integration with life support systems of manned space vehicles, 22:7878
thermionic cells for, steady-state power limitations of in-core, (T), 25:37090
thermionic converter fuel elements for, development of, 23:6012
thermoelectric converters for, development of spent reactor fuel element-fueled, 24:25151
thermoelectric converters for, properties of radioisotopes and thermoelectric materials for use in, 23:16045
thermoelectric generator development for RIPPLE, isotopic, 21:26099
thermoelectric generator for, design of radioisotope-powered heat source for, 23:9660(P)
thermoelectric generator for, development of strontium-90-fueled Tristan, 24:19177
thermoelectric generators for, design and development of large milliwatt isotopic, 21:24165 (HIT-3627-15(Del.))
thermoelectric materials for use in, evaluation and fabrication in RIPPLE program of, 21:26101
thermoelectric materials for use in, evaluation of, 21:26100
thermoelectric materials for, development and testing of, 22:21285 (ALO-3633-7(Vol.2))

thrust system for, design and performance of radioisotope, 23:29094 (N-69-10680)
thruster development for space, 21:6148 (STL-517-0034(Vol.1))
transients in space thermionic reactors, analog computer simulation of, 21:19453
turbogenerators for, design comparison of cesium and potassium vapor, 23:13908 (ORNL-TM-2024)
use in plasma accelerator, 22:31862
use of reactor and radioisotopic, in space vehicles, 22:27527
NUCLEAR BATTERIES

book: Numerical Data and Functional Relationships in Science and Technology, Group I, Vol. 2, Nuclear Radii, 22:32699
calculation for 2s1d-shell nuclei using projected Hartree-Fock wave functions, 21:38419
calculation for 2s1d-shell nuclei using projection of Hartree—Fock deformed state wave functions, (T), 22:37304
calculation for even-even vibrational nuclei, including anharmonic effects, (T), 22:5858
calculation for light nuclei, using Hartree—Fock method, (T), 22:20766
calculation for rare-earth nuclei using pairing + quadrupole model, (T), 22:20692
calculation from hyperfine structure parameters using polarization wave functions, (T), 23:1800
calculation in two-quasiparticle approximation of quadrupole, for first 2+ levels of spherical nuclei, (T), 23:47060
calculation of first 2+ quadrupole states using time-dependent Hartree—Fock equations, 25:31424
calculation of quadrupole effective charge using shell model with core polarization, (T), 22:30099
calculation of quadrupole, for even-even nuclei, (T), 22:39689 (ITF-68-13)
calculation of quadrupole, for even-even nuclei, (T), 22:26792
calculation of quadrupole, for first 2+ states of deformed even-even nuclei, (T), 22:22605
calculations for 1f2p-shell nuclei using deformed-orbit Hartree—Fock approximation, (T), 23:1842
calculations for 1p- and 2s1d-shell nuclei using shell model, nonadiabatic corrections to, (T), 23:5946(R) (ORO-3765-1)
calculations for 5d-shell nuclei, using pure shell model configurations, 25:28245
calculations for deformed Z > 50 N < 82 nuclei, (T), 23:19298
calculations for even—even 2p1f-shell nuclei, self-consistent, (T), 22:53249
calculations for nonaxial odd-A nuclei, sum rules for, (T), 23:19327 (ITF-68-58)
calculations for odd—odd nuclei using symmetric-core collective model, (T), 23:15502
calculations for odd-A nuclei with A near 190 using shell and unified models, 22:1624
calculations of intrinsic quadrupole, for heavy nuclei using liquid-drop model with curvature and shell-energy corrections, (T), 22:53228
calculations of quadrupole, for 2s1d-shell nuclei using Hartree—Fock approximation with Coulomb and center-of-mass corrections, (T), 22:50694
calculations of quadrupole, for deformed nuclei in rare-earth and actinide regions, (T), 23:17124
calculations of quadrupole, for heavy nuclei, (T), 21:23562
calculations of quadrupole, for spherical even-even nuclei, (T), 21:30026 (JINR-E4-3286)
calculations of quadrupole, for spherical even-even nuclei, (T), 22:35411
calculations using phenomenological collective model, (T), 25:15177
determination from hyperfine structure, method for estimation of matrix elements in, 24:35915
determination of E4 transition moments by Coulomb excitation, 25:43948
determination of sign of quadrupole, using perturbed angular correlations of oriented nuclei, (T), 24:30892
effects of quadrupole, on charged-particle elastic scattering by polarized nuclei, (T), 22:53229
effects of quadrupole, on charged-particle elastic scattering by polarized nuclei, (T), 21:35519
effects of quadrupole, on Coulomb excitation cross sections, (T), 22:18327
effects of static quadrupole, on internal conversion, (T), 22:50665
electron cloud effects on, calculation using Sternheimer method, 24:35914
interaction of quadrupole, with electric-field gradients, (T), 21:46802
interactions of hexadecapole, matrix elements for, 21:7368
interactions with electric fields, determination of Moessbauer quadrupole hyperfine parameters for half-integral nuclear spins, 25:23085
interpretation of quadrupole, for first-excited states of even—even spherical nuclei, (T), 23:47043 (NP-17996)
magnitude in cranking model, effects of pairing force on, 25:50841
measurement and theory of, review of, 21:44738 (UCRL-17729)
measurement for even radioactive nuclei by high-resolution optical spectroscopy, (E/T), 21:46805
measurement for excited states using heavy ion recoil techniques, 24:26640 (MIT-2098-601)
measurement for light nuclei using reorientation effects in Coulomb excitation, 23:23746(R) (AECL-3257)
measurement for short-lived excited states using γ resonance scattering, (T), 22:35384
measurement of quadrupole interaction of very short-lived states using perturbed angular correlation techniques, 25:34178
measurement of quadrupole, by reorientation effect, (E/T), 22:22649
measurement of quadrupole, method for, 23:44956
measurement of quadrupole, research program on, (E/T), 22:48509(R) (BMwF-FBK-68-22)
measurement of quadrupole, using Coulomb excitation, 21:29973
measurement of quadrupole, using Coulomb excitation, 21:46781
measurement of quadrupole, using Coulomb excitation, (E), 21:31788
measurement of quadrupole, using multiple Coulomb excitation, quantum-mechanical corrections to, (T), 21:46821

measurement of quadrupole, using multiple Coulomb excitation, (T), 22:27260
measurement of quadrupole, using μ-mesic x-ray spectra, (E/T), 22:46834
measurement of quadrupole, using repolarization of nuclear spins in magnetic fields, (T), 22:7743 (NYO-2028-2, pp 106-20)
measurement of quadrupole, using simultaneous Coulomb excitation of target and projectile, 24:43104
measurement of static quadrupole, for excited states of light and medium-weight nuclei, (E), 22:32513(R) (ANU-P-400)
measurement of static quadrupole, using Coulomb excitation, (E/T), 22:46830
measurement of, review of methods for, (E/T), 22:3746 (BNL-11746)
measurement of, survey of developments in, 22:46832
measurement of, survey of methods for, 22:39681 (BNL-12628)
measurement using double-resonance technique, (E), 23:23656
measurement using electron elastic scattering, survey of, 23:9007 (TID-24667, pp 93-112)
measurement using hyperfine structure effects, 22:18309 (UCRL-17951)
measurement using Moessbauer effect following Coulomb excitation, (E), 22:5875
measurement using Moessbauer effect following Coulomb excitation, (E), 22:7696 (NYO-2028-2, pp 18-23)
measurement using Moessbauer effect, review of, 22:46833
measurement using Moessbauer effect, review of, 23:19252 (KURRI-TR-8, pp 4-23)
measurement using multiple Coulomb excitation, equipment development for, 22:46731(R) (COO-1746-8)
measurement using perturbed angular correlations, (T), 21:44803
measurement using reorientation effect following Coulomb excitation, quantum mechanical corrections to γ angular correlations in, (T), 23:23805
measurement using reorientation effect in Coulomb excitation, corrections to, (T), 22:24922
measurements for A = 120 to 170 nuclei, 24:43413
measurements for first 2⁺ states in even spherical nuclei using Coulomb excitation, multiple excitation corrections to, (T), 23:5871
measurements using nuclear reorientation effect, 25:12522 (LYCEN-7034, pp 42-57)
nuclear data tables for A = 150 to 190 and A > 220 regions, 25:1742
nuclear data tables on, 23:21411
quadrupole, for A = 18 to 38 nuclei as predicted by the shell model, (T), 25:20337
sign systematics of quadrupole, 21:27630
systematics of quadrupole, for vibrational states of even-even spherical nuclei, (T), 22:48520 (JAERI-1158, pp 90-5)
systematics of static quadrupole, for 2⁺ first excited states of rotational and vibrational nuclei, (T), 22:27276
theory of quadrupole, for first 2⁺ states of even-even nuclei, (T), 22:1706 (ITF-67-14)
theory of, survey of developments in, 22:46832
theory of, survey of developments in, 22:46832
variations of quadrupole, due to rotation in deformed even—even nuclei, 23:5960
NUCLEAR EMULSIONS

bremsstrahlung energy loss to ionization in, restricted, (E), 24:12926
cameras for, design and performance of, 21:39219
cascade shower production at 0.1 to 100 TeV in H-quantum existence in method for, 22:32157
characteristics and use of polymer—gelatin, for fast neutron personnel dosimetry, 24:19246
characteristics for use in electron microscopic autoradiography, 24:31789
charge identification of heavy primary cosmic particles in nonelectron sensitive, (E), 25:45314 (LUIP-CR-71-3)
charged-particle detection in, range—energy relation for, 23:41059 (UCRL-19214)
charged-particle discrimination in, developer for, 24:48268
charged-particle discrimination in, use of pulsed electric fields for, 23:29219 (IFA-PN-21)
charged-particle energy loss in, variation with grain density, 23:45555
charged-particle energy measurements in, multiple scattering method for, 23:11801
charged-particle identification in, photometer for, 22:19111
charged-particle interactions at ultrahigh energies in, analysis of distributions from, 21:33719
charged-particle reactions with atoms in, delta electron energy spectrum from, 24:20064
charged-particle reactions with nuclei in, method for elimination of accidental measurement errors in curvature of particle track from, (T), 23:36878
charged-particle scattering in, modification of multiple scattering theory for, 23:14035
charged-particle stopping in, differences between positive and negative, 23:46644 (UCRL-19211)
coagulation of grains of microdispersed powders in, prevention of, 23:16103
comparison with solid-state alpha detectors for monitoring uranium and plutonium-239 in urine, 21:14654
composition of BR NIKFI, BK NIKFI, and G-5 Ilford, 22:4477
conference on, 22:40369
cosmic alpha particle mean free paths and fragmentation above 10 GeV/nucleon in, (E), 25:36394
cosmic charged particle reactions with nuclei in, high-Z, (E), 24:35609
cosmic electron energy spectra above 200 GeV in, (E), 24:18064
cosmic heavy nuclei mean free paths and fragmentation above 10 GeV/nucleon in, (E), 25:36394
cosmic ion tracks in, model for width of, (E/T), 23:50169
cosmic meson (π) reactions with nuclei at 100 to 900 GeV in, corrections to energy estimates using Castagnoli method for, (E), 22:3267 (INR-828/VI/PH)
cosmic meson (π^-) interactions at 17 GeV in, method for determining primary energy for cosmic jet production from, (E/T), 23:16930
cosmic nuclei and nucleon reactions above 10^{12} eV with nuclei in, multiple meson production in, 21:37676
cosmic nuclei peripheral reactions in, baryon resonance production from, (E), 22:15671 (INR-P-816/VI/PH)
cosmic nuclei reactions at 0.010 to 1 TeV/nucleon in, fragmentation without visible particle production from, (E), 22:3236 (INR-792/VI/PH)
cosmic nuclei reactions at 10 to 1000 GeV/nucleon in, fragmentation without visible particle production from, (E), 21:29886
cosmic nuclei reactions in, fragmentation parameters for heavy, 22:21976
cosmic nuclei reactions with heavy and light nuclei above 1 TeV/nucleon in, (E), 23:51853
cosmic nuclei reactions with heavy nuclei in, central collisions in, (E), 21:13412
cosmic nuclei reactions with light nuclei above 700 MeV/nucleon in, energy distribution and mean energy of nonrelativistic doubly charged particle production in multicharged, (E), 25:59274
cosmic nuclei reactions with nuclei at 1 TeV/nucleon in, analysis of central reactions in, (E), 23:42554
cosmic nuclei reactions with nuclei at 1.2 x 10^{10} to 2.5 x 10^{13} eV/nucleon in, (E), 24:20074
cosmic nuclei reactions with nuclei at very high energies in, angular distribution and transverse momentum of p and α produced in, (E), 25:7549
cosmic nucleon and nucleus reactions with nuclei in, lower bound for momentum transferred between groups of secondary particles in large-multiplicity jets from, (E), 25:45662
cosmic nucleon interactions at 100 to 1000 TeV in, energy spectrum and transverse momentum of secondaries from, 21:37692
cosmic nucleon interactions at 2 to 3 TeV in, π^0 production with large energy transfer in, (E), 22:22307
cosmic nucleon interactions at 800 GeV in, hadron production in, (E), 23:5530
cosmic nucleon interactions at greater than or equal to 10^{12} eV in, (E), 22:13269
cosmic nucleon interactions N + N at 0.4 to 100 TeV in, fireball formation in, (E), 24:24234
cosmic nucleon reactions with nuclei at 1 TeV in, multiple meson production in, (E), 25:33532 (INP-713(Vol.2), pp 6-48)
cosmic nucleon reactions with nuclei at 1.2 x 10^{10} to 2.5 x 10^{13} eV in, (E), 24:20074
cosmic nucleon reactions with nuclei, at 10^{12} to 10^{13} eV in, particle composition of showers from, (E), 25:12093
cosmic particle interactions at 10^{12} to 10^{13} eV in, phi production in, (E/T), 21:37839
cosmic particle interactions at high energies at 2900 m in, photon spectrum in cascade production in, (E), 22:22286
cosmic particle interactions in, azimuthal angular distributions of secondaries from, 22:24677
cosmic particle interactions in, with low energy transfer into soft component, 22:24534
cosmic particle reactions at 10 to 300 GeV, properties of, 25:45663
cosmic particle reactions with nuclei above 100 GeV in, production of low-energy protons in, (E), 25:56429 (INP-754)
cosmic particle reactions with nuclei at 10^{13} eV in, angular distribution of secondaries produced in, (E), 23:34530
cosmic particle reactions with nuclei at high energies in, effect of connected stars in, (E), 22:39263
cosmic particle reactions with, azimuthal angular distributions of secondaries from, 21:33219 (INR-788/VI/PH)
cosmic primary helium differential energy spectrum and total flux from multiple Coulomb scattering in, 23:42009
cosmic proton interactions at 24 and 27 GeV/c in, azimuth angular distribution of shower particles from, 21:46480
cosmic proton interactions at 28.5 GeV in, method for determining primary energy for cosmic jet production from, (E/T), 23:16930
cosmic proton interactions p + N → p + N above 10^{12} ev in, cross section for, (E), 23:23346
cosmic proton reactions with complex nuclei at 17 and 24 GeV in, diffraction in, (E/T), 22:39262
cosmic proton reactions with nuclei at 10 to 1000 GeV in, spallation without particle production in, (E), 23:23345
cosmic proton reactions with nuclei at 10^{12} to 10^{13} eV in, production of eta, K, π, p, phi, and aleph baryon in, (E), 24:35604 (SJC-P-70-2)
cosmic proton reactions with nuclei at 80 TeV in, production of aleph baryon in, (E), 24:35605 (SJC-P-70-3)
cosmic ray interactions in TeV range in, (E), 22:3237
cosmic-ray interactions in large, production of mass 1960 to 2100 MeV, S = 0, I = $^1/_2$ baryons in, 21:35308
cosmic-ray stars in, at 7100 m, (E), 22:15383
cosmic-ray tracks in, mass resolution of, (E/T), 25:55894 (LUIP-CR-71-4)
data unfolding for neutron spectroscopy, computer method for, 24:44243 (CONF-691101-, pp 516-36)
description for personnel dosimetry, 24:36626 (STI/DOC-10/109)
description of combination spark chamber—, for 15-GeV cosmic photons, 22:10559
design and performance for personnel neutron dosimetry, 22:19168
design and performance of spherical water-moderated boron-loaded, for neutron monitoring, 24:25273
design and use of multiple sandwich, for cosmic ray detection, 24:20272(R) (NP-18091)
design for particle asymmetry measurements in inner radiation belt, (E), 22:47894(R) (N-68-23790)
design with producing layer for detection and measurement of cosmic radiation, 23:10961(R) (NP-17704)
deuteron inelastic reactions with nuclei up to 30 GeV/nucleon in, intranuclear cascade model for, (T), 25:25454 (JINR-P3-5548)
deuteron reactions with nuclei at 0.1 to 20 GeV/nucleon in, track multiplicity and correlation, and energy dependence of produced-particle scattering angle in, (T), 25:47892(T) (ORNL-tr-2503)
deuteron reactions with nuclei at 275 MeV in, number of prongs for inelastic, (T), 23:30766(T) (ORNL-tr-1934)
development and use for personnel monitoring at UKAEA, 24:27443
development and uses of, review on, 25:48921
development for detecting ultra-high energy air showers, 25:14845(R) (NP-18601)
development for electron autoradiography, 21:41209
development for electron autoradiography, 22:40367
development for electron microscopic autoradiography, 22:33638
development for neutron spectroscopy at low and intermediate energies, 24:33916 (HASL-230)
development for use in dosimetry of cosmic radiation, 22:12848(T) (JPRS-42730, pp 59-65)
development of doped silver chloride, for detection of ionizing particles, 25:54996 (IKF-28)
development of, for color radiography, 21:10558
diamond crystal loading in, method for, 21:6208
edge effects in, milling techniques for minimizing, 22:19106
efficiency for alpha detection and measurement, 21:27912
electron energy loss at relativistic velocities in, (E), 24:40234
electron energy loss from ionization in Ilford G-5, high-energy, (E), 24:51892
electron interactions at 10.0 and 16.0 GeV in, total and differential cross sections for inelastic, (E), 23:18788
electron interactions at high energies, experimental tests of cascade theory for, 23:14939
electron ionization losses at high energies in, (E), 21:3972
electron ionization—energy relation in, exact method for measuring relativistic, 24:12923
electron pair production in, energy estimation for, (T), 23:16951
electron reactions at 10.0 and 16.0 with nuclei in, total and differential cross sections for meson production in, (E), 24:12922
electron reactions at 13.75 GeV, direct production of electron pairs in, (E), 25:45640
electron reactions in, gap distribution measurements for ionization from ultrarelativistic, (E), 24:20057
electron reactions with nuclei at 13.75 GeV in, direct production of electron pairs from, (E), 25:14525
electron reactions with nuclei at 13.75 GeV in, trident production in, (E), 23:39610(R) (UCR-34-P-107-84)

elementary particle interactions at 10^{11} ev in, transverse-momentum distributions of secondaries from, (T), 21: 8589
elementary particle interactions at energies above 1.0 TeV in, method for measuring angular distributions of, 22:4471 (INR-794/VI/PH)
elementary particle reactions at high energies in, cross sections for, 21:27307
errors due to Coulomb scattering, calculation of, 24: 11767 (JINR-P1-4815)
expansion of, during processing, continuous measurements of, 21:303
grain counting for particle discrimination in, effect of mutual overlap on, 25:2457
grain density measurements in, methods for, 21:32394
grain density of Sakura, for low-energy particle discrimination, measurement of particle velocity relation to, 23:9698 (INSJ-108)
grain density relation to sensitivity of, model for, 24: 19207
grain sequences in, randomness of, 24:44249 (EUR-4452, pp 283-301)
grain size distributions in, determination using electron microscope, 24:14303
hadron reactions with nuclei at 1 to 100 TeV in, fireball model for N* production in, 22:41810 (INR-P-915)
hadron reactions with nuclei at 3.0 to 25 GeV/c in, helium-8 production from, (E), 22:3255
helium-8 production in, review of frequency of, 23: 18795 (CONF-671217-, pp 589-695)
hyperfragment production and decay in, computer program for kinematical analysis of, (T), 21:13821
hyperfragment stopping in, range—energy relation for, 24:47368 (CONF-690557-(Vol.1), pp 199-221)
hyperon (Σ^-) capture at rest in, hyperfragment production from, (E), 22:40366
hyperon (Σ^-) reactions with nuclei at rest in, hyperfragment production from, (E), 24:21934
image formation in, theory of recombination of positive holes and electrons for latent, 25:436
images in, at 4.2 to 1.5°K, regression of latent, 22:33639
images in, effects of electric fields on destruction of latent, 22:33641
images in, latent, 22:16871
interactions anti p + N at 3 GeV/c in, K and π emission in annihilation, (E), 22:46332
ion range-energy relations in, heavy, 21:4694
ionization effects in, 25:13299
ionization in, relativistic increase of, 24:33940
ionization in, relativistic increase of, 25:13299
ionization in, relativistic increase of, 25:34937(T) (CERN-Trans-71-9)
irradiation of, equipment for isotropic, 25:51900(P)
latent image fading of particle tracks at high temperatures, 24:20999
luminescence at low temperatures, 23:43558
luminescence of cadmium-doped silver bromide, 24: 16846
meson (K^-) absorption at rest by nuclei in, $\Sigma\pi$ pair emission, (E), 22:29641
meson (K^-) absorption by nuclei at rest in emulsions, properties of Σ^- and Σ^+ produced in, (E), 25:36400
meson (K^-) absorption by nuclei at rest in, Q-value distribution for detection of Λ-He^3, Λ-Li^6, and Λ-Be^9 produced in, (E), 25:36401
meson (K^-) capture at 0.8 to 3.5 GeV/c in, Λ potential well depth determination from, 21:44280
meson (K^-) capture by carbon at rest in diamond-loaded, charged $\Sigma\pi$ pair and Σ^+ and Σ^- production from, (E), 24:6693
meson (K^-) capture by nuclei at rest in diamond-loaded, separation into light and heavy nuclei, charged $\Sigma\pi$ pair, and Σ^+ and Σ^- production from, (E), 24:6693
meson (K^-) capture in diamond-loaded, hyperfragment production from, (E), 21:15490
meson (K^+) elastic scattering at 240 to 300 MeV in, optical model analysis of, 22:18323
meson (K^-) interactions at 2.3 GeV/c in, hyperfragment production from, (E), 21:44290
meson (K^-) interactions at rest in, production of $\Lambda p(2110)$ enhancement in, (E), 25:22703
meson (K^-) interactions in, double hyperfragment production and binding energy from, 21:23314 (BNL-994, pp 70-102)
meson (K^-) interactions in, hypernuclei production from, (E), 21:13677(R) (AD-641991)
meson (K^-) interactions in, Λ production from, (E), 21: 18916
meson (K^-) interactions in, π^+ decay of Λ-Be^7 and Λ-B^9 from, (E), 23:1600
meson (K^-) reactions at 0.8 to 3.5 GeV/c in, Λ potential well depth determination from, 21:44280
meson (K^-) reactions at 1.5 GeV/c in, very short-range hyperfragment production in, (E), 22:32066
meson (K^-) reactions at 1.5 GeV/c with nuclei in, fragment and hyperfragment production in, (E), 23: 13043
meson (K^-) reactions at 1.5 GeV/c, hyperfragment production in, (E), 21:9956 (DESY-66/23)
meson (K^-) reactions at 1.5 GeV/c, mass estimates of short-range hyperfragments from, (E), 21:4239
meson (K^-) reactions at 10.1 GeV/c, production of hypernuclei from, (E), 23:32910
meson (K^-) reactions at 800 MeV/c with nuclei in, production and decay of hyperfragments in, (E/T), 23: 3761
meson (K^-) reactions at rest in, hyperfragment binding energy determination from, (E), 21:4208
meson (K^-) reactions at rest in, Λ-^{9}Be and Λ-^{6}Li resonant state production from, (E), 21:29891
meson (K^-) reactions with bromine and silver nuclei at 800 MeV/c in, heavy hyperfragment production and decay in, (E), 22:24564
meson (K^-) reactions with heavy nuclei at 3, 5, and 10.1 GeV/c in, lithium-8 production from, (E/T), 23:14981
meson (K^-) reactions with heavy nuclei at 800 MeV/c, spallation model for hyperfragment production in, (T), 22:27253
meson (K^-) reactions with nuclei at 0 to 5 GeV/c in, rates for hyperfragment production from, (E), 25: 38655
meson (K^-) reactions with nuclei at 1.5 GeV/c in, hammer tracks of helium-8 fragments from, (E), 22: 15688
meson (K^-) reactions with nuclei at 1.5 GeV/c in, hyperfragment and strange particle production in, (E), 24:10684
meson (K^-) reactions with nuclei at 1.5 to 10.1 GeV/c in, Monte Carlo calculations for double production of lithium-8 in, (E/T), 24:37624
meson (K^-) reactions with nuclei at 3.0 GeV/c in, hyperfragment production in, (E), 25:5277
meson (K^-) reactions with nuclei at 3.0 to 10.1 GeV/c in, double hyperfragment production and decay from, (E), 22:13664
meson (K^-) reactions with nuclei at 6 GeV/c in, production of $\Lambda\Lambda$-C^{11} and Ξ-B^{11} from, (E), 25:22688 (JEN-217-IFIC/I-4)
meson (K^-) reactions with nuclei at 6 GeV/c in, production of Ξ-B^{11} and $\Lambda\Lambda$-C^{11} from, (E), 24:47381 (CONF-690557-(Vol.2), pp 758-75)
meson (K^-) reactions with nuclei at 6 GeV/c in, spallation model for hypernuclei production from, (E/T), 22:5508
meson (K^-) reactions with nuclei at 800 MeV/c in, heavy hyperfragment production from, (E), 22:50288 (JEN-193-DF/I-57)
meson (K^-) reactions with nuclei at rest in, Λ-He^5 hyperfragment decay mode determination from, (E), 22:34848 (NP-17481)
meson (K^-) reactions with nuclei at rest in, production of (Σ^-n) bound state from, (E), 22:7450
meson (K^-) reactions with nuclei at rest in, search for Λ—He^{5*}, Λ—Li^6, and Λ—Be^{9*} production in, (E), 24: 32964
meson (K^-) reactions with nuclei in, hyperfragment and lithium-8 fragment production in, (E), 22:24548
meson (K^-) reactions with nuclei in, mass estimates of nonmesically decaying short-range hyperfragments from, (E), 21:9966
meson (K^-) scattering in, cross sections for cosmic, (T), 22:22299
meson (K^+) scattering in, cross sections for cosmic, (T), 22:22299
meson (μ) energy and angular distributions in, 3- to 10-TeV, (E), 25:45648
meson (μ) inelastic scattering at 6 and 12 GeV/c in, method for analysis of, 24:39351
meson (μ) interactions at 5 GeV/c in, cross section for π production in, 22:22289
meson (μ) reactions at 2.5 GeV, differential cross sections for, (E), 21:2363
meson (μ) reactions at 4.9 to 15.9 GeV/c in, diffractively produced rho in, (E), 25:33526
meson (μ) reactions at 6 and 12 GeV in, K values from multiple Coulomb scattering in, (E), 24:37609
meson (μ) reactions with nuclei at 10.5 GeV in, total and differential cross sections for meson production in, (E), 24:12922
meson (μ) reactions with nuclei at 12 GeV/c in K5, total cross sections for particle production in, (E), 25:17367
meson (μ) scattering at 2.5 to 14.8 GeV/c at small angles in, multiple scattering techniques and particle energy determination from angular distributions in, (E), 25:12089
meson (μ) scattering by nuclei in, cross sections for cosmic, (E), 22:52915
meson (μ) single scattering at 5 GeV/c in, distribution of small-angle, (E), 22:24516
meson (μ^-) absorption by bromine and silver at rest in, proton spectra above 25 MeV from, (E), 24:30462
meson (μ^-) capture by carbon, nitrogen, and oxygen in, relative probabilities of reaction channels for lithium-8 production in, (E), 25:53516 (JINR-P1-5893)
meson (μ^-) capture by carbon-12 in, energy spectra, angular correlations, and relative probability for lithium-8, helium-3, neutron, and neutrino production in, (E), 25:53516 (JINR-P1-5893)
meson (μ^-) interactions at 10.5 GeV in, total and differential cross sections for inelastic, (E), 23:18788
meson (μ^-) reactions at 10.1 and 15.8 GeV/c, giant dipole resonance from, (E), 25:33521
meson (μ^+) reactions at 10.1 and 15.8 GeV/c, giant dipole resonance from, (E), 25:33521
meson (μ^+) reactions at 10.3 GeV in, structure functions for, (E), 25:3260
meson (μ^-) reactions at 15.9 GeV in, structure functions for, (E), 25:3260
meson (π) and nucleon reactions with nuclei at 50 to 80 GeV in, intranuclear cascade model calculations for, 23:36952 (JINR-P2-4510)
meson (π) energy loss at relativistic velocities in, (T), 24:40234
meson (π) energy loss to ionization at 5 GeV/c in, restricted, (E), 24:12926
meson (π) interactions above 200 GeV in, review of multiple production from, 22:9509 (INR-P-826/VI/PH)
meson (π) interactions at 16.2 GeV/c in, production of fast deuterons and tritons in, (E), 22:34846
meson (π) interactions π + N at 17.2 GeV in nuclei in, cascade model analysis of, 21:33617
meson (π) interactions π + N at 17.2 GeV/c in, charged particle and single slow recoil proton production in, (E), 22:34984
meson (π) interactions π + N at high energies in, multiplicity and angular distribution of secondaries in, (T), 22:32060
meson (π) multi-prong interactions π + N at 17 GeV in, analysis of, 22:34863
meson (π) range at 10 to 50 MeV in, 21:21217
meson (π) reaction with nuclei below 18 GeV in, multiple production from, (E), 22:7439
meson (π) reactions at 200 GeV with nuclei in, coherent particle production for cosmic, (E), 21:27026
meson (π) reactions at 3.5 and 17.2 GeV/c in, analysis of nonmesonic hyperfragments from, (E), 21:4207
meson (π) reactions at 3.5 and 17.2 GeV/c in, mechanism for hyperfragment production from, (E), 21:4206
meson (π) reactions at 4.4 GeV/c in, isobar model analysis of, 21:3979
meson (π) reactions at 5 GeV/c in, energy loss by ionization in, (E), 23:14940
meson (π) reactions at 60 GeV/c in, helium production in, (E), 25:9660
meson (π) reactions at 7.8 to 17.5 GeV, helium-3 emission in, (T), 21:31714
meson (π) reactions at 8 and 17 GeV in, isobar model analysis of, (E), 21:3993
meson (π) reactions at high energies, mass distribution and decays of hyperfragments produced in, (E), 25: 9637
meson (π) reactions with nuclei at 0.01 to 20 GeV in, Monte-Carlo calculations of intranuclear cascades from, (T), 24:10689
meson (π) reactions with nuclei at 20 GeV/c in, angular distributions of charged secondaries in, (E), 23:34545
meson (π) reactions with nuclei at 200 GeV in, coherent particle production in, (E), 23:23370
meson (π) reactions with nuclei at 200 GeV in, intranuclear cascade model for, 22:34980 (JINR-P4-3800)
meson (π) reactions with nuclei at 45 to 200 GeV in, 3π and 5π production in, (E), 25:9635 (INP-722)
meson (π) reactions with nuclei at 60 GeV in, K/π ratio of secondaries in shower production from, (E), 25: 14509 (INP-718)
meson (π) reactions with nuclei at 60 GeV in, production of low-energy protons in, (E), 25:56429 (INP-754)
meson (π) reactions with nuclei at high energies in, frequency distribution of heavy prongs from, (E), 22: 7438
meson (π) reactions with nuclei at very high energies in, energy estimation in, 22:24546
meson (π^+) and (π^-) relative stopping in, at low velocities, (E), 23:23381
meson (π^-) capture at 15 MeV by nuclei in, double charge exchange in, (E), 22:46335 (JINR-P1-3946)
meson (π^+) capture by nucleon pairs in complex nuclei at 70 MeV in, (E), 21:25239
meson (π^-) coherent reactions with bromine and silver at 17 GeV/c in, (E), 22:13663
meson (π^-) diffraction and inelastic scattering by nuclei at 3.5 GeV/c in, (E), 23:23379
meson (π^-) interactions at 16.2 GeV/c in, cross sections for direct production of electron—positron pairs in, 22:26570
meson (π^-) interactions at 17.2 GeV in, parameters of, (E), 24:10682
meson (π^-) interactions at 17.2 GeV/c in, Σ and K production in secondary and primary, (E), 22:32069
meson (π^-) interactions at 20 GeV/c in, energy estimation from angular distribution of secondaries in, (E), 25:3284
meson (π^-) interactions at 200 GeV in, intranuclear cascade model for, 22:46449
meson (π^-) interactions at 210 to 375 MeV in, cross sections for π production and double charge exchange in, (E), 22:48228 (JINR-P1-3947)
meson (π^-) interactions π^- + e at 16.2 GeV in, knockon electrons and electron pair production from, (E), 21:46463
meson (π^-) interactions π^- + N at 50 to 175 MeV in, π^+ energy and angular distributions for, (E), 22:50307
meson (π^-) interactions π^- + p at 17.2 GeV/c in emulsions, angular distribution of secondary pions in, (E), 22:34864
meson (π^-) interactions π^- + p at 17.2 GeV/c in, resonances in distribution of residual effective mass in, (E), 22:39294
meson (π^-) interactions with nucleons at 17.2 GeV/c in, 22:44336
meson (π^-) momentum in, method for measuring, 25: 53030
meson (π^-) multiple scattering at 60 GeV in, (E), 25: 53030
meson (π^-) reactions (π^-,N) at 7 GeV in, momentum spectra of secondary particles from, 21:42270
meson (π^-) reactions at 16.2 GeV in, (E), 25:7559
meson (π^-) reactions at 17 GeV/c in, electron pair production from, (E), 21:3994
meson (π^-) reactions at 17.2 GeV in, coherent meson (π) production from, (E), 21:3992
meson (π^-) reactions at 17.2 GeV in, mechanism for multiple meson (π) production from, (E), 21:3991
meson (π^-) reactions at 17.2 GeV/c with, azimuthal effects of two prong πN and three prong diffraction dissociation events produced by, (E), 23:1595 (KFKI-26/1968)
meson (π^-) reactions at 3.5 and 17.2 GeV/c in, hyperon (Λ) multinucleon interactions in hyperfragments from, (E), 21:4193
meson (π^-) reactions at 3.5 GeV/c in, heavy short-range hyperfragment production from, (E), 22:5500
meson (π^+) reactions at 60 GeV, angular distributions of tracks from, (E), 25:53025
meson (π^-) reactions at 60 GeV/c with nuclei of, cross sections and angular distributions for 3π and 5π coherent production in, (E), 24:15495
meson (π^-) reactions at 7.2 GeV/c with nuclei in, fractional yields of π, K, and p from, (E), 23:18813
meson (π^-) reactions with bromine and silver at 7.5 GeV in, cascade calculation for, 23:39754

meson (π^-) reactions with heavy nuclei at 17 GeV/c in, interaction mechanism and nuclear structure determination from fragmentation in, (E), 23:21050 (JEN-195-IFIC/I-59)
meson (π^-) reactions with nickel-58 at 15 MeV in, cross section for double charge exchange in, (E), 23:19237
meson (π^-) reactions with nuclei at 17 GeV in, selection technique for coherent, (E), 25:30736 (JINR-P1-5565)
meson (π^-) reactions with nuclei at 17 GeV/c in, electron pair production from, (E), 22:5488
meson (π^-) reactions with nuclei at 17.2 GeV in, coherent production of mesons (π) in, (E), 23:18809
meson (π^-) reactions with nuclei at 17.2 GeV in, properties of showers produced in, (E), 25:36418
meson (π^-) reactions with nuclei at 17.2 GeV in, review of transverse momentum in, 23:18795 (CONF-671217-, pp 589-695)
meson (π^-) reactions with nuclei at 17.2 GeV/c in, Monte Carlo calculations for double production of lithium-8 in, (E/T), 24:37624
meson (π^-) reactions with nuclei at 17.2 GeV/c in, coherent production of $\pi^-\pi^+\pi^-$ in, (E), 23:51865
meson (π^+) reactions with nuclei at 185 to 295 MeV in emulsions, cross sections for π^- and π^+ production in, (E), 25:19919
meson (π^-) reactions with nuclei at 200 GeV in, incoherent multiple production of particles in cosmic, (E), 22:32068
meson (π^-) reactions with nuclei at 210 to 375 MeV in, π production and double charge exchange cross sections for, (E), 23:25527
meson (π^-) reactions with nuclei at 3.5 GeV/c in, emission of hammer tracks from, (E), 25:1400
meson (π^-) reactions with nuclei at 45 and 60 GeV/c in, cross sections of coherent production in, (E), 24:40264 (JINR-P1-5072)
meson (π^-) reactions with nuclei at 50 GeV/c in, (E), 23:32638
meson (π^-) reactions with nuclei at 60 GeV in, coherent, (E), 25:17398
meson (π^-) reactions with nuclei at 60 GeV in, meson (π) pair production and properties of π + p and π + n interactions in, (E), 24:10673
meson (π^-) reactions with nuclei at 60 GeV/c in, (E), 25:1410 (JINR-P1-5326)
meson (π^-) reactions with nuclei at 60 GeV/c in, average multiplicity and coherent production in, (E), 24:30459 (INP-694)
meson (π^-) reactions with, polarization of lithium-8 fragments produced by, (E), 25:53771
meson (π^+) scattering in, cross sections for cosmic, (T), 22:22299
meson (π^-) scattering in, cross sections for cosmic, (T), 22:22299
meson π + N interactions at 17 GeV in, angular momentum and momentum transfer squared in, (E), 22:44324
meson reactions (π^-, $2\pi^-\pi^+$) and (π^-, $3\pi^-$ $2\pi^+$) with nuclei at 17 and 45 GeV in, mean free paths for coherent, (E), 25:59313
meson(π) reactions with nuclei at 200 GeV in, intranuclear cascade production in, (E), 25:33532 (INP-713(Vol.2), pp 6-48)
mesons (K^-) interactions with protons in, up to 250 MeV/c, cross sections for, (E), 23:13036
mesons (μ) interactions with electrons at 10.1 GeV/c in, energy of knock-on electrons from, (E), 23:49028
mesons (π) reaction at 200 GeV with, four-momentum transfer and effective mass in, (T), 23:3756
mesons (π) reactions at 50 to 300 MeV in, cross sections for double-charge exchange, 21:40244
mesons (π^+) scattering up to 80 MeV from, (E), 23:35514 (JINR-P1-4490)
mesons(K^-) reactions with heavy nuclei at 1.5 to 3.5 GeV/c in, emission of lithium-8 fragments in, (E), 25:14978
multiple scattering techniques using, μ scattering by nuclei at 2.5 to 14.8 GeV/c at small angles for study of, (E), 25:12089
neutron reactions with lithium-6 and boron-10 in, use of pulsed electric field for track separation in analyzing, (E), 23:45541
neutron reactions with nuclei at high energies in, neutron spectrum determination from grey prongs in stars from, (E), 21:28213 (UCRL-17063)
neutron scattering in, cross sections for cosmic, (T), 22:22299
neutron spectra determination from measured star production in, 24:16837 (UCRL-19389)
nuclear spallation in, high-energy helium-3 and t emission from, (T), 22:13778
nucleon interactions above 10^{12} eV in, transverse momentum lower limit and four-momentum transfer of recoil protons from, (E), 21:15261
nucleon interactions above 200 GeV in, review of multiple production from, 22:9509 (INR-P-826/VI/PH)
nucleon interactions N + N at 1000 TeV in, inelasticity of jets in, (E), 22:29622
nucleon interactions N + N at high energies in, multiplicity and angular distribution of secondaries in, (T), 22:32060
nucleon reactions above 1 TeV in, shower production in, (E), 22:39254(T) (ORNL-tr-1956)
nucleon reactions at 6 to 1000 GeV, many-particle mechanisms of, 21:7519 (JINR-P2-3005)
nucleon reactions with nuclei above 10 TeV in, fireball model for, 22:5597 (INR-813/VI/PH)
nucleon reactions with nuclei at 0.1 to 100 TeV in, angular distributions, pionization, and fireballs in, (E), 25:9635 (INP-722)
particle events in, calculation from data of few independent observations, 21:307
particle events in, independent scanning statistics for, 21:16198
particle events in, search statistics in method of double and multiple scan in estimating, 23:43599
particle production in 60-GeV accelerator and 1000-Gev cosmic-ray jets in, comparison of K/π ratio for multiple, (E), 24:49305
particle reactions with nuclei at high energies in, simultaneous detection of Dalitz pairs and localization of origins of π^0 produced in, (T), 24:40227 (IFA-CR-60)
particle track amplification in, processing method for, 24:14250
particle track analysis for mass determination of cosmic-ray carbon, 25:18643 (NP-18672)
particle track analysis in, 24:480 (COO-1671-16)
particle track analysis in, for neutron spectroscopy, random-drift method using automatic microscope for, 22:16895
particle track analysis in, slicing method for side-viewing, 21:6217
particle track analysis using mean track width and blob measurements in breakup event, 25:18795
particle track counting in, for fast neutron dosimetry, automatic system for recoil -proton, 24:16831 (AERE-R-6220)
particle track curvature in, method for elimination of accidental errors in measuring, 23:36878
particle track data from, computer programs for processing of, 22:6646
particle track discrimination in, developers for, 24:33904
particle track discrimination in, effect of pH of uranyl nitrate on, 24:50555
particle track distortion in, correlation function for spurious scattering from, 22:8387
particle track distortions and spurious scatterings in, (E), 21:1599
particle track fading in K-5, at 40°C, 24:5926 (IFA-CR-58)
particle track formation in, 24:481 (COO-1671-17)
particle track formation in, theory for, 24:5913
particle track formation in, theory of, 25:13209 (COO-1671-28)
particle track geometry in, study of transverse 10-GeV proton, 25:51897
particle track length in, determination of shrinkage factor for correcting, 23:7744
particle track lengths in, use for studying multiple proton scattering, 22:21323
particle track location in, use of spark chamber for cosmic, 24:14310
particle track location in, wide-gap spark chamber for, 24:5931
particle track measurements in, development of automatic systems for, 22:40367
particle track measurements in, for neutron spectroscopy, semi-automatic system for, 25:2433 (CEA-R-4063)
particle track measurements in, semiautomatic microscope for, 21:6287
particle track measurements in, use of intermediate microphotography for, 21:10639
particle track microdistortions in type-R, under various development treatments, 21:28259
particle track profile measurements in, development of microdensitometer for, 21:10644
particle track profiles in, relativistic, 25:426
particle track scanning system for, automatic, 23:1882 (WASH-1093)
particle track width in, method for calculation of multiply charged, 25:29381
particle tracks from high-energy charged particles produced in proton reactions with aluminum-27 and carbon-12 at 660 MeV, hammerlike, (E), 25:40876
particle tracks in G-2 and K-5, properties of, 24:44254 (EUR-4452, pp 631-52)
particle tracks in homogeneous magnetic field in, momentum estimation of electron, 24:36615 (KFKI-70-10-HEP)
particle tracks in Ilford G-5, method for measuring width of primary cosmic heavy ion, 22:38047
particle tracks in L4, charge identification from, 22:38046
particle tracks in, analysis of hammer, 22:16874
particle tracks in, analysis of high-energy, 24:23022
particle tracks in, analysis of nuclear reaction, 25:48912
particle tracks in, analysis of search statistics of rare events in, 23:693
particle tracks in, automatic counter for proton recoil, 23:26581 (AERE-R-5876)
particle tracks in, automatic readout system for proton-recoil, 23:31562 (INR-963)
particle tracks in, automatic scanner for, 24:29529
particle tracks in, automatic scanner for analysis of, 23:1929(R) (COO-1265-67)
particle tracks in, automatic scanning device for, 25:49010
particle tracks in, characteristics of spurious scattering in, 25:29378
particle tracks in, charge identification of, 25:29380
particle tracks in, computer simulation of random-drift sampling method for selecting and measuring, 23:629
particle tracks in, computer-based system for automatic scanning of, 24:7677 (CONF-690301-, pp 434-45)
particle tracks in, computer-based system using digitized video scan for analysis of, 23:26516 (N-69-18111)
particle tracks in, cross-wire digitized eyepiece for measuring, 22:49168
particle tracks in, densitometer for measurement of, 25:39758
particle tracks in, dependence on cross section of incident particle interactions with free nucleon for high-energy, 23:45544 (JINR-P2-4521)
particle tracks in, design of automatic counter for proton-recoil, 23:43608
particle tracks in, design of automatic recording microscopes for analysis of, 21:39246
particle tracks in, design of digitized microscope operating on-line to small computer for analysis of, 23:47760
particle tracks in, determination of isotopic composition of cosmic ray carbon by analysis of, 24:44317
particle tracks in, development of automatic scanner for, 25:18690
particle tracks in, device for measuring, 21:296
particle tracks in, device for recording positions of, 21:16189
particle tracks in, digital computer for photoelectric analysis of, 21:14432 (IS-1465)
particle tracks in, digitized co-ordinate recording device for microscope for analysis of, 24:44320
particle tracks in, distribution of individual grain noise on relativistic, 23:11815
particle tracks in, electronic equipment for counting, 22:28169
particle tracks in, for neutron detection, measurement of proton-recoil, 25:18728
particle tracks in, incline microscope stage for scanning, 23:43546
particle tracks in, logic unit of PFIL 70 photometer for measuring, 25:55045 (LUIP-CR-71-2)
particle tracks in, measurement of small angle scattering in, 25:42139
particle tracks in, method for discrimination of cosmic ion, 23:2566
particle tracks in, method for electronic scanning of, 21:17857
particle tracks in, method for statistical analysis of data on, 22:370
particle tracks in, method for studying, (T), 22:43101
particle tracks in, method of least squares for elimination of distortion of sloping, 24:14304
particle tracks in, multiple scattering measurements on electron, 24:33937
particle tracks in, orthogonal mechanical scanner for determining mass spectrum of fission, 21:39193(T) (ANL-Trans-509)
particle tracks in, PAULETTE system for counting, 21:34466 (CONF-660527-, pp 177-85)
particle tracks in, scanning efficiency for analysis of, 23:7793
particle tracks in, semiautomatic readout for multiple microscope systems for scanning, 24:9722
particle tracks in, semiautomatic scanning system for analysis of, 25:10839
particle tracks in, television system for scanning, 25:55021
particle tracks in, use of high-resolution spark chambers for locating, 24:44318
particle trcks in, relativistic increase of ionization and sensitivity for energy dependence of density of, 25:34937(T) (CERN-Trans-71-9)
performance as high-energy accelerator detectors, 25:23853
performance for autoradiography, 22:33769
performance for cosmic shower research, evaluation of, 25:25284
performance for fast neutron dosimetry of personnel, 22:21530
performance for fast neutron spectrum measurement in high gamma fluxes, 23:33398
performance for magnetic pole detection, model for, 23:50169
performance for measurement of radiation dose in environs of synchrocyclotrons, 22:21529
performance in measuring α activity of natural environment samples, 22:2211
performance of airborne chambers of, for detection and measurement of cosmic radiation, 23:10961(R) (NP-17704)
performance of boron-10-loaded, for determining direction and energy of fast cosmic neutrons, 25:49002
performance of G-5, variation of scattering factor for, 21:3252
performance of Ilford G-5 and K-2, for neutron spectrum measurements, 24:4421 (CEX-65.60)
performance of Ilford-K2, for measurement of neutron spectrum from americium—beryllium source, 25:18761
performance of polymer gelatin, for fast neutron dosimetry, 25:55057
photon energy loss to ionization in, restricted, (E), 24:12926
photon reactions at 0.4 to 1 GeV, cross sections for, (E), 23:14944
photon reactions at 845 to 2000 GeV in, angular and lateral structure of electromagnetic cascade production from, (E), 22:3242
photon reactions with nuclei at high energies in, cross sections for triplet production in, (E), 25:17362
photon reactions with nuclei in, asymmetry ratio and differential cross sections in opening angle for electron pair production in, (E), 25:17364
photon spallation of nuclei up to 1.1 GeV in, hammer track formation in, (E), 25:50051
positron energy loss at relativistic velocities in, (T), 24:40234
preparation of 1000-1200 μ thickness, method for, 24:33941
preparation of blocks of, 23:16102
preparation of plates of electron-sensitive, 22:45305
preparation of, for fast neutron dosimetry, use of synthetic hydrophilic polymers for, 22:16911
preparation of, review on, 21:41219
preparation of, theoretical aspects of, 22:40368
preparation, uses, and processing of, review of Soviet, 22:23287
processing for discrimination of alpha and recoil proton tracks, 25:57731
processing of, 22:40368
processing of thick, developers for, 23:47768
processing of thick, effect of acid—basic buffer capacity of developer on, 25:46634
processing of thick, two potential method for, 23:47769
processing of thin, 25:18729
processing of, methods development for, 21:40421(R) (COO-1549-3)
processing of, methods development for, 22:5809(R) (ANL-7354)

processing of, review on, 23:45522
processing using amidol and sodium thiocyanate, discriminating power and activity of, (E), 25:23830
properties and uses of, 21:12645(T) (AD-643601)
properties of hydrogen-enriched, for fast neutron dosimetry, 21:1646
properties of IFA EN3, for electron detection, 24:46483
properties of, effects of heating and drying on, 21:26173
properties of, photographic and mechanical, 24:16827 (AD-488329)
proton and antiproton reactions at 3.7 GeV/c, cross sections for, (E), 21:31762
proton elastic interactions p + N in nuclei at 24 and 1000 GeV in, TeV-region cross section for, (E), 21:44260 (INR-802/VI/PH)
proton energy loss at 5 to 24 GeV/c in, 22:11575
proton energy loss at relativistic velocities in, (T), 24:40234
proton energy loss to ionization at 5 to 24 GeV/c in, restricted, (E), 24:12926
proton fission of bromine and silver nuclei at 20 GeV/c, (E), 22:53162
proton inelastic scattering by nuclei in G-5, absorption mean free paths for, (E), 22:29621
proton interactions at 10 GeV, track counting technique for determining total cross section for, 23:2647
proton interactions at 20 GeV in, π diffraction generation from, (E), 21:17035
proton interactions at 25 GeV/c in, energy of primary and cms velocity of jets from, (E), 21:44263
proton interactions at 6.2 and 28 GeV/c in, production of fast deuterons and tritons in, (E), 22:34846
proton interactions p + n at 19.8 GeV/c in, N*(5000) production in, (E), 22:39259
proton interactions p + N at 20 GeV in, analysis of asymmetric separation of charged secondary particles from, (E), 22:32052
proton ionization—energy relation in, exact method for measuring relativistic, 24:12923
proton multiple scattering at 25 and 27 GeV/c in, interference effects in, (T), 21:4062
proton range and stopping power at 0.1 to 1000 GeV, density-effect correction for, 24:35632
proton reactions at 10 GeV with nickel in, fragmentation parameters for, 22:21976
proton reactions at 10 to 300 GeV, properties of cosmic, 25:45663
proton reactions at 13.8 GeV/c with bromine and silver in, fragmentation in, (E), 23:3991
proton reactions at 13.8 GeV/c with bromine and silver in, fragmentation in, 23:3990
proton reactions at 2 to 9 GeV in, fragments produced by, (E), 21:17325
proton reactions at 20 GeV/c in, heavy short-range hyperfragment production from, (E), 22:5500
proton reactions at 20.8 GeV/c with, in magnetic field, angular and momentum distributions of secondary particles in, (E), 23:13029
proton reactions at 22.8 GeV in, (E), 21:3981
proton reactions at 23 GeV/c in, hyperon (A) multinucleon interactions in hyperfragments from, (E), 21:4193
proton reactions at 23.0 GeV/c in, analysis of nonmesonic hyperfragments from, (E), 21:4207
proton reactions at 24 and 27 GeV/c in, analysis of small size stars from, (E), 21:3980
proton reactions at 24 GeV in, p + N elastic cross section in TeV region from, 21:44266
proton reactions at 25 GeV/c, fragment emission in, (E), 21:4250
proton reactions at 27 GeV in, energy of charged baryons from, (E), 21:3983
proton reactions at 28 GeV in G-5, along-the-track scanning method for total cross section for, (E), 22:29624
proton reactions at 28 GeV with, energy spectra of lithium-8 fragments from, (E), 25:59278
proton reactions at 3 GeV/c in, strong-absorption model for, 23:30767
proton reactions at 30.5 GeV/c, meson production from, (E), 21:5354
proton reactions at 5 to 24 GeV/c in, energy loss by ionization in, (E), 23:14940
proton reactions at 500 MeV in, helium nuclei emission from, (E), 21:9700
proton reactions at 6.2 GeV/c in, isobar model analysis of, 21:3979
proton reactions at 660 MeV, production of slow π mesons in, (E), 25:53010
proton reactions at 9 to 19.5 GeV, helium-3 emission in, (T), 21:31714
proton reactions at high energies, frequency distribution of heavy prongs from, 22:7438
proton reactions at high energies, mass distributions and decays of hyperfragments produced in, (E), 25:9637
proton reactions with bromine and silver at 13.8 GeV/c in, particle production in, (E), 22:24531 (JEN-174-DF/I-52)
proton reactions with bromine and silver at 24 GeV in, models for analysis of fission-like disintegrations from, (E/T), 22:20126
proton reactions with heavy nuclei at 13.8 and 24 GeV/c in, interaction mechanism and nuclear structure determinations from fragmentation, (E), 23:21050 (JEN-195-IFIC/I-59)
proton reactions with heavy nuclei at 20 GeV/c, beryllium-8 production in, (E), 23:10969
proton reactions with heavy nuclei at 20.8 GeV/c in, π^+ and π^- diffraction production in, (E), 25:53012
proton reactions with heavy nuclei at 24 GeV/c in, complete disintegration, (E), 22:22298
proton reactions with heavy nuclei at 9 GeV in, fast deuteron emission in, (E), 22:7436
proton reactions with light nuclei at 22 GeV/c in, particle production in, (E), 23:1820
proton reactions with nuclei at 0.05 to 30 GeV in, Monte Carlo method for calculating intranuclear cascades from, 24:6732
proton reactions with nuclei at 0.1 to 20 GeV/nucleon in, track multiplicity in, (T), 25:47892(T) (ORNL-tr-2503)
proton reactions with nuclei at 1000 GeV in, K/π ratio of secondaries in shower production from, (E), 25:14509 (INP-718)
proton reactions with nuclei at 19.8 GeV/c in, energy spectra and angular distribution of heavy secondary particles from, (E), 23:52122
proton reactions with nuclei at 19.8 GeV/c in, particle coherent production mechanism and N'(1470) production in, (E), 25:22672
proton reactions with nuclei at 2.26 GeV in, helium-4 emission from, (E), 21:25477
proton reactions with nuclei at 20 and 23 GeV in, fireball formation in, (E), 23:18798
proton reactions with nuclei at 20 and 24 GeV/c in, double emission of heavy fragments from, (E), 25:1399
proton reactions with nuclei at 20 GeV in D, T, ^{3}He, and ^{4}He fragment production in, (E), 24:3513
proton reactions with nuclei at 20 GeV/c in, emission of hammer tracks from, (E), 25:1400
proton reactions with nuclei at 20 to 23 GeV in, diffraction production of particles in, (E), 22:44322
proton reactions with nuclei at 20.8 GeV/c in, distributions of transverse momenta of secondary particles in, (E), 22:32053
proton reactions with nuclei at 20.8 GeV/c in, mechanism for π^+ and π^- diffractive production in, (E), 25:1406
proton reactions with nuclei at 21 and 24 GeV in, resonance production in, (E), 22:44321
proton reactions with nuclei at 22.8 GeV/c in, method for identification of shower particles from, (E), 25:36402
proton reactions with nuclei at 23 GeV in, momentum, angular, and energy distributions from quasi-nucleon, (E), 25:1403
proton reactions with nuclei at 24 GeV/c in, deuteron emission in, (E), 25:36403
proton reactions with nuclei at 24 GeV/c in, double emission of Z > 3 fragments in, (E), 22:44326
proton reactions with nuclei at 24 GeV/c in, N(1240) production in, (E), 24:40252
proton reactions with nuclei at 25 GeV/c in, azimuthal angular distribution of secondary particles in diffractional generation in, (E), 22:32051
proton reactions with nuclei at 26 GeV in, emission of excess of light mesons in relation to Dalitz pairs in, (E), 25:9642
proton reactions with nuclei at 3 GeV/c at small angles in, computer test progtams for, 22:20690
proton reactions with nuclei at 3 GeV/c in, (E), 23:32616
proton reactions with nuclei at 3 GeV/c in, absorption cross sections for, (E), 25:45656 (FRNC-TH-28)
proton reactions with nuclei at 6 to 25 GeV/c in, Monte Carlo calculations for double production of lithium-8 in, (E/T), 24:37624
proton reactions with nuclei at 80 TeV in, aleph baryon production in, (E), 25:9641
proton reactions with nuclei at 9 GeV in, fast deuteron emission in very large stars from, (E), 21:29439 (INR-775/VI/PH)
proton reactions with nuclei at 9 GeV in, yield of slow π^- and π^+ from, (E), 22:39260
proton reactions with nuclei below 28 GeV in, multiple production from, (E), 22:7439
proton reactions with nuclei in, at 24 and 27 GeV/c, (E), 22:1687
proton reactions with silver and bromine in, production of fast helium nuclei in, 22:22301
proton recoil spectra in, geometric correction factors for, 25:10867 (CEA-R-4081)
proton recoil track counting in, development of microscope—television system for, 21:32416
proton recoil tracks in, use of microscope-television system for counting, 21:26159 (UCRL-50007-66-2, pp 28-30)
proton scattering at 5 to 24 GeV/c in, multiple Coulomb, (E), 22:46331
proton scattering by nuclei at 19.8 GeV/c in, multiple Coulomb effect in, (E), 23:16923
proton scattering in, cross sections for cosmic, (T), 22:22299
proton track measurements in, use of photographic scanning techniques for, 22:36082
radiation effects on photometric properties of, effect of angle of incidence on alpha, 23:4816
radiation effects on silver bromide microcrystals at 50 to 1200 eV in, electron, (E), 23:33582
radioisotope incorporation in, by electrocapillary filling, 21:27913
reactions at 23 GeV/c in, mechanism for hyperfragment production from, (E), 21:4206
resolution for mass measurements of heavy cosmic particles, 24:44321
response to electron beams, 24:29507
scanning of, development of automated systems for, 23:17103(R) (ANL-7481)
scanning proton-recoil tracks in, determination of sampling biases of, 22:25860 (UCLA-12-668, pp 29-36)
scattering factor for G5, variation with cell length, (T), 21:39807
scattering factor for, determination of, 25:427
sensitivity at low temperatures, 25:57829
sensitivity at low temperatures, 23:43558
sensitivity at low temperatures, luminescence damping effects on, 23:17768
sensitivity for fast neutrons, effect of stopping power on threshold, 25:55022
sensitivity of, 22:40368
sensitivity of cadmium-doped silver bromide, at low temperature, 24:16846
sensitivity of gold-sensitized silver bromide crystals in, effect of gelatine on, 25:23820
sensitivity of microcrystals of, to charged particles, 23:43511(T) (AD-685999)
sensitivity of, relativistic increase of, 25:34937(T) (CERN-Trans-71-9)
sensitization of ionographic, using polyvinyl alcohol, 24:46488
sensitization with triethanolamine, effect of gelatin type on, 25:6544
showers in, dispersion relations for, (T), 21:35513
shrinkage coefficient for, method for reduction of, 21:22149
slicing of, for measuring energy spectra of low-energy heavy nuclei, (E), 21:7039
testing of, high-energy isotropic radiation source for space simulation, 23:27908 (N-69-13871)
tritium inelastic reactions with nuclei up to 30 GeV/nucleon in, intranuclear cascade model for, (T), 25:25454 (JINR-P3-5548)
triton reactions with nuclei at 0.1 to 20 GeV/nucleon in, track multiplicity in, (T), 25:47892(T) (ORNL-tr-2503)
uranium isotope decay in, multiple star production by, (T), 23:8983
use as detector in scattering chambers for gaseous and solid targets, 21:6267
use for autoradiographical analysis of submicron aerosol particles, 22:28061 (AERE-R-5715)
use for beam profile measurements from high-energy accelerators, 25:33923
use for beta dosimetry, 21:26245
use for counting activity of tritium, 21:32389
use for detecting fission fragments, 22:40363
use for detection and measurement of cosmic showers, 23:10961(R) (NP-17704)
use for detection of singly charged particles by measurement of ionization and residual range, (T), 21:1600
use for determining energy of electromagnetic cascades by angular distributions, 21:30683 (BMwF-FBK-67-28)
use for determining spectra of stray neutrons around JINR synchrocyclotron, 21:37960 (JINR-P9-3403)
use for fast neutron personnel dosimetry, 22:38100 (KFKI-12/1968)
use for fission fragment detection, 22:40368
use for fission fragment spectra analysis, (E), 22:30019
use for high energy research, 21:17019(R) (UCRL-17282)
use for hyperfragment studies, 22:40366
use for measurement of stray neutron spectra near large pulse accelerators, 21:31648 (ANS-SD-3, Session 2, Paper 4)
use for measuring neutron spectra above Windscale AGCR, 21:21686
use for neutron spectroscopy, 21:1630
use for personnel dosimetry in space vehicles, 21:16338 (N-66-26692)
use for studying elastic scattering of charged particles, 21:39219
use in analysis of near-earth space radiation, 21:16836(T) (JPRS-38272, pp 17)
use in detection of α particles from SNAP-9A reentry burnup, 21:30638(R) (TLW-3547-2)
use in detection of α particles from SNAP-9A reentry burnup, 21:30639(R) (TLW-3547-3)
use in detection of α particles from SNAP-9A reentry burnup, 21:30637(R) (TLW-3547-1)
use in detection of α particles from SNAP-9A reentry burnup, 21:30640(R) (TLW-3547-4)
use in determining neutron spectra outside shields of synchrotrons, 21:21012
use in electron microscopic autoradiography, rotating disc technique for, 24:11900
use in fast neutron flux spectra determination, 21:5688 (IS-1448)
use in fast neutron spectrum measurements, 22:4435
use in Gemini IV and V flights for proton spectra analysis, 21:20203
use in spectral analysis of fast neutrons in ZPR III, 21:21790
use of balloon-borne, for measurement of galactic radiation at supersonic transport altitude, 24:704 (AD-689119)
use of boron-loaded, in spherical water moderators for neutron dosimetry, 22:12655
use of, technical problems in, 22:49069 (JEN-194-IFIC/I-58)
use to measure bremsstrahlung beam behind shield in Hamburg electron synchrotron, 21:27479(T) (ORNL-tr-1533)
use with electron microscopy for analysis of radioactive aerosols, 21:17590
use with magnetic spectrometer for recording spectra of charged particles, 22:8375
use with scintillation detectors for analysis of core structure of cosmic showers, 23:10961(R) (NP-17704)
use with superconducting magnets for determining charge, mass, and moments of elementary particles, 22:21353
uses in high-energy research, 22:40365
uses in nuclear physics, review on, 25:48922
NUCLEAR ENGINEERING
activities at BNL during 1967, 22:39950(R) (BNL-50082)
Arizona University curriculum in, description of, 24:27275
automatic control theory uses in, 21:14004
bibliography on, 23:28671
bibliography on, 23:28672
book: An Introduction to Radioactivity for Engineers, 23:4797

book: Thermal Stability of Materials and Structural Elements. Issue 5, 25:678
California University (Davis) curriculum in, description of, 24:27276
computers for use in, analog and digital, 22:40488
conference on requirements and training for, London, Dec. 5, 1968, 24:9211
curriculum at University of Missouri at Rolla, description of, 25:34781
curriculum for industrial, at London University, 24:9216
curriculum for, objectives and content of stress analysis, 25:18616
data file for reactor applications, ENDF/B, 22:3586 (BNL-50066)
definition and terminology of, 22:37635
development, 21:23787(R) (BNL-994)
development in India, impact of, 25:54334 (A/CONF.49/P-742)
development status at end of 1967, review of, 22:35746
developments in, review of 1966, 21:5608 (CONF-661108-1)
education and training in, UKAEA methods for personnel, 24:9213
education for, developments from 1950 to 1970 in, 25:39636
education in Latin America, summary of, 25:54336 (A/CONF.49/P-755)
education in, predictions on developments in, 24:433
education in, social responsibilities of, 22:12061
educational facilities and programs in Brazil, review of, 23:43233 (CONF-670338, pp 317-20)
educational facilities at National Polytechnic Institute of Mexico, 23:43232 (CONF-670338, pp 315-16)
Euratom activities, Mar. 1965—Feb. 1966, 21:10158
facilities and programs in, at Purdue University, 21:47006(R) (COO-1543-1)
heat transfer in, 21:41146
internship programs in, development of regional, 24:46166
Iowa State University curriculum in, description of, 24:27277
materials in, use of soft magnetic, 22:2624
Michigan University curriculum in, description of, 24:27274
neutron cross sections for, method for calculating effective thermal group, (T), 23:3902
neutron group constants for, method for determining optimal structure of, (T), 23:3912
personnel education in, relations with criticality safety, 21:17556 (SC-DC-67-1305)
personnel training in, summary of courses at Kjeller, 21:2864(R) (KR-109)
personnel training seminar program for, 21:8091
programs for TR4 computer use in, 21:25616 (BMwF-FBK-67-06)
radioisotope uses in industry, programs for undergraduate studies of, 25:39662
requirements for personnel trained in, predictions of government and industry, 24:27281
research and development at Puerto Rico Nuclear Center, 1968, 23:37857(R) (PRNC-131)
research and development in Puerto Rico, 1969, 25:8574(R) (PRNC-140)
research and training activities in Brazil, 23:43145 (CONF-670338, pp 289-98)
research at Australian Inst. of Nuclear Science and Engineering, 1969, 25:31706(R) (NP-18803)
research at Australian Inst. of Nuclear Science and Engineering, 1967, 23:11382(R) (NP-17734)
research at BNL, annual report on, 23:43188(R) (BNL-50149)
research at Brookhaven National Laboratory Dept. of Applied Science during 1969, 24:45994(R) (BNL-50205)
research at Brookhaven National Laboratory, fiscal 1968, review on, 23:9274(R) (BNL-50106)
research at Ispra, Italy, 1961 to 1967, 23:17645 (EUR-3940-3)
research in Belgium, review of, 23:41573
research in Turkey, Jan. 1-June 30, 1967, 23:32949(R) (CNAEM-46)
research in, analysis of government financing for college, 24:7061
research on peaceful uses of nuclear explosives, role of universities in, 24:27279
research on, 1968 Idaho Nuclear Corp, 23:26134(R) (IN-1218)
research programs on, experimental and theoretical, 21:23710 (BNL-994, pp 45-69)
research programs on, summary of USAEC on-site, 22:33379 (TID-4050(1st. Ed.))
research progress on, summaries of off-site USAEC, 22:18811 (TID-4005(Pt.2A)(3rd Ed.))
role in United Nations, 25:54326 (A/CONF.49/P-421)
safety in, systems engineering approach to, 22:12062
standards for, role of USASI Nuclear Standards Board in development of, 24:436
standards for, status of USASI Nuclear Standards Boards development of, 24:437
Stanford University curriculum in, description of, 24:27278
teaching method for introductory course in, 25:41374
teaching programs in universities, survey of, 25:41375
technology of, development of present day, 23:13414(T) (JPRS-47282)
thesaurus in, development of, 22:35747
training at British Universities in, evaluation of graduate and undergraduate, 24:9212
training for design and construction of nuclear plants, requirements for, 24:9221
training in Latin America, summary of, 25:54336 (A/CONF.49/P-755)
training in, facilities and programs at British Royal Naval College for, 24:9215
training in, facilities and programs in Federal Republic of Germany for personnel, 24:9218
training in, fast reactor safety curriculum at UCLA for, 25:6063
training in, program for academic and industrial, 24:9220
training in, UK curricula and methods for, 24:9219
training in, use of computer systems for, 25:6194
training in, use of remote computer facilities for, 25:6193
training of college students in, analysis of future requirements for, 24:7065
training of college students in, course scheduling for, 24:7067
training of college students in, description of industry related, 24:7064
training of college students in, reactor design courses for, 24:7068
training of college students in, review of problems with, 24:7062
training of college students in, review of professional internships in, 24:7063
training of college students in, revised courses for, 24:7066
training of college students in, use of critical assemblies and research reactors for, 24:7060
training of college students in, use of fast reactor development research for, 24:7059
training of college students in, use of fast reactor development research for, 24:7070
training of humanities students with, description of, 24:7083
training of personnel in, requirements for, 24:27282
training program at University of Texas for, evaluation of self-paced, 24:33504
training program for college freshman in, development of, 24:33503
training program for college students in, development of power reactor design analysis, 24:33505
training program for college students in, use of complex computer programs in, 24:33546
training program for college, use of time-sharing computers in, 22:33106
training program for University of California, description of, 22:33103
training program for University of Washington, description of televised seminar, 23:35387
training program for University of Washington, description of televised seminar, 22:33102
training program in physics measurements, description of college course for, 22:33104
training programs in, requirements of developing countries for, 25:54033 (A/CONF.49/P-540)
training programs in, use of californium-252 neutron sources in, 24:31622
training requirements for research and development work in, 24:9217
uses in examination of environmental problems, 25:49123
welding methods for, development of ultrasonic, 23:38953
Nuclear Engineering Test Reactor (USAF)

book: The Constructive Uses of Nuclear Explosives, 22:25562
carbon-14 deposition from, on northern hemisphere cereals and grasses, 21:36160
carbon-14 from, content in plants of Venezuela, 21:19774
carbon-14 from, study of carbon dynamics in soils using, 22:6457
carbon-14 production by, 21:4624 (RM-5100-TAB)
carbon-14 production by, use in age estimation of recent events, 24:315
carbon-14 production in polar, in 1962, 21:6062
cloud formation from, computer program for describing thermodynamic processes during, 22:12440 (FOA-4-4329-28)
clouds from, radar reflectivity from radioactive, 23:33286 (AD-684918)
clouds produced by, sampling procedures for, 21:6036 (UCRL-14983)
compilation of known, 1945 through 1966, 21:43078 (FOA-4-4493-16)
conference on education for peaceful uses of, Tucson, Ariz., March 31 to April 2, 1969, 24:27260
conference on industrial and scientific uses of, Grenoble, France, May 20 to 22, 1970, 25:10738
conference on industrial and scientific uses of, Grenoble, France, May 20 to 22, 1970, 25:10744
contaminated zones following movement of mobile troops across, 23:29471 (FMB-68-7)
contamination of environment by, 22:513
contamination of materials and personnel by, design of vehicle and equipment to remove, 22:6522(P)
contamination of populations following, by ingestion or inhalation, 23:20194 (CONF-680507-, pp 346-61)
craters from, analysis of stability of slopes of, 23:17634 (AD-673997)
craters from, field testing of vehicles for traversing, 24:7543 (AD-693817)
damage assessment models for, computerized, 21:20169 (HI-693-RR)
damage from, evaluation of methods for surveying, 21:39442 (HSR-RR-67/8-Sd)
damage in urban areas from, parameters pertinent to analysis of fire, 21:36551(R) (AD-635492)
data recording system instrumentation for, design of nine-step pulse calibrator for, 23:50213
data recording systems for, design of radiation-hardened, 21:6387
decontamination following, design of apparatus for, 21:43372
detection by seismography, 21:1473 (AD-632453)
detection of direction to, apparatus for, 25:35058(P)
detection of May 1965 Chinese, description of seismic method for, 23:2439
detection of, accuracy of seismic arrays for, 23:480
detection of, joint epicenter method for, 23:479
detection research in United Kingdom, 21:2826 (NP-16347)
detection systems for, noise analysis in single-transient, 24:7696 (UCRL-50723)
determination of radioactivity of fallout particles following, in Japan during 1966, 23:16297
detonation of, in 1958, radioactive contamination of marine organisms following, 21:8807(T) (AEC-tr-6641, pp 105-14)
distinction between plutonium-239 and uranium-235, by measurement of ratio of barium-140 to cesium-136 in fallout, 21:26554(R) (BNWL-370)
dosimetry problems following, 23:20186 (CONF-680507-, pp 170-4)
dusts in Japanese atmosphere from, airborne equipment for measurement of radioactivity of, 23:15977
economic aspects of, comparison of conventional explosives with, 23:40910
effect of, on incidence of leukemia among Hiroshima survivors 1946-1962, 21:8962
effect on atmospheric potential gradient near ground, 21:45255
effect on bioaccumulation of radioisotopes on granitic outcrops of Georgia Piedmont, 21:19759 (NP-16464)
effect on fission product content of permanent snow in Soviet Union, 21:19773
effect on personnel in tunnel-type air raid shelters in Nagasaki, 21:39158(T) (AEC-tr-6858, pp 14-17)
effects of blast and shock waves from, on man, 21:1774 (TID-23349)
effects of debris from, on ionization in lower atmosphere, 21:699
effects of exposure to, in Hiroshima, on development of malignant and non-malignant diseases, 21:13039
effects of exposure to, on incidence of malignant neoplasms, 21:13038
effects of fallout from, on human population, 21:13022
effects of French 1968, on long-period gravity and acoustic modes, (E), 23:51451 (AD-690545)
effects of light flash from, on vision of human eyes, 21:32779
effects of neutron—gamma radiation of, on burros, 21:20321(R) (ORO-653)
effects of radiation from, on genetics of populations of Nagasaki and Hiroshima, 21:18161
effects of radiation from, on growth of children, 21:8942
effects of radiation from, on sex ratio of children of survivors of, 21:8765
effects of radiation from, on testes of man, 21:4859
effects of simulated, on loaded homogeneous brittle plates, 21:30646 (NP-16806)
effects of thermal radiation from, on eyes, prediction of safe distance for protection from, 21:8843(R) (AD-634723)
effects of, analog-computer system for displaying simulated, 25:37688(P)
effects of, circle generator for Weapons Effects Display System for mapping prompt, 25:6591 (UCRL-50892(Vol.4)(Pt.4))
effects of, computer simulation of, 23:43440 (UCRL-71774)
effects of, fundamental course on concepts of biological, 21:22650 (CMN-Pub-3/66)

effects of, on children of women exposed in utero in Hiroshima, survey of, 21:3438
effects of, on incidence and forms of leukemia among Hiroshima survivors, 21:8963
effects of, on late development of cancer in Japanese populations, 21:16413
effects of, on man, 21:10969
effects of, on reproductive tract of women in Japan, 21:12958
effects of, on survival of exposed population in Hiroshima, 21:11086
effects of, operator manual for Weapons Effects Display System for mapping prompt, 25:2504 (UCRL-50892(Vol.2))
effects of, prevention of genetic, in human populations, 21:20120 (RM-5096-TAB)
effects of, review of, 23:9602
effects of, use of computers to display, 21:10494 (UCRL-50133)
effects of, Weapons Effects Display System for mapping prompt, 25:2506 (UCRL-50922)
effects of, wiring tables for logic interfaces for Weapons Effects Display System for mapping prompt, 25:2505 (UCRL-50892(Vol.4)(Pt.5))
effects on agricultural products, 23:50582 (CONF-671135-, pp 59-64)
effects on allocation of medical resources, computer simulation of, 23:50583 (CONF-671135-, pp 67-91)
effects on animal and plant populations at Eniwetok, 21:24543 (COO-1485-10)
effects on arthropod ecosystem at Nevada Test Site, analysis of, 23:2805
effects on biological environment of isthmian canal in Colombia or Panama, specific activity method for calculating, 24:23153
effects on birds and insects, 23:4903 (CONF-671135-1)
effects on blast-type shelters, compendium of test reports on, 23:43485 (CEX-68.3)
effects on blood-forming organs, gastrointestinal tract, reproductive organs, and skin of man, 22:47548
effects on buildings and building contents, use of computer program to predict, 21:36310 (IITRI-M-6103)
effects on carbon-14 content of seawater, 24:16720
effects on cesium-137 content of freshwater ecosystems in France and Poland during 1963 to 1966, 25:32377
effects on chromosomes in bone marrow cells of human populations, aberrant, 22:8577
effects on circular cylindrical shells, acceptable imperfections in impulse loads for simulation testing of, (T), 25:8441 (SC-RR-70-600)
effects on contamination of oceans, 23:21833
effects on dental and oral tissues of man, 21:11096
effects on development of rheumatoid arthritis in Hiroshima and Nagasaki, 21:28637
effects on distribution and taxonomy of wasps, 21:39502
effects on distribution of assets in United States, policy considerations in dealing with, 23:50596 (CONF-671135-, pp 291-5)
effects on ecology of animals at National Reactor Testing Station and Nevada Test Site, 22:8495 (COO-1355-17)
effects on ecology of Nevada Test Site, 21:36537
effects on ecology of rat populations at Eniwetok Atoll, long-term study of, 24:9806
effects on ecology, review of, 22:28395 (TID-23939)
effects on economic resources of urban community, 21:39390 (AD-631026)
effects on ecosystems, long-range forecast of, 23:50586 (CONF-671135-, pp 107-35)
effects on ecosystems, regeneration of animal and plant populations following, 23:29427
effects on elastic modulus of rocks, 23:24304
effects on elemental content of cattle bones, muscles, and organs and grasses in Panama, 24:2301
effects on environment, review of research concerning, 24:31902
effects on eyes of man exposed to atomic bombing at Nagasaki, assessment of dose for cataractogenic, 23:50806
effects on eyes of man, simulation using γ ray effects on eyes of rabbit, 21:28652
effects on eyes, effects of preflash adaptation and pupil size on, 21:18070 (NADC-ML-6508)
effects on fallout in Japan, seventh Chinese, 23:6437 (NIRS-18)
effects on field of medicine, computer study of, 23:50585 (CONF-671135-, pp 99-102)
effects on flashblindness production, protective goggles for prevention of, 21:20216
effects on freight transportation systems, 21:43077 (AD-651454)
effects on gamma radiation level of Bikini Atoll, 23:6217 (HASL-190)
effects on gas and electric utility systems of cities, analytical study of repair of, 22:37623 (AD-665307)
effects on generation of traveling ionospheric disturbances, low-altitude, (T), 23:51455 (CONF-680722-, pp 45-64)
effects on head size and incidence of mental retardation in man, effects of in utero exposure on, 21:26486
effects on human chromosomes, aberrant, 24:6098
effects on human eyes, 21:8717
effects on human eyes following exposure in utero to atomic bombing at Nagasaki, 23:38746
effects on human population exposed to atomic bombing of Hiroshima and Nagasaki, report of research on, 23:850 (ABCC-66-67(Suppl.))
effects on human population of Hiroshima and Nagasaki, latent, 24:9908 (CONF-690303-, pp 307-17)
effects on human populations of Hiroshima and Nagasaki, etiological aspects of, 24:14567
effects on human populations of Hiroshima, survey of leukemogenic, 24:14566
effects on incidence of cancer in man, risk estimates for, 23:50590 (CONF-671135-, pp 199-203)
effects on incidence of human breast cancer, survey on, 21:16386
effects on incidence of leukemia, statistical analysis of age factors in, 21:8921
effects on incidence of mammary gland neoplasms in Hiroshima and Nagasaki, 23:38744
effects on incidence of myelogeneous leukemia, 21:11109
effects on iodine-131 content of thyroid in mule deer in Colorado during 1961 to 1967, 22:21459(R) (COO-1156-28)
effects on iron-55 content of earth's surface and oceans, 24:25126 (CEA-R-3918)
effects on Japanese population, ABCC report on, 21:20229(R) (ABCC-65-66)
effects on krypton-85 content in atmosphere, (E), 23:15973 (CEA-R-3591)
effects on krypton-85 content of Hungarian atmosphere, 23:26367
effects on man, 24:41947
effects on man and materials following, 21:45688
effects on man at Hiroshima and Nagasaki, 23:41468
effects on man exposed at Hiroshima, development of congenital malformations following, 23:43843
effects on man in Hiroshima, incidence of coronary heart disease during 1958 to 1964, 23:14224
effects on man in Ryuku islands following exposure to atomic bombing at Hiroshima and Nagasaki, latent, 23:43845
effects on man, medical care of, 23:50589 (CONF-671135-, pp 191-2)
effects on man, medical classification of, 22:4612
effects on man, pathological, 24:51084
effects on man, review of, 22:10795
effects on man, review of latent, 23:50588 (CONF-671135-, pp 181-9)
effects on man, review of leukemogenic incidence, 24:34735
effects on man, traumatic, 22:28681
effects on medical personnel and therapy patients in Japan, statistical survey of leukemogenic, 24:19372
effects on monolithic microelectronic circuits, (E), 21:9256(R) (AD-642301)
effects on mortality of children born subsequent to exposure of parents, 21:16511
effects on nesting of birds at Nevada Test Site, 21:12804
effects on neutral D-region chemistry, (T), 23:44243 (AD-685602)
effects on personnel in concrete buildings in Hiroshima 200 m from bomb center, 21:39159(T) (AEC-tr-6858, pp 11-13)
effects on physical properties of porous and solid bodies, 25:10749
effects on plant communities in vicinity of Cabriolet event, 23:41272 (PNE-956)
effects on plutonium isotope content of Japanese rainwater, 23:33273
effects on plutonium-238 content of Japanese rainwater, 23:13876
effects on populations of Hiroshima and Nagasaki, effects of shielding on, 21:34742 (USNRDL-TRC-46)
effects on populations, control of infectious disease following, 23:50584 (CONF-671135-, pp 93-8)
effects on protective construction, simulation of, 21:1534 (AD-629607)
effects on proteinuria induction in man at Hiroshima and Nagasaki following in utero exposure, 21:26483
effects on radio and radar propagation in ionosphere, 23:27428 (AD-680983)
effects on radioactive contamination of cement copper during copper ore processing, 23:47587 (ORNL-TM-2689)
effects on radioactive contamination of milk, 23:43754
effects on radioactive contamination of oceans, 24:9625
effects on radioisotope content of Indian rainwater during 1965, 23:463
effects on radioisotope content of soils and uptake by plants, 23:50397 (CONF-671135-, pp 143-8)
effects on size of children in Japan following prenatal exposure, 23:22430
effects on sodium-22 content of rainwater in Freiburg, Germany, Jan. to Nov. 1968, 23:45416
effects on strontium-90 content of food chains in Australia in 1968, effects of, on human bone tissue, 24:23182 (NP-18100)
effects on survival of man, conference on, 23:50578 (CONF-671135)
effects on survival of rats at Eniwetok Atoll, 21:43445 (COO-1485-12)
effects on survival, development of model for, 23:50592 (CONF-671135-, pp 217-29)
effects on survivors of, epidemiological studies on, 21:24571
effects on tritium content in Alpine precipitation, 23:47647
effects on U. S. population, 21:20171 (HSR-RR-66/14-Pr(App.1))
effects on U. S. population, 21:20170 (HSR-RR-66/14-Pr)
effects on underground structures, effect of shape and mass on, 21:1536 (AD-640440)
effects on United States, factors in national survival following, 23:50591 (CONF-671135-, pp 207-16)
effects on United States, resource management following, 23:50595 (CONF-671135-, pp 275-89)
effects on urban areas, methods for assessment of, 21:32680 (SRI-4949-130)
electromagnetic fields generated by, protection of electric and electronic equipment from, 23:2464 (UCRL-71024(Rev.1))
electromagnetic pulse from, 21:692(R) (NP-16306)
electromagnetic pulse generation by, protection of electric and electronic equipment from, 24:14122 (CONF-690824-(summ.))
engineering near populated areas in western Europe, feasibility of, 24:33822
environment contamination by, calculation of safe limits for carbon-14, krypton-85, and tritium, 24:22844 (SWRHL-82, pp 684-96)
environmental contamination from, research on effects of, 24:46594
estimation of loss following, use of computer programs for, 23:20208 (CONF-680507-, pp 565-88)
evaluation for use in excavations for sea level routes through the Central American isthmus, 23:13894 (NCG-TR-6)
fallout activity in rivers of Federal Republic of Germany from, relation of fission product activity with, 23:31417 (HMI-B-82)
fallout deposition at sites distant from, calculation of radiation dose to man from, 22:23511 (UCRL-70788)
fallout deposition from cloud from, calculation of, 25:48658 (CLOR-83/D)
fallout deposition from, calculations for, 24:31504
fallout deposition in Prague from Chinese, 23:21826
fallout distribution in cities from, numerical model for prediction of, 24:19092 (AD-698485)
fallout field over rough desert terrain from, γ radiation characteristics of, 21:17751
fallout formation in, exploding-wire studies of, 22:45187 (NYO-3756-2, Sect. C)
fallout formation in, nucleation processes in, 22:45188 (NYO-3756-2, Sect. D)
fallout from 1967 and 1968 French, in Polynesia, content in atmosphere, food chains, and seawater of, (E), 24:20889 (A-AC-82/G/L-1276)
fallout from 1968 French, niobium-95/zirconium-95 method for estimation of age of, 23:33271
fallout from Chinese, 23:35339
fallout from Chinese and French, monitoring in Indian atmosphere, 23:24308 (BARC-393)
fallout from Chinese and USSR, activity and fission product content of, (E), 23:47646(T) (UCRL-Trans-10355)
fallout from Chinese, geochemical fractionation behavior of radioisotopes in fresh, 23:26368
fallout from Chinese, particle size measurements of, 23:40879(T) (UCRL-Trans-10359)
fallout from Chinese, variations in strontium-89/-90 ratio in, 23:21828
fallout from contamination of water supplies by, 21:18068
fallout from first Chinese, analysis of, 23:40880(T) (UCRL-Trans-10360)
fallout from June 1967 Chinese, monitoring in stratosphere and troposphere over Rome of, 24:22794
fallout from Oct. 1966 Chinese, monitoring in Salzburg atmosphere of, Oct. to Dec. 1966, 23:24320
fallout from seventh Chinese, gamma spectrometric and autoradiographic examination of, 23:17573 (FOA-4-4386)
fallout from Shot Coulomb C, radiochemical analysis of, 25:10734 (AD-708567)
fallout from third Chinese, radioisotope fractionation in, 23:31434(T) (UCRL-Trans-10348)
fallout from third, fourth, and fifth Chinese, activity and decay characteristics of, 23:17576(T) (UCRL-Trans-10327)
fallout from, age estimation using niobium-95/zirconium-95 ratio, 23:33272
fallout from, analysis of Polish soils for, 21:36106 (CLOR-63/D)
fallout from, computer-based system for graphic display of, 24:2518 (UCRL-50688)
fallout from, conducted by the USA and Soviet Union, atmospheric distribution and surface deposition of, 21:30545(R) (NYO-3654-2)
fallout from, determination of rate of, using cesium-137 content of plants, 21:20114
fallout from, effects of wind speed on biological effects of, 24:14477 (AD-688940)
fallout from, estimation of somatic consequences of contamination of biosphere by, 21:18048
fallout from, in air over Indian and Pacific Oceans, geographical distribution of, 21:8457(T) (AEC-tr-6641, pp 14-22)
fallout from, iodine-131/iodine-133 activity ratio for estimation of age of fresh, 23:9572
fallout from, Japanese programs for monitoring of, 24:19097
fallout from, method for prediction of, 23:21827
fallout from, model for identifying radiochemical composition of, 22:25534 (UCRL-70782)
fallout from, monitoring Australian environment for, 1965, 21:24117
fallout from, over Indian and Pacific Oceans, 21:8455(T) (AEC-tr-6641, pp 32-5)
fallout from, radioactivity measurements at Picatinny Arsenal of, 21:43046(R) (AD-651495)
fallout from, stratospheric distribution, 21:17739(R) (AD-642279)
fallout from, surveys of, 21:20162 (ARCRL-16, pp 21-5)
fallout from, use as condensation nuclei of, 21:14336
fallout in atmosphere from, model for interhemispheric transfer of, (T), 24:4385
fallout in Columbia and Panama following excavation of sea-level canal, effects of, on agricultural ecology, 24:9795 (BMI-171-20)
fallout in polar stratosphere from June 1967 Chinese, gamma energy and size distribution of, 23:13873(R) (TLW-6030)
fallout monitoring in Bombay from, 1961 to 1965, 21:43063
fallout monitoring in Czechoslovakia from Chinese, 23:24312
fallout prediction from, development of improved land surface model for, 21:22034(R) (AD-643534)
fallout transport and deposition from Shot Smoky, effects of meteorological conditions on, (E/T), 23:9557 (BNWL-715-3, pp 74-87)
fallout transport from experimental, effects of meteorological conditions on atmospheric, 23:45409 (NVO-40(Rev.2), pp 251-60)

fire-fighting operations and control during and after, communications requirements for, 21:14341 (AD-643170)
fireball formation from, radiation hydrodynamics of, 23:16029 (AD-672837)
fires from, casualties and hazards of, 21:45272(R) (AD-642790)
fires from, control of multiple, 23:9605
fission product content in atmosphere from, use of model to determine, 22:4286
fission product distribution from, processes for, 21:30543 (NP-16525)
fission products from, collection and analysis of over-ocean, 21:30544 (NYO-2174-56)
fission products from, methods of evaluating hazards, inhalation of, 21:28444 (RT/PROT-(66)26)
flashblindness following exposure to, protective effects of photothermosensitive dyes against, 23:41346(R) (AD-688692)
gamma Compton scattering in slab geometry, electron velocity distribution from, (T), 21:11682
gamma dose rates from, calculation method for underground structure, 21:36318
gamma fluxes from, computer program for calculation of, 21:17258 (AD-645929)
gamma radiation from, algorithm for Compton scattering in transport calculations of, 21:36321
gravity waves from, effects of winds on acoustic—, (T), 22:26302
ground contamination after, use of helicopters for aerial surveying of, 21:32665
ground motion acceleration criteria for, use of earthquakes to study, 21:30530 (HN-20-1024)
ground motion at Union Bay, Washington from, analysis of data on, 24:16722
ground motion from, effect on damage to structures from, 21:36309 (HN-20-1021)
ground motion from, feasibility of prediction using oscillatory waveforms, 23:482 (AD-671642)
ground motions from chemical, proposed engineering intensity scale for rating, 24:335 (JAB-99-73)
ground motions from, effects of soil properties on propagation of, 23:9580
ground radiation from, use of helicopters for measuring, 21:45247 (NP-16766)
ground shock effects on hardened permanent-type structures from, 21:28120 (AFSCM-500-8)
hazards of exposure to, in comparison with hazards from industrial and medical sources, 24:2672
hazards to man from exposure to, 22:496 (UCRL-50163(Pt.3))
hazards to man, estimation of, 22:51639
heat from, effects of white paint coatings on transmission through window glass of radiant, (E), 24:20942 (FOA-4-4368)
initiation by magnetic assembly of subcritical masses, 21:36194(P)
initiation by magnetic assembly of subcritical masses, 21:36195(P)
iodine-131 content in fallout from Chinese and Russian, in Hanford area in 1966, 21:36563 (BNWL-439)
iodine-131 content of fallout from 1968 French, in Arkadelphia, Ark, 23:26374
iodine-131 emission by Chinese, effects of, on contamination of milk in Japan, 23:2844
lead-210 production by, 24:4386
legal aspects of, predictions of future, 24:434
lethality of, for civilian populations, 21:20325 (RM-4707-TAB(Pt.2))
lethality of, for civilian populations in U.S.A, 21:20324 (RM-4706-TAB(Pt.1))
light emission from, design of goggles for shutting out, 21:41087(P)
light flash from, device to protect eyes from, 21:22079(P)
light from, equipment for eye protection against intense, 21:3363(P)
location of, development of aerial infrared thermal mapping system for, 21:36577 (NP-16861)
magnetic field effects on MHD model of, computer code for calculating, 23:49971 (AD-689110)
methods for personnel dosimetry following, 23:20187 (CONF-680507-, pp 175-86)
monitoring of fallout from French, in New Zealand during 1968, 23:18029 (NP-17776)
neutron capture in, production of heavy nuclei by multiple, (T), 21:35480
neutron cross section measurements using time-of-flight method, data analysis for, 21:23538 (LA-3478(Pt.2))
neutron doses from, calculation of, (T), 21:1011 (ORNL-TM-1547)
neutron escape from, calculation of time-dependent, 24:5770
neutron flux from, calculation of, 22:8224
neutron fluxes from, computer program for calculation of, 21:17258 (AD-645929)
neutron spectra from, epithermal, (T), 21:35395 (USNRDL-TR-67-57)
peaceful uses of, benefits versus risks during, 25:13429
peaceful uses of, curriculum development for training engineers in, 24:27284
peaceful uses of, excluding electric power production, 23:40910
peaceful uses of, IAEA evaluation of, 23:49981
peaceful uses of, legal aspects of, 23:33289
peaceful uses of, review of, 23:40909
peaceful uses of, review of research on, 25:54830
peaceful uses of, status of national programs for, 24:50482
polonium-210 production in, 21:6052
postattack planning for protection of livestock farms, 24:6055
pressure wave generated by, atmospheric, (T), 22:11337
program for postattack countermeasures, 22:2258 (AD-646627)
propulsion of interstellar flight vehicles by, performance of system for, 24:19123
protection against effects of, use of drugs and partial-body lead shielding for, 21:34658 (USNRDL-TR-67-39)
protection against, cost analysis of shelters for, 21:17804 (NP-16553)
protection against, design of air raid shelters for, 23:20213 (CONF-680507-, pp 629-38)
protection against, design of shelters for, 21:17803 (AD-636048)
protection against, in rural areas of Soviet Union, 21:34659(T) (ORNL-tr-1693)
protection against, Little Harbor report on recommendations for, 23:14156 (TID-24690)
protection from, use of underground utility tunnels for, 21:14343 (ORNL-TM-1714)
protection of critical industries from, effect of rapid shutdown on, 21:24124 (AD-643573)
protection of electronic communications equipment from, design of underground structures for, 24:411
protection of eyes from, safe separation charts for, 21:22404(R) (AD-641191)
protection of human populations against, cost factors for shelters for, 24:23228 (ORNL-TM-2457)
protection of man against, measures for, 23:50602
provision to domestic and foreign users, JCAE hearings on, 24:14115
radiation distribution from, calculation using NGM code, 21:34352 (AD-654503)
radiation dose from, at Hiroshima and Nagasaki, calculation of, 21:24410 (NIRS-5, pp 1-10)
radiation dose from, measurement of, 21:8941
radiation dose from, on Rongelap Atoll, Marshall Islands during 1954 to 1963, fallout γ, 23:12076 (UWFL-91)
radiation dose to airplane pilots from, apparatus for automatic reduction of, 23:29540(P)
radiation dose to environment from testing of, at Yucca Flat, 21:11007 (SAN-510-2)
radiation dose to human population from, estimation of, 23:2827
radiation dose to human populations following, standards for estimation of, 25:29539
radiation dose to human populations from, method for incorporation of thermoluminescent materials in buildings for measurement of, 24:2505
radiation dose to man from fallout of, through aquatic food, method for estimation of, 23:12074 (UCRL-50163(Pt.5))
radiation doses from, computer programs for estimation of, 23:9681 (ORNL-4316, pp 1-69)
radiation doses from, effects of shock waves on, 23:498
radiation dosimetry in, development of thermoluminescent ceramic for zone, 23:2673
radiation dosimetry of, use of incidence of chromosome aberrations in survivors for, 21:8764
radiation from, bibliography on shielding for, 25:48245 (ORNL-RSIC-5(Vol.3))
radiation from, design of equipment for detection of electromagnetic, 23:49980(P)
radiation from, protective effects of clothing against thermal, 23:2837
radiation from, soil attenuation of initial, 21:36190
radiation hazards of, to pelecypods, estimation of, 24:25424 (BMI-171-36)
radiation injuries from, etiology of, 22:6861
radiation injuries in survivors of, review of, 21:12982
radiation monitoring of, programs of U.S. Public Health Service for, 23:6451 (PHS-PUBL.-1224)
radiation protection from, concrete shelter shielding thickness requirements for, 22:4393
radiation protection of human populations from, review of, 23:6457
radioactive contamination of environment by, 23:2829
radioactive contamination of food chains following, 23:20190 (CONF-680507-, pp 279-306)
radioactivity from, at Crimean coast of Black Sea, 21:8453(T) (AEC-tr-6641, pp 43-52)
radioactivity in stratosphere over Rome following June 1967 Chinese, (E), 24:22793
radioisotope activities from, relative maximum, 21:10460 (AD-642421)
radioisotope uptake by cattle following, effects of distance on, 22:51310 (SAN-509-2)
recovery activities following, consumer behavior and worker participation in, 21:24405 (HSR-RR-67/5-T-1)
research at Institute for Experimental Physics of Lajos Kossuth University, 22:38001
research at Institute of Nuclear Research of Hungarian Academy of Sciences, review of, 22:38001
research in Australia, 1968-1969, 24:4187(R) (NP-18051)
retinal burns from low-yield, prediction of threshold distances for, 21:26402(R) (AD-641188)
ruthenium isotope injection into atmosphere by, 21:6039
safety analysis of, preshot and postshot, 22:23511 (UCRL-70788)
safety of experimental, review of U.S. programs for, 23:45428 (NVO-40(Rev.2), pp 3-7)
safety of US, programs for insuring, 23:47662 (NVO-48)
safety of, review of accidents involving, 21:1762
seismic wave propagation from, in homogeneous and layered soils, method for hand solution of one-dimensional problems of, 23:9583
seismic wave propagation from, in layered media, finite element solution for, 23:9581
seismic wave propagation in soils from, one-dimensional theory for calculation of, 23:9584
seismic waves from Longshot and Greeley, compared with 1968 P wave travel time data, 24:9536
seismic waves from Marshall Islands and Sahara Desert, compared with 1968 P wave travel time data, 24:9537
seismic waves from May 1965 Chinese, Indian measurements of, 23:2439
seismic waves from Oct. 27, 1966 Novaya Zemlya, hypothesis on measured velocity of, 24:5768
seismic waves from Oct. 27, 1966 Novaya Zemlya, measurement of azimuth and velocity of, 23:21834
seismic waves from, comparison of earthquake-generated Rayleigh waves with, 24:336
seismic waves from, travel time bias in P, 23:33285
seismic waves from, travel times for, (E), 24:22822
shelters against, cost analysis of, 21:26132(T) (ORNL-tr-1646)
shock wave propagation from, effects of temperature on, 24:22825 (FOA-4-4367)
shock waves from, atmospheric focus and refraction of, 23:7647
shock waves from, attenuation by orifice plates of, 21:19878 (ORNL-TM-1750)
shock waves from, design of device for simulating effects of pressure on, 25:46578(P)
shock waves from, design of shelter to withstand, 22:6550 (NP-17183)
shock waves from, effects of vertical wall on amplification of, 23:4793 (ORNL-TM-2362)
shock waves from, effects of, on ears of mammals, 21:28516(R) (DASA-1858)
shock waves from, effects on cabinet-housed electronic equipment in steel-frame buildings, 22:51197
shock waves from, hazards of, 21:28514(R) (DASA-1856)
shock waves from, strain response spectra for cohesive soils from, 23:9582
shock waves from, use of shock tube to simulate, 21:43083
shock waves from, vertical propagation in atmosphere of, (T), 24:14103 (AD-696875)
simulation of, scaling methods for pressure-distance curves for, 21:30556 (AD-630654)
skin burns caused by, at Nagasaki, 21:8842(R) (AD-630292)
sodium-22 production in, 21:6052
strontium-90 content and transport in stratosphere from, 1963 to 1968, 21:28102
strontium-90 deposition in New York City from June 1967 Chinese, 23:17582
strontium-90 from, content in world's oceans of, 21:30553 (NP-16526)
survivors in Hiroshima and Nagasaki, occurrence of leukemia among, 21:28581
survivors of, antibody response to Asian flu vaccination in, 21:12926
survivors of, causes of death in, 21:12911
survivors of, causes of death in, agreement between death certificate and autopsy diagnoses of, 21:12912
survivors of, incidence of cancer in, in Japan, 21:16413
survivors of, maliformations in, 21:12911
survivors of, relation of exposure to γ or mixed γ and neutron radiation on chromosome aberrations in, 21:8764
survivors of, sex ratio of children of, 21:8765
survivors of, use for evaluation of risks from radiation, 21:10914
test ban on, conferences and treaties on, 22:1943
test in Soviet Union during November 1968, 23:31777
testing in China and Russia during December 1968, 23:31779
testing in Soviet Union during June 1968, 23:12097
tests in China and Soviet Union during 1966, 22:28495
thermal effect of low-yield, image furnace for simulation of, 21:36191
thermal energy from, use of halogenated vinyl polymers for protection against, 25:41827
thermal pulses of, computer calculation of temperatures in plates subjected to, 22:2259(R) (AD-646858)
thermal radiation from simulated, ignition of wood by, 21:12545 (AD-640428)
thermal radiation from, development of pulse shaper for, 21:339 (AD-636265)
thermal radiation from, protection against, 21:8787 (AD-635250)
thermal radiation propagation from, radiation diffusion approximation for calculation of, 24:25152 (FOA-4-4402)
training of personnel for civil defense plans, 23:20179 (CONF-680507-, pp 25-8)
tritium hazards following, review of, 24:31959 (HASL-229)
tritium production by, relative significance index for, 25:48664 (UCRL-73270)
urban area burns from simulated, 21:14342 (NRDL-TRC-56)
use as intense neutron sources for nuclear studies, 24:41532 (CONF-700101-(Vol.2), pp 1246-52)
use as neutron source for n-n scattering experiments at low energy, (T), 21:23405 (UCRL-70376)
use as neutron sources, advantages of, 25:50596 (CONF-710402-(Vol.2), pp 1.33-8)
use for propulsion of space vehicles, 22:51128
use in industrial projects, symposium on public health aspects of, 24:23141 (SWRHL-82)
use of chemicals for radiation protection following, 23:20197 (CONF-680507-, pp 387-92)
use with time-of-flight method for measuring neutron cross sections, 22:37280 (LA-3478(Pt.1))
uses by industry, review of potential, 22:30739
uses in industry and science, design criteria for explosive charges for, 25:10739
uses in industry, economics of, 25:10750
uses in USSR, review of possible peaceful, 24:33818
uses of, bibliography on peaceful, 23:15992 (CEA-Bib-129)
uses of, effects of Nonproliferation Treaty on peaceful, 24:41485 (CONF-700101-(Vol.1), pp 294-305)
uses of, evaluation of public corporation for industrial, 23:40908 (UCRL-50693)
uses of, research on peaceful, 21:2827(R) (NP-16359)
uses of, review of 1966, 21:5608 (CONF-661108-1)
uses of, review on industrial, 25:54816 (ORNL-4682, pp 182-6)
uses of, university research on peaceful, 21:206
vortex ring of, theory of motion of, 22:2915
water wave runup on sloping beaches from, review of, 23:17625 (AD-674858)

water waves from, damage to harbor facilities from, 24: 9535 (NVO-289-5)
wave generation and propagation velocity from Soviet Oct. 30, 1961, acoustic—gravity, (E), 23:51456 (CONF-680722-, pp 69-77)
wave generation by, acoustic- and gravity-, (T), 23: 51453 (CONF-680722-, pp 1-8)
wave generation by, theoretical source models for acoustic—gravity, 23:51454 (CONF-680722-, pp 9-24)
wave generation in ionosphere by, acoustic-, (E), 23: 51457 (CONF-680722-, pp 79-86)
yield estimates for 1968 French, (E), 23:51451 (AD-690545)
yields of, estimation using microbarograph data, (E/T), 25:57606
zinc-65 content in ground-level atmosphere from 1967 Chinese, 23:464
NUCLEAR EXPLOSIONS, ATMOSPHERIC
acoustic wave production by, (E), 23:27425 (AD-678877)
acoustic wave propagation from, geophysical uses of data on, 25:10748
acoustic—gravity waves from, effects of climate on propagation of, 21:22064 (AD-643536)
acoustic—gravity waves generated by, response of ionosphere to, 21:43935
acoustic—gravity waves in upper atmosphere from, (E/T), 21:27058
acoustic-wave production by, effect on vertically propagating hf ionospheric radio waves, (E/T), 25: 22429
air motion from, use of buoyant vortex rings for interpreting, 21:43064
airblasts from, damage to window panes from, (E/T), 25:10792 (SC-RR-70-441)
atmospheric pressure fluctuations from, development of arrays of microbarographs for analysis and recording of, 23:2437
blast detector design for, 21:8562(P)
blast effects on cattle, simulation of, 21:28513(R) (DASA-1855)
blast effects on freight transportation systems, 21:43077 (AD-651454)
blast effects on hardened permanent-type structures from, 21:28120 (AFSCM-500-8)
blast effects on shock-protected contents of cylindrical buildings at 10 to 50 psi overpressures, 22:51196
blast from, design of facility for simulation of, 21: 28511(R) (DASA-1853)
blast from, effect on design of ship deckhouses, 21: 34351 (AD-649897)
blast from, effect on underground structures, 21:252 (AD-634468)
blast from, evaluation of underground transportation facilities to protect populations from, 25:4255(R) (ORNL-TM-3016)
blast from, shelter evaluation program for protecting population against, 21:41182 (LAMBDA-3(Vol.1))
blast from, shelter evaluation program for protecting population against, 21:41183 (LAMBDA-3(Vol.2))
blast from, shelter evaluation program for protecting population against, 21:41184 (LAMBDA-3(Vol.3))
blast-induced water waves from, near surface shorelines, 22:35960 (AD-661453)
blast-wave focusing and refraction, 21:12027(R) (UCRL-50001-66-2)
book: Protection of Animals Against Injury by Nuclear Weapons, 25:58026
burst height of Hiroshima, implications of uncertainties of, 21:18071 (RM-4725-TAB)
carbon-14 excesses from, decay model of, 21:39057
carbon-14 production by, 21:6059
carbon-14 production by US and USSR, use as tracer in atmospheric mixing studies, 22:16716
carbon-14 production by, models for prediction of, 21: 4624 (RM-5100-TAB)
casualty estimation following, use of circular coverage function for, 25:6759 (AD-697936)
casualties from multiple, analytical method for assessement of urban, 22:35968
characteristics of ionospheric, (T), 22:34362 (AD-664034)
civilian defense against, 22:42930
cloud formations from, airborne radar for detection and measurement of, 21:24135 (UCRL-50195)
cloud growth from, bibliography on, 25:13131 (AAEC/LIB/Bib-255)
clouds from, particle size distribution in, 25:13138
contamination of ground-level atmosphere and soils near Moscow from, 1963 to 1965, 22:21195 (A-AC-82/G/L-1201)
damage to urban areas from, prediction of fire, 22:33579 (AD-661851)
debris accumulation in urban areas from, 21:10487(R) (AD-636440)
debris deposition from, meteorological effects on, 21: 1456(R) (HNS-457-73-F)
debris from, atmospheric sampling of, 21:1460 (UCRL-13215)
detection and location by microbaragraph arrays, 24: 14114
detection by bearing angle estimation of acoustic waves using ground arrays, 21:3756
detection by satellite instruments, calculation of x-ray scattering effects for, 23:45432 (RM-6033)
detection of Chinese, analysis of fallout particles for, 22: 2246
detection of June 1967 Chinese, in Aberdeen, Scotland, 22:194
detection of, atmospheric nitrogen fluorescence detection system for, 23:2456(P)
detection of, design and economics of high-altitude blast generation system for studies of, 24:41465 (AD-704608)
detection of, design of optical and transient radiofrequency signal system for, 24:348(P)
detection of, effects of weather on optical, 22:25545
detection of, performance of optical data-processing systems for, 23:43421
detection of, recent developments in methods for, 22: 27948
detection of, study of extremely low frequency waves and ionospheric disturbances for, 25:51657 (AD-716601)
detection of, teleseismic signal calculations for, 21:22063
detonation force of, computational disc method for visual determination of, 22:30741
disaster investigations for Hiroshima and Nagasaki, 21: 39074(T) (AEC-tr-6858)
effect of Chinese, on radioactivity in Japanese rainwater, 22:14589
effect on carbon-14 and tritium content in atmosphere and ocean waters, 22:6505
effect on carbon-14 content in atmosphere and in barley spirits, 22:6491
effect on kinetics of ions in nighttime ionospheric D region, (E), 25:56010
effects of 1970 French, on fallout deposition in New Zealand, Oct. to Dec. 1970, (E), 25:44452(R) (NRL-F-42)
effects of Chinese Sept. 29, 1969, on wave propagation in atmosphere, 25:47381 (AD-716541)
effects of Chinese, on cesium-137 and strontium-90 content of Fayetteville, Arkansas rainwater, May 1965 to April 1970, 25:10713 (ORO-2529-28, App. 7)
effects of Chinese, on cesium-144 content of Fayetteville, Arkansas atmosphere, 25:57578
effects of Chinese, on fallout in ground-level atmosphere at Winchester, Mass. during 1963 to 1969, 24:33796
effects of Chinese, on strontium-89/-90 ratio in Fayetteville, Arkansas rainwater, 1964 to 1969, relations with jet stream location, 25:10708 (ORO-2529-28, App. 2)
effects of Chinese, on strontium-90 content in Japanese atmosphere and northern hemisphere stratosphere, 25: 57579
effects of Dec. 1968 Chinese, on fallout content of Fayetteville, Arkansas rainwater, (E), 25:10709 (ORO-2529-28, App. 3)
effects of Dec. 1968 Chinese, on fallout content of Fayetteville, Arkansas rainwater, (E), 25:10707 (ORO-2529-28, App. 1)
effects of low-altitude, ionospheric, (E), 22:15420
effects of Oct. 1969 Chinese, on strontium-89/-90 ratio in Fayetteville, Arkansas rainwater, 25:10710 (ORO-2529-28, App. 4)
effects of Sept. 29, 1969 Chinese, on global deposition and stratospheric inventory of strontium-90, 25:32083 (HASL-242, pp I.85-90)
effects of sublethal blast overpressures from simulated, on pulmonary function in sheep, effects of unilateral exposure to combined γ rays and neutrons on, 25: 52185(R) (AD-721094)
effects of, blast and thermal, 25:16276 (FOA-1-1449)
effects of, computer program for Weapons Effects Display System for mapping prompt, 25:18832 (UCRL-50892(Vol.6))
effects of, guides for planning shelters against, 22:278
effects of, installation and operation of Weapons Effects Display System for mapping, 25:44731 (UCRL-51082)
effects of, maintenance manual for Weapons Effects Display System for mapping prompt, 25:13323 (UCRL-50892(Vol.4)(Pt.2))
effects of, mathematical models for computer programs for Weapons Effects Display System for mapping prompt, 25:18831 (UCRL-50892(Vol.1))
effects of, on performance of electronic equipment, 21: 10969
effects of, over Pacific Ocean, on fission product content in fish, 21:14578
effects of, tests for determining performance of equipment for measuring, 25:54993 (AD-720974)
effects on antibody production in Hiroshima and Nagasaki survivors inoculated with Asian influenza vaccine, 22:571
effects on atmosphere and ionosphere, 21:37309
effects on atmosphere, electronic excitation contribution to red glow from, 21:33276
effects on atmosphere, red—green emission from, (E/T), 21:33271
effects on atmospheric potential gradient near ground, 21:41030
effects on bismuth-207 content in atmosphere in Hanford area Sept. to Oct. 1966, 23:11444 (BNWL-481-2, pp 1-126)
effects on bone marrow of man in Japan, histological, 22:40930
effects on cancer incidence in human populations exposed as children on Hiroshima and Nagasaki, 25: 39897
effects on carbon-14 content and distribution in seawater, (E), 25:32092 (HASL-242, pp I.35-78)
effects on carbon-14 content and distribution in worldwide atmosphere, (E), 25:46565 (HASL-243, pp I.3-87)
effects on carbon-14 content in oceans, (E), 24: 33805(R) (RLO-2091-6)
effects on carbon-14 content in waters of mid-latitude south Pacific and Antarctic Oceans, 25:44546 (RLO-2225-T-20-4)
effects on carbon-14 content in worldwide oceans, 24: 46377 (RLO-2225-T-20-1)
effects on carbon-14 content of biosphere, 23:29009 (RLO-2091-2)
effects on carbon-14 content of plants in Japan and southeast Asia from 1948 to 1965, 22:40710
effects on chromosomes of human embryos following in utero exposure, 24:48485
effects on chromosomes of human population exposed to atomic bombings of Hiroshima and Nagasaki, 22: 12868
effects on cities, parameters affecting incendiary, 21: 10879 (USNRDL-TR-1040)
effects on content of radioactive fallout in Czechoslovakia during 1964 to 1967, 22:45517
effects on cytogenetics of second generation of humans surviving, 22:51827
effects on dentition in children exposed prenatally to atomic bombing of Japan, 23:33802
effects on development of amphibian larvae at Bikini and Nevada Test Site, teratogenic, 22:15049
effects on dust and air temperature environment, computer program for calculating, 25:48680 (AD-722252)
effects on electron density and ionization measurements in lower ionosphere, recombination-coefficient profile of, (E), 25:47382 (AD-716554)
effects on environment, analytical method for describing, 25:29247
effects on fallout at Leningrad from 1954 to 1965, 22: 12453
effects on fallout content of atmosphere and rainwater in Australia, Gibraltar, Hong Kong, and UK, Jan. to July 1970, 25:8364 (AERE-R-6556)
effects on fallout deposition in mountains of southwest Bulgaria, 1961 to 1964, 24:16711
effects on feeding patterns of Rattus exulans and R. rattus on Eniwetok Atoll, 25:46771
effects on geologic features at Nevada Test Site, 23: 21806 (NTS-79)
effects on ground-based military equipment, methodology for evaluating environmental, 25:29246
effects on human chromosomes, relation of aberrant, to neoplasms in Hiroshima and Nagasaki, 24:25444
effects on human population at Hiroshima and Nagasaki, latent, 22:45613
effects on human population of Hiroshima and Nagasaki, supplemental studies for ABCC on lethal and pathological, 24:44581
effects on human populations exposed to atomic bombing of Hiroshima and Nagasaki, annual report of Atomic Bomb Casualty Commission on research activities relating to, 23:24750(R) (ABCC-67-68)
effects on human populations in Hiroshima and Nagasaki, review of long-term, 24:25548
effects on human populations of Hiroshima and Nagasaki, report of ABCC on, 22:51670(R) (ABCC-66-67)
effects on human populations of Hiroshima and Nagasaki, sex ratios of children following prenatal, 25: 47018
effects on human populations of Hiroshima and Nagasaki, review of carcinogenic, genetic, and pathological, 22:15048
effects on human populations of Hiroshima and Nagasaki, carcinogenic, 22:8560 (ABCC-TR-16-63)
effects on human populations of Hiroshima, survey of leukemogenic, 24:32139
effects on human populations of Nagasaki, survey of leukemogenic, 24:32140
effects on incidence of anemia in man in Hiroshima and Nagasaki, review of, 25:44901
effects on incidence of bile duct and gallbladder carcinomas in man on Hiroshima and Nagasaki, 25: 47011 (ABCC-TR-7-70)
effects on incidence of carcinomas in breasts and skin of human population exposed to atomic bombings of Hiroshima and Nagasaki, 22:10787
effects on incidence of diseases in human population of Hiroshima, 22:10804
effects on incidence of eye injuries in man at Hiroshima and Nagasaki, 23:29711
effects on incidence of leukemia in human population of Hiroshima and Nagasaki, 22:10808
effects on incidence of leukemia in man, 22:4688
effects on incidence of leukemia in man in Japan, 25: 44951
effects on incidence of lymphoma in human populations, 22:8578
effects on incidence of malignant diseases in human population of Hiroshima and Nagasaki, 22:10788
effects on incidence of mental retardation in human population exposed in utero, 22:10809
effects on incidence of myeloma nephrosis in human populations, 22:8580
effects on ionosphere D region, (E), 22:15446
effects on krypton-85 content of atmosphere in France since 1954, 24:48460 (CEA-CONF-1550)
effects on lens of human population of Hiroshima and Nagasaki, review of pathological, 22:36376
effects on leukemia incidence in offspring of man in Hiroshima and Nagasaki, 22:23568
effects on leukocyte chromosomes of man at Hiroshima, aberrant, 22:28558
effects on livestock, 22:38301
effects on lymph system of man in Japan, survey of tumorigenic, 22:4649
effects on man at Hiroshima, neoplastic, 22:51840
effects on man exposed to atomic bombings of Hiroshima and Nagasaki, genetic and pathological, 22:8579
effects on man in Hiroshima and Nagasaki, bibliography of ABCC on, 21:36683 (ABCC-TR-0-66)
effects on man in Japan, ABCC studies on, 24:41994 (BRH/DBE-70-1, pp 9-15)
effects on man, civilian defense programs for minimizing, 24:27308 (AD-701354)
effects on man, survey of, 25:16276 (FOA-1-1449)
effects on man, treatment of thermal, 22:49390
effects on masses of man, system for medical examination of, 22:28564
effects on measurements of the solar constant, (E), 24: 42442
effects on mortality of man exposed in utero in Hiroshima and Nagasaki, long-term, 25:55307
effects on occurrence of earthquakes, feasibility studies of, 25:6444
effects on pressurized-water reactor, civil defense implications of, 25:13184

effects on radioisotope content in ground-level atmosphere at Pt. Barrow, Alaska, Richland, Wash., and Rio de Janeiro, Brazil, 1968, 23:49944 (BNWL-1051(Pt.2), pp 85-91)
effects on rail centers, 21:8784 (AD-632560)
effects on retinal blood vessel of man, pathological, 22:49573
effects on rockets or guided missiles, methods for determining, 25:48679 (AD-721276)
effects on secondary succession on a flood plain six years after exposure, 22:23480(R) (ORO-2412-7)
effects on silver-108m content of animals, plants, and sediments at Bikini and Eniwetok atolls, 25:42377
effects on skin of man in Japan, latent, 23:29709
effects on skin of man, methods for treatment of, 22:4653
effects on sodium-22 content of USSR rivers, 25:57568
effects on soil and groundwater contamination in The Netherlands, 22:21185 (N-66-21731)
effects on strontium-90 content in stratosphere of Chinese and French, comparison of Streak model-computed and measured data on, 25:8369 (HASL-237, pp I.38-62)
effects on traveling ionospheric disturbances, acoustic- and gravity-wave modes associated with, (E/T), 22:24153
effects on tritium content in atmospheric hydrogen from Soviet Union, 22:16714
effects on vision of human infants following parental exposure, 22:4655
effects on visual accomodation of man exposed at Hiroshima and Nagasaki, 22:51816
effects on weather patterns of temperate Eurasia, 21:41035
electromagnetic emissions from, stability of new Radio Code for calculating, 22:18998 (LA-3864)
electron range in air from, LEMP 1 calculation of Compton-, 24:42552 (LA-4348)
fallout analysis after third Chinese, of May 9, 1966, 21:1740(R) (HASL-173 and App.)
fallout and debris formation following, 22:45186 (NYO-3756-2, Sect. B)
fallout at long distances from, radioisotope fractionation in, 23:17591
fallout contamination of drinking water by, 22:6828
fallout contamination of milk by, during 1965, 22:31091
fallout content in debris from sixth Chinese, 23:38111
fallout content of north temperate zone oceans and soils from, (E/T), 23:17626(T) (AEC-tr-7030, pp 75-105)
fallout deposition and distribution from, use of model to estimate, 22:179(R) (NYO-3654-3)
fallout deposition following, method for prediction of, 24:7500 (PB-184852)
fallout deposition from seventh Chinese, in Alps and Berlin, Germany, 24:321
fallout deposition from, effects of leaching on radioisotope transport in freshwater ecosystems following, 25:4479
fallout deposition in Chiba, Japan from third Chinese, 22:40266
fallout deposition in Niigata City, Japan, from Chinese, 1965 to 1966, 22:40270
fallout deposition in Niigata City, Japan, from Chinese, 1963 to 1964, 22:40271
fallout deposition on earth's surface in Leningrad District from, 1954 to 1965, 22:21194 (A-AC-82/G/L-1171)
fallout distribution from, effects of meridional circulation and eddy diffusion on, 22:40261
fallout from 10th Chinese, monitoring in Swedish atmosphere, 25:57580
fallout from 1961 and 1962, measurment of global iron-55 and strontium-90, 22:48953
fallout from 1966 Chinese, radioactivity in atmosphere and rainwater from, 22:12439 (AERE-R-5575)
fallout from 1966 French, monitoring in South Africa, 22:21210
fallout from 1966 to 1968 French, on Mururoa Atoll, measurement of interhemispheric transport of, 25:29221
fallout from 1968 French South Pacific, effects on stratospheric inventories of strontium-90 and zirconium-95, 25:15784 (HASL-239, pp I.80-91)
fallout from 1968 French, monitoring in northern hemisphere of, 23:49949 (BNWL-1051(Pt.2), pp 111-16)
fallout from 1968 French, monitoring of UK, 23:19862 (AERE-R-5899)
fallout from August 1968 French, ground-level measurements at Barbados, British West Indies of, 23:49946 (BNWL-1051(Pt.2), pp 102-4)
fallout from China IV and V, analysis by autoradiography and microscopy of, 22:10416 (FOA-4-4327-28)
fallout from Chinese and Russian, plutonium content of, 22:42879
fallout from Chinese and Soviet Union, physicochemical properties of, 22:18970
fallout from Chinese and Soviet Union, physicochemical properties of, 22:18970
fallout from Chinese May 9, 1966, effects on zirconium-95 content of crops in Utah during May and June, 25:10999
fallout from Chinese, composition of, 22:20975(R) (BMwF-FBK-67-89)
fallout from Chinese, contamination of milk in northern California by, 21:39375 (UCRL-70301)
fallout from Chinese, effects of meteorological conditions on environmental contamination at Seoul, Korea from, (E), 25:2368
fallout from Chinese, effects of, on radioactivity content of atmosphere in United States during 1966, 22:28505
fallout from Chinese, Fayetteville, Arkansas, 1967, 22:8222(R) (ORO-2529-15)
fallout from Chinese, measurement of gamma spectra of, 22:36259
fallout from Chinese, measurements in Japan of, 22:42848 (NP-17492)
fallout from Chinese, monitoring in Stuttgart—Hohenheim, 22:35947
fallout from Chinese, of May 14, 1965, monitoring of, 21:12532
fallout from Chinese, of May, Oct., and Dec., 1966, iodine-131 content of, 22:27919
fallout from Chinese, on Dec. 28, 1966, analysis of, 23:45
fallout from Chinese, radioisotope fractionation in, 22:42881
fallout from Dec. 1967 Chinese, monitoring in ground-level atmosphere at Fayetteville, Ark, 25:29219
fallout from Dec. 24, 1967, Chinese, fractionation properties of, 24:27247
fallout from eighth and ninth Chinese, 25:10472(R) (BMBW-FBK-70-19)
fallout from eighth Chinese, measurement of beta activity in Japanese atmosphere and rainwater from, 24:31488 (NIRS-RSD-22, pp 13-19)
fallout from fifth Chinese, particle size of, 22:33572
fallout from four Chinese, characteristics and analysis of, 22:27921
fallout from French, 1966, monitoring of, 21:14327(R) (NP-16416)
fallout from June 17, 1967 and Dec. 24, 1967 Chinese, monitoring of over-Atlantic Ocean, 22:48954
fallout from June 1967 Chinese, 22:42877
fallout from June and Dec. 1967 Chinese, monitoring of UK, 23:19862 (AERE-R-5899)
fallout from May 1962, 1965, and 1966, iodine-131 content in midwest US atmosphere and milk from, 22:25541
fallout from May 1966 Chinese, 22:10380
fallout from May 1966 Chinese, fractionation and particle size distribution in, 24:31506
fallout from May 1966 Chinese, monitoring in Berlin of, 21:12538
fallout from May 1966 Chinese, significance of symmetric fission in studies of, 22:16720
fallout from May 9, 1966 Chinese, monitoring in Fayetteville, Arkansas ground-level atmosphere, 22:30716
fallout from near ground-level, effects on contamination of surface waters, (T), 25:8354 (HMI-B-86)
fallout from October 1966 Chinese, in Niigata, Japan, 22:10382
fallout from Sept. 1969 Chinese, monitoring of stratospheric, 25:280
fallout from Sept. 29, 1969 Chinese, effects on stratospheric inventories of strontium-90 and zirconium-95, 25:15784 (HASL-239, pp I.80-91)
fallout from Shot Priscilla, radiochemical analysis of, 25:10733 (AD-708566)
fallout from single, manual method for predicting ground-level distribution of, 24:44117 (ARLV-351-12)
fallout from Soviet, α activity from, 21:6038
fallout from third and fifth Chinese, γ spectrometric analysis of, 21:17750
fallout from third Chinese, gamma spectrometer determination of, 22:12469
fallout from third Chinese, May 9, 1966, 22:12451
fallout from third Chinese, measurement of specific gravity of, 22:40263
fallout from third Chinese, measurements of atmospheric radioactivity from, 22:18975
fallout from third Chinese, radiochemical and physical properties of particles from, 22:12452
fallout from third Chinese, radioisotope fractionation in, 22:12450
fallout from third Chinese, radioisotope fractionation in particles of, 22:16719
fallout from third Chinese, radioisotope fractionation in, 22:4284
fallout from third, fourth, and fifth Chinese, activity and decay characteristics of, 22:27924
fallout from, calculation of γ field in air from, 22:45519
fallout from, chemical fractionation of, 24:339 (FOA-4-4401-28)
fallout from, effect of precipitation on, 21:1459(R) (TID-23369)
fallout from, effects on radioactivity of world's oceans and seas, 22:51122
fallout from, empirical model for calculation of worldwide deposition of, 24:25147
fallout from, maintenance manual for Weapons Effects Display System for mapping, 25:13322 (UCRL-50892(Vol.4)(Pt.1))
fallout from, measurement and analyses of, 1964, 21:10473
fallout from, monitoring at Japanese weather station, 22:48945
fallout from, radioactivity of French rainwater, soils, and plants from, 22:25538
fallout from, seasonal variations in content and distribution of, 23:11444 (BNWL-481-2, pp 1-126)
fallout from, shelter evaluation program for protection of personnel against, 21:39155 (IITRI-M-6088)
fallout in atmosphere from, cleaning action of clouds and precipitation for, 22:23171
fallout in Czechoslovakia from May 1966 Chinese, strontium-89/-90 ratio in, 23:24310(T) (UCRL-Trans-10340)
fallout in Italy from Chinese, 21:36595
fallout in Niigata, Japan from third Chinese, effect of atmospheric currents on, 22:6486
fallout in Uzbekistan region of USSR from, ratio of dry to moist, 22:45198
fallout monitoring from Chinese, 24:29308(R) (BMBW-FBK-70-4)
fallout monitoring from Dec. 28, 1968 Chinese, in Swedish atmosphere, 25:57577
fallout monitoring from May 1966 Chinese, at Fayetteville, Ark, 25:29216
fallout monitoring from second Chinese, 22:25535(T) (NSJ-tr-98)
fallout monitoring from second Chinese, 21:41023
fallout monitoring in atmosphere and rain following Chinese, 21:12527 (AERE-R-5260)
fallout monitoring in Australia from French, in Polynesia, June to July 1967, 22:14592
fallout monitoring in Berlin from fifth Chinese, Jan. 1967, 22:12446
fallout monitoring in East Germany following 7th and 8th Chinese, 25:2370
fallout monitoring in Japan from fourth Chinese, 1966, 21:36147 (NP-16800)
fallout monitoring in New Zealand during 1970, 25:24132 (NRL-F-41)
fallout monitoring near Milan, Italy from seventh Chinese, 22:27922
fallout monitoring of Swedish atmosphere following June 1967 Chinese, 22:51094 (FOA-4-4369)
fallout particles from Chinese and Soviet, uranium content in, 22:27920
fallout particles from, density measurements of, 22:2229
fallout particles from, separation and analysis of, 22:42873 (UCRL-50428)
fallout particles in northeast Pacific Ocean from, measurement of sinking rate of, 22:2255
fallout production by, method for prediction of, 25:48615(T) (AEC-tr-7137)
fallout transport from May 1966 Chinese, calculation of worldwide, 25:29216
fire hazards from, methods for combating, 22:47305 (CONF-680527-1)
fire spread from, evaluation of models for simulating, 25:13134 (AD-713418)
fireballs from, effects of atmospheric particles on, (T), 25:54815 (AD-722031)
fireballs from, xenon shock tube simulation of thermal environment of, 25:51658 (AD-717090)
fires in urban areas from, model for predicting distribution of, 24:27307(R) (AD-700694)
fission product detection from June 17, 1967 Chinese, autoradiographic method for, 23:40882
fission products from, 1961 to 1963, properties of particulate, 21:6056
fission products from, transmission of gamma radiation from, 23:15970 (AD-672719)
gamma doses in single-compartment above-ground concrete structures from, calculation of, 22:31889
gamma doses in underground concrete structures from, calculation of, 23:48958 (RRA-M-71-A(Rev.))
gamma radiation from low altitude, effects of Compton scattering on gamma spectrum from, 24:39094(R) (AD-703320)
gamma radiation from, spectral angular distribution of air-scattered, 25:296
gamma-radiation output from, (T), 22:13363
geomagnetic effects of, (T), 24:12693
ground motion predictions for, survey methods for, 23:49972 (AD-690208)
ground pressure wave generation by low altitude, effects of winds on, 22:47248
hazards to eyes of man, thermal, 25:37890 (LA-4651)
hazards to human populations, factors affecting estimation of potential blast and thermal radiation, 25:49303 (CEX-71.1)
infrasonic-wave propagation in atmosphere from, (T), 21:43887(R) (AD-650752)
iodine-131 monitoring of Chinese, in Portugal, 25:24017
ionization of gases from, 21:5130(R) (GA-7419)
manganese isotope injection into atmosphere by, 21:6039
manganese-54 production by, 21:6059
microbarographic oscillations induced by, in Great Britain and Ireland, 22:42883
neutron radiation environment calculations for, 24:6609
occurrence at air field, postattack standards for aviation and medical personnel for, 22:4642
occurrence of bone diseases in human hands following exposure to, 22:4683
occurrence of multiple myelomas in survivors of, in Nagasaki, 22:4643
pressure waves from low-altitude, studies of atmospheric, 25:51659 (AD-720853)
pressure waves from, dispersion and amplitude spectra of, 21:37316
pressure waves from, effects of winds on, 22:30725
pressure waves from, ionospheric disturbances from, 21:23075 (NP-16651)
pressure waves from, propagation of, 21:18534
protection against, civil engineering in, 22:37963 (AD-664479)
protection against, economics of shelters for, 22:16791 (ORNL-TM-2041)
protection against, methods for, 22:8528(T) (JPRS-42929, pp 208-65)
protection from blast and fallout from, 22:10425
protective measures against, 22:12467(T) (UCRL-Trans-10197)
radiation dose to man following, management aspects of internal, 22:31058 (BNWL-SA-1511)
radiation dose to man following, methods of estimating, 22:40669 (UCRL-70894)
radiation dose to man from, estimations by UNSCEAR, 25:4518
radiation doses from Hiroshima and Nagasaki, determination of, 21:14668
radiation doses from, calculations of initial and residual, 25:24135
radiation dosimetry in Hiroshima and Nagasaki, shielding factors affecting, 21:20229(R) (ABCC-65-66)
radiation effects on survival of burros following exposure to, whole-body γ and neutron, 22:40829 (ORO-657, pp 18-34)
radiation environments from, neutron—gamma Monte Carlo transport code for determining, 22:40280 (AD-667933)
radiation from, shielding ground-based weapons from, 22:4392

radiation hazards from, calculation of shielding efficiencies of materials for protection against, 25:15863
radiation hazards to human populations, factors affecting estimation of potential, 25:49303 (CEX-71.1)
radiation hydrodynamics of, (T), 24:49067 (AD-703293)
radiation hydrodynamics of, DRAD code for, (T), 24:49068 (AD-703664)
radiation transport from, air-density transformations for, (T), 21:35401
radiation wave propagation from, self-similar, (T), 22:9231
radio flash from low-altitude, (T), 24:42551 (LA-4245)
radio signal from gamma differential scattering in, (T), 24:5044 (LA-4253)
radio signal generation by, (T), 22:13363
radio signals from, development of, (T), 22:52640
radio wave generation in ionosphere, (E), 22:13369
radioactive contamination of food and human populations following, 22:38304
radioactive contamination of terrain following, 22:8529(T) (JPRS-42929, pp 293-330)
radioactivity monitoring of, associated with aerospace activities and weapons testing, off-site, 22:51570 (NP-17401)
recovery of man exposed to, at Hiroshima and Nagasaki, effects of spleen shielding on, 22:21559
seismic and microbarologic signals from summer 1970 French tests in south Pacific, 25:48688
seismic waves from, effects of crustal structure on amplitude of Rayleigh-type, (T), 24:44154
seismic waves from, method for predicting amplitude of Rayleigh surface, 25:21214 (AWRE-O-88/70)
shielding calculations for, methods for gamma and neutron, 22:32424 (DASA-1892-3)
shock waves from distant, computer program for predicting forms of, 25:293 (AD-707122)
shock waves from, effects of climate on long-range propagation of, (E), 24:16703 (SC-RR-69-572)
shock waves from, propagation at large distances of, (E/T), 22:47259 (SC-DC-2342)
strontium-90 contents in stratosphere and troposphere from, implications of changes in, 22:186
strontium-90 deposition in Japan from, seasonal variations in, (E), 22:23167
strontium-90 deposition on global soils from, 1961 to 1967, 22:27917 (TID-24341)
strontium-90 injection into atmosphere from first Chinese, calculation using Arkansas rain data, 21:28101
strontium-90 production by, 21:6059
survivors of, treatment of, 22:6822
Teller light origin from, possible sources for early, (T), 23:22982 (UCRL-5354)
testing in China, effects of, on cesium-137 and strontium-90 content of milk in Japan during 1966 and 1967, 22:23540
testing in China, effects of, on fallout contamination of atmosphere in Japan, 21:39432
testing in China, effects of, on fallout content in atmosphere and rain water in Japan, 21:39431
testing in China, effects of, on fallout content of foods and water in Japan, 21:39425
testing in Pacific Ocean during 1968, fallout monitoring following French, 23:35705(R) (HASL-210)
testing in Southern Hemisphere, fallout radioisotope content of atmosphere over central USA from, 23:50459(R) (HASL-204)
tests at Moruroa France during 1966, 22:25850
tests by France in South Pacific during 1966 to 1967, 23:12089
thermal radiation emitted by, atmospheric transmission of, 21:43890(R) (AD-651815)
thermal radiation from, atmospheric transmission of, 21:2094 (AD-641481)
thermal radiation from, ignition of tinder materials by, 21:19781(R) (AD-640595)
thermal radiation from, parameters affecting fire hazards of, 21:10879 (USNRDL-TR-1040)
thermal radiation from, refractory particle clouds for shielding, (E/T), 24:32888
thermal radiation from, transmittance by windows and window screens of, 21:22112(R) (AD-643019)
time lapse after, use of niobium-95/zirconium-95 activity ratio in fallout for estimation of, 23:40911
time lapse after, use of niobium-95/zirconium-95 activity ratio in fallout for estimation of, 24:31528
tungsten-185 content and distribution in stratosphere from, 1961 to 1962, 21:25998(R) (RLO-1776-3)
uranium-235 and -238 content in stratosphere from Chinese, 21:3186
xenon-133 release to atmosphere from Chinese, May 1965, 21:6065
NUCLEAR EXPLOSIONS, HIGH-ALTITUDE
acoustic waves from, effects of atmospheric wind structure on, (T), 22:13360
acoustic-gravity waves from, atmospheric propagation of, (T), 24:36436 (AD-702162)
airglow induced by, measurements of, 21:37338
amplitude perturbations of vlf in Antarctic due to July 9, 1962, (E), 22:13362
aurora induced by, measurement of, 21:37338
charged particles from, Ariel observations of, 21:9429
charged particles from, unidirectional and omnidirectional flux densities of trapped, 21:43941
charged particles trapped from, analysis of data from Explorer IV observations of, 21:43889(R) (AD-651489)
charged-particle intensities in inner radiation zone before and after Starfish, 21:13430 (N-66-37210)
debris motion following Starfish, 21:9462
detection from ionospheric disturbances, method for, 23:24337
detection of deep space, optical system for, 22:2260 (CONF-671022-1)
detection of, in ionosphere with finite electric conductivity in uniform magnetic field, mathematical model of, 24:45144
detection systems for, optical discrimination technique to prevent false triggering by lightning of, 23:21839 (LA-3757)
detection, relation of Doppler-frequency variations to, (E), 23:51445 (AD-687535)
effect on electron loss rate from F2 region of Starfish, (E/T), 22:9205
effects of Chinese, on radioactivity of rainwater in Fayetteville, Arkansas, 1965 to 1966, 21:10463(R) (ORO-2529-6)
effects of Russian 1961, on atmosphere over Calcutta, 23:46406
effects of Starfish, on trapped protons, (E), 23:44240(R) (AD-683341)
effects of, on content of fission products in atmosphere, 21:10463(R) (ORO-2529-6)
effects of, on formation of fallout particles in atmosphere, time-interval for, 21:10463(R) (ORO-2529-6)
effects on air conductivity, 22:38929
effects on atmospheric transmittance at 0.32 to 0.70 μ, 24:3237 (EGG-1183-435(Rev.))
effects on atomic lithium content in upper atmosphere, (E/T), 21:45257
effects on ballistic missiles, (T), 25:5239
effects on electron loss rate in ionospheric F2 layer, 21:39871
effects on geomagnetic field, 21:41934
effects on geomagnetic field, 21:41944
effects on geomagnetic field, data analysis, (T), 22:22004 (CONF-661204-(Vol.1), pp 6.1-12)
effects on geomagnetic field, distribution of disturbance from, 21:29116
effects on ground-level geomagnetic field, fluctuations from, 21:684 (AD-635285)
effects on ionization in ionospheric D region, molecular-oxygen ion model for predicting, 21:11490 (NP-16459)
effects on ionosphere, (E), 22:34371
effects on ionosphere, (T), 24:23853 (FOA-4-4415)
effects on ionosphere, methods of calculating lf and vlf attenuation due to, 21:23077 (RM-5296-PR)
effects on ionosphere-exosphere system and ground-level magnetic fluctuations, (T), 21:11540
effects on ionospheric D region, 22:50085
effects on magnetosphere, (E), 23:18515
effects on particle trapping in inner radiation belt, (T), 23:25196
effects on short wave communications, 21:19788
effects on surrounding atmosphere, method for measurement of, 24:29407 (AD-688512)
electron diffusion from Starfish, radial, (E), 23:39378
electron flux from, variation of trapped, (E/T), 21:9442
electron flux in inner radiation belt from, 21:23121
electron fluxes from pre- and post-Starfish data, inner-zone, 22:34519
electron fluxes in radiation belts from, 21:13447
electron injection and decay from Starfish, inner radiation belt, (E), 23:44340
electron measurements from Starfish, Oct. 1963—Oct. 1965, 22:34514
electron transient behavior in artificial belt following, 21:9460
electrons from shock heating in exosphere by, 21:9463
electrons from Starfish, satellite observations of temporal behavior of trapped, 21:41957
electrons from, energy spectrum and flux of trapped, 21:9428
electrons geomagnetically trapped from, spatial distribution and decay of, 21:9458
electrons injected into inner zone by Starfish, losses of, (E), 23:1958
electrons trapped in inner radiation belt from, decay lifetimes of, (T), 25:22426
fallout from October 1966 Chinese, in Niigata, Japan, 23:2422(T) (NSJ-tr-132)
fallout from, use of cadmium-109 as tracer of, 22:4283
fission products from, high-energy beta's and gamma's from long-life, 21:25048
fuel burnup in deuterium—tritium, 24:17979
gamma aurora effect of, possibility of recording, 21:39877
gamma scattering from, Monte Carlo calculation for exponential atmosphere, 22:38875 (LA-3944)
generation of magnetohydrodynamic waves by, model for, (T), 22:41480
geomagnetic disturbance from, effects of shock wave on formation of, 21:29128
geomagnetic fluctuations induced by, ground-level, (T), 21:11540
gravity waves from 1961 USSR, propagation of, 21:695
ionosphere disturbances from, variations in F-region virtual height due to, 21:25043
ionospheric absorption properties in, technique for detecting, 22:47956
ionospheric disturbances associated with, 21:11539
ionospheric F-region critical frequency perturbation by, 21:23109
lithium emission spectra in twilight from, 21:25050
magnetic storm induction by, (E), 22:24151
methods for protection following, 23:20198 (CONF-680507-, pp 398-418)
model for spherical or circular source with nonuniform concentration during initial moment, 24:12715
particle injection into trapping regions from Starfish, (E), 25:17042
phase anomaly induced by June 17, 1967, vlf, (E), 22:24137
photography of, film analysis and interpretation in, 25:10893 (EGG-1183-484)
plasma production in, effects on radar, 22:27946
proton flux in inner radiation belt following, 21:13437
radar scattering by ionized media from, (T), 23:9594 (SC-R-68-1874)
radar scattering from ionized media from, pulsed, (T), 24:3241
radiation belt decay from Starfish Burst, artificial electron, (E), 22:50083 (N-68-11826)
radiation belt from Starfish, structure and decay of, 21:31329
radiation effects on reproduction of Drosophila melanogaster following, 22:36335
radiation from, analysis of trapped, 21:9461
radiation from, description of IRIG compatible spectrometer for pulse height analysis of gamma and neutron, 21:3282
radio emission calculations for, elimination of flutter in Radio Flash Code for, 23:2440 (LA-4014)
radio emission from, 24:17750
radio-wave reflection loss in ionosphere disturbed by, method for calculating, 21:24981 (RM-5249-PR)
radioactivity from, Kosmos-6 data on, 24:21667
shock wave propagation from, mathematical analysis of, 23:483 (AD-671931)
solar cell degradation in radiation environment before and after Starfish, 21:8664
spectra from Starfish, conjugate auroral and afterglow, (E), 24:35293
synchrotron radiation from Starfish, measurements near magnetic equator of, 21:9464
NUCLEAR EXPLOSIONS, SURFACE
acoustic-gravity waves from, kinematic and stationary phase analysis of, 23:26385 (AD-681379)
airblast from, measurement of close-in, 24:41549 (CONF-700101-(Vol.2), pp 1508-43)
blast effects from, model for prediction of, 21:39068(R) (DASA-1859)
blast effects on shock-protected contents of cylindrical buildings at 10 to 50 psi overpressures, 22:51196
blast from, ground motion in elastic half-spaces induced by, 21:39066(R) (AD-633618)
clouds produced by, particle size distributions as function of time within, 22:45357(R) (UCRL-50007-68-1)
crater formation by, scaling laws for, 22:40285
destructive properties of high and low yield, comparison of, 21:30565(T) (AD-637416)
detection of, design of optical and transient radiofrequency signal system for, 24:348(P)
detonation force of, computational disc method for visual determination of, 22:30741
effects on atmosphere, numerical calculation of hydrodynamic, 21:13433 (UCID-15048)
effects on bird populations of Eniwetok, observations of 1964 through 1967 on, 24:25429
effects on ecology of plants at Nevada Test Site, 25:37757 (UCLA-12-817)
effects on geologic features at Nevada Test Site, 23:21806 (NTS-79)
effects on motion of ground water table, 22:35960 (AD-661453)
effects on production of electromagnetic fields, development and testing of LEMP 1 computer code for calculation of, 24:33812 (LA-4346)
effects on rock of, use of computer for analysis of, 21:30557 (AD-641311)
elasto-plastic region around, equation of motion for, (T), 21:39067(R) (AD-637197)
electromagnetic pulse from, effects on electrical equipment, 21:692(R) (NP-16306)
fallout and debris formation in, soil melting and vaporization in, 22:45186 (NYO-3756-2, Sect. B)
fallout contamination of environment by, recommendations for protective measures following, 23:31742
fallout deposition following, method for prediction of, 24:7500 (PB-184852)
fallout deposition from, effects of atmospheric and surface conditions on local, 23:19863 (CONF-680507-, pp 49-64)
fallout from Chinese, α activity from, 21:6038
fallout from Dec. 1966 Chinese, radioisotope fractionation in, 23:6225
fallout from October 16, 1965 Chinese, geochemical behavior of, 21:28100
fallout from single, manual method for predicting ground-level distribution of, 24:44117 (ARLV-351-12)
fallout from Small Boy Shot, specific activity of, 23:26384 (AD-677403)
fallout from Small Boy, effects of particle type on activity of, 22:35957 (AD-660655)
fallout from tower, fractionation of, 22:35941 (FOA-4-4351-28)
fallout from, characteristics of ionizing radiations from, 23:19864 (CONF-680507-, pp 65-83)
fallout from, fractionation of, 22:35941 (FOA-4-4351-28)
fallout mass-size distributions from, lognormal and power-law equations for comparison of, 21:16015 (USNRDL-TR-1105)
fallout particles from Dec. 28, 1966 Chinese, radioisotope fractionation in, 23:17581
fallout particles from, methods for simulation of, 22:47244
fallout particles from, separation and analysis of, 22:42873 (UCRL-50428)
gamma doses from, at Hiroshima and Nagasaki, 24:4247
ground motion from large yield, prediction of air blast-induced, (E/T), 22:27941
ground motion from, calculation of free-field, 23:17633
ground motion predictions for, survey methods for, 23:49972 (AD-690208)
manganese isotope injection into atmosphere by, 21:6039
radiation damage to ports and ships from, 22:47262
radioactive contamination of terrain following, 22:8529(T) (JPRS-42929, pp 293-330)
radioactivity from Trinity, residual, 21:6025
seismic waves from Bikini and Eniwetok, analysis of travel times of, 22:8235
shock wave generation in atmosphere from, asymptotic analysis of, 23:24329 (AD-678507)

shock waves and flow fields from ocean surface-located, propagation of, 22:21220
tungsten-185 from Hardtack, distribution and stratospheric transport processes of, 22:12447
water wave production by nearby over-land, model of, 22:35958 (AD-661451)
NUCLEAR EXPLOSIONS, UNDERGROUND
acoustic wave propagation from cratering, atmospheric lens effects on long-range, 23:33284 (SC-M-69-332)
actinide recovery following, 22:6382
airblast from, for excavation of Atlantic—Pacific sea-level canal, 25:23715 (ARLV-351-17)
airblast from, measurement of close-in, 24:41549 (CONF-700101-(Vol.2), pp 1508-43)
analysis of, design of Direct-Reading Scaler for, 23:478 (JAB-99-40)
analysis of, drilling equipment and techniques for postshot, 21:14363 (UCID-15034)
announcement by AEC during Aug. 1967, 22:23515
announcement by Atomic Energy Commission at Nevada Test Site during July 1967, 22:40693
bibliography of civil, industrial, and scientific uses for, 25:57603 (TID-3522(Rev.9))
bibliography on, 23:26396
bibliography on seismology, aftershocks, and related phenomena associated with, 25:41951 (NVO-87)
bibliography on, 1950 to 1968, 24:29412 (RT/GEN-(69) 3)
bibliography on, from Jan. 1966 to Dec. 1967, 23:21850
blast damage to glass and structures from, prediction of air, 24:41548 (CONF-700101-(Vol.2), pp 1485-1507)
blast wave propagation from, effects of geologic and meteorologic conditions on, 24:41548 (CONF-700101-(Vol.2), pp 1485-1507)
blast waves from, effects of charge burial depth on suppression of, 23:9601
book: Underground Nuclear Explosions, 21:1484(T) (AEC-tr-6777)
book: Peaceful Use of Nuclear Explosives: Some Economic Aspects, 23:45435
book: Seismics and Craters Formed by Explosions in Underground Blasts, 24:25155(T) (UCRL-Trans-10441)
canal excavation in Central America by, model for hydrologic distribution of radioisotopes around sea-level, 24:16698
canal excavation in Central America by, possible biological effects from, 24:9545
canal excavation in Colombia and Panama by, radioisotope distribution around, 23:11632 (BMI-171-16)
canal excavation using, computer simulated scheduling for interoceanic, 24:41519 (CONF-700101-(Vol.2), pp 994-1013)
carbon-14 release from, permissible limits for, 22:12463 (UCID-15251)
cavities for emplacement of, equipment and methods for construction of, 24:36441 (CONF-700521-1)
cavities formed by, methods for arresting detonations in gas mixtures in, 22:12458 (MSAR-67-187)
cavities from contained, use as biological filters for denitrification of irrigation return water, 24:41531 (CONF-700101-(Vol.2), pp 1222-45)
cavities from deep, disposal of fuel reprocessing wastes in molten silicate rock, 25:44570 (UCRL-51044)
cavities from granite-contained, characteristics of, (E/T), 24:50484
cavities from, distribution of elements around, 24:27224
cavities from, method for calculating radius of, 23:15993 (CEA-R-3594)
cavities from, OGRE computer code for simulating flow of compressible fluids into, 24:36485 (UCRL-50820)
cavity and chimney dimensions from, drilling equipment and techniques to determine, 21:14363 (UCID-15034)
cavity and chimney formation by, in granite rock, 22:23187 (UCRL-50385)
cavity and chimney formation in, 21:16037
cavity behavior in jointed rock masses from, feasibility of modeling, 21:30528(R) (AD-631028)
cavity expansion in, use of unloading adibat to calculate, 21:19787 (UCRL-14729)
cavity formation and fractured rock zone for, scaling method for estimating size of, 24:41497 (CONF-700101-(Vol.1), pp 519-44)
cavity formation and seismic effects of, relations with water content in surrounding silicate rock, (E/T), 25:21226
cavity formation by contained, in various geologic media, equation for calculation of radius of, 24:22827 (NVO-1163-TM-15)
cavity formation by deep, effects of geologic conditions on, 24:41473 (CONF-700101-(Vol.1), pp 29-42)
cavity formation by Greeley Event, postshot drill hole data on, 25:26412 (UCRL-50979)
cavity formation by rock-contained, SOC computer calculations of, 24:50488
cavity formation by, analysis using three-zone model, 22:12460 (NVO-1163-78)
cavity formation by, data from US tests during 1964 to 1970 on, 24:41474 (CONF-700101-(Vol.1), pp 43-65)
cavity formation by, economics for natural gas storage, 23:2453
cavity formation by, economics of natural gas storage in, 22:42926(R) (UCRL-13354)
cavity formation by, effects of geophysical properties of explosion media on, 24:338 (CEA-R-3779)
cavity formation by, effects of ground yield strength on, 23:2448
cavity formation by, equation for determination of radius of, 22:4299(T) (UCRL-Trans-10145)
cavity formation by, in alluvium of Nevada Test Site, collapse mechanisms of, 24:16730 (USGS-474-41)
cavity formation by, relation of radius to life of, 21:28125
cavity formation by, spatial distribution of radioactive materials in, 21:30559 (HNS-1229-47(Suppl.1))
cavity formation by, use in natural gas storage, 22:14602
cavity formation in alluvium by, collapse mechanism during, (E), 24:20932
cavity formation in alluvium by, pressure and temperature measurements in, 22:200
cavity formation in Piledriver Event, effects of returning tensile waves on, 22:19001 (UCRL-50373)
cavity formation in rock by, scaling criteria for dynamic numerical simulation of, 24:41498 (CONF-700101-(Vol.1), pp 545-59)
cavity gas dynamics, wall pressures, and temperatures for low-yield, 23:15991 (AD-673530)
cavity gas production by, in Sahara granite, composition and quantity of, 24:50486
cavity lining for, development of high-strength materials for, 24:32523 (NVO-38-24)
cavity pressure following, method for calculation of, 24:41493 (CONF-700101-(Vol.1), pp 463-80)
cavity production by, 21:30562 (UCID-15145)
cavity radii from, effect of water content, yield, medium, and depth of burst on, 21:24130 (UCRL-50203)
cavity size from, effects of rock strength and cavity gas properties on, (T), 23:24336
cavity volume from contained, effects of geologic media on, 25:32099 (CEA-R-4096)
chemical environment in cavity of, exploding wire simulation of, (E/T), 24:41546 (CONF-700101-(Vol.2), pp 1456-73)
chemical reactions in, 22:35969
chemicals production by, industrial, 22:35969
chimney formation by, for natural gas storage, 25:44466(R) (ORNL-TM-3480)
chimney formation by, phenomenology of, 24:4393 (CEA-R-3851)
chimney formations from, method for recovering oil from oil-bearing solids in, 23:43428(P)
chimney formations from, methods for purging radioactive gases from, (E), 22:21228 (UCID-15259)
civilian applications of, public health aspects of, 22:2261 (CONF-671029-1)
clouds from, photomicroscopic method for measuring particle size distribution in explosion, 23:49952 (UCRL-71837)
conference on peaceful uses of, summary of, 23:26387 (CONF-690312-6)
conference on peaceful uses of, Vienna, Austria, Jan. 18 to 22, 1971, 25:54818(T) (UCRL-Trans-10543)
conference on peaceful uses of, Vienna, March 2 to 6, 1970, 24:50478 (STI/PUB-273)
containment and phenomenology of, (E), 23:45430 (NVO-40(Rev.2), pp 13-50)
containment and phenomenology of, effects of geologic structures on, 23:13900 (UCRL-50482)
containment of Jorum Event, method for pre-shot calculation of, 25:57607
containment of, design and fabrication of drill hole gas miter valve for, 24:36460 (UCRL-50863)
containment of, venting mechanisms in, 23:43425 (UCRL-50604)
copper ore and shale oil processing using, feasibility study of, 22:45208(R) (ORNL-TM-2298)
copper recovery from chalcopyrite using, in-situ leaching method for, 25:4176
crater ejecta and fallback from, method for determining size distribution of, 24:41560 (CONF-700101-(Vol.2), pp 1726-45)
crater excavations by, hydrologic distribution of radioisotopes around, 22:21226 (NVO-1229-87)
crater fallback from, effects of geologic conditions on slope of, 24:9543 (NCG-TR-14)
crater formation and ejecta distribution from, effect of weapon yield on, 21:28120 (AFSCM-500-8)
crater formation by large, phenomena and processes of, 24:14110(T) (UCRL-Trans-10420)
crater formation by row-emplaced, equations for predicting linear, 25:13135 (AD-713574)
crater formation by, computer calculations of effects of surrounding media on, 25:2381 (UCRL-50898)
crater formation by, computer calculations of effects of surrounding media on, 24:50491
crater formation by, computer programs for calculations of, 24:41487 (CONF-700101-(Vol.1), pp 334-59)
crater formation by, effects of delays in sequentially detonated rows and arrays on dimensions of, 25:46576 (SC-RR-710325)
crater formation by, effects of gas erosion on, 24:14112
crater formation by, effects of rock and shale physical properties on, 23:24333 (UCRL-71456)
crater formation by, effects of water content of surrounding rocks on, 25:4179
crater formation by, for possible industrial applications, 24:44155 (CEA-R-3983)
crater formation by, for water resources development in arid regions, 25:48685 (SU-326-P-31-2)
crater formation by, in desert alluvium, prediction using high explosive cratering data, 24:41559 (CONF-700101-(Vol.2), pp 1701-25)
crater formation by, in rock, stability of, (E/T), 24:41556 (CONF-700101-(Vol.2), pp 1661-1678)
crater formation by, model for simulating effects of gravity on, 24:48203(T) (UCRL-Trans-10476)
crater formation by, Plasticine model laboratory studies on, 25:297
crater formation by, Project Danny Boy predictions for, 24:44156 (ITR-1816)
crater formation from, effects of shock waves on, 21:36189 (UCRL-50276)
crater formation from, slope shape and stability of, (E), 21:39073 (PNE-5009)
crater formation in dry desert alluvium and dry basaltic and rhyolitic rocks by, 22:37898 (PNE-5012-I)
crater formation in, simulation of, 21:8492(T) (AWRE-Trans-54)
crater formations from, contamination of water in flooded, 23:15997 (UCRL-50531)
cratering by, review of research on, 23:2446
cratering experiments using, technical problems in, 23:21848 (UCRL-71491)
cratering theory for single and multiple, development of, 21:1476 (AD-634674)
craters from large, method for predicting gamma dose rates in, 24:31525 (NCG-TM-67-1)
craters from, effects of seepage characteristics of surrounding media on slope stability of, 25:13102 (NCG-TR-27)
craters from, ground water flow through nuclear, 22:168 (CBA-1229-F-4)
craters from, method for calculating dimensions of, 24:33817(T) (UCRL-Trans-10459)
craters from, mobility of tracked tactical vehicles in, (E), 24:340 (NCG-TR-17)
craters from, photogrammetric technique for measurement of, 22:12462 (SC-DC-67-2330)
craters produced by, engineering properties of, 22:6508 (PNE-5010)
damage to structures from, spectral matrix method for prediction of, 22:23243 (NVO-99-33)
data summary on emplacement conditions and cavity formation for forty-five US, 24:31527 (UCRL-50853)
debris from Hutch, separation of actinides and rare earths from, 24:31447 (UCRL-50847)
debris from, design and operation of small hot cell chemical plant for processing of radioactive, 25:4308
debris from, design of hot-cell radiochemical laboratory for analysis of, 25:51795
debris from, radionuclide content of, 21:36183(R) (ORNL-TM-1932)
decoupling of, in salt domes, construction of large diameter cavity for, 22:42925 (TID-24625)
decoupling theory for, construction of large diameter cavity in Tatum Salt Dome to test, 22:42922 (CONF-680908-3)
decoupling theory for, construction of large diameter cavities in salt domes to test, 22:42921 (CONF-680908-2)
decoupling theory for, stability of large diameter cavities in salt domes to test, 22:42920 (CONF-680908-1)
deep hole casings for, design of cylindrical, 22:207 (NVO-193-3)
depth of, cepstrum and pseudo-autocorrelation calculations for determination of, 24:50476
detection and identification by seismological means, review of international study group recommendations on, 23:2438
detection and identification of, capabilities of Yellowknife seismic array for, 22:8237
detection and identification of, development of seismic array data analyzer for, 22:196
detection and identification of, signal shape and pressure wave method for, 24:14113
detection at ORNL Station ORT from Aug. 1969 to Aug. 1970, station operation for, 25:18556 (ORNL-4584, pp 41)
detection by Gauribidanur seismic array, four-year data tabulation on, 25:21215 (BARC/I-64)
detection by measuring seismic wave propagation through earth's crust, 21:19780 (VUF-3014)
detection by seismic measurements, test ban control efficiency of, 25:292
detection by seismic methods, efficiency for use in test ban control, 24:29410 (FOA-4-4338)
detection by seismic methods, international nuclear test ban implications for, 23:4761
detection in, use of cavity wall sheathing for seismic wave decoupling to prevent, 22:51129
detection instrumentation for Wishbone, electrical environment of, 22:10637 (UCID-15210)
detection of Nevada Test Site, at Yellowknife, Northwest Territories, seismographic method for, 23:40903
detection of Nevada Test Site, description of instrument for, 24:29408 (AD-690073)
detection of, analysis of seismic wave data for, 21:12543(R) (AD-640212)
detection of, computer program for processing seismometer data for, 23:24485 (NVO-1163-34)
detection of, data on seismic methods for, 24:22817
detection of, description of unattended seismological laboratory and equipment for, 23:17638 (SC-DC-69-1641)
detection of, development of Large-Scale Seismic Array for, 21:41051(R) (AD-647554)
detection of, Indian seismology research on methods for, 25:57591 (INIS-mf-71, pp 181-98)
detection of, large aperture seismic arrays for, 21:4639 (AD-628901)
detection of, performance of Gauribidanur seismic arrays for, 22:48970 (BARC-309)
detection of, performance of large aperture seismic arrays for, 22:33578 (AD-662632)
detection of, recent developments in methods for, 22:27948
detection of, seismologic differentiation for, 21:8485
detection of, seismological investigation of P times to Australian stations for, 22:10413
detection of, seismological method for, 21:45268
detection of, seismological method for, 21:45269
detection of, seismological methods for, 22:10414
detection of, seismological station corrections for, 21:41052(R) (AD-649264)
detection of, teleseismic signal calculations for, 21:22063
detection of, use of large aperture seismic arrays for, 21:16033
detection of, use of large-aperture seismic arrays for, 21:197(R) (AD-631285)
detection of, use of seismic methods for, 21:28124 (UCRL-70470)
detection of, use of seismological data for, 21:196 (AD-629431)
detection of, use of seismological data for, 21:199 (AD-632956)
detection of, use of seismological data for, 21:200 (AD-632957)
detection of, using seismological techniques, 21:1478 (NP-15686)

detection of, Watson—Merdler focal depth method for seismic, 21:19779 (AD-640842)
detection using large aperture seismic arrays, 21:17746(R) (ESD-TR-66-250)
detection with large aperture seismic arrays, effects of noise and natural events on, 21:43075(R) (AD-651653)
detection with seismic arrays, reduction of spurious noise during, 22:14600
detonation of test, at Nevada Test Site during April 1966, 22:28458
detonation of test, at Nevada Test Site during June 1966, 22:28522
detonation of test, at Nevada Test Site during May 1966, 22:36257
detonation of, stress wave propagation and terminal response from, 22:47257 (UCRL-13357)
detonations during Feb. 1968, 23:26372
detonations during Sept. 1967, 23:4751
discrimination between earthquakes and, seismic methods for, 21:10486
discrimination between earthquakes and, seismic methods for, 21:1475 (AD-631105)
discrimination between earthquakes and, seismic wave magnitude method for, (E), 24:27253(T) (JPRS-50421)
discrimination between earthquakes and, teleseismic method for, 23:40905
discrimination between earthquakes and, using seismic P-wave spectra, 25:57599
discrimination between earthquakes and, using short period seismic array data, 25:57600
discrimination from earthquakes, Rayleigh-wave spectral ratio method for, 25:290
discrimination from earthquakes, seismic methods for, 23:2435
discrimination from earthquakes, use of long-period seismic wave data for, 23:49970
drill holes in Sahara Desert for, methods for studying walls of, 24:4374 (CEA-R-3762(2))
earth motion from Dumont and Vulcan, measurements of, 22:4298 (UCRL-13322)
earth motion from, effects in cracking, plastic, and elastic zones of, 21:8494
earthquake modification by, (T), 24:41464
economic aspects and operations plan for, for excavation of Route 17A sea-level canal in Panama, 24:2331 (HN-20-210)
economic aspects and operations plan for, for excavation of Route 25E sea-level canal in Panama, 24:2332 (HN-20-211)
economic feasibility for development of water resources, 22:8245 (UCRL-70762)
effect on motion of high-rise buildings, 21:36182 (NVO-1163-67)
effect on reinforced concrete test structures, 25:48772(R) (JAB-99-50)
effects of Aardvark, on water level in well near explosion site, (T), 25:13111
effects of Amchitka Island, Alaska, on seismic activity of nearby islands, program for monitoring, 25:34763 (CGS-746-10)
effects of Benham, on geologic faults at Nevada Test Site, 24:20914
effects of Benham, on natural tectonic strain at Nevada Test Site, 24:20915
effects of Benham, on occurrence of earthquakes near Nevada Test Site, (E), 24:20917
effects of Benham, on occurrence of earthquakes, near- and far-field seismic measurements of, 24:20913
effects of Benham, on seismicity of eastern Nevada and Death Valley, California, (E), 24:20911
effects of Calabash, Cruet, and Pod, on earthquakes at Yucca Flat, Nevada, 25:6442 (USGS-474-94)
effects of Cannikin, on ecology, geology, hydrology, and seismicity of Amchitka Island, Alaska, use of Milrow data in predictions of, 25:42318 (TID-25735)
effects of contained 100 kt, on surrounding medium, mechanical, 25:10741
effects of contained and cratering, on surrounding medium, numerical simulation of early-phase dynamic, 24:50489
effects of contained, on ground displacement near rock faults and fractures, (E/T), 24:41523 (CONF-700101-(Vol.2), pp 1095-1102)
effects of contained, on sink area surface fracture and movement, 24:22773 (USGS-474-56)
effects of contained, summary of geonuclear, 24:41476 (CONF-700101-(Vol.1), pp 75-88)
effects of controlled, on geologic media, digital Lagrangian code for calculation of, 24:39095 (CEA-R-3957(1))
effects of Crew and Noggin, on emplacement hole-buried concentric cylinders, analysis of structural response data on, 25:6446 (UCRL-50867)
effects of Greeley event, on rock fracturing at Pahute Mesa, Nevada Test Site, 23:38095 (USGS-474-12)
effects of Handley and Jorum, on dynamic and static strain measurements at Round Mountain, Nev, 25:21224
effects of Handley event, on geology and hydrology of Nevada Test Site, 25:29203 (USGS-474-95)
effects of high-yield, on anomalous D layer partial reflections, (E), 22:36855
effects of Hutch Event, on dynamic strain in nearby soils, (E), 25:10732
effects of Jorum Event, on surface fractures and faults in Pahute Mesa area, 25:8356 (USGS-474-92)
effects of Milrow Event, on buildings, ground surfaces, and water surfaces, (E), 25:15805 (NVO-79, pp 20-40)
effects of Milrow Event, on earthquake activity of Amchitka Island region, 25:48676 (CGS-746-120)
effects of Milrow Event, on geology and hydrology of Amchitka Island, Alaska, 24:20879 (USGS-474-71)
effects of Milrow, at Amchitka Island, Alaska, biological and physical, 25:15802 (NVO-79)
effects of Milrow, on Amchitka freshwater plankton ecology, 25:49135
effects of Milrow, on animal and plant ecosystems of Amchitka Island, Alaska, 25:49148
effects of Milrow, on ecology at Amchitka Island, 25:16079 (NVO-79, pp 49-71)
effects of Milrow, on ecology of animals and plants on Amchitka Island, Alaska, 25:37743 (BMI-171-132)
effects of Milrow, on ecology of sea otters at Amchitka Island, Alaska, 25:24071(R) (BMI-171-136)
effects of Milrow, on ground shock and water pressures at Amchitka Island, Alaska, 25:48612
effects of Milrow, on lakes of Amchitka Island, Alaska, biological, chemical, and structural, 25:34767(R) (BMI-171-129)
effects of Milrow, on marine ecology of Amchitka Island, 25:37744(R) (BMI-171-137)
effects of Milrow, on populations of sea urchins in vicinity of Amchitka Island, Alaska, 25:49131
effects of Milrow, on sea otter populations at Amchitka Island, Alaska, 25:49143
effects of Milrow, on seismic activity in Amchitka Island region, 25:57597
effects of Milrow, on soil cover of Amchitka Island, Alaska, 25:48611
effects of Milrow, photogrammetric methods in bioenvironmental surveillance of, 25:49144
effects of Monique, on surrounding granite, studies of mechanical, 25:54820(T) (UCRL-Trans-10543, pp 4-35)
effects of Pliers, on vertical motion of LASL mobile tower at ground zero, (E/T), 24:31521 (HN-20-1037)
effects of Project Benham, on residual strains in nearby underground media, 24:19119
effects of Project Milrow, on earthquakes in Aleutian Islands, 24:19118 (CGS-746-101)
effects of Project Schooner, on tungsten-181 and -185 contents in USSR atmosphere, 25:51635
effects of Project Schooner, on tungsten-181 content in Swedish ground-level atmosphere, 25:51633 (FOA-4-4460)
effects of radiation pulse from, on radiolysis of chloroform, 22:40132
effects of Salmon Event, on damage to nearby water wells, complaints related to, 25:44446 (USGS-474-116)
effects of Salmon Event, on structural damage to nearby water wells, final evaluation of, 25:44447 (USGS-474-127)
effects of salt deposit-contained, on salt properties and cavity size, 25:21227
effects of shock waves from Milrow, on survival of crabs and fish in sea near Amchitka Island, Alaska, 25:49142
effects of, chemical and physical, 21:36189 (UCRL-50276)
effects of, on rock, use of hydrodynamic codes for calculating, 21:10492 (UCRL-14711)
effects of, review of methods for predicting, 25:10745
effects of, summary of, 22:47261
effects on bioenvironment of Amchitka Island, Alaska, safety aspects of possible, 1968 progress report on, 23:26709(R) (BMI-171-116)
effects on cavity formation in oil shale and shale, 23:40872
effects on chemical and mechanical properties of rocks in Sahara Desert, 23:49975 (CEA-R-3762(1))
effects on contamination of ground waters, review of, 24:27270
effects on contamination of hydrologic environment, 24:22772 (SWRHL-82, pp 280-308)
effects on crystal structure of granite, 24:22782
effects on earthquakes and regional seismicity in Nevada, 23:40904
effects on ecology of animals and plants in vicinity of Amchitka Island, MILROY test, 24:12211 (BMI-171-122(Rev.))
effects on ecology of animals at Nevada Test Site, 22:19306
effects on ecology of animals at Nevada Test Site, 22:19306
effects on ecology of plants at Nevada Test Site, 25:37757 (UCLA-12-817)
effects on ecosystems and environment of Amchitka Island, Alaska, organization of research studies on, 25:49129
effects on ecosystems, programs for studies on, 23:45682 (NVO-40(Rev.2), pp 301-11)
effects on elastic properties of surrounding rock, numerical model for simulation of, 24:41480 (CONF-700101-(Vol.1), pp 221-9)
effects on environment of Amchitka, Alaska, simulation studies, 25:16074(R) (BMI-171-118)
effects on environment, review of beneficial, 25:4171
effects on environment, studies of mechanical, physical, and radiation, 25:37510(T) (UCRL-Trans-10517)
effects on environmental radioactivity near Nevada Test Site during July through Dec. 1967, 24:33816 (SWRHL-64-r)
effects on failure of granodiorites from Nevada Test Site, 22:16702
effects on fault displacements and motion in Nevada and Amchitka Island, Alaska, (E), 24:20916
effects on formation of cristobalite and sanidine in granite, 24:22782
effects on fractures in granite, 24:41418 (CEA-R-4014)
effects on gas well head and gas field equipment, 21:4645 (UCRL-14429)
effects on geologic features at Nevada Test Site, 23:21806 (NTS-79)
effects on geologic relief forms, 24:48198 (CEA-R-4036)
effects on geology and tectonics of Sahara Desert batholith, 24:14055
effects on geology of Sahara Desert, fracture zone studies of, 24:22824 (CEA-R-3941)
effects on geology of Sahara desert, review of, 24:41482 (CONF-700101-(Vol.1), pp 240-4)
effects on ground motion, prediction by hydrodynamic law-based computer model, 24:27267
effects on ground water flow and water level, 24:9515
effects on ground water flow, T-WAVE computer program for study of, 24:33780 (UCRL-50830)
effects on home range of pocket mice at Nevada Test Site, 22:33776 (COO-1336-6)
effects on immediate and long-term movements of small mammals, 22:33776 (COO-1336-6)
effects on iodine-131 content of milk and tissues of dairy cows at Nevada Test Site, 25:52012 (PNE-914-F)
effects on mechanical properties and contamination of geologic media, summary of USSR reports on, 24:41492 (CONF-700101-(Vol.1), pp 439-62)
effects on mechanical properties of Hoggar granite, Sahara tests on, 24:41496 (CONF-700101-(Vol.1), pp 505-18)
effects on mechanical properties of stemming materials in emplacement holes, (E), 25:44477 (UCRL-51034)
effects on metamorphism of Nevada Test Site basalt, 24:9503
effects on mineralogical trnsformation and temperature of rocks at Sahara test site, 24:41467 (CEA-R-3990)
effects on mines and wells, inspection program for evaluating, 23:45431 (NVO-40(Rev.2), pp 239-49)
effects on motion of buildings, spectral response method for prediction of, 24:16724
effects on occurrence of distant earthquakes, Sept. 1961 to Dec. 1968, 24:46383
effects on occurrence of earthquakes, 24:46384
effects on occurrence of earthquakes, feasibility studies of, 25:6444
effects on permeability of shock-fractured rocks, (E), 24:16676 (UCRL-50783)
effects on radioactive contamination of copper ores, oil shales, and petroleum, 24:36357(R) (ORNL-TM-3034)
effects on remote structures from granite-contained, mechanical, 24:50485
effects on rocks, study of chemical, 24:41507 (CONF-700101-(Vol.1), pp 850-8)
effects on ruthenium-106 and tritium contamination in copper ores, 23:362 (ORNL-4272, pp 187-91)
effects on seismic activities near test sites, 23:45425 (NVO-40(Rev.2), pp 227-37)
effects on seismic activity at Central Nevada Test Area, (E), 25:44462 (USGS-474-109)
effects on seismic activity in western US, (E), 25:10731
effects on seismic activity near Nevada Test Site from 1950 to 1971, (E), 25:57589 (CGS-746-12)
effects on site geology, numerical methods for parametric studies of, 24:22823 (CEA-CONF-1484)
effects on stress release in fault zones for prevention of earthquakes, 23:49979
effects on stress release in fault zones for prevention of earthquakes, 24:16731
effects on subsurface and surface subsidence crater formation, parametric study of, 24:41545 (CONF-700101-(Vol.2), pp 1428-55)
effects on surrounding media, computational aids for estimating, 25:6447 (UCRL-50929)
effects on surrounding rock medium, (E), 24:50483
effects on the occurrence of secondary earthquakes, 24:9546
effects on water levels in aquifiers and wells, 24:20885
elastic wave radiation from, analytic approximation for energy of, 21:27059
electromagnetic emissions from, stability of new Radio Code for calculating, 22:18998 (LA-3864)
emplacement holes for cratering, feasibility study of using liquids for stemming of, 24:50481 (UCRL-50897)
emplacement of, drilling techniques for subsurface, 21:19783 (NVO-38-9)
emplacement of, properties of Tuf concrete room lining for use in, 23:41762 (NVO-38-18)
energy flow down shock tubes from Marvel, instrumentation for measurement of hydrodynamic, 24:14104
energy stimulation by, feasibility of geothermal, 24:25157
engineering and scientific uses of, review of, 25:54828
engineering applications of, development of technology for, 23:24335 (UCRL-71628)
engineering applications of, lecture notes on civil aspects, 22:199 (TID-23748)
engineering applications of, review of, 23:24334 (UCRL-71489)
engineering applications of, review of, 22:12466(T) (UCRL-Trans-10152)
engineering technology of, Iowa State University course in, 24:27277
engineering technology of, role of universities in research on, 24:27279
engineering technology of, Stanford University course in, 24:27278
engineering technology of, survey of US university courses in, 24:27273
engineering technology of, University of Arizona course in, 24:27275
engineering technology of, University of California (Davis) course in, 24:27276
engineering technology of, University of Michigan graduate engineering course, 24:27274
engineering uses for, review of developments in, 22:45211
engineering uses of, review of, 23:24332 (UCRL-71453)
engineering with contained, for exploitation of fuels and minerals, 24:25156
epicenter location of, teleseismic method for, 23:6234 (FOA-4-4370)
epicenter location using seismic wave propagation in Longshot experiment, travel time bias in, 23:2436
equipment protection from, design of 4 in. aperture ball valve for, 23:35376
equipment protection in, design of 12 in. fast gate valve for, 23:16028
evaluation of deep, for industrial uses, 25:51664 (UCRL-72769(Rev.1))

evaluation of deep, for release of geothermal energy for producing electric power, 25:44467 (PNE-1550)
excavation by, Corps of Engineers studies for development of technology for, 23:2445
excavation by, economics of conventional earthmoving equipment and methods used with, 24:36457 (NCG-TR-12)
excavation by, review of, 24:346
excavation by, review of developments in technology for, 23:2455
excavation by, review of technical problems in, 23:21843 (SC-DC-69-1716)
excavation by, slope analysis for, 25:48687 (UCRL-73256)
excavation of Elat—Dead Sea Canal using, safety and economic aspects of, 24:345
excavation of sea-level Isthmian canal by, computer simulation of optimum detonation schedules for, 24:9541 (HN-20-213)
excavation using, feasibility studies for, 23:24339
explosion clouds from Project Schooner, mass distribution and particle size in, 24:50479 (UCRL-50844)
explosive assemblies for, effects of emplacement environment on design of, 24:41515 (CONF-700101-(Vol.2), pp 938-63)
explosive emplacement for, design of large-diameter casing for, 23:2454
explosive emplacement for, economics of drilling small and intermediate diameter holes for, 23:486 (PNE-3012(Vol.1))
explosive emplacement for, in single, row, and arrays, methods and economics of, 23:33287 (NCG-TR-10)
fallout at long distances from, radioisotope fractionation in, 23:17591
fallout contamination from industrial applications of, data required for development of public health protection guides for, 24:23231 (SWRHL-82, pp 664-70)
fallout contamination from use of, for excavation projects, evaluation of safety studies relating to, 24:23148 (SWRHL-82, pp 652-63)
fallout fractioning in, effect of high temperature on, 21:10495(T) (JPRS-38744)
fallout from Dec. 1966 USSR, radioactivity in Swedish ground air and precipitation in, 22:12441 (FOA-4-4494-28)
fallout from excavation-type, calculation and measurement of preshot and postshot, 21:36188 (UCRL-7804)
fallout from January 15, 1965 Russian, geochemical behavior of, 21:28100
fallout from test, in U. S. during 1952 to 1956, effects of, on radiation dose to thyroids in human children, 22:23510 (UCRL-70787)
fallout from, for excavation of Atlantic—Pacific sea-level canal, 25:23715 (ARLV-351-17)
fallout from, leaching, particle size, and uptake by aquatic animals, 23:41306 (UCRL-50596)
fallout monitoring in northern Sweden from Dec. 18, 1966, Soviet Union, 22:6482 (FOA-4-4296-23)
fallout patterns from, graphic-numerical method for predicting, 24:25153 (NCG-TR-19)
fallout prediction from, meteorological requirements for, 23:21821 (CONF-690406-2)
feasibility for construction of Atlantic-Pacific interoceanic canal, bibliography on, 24:48454 (BMI-171-41)
feasibility for construction of interoceanic canal, human ecology studies in Panama for determining, 24:50797 (BMI-171-39)
feasibility for deep harbor excavation in Australia, survey of, 23:49978
feasibility for excavation of transisthmian sea-level canal, 24:41484 (CONF-700101-(Vol.1), pp 280-93)
feasibility for recovery of petroleum from oil-bearing shales, 24:36450(P)
fission products from low-yield, tunnel decontamination of, 22:25830 (SC-RR-68-110)
fission products from, design of vent gas treatment plant for airborne, 21:30558 (CONF-660904-Vol.1 and 2, pp 496-508)
formation of fractures on Pahute Mesa by, mapping of, 23:13899 (TID-24642)
fracturing of oil shale in Uintah County, Utah using, geohydrological data for feasibility study of, 25:21160 (USGS-3002-1)
gas generation by, in natural materials, equation of state for, 21:19787 (UCRL-14729)
gas pressures in chimneys created by, 22:30436(R) (UCRL-50006-68-1)
gas production by, calculation and measurement of, 23:47665(T) (UCRL-Trans-10372)
gases from Gasbuggy, analysis of, 23:45185
geologic effects of Boxcar event, mapping of, 23:13898 (TID-24618)
geologic effects of Faultless Event, 24:22774 (USGS-474-65)
geologic effects of Pahute Mesa Area, linear fracture data on, 24:16680 (USGS-474-64)
granite displacement by, measurements of Sahara Desert, 24:14107 (CEA-R-3885)
ground motion data from, statistical analysis of seismic peak amplitudes using, 24:20921
ground motion from Benham and Boxcar, comparison of predicted and measured maximum, 24:20923
ground motion from distant, equations for predicting, 25:13129 (AD-713521)
ground motion from Flask event, data processing for observed, 25:46575 (NVO-1163-233)
ground motion from granite-contained, damage to buildings and equipment from, 24:337 (CEA-R-3749)
ground motion from Handley event, data tabulation on peak resultant vector, 25:29242 (NVO-1163-216(Rev.))
ground motion from Milrow Event, measurement of surface and sea-bottom, 25:15804 (NVO-79, pp 9-19)
ground motion from Nevada Test Site, damage to structures in Las Vegas and southern Nevada from, (E), 25:26400 (NVO-99-12)
ground motion from Pahute Mesa and Yucca Flat, amplitude and frequency characteristics of, 24:7535 (NVO-1163-181)
ground motion from Pahute Mesa, Nevada, prediction of psuedo-relative velocity response spectra from measurements of, 24:20919
ground motion from simulated, AFSWC instrumentation for measuring HEST, 22:40478 (AD-668451)
ground motion from simulated, AFSWC instrumentation for measuring HEST, 22:40478 (AD-668451)
ground motion from, at Amchitka Island, method for prediction of, 25:57602 (SC-RR-69-376)
ground motion from, at Pahute Mesa, Nev., equations for predicting velocity response spectra for, 24:341 (NVO-1163-TM-8)
ground motion from, at Pahute Mesa, Nevada Test Site, structural response to close-in vertical,, 24:9542 (HN-20-1028)
ground motion from, computer analysis and simulation of, 23:43422
ground motion from, computer program for analysis of structural response to, 24:31523 (HN-20-1027)
ground motion from, computer program for analysis of structural response to, 24:31524 (HN-20-1030)
ground motion from, computer program for calculation of spherically symmetric, 24:29411 (NVO-1163-TM-11)
ground motion from, computer programs for calculation of, 23:33283 (NVO-99-11)
ground motion from, damage to multistory buildings from, 22:12459 (NVO-99-30)
ground motion from, damage to residential structures from, 23:29036
ground motion from, design of accelerometer for measuring, 23:9636
ground motion from, effects on cracks in Mercury, Nevada structures, 23:26388 (NVO-99-20)
ground motion from, engineering intensity scale for rating of, 24:16723
ground motion from, measurement and prediction of damage to buildings from, 25:44478 (UCRL-51062)
ground motion from, methods for predicting building damage from, 24:41524 (CONF-700101-(Vol.2), pp 1103-17)
ground motion from, methods for prediction of structural response to, 24:27257 (SC-DC-70-4836)
ground motion from, response of highrise buildings in Las Vegas, Nevada to, 24:20922
ground motion from, shock mount systems for protecting recording instruments against damage from, 24:14132 (UCRL-72122)
ground motion from, statistical analysis of pseudo relative velocity response spectra data on, 25:37505 (NVO-1163-TM-24)
ground motion from, structural response to, 23:45424 (NVO-40(Rev.2), pp 173-226)
ground motion from, structural response to close-in horizontal, 24:44149 (HN-20-1039)
ground motion from, summary of 1957 to 1970 data on, 25:26411 (SC-DC-713865)
ground motion predictions for, 23:45423 (NVO-40(Rev.2), pp 99-172)
ground motion predictions for, empirical methods and equations for, 22:37897 (NVO-1163-49(Rev.1))
ground motion predictions for, use of seismic data from Pre-Schooner II for, 21:16032 (UCID-5102)
ground motion velocity from, equipment and methods for recording, 22:10412 (NVO-1163-93)
ground motions from Calabash Event, calculated psuedo-relative velocity spectra from measurements of, 25:26401 (NVO-1163-218)
ground motions from Jorum, 24:39091 (NVO-1163-207)
ground motions from Milrow, comparison of predicted and measured, 24:33813 (NVO-1163-209)
ground motions from Pipkin Event, data summary on, 24:39098 (NVO-1163-210)
ground motions from, design of shock-mounted systems for measurement of, 24:41518 (CONF-700101-(Vol.2), pp 979-93)
ground motions from, development of one- and two-dimensional mathematical models for describing close-in, 23:19874 (NVO-1163-165)
ground motions from, effects on dynamic characteristics of multistory reinforced concrete structures, (E), 23:9670(R) (NVO-99-29)
ground motions from, evaluation of analog computer models for simulating seismograms of, 24:46379 (NVO-1163-217)
ground motions from, proposed engineering intensity scale for rating, 24:335 (JAB-99-73)
ground motions from, response of Universal Guided Column shock mount to, (T), 25:21219 (UCRL-50973)
ground motions from, scaling theory for prediction of, 25:286 (NVO-1163-195)
ground motions generated by, analysis of peak amplitude data for, 24:39099 (NVO-1163-TM-20)
ground shock from, prediction of damage to structures and equipment from, 22:27943 (TID-24483)
ground shock spectra from, effects of earth fault zones on, 23:11678
ground shocks from, source array measurement of, 23:43423
ground velocity data from, amplitude relation between pseudo relative velocity and band-pass filter spectra from statistical analysis of, 22:10418 (NVO-1163-88)
ground water contamination by, methods for monitoring, 22:23185 (HNS-1229-43)
ground water contamination by, plans for research on, 22:21182 (HNS-9)
grout development and placement for, 22:10420 (TID-24191)
hazards from Sterling Event, off-site surveillance program on radiological, 22:30737 (VUF-1036)
hazards to human population of Colombia during excavation of interoceanic canal, 23:31792
hazards to human populations from fallout release during, 25:18989 (ORNL-4584, pp 42-56)
heavy-element production in, debris handling procedures for, 21:6173
hole casings for, testing of ring reinforced steel, 24:14701 (NVO-193-9)
hydrocarbon production using, feasibility studies for, 24:41500 (CONF-700101-(Vol.1), pp 567-76)
impulsive stresses from, computer code for prediction of intense, 21:10490 (UCID-5033)
instrumentation with miniature superconducting cables for, 22:47412
kinetics of large-yield, mathematical model for calculation of, 22:35971
krypton-85 release from, permissible limits for, 22:12463 (UCID-15251)
list of June 1970, 25:57993
mechanical effects of, on explosion media, methods for prediction of, 24:14105(T) (AEC-tr-7120)
mechanical effects of, on geologic media, dimensional analysis for, 24:41543 (CONF-700101-(Vol.2), pp 1386-1405)
medical planning for experimental, off-site, 25:55249
mining cavities in salt domes for, engineering methods for, 23:17635 (HN-20-1020)
monitoring activities following, at Nevada Test Site during 1969, off-site, 25:29506 (SWRHL-97-r)
monitoring close-in during, theoretical analysis of lower limit of detectability and accuracy of remote-area arrays of ionization chambers for, 23:31564 (UCRL-50007-68-3, pp 12-17)
monitoring of, description of facility for, 23:17638 (SC-DC-69-1641)
natural gas and oil production stimulation by, 24:41466 (CEA-R-3968)
natural gas and oil production stimulation using, 24:48200(R) (ORNL-TM-3116)
natural gas and oil production stimulation using, numerical evaluation of efficiency of, 24:41502 (CONF-700101-(Vol.1), pp 649-61)
natural gas and oil production stimulation using, economic and feasibility studies of, 24:27256 (CONF-680334-1)
natural gas and oil production using, feasibility of, 23:40907(T) (JPRS-48338)
natural gas production in Gasbuggy Project, acceptability of site for, 21:24128 (UCID-15132)
natural gas production stimulation by, cost-benefit analysis of commercial, 25:34766 (AECOP-632)
natural gas production stimulation by, economics of, 21:43080 (PNE-3007)
natural gas production stimulation by, flow characteristics of nuclear chimneys for, 23:26395
natural gas production stimulation by, method for decontamination of product from, 25:57605(P)
natural gas production stimulation by, research and development program for, 25:39620 (UCRL-50966)
natural gas production stimulation using multiple, feasibility study of, 25:4173
natural gas production stimulation using, geology of Project Dragon Trail site for, 23:24303 (UCRL-50566)
natural gas production using multiple, feasibility study of, 25:37518
natural gas production using, procedures for conducting Project Gasbuggy experiments for, 22:12464 (UCRL-50334)
neptunium-237 fission cross section measurements in Pommard, 25:17926
neutron cross sections from, semiconductor detectors for measuring, 22:47320 (LA-DC-9709)
neutron cross-section data recording in, using magnetic recording system, 24:15759 (LA-4277)
neutron detection from, recording systems for detectors used for, 23:22040
neutron flux from, methods for determination of, 24:38061 (LA-4095)
neutron shielding of, Monte Carlo study of optimum moderator-to-absorber ratio, 25:38537
nuclear device emplacement for, stress analysis of statically loaded deep-hole casing systems for, 23:16020 (UCRL-50561)
nuclear test ban agreement limitations on, 21:32287
off-site surveillance report for Faultless Event January 1968, pre- and post-event, 23:31726 (SWRHL-51-r)
oil recovery from oil shales using, 22:12468(T) (UCRL-Trans-10200)
oil recovery from oil shales using, 22:30745(P)
oil shale fracturing and retorting by, tritium contamination of oils from, 23:21840(R) (ORNL-TM-2502)
operational safety during industrial applications of, role of AEC in setting regulations for, 24:23232 (SWRHL-82, pp 713-20)
ore processing using, 24:48200(R) (ORNL-TM-3116)
overburden stripping from deeply buried ore deposits using row charges of, feasibility study of, 24:41513 (CONF-700101-(Vol.2), pp 918-30)
p-wave velocity measurements from, in mantle below 700 km, 21:41054
particle motions from, in alluvium, 21:205 (UCID-15008)
particle velocities from, development of close-in velocimeters for determining, 21:338 (AD-631496)
peaceful uses of contained, USSR program on, 25:54821(T) (UCRL-Trans-10543, pp 36-41)
peaceful uses of, French program on, 25:54819(T) (UCRL-Trans-10543, pp 1-3)
peaceful uses of, USSR program on, 24:33823
performance in ore fracturing, 25:41918
petrographic effects of, on Hoggar granites, 24:41544 (CONF-700101-(Vol.2), pp 1406-27)
petroleum recovery from deep oil shales using, US Bureau of Mines research on, 24:41540 (CONF-700101-(Vol.2), pp 1364-75)

petroleum recovery using geothermally heated steam in nuclear cavity, feasibility study of high-viscosity, 25: 4174
petroleum recovery using geothermally heated steam in nuclear cavity, feasibility study of high-viscosity, 25: 37521
petroleum storage in cavities from contained, feasibility study of, 24:41538 (CONF-700101-(Vol.2), pp 1322-42)
phenomena of, effects of mechanical and physical properties of NTS zeolitized tuffs on, 21:43050
phenomenology of, description of blast, cratering, and seismic, 23:49974 (CEA-R-3750)
photodiodes used in Nougat, linearity of, 22:21318 (UCRL-50176)
photographs and seismic records of April 26, 1968, at Nevada Test Site, 24:19120
Pin Stripe event, radiation monitoring of environs of, at Nevada Test Site, 23:43750 (SWRHL-41-r)
radiation dose to man from Nevada Test Site, program for documentation of, 22:23511 (UCRL-70788)
radiation dose to man from radioisotopes released by Milrow, marine-transport and specific-activity models for predicting internal, 25:49116(R) (BMI-171-138)
radiation dose to man from, used for excavation, method for calculating, 25:46577 (UCRL-50936(Rev.2))
radiation dose to man in vicinity of, computer method for calculation of, 25:29516 (UCRL-50990)
radiation dose to populations from use of, for construction of sea-level canal, computer code for β and γ, 23:43756 (CTC-8)
radiation effects on materials and assemblies, prompt sample recovery system for determining, 22:30749 (UCID-15307)
radiation hazards from contained, evaluation of, 25: 54823(T) (UCRL-Trans-10543, pp 56-69)
radiation hazards from Milrow Event, evaluation of, 25: 15806 (NVO-79, pp 41-8)
radiation hazards from peaceful uses of, estimates of, 24: 41503 (CONF-700101-(Vol.1), pp 753-74)
radiation hazards from use of, for excavation of interoceanic canal, 24:39453 (BMI-171-33)
radiation hazards from use of, for excavation of transisthmian canal, estimation of, 24:25423 (BMI-171-35)
radiation hazards from, during canal excavation, estimation of, 24:25422 (BMI-171-34)
radiation hazards to human population from industrial, evaluation of off-site safety programs for protection against, 24:23145 (SWRHL-82, pp 478-86)
radiation hazards to human population from Plowshare, method for estimating, 25:39938
radiation hazards to man from industrial, philosophy underlying Federal Radiation Council guides for protection against, 24:23229 (SWRHL-82, pp 498-507)
radiation hazards to man from, method for prediction of, 25:4172
radiation monitoring following venting of Baneberry, December 18, 1970, 25:57993
radiation monitoring from, equipment and methods for off-site, 23:15975 (SWRHL-22-r)
radiation monitoring of Amchitka Island, Alaska, long-range network for, 25:48683 (NVO-1229-160)
radiation monitoring of off-site areas following, in Alaska, Colorado, and Nevada, 25:24133 (SWRHL-98-r)
radiation monitoring of Sterling, off-site, 23:481 (AD-669844)
radiation monitoring of, at Nevada Test Site, programs for offsite, 23:45736 (NVO-40(Rev.2), pp 271-99)
radiation monitoring of, for Vela Sterling Event, 23:8005 (VUF-1038)
radiation monitoring off-site following Milrow Event, 24:39507 (SWRHL-95-r)
radiation monitoring off-site for, activities of Southwestern Radiological Health Lab. for, 23:20221 (SWRHL-38-r)
radiation monitoring system for, environmental, 25: 44586 (SWRHL-501-r)
radio emission calculations for, elimination of flutter in Radio Flash Code for, 23:2440 (LA-4014)
radioactive contamination monitoring in Operation Storax, off-site, 23:4933 (SWRHL-4-r)
radioactive contamination of aquatic environments by excavation-type, 22:10740 (BNWL-480, pp 153-93)
radioactive contamination of environment by, methods for predicting, 24:19093(T) (AEC-tr-7122)
radioactive contamination of terrain following, 22: 8529(T) (JPRS-42929, pp 293-330)
radioactive material release from, air sampler arrays for close-in monitoring of, 22:45357(R) (UCRL-50007-68-1)
radioactive materials released as by-products from industrial applications of, role of AEC in setting regulations for, 24:23232 (SWRHL-82, pp 713-20)
radioactivity distribution in cavity from, thoretical studies of, 25:41954 (CEA-R-4128(1))
radioactivity distribution in lava from cavity of, 25: 41953 (CEA-R-4099)
radioactivity estimates from, used for canal construction, 21:45276
radioactivity from excavation, method for calculating long distance, 25:46577 (UCRL-50936(Rev.2))
radioactivity from, comparison of US and USSR methods for calculating deposition, diffusion, and transport of, 25:54782 (UCRL-51054)
radioactivity from, equipment and procedures for aerial monitoring of atmospheric, 21:10470
radioactivity in Swedish ground-level atmosphere and precipitation from Dec. 18, 1966 USSR, 23:17580
radioactivity induced in rocks by, effects of trace elements on, 22:21187
radioactivity leakage from, at Nevada Test Site, Swedish trajectory calculations for, 25:48681 (FOA-4-4459)
radioactivity predictions for Milrow Event, 24:16700 (ARLV-351-3)
radioactivity release by, methods for monitoring unplanned, 22:497 (UCRL-70608)
radioactivity release from, methods for prediction of, 24: 31526 (UCRL-50230(Rev.1))
radioactivity release to atmosphere from, at Nevada Test Site from 1963 to 1971, 25:48665 (WASH-1183)
radioactivity release to atmosphere from, methods for predicting accidental, 23:45410 (NVO-40(Rev.2), pp 261-70)
radioisotope diffusion in ground water from, method for prediction of, 23:45399 (NVO-40(Rev.2), pp 69-82)
radioisotope distribution and production by, methods for prediction of, 25:10742
radioisotope distributions from, used to fracture copper ores and oil shales, 24:342 (ORNL-4422, pp 272-5)
radioisotope fallout from Plowshare cratering, monitoring system for, 24:39255
radioisotope fallout from, at canal excavation site in Central America, 23:29466 (CONF-690406-10)
radioisotope fallout in Gulf of San Miguel from, effects of biosphere, geosphere, and hydrosphere on specific activity of, 23:29466 (CONF-690406-10)
radioisotope production by contained, mechanisms of, 24:48202(T) (UCRL-Trans-10475)
radioisotope production by Sahara granite-contained, gaseous and solid, 24:50487
radioisotope production by, gaseous, 23:47664 (UCRL-50656)
radioisotope production by, mathematical evaluation of hazards to man from, 24:27558 (BMI-171-30)
radioisotope production by, mechanisms for, 23:21846 (UCRL-71434)
radioisotope production by, methods for calculation of, 24:22838 (SWRHL-82, pp 207-22)
radioisotope production from, used to excavate Isthmian Canal, estimation of, 23:21849
radioisotopes in ground from cratering-type, hydrological uses of, 24:36449(T) (UCRL-Trans-10458)
radioisotopes produced by, diffusion through geologic media of gaseous, 22:35964 (NVO-1229-85)
radiological safety for, off-site planning of, 25:55249
radiological safety in industrial uses of, requirements for, 23:21838 (CONF-690312-1)
radionuclide production by neutrons from, calculation method for, 22:21225 (HNS-1229-54)
radionuclides from, calculation of long-lived, 22:21224 (HNS-22)
Rayleigh wave dispersion and crustal structure studies from Russian, 21:12544
Rayleigh waves from, effects on strength of dikes of, 21: 8487 (N-66-31960)
reports on Amchitka Island, Alaska, list of publicly available, 25:51661 (NVO-103)
rock stresses at Morrow Point underground power plant from, elastic vibration method for calculation of, 22: 25557 (SA-6)
safety hazards from, distributed phased explosion method for reducing blast, radiological and seismic, 24:41547 (CONF-700101-(Vol.2), pp 1474-84)
safety of Amchitka Island, summary of activities for assuring, 24:4397 (TID-25180)
safety of contained and cratering, review of chemical, radiological, and seismic, 25:10743
safety of experimental, review of U.S. procedures for insuring, 23:45429 (NVO-40(Rev.2), pp 9-12)
safety of, effects of site geology and hydrology on, 23: 45397 (NVO-40(Rev.2), pp 51-9)
safety of, hydrologic studies on, 23:45398 (NVO-40(Rev.2), pp 61-7)
safety of, Nevada Operations Office responsibilities for, 23:45427 (NVO-40(Rev.2), pp 1)
safety of, review of Nevada Operations Office activities for assuring radiological and seismic, 24:347
safety of, review of offsite programs for assuring, 23: 45426 (NVO-40(Rev.2))
safety of, summary of activities for assuring, 23:21845 (TID-24996)
sea-level-canal excavation by, studies of, 22:10421
seismic coupling of contained, in granite and salt, 21: 24129 (UCRL-50182)
seismic coupling of, effect of dry porous media on, (E/T) , 21:19786 (UCRL-14464)
seismic damage from, to residential-type structures, method for predicting, 25:21218 (UCRL-50959)
seismic data for Handley Event, equipment and station operation for processing of, 24:39096 (CGS-746-7)
seismic data from, use for studies of internal structure of earth, 24:16725
seismic effects of, 21:1484(T) (AEC-tr-6777)
seismic effects of Benham, at Nevada Test Site, 24:2328
seismic effects of Milrow Event, (E), 25:15807 (NVO-79, pp 72-96)
seismic effects of NTS and CNTA, on Tonopah, Nev. area, 24:33808 (NVO-1163-204)
seismic effects of Sahara Desert, on surrounding granite, 25:10728 (CEA-R-4059)
seismic energies from contained and cratering, comparison of, (E), 24:36443 (PNE-522)
seismic energy efficiency of contained and cratering, equations for calculation of, 24:20920
seismic energy from, diffusion equation for estimating near-range, 23:24328 (NVO-1163-64)
seismic energy from, Fourier analyses of spectral composition of, 24:27255 (UCRL-50763)
seismic energy radiation patterns from, short-period, 21: 36180
seismic hazards of, summary of, 24:41521 (CONF-700101-(Vol.2), pp 1024-50)
seismic magnitude of high-yield, in Aleutian Islands, 24: 36440
seismic motion from contained and excavation, prediction of, 24:41522 (CONF-700101-(Vol.2), pp 1051-68)
seismic response to NTS, characteristics of Nuclear Rocket Development Station area, (E), 25:10730 (NVO-1163-TM-22)
seismic signals from Long shot, propagation of, 21:1477 (AWRE-O-67/66)
seismic signals from, design and performance of analog circuit for synthesis of, 25:291
seismic travel time delays of Longshot, comparison with calculations, 23:6235
seismic velocities from, in rocks, 21:24122
seismic wave amplitude spectra from, performance of high gain long period seismometer for recording, 24: 11716
seismic wave amplitudes from, decay rate of P, 24: 22820
seismic wave coupling of, effect of detonation media on, 21:10486
seismic wave decoupling from, effects of frozen earth materials on, 23:4758 (UCRL-50486)
seismic wave decoupling in Salmon and Sterling Events, (T), 24:9540
seismic wave decoupling theory for Sterling Event, subsurface measurements for, 24:9539
seismic wave generation by, use in calibration of seismograph stations, 23:11680
seismic wave propagation from granite-contained, numerical simulation of close-in, 24:50484
seismic wave propagation from Monique, in Sahara granite, measurement of, 25:54820(T) (UCRL-Trans-10543, pp 4-35)
seismic wave propagation from near-surface row-charge, two-dimensional calculations on, 24:41462 (CONF-700101-(Vol.2), pp 1150-9)
seismic wave propagation from, in crust of eastern Canadian shield, (E), 24:33809
seismic wave propagation from, in heterogeneous media, equations for calculation of, 24:33810
seismic wave propagation from, numerical model for calculating, 25:51654 (NVO-1163-225)
seismic wave spectra for, comparison with earthquakes, 25:288
seismic wave spectra for, comparison with earthquake data, 24:22821
seismic wave travel times from Bilby and Shoal, 22:8236
seismic wave travel times from, in the Soviet Union, 21: 26016
seismic waves from Benham Event, characteristics of small aftershock, (E), 25:37507
seismic waves from Boxcar, effects on ground motion of amplitude and frequency characteristics of P, S, and surface, 24:20918
seismic waves from cavity-detonated, effects of frequency on decoupling of, 22:25558 (VUF-1035)
seismic waves from contained, in rhyolite and tuff, equations for calculating elastic energy of, 25:287 (NVO-1163-208)
seismic waves from French, effects of geological conditions on propagation of, 24:9538
seismic waves from Greeley, travel times of P, 22:37895
seismic waves from Hoggar, measurement and study of compressional, 24:41461 (CONF-700101-(Vol.2), pp 1136-49)
seismic waves from Jorum Event, measurement of early aftershock, 25:32097
seismic waves from large, Gutenberg—Richter scale for determining local intensity of, 24:41460 (CONF-700101-(Vol.2), pp 1118-35)
seismic waves from Logan, effects of wave attenuation on change in direction of, 22:8234
seismic waves from Long Shot Event, at Amchitka Island, 24:2329
seismic waves from Project Gasbuggy, and an earthquake, comparison of travel times for, 25:41952 (AD-838894)
seismic waves from Project Milrow, UKAEA detection and measurement of, 25:285 (AWRE-O-47/70)
seismic waves from Sahara Desert, effects of explosion conditions and surrounding medium on amplitude of, (E/T), 25:10729 (CEA-R-4105)
seismic waves from Sahara Desert, equipment and methods for measuring, 25:6441 (CEA-R-4091)
seismic waves from Sept. 29, 1969 Chinese, in Japan, measurement of amplitude and travel times of, 24: 29392 (NIRS-RSD-25)
seismic waves from small, travel times of s- and p-, 21: 41051(R) (AD-647554)
seismic waves from worldwide, large aperture seismic array studies of multipath propagation of Rayleigh-type, 25:289
seismic waves from, amplification by low-velocity surface layers of, 22:14599 (NVO-1163-130)
seismic waves from, amplitude spectra of, 23:49969 (CEA-R-3767)
seismic waves from, amplitudes and travel times of, (T), 21:28119 (UCRL-50232)
seismic waves from, analog computer method for identification of characteristics of, 24:22802 (NVO-1163-157)
seismic waves from, analysis of surface-foci travel times of, 22:195
seismic waves from, at Nevada Test Site, detection at Flagstaff, Ariz., of, 23:31442
seismic waves from, at teleseismic distances, propagation of, 24:7538
seismic waves from, attenuation and propagation of primary, 23:15987
seismic waves from, calculation of attenuation in upper mantle of longitudinal P, 24:44153
seismic waves from, calculation of tectonic strain energy from surface, 25:46574
seismic waves from, compared with earthquakes, 24: 22804 (USGS-474-58)
seismic waves from, comparison of P-wave spectra of, (E), 25:32098
seismic waves from, damage to masonry structures from, 22:12470
seismic waves from, damage to surface structures from, 23:40906
seismic waves from, determination of earthquake focal mechanisms from polarization angles of S, 25:54814

seismic waves from, dynamic and kinematic characteristics of, 25:6443
seismic waves from, effect of recording site near-surface geology on amplification of, (E/T), 24:36437 (NVO-1163-205(Vol.1))
seismic waves from, effect of recording site near-surface geology on amplification of, (E), 24:36438 (NVO-1163-205(Vol.2))
seismic waves from, effects of recording site near-surface geology on amplification of body-type, (E/T), 25: 21225
seismic waves from, generation and propagation of P, R, and S, 25:57593 (TID-25572)
seismic waves from, in various geologic media, relations between magnitude and yield, (E/T), 24:22819
seismic waves from, Love wave theory for amplification of, (E/T), 22:12457 (NVO-1163-80(Rev.))
seismic waves from, method for calculating propagation of, 25:48677 (NVO-1163-TM-28)
seismic waves from, method for predicting amplitude of surface, 25:288
seismic waves from, model for propagation in heterogeneous media, 24:22803 (NVO-1163-202)
seismic waves from, PcP travel times of, 22:48971
seismic waves from, response of Las Vegas, Nevada to, 24:44150 (NVO-1163-203)
seismic waves from, travel times for, 23:11681
seismic waves from, travel times of, 21:8486
seismic waves from, uphole survey method for measuring source and velocity of, 22:40279
seismic waves from, USAEC research program for prediction of structural response to, 24:27268
seismograms from, design of time-varying filters for generating simulated, 23:16181 (NVO-1163-156)
seismological analysis of, to distinguish between earthquakes and nuclear explosions, 21:198 (AD-631340)
seismological effects of Cannikin Event, at Amchitka Island, Alaska, studies of potential, 25:57590 (COO-2138-4)
shale oil production by, technical and economic aspects of, 21:43079 (PNE-3006)
shear wave generation in Sterling Event, equipment and method for measurement of, 23:11679
shock position versus time near, instrumentation system for measuring, 21:22062 (UCRL-50188)
shock spectra for contained, development of equations for calculation of, 23:21836
shock wave production by, effects of ground motion and gas venting pulse on, 23:2450
shock wave propagation from contained, in enclosed horizontal tunnel, Marvel studies of, 25:4177
shock wave propagation from contained, in enclosed horizontal tunnel, Marvel studies of, 25:37516
shock wave propagation from, dynamics and mathematical analysis of, 24:2330 (CEA-R-3850)
shock waves from free-field particle motions from, 23: 17642 (UCRL-50563)
shock waves from Russian, earth crust model synthesis from, 22:35970
shock waves from Salmon Event, effects on plastic deformation of halite crystals, 23:21835
shock waves from, Cades method for determination of properties of, 23:31441 (CEA-R-3736)
shock waves from, effects on natural remanent magnetism in rocks, 23:29032
shock waves from, method for prediction of damage for populated areas from, 23:9593 (SC-DC-68-2533)
shock waves from, use for determination of thickness of earth's crust, 21:45271
shock-induced phenomena in Nevada Test Site tuffs from, 23:24302 (UCRL-50554)
simulation of, for use in cratering studies, 21:8492(T) (AWRE-Trans-54)
site preparation for, effects of, on ecosystems, 23:45682 (NVO-40(Rev.2), pp 301-11)
site response to, stochastic simulation method for prediction of, 23:9578 (JAB-99-39)
site selection for Milrow Event, history of Amchitka Island, Alaska, 25:15803 (NVO-79, pp 1-8)
sites for, geologic survey of Nye County, Nevada for selection of, 23:15966 (NTS-64)
sites for, well logging methods for measuring properties of underground materials at, 24:11695
strain in earth's surface following Benham, measurement of residual, 24:20910
strain in earth's surface from Benham, measurements of residual and transient, 24:20912
stress gage for determining yield of, description of peak-, 23:2474
stress wave propagation from rock-contained, SOC computer calculations of, 24:50488
stress wave propagation from rock-contained, TENSOR computer program for calculating, 25:34769 (UCRL-50987)
stress wave propagation from, computer program for simulation of, 24:41479 (CONF-700101-(Vol.1), pp 142-220)
stress waves from Hardhat Event, measurement of dynamic, 22:19000 (UCID-15283)
stress waves in earth media from, calculations and measurement of spherical, 23:2449
surface displacement of earth in, estimation of, 21:10497
surface ground motion from, measurement of, 21:36189 (UCRL-50276)
test holes for, material properties of glass-reinforced plastics for large diameter, 21:22107 (NVO-193-02)
testing at Nevada Test Site and in Soviet Union during November 1970, 25:21693
testing at Nevada Test Site and Soviet Union during June 1970, 24:44509
testing at Nevada Test Site during 1967, off-site radiological surveillance activities for, 24:25486 (SWRHL-47-r)
testing at Nevada Test Site during April 1969, 23:35751
testing at Nevada Test Site during August 1969, 24: 2605
testing at Nevada Test Site during December 1968, 23: 31779
testing at Nevada test site during Feb. 1967, 22:28508
testing at Nevada Test Site during February 1969, 24: 2617
testing at Nevada test site during Jan. 1967, 22:28526
testing at Nevada Test Site during January 1969, 24: 2610
testing at Nevada Test Site during June 1968, 23:12097
testing at Nevada Test Site during June 1969, 23:45745
testing at Nevada test site during March 1967, 22:28519
testing at Nevada Test Site during March 1969, 23: 33710
testing at Nevada Test Site during May 1968, 23:12083
testing at Nevada Test Site during May 1969, 23:35738
testing at Nevada Test Site during September 1968, 23: 43780
testing at Nevada Test Site, revegetation following, 25: 49120 (UCLA-12-815, pp 63-97)
testing at Semipalatinsk test area, seismic indications of Soviet, 25:13445
testing by AEC at Nevada Test Site during July 1967, 22:28510
testing in Semipalatinsk region in Soviet Union during May 1969, 23:35738
testing in Soviet Union and USA during April 1971, 25: 46833
testing in Soviet Union during March 1969, 23:33710
testing in Soviet Union during September 1968, 23: 43780
testing of, mechanical properties of fiber strengthened concrete liners for cavities for, 23:16057 (NVO-38-16)
testing on Amchitka Island, bioenvironmental safety studies following Milrow, 24:23130 (BMI-171-126)
tests at Nevada Test Site during 1966, 22:25850
tests at Nevada Test Site during 1966, 22:28502
tests at Nevada Test Site during 1966, 22:23522
tests at Nevada Test Site during 1966, 22:23520
tests at Nevada test site during 1966, 22:23518
tests at Nevada test site during April 1967, 22:28517
tests at Nevada Test Site during May 1967, 22:28514
tests at Nevada Test Site during November 1968, 23: 31777
tests at Nevada Test Site during Sept. 1967, 22:28506
tests by AEC at Nevada Test Site during April 1967, 22:40690
tests by AEC at Nevada Test Site during March 1968, 23:12089
tests by AEC at Nevada Test Site during May 1967, 22: 40697
thermal effects of Salmon experiment, in salt domes, 22: 33580
transactinide element separation from salt following, Coach processes for, 21:39003 (UCRL-14494)
transducer systems in project TEE, radiation effects on, 21:45492 (UCID-15218)
transplutonium element production in, research program on, 21:4646
tritium fallout from, movement through tropical ecosystems of, 24:41491 (CONF-700101-(Vol.1), pp 422-38)
tsunami effects of Milrow Event, (E), 25:15808 (NVO-79, pp 97-106)
tungsten isotope release from, 24:38756
use for blasting, leaching, and open-cast mine techniques, 22:40287
use for canal construction, radiological safety hazards from, 21:45276
use for canal construction, relative biological significance of fallout from, 21:6496 (UCRL-50050-1)
use for canal excavation in north Africa, feasibility study of, 24:41555 (CONF-700101-(Vol.2), pp 1643-60)
use for canal excavation, model for determining mechanisms of fallout radioisotope transport through terrestrial ecosystem following, 24:23144 (SWRHL-82, pp 401-35)
use for chemical mining of primary copper ores, feasibility study of, 24:16729 (UCRL-72159)
use for coal breakage for in situ gasification, 25:48682 (NVO-544-1)
use for constructing Clear Creek site dam, feasibility study of, 24:41529 (CONF-700101-(Vol.2), pp 1184-97)
use for constructing Clear Creek site dam, radiological and seismic safety of, 24:41527 (CONF-700101-(Vol.2), pp 1169-73)
use for construction of interoceanic canal, dose estimation studies, 21:26417 (ORNL-4101)
use for construction of interoceanic canal, effects on marine ecology, 25:6660 (BMI-171-44)
use for construction of interoceanic canal, feasibility studies on, 25:10995 (BMI-171-45)
use for construction of proposed interoceanic canal, dose estimation studies related to, 25:11055 (ORNL-4579)
use for construction of transisthmian canal, radiological hazards from, 23:24338
use for copper ore fracturing, method for ore processing of decontaminated copper following, 25:57523 (ORNL-4677)
use for excavating Torres Strait shipping channel, feasibility study on, 24:41558 (CONF-700101-(Vol.2), pp 1692-1700)
use for excavating transisthmian sea-level canal, feasibility study of, 22:48974
use for excavation of interoceanic canal in Colombia and Panama, bioenvironmental and radiological-safety feasibility studies relating to, 24:14442 (BMI-171-22)
use for excavation of interoceanic canal, prediction of dose to man from, 24:2595 (BMI-171-28)
use for excavation of transisthmian sea-level canal, 23: 49986
use for fracturing copper deposits, 23:26386 (CONF-690312-5)
use for fracturing copper deposits, economics of, 22: 16732 (BM-RI-6996)
use for fracturing subsurface oil shales, 21:19784 (TEI-868)
use for gas and petroleum production stimulation, safety problems in, 24:44157
use for in situ retorting of mine-run oil shales, 23:29034
use for intense pulsed neutron sources, 21:5461 (LA-DC-8148)
use for mining, research at Puerto Rico Nuclear Center, 22:48807(R) (PRNC-121)
use for natural gas production stimulation, beneficial environmental effects from, 25:37519
use for natural gas production stimulation, cost-benefit model for analysis of, 23:487 (PNE-3013)
use for neutron cross section measurements, techniques for, (E), 22:32616
use for oil and gas production, 22:51130
use for producing heavy radioisotopes, Project Plowshare studies of, 24:41534 (CONF-700101-(Vol.2), pp 1269-82)
use for producing neutrons for time-of-flight experiments, cost of, 25:37511
use for producing shale oil, economics of, 22:48973
use for releasing natural tectonic strain, (T), 24:41464
use for stimulation of geothermal heat, 24:41542 (CONF-700101-(Vol.2), pp 1384-5)
use for stimulation of geothermal heat, economic aspects of, 24:41541 (CONF-700101-(Vol.2), pp 1376-83)
use for stimulation of natural gas and oil production by industry, 21:17748(R) (UCRL-50008-67-1)
use for studies of radiation effects on solids, 24:17329 (CONF-690910-, pp 506-15)
use in civil engineering, technical problems in, 23:21847 (UCRL-71439)
use in constructing slide dams, feasibility study of, 24: 41530 (CONF-700101-(Vol.2), pp 1198-1221)
use in construction of earth- and rock-fill dams, use of experimental models to study, 21:28122 (SC-RR-67-24)
use in construction of sea-level canal, 22:42932
use in copper ore mining, 21:17747 (ORNL-TM-1775)
use in copper ore mining, 21:36183(R) (ORNL-TM-1932)
use in copper ore mining, 21:6094 (ORNL-TM-1688)
use in copper ore processing, 21:30560(R) (ORNL-TM-1886)
use in creating natural gas storage cavity, 21:36186 (PNE-1200)
use in development of water resources, 22:8245 (UCRL-70762)
use in improvement of agricultural water supply, 22: 23131 (CONF-680112-1)
use in in-situ leaching method for recovering copper from ores, economics of, 24:41510 (CONF-700101-(Vol.2), pp 864-76)
use in industry, economics and safety of, 23:24332 (UCRL-71453)
use in large civil engineering project, 21:10496
use in large-scale construction projects, US Army Corps of Engineers research on, 23:49984
use in large-scale earth moving projects, 21:36189 (UCRL-50276)
use in measurement of neutron cross sections for radioisotopes, 21:7770 (LA-DC-7864)
use in neutron cross-section measurements for fissionable materials, 24:41533 (CONF-700101-(Vol.2), pp 1253-6)
use in oil recovery from oil shales, 21:17747 (ORNL-TM-1775)
use in petroleum production from oil shale, 22:10422
use in petroleum production from oil shales, 21:204 (SC-RR-65-657)
use in recovery of oil from oil shales, 21:43081(R) (UCRL-50008-67-3)
use in stimulation of natural gas production, 21: 43081(R) (UCRL-50008-67-3)
use in water resource development, 22:42929
use of contained, for petroleum production stimulation, method for, 25:34772(P)
use of heat from contained, for producing hydrogen from organic waste materials, feasibility study of, 25:41955
use of multiple, for natural gas production stimulation, economic evaluation of, 25:6449 (UCRL-72568)
use to construct chimneys for chemical mining of copper and waste disposal, 25:57604 (UCRL-73130)
use to create underground cavities for disposal of radioactive wastes, 22:40286
use to create underground chimneys for gas storage, 21: 4644(R) (UCRL-13242)
uses and dangers from, tectonic, 25:46574
uses and effects of, review of data on, 23:49983
uses for creation of nuclear cavities for storage of natural gas and wastes, feasibility study of, 22:27942 (PNE-3008)
uses for fracturing gas, oil, and mineral deposits, 24:276
uses for fracturing hard rock for ore extraction, economic evaluation of, 24:29409 (BM-RI-7391)
uses for industrial production of natural gas and oils, 22: 4301
uses for large-scale excavation projects in UAR, prospects for, 25:51655 (A/CONF.49/P-144)
uses for natural gas and oil production stimulation, problems resulting from, 25:2382
uses for natural gas and oil production stimulation, 24: 11715
uses for petroleum production stimulation, USSR studies on, 25:54822(T) (UCRL-Trans-10543, pp 42-55)
uses for processing copper ore and oil shale, 23: 26329(R) (ORNL-TM-2567)
uses for recovering geothermal energy, research on, 23: 43427(R) (USGS-289-2)
uses for recovering geothermal energy, research on, 23: 43426(R) (USGS-289-1)
uses for recovery of hydrocarbons from underground cavities, 23:47667(P)
uses for water resource management in Arizona, geohydrologic study of, 24:41528 (CONF-700101-(Vol.2), pp 1174-83)
uses in Australia, feasibility study of peaceful, 22:48975
uses in civil engineering, 25:6450

uses in civil engineering, 1967 Puerto Rican conference on, 22:12461 (PRNC-110)
uses in civil engineering, development of technology for, 24:27266
uses in civil engineering, effects of Limited Test Ban Treaty on, 24:27271
uses in civil engineering, feasibility studies of, 23:17636 (NCG-TR-2)
uses in civil engineering, US Army Corps of Engineers and USAEC research programs on, 24:27264
uses in civil engineering, world-wide research on, 24:33819
uses in excavation and underground nuclear engineering projects, review of, 22:27949
uses in geophysical research, 25:10748
uses in industry, 21:8491(R) (UCRL-50008-66-1)
uses in industry and science, review of, 25:10745
uses in industry in USSR, studies of potential, 25:4169(T) (UCRL-Trans-10477)
uses in industry, review of, 23:38132
uses in industry, review of, 22:42928
uses in industry, review of peaceful, 22:48972
uses in industry, significance of weather prediction capabilities in, 25:13136 (ARLV-351-15)
uses in mineral extraction processes, prospects for, 24:44159
uses in mining and public works, 22:45209 (UCRL-7870)
uses in mining, economic and technical aspects of, 24:46385
uses in mining, review of, 25:10747
uses in natural gas and oil recovery, 22:27945(T) (JPRS-44486)
uses in natural gas production and storage, 22:42927
uses in nuclear physics, 25:20449
uses in petrochemical industry, studies of, 24:50486
uses in petroleum industry, economic and technical aspects of, 25:10746
uses in production of copper and shale oils, 22:23186(R) (ORNL-TM-2198)
uses in scientific experiments by Los Alamos Scientific Laboratory, 24:27280
uses in USSR industry, review of, 24:14106(T) (AEC-tr-7121)
uses in USSR industry, review of, 25:4170
uses in USSR industry, review of projects for, 25:37517
uses in USSR, possible impact on national economy from, 24:41537 (CONF-700101-(Vol.2), pp 1315-21)
uses in water resource development, feasibility study of, 22:27942 (PNE-3008)
uses in water resource development, studies of, 24:27265
uses in water resource management, 24:41526 (CONF-700101-(Vol.2), pp 1164-8)
uses in water resource management, review of, 24:41525 (CONF-700101-(Vol.2), pp 1160-3)
uses near populated areas, feasibility studies of, 24:41501 (CONF-700101-(Vol.1), pp 629-48)
uses of contained, for creating storage cavities in salt deposits, feasibility study of, (E), 25:54824(T) (UCRL-Trans-10543, pp 70-80)
uses of contained, for production stimulation of petroleum, 25:54826(T) (UCRL-Trans-10543, pp 99-116)
uses of contained, for stopping runaway gas and oil wells, 25:54825(T) (UCRL-Trans-10543, pp 81-98)
uses of subsequent, for recovery of minerals from rubble in underground nuclear craters, 23:47666(P)
uses of, advantages, economics, and safety of, 21:39072 (PNE-3005)
uses of, bibliography on civil, industrial and scientific, 21:4643 (TID-3522(8th Rev.))
uses of, bibliography on civilian, industrial, and scientific, 23:19876 (TID-3522(8th Rev.)(Suppl.1))
uses of, bibliography on peaceful, 23:31443 (CEA-Bib-152)
uses of, contribution of earth sciences to peaceful, 25:10740
uses of, ecological problems in peaceful, 24:41499 (CONF-700101-(Vol.1), pp 560-6)
uses of, evaluation of chemical, 25:2380 (ORNL-4572, pp 196-8)
uses of, evaluation of technical feasibility, safety, and economic viability of peaceful, 25:51656 (A/CONF.49/P-762)
uses of, for recovery of natural resources, 21:10493(R) (UCRL-50008-66-2)
uses of, French studies on peaceful, 24:41482 (CONF-700101-(Vol.1), pp 240-4)
uses of, industrial and scientific, 21:16037
uses of, industrial potential of, 24:22843 (SWRHL-82, pp 671-83)
uses of, research on chemical, 21:45273 (ORNL-4145, pp 234-9)
uses of, review of commercial, 21:207
uses of, review of peaceful, 22:30744
uses of, review of peaceful, 25:48686 (UCRL-73022)
uses of, review on industrial, 21:1484(T) (AEC-tr-6777)
uses of, review on status of, 25:44480 (UCRL-51074)
uses of, Russian studies of industrial, 25:37510(T) (UCRL-Trans-10517)
uses of, safety and economics of peaceful, 25:39619 (CONF-710511-4)
uses of, summary of peaceful, 25:34771
vent gases from, treatment plant for, 21:1483 (VUF-3016)
water wave damage from, used for interoceanic canal excavation, 22:30736 (NVO-99-24)
weather and surface radiation predictions in Sterling Event, 23:461 (VUF-1037)
weather predictions for Milrow Event, 24:16700 (ARLV-351-3)
working fluid in cavities from, thermodynamics of silicon dioxide—steam, 24:41494 (CONF-700101-(Vol.1), pp 481-92)

NUCLEAR EXPLOSIONS, UNDERWATER
bubble formation by simulated, development of equations for representation of nonspherical, 21:41056 (AD-645663)
cavities from offshore, feasibility of crude oil storage in, 24:2336
detection of, teleseismic signal calculations for, 21:22063
effects on accumulation of artificial and natural radioisotopes in organisms and water of Atlantic and Pacific Oceans, 23:24577 (A-AC-82/G/L-1254)
effects on cesium-137 and strontium-90 content of seawater in South Pacific, 23:24581 (A-AC.82/G/L-1254, pp 24-44)
generation and propagation of water waves by, mathematical model for prediction of, 21:16035 (NESCO-S-359)
mockup in KEWB of, 21:34160 (USNRDL-TR-67-45)
radiation damage to ports and ships from, 22:47262
radioisotopes and radiolytic products of seawater from, 21:30445 (USNRDL-TR-67-44)
radionuclides from, computer program for identifying components in mixtures of, 21:27897 (USNRDL-TR-67-46)
shock waves from, linear theory of bottom reflections from, 24:2327 (AD-691248)
use for sea bed mining, feasibility study of, 22:47258 (AERE-R-5500(Vol.2), pp 371-86)
use in sea-bed mining, 21:26012
water waves from, effects of shoreline rise on inundation by, 22:35959 (AD-661452)
water waves from, prediction of propagation and run-up of, 22:35958 (AD-661451)
water waves from, run-up of nonbreaking, 22:10417 (NVO-289-1)

description of spontaneously fissioning, as two-quasiparticle states with large deformations, (T), 22:20644
energy levels of, three- and four-quasiparticle, (E/T), 22:1693
fission of transuranic, spontaneous, 25:36781
fission of, review of experimental data and theory on spontaneous, (E/T), 23:4019
formation in thermal neutron capture, relative probabilities for, (T), 22:42095(T) (ANL-Trans-644)
gamma spectra of short-lived, equipment for measurement in consecutive time intervals, 23:43587
gamma stability of, shape theory for, (T), 22:53251
half lives in millisecond range, fast pulse data storage system for determining, 22:47402 (NYO-3664-10)
half lives of 50 μs to 1 ms, measurement methods, (E), 21:2728
half lives of, measurement by time interval analysis, 22:23369
half lives of, measurement of nanosecond, 21:19260
half-life in 100 nsec to 10 μsec region, equipment and method using 14.7-MeV neutrons from tritium (d,n) reactions for measuring, 25:48982
half-lives of, tables of, 22:48464
lifetime measurements of, Dubna cyclotron facility for nanosecond, 25:45837 (JINR-E13-5796)
lifetime of, bibliographic review of high-speed methods for measuring, 22:36045
lifetime of, description of equipment for measuring, 22:32381
lifetime of, development of time-to-amplitude converter for measuring, 21:8648
lifetime of, produced in (particle, xn) reactions, method for measuring nanosecond, 22:28097
lifetimes for, methods for calculating, (T), 23:13305(R) (COO-1573-48)
lifetimes of metastable states, approximate methods for calculating, (T), 22:53238
lifetimes of, correlation measurement of, 23:49453
lifetimes of, delayed-coincidence method for measurement of, 25:42222
lifetimes of, system for measuring ms and μs, 25:18753
lifetimes of, with oblate deformation, (T), 22:48583 (JAERI-1158, pp 118-19)
magnetic resonance of, detection using angular correlation and Moessbauer techniques, (E/T), 22:46232
magnetic resonance of, detection using γ angular correlations and distributions, (T), 22:46731(R) (COO-1746-8)
neutron reactions (n,p) with A near 45 and 90, cross-section calculations using statistical theory, (T), 22:20677 (UCRL-50359)
production by (d,p) reactions below 15 MeV, (E/T), 21:12024(R) (NYO-2771-19)
production by (d,p) reactions, computer program for calculating cross sections of, 23:13310 (OU-LNS-68-12)
production by (n,2n) reactions at 14.8 MeV, spin distribution parameter for, (E), 22:32539
production by bremsstrahlung scattering, (E), 21:44601 (UCRL-17788)
production by electron and photon inelastic scattering, (E), 21:27593
production by gamma inelastic scattering, review of research on, 24:5402(T) (UCRL-Trans-10392)
production by gamma inelastic scattering, review of, 22:32703
production by inelastic scattering of isomeric indium-116 gamma rays, (E), 21:31821
production by neutron inelastic scattering in reactors, (E/T), 22:7705
production by thermal neutron capture, relative probabilities for, (T), 22:14113
production by thermal neutron capture, relative probabilities for, (T), 22:20666 (FEI-79)
production in neutron-capture reactions, analysis and interpretation of ratios of, (T), 22:32690
production in nuclear reactions, cross-section ratios for, (T), 21:4356
production in nuclear reactions, method for measurement of cross-section ratio for, 25:20312
production in proton fission of uranium-238 at 10 and 12 MeV, (E), 21:34012
production of short-lived, in alpha particle and proton reactions with nuclei, 23:45012
production of spontaneously fissionable, with nanosecond lifetime from boron-11, carbon-12, and oxygen-16 reactions with thorium-232 and uranium-238, (E), 24:26638 (JINR-P7-5018)
production of spontaneously fissioning, (E/T), 23:5887
production of spontaneously fissioning, cross sections for, (E), 25:28306 (CERN-70-30(Vol.1), pp 575-87)
production of spontaneously fissioning, research on, (E/T), 24:52568(R) (TID-25351)
production of, compound-nucleus statistical model calculations of ratio of, (T), 25:23069
production of, design and performance of generator for, 25:34802 (BNL-50249)
production of, selection rules for, (E/T), 22:48573 (JAERI-1158, pp 1-9)
production using electron and photon scattering, (E), 23:23669
production with half-lives of 30 to 3000 μsec, (E), 22:32610
properties of spontaneously fissioning, (E), 22:27198
properties of spontaneously fissioning, in transuranium region, (T), 22:48632
research on short-lived, description of use of Cornell University TRIGA reactor for, 22:33022
search for short-lived, using alpha-particle and proton bombardment of natural elements, (E), 23:23706
search for spontaneously fissioning, using alpha reactions with neptunium-237 and uranium-238, (E), 23:13264(R) (ORO-3785-1)
search for, using proton reactions with erbium and tellurium, (E), 23:1929(R) (COO-1265-67)
search for, with half-lives of 2 to 30 μsec, (E), 23:23707
systematics for K-forbidden transitions, (E/T), 24:16001
systematics for odd-Z N = 127, (E), 23:15439
yield ratios in nuclear reactions, gamma competition in statistical-model calculations of, (T), 21:10096
NUCLEAR MAGNETIC MOMENTS
see also Nuclear Electric Moments
book: Numerical Data and Functional Relationships in Science and Technology, Group I, Vol. 2, Nuclear Radii, 22:32699
calculation for 2^+ and 3^- states of even-even spherical nuclei, using BCS theory, (T), 22:22579 (IPNO/TH-114)
calculation for 2s1d-shell nuclei using projected Hartree-Fock wave functions, 21:38419
calculation for 2s1d-shell nuclei using projection of Hartree—Fock deformed state wave functions, (T), 22:37304
calculation for A = 11 to 35 nuclei using Hartree-Fock wave functions, (T), 21:4209
calculation for A = 36 to 39 sd-shell nuclei using shell model with Tabakin potential, (T), 23:23803
calculation for deformed A = 150 to 190 nuclei, (T), 22:24904
calculation for even nuclei using phenomenological models of collective quadrupole excitations, 21:10086
calculation for excited states from nuclear magnetic susceptibility, 21:17399
calculation for excited states, (T), 22:14091
calculation for light nuclei, using Hartree—Fock method, (T), 22:20766
calculation for light nuclei, using velocity-dependent potentials, (T), 22:22542
calculation for nuclei with closed j—j shells plus or minus one nucleon, (T), 22:1717
calculation for rare-earth nuclei, using pairing + quadrupole model, (T), 22:20692
calculation from hyperfine structure parameters using polarization wave functions, (T), 23:1800
calculation of dipole, for strongly deformed nuclei, (T), 22:1747
calculation of dipole, using nonlocal potentials, (T), 21:34068
calculation of ground-state, using first-order perturbation theory and realistic forces, 21:35532
calculation of Horie—Arima first-order corrections for f/sub 7/2/ nuclei, (T), 22:30048(R) (PUC-937-307)
calculation of magnetic form factors using projected Hartree—Fock wave functions, (T), 23:40138
calculation using effective field equations, (T), 21:44779
calculation using exactly solvable model with parity deformation and pairing interaction, 22:20671 (NP-17228, pp 25-55)
calculation using pairing interaction and pairing-plus-quadrupole model, 25:23086
calculation using projection from Nilsson orbitals, (T), 21:23534(R) (ANL-7246)
calculation using velocity-dependent nucleon—nucleon potentials, (T), 22:11981
calculations for 1p-shell nuclei, using wave functions with effective three-body interactions, (T), 23:15373
calculations for A = 6 to 14 p-shell nuclei using shell model with central and spin-orbit interactions, (T), 23:1806

calculations for deformed even—even nuclei, using rotational model, 23:40105
calculations for even—even 2p1f-shell nuclei, self-consistent, (T), 22:53249
calculations for excited states of even-A nuclei with single closed shell, using shell model with quasiparticle formalism, (T), 22:46828
calculations for highly deformed nuclei using Nilsson model, (T), 23:19324 (CEA-R-3645)
calculations for K = $^1/_2$ states of odd-A deformed nuclei, (T), 23:1931 (JINR-P4-4069)
calculations for nonaxial odd-A nuclei, sum rules for, (T), 23:19327 (ITF-68-58)
calculations for odd—odd nuclei using symmetric-core collective model, (T), 23:15502
calculations for odd-A nuclei with A near 190 using shell and unified models, 22:1624
calculations for odd-A rare earths and actinides, using deformed single-particle potential, 23:17124
calculations for odd-A spherical nuclei, (T), 23:10989
calculations for odd-A spherical nuclei, near magic regions, (T), 22:39708
calculations for osmium isotopes, platinum isotopes, and tungsten isotopes using pairing + quadrupole model with Bohr's collective Hamiltonian, (T), 23:7314
calculations for p/sub 1/2/-shell nuclei, using first-order perturbation theory and tensor forces, 25:34187
calculations for spherical and transition nuclei, survey of theory for, 25:39060 (INP-729)
calculations for, effects of Brueckner correlations in, (T), 23:15516
calculations of dipole, using Wigner supermultiplet approximation, (T), 23:5958
calculations using Hartree-Fock method with mixed-parity one-particle wave functions, (T), 21:4364
calculations using Tamm—Dancoff method in deformed nuclei, (T), 22:46817 (JINR-P4-3934)
charge distributions in nuclei, description using theory of finite Fermi systems, (T), 22:32685
configuration mixing effects in, of mirror nuclei, (T), 24:18458
corrections for nuclei near closed shells, first- and second-order, (T), 22:3755 (PUC-937-169)
corrections for spin-orbit interaction in deformed nuclei, (T), 21:38415
determination of M5 and higher, using electron elastic scattering, 24:52514
dipole interactions in odd-A deformed nuclei, (T), 23:40097
effects on Coulomb energies of isobaric multiplet states, (T), 22:20678
interaction current effects on dipole, (T), 23:11067
magnetic shielding effects in, relativistic treatment of, (T), 21:15632
measurement and theory of, review of, 21:44738 (UCRL-17729)
measurement and theory of, survey of developments in, 22:46832
measurement by atomic-beam techniques, (E/T), 22:15336
measurement for beta-emitting radioisotopes, method for, 23:17107(R) (OU-LNS-68-1)
measurement for excited states using heavy ion recoil techniques, 24:26640 (MIT-2098-601)
measurement for excited states using ion implantation, methods of, (E), 22:46840
measurement for excited states using Moessbauer effect with Coulomb excitation recoil implantation, 22:46269
measurement for excited states using perturbed γ angular correlations, review on, 22:32724
measurement for excited states, using γ-γ angular correlations with magnetic resonance, (T), 22:18315
measurement for excited states, using perturbed γ-γ directional correlations, (T), 22:39711
measurement for free atoms, using orientation by optical pumping, (E), 23:15485
measurement for medium-weight and heavy nuclei using angular correlation methods, dissertation summary on, (E), 22:39660
measurement for millisecond isomeric states, method for, 22:30048(R) (PUC-937-307)
measurement for nuclear excited states using calibration by proton magnetic resonance, 23:7906
measurement for radioisotopes, method for, 22:30048(R) (PUC-937-307)
measurement for short-lived β emitters using nuclear magnetic resonance with recoil polarization, (E), 22:46724
measurement for short-lived excited in states using γ-γ angular correlations in internal magnetic fields of magnetized foils, 22:30116
measurement for short-lived excited states using γ resonance scattering, (T), 22:35384
measurement for short-lived nuclei using atomic-beam techniques, (E), 22:29943
measurement for short-lived states, review of methods of, (E/T), 23:4046 (JINR-E3-4062)
measurement for two-quasiparticle states of deformed nuclei, (E/T), 21:44799
measurement in free atomic ions using optical pumping with charge-exchange collisions, method for, 23:5962
measurement of g-factor for excited states using ion implantation in ferromagnetic materials, review of, (E/T), 22:46839
measurement of g-factors for short-lived excited states, using nuclear precession in magnetic fields of ferromagnetic lattices, (E), 22:37339 (COO-1746-6)
measurement of, for short-lived states, 24:3966
measurement of, method for, (E/T), 22:48573 (JAERI-1158, pp 1-9)
measurement of, review of methods for, (E/T), 22:3746 (BNL-11746)
measurement of, survey of methods for, 22:39681 (BNL-12628)
measurement using atomic-beam magnetic resonance, beam focusing system for, 22:30048(R) (PUC-937-307)
measurement using atomic-beam magnetic-resonance technique, 22:16054 (BMwF-FBK-67-80)
measurement using Coulomb recoil implantation in ferromagnetic foils, (T), 21:38388
measurement using electron elastic scattering, survey of, 23:9007 (TID-24667, pp 93-112)
measurement using electron scattering at 180°, (T), 23:9014 (TID-24667, pp 212-15)
measurement using hyperfine structure effects, 22:18309 (UCRL-17951)
measurement using ion implantation techniques, research program on, (E), 22:32573 (MIT-2098-422, pp 69-94)
measurement using method of perturbed angular correlations with r-f fields, (T), 21:27574(R) (NYO-GEN-72-132)
measurement using Moessbauer effect following Coulomb excitation, (E), 22:7696 (NYO-2028-2, pp 18-23)
measurement using Moessbauer effect, review of, 22:46833
measurement using Moessbauer effect, review of, 23:19252 (KURRI-TR-8, pp 4-23)
measurement using nuclear orientation by optical pumping, (E), 22:18272
measurement using nuclear recoil implantation, (E), 22:27003
measurement using perturbed angular correlation technique with Coulomb excitation and recoil implantation in ferromagnetic lattices, (E), 23:5483
measurement using perturbed angular correlations with digital analysis, 21:17367
measurement using perturbed angular correlations, (T), 21:44803
measurement using perturbed angular correlations, review on, 22:32709
measurement using perturbed β-γ angular correlations in magnetized foils, (E), 22:46802
measurement using perturbed γ angular correlation methods, (T), 23:1932 (KFKI-25/1968)
measurement using pulsed beam technique with resonance of perturbed angular correlation, (E/T), 22:44797
measurement using repolarization of nuclear spins in magnetic fields, (T), 22:7743 (NYO-2028-2, pp 106-20)
measurements for A = 120 to 170 nuclei, 24:43413
measurements for excited states of medium-weight and heavy nuclei, dissertation summary on, (E), 22:39659
measurements for excited states, review of methods for, 23:11065
measurements for short-lived nuclei, methods for, 24:8842
measurements of, magnet for perturbed angular correlation method for, 24:39391
measurements using hyperfine magnetic fields on moving atoms in ferromagnetic materials, 24:24659
measurements using NMR destruction of nuclear orientation, 25:12521 (LYCEN-7034, pp 34-41)
measurements using stroboscopic observation of nuclear Larmor precession, 24:24532
nuclear data tables on, 23:21411
nuclear spin coupling tensor for, orbital contribution to, (T), 25:20517
operator for isovector, quenching in mirror nuclei, (T), 23:47062
regularities in, of mirror nuclei, (T), 24:6971
spin-exchange effects on, (T), 21:4339
spin-orbit corrections to, (T), 21:44780
systematics for isospin doublets of light odd A less than or equal to 39 nuclei, (T), 22:44769
systematics for isospin doublets, (T), 24:20434
systematics for odd-even isotope pairs with I = 3/2, Schmidt correlations for, (E), 22:48493
systematics of, deviations from Schmidt lines in calculations with nonlocal two-body potentials, (T), 22:44795
systematics of, for mirror nuclei, (T), 23:37292 (OU-LNS-69-4)
theory of octupole, for light nuclei, (T), 22:26912
theory of pairing-correlation effects on octupole, 21:30060

radiation effects on, of sulfur-containing amino acids, uv, 22:10720
radiative detection of single-passage, of cobalt-60 in iron, (E), 25:3223
radiative detection of, review, 22:52853 (UCRL-18315)
relationship with incoherent neutron scattering, 24:20002
relaxation by spin—rotational interactions in solids, 21:42170
relaxation effects in radiation chemistry, 23:17484
relaxation of multispin systems in, 22:15561 (INP-508-PL, pp 6-17)
relaxation of protons and deuterons in heterogeneous glass sphere—water system, 24:45363
relaxation studies of chemically-shifted protons, modifications of A-60 spectrometer for, 21:34535
relaxation time measurements in liquids, high-pressure sample cell for, 24:45373
relaxation times in weak magnetic fields with small samples, pulse spectrometer for measurement of, 24:42839
research at Saclay, 23:42514
research on, 22:48149(R) (COO-1488-13)
research on, (E), 23:25426 (EUR-3940-1, pp 159-76)
research on, 1967 summary of French, 23:4460 (NP-17597, pp 7-39)
resolution improvement by Fourier transformation of transient free induction signal following rf pulse, (E), 24:35590
review of research on, in metals, 22:9459
review of, spectroscopy, 22:46282
sensitivity for analysis and determination of pure materials in nuclear research, 21:23828
sensitivity for microsamples, 21:23265
sensitivity of double, study of factors limiting, (E), 23:49007 (COO-1198-663)
spectra at varying temperatures, digital computation of moments from, 22:32015
spectra fine structure lines in, dipolar quenching in, 23:23259
spectra for weak rf fields, theory of triple, 22:20080
spectra from system with two approximately equal spins, 22:34785
spectra in noncubic metals, review of, 24:51861
spectra in rotating solids, review of, 22:32002
spectra in solids, effects of electric-field-gradient inhomogeneity on quadrupolar satellite intensities in, (T), 22:17810
spectra in solids, method using dynamic nuclear polarization for resolution of, 23:5481
spectra line shape for static dipolar interaction, 21:15224
spectra narrowing by rapid rotation of solids, 24:51863
spectra of spin systems with magnetically equivalent nuclei, computer program for analysis of, 24:47334
spectra of, analog computer for calculation of second moments in, 23:17837
spectra of, instruments for obtaining double irradiation, 22:39195
spectra recorder for pressures up to 1000 atm, design of, 23:6328
spectra, analysis of high-resolution, NMR-LAOCN-4A computer program for, 24:18041
spectra, direct method for calculating high-resolution, 23:7061
spectra, dual representation of energy level diagrams for, 22:13564
spectra, polarization of Pake doublets in, 21:41807
spectral broadening in, corrections to, (T), 22:17729
spectral line shape and width in Overhauser effect, (T), 22:39183
spectral line shape in solids of saturated, modulation and cross-relaxation effects in, (E/T), 22:17805
spectral line shapes for triple, in weak rf fields, (T), 22:29589
spectral linewidth in coupled systems, effects of intramolecular dipolar relaxation on, (T), 24:35587
spectrometer design for detection of, whole-body, 22:45279 (LA-3966)
spectrometer for measurement of, crossed-coil probe for, 24:11873
spectrometer for measuring triple resonance, design of, 23:4861
spectrometer for observing, description of variable-frequency transmission line, 21:26313
spectrometer for studying, at 100 MHz, description of Pound—Watkins marginal oscillator-type, 22:33695
spectrometer for studying, design and performance of, 23:45592
spectrometer for, description of whole-body low-frequency, 22:23380
spectrometer for, performance of Du Pont high-resolution superconducting, 22:32017
spectrometer with superconducting solenoid, 310-MHz, 25:12034 (CEA-R-3855)
spectrometers for, design of frequency sweep, field-frequency stabilized, double resonance, 22:28222
spectrometers for, microwave planar triodes in preamplifiers of, 21:6351
spectroscopic techniques for double, developments in, 22:31998
spectroscopy, review of, 22:44223
spectroscopy, review of methods of detection, analysis and applications in, 22:44222
spin decoupling in double, using incoherent radiofrequency fields, (E/T), 21:3679
spin echo in, determination of virtual part of generalized spin-wave diffusion coefficient by, (T), 24:32914 (NP-18254)
spin echoes in alloys, (E/T), 22:1347
spin operator products and use in problems of, traces of, (T), 23:33124 (AERE-R-5958)
spin relaxation in rotating tilted reference frame, 21:13908
spin response to coherent train of 90° rf pulses in, (T), 22:22238
spin—lattice relaxation time in, effects of translational-diffusion mechanism on, (T), 22:24439
spin—lattice relaxation time measurements in, pulse generator for, 24:11875
spin-diffusion effects in double-resonance and rotating-frame relaxation techniques, (T), 25:1338
studies in magnetic materials, (E), 21:43945(R) (COO-1569-15)
studies on, Leningrad Univ., 1965-66, 23:14888
technique for detection of very weak signals, pulse, (E), 21:13861
temperature controller for studies of, design of, 22:13544
temperature measurement of sample, spinning thermistor for, 23:9799
theory of double, computer programs for, 21:33139
theory of periodically pulsed double, 22:24461
theory of radiation detection and double-resonance techniques, 25:56372
theory of single-shot passage in solids in, 22:22241
theory of susceptibility of electron—lattice system, 23:30658
theory of two-quantum resonance in Moessbauer effect, 21:34039
theory of, review of, 22:15572(T) (AD-663931)
time dependence of, in solids in strong radiofrequency fields, (T), 21:23277
use for magnetic field measurements in type-II superconductors, 21:7140
use for measuring polarization of protons, 21:19120
use for study of structure and of molecular motion of solids, 23:10698 (CEA-Bib-127)
use in determining electronic structures and magnetic properties, 21:41292(R) (NP-16972)
use in determining hydrogen in metals, 23:33923
use in measurement and stabilization of magnetic fields of 0.1 G to 20 kG, 21:45277 (BMwF-FBK-67-03)
use in measuring the geomagnetic field, (E), 22:24110 (CEA-R-3121)
use in study of hyperfine interactions in magnetic and metallic solids, 22:9103
use of acoustic, for detection of dynamically oriented nuclei, (T), 22:26497
use of extremely narrowed, in solids, 22:29548
use of high-resolution, for relaxation studies by line-shape analysis, (T), 23:33136 (UUIP-627)
use of tone-burst generation for pulsed, 23:23267
use to determine purity of organic compounds, 22:46236
use to measure magnetic suceptibility in metal cylinders, 24:45369
use with nuclear orientation to measure spin—lattice relaxation times, 25:22650 (UCRL-18986)
use with recoil polarization for measurement of magnetic moments of short-lived states, (E), 22:46724
uses in industry, 22:31993
uses in well logging, 25:8358(P)
uses of, review of, 23:16900

NUCLEAR MATERIALS MANAGEMENT

conference on safeguard systems for, Karlsruhe, Germany, July 6 to 10, 1970, 25:21286 (STI/PUB-260(Vol.2))
conference on safeguards research and development, Los Alamos, N. Mex., October 27 to 29, 1969, 24:39178 (WASH-1147)
conference on safeguards research and development, Argonne National Lab., Ill., June 26, 1967, 21:47050 (WASH-1076)
conference on safeguards systems for, Karlsruhe, Germany, July 6 to 10, 1970, 25:21285 (STI/PUB-260(Vol.1))
conference on use of passive γ-ray assay in, Germantown, Md, Nov. 19 to 20, 1970, 25:46615 (WASH-1177)
conference on, Chicago, May 13 to 15, 1968, 23:43492 (CONF-680506)
conference on, Gatlinburg, Tenn., May 25 to 27, 1970, 25:32158 (CONF-700541)
control and inspection procedures for plutonium and uranium, IAEA system for, 23:47725 (NP-17955)
control and inspection procedures for, at HAPO, evaluation of IAEA, 21:38736 (HW-81725)
control and inventory at Dow Chemical Co, 22:610 (CONF-661011, pp 146-59)
control at station JWB, manual for, 21:47011 (IN-1116)
control at station JWC, manual for, 22:19086 (IN-1150)
control of sale and distribution in Canada, 23:50575
control of special nuclear materials in, 21:14415
control procedures at Battelle Memorial Institute, 22:608 (CONF-661011, pp 74-9)
control system for, at ORNL, development of integrated, 25:32165 (CONF-700541-, pp 85-100)
control system for, during processing of breeder reactor fuels at ORNL, performance of integrated, 25:34847 (ORNL-4607)
control systems for, in conversion plants, standards for, 25:57717
cost factors for IAEA safeguards system, summary of, 23:43225 (BNL-50149, pp 15-18)
cost optimization and effectiveness of, models for, 23:50093 (KFK-906)
criticality and safeguards system for, design of computerized, 25:4295

criticality control and inventory at Fast Flux Test Facility, data acquisition system for, 24:31639 (BNWL-SA-2686)
criticality studies for fabrication and shipping, 21:1542 (NAA-SR-Memo-5975)
curriculum for study of, description of Purdue University, 24:423
data at West Valley Processing Plant from, 24:38990 (DOCKET-50201-40)
data evaluation methods in, at radiochemical processing plant, 24:38988 (BNWL-1473)
detection and analysis of shipper—receiver differences for, 24:440
developments in, IAEA research contracts for, 24:4192 (STI/DOC-10/74)
economic and political factors affecting, 24:447
economic and strategic aspects of, introduction to, 25:39686
economics at fuel reprocessing plants, 25:21082 (KFK-1107)
effects of power reactor fuel cycles on, 25:41446
efficiency in fuel fabrication plants, 21:36799 (BNWL-458)
equipment and method for Atucha power reactor, development of, 24:48238 (KFK-804)
equipment and methods for fuel rods and fabrication waste, nondestructive, 25:55004(R) (WCAP-7562-4)
equipment and methods for, developments in tamper-resistant unattended safeguards, 24:39177(R) (SC-DC-70-4947)
equipment for, design and performance of personnel monitoring, 25:46610 (CONF-710617-16)
equipment for, performance of packaging seals as safeguarding, 24:445
fissile material balance in reprocessing plants, methods for, 23:21776 (KFK-802)
fissionable material assay for, by nondestructive methods using californium-252 neutron source, 25:39464
fissionable materials assay for, accelerator neutron sources for, 25:39466
fissionable materials assay for, by photonuclear reactions, 25:39467
fissionable materials assay for, delayed-neutron multiplication in far-subcritical samples for, (E/T), 24:2434
fissionable materials assay using slowing down spectrometer, 24:48037 (BNL-50232)
fissionable materials determination for, development of techniques for, 23:2178 (LA-DC-10034)
fuel analysis for, nondestructive methods of, 22:18705
fuel burnup determination, methods development for, 21:4413(R) (GEAP-5174)
fuel charge sampling for, in fluoride volatility process, 23:49910
fuel cycle costs for alternate cycle options, 24:11129
fuel element analysis for, statistical analysis of gamma scanning data on, 25:48797 (CONF-710617-34)
fuel labeling for, 24:41644(P)
fuel materials nondestructive assay in, delayed neutron kinetic response methods for, 23:24101 (LA-DC-9758)
fuel rod enrichment determination for, using gamma spectrometry, 25:46609 (BNWL-SA-3827)
fuel services for light water reactors, survey of, 24:7621
hijacking threats assessment in, 24:39182 (WASH-1147, pp 25-6)
information system for, description and uses of USAEC, 25:37559 (A/CONF.49/P-101)
inspection errors in, human factors approach to, 21:23800 (SC-R-67-1044)
inspection of US reactor fuel processing plants by IAEA team, 23:43496 (CONF-680506-, pp 29-33)
inspection procedures in Japan for power reactors, review of IAEA safeguard, 25:1846
instrumentation for, unattended tamper-resistant, 24:39187 (WASH-1147, pp 50-7)
inventories for, standards for conducting, 25:57715
inventory control, management information, and record-keeping systems for, economic aspects of, 24:430
inventory methods at Cadarache radiochemical processing plant, review on, 25:51762 (CEA-CONF-1786)
inventory verification procedures for, 22:47073 (CONF-680506-2)
ISOCHECK code for, 21:46865 (WASH-1076, pp 73-81)
laboratory for, development of mobile, 24:18901(R) (LA-4320)
legal aspects in Netherlands of, review of, 24:20583
legal aspects of, predictions on role of government and industry in, 24:434
material balance accounting for, in plutonium processing and scrap recovery, 24:44224 (BNWL-1399)
material balance accounting systems for, in fuel conversion and fabrication, 24:44223 (BNWL-1336)
material balance simulator for, description of computer program for, 24:36535 (BNWL-1357)
materials balance establishment in facility for, 24:39171 (KFK-908)
materials balance methods for plutonium, instrument testing for, 25:4297
measurement errors in, statistical analysis of, 24:449
measurements and statistical controls in private industry, 24:39180 (WASH-1147, pp 7-15)
measurements for, 24:39200 (WASH-1147, pp 167-8)
measurements using electron LINAC for, nondestructive, 24:39196 (WASH-1147, pp 135-43)
method for inventory in commercial power plants, 21:2820 (CEND-541)
method using computer systems, 23:43432 (CONF-680506-, pp 149-64)
method using uranium-235 depletion as cross-check on plutonium content of reactor fuels, 25:4257 (BNWL-SA-3304)
methods and safeguards for, status of US, 24:431
methods at Commonwealth Edison, review on, 23:43493 (CONF-680506-, pp 1-8)
methods at Douglas United Nuclear for, 24:29477 (DUN-1100(Rev.1))
methods at Douglas United Nuclear for, 24:29480 (DUN-M-4(Rev.2))
methods at Karlsruhe Research Center for, nondestructive, 24:39198 (WASH-1147, pp 154-9)
methods at NFS fuel reprocessing plant, 21:40964 (TID-23991(Vol.3))
methods at NFS fuel reprocessing plant, 21:40963 (TID-23991(Vol.2))
methods at Ontario Hydroelectric Power Commission, 24:11134
methods at power reactors, 24:39199 (WASH-1147, pp 164-5)
methods development at BNL, 24:44222 (BNL-50205, pp 16-25)
methods evaluation at West Valley Processing Plant, 24:27184 (BNL-50228)
methods for AGR fuels, 24:11130
methods for criticality and inventory control in, computerized real-time, 25:18620 (BNWL-1440)
methods for determining plutonium content of radioactive waste and exhaust filters, 25:23765(R) (BHO-69-2)
methods for diversion prevention and safeguarding, 24:36534 (ARH-1709)
methods for Eurochemic fuel processing plant, 25:4266
methods for fissionable material safeguarding, research on nondestructive, 25:23755(R) (LA-4605)
methods for fissionable materials determination, review on nondestructive, 24:38758
methods for fuel procurement and supply, 22:51108
methods for fuel reprocessing plant, composite sampling method in input analysis in, 25:21081 (KFK-1104)
methods for HWGCR reactors, implementation of IAEA safeguards, 23:50100
methods for industrial fuel reprocessing plants in Germany, 24:44234
methods for nuclear power plant plutonium production, measurement of electricity generation, 25:23200 (IAEA-R-735-F)
methods for passive assay of plutonium scrap, 25:23764(R) (BHO-66-2)
methods for plutonium and plutonium-bearing fuels, 24:39202 (WASH-1147, pp 173-7)
methods for plutonium fuels, 24:23540(T) (JAPFNR-6)
methods for radiochemical processing plants, 24:16619 (CONF-681219-4)
methods for reactor fuel cycle in Japan, 24:11135
methods for reactor fuel cycle, out-of-pile, 24:11131
methods for representative industrial installations in Belgium, 25:51747 (A/CONF.49/P-286)
methods for titrimetric determination of uranium in scrap, fuel, and product materials, automatic and manual, 24:38712 (NBL-252)
methods for uranium dioxide fabrication, 25:45109
methods for uranium enrichment facilities, 23:17696 (ORO-665)
methods for WAK-type fuel processing plants, 25:4263 (KFK-1102)
methods for WAK-type reprocessing plant, 25:21079 (IAEA-R-712-F)
methods for, computer-controlled, 25:57897
methods for, development of nondestructive, 24:39195 (WASH-1147, pp 110-33)
methods for, review of passive, 24:39194 (WASH-1147, pp 96-108)
methods for, review of US safeguards, 24:39179 (WASH-1147, pp 2-5)
methods in Czechoslovakia for Power Reactors, 24:11124
methods in Dresden Reactor fuel reprocessing for, 23:4717 (SRO-123)
methods in Eurochemic fuel reprocessing plant for, 22:30649 (NP-17368)
methods in fuel fabrication and reprocessing and reactor operation, 24:39181 (WASH-1147, pp 17-20)
methods in fuel reprocessing, 24:39201 (WASH-1147, pp 170-1)
methods in fuel reprocessing plant, 22:51047 (KFK-801)
methods in fuel reprocessing plant, 22:39983 (KR-126, pp 143-52)
methods in fuel reprocessing plant by isotope analysis, 24:9432 (KFK-904)
methods in fuel reprocessing plant, evaluation of MIST for, 24:36359 (WASH-1154)
methods in fuel reprocessing plant, investigations of accountability tank for, 24:13996 (KFK-996)
methods in fuel reprocessing plants, 24:31467
methods in fuel-element processing plant, 21:45213 (WASH-1076, pp 59-64)
methods in motor carrier transport, 24:39185 (WASH-1147, pp 33-8)
methods in NPR fuel reprocessing for, at Nuclear Fuel Services, Inc., West Valley Facility, 24:16626 (SRO-344-4)
methods in radiochemical processing plant for, 24:27185 (BNWL-1384)
methods in transportation, 24:39183 (WASH-1147, pp 28)
methods in transportation, 24:39184 (WASH-1147, pp 30-1)
methods in UK, description of safeguards, 24:39193 (WASH-1147, pp 85-94)
methods in uranium recovery from scrap, 24:33764 (Y-MA-3582)
methods in Yankee Reactor fuel reprocessing for, 23:4718 (SRO-124)
methods of isotopic analysis, using photonuclear reactions, 24:15867 (GA-9614)
methods of optimizing, for efficient use of fuel, 24:11126
methods of surveillance and control in, at Idaho Chemical Processing Plant, 22:2322 (IN-1119)
methods of, development programs for improved, 24:18691
methods of, using active interrogation of fissionable material, 24:29221
methods using calorimetry, 25:32166 (CONF-700541-, pp 101-21)
methods using measurement of neutrons from photoinduced reactions, 24:39197 (WASH-1147, pp 145-52)
neutron interrogation methods for, 24:29216
neutron radiographic method for nuclear materials safeguards in, 23:43474 (CONF-680506-, pp 141-8)
neutron sources for nondestructive assay in, 25:18619 (BNL-50267)
neutron sources for use in nondestructive analysis for, moderator studies for californium-252, 25:48727 (CONF-710402-(Vol.3), pp IV.99-104)
nondestructive assay for, instruments, mobile laboratories, and methods for, 25:37305 (A/CONF.49/P-842)
nondestructive assay techniques development for, use of LINAC for production of photoinduced reactions in, 23:21593(R) (GA-9231)
nondestructive methods for, 23:45225
nuclear safeguards measurements using photonuclear reactions, equipment and methods development for, 25:48879(R) (GULF-RT-10697)
nuclear safeguards measurements using photonuclear reactions, equipment and methods development for, 25:57704 (GULF-RT-A-10826)
nuclear safeguards measurements using photonuclear reactions, equipment and methods development for, 24:31643(R) (GA-10106)
nuclear safeguards measurements using photonuclear reactions, equipment and methods development for, 24:31642(R) (GA-9943)
nuclear safeguards measurements using photonuclear reactions, methods development for, 23:16062(R) (GA-9077)
nuclear safeguards measurements using photonuclear reactions, equipment and methods development for, 24:31641(R) (GA-9871)
procedures for heavy water cooled and moderated pressurized water reactors, 25:23199 (IAEA-R-711-F)
procedures in plutonium recovery from scrap, 23:28939 (ARH-SA-26)
process vessel calibration for, 21:34320 (RFP-858)
program for USA fuels, computer simulation of, 22:25042
program for, in power breeder reactors, 21:12207(P)
protection of nuclear materials in transit, methods for physical, 25:48893 (PB-189506, pp 114-19)
protection of nuclear materials in transit, methods for physical, 25:48892 (PB-189506, pp 107-13)
protection standards in, description of physical, 24:39186 (WASH-1147, pp 40-8)
radioactive waste analysis for, neutron interrogation method for low-level, 25:48802 (CONF-710617-40)
reactivity measurements on fuel elements for, critical assembly facility for, 24:16240 (KFK-1040)
reactor fuel burnup calculation methods, bibliography on, 24:2069 (WASH-1142)
regulation of possession and use of nuclear materials, 22:37634
regulations of IAEA in, 24:9860
regulations on government and private ownership, 22:27422
regulatory program for, operation of USAEC Division of Nuclear Material Safeguards, 24:446
relations with criteria for tender assessment, 24:11128
requirements for USAEC special nuclear materials licensees, 23:43498 (CONF-680506-, pp 43-51)
requirements in power reactors, 21:46866 (WASH-1076, pp 82-6)
research on nuclear safeguards equipment and methods, 25:356(R) (LA-4523)
research on nuclear safeguards equipment and methods, 24:39172(R) (LA-4457)
research progress on, 24:18901(R) (LA-4320)
resonance self-indication technique for nondestructive measurement of thickness of fissile materials for, 23:24405 (LA-DC-9760)
safeguard measures in, verification of reactor burnup and plutonium calculations by reprocessing plant measurements for, 25:48880 (IAEA-R-877-F)
safeguard procedures at Los Alamos Scientific Laboratory, use of californium-252, 23:9680 (LA-DC-10032)
safeguard procedures in the U.S. Atomic Energy Commission, 22:605 (CONF-661011, pp 1-7)
safeguard requirements for nonmilitary, analysis of international, 23:49574
safeguard requirements for nonmilitary, objectives and constraints of international, 23:49575
safeguard requirements for, analysis of international, 23:49576
safeguard system for, destructive methods for determining plutonium and uranium, 25:37269(T) (LA-tr-71-24)
safeguard systems studies for, 24:448
safeguard systems studies for, 21:30655 (BNWL-SA-1307)
safeguard umpires for, qualification of US commercial and foreign laboratories for, 24:16820 (TID-25357)
safeguards and safety specifications for reactor fuels, 24:29479 (DUN-5750)
safeguards control instrumentation for water cooled reactors, design and performance of, 24:47834 (PEL-200)
safeguards control system for reprocessing plant, materials unaccounted for calculations for use in, 25:46611(R) (IAEA-R-902-F)
safeguards dictionary for, 25:46614 (WASH-1173)
safeguards for, analysis of fuel cycle instrumentation and systems, 22:53289
safeguards for, analysis of optimum economic, (T), 24:26790 (KFK-909)
safeguards for, effects of Nonproliferation Treaty on, 25:37566

safeguards for, Euratom system for, 24:14235
safeguards for, history of Argonne Training Program on, 25:48784 (CONF-710617-11)
safeguards for, inventory control problems in, 25:26444 (BNL-15601)
safeguards for, Non-Proliferation Treaty, 24:18576
safeguards for, nondestructive analysis methods for, 25: 4290
safeguards for, radiometric analysis for, 25:4291
safeguards for, relation of non-proliferation treaty to, 25: 19019
safeguards for, review of International Atomic Energy Agency program of, 24:4078
safeguards for, review of U.S. Atomic Energy Commission program of, 24:4079
safeguards for, role of USAEC automated information system in, 24:2424 (WASH-1140, pp 163-96)
safeguards for, second year implementation of USAEC Division of Nuclear Materials Safeguards regulations for, 25:32170 (CONF-700541-, pp 166-76)
safeguards for, shipper's views on in-transit, 24:451
safeguards for, systems analysis in, 25:51757 (A/CONF.49/P-771)
safeguards for, US implementation of IAEA, 25:21299
safeguards for, use of seals as, 23:37847 (BNL-13480)
safeguards implementation by IAEA, 24:9870
safeguards in, mechanism of establishing, 24:9868
safeguards in, summaries of research and development programs for, 23:19924 (WASH-1122)
safeguards inspection procedures for unirradiated MTR-type fuel elements, 22:42393 (RISO-M-732)
safeguards measurements using photonuclear reactions for, equipment and methods development for, 25:355 (GA-10272)
safeguards measurements using photonuclear reactions, equipment and methods development for, 25:21281(R) (GULF-RT-10459)
safeguards measurements using photonuclear reactions, equipment and methods development for, 25:23753(R) (GULF-RT-10511)
safeguards method using control of material flow at strategic points in power reactors, 23:43117 (KFK-803)
safeguards methods for fissionable materials, 24: 29482(R) (LA-4368)
safeguards methods for plutonium and uranium fuel fabrication plants, 23:41564 (KFK-910)
safeguards methods for scrap processing facilities, development of, 25:21283 (IAEA-R-741-F)
safeguards methods for, evaluation of nondestructive, 24:48239 (KFK-1208)
safeguards of IAEA, documents and structure of, 24: 9869
safeguards problems in world fast breeder reactor development, 21:40574 (RM-5148-PR)
safeguards problems in world power reactor development, 21:35584 (P-3589(RAND))
safeguards problems in, of plutonium produced in future power reactors, 25:37565
safeguards procedures for radiochemical processing plant, model for, 21:1415 (BNWL-301(App.))
safeguards procedures for radiochemical processing plants, 21:1414 (BNWL-301)
safeguards procedures for, destructive and nondestructive analysis in, 23:31235 (BNL-13627)
safeguards program for, 22:22925
safeguards prospects for international nonproliferation treaty, 23:6281
safeguards requirements for complete fuel cycle, effects on design criteria for nuclear plants, 25:21312
safeguards research for, use of small accelerators in, 25: 2418 (CONF-700322-, pp 357-78)
safeguards system development for, requirements of fuel cycle analysis method for, 23:24058 (KFK-900)
safeguards system for complete fuel cycle, criteria for maximum efficiency, 25:21310
safeguards system for complete fuel cycle, dynamic mathematical model for studying, 25:21311
safeguards system for non-proliferation treaty, development of IAEA, 25:51756 (A/CONF.49/P-770)
safeguards system for, at Battelle Plutonium Laboratory, development of computerized, 25:32163 (CONF-700541-, pp 56-69)
safeguards system for, at Fernald, Ohio scrap recovery plant, performance of MONAL for, 25:51769 (LA-DC-12296)
safeguards system for, at nuclear power plant with water-cooled and moderated reactor, feasibility study of, 25: 21309
safeguards system for, at nuclear power plants, role of reactor in, 25:54934 (BNWL-1598)
safeguards system for, at Rocky Flats Plant, development of radiometric measuring method for, 25:32164 (CONF-700541-, pp 71-84)
safeguards system for, certified public accountant team review of, 25:48789 (CONF-710617-18)
safeguards system for, design and performance of mobile computerized multi-channel spectrometer equipment for, 25:48779 (CONF-710617-3)
safeguards system for, development of Euratom, 25: 51754 (A/CONF.49/P-725)
safeguards system for, development of international, 24: 18575
safeguards system for, development of tamper-resistant flexible glass fiber optic bundle container seals for, 25: 21328
safeguards system for, development programs at Karlsruhe Research Center for, 24:18692
safeguards system for, during BR-2 fuel cycle, 1969 research program on, 25:37562 (NP-18809, pp 4.1-6)
safeguards system for, during complete ZPPR fuel cycle, USAEC experience with, 25:32160 (CONF-700541-, pp 21-32)
safeguards system for, during fuel fabrication processes, calculated inventory differences method for, 25:48783 (CONF-710617-9)
safeguards system for, during mixed oxide fuel fabrication, calculation of limit of error in, 25:48794 (CONF-710617-29)
safeguards system for, dynamic mathematical model for optimization of, 25:42045
safeguards system for, evaluation of reactivity method for assay for, 24:50537 (BNL-50251)
safeguards system for, feasibility of using electron accelerator for assay for, 24:50536 (BNL-50250)
safeguards system for, future role of public utility companies in developing, 25:32159 (CONF-700541-, pp 5-20)
safeguards system for, in German plutonium fuel fabrication plant, operation and performance of, 25: 21300
safeguards system for, of radioactive waste deposited in Lyons, Kansas salt mine, 25:48778 (CONF-710617-2)
safeguards system for, requirements for international, 24: 18574
safeguards system for, review of EURATOM, 24:18564
safeguards system for, review of IAEA, 24:18572
safeguards system for, review of U.S, 24:18573
safeguards system for, systems study of Japanese, 25: 51760 (A/CONF.49/P-828)
safeguards system for, US implementation of domestic and international, 25:48793 (CONF-710617-28)
safeguards systems analysis for, of fuel cycles, 24:2419 (WASH-1140)
safeguards systems for complete fuel cycle, IAEA computer simulation program for evaluating, 25:21336
safeguards systems for fuel fabrication and reprocessing plants, theoretical studies of accuracy of, 25:21334
safeguards systems for fuel fabrication plant, rapid response diversion detection in, 25:21340
safeguards systems for reactors, thermal output calculation method for use in, 25:21303
safeguards systems for US, development of improved, 25:4270
safeguards systems for, adaptation to Non-Proliferation Treaty of IAEA, 25:4271
safeguards systems for, at BR-2 reactor and plutonium fuel fabrication plant, evaluation of, 25:21304
safeguards systems for, current and future status of, 25: 21341
safeguards systems for, Danish research on, 25:21293
safeguards systems for, deficiencies in current, 25:48795 (CONF-710617-30)
safeguards systems for, description of Brazilian, 25: 51744 (A/CONF.49/P-204)
safeguards systems for, design and performance of transportable linear electron accelerator for, 25:21302
safeguards systems for, design and performance requirements for, 25:39688
safeguards systems for, development of equipment and methods for, 25:37558 (A/CONF.49/P-98)
safeguards systems for, development of IAEA and US, 25:32162 (CONF-700541-, pp 45-55)
safeguards systems for, development of improved, 25: 4272
safeguards systems for, development of nondestructive assay methods for, 25:51768 (LA-DC-12295)
safeguards systems for, development of nondestructive assay methods for use in, 25:39689
safeguards systems for, development of US, 25:21290
safeguards systems for, developments in international, 24:450
safeguards systems for, effects of Non-Proliferation Treaty on IAEA, 25:21291
safeguards systems for, effects of Nonproliferation Treaty safeguards agreement on IAEA, 25:48791 (CONF-710617-21)
safeguards systems for, feasibility testing of radiographic linac for use in, 25:48786 (CONF-710617-13)
safeguards systems for, in Canada, effects of Non-Proliferation Treaty on, 25:21307
safeguards systems for, in fabrication or reprocessing plants, stochastic model for estimating efficiency of, 25:4273
safeguards systems for, in fuel fabrication and reprocessing plants, mathematical model for evaluating efficiency of, 25:51844
safeguards systems for, in Hematite, Mo. plant, description of, 25:48777 (CONF-710617-1)
safeguards systems for, in Hungary, establishment of, 25: 21306
safeguards systems for, in Japanese fuel fabrication plants, development of automated, 25:51746 (A/CONF.49/P-265)
safeguards systems for, in West Germany, development of instrumented assay methods for, 25:51759 (A/CONF.49/P-809)
safeguards systems for, instrumentation requirements for, 25:21313
safeguards systems for, integrated safeguards experiment for evaluation of, 25:32173 (CONF-700541-, pp 255-65)
safeguards systems for, method for evaluating cost and effectiveness of, 24:16816 (KFK-1101)
safeguards systems for, needed improvements in current accounting and measuring methods for, 25:48792 (CONF-710617-23)
safeguards systems for, nuclear process simulation model for evaluating, 25:21335
safeguards systems for, of fuels in commercial nuclear power plants, development of, 25:48781 (CONF-710617-6)
safeguards systems for, political and technical problems in international, 25:48801 (CONF-710617-39)
safeguards systems for, program for evaluating materials balance measuring methods for, 25:6518(R) (GEAP-12114-2)
safeguards systems for, properties of radioisotope neutron sources for use in, 25:51767 (LA-DC-12294)
safeguards systems for, proposed catalog of measuring equipment and methods for, 25:48785 (CONF-710617-12)
safeguards systems for, requirements for effective, 25: 51761 (BNWL-SA-3904)
safeguards systems for, requirements for fuel element identification and control in, 25:21326
safeguards systems for, requirements of, 25:39693
safeguards systems for, review of IAEA and USAEC programs for, 25:48780 (CONF-710617-5)
safeguards systems for, review of LASL research on, 25: 51766(R) (LA-4705)
safeguards systems for, review of Non-Proliferation Treaty requirements for, 25:4269
safeguards systems for, review of qualitative US, 25: 21325
safeguards systems for, role of burnup calculation technology in, 25:54935 (BNWL-1599)
safeguards systems for, study of human factors in, 25: 48787 (CONF-710617-14)
safeguards systems for, system analysis method for evaluating, 25:21330
safeguards systems for, systems analysis method for designing and evaluating, 25:21331
safeguards systems for, systems analysis method for evaluating, 25:21329
safeguards systems for, technical basis for international, 25:51758 (A/CONF.49/P-773)
safeguards systems for, USAEC programs for improved, 25:32169 (CONF-700541-, pp 153-65)
safeguards systems for, use of burnup data in, 25:4274
safeguards systems for, use of instrumental and nondestructive inspection methods in, 25:20938
safeguards systems for, use of isotopic correlations method in, 25:48775 (BNWL-SA-3929)
safeguards systems for, use of slowing-down spectrometers and calorimeters in, 25:39694
safeguards systems for, within nuclear facilities, humanistic and procedural aspects of, 25:48774 (ARH-SA-98)
safeguards techniques for, 25:3649 (KFK-1214)
safeguards, IAEA documentation and structure of, 24: 9869
safeguards, technical aspects of IAEA, 24:9871
safeguards, technical aspects of IAEA, 24:9871
sampling techniques for, geometric programming method for optimization of, 25:31649
shipping research in, 21:3404 (TID-23390)
standards and practices for, for fuel fabricators and reactor operators, 21:15827
standards for controls and safeguards procedures of, guide for preparation of, 22:53462 (TID-24744)
standards for IAEO, 25:3851
standards for, review of Committee activities for, 21: 15824
statistics in, development of uses of, 24:33859 (BNWL-1385)
summary of U. S. activities during 1968, 23:4518
supply agreements in, implementation of, 22:611 (CONF-661011, pp 200-12)
system for international reactor, standards for, 22:37445 (KFK-800)
system for safeguarding fissile material for, development of instrumented, 22:40301
systems analysis for, economics of, 24:41646
systems development in US for, 24:39188 (WASH-1147, pp 61-2)
systems for, analysis of safeguards, 24:39189 (WASH-1147, pp 64-5)
systems for, analysis of safeguards, 24:39192 (WASH-1147, pp 80-3)
systems for, IAEA program for analysis of safeguards, 24:39191 (WASH-1147, pp 70-3)
systems for, theoretical representation of, 24:444
technical requirements for, 21:45627 (WASH-1076, pp 28-34)
techniques for, 21:45628 (WASH-1076, pp 44-50)
techniques for tritium in aqueous wastes of fuel processing, 22:25444 (ANL-7375, pp 180-9)
techniques for, review of U.S. Atomic Energy Commission, 24:4079
training course for, description of, 22:33105
training program in, description of Argonne National Laboratory safeguards, 24:443
umpire qualification program for, 23:8 (IN-1203, pp 62-6)
Umpire Qualification Program for, 24:2095 (IN-1316, pp 69-75)
Umpire Qualification Program for, 25:46540 (IN-1407, pp 185-253)
uranium accounting accuracy for, in Eurochemic fuel reprocessing plant, 23:2377 (NP-17640)
uranium analysis for, delayed gamma analysis following californium-252 neutron interrogation method for, 25: 48798 (CONF-710617-36)
uranium content in solution system for, enriched, 23: 21620 (RFP-1324)
uranium hexafluoride handling procedures and container criteria, 23:4796 (ORO-651(Rev.2))
uranium scrap classification, guide for, 22:25469 (Y-MA-777)
volume determinations for input tanks at Eurochemic Plant for, 23:31404 (NP-17894)
volumetric calibration of process vessels in, use of digital computer for, 21:14414

NUCLEAR MATTER
alpha clustering in, (T), 21:4353
alpha clustering in, analysis of binding energy of nuclei from, 23:45010
alpha-cluster probability in, 21:30041
alpha-particle effective mass in superfluid, (T), 25:3728
alpha-particle model for, (T), 25:3738
analysis of, use of oscillator functions for, (T), 23:47042 (ITF-69-31)
average optical-potential depth from many-body theory, 24:38332
BCS-type phase transition in, with $^3P_2$ pairing, (T), 25: 25819
Bethe—Goldstone equation for, comparison of methods for solving, (T), 23:15522

binding energy and density of, calculations using Thomas-Fermi formalism with density-dependent central forces, (T), 22:44768
binding energy and ground-state wave function of, (T), 21:23534(R) (ANL-7246)
binding energy and magnetic susceptibility of neutron matter, 25:3746
binding energy and saturation density of infinite, calculation using separable nucleon—nucleon potentials, (T), 24:11033
binding energy and saturation density of, calculations using velocity-dependent one-boson-exchange potential, (T), 22:37384
binding energy from three-body correlations in, S-state potential for, 24:30920
binding energy from two-body correlations in, Hamada-Johnston and Reid potentials for, 24:30920
binding energy of an impurity particle in, approximate expression for, (T), 25:15142 (DEMO-70/20)
binding energy of impurity particles in, approximate expression in closed form for, (T), 25:12650
binding energy of neutron, calculations using Brueckner and variational theories, (T), 25:56867
binding energy of, calculation for three-body cluster contribution using self-consistent particle energies, (T), 24:43528
binding energy of, calculation using correlated basis function, (T), 23:44985
binding energy of, calculation using effective density-dependent interactions, (T), 24:15999
binding energy of, calculation using four-body correlations, (T), 22:7749
binding energy of, calculation using four-hole-line Brueckner—Goldstone diagrams, (T), 24:15971
binding energy of, calculation using modified Serber force, (T), 23:40128
binding energy of, calculation using momentum-dependent one-boson exchange potential, (T), 25:15199
binding energy of, calculation using one-boson exchange potential of, (T), 25:28448 (CERN-70-30(Vol.2), pp 1133-5)
binding energy of, calculation using one-boson-exchange potentials, (T), 24:43531
binding energy of, calculation using oscillator wave functions, (T), 23:28320 (ITF-69-4)
binding energy of, calculation using oscillatory wave functions, (T), 23:40125
binding energy of, calculation using perturbation theory with harmonic oscillator matrix elements, (T), 23:49462
binding energy of, calculation using rank-two separable potentials, (T), 24:52713
binding energy of, calculation using Reid, Hamada—Johnston, and Bressel—Kerman—Rouben potentials, (T), 25:46137
binding energy of, calculation using t-matrix with fast convergence, (T), 24:16002
binding energy of, calculation using Thomas-Fermi model with soft-core potential, (T), 24:18453
binding energy of, calculation using three-body forces, (T), 24:5464
binding energy of, calculation using triplet even potentials, 24:49945
binding energy of, calculation using various equivalent potentials, (T), 24:3848
binding energy of, calculations for various potentials, (T), 25:12698
binding energy of, calculations use hole line expansion method, (T), 23:28324
binding energy of, calculations using Brueckner theory with soft-core nucleon-nucleon potentials in momentum space, (T), 22:3786
binding energy of, calculations using Brueckner theory and separation approximation, (T), 24:43118(R) (ANL-7620)
binding energy of, calculations using reaction matrix with separable nucleon-nucleon potentials, 21:31867
binding energy of, calculations with construction of separable potentials from positive-model two-body phase shifts, (T), 23:4063
binding energy of, contribution of higher partial waves to, (T), 24:30946
binding energy of, contribution of three-body forces including correlation effects, (T), 25:46101
binding energy of, contribution of two-pion-exchange three-body force to, 25:7926
binding energy of, contribution of two-pion-exchange three-body force to, (T), 25:36831
binding energy of, corrections to Hartree—Fock calculation of, (T), 23:31085
binding energy of, density dependence of, (T), 22:35398
binding energy of, dependence on high-energy phase shifts, (T), 25:5862
binding energy of, effect of particle energy spectrum on, (T), 25:15187
binding energy of, effect of three-body ΛNN intermediate-range potential, 23:23497
binding energy of, effects of exchange diagrams in calculations including four-body correlations, (T), 23:21382
binding energy of, effects of N_{33}^* isobar on, (T), 25:39076
binding energy of, effects of relativistic unitarity on, (T), 23:45000
binding energy of, effects of tensor forces on nuclear saturation in calculation of, (T), 25:50822
binding energy of, Hartree—Fock calculation using nonlocal potential, (T), 24:15981
binding energy of, Hartree-Fock calculation of symmetry, 24:3957
binding energy of, hole line expansion method for calculations of, (T), 22:53250
binding energy of, linear potential model for calculating, 21:34038
binding energy of, many-body cluster expansion for, 21:30040
binding energy of, methods for calculating, (T), 23:23768
binding energy of, model dependence of, (T), 25:12642
binding energy of, N + N potentials below 350 MeV for, (T), 25:14734
binding energy of, off-shell effects on, (T), 25:28520
binding energy of, quasi-independent quark model for, 23:5594
binding energy of, role of mesons in saturation of, 25:3763
binding energy of, saturation curves for, 21:19322
binding energy of, use in determining effective force operator for random phase approximation, (T), 22:39692 (JINR-P4-3849)
binding energy of, variational calculations of, (T), 22:44644
binding energy of, variational calculations using two-body cluster expansion, (T), 22:27294
binding energy per nucleon in, calculation using momentum-dependent potential, (T), 25:5852
binding energy per particle and saturation density of, calculation using separable potentials, (T), 22:3794
binding energy per particle in, model dependence of, (T), 24:35908
binding energy variation with phase-shift-equivalent two-body potentials, 24:35906
binding-energy calculations for, corrections to second order v/c, (T), 25:3735
book: Introduction to Nuclear Theory, 22:48590
book: Nuclear Matter and Nuclear Reactions, 22:24924
Brueckner many-body theory of, fundamentals of, (T), 25:7893
Brueckner—Bethe—Goldstone formalism for, 25:34161 (LYCEN-6804, pp 153-78)
calculations using Hamada—Johnston potential with exact method for solution of K-matrix equation, 23:23800
calculations with hard-core and long-range potentials, (T), 25:3772
charge distribution in, review of research on, (E/T), 21:46828
charged-particle energy losses in, graphs and tables of, 23:1956
collective excitations in, electromagnetic effects in, (T), 23:42975
compressibility of finite, liquid-drop calculation of, (T), 24:35901
compressibility of, calculation from ion—ion elastic scattering data, (T), 23:4080
compressibility of, calculations using Migdal theory, (T), 23:4077
compressibility of, determination using isotopic shifts of x-ray spectral lines, (E), 21:44755
conference on, Boulder, Colo., 6/68, 24:15226
core polarization in, addition of extra-core nucleon resulting in, (T), 24:28839
density and energy of, effective nucleon—nucleon potentials for Hartree—Fock calculations of, (T), 22:32718
density in A less than or equal to 40 nuclei, self-consistent calculation using soft-core potential, (T), 23:4076
density of, hyperspherical-expansion expression for, (T), 25:31405
density of, integral equation for, (T), 25:7915
density of, inverse relation to shell-model potential, (T), 22:24902
description as Fermi gas model, (T), 24:24670
description as low-density Fermi gas, (T), 22:32687
description of, using superfluid model, 22:1624
description using alpha-particle model, (T), 22:39732
deuteron clustering in, calculations using Hartree—Bogoliubov theory, (T), 23:28332
deuteron elastic scattering by, optical-model formalism for, 21:34049
deuteron scattering by, optical-model potential for, (T), 22:39705
distribution by meson (π) scattering method, (T), 22:48594
distribution from reformulated optical model, (T), 23:37301
distributions from eight-parameter optical model using nucleon-nucleon forces, (T), 22:27362
effective interaction in, density-dependent, 22:27309
electron inelastic scattering by, calculations using perturbation theory with separable potential, (T), 22:35370
energy and defect parameters for dense neutron, calculations using Hamada—Johnston hard-core and Reid and Bressel—Kerman—Rouben soft-core potentials, (T), 25:59866
energy calculations using second-order Goldstone diagrams, methods for, (T), 23:4067
energy gap in, calculation using velocity-dependent nucleon—nucleon potential, (T), 25:10066
energy levels of alpha—nucleon mixture of, cluster-expansion methods for ground-state, (T), 25:5390
energy levels of pure alpha, cluster-expansion methods for ground-state, (T), 25:5390
energy of neutron gas, ground-state, 23:25958
energy of, effects of three-body correlations on, (T), 21:35523
energy per particle in, comparison of Jastrow and reaction-matrix calculations for, (T), 23:32963
energy per particle in, three-body contributions to, (T), 24:22218
energy per particle of neutron, self-consistent calculation using Bressel—Herman—Rouben potential and boundary-condition model of Feshbach and Lomon of, (T), 25:34164
equation of state of, (T), 24:44879
equation of state of, at zero temperature and very high densities, (T), 22:8963
ferromagnetic transition of, in neutron stars, (T), 23:18317
forces in the treatment of, effects of long-range, 21:23569
forces in, theory of two-body effective, (T), 25:59850
four-body correlations in, Day approximation in solution of Bethe—Faddeev equation for, (T), 22:53256
four-body forces from interactions of virtual π mesons, long-range, (T), 22:50695
ground state of, theory for calculation of, 24:16008
ground-state energy of, (T), 25:31405
ground-state energy of, calculation using hole-line expansion, (T), 25:46102
ground-state properties of alpha, analysis using variational method, (T), 25:10070
hole potential energy in, 25:20540
hyperon (Λ) binding energy in, (T), 25:25804
hyperon (Λ) binding energy in, (T), 24:47470 (CONF-690557-(Vol.2), pp 776-80)
hyperon (Λ) binding energy in, (T), 24:47467 (CONF-690557-(Vol.2), pp 521-97)
hyperon (Λ) binding energy in, (T), 21:5569
hyperon (Λ) binding energy in, Brueckner matrix theory for, 25:14745
hyperon (Λ) binding energy in, Brueckner theory calculation of, (T), 24:33025
hyperon (Λ) binding energy in, calculation using ΛN tensor force, (T), 25:12668
hyperon (Λ) binding energy in, cluster-expansion methods for, (T), 25:5390
hyperon (Λ) binding energy in, effect of ΛNN forces in calculations of, 23:13109
hyperon (Λ) binding energy in, effects of short-range repulsion in Λ + N interactions on, (T), 25:20023
hyperon (Λ) binding energy in, Herndon—Tang Λ—N potentials for, (T), 25:1554
hyperon (Λ) binding energy in, independent-pair-approximation method for, (T), 24:42983 (TID-25487)
hyperon (Λ) binding energy in, Λ + N interactions from, (T), 24:47473 (CONF-690557-(Vol.2), pp 826-41)
hyperon (Λ) binding energy in, Λ—N and Λ—N—N potentials for, (T), 24:47468 (CONF-690557-(Vol.2), pp 598-618)
hyperon (Λ) binding energy in, Λ—N potentials for, 23:30762 (CONF-690503-1)
hyperon (Λ) binding energy in, Λ—N potentials for, (T), 24:42981 (INR-P-1191)
hyperon (Λ) binding energy in, ΛN coupling to virtual ΣN channel effects on, (T), 25:43648
hyperon (Λ) binding energy in, phenomenological Λ—N potentials for, (T), 24:47477 (CONF-690557-(Vol.2), pp 912-24)
hyperon (Λ) binding energy in, phenomenological potentials for hyperon-nucleon interactions for, (T), 25:1567
hyperon (Λ) binding energy in, review of ΛNN three-body force effects on, 24:47461 (CONF-690557-(Vol.1), pp 244-75)
hyperon (Λ) binding energy in, second order correction in independent pair calculation of, (T), 24:22201
hyperon (Λ) binding energy in, second-order corrections to, (T), 24:3689 (TID-25249)
hyperon (Λ) binding energy in, self-consistent approximation of Green function for, (T), 25:1565
hyperon (Λ) binding energy in, with noncentral Λ—N forces, (T), 24:40409 (INR-1153)
hyperon (Λ) binding energy in, with tensor Λ + N interactions, 24:15604
hyperon (Λ) decay in, nonmesic, (T), 22:20738
hyperon (Λ) in, nonlinear equation for correlation function between nucleon and, (T), 25:20001 (DEMO-70/19)
hyperon (Λ) interactions in, effective, (T), 23:17103(R) (ANL-7481)
hyperon (Λ) interactions in, potentials for, (T), 22:5809(R) (ANL-7354)
hyperon (Λ) potential well depth in, (T), 23:8815
hyperon (Λ) single-particle-energy spectrum in, independent-pair approximation for, (T), 25:20023
hyperon (Λ) well depth in, phase shift approximation for calculation of, (T), 25:33730 (INR-P-1239)
hyperon (Λ) well depth in, reference-spectrum calculations using hard-core exponential and square-well potentials for, (T), 25:25451 (DEMO-70/24)
hyperon (Λ) well-depth in, (T), 24:13416
hyperon (Λ)-nucleon interactions in, 2π-exchange three-body, (T), 21:38417
hyperons (Λ), binding energy in, single-particle Green function formulation for, (T), 23:4069
level density in superfluid model, 21:25577
many-body problem in, rearrangement energy for, (T), 22:3783
mass distribution beyond charge distribution in, from optical model analysis of neutron elastic scattering, (T), 22:50679
meson (π) absorption in, mean free path for low-energy, (T), 25:36489
meson (π) scattering in, effect of electrical forces in slow, (T), 24:30884
meson motion in infinite medium of, scalar and vector Cherenkov radiation emission from charged, (T), 24:28510
nuclear forces in, long-range, (T), 21:7688(R) (USC-136-114)
nuclear symmetry energy of, equilibrium theory for, 24:1881
nuclear transition temperature of alpha-particle, calculation using hard-core and long-range potentials, (T), 24:15997
nucleon and charge density fluctuations in, analysis using Fermi liquid model, 24:30884
nucleon bound states in, two- and three-body, (T), 22:35398
nucleon correlation energy in, solution of Bethe-Faddeev equations for, (E), 21:19331
nucleon correlation function for, (T), 23:32951 (ITF-69-18)
nucleon correlation function in, 23:49441(T) (BNL-tr-289)

nucleon correlation in, Green function method for four-body, (T), 21:21584
nucleon correlations in, three-body, 21:30023(R) (ANL-7284)
nucleon correlations in, three-body, (T), 21:2787
nucleon density of, determination using fast neutron total cross sections, 23:47069
nucleon effective mass in, (T), 25:12677
nucleon interaction potential for, density-dependent, (T), 21:38377(R) (PUC-937-260)
nucleon interactions in infinite, effective, (T), 25:31416
nucleon interactions in, density-dependent local effective interaction for, (T), 25:39099
nucleon interactions in, empirical model for, (T), 22:3749 (INP-555/PL/PH, pp 137-45)
nucleon interactions in, equivalent potentials and many-body forces in, 21:13906
nucleon interactions in, extension of Jastrow's method for treating, 23:46744
nucleon interactions in, parametrization of nonlocal effective field for, (T), 24:8956
nucleon interactions in, three-body, (T), 21:46832
nucleon magnetic moments in, contribution of pion currents to, 21:27657
nucleon pairing correlations in, calculations using self-consistent model, (T), 22:50693
nucleon reactions in infinite, amplitude of, 24:30930
nucleon reactions with, description using nuclear models, (T), 21:10075 (UCRL-14955)
nucleon scattering in, effect of repulsive core on, (T), 22:39724
nucleon scattering in, effects of tensor forces on, (T), 22:44798
nucleon structure in, model for, 24:52127
nucleon—nucleon interaction in, nonstatic, (T), 22:44793
nucleon—nucleon potentials for, formulation using meson theory, 22:30092
nucleon—nucleon potentials for, soluble nonlocal, (T), 22:30048(R) (PUC-937-307)
nucleon—nucleon potentials in, soft core and velocity-dependent for $^1S_0$, 22:30079
nucleon—nucleon tensor force in, approximation by local central density-dependent potential, (T), 22:35376
nucleon-nucleon interactions for Hartree-Fock calculations on, (T), 21:4336
nucleon-nucleon interactions in, effective spin dependent force for, (T), 24:22234
nucleon-nucleon interactions in, time-retarded, (T), 22:14103
nucleon-nucleon potential for, hard core in, (T), 22:27249
nucleon-nucleon potentials for, long-range, (T), 21:19321
oscillations in, compressional-mode, 24:52658
potential in, imaginary optical-model, (T), 21:19298
properties of ground state of, calculations using A_{11} approximation, (T), 22:27275
properties of infinite, calculation using phenomenological α-α potential, (T), 25:50864
properties of, calculations using Green's functions, (T), 21:2818
properties of, calculations using meson exchange forces, (T), 22:53245
properties of, calculations using reference-spectrum method, (T), 21:23578
properties of, review of Fermi and Landau theories for, (T), 25:7891
quasi-particle interaction in, model space calculation of, (T), 25:28453 (NYO-4032-37)
quasiparticle interaction in, model space calculation of Landau, (T), 25:36832
quasiparticle inverse lifetimes in, calculation using screening interaction, (T), 23:52186
radii of, from reformulated optical model, (T), 22:42113
radii of, measurement using neutron and proton scattering, (T), 23:1929(R) (COO-1265-67)
reaction matrix for, (T), 24:24613
reaction matrix in oscillator representation for, method for calculating Brueckner, (T), 23:13343
reaction matrix theory for, Brueckner, 24:16007
saturation curves for, (T), 21:46830
saturation curves of, 21:19322
saturation density of, (T), 24:24670
saturation properties of, calculations using separable potentials, (T), 23:15504
solidification pressure of, (T), 25:45174
stability conditions for two-component Fermi system, (T), 24:49962
superfluid ground state in, (T), 24:26103
surface energy and thickness of semi-infinite, calculation of, 21:38425
surface energy of semi-infinite, calculation using two-body spin-orbit potentials, (T), 25:12675
surface properties of, calculation of, (T), 24:20466
surface properties of, effects of spin-orbit forces on, (T), 24:20465
surface properties of, with a simple effective interaction, (T), 24:52667
surface tension and surface energy thickness of, (T), 21:7838
symmetry energy of, calculation using Gammel—Thaler phenomenological potential, (T), 22:27251
tensor correlations in, Jastrow calculation using hard-core potentials of, (T), 25:34166
theories of, comparison of Landau, Brueckner—Bethe, and Migdal, 24:38308 (NYO-4032-23)
theories of, review of Brueckner—Bethe, Landau, and Migdal, (T), 25:36843
theory for, lectures on Bruckner, 24:37407
theory of, 21:7829
theory of, 21:30025 (INR-778/VII/PL)
theory of compressibility, rearrangement energy, and symmetry energy, (T), 22:20756
theory of superfluid, using statistical mechanics, (T), 22:5879
theory of, (T), 22:1713
theory of, (T), 22:1722
theory of, alpha clustering in, 21:4353
theory of, application to finite nuclei, (T), 25:10080
theory of, approximations in, (T), 22:22622
theory of, as Fermi gas of quarks, 22:20215
theory of, book on, (T), 25:33819
theory of, compact-cluster expansion for, 21:10090
theory of, density-dependent effective interaction in, 21:21592
theory of, effect and treatment of long-range forces in, 21:23569
theory of, Green's function formalism for, (T), 22:37395
theory of, lectures on, 22:16058 (MATSCIENCE-57)
theory of, lectures on, 23:17128 (MIT-2098-518)
theory of, long-range forces in, (T), 21:7688(R) (USC-136-114)
theory of, method of unitary transformations in, (T), 22:50690
theory of, methods for evaluating Pauli correction and second-order perturbation terms in, (T), 23:15528
theory of, operator algebra for, 21:21604
theory of, reaction-matrix, 21:38403
theory of, recent developments in, (T), 22:16083
theory of, research program on, (T), 23:17103(R) (ANL-7481)
theory of, research progress on, (T), 22:5809(R) (ANL-7354)
theory of, review of, 21:46798
theory of, three-body problem in, (T), 22:1714
theory of, using alpha-particle cluster model, (T), 22:11999
theory of, using density-dependent short-range effective interaction, (T), 22:18328
theory of, using long-range nucleon-nucleon potential, 21:10103
theory of, using one-boson exchange forces, (T), 22:27282
theory of, using three-body cluster expansion, (T), 22:27293
theory of, with alpha clustering, 21:4353
theory of, with soft-core potentials in momentum space, 21:13909
theory of, with strong dynamical correlations, 21:17430
theory using reaction-matrix formalism, three-body correlations in, (T), 22:9972
theory using velocity-dependent nucleon-nucleon potentials from one-boson exchange formalism, (T), 22:20752
three-body correlation effects in, calculations using Martin—Schwinger—Puff Green function formalism of quantum statistical mechanics, (T), 22:53254
three-body correlations in, 21:35523
three-body correlations in, analysis using realistic potentials, (T), 24:47685
three-body forces in, implications of PCAC theory for long-range, (T), 22:42141
three-body forces in, long-term, (T), 22:30048(R) (PUC-937-307)
three-body forces in, meson (eta) exchange contribution to, (T), 23:15511
three-body forces in, π-mesic, (T), 22:44761
three-particle correlations in, (T), 24:49943
transition temperature of, critical, (T), 25:3773
two-nucleon potentials and nuclear saturation in, 25:15188
zero sound in, observation using π^- radiative capture, (T), 22:53224

NUCLEAR MODELS

alpha cluster, analysis using carbon-12—carbon-12 reactions, 24:1879
alpha cluster, for calculation ground-state energies of even—even nuclei, 25:31427
alpha cluster, for intranuclear cascade production in proton reactions with carbon at 660 MeV, 25:25455(T) (ORNL-tr-2452)
alpha cluster, Pauli principle for cluster interactions in, (T), 23:40121
alpha cluster, superfluid phase transition in, (T), 22:11999
alpha clustering, for analysis of binding energy of nuclei, 23:45010
alpha-cluster, α-α interaction in argon-36 and calcium-40, (T), 22:29942
alpha-cluster, calculation of α-α potential from vibrational-state parameters of, (T), 24:1891
alpha-cluster, formalism for A = 19, 20, and 21 nuclei, (T), 22:26972
alpha-cluster, generator—coordinate formalism for collective motion in, (T), 23:1963
alpha-cluster, ground-state energies of light even—even nuclei, (T), 23:31062
alpha-cluster, low-lying O^+ levels of carbon-12, (T), 22:53107
alpha-cluster, molecular structure in rotational bands of light nuclei, (T), 22:53235
alpha-cluster, review of, 23:15505
alpha-deuteron cluster, testing for lithium-6 using lithium-6 (p,2p) reaction, (T), 22:32497
alpha-deuteron cluster, testing for lithium-6 using lithium-6 (p,2p) reaction, (T), 22:26885
alpha-nucleon cluster, for A = 6 isobaric triplet, (T), 22:48466
alpha-particle, binding energies, rms radii, quadrupole moments, excited states, and configuration mixing of 4N nuclei with A = 12 to 28, (T), 25:5855
alpha-particle, binding energy, elastic form factor, and rms radius from, (T), 25:12663
alpha-particle, elastic form factor of oxygen-16 from, (T), 24:40720
alpha-particle, for electron scattering by oriented nuclei, (T), 24:13435
alpha-particle, for nuclear matter, 25:3738
alpha-particle, Hartree—Fock theory for, 23:40132
alpha-particle, reduction of quantum-mechanical Hamiltonian to rigid-body form in, (T), 25:39104
alpha-particle, saturation properties of residual binding energy in, (T), 25:59725
analogy with elementary particle models, (T), 22:20737
anharmonic effects in even-even nuclei of transition regions, (T), 23:1894
asymmetric rotator, testing for even-even nuclei using Coulomb excitation, (E), 22:29985 (ORNL-TM-2121)
asymmetric rotor, effects of nuclear shape and deformation in, (T), 22:27323
asymmetric rotor, for rotational states of deformed even-even nuclei, (T), 22:3707
asymmetric-rotor, blocking effects in, (T), 22:1732
BCS formalism for weakly deformed nuclei, (T), 23:4079
Bethe—Goldstone equation for, comparison of methods for solving, (T), 23:15522
book: Collective Models of the Nucleus, 23:23785
book: Isobaric Nuclei with Mass Number A = 182, 23:8991
book: Nuclear Collective Motion. Models and Theory, 25:20483
book: Nuclear Models. Collective and Single-Particle Phenomena, (T), 25:39115
book: Nuclear Physics. Vol. 1. Nuclear Transformation and Nuclear Shell, 24:1908
book: Nuclear Structure. Volume I, 23:40146
book: Nuclear Theory: The Quasiparticle Method, 23:19363
book: Shell-Model Approach to Nuclear Reactions, 23:40157
book: The Nuclear Independent Particle Model, 23:23792
book: Unified Theory of Nuclear Models and Forces, 21:40515
boson operator formalism for random phase approximation, convergence of Beliaev—Zelevinsky expansion for, (T), 23:5948
boundary condition, nuclear matter properties of, (T), 24:43532
calculations based on generalized cranking, for corrections to nuclear rotation, 24:52673
calculations using harmonic oscillator wave functions, table of central-force geometrical coefficients for two-body matrix elements for, 23:23745 (AD-673524)
calculations with pairing forces, 24:13401
Cargese lectures on, 24:20430
central forces in, Slater integral calculations using reduced angular interaction, (T), 23:9053
centrifugal stretching, formulation for deformed rare-earth nuclei, (T), 23:32933
classification of, lectures on, 22:16058 (MATSCIENCE-57)
close-packed-sphere, theory of, 21:13923
cluster states in bands at high excitation, (T), 23:19392
cluster, analysis using electron inelastic scattering, (E/T), 24:45733
cluster, antisymmetric wavefunctions for, (T), 23:19167
cluster, applications to nuclear fission and structure, (T), 23:25966
cluster, bound states in alpha and deuteron clusters, (T), 22:26859
cluster, calculation of energy and wave functions of levels in 3-alpha-particle, (T), 25:25839
cluster, conference on, 24:45801 (STI/PUB-232)
cluster, description for fission process, (T), 24:45814
cluster, description for light nuclei, 24:45804
cluster, description of, 23:32959
cluster, description of 1p-shell nuclei, (T), 23:30952
cluster, description of nuclear bound states in, 24:11046
cluster, description of nuclear reactions using, (T), 24:11047
cluster, development and testing of, 22:14067(R) (BMwF-FBK-67-81)
cluster, evidence for (t + He-3) clusters in lithium-6, (T), 25:12372
cluster, fission charge distributions in, (T), 21:1145
cluster, for bound states and reactions in light nuclei, (T), 22:26857
cluster, for description of low excited states in even-even nuclei, (T), 24:13422
cluster, for low-lying states of light nuclei, 24:38076 (BMBW-FBK-70-2)
cluster, formulation for light nuclei using group theory, (T), 23:4040 (BMwF-FBK-68-30)
cluster, formulation for light nuclei, (T), 23:9063
cluster, formulation for p-shell nuclei, (T), 23:25964
cluster, formulation using Rayleigh—Schroedinger theory, 24:45802
cluster, generator-coordinate method for, (T), 24:45811
cluster, group theory for, 24:28817 (BMBW-FBK-69-42)
cluster, group theory formalism for, 24:20438
cluster, helium-5 scattering states in, (T), 24:11048
cluster, methods for describing bound states and nuclear reactions, (T), 22:4889 (BMwF-FBK-67-93)
cluster, molecular orbit treatment for, (T), 24:45810
cluster, monopole form factors for description of vertex functions for oxygen-16 by, 24:40716
cluster, nucleon-nucleon spin-orbit potential for light nuclei, (T), 22:1704 (BMwF-FBK-67-69)
cluster, octupole vibrations of fissioning nuclei in, (T), 25:39122
cluster, overlapping of α substructure in carbon-12, (T), 23:40127
cluster, parentage of antisymmetric states in, (T), 24:45824
cluster, perturbation approach to, (T), 24:11052
cluster, phenomenological local charge-independent soft-core N—N potential with central spin-orbit and tensor terms for refined, 24:30532 (BMBW-FBK-70-5)
cluster, quasimolecular structure in self-conjugate 4n nuclei, (T), 23:28323
cluster, recoupling coefficients of symmetric group for, (T), 22:50685
cluster, repulsive core of effective α—α potential for, (T), 23:28327
cluster, research at Tuebingen Univ., 1969-1970, (E/T), 25:41251(R) (BMBW-FBK-71-3)
cluster, research on, 23:32946 (BMwF-FBK-69-9)
cluster, single-particle orbits for light nuclei, (T), 24:8934

cluster, structure effects in (γ,α) reactions, 24:20455
cluster, structure of nuclear surface, (T), 22:20667 (INR-830/1/PL)
cluster, testing for light nuclei using reactions at high energy, (E/T), 22:14116
cluster, theory for deuteron, (T), 23:28332
cluster, theory for heavy nuclei, (T), 22:22628
cluster, theory of finite-range knock-out reactions, (T), 22:20712
cluster, three-problem with non-zero momentum and nonlocal factorizing potential, (T), 22:30085
cluster, treatment of multi-channel reaction theory by refined, 24:45809
cluster, two-body matrix elements in supermultiplet and L—S coupling schemes, (T), 23:9066
cluster, two-cluster configurations in, (T), 24:3971
cluster, unified theory of nuclear reactions and structure, (T), 22:14068 (BMwF-FBK-67-82)
cluster, unitary symmetry scheme for reduced widths of states in, 24:22221
cluster, use of quasi-elastic knockout process to determine properties of, 24:45805
cluster, use of supermultiplet scheme in, (T), 24:45813
cluster, wave function for ground state of lithium-6, (T), 22:18119
cluster, wave functions for lithium-6 in, 21:23425
collective excitations of even—even spherical and nonspherical nuclei, review of theory of, (T), 23:1945
collective motion in many-particle systems, generator-coordinate formalism for, (T), 23:1963
collective, analysis for spherical and deformed nuclei, 24:30949
collective, anharmonic effects of quadrupole forces on two-phonon states of spherical nuclei, (T), 22:35320
collective, anharmonic vibrations in even-even spherical nuclei, (T), 22:48520 (JAERI-1158, pp 90-5)
collective, anharmonic vibrations in spherical even—even nuclei, 23:5953
collective, applicability to even-A nuclei, (T), 23:49442 (IAE-1635)
collective, axial-symmetric deformations in 2⁺ states of even spherical nuclei, (T), 23:21378 (ZFK-130, pp 179-81)
collective, blocking effects in K = 2 and β-vibrational bands, (T), 23:1903
collective, calculation of low-lying states in even—even 1f/sub 7/2/ nuclei, (T), 22:48603
collective, calculation of parameters in Davydov model, (T), 23:28335
collective, calculations for nonaxial odd-A nuclei in adiabatic approximation, (T), 23:19327 (ITF-68-58)
collective, calculations for quadrupole and octupole vibrational excitations in even—even nuclei, 24:24642
collective, calculations for rotational states using canonical transformation, 24:8932
collective, calculations for transitional nuclei, 24:43521
collective, calculations using RPA, (T), 24:18454
collective, centrifugal stretching effect on equilibrium deformation, (T), 22:48581 (JAERI-1158, pp 113-14)
collective, centrifugal stretching of classical rotator, (T), 22:39709
collective, charge oscillations in deformed even—even nuclei, (T), 23:21398
collective, classical analog of variable-moment-of-inertia formulas for rotational energy levels in even—even nuclei, (T), 25:10084
collective, classification of energy levels and interactions in, (T), 25:12631 (JINR-P4-5008)
collective, classification of states and interactions in, (T), 25:25809
collective, comparison of asymmetric shapes for deformed negative-parity states in heavy even nuclei in, 24:30868 (COO-1120-94)
collective, comparison of Peierls-Thouless and Villars methods for, (T), 24:38365
collective, coordinate system for, (T), 23:47051
collective, coordinate transformations useful for describing, 24:43504
collective, coordinates for description of rotational structure, 24:30947
collective, core polarization and effective interaction in collective vibration, (T), 22:27311
collective, coupled-vibration formulation for sd-shell nuclei, (T), 23:21323
collective, coupling between rotational and intrinsic motion in deformed nuclei, (T), 23:21397
collective, coupling of proton and neutron vibrations in, (T), 23:17135
collective, current algebra approach to, 24:11056
collective, decomposition of irreducible representations of R(5) group into irreducible representation of R(3), (T), 22:53234
collective, deformation calculations using surface delta interaction, (T), 22:20743
collective, dependence of potential on deformation parameters in, (T), 24:1897
collective, derivation of formalism for, 24:16006
collective, description of deformed nuclei, 23:31078
collective, description of rotational bands in spherical even—even nuclei using Davydov—Chaban, (T), 23:47058
collective, description of rotational excitations in spherical nuclei using extended random phase approximation, (T), 22:48577 (JAERI-1158, pp 84-9)
collective, description of soft two-dimensional rotator, (T), 23:49456
collective, description of states by Nilsson model for deformed phonons, (T), 23:34817
collective, diagonalization of Hamiltonian for five-dimensional harmonic oscillator, 24:8961
collective, dipole states in deformed even—even rare-earth nuclei, (T), 22:53176
collective, dipole strengths, γ-absorption cross sections, energy levels, and potential-energy surfaces for giant resonance in, (T), 25:10083
collective, E1 energy-level transition probabilities in vibrational bands of deformed nuclei, (T), 22:27324
collective, E2 and M1 transition probabilities for odd-odd spherical nuclei, (T), 22:39707
collective, E2 transition probabilities for rotational bands of even-even nuclei, (T), 23:9002
collective, E2 transition probabilities for rotational bands of A = 150 to 190 nuclei, (T), 22:13993 (IIAE-LR-19)
collective, E2 transitions between rotational states in deformed odd-A nuclei, 22:39706
collective, effect of coupling interactions in, (T), 24:43513
collective, effect of pairing on level-crossing inertia of, 25:46143
collective, effective two-body interaction for, (T), 25:39062 (INR-P-1257)
collective, effects of electromagnetic interactions in, 23:42975
collective, effects of resonances on single-particle potentials, (T), 23:1959
collective, energy levels of d-s shell nuclei, (T), 21:4366
collective, energy levels of deformed odd-A nuclei with A = 153 to 187, (T), 22:20649
collective, equivalence of microscopic theories for, (T), 24:43559
collective, errors in application to even-A nuclei, (T), 23:47075
collective, even-odd staggering in vibrational bands in, (T), 24:49965
collective, excitations in continuum region, 24:24652
collective, formalism for deformed nuclei, (T), 21:21606
collective, formalism for giant resonances, 21:46801
collective, formalism for group-theoretical description of collective states, 21:31855
collective, formalism for moments of inertia of deformed nuclei, (T), 23:9042
collective, formalism for odd-A nuclei using vector coupling of single nucleons to rotational excitations, (T), 22:5873
collective, formalism for pear-shaped nuclei, (T), 23:15526
collective, formalism for spherical nuclei, lectures on, (T), 22:20670 (NP-17228, pp 3-24)
collective, formalism for vibrational states of deformed nuclei using adiabatic and Hartree-Fock approximations, (T), 22:9966
collective, formalism of negative-parity asymmetric-rotor, for deformed even-A nuclei, (T), 21:44763
collective, formalism of pairing plus quadrupole-quadrupole interaction, (E/T), 25:23064 (NYO-2171-335)
collective, formalism using projection operators for discrete and continuum regions, (T), 22:44794
collective, formalism with symmetry-violating states, 21:31861
collective, formulation for deformed nuclei using pairing force, 24:11036
collective, formulation for K = 0 states of even nuclei, 25:17979
collective, formulation for odd—odd deformed nuclei, 25:56812 (COO-1120-124)
collective, formulation using boson expansion techniques, (T), 23:4073
collective, formulation using time-dependent Hartree—Fock method and boson expansion methods, (T), 23:4072
collective, generator coordinate formulation of, (T), 24:20431
collective, generator coordinate formulation of, (T), 24:52714
collective, giant quadrupole resonances in spherical nuclei from extension of dynamic, 24:38344
collective, ground-state shape-fluctuation correlations for model Hamiltonian, (T), 23:7340
collective, hole and negative-parity states in odd-A nuclei in 2s-1d shell in asymmetric-core, 24:30933
collective, inertial moments of deformed nuclei, (T), 23:23793
collective, intrinsic deformations of 0⁺ states, (T), 23:11066
collective, isospin structure of pairing motion in, (T), 24:8955
collective, isospin structure of pairing vibrations, (T), 23:19340 (UCRL-18715)
collective, K = 0⁺ states in deformed nuclei, (T), 22:48580 (JAERI-1158, pp 106-12)
collective, lifetimes of shape isomers with oblate deformation, (T), 22:48583 (JAERI-1158, pp 118-19)
collective, macroscopic self-consistency relation for deformed nuclei, (T), 25:12655
collective, magnetic dipole transition operators for quadrupole excitations in even-even nuclei, 21:2799
collective, magnetic moments of even nuclei in, 21:10086
collective, major shell mixing in deformed p-shell nuclei, (T), 22:20768
collective, matrix elements for generators of R(5) group in arbitrary irreducible representation, (T), 22:53233
collective, matrix elements of quadrupole moment operator and E2 transitions in, (T), 25:12633 (JINR-P4-5346)
collective, methods for including ground-state correlations in random phase approximation calculations for vibrational nuclei, (T), 23:7339
collective, microscopic approach to vibrational and rotational motion in, (T), 23:28349
collective, microscopic aspects of, 23:47049
collective, microscopic description of, (T), 25:20547
collective, microscopic formalism using concept of ideal collective coordinate, (T), 22:42112
collective, molecular aspects of, (T), 22:48579 (JAERI-1158, pp 99-105)

nucleon—nucleon potential for Hartree—Fock calculations in, 23:42959 (ORNL-TM-2556)
nucleon—nucleon potential for, effective, (T), 23:17143
nucleon—nucleon potential for, finite square-well, (T), 23:15525
nucleon—nucleon potentials for, modified Serber, (T), 23:40128
nucleon—nucleon potentials for, realistic, (T), 23:19348
nucleon-nucleon effective force for, in random phase approximation, 24:24666
nucleon-nucleon potentials for, dependence of Brueckner reaction matrix on shape of repulsive core in, (T), 24:22230
nucleon-nucleon potentials for, nonrelativistic, (T), 23:34811
nucleons in j-j coupling in, n — n-2 coefficients of fractional parentage for like, (T), 24:49934 (UCRL-18861)
one-boson exchange, review of, (T), 22:11994
optical potential, for Λ binding energy in excited levels of hyperfragments, 25:17514 (INR-P-1222)
optical, adequacy for alpha-particle and deuteron scattering by nuclei, (T), 22:9933
optical, alpha elastic scattering by A = 6 to 209 nuclei at 104 MeV, (E/T), 23:23665
optical, alpha scattering by medium-weight even-even nuclei at low energy, (E), 22:20551
optical, analysis for neutron elastic scattering using pole representations, (T), 22:32712
optical, analysis of 52-MeV deuteron elastic scattering by Z = 1 to 92 nuclei by, (E), 22:46711 (BMwF-FBK-68-16)
optical, analysis of elastic deuteron scattering by nuclei 26 less than A less than 61 at 11.8 MeV by, (E/T), 24:30728
optical, analysis of elastic scattering of complex nuclei at low energies, (E), 24:1767
optical, analysis of fast neutron elastic scattering using pole representation, (T), 22:32711
optical, analysis of meson (π^-) elastic scattering by carbon at 69.5, 80, and 87.5 MeV by, (T), 22:20496
optical, analysis of neutron and proton scattering at 14.5 MeV using, (E/T), 23:42998
optical, analysis of proton elastic scattering at 30.3 MeV by, 24:38346
optical, analytic solutions for s-state neutrons with Woods—Saxon potentials, 23:9057
optical, angular momentum dependence of the potential for, in heavy-ion elastic scattering, (T), 25:50831
optical, anomalies in deuteron elastic scattering by N = 50 nuclei, (E/T), 22:48501
optical, applications in reaction theory of, 24:28846
optical, automatic search code for analysis of elastic scattering by, 24:40681
optical, average triton parameters from (t,p) angular distributions, (E/T), 23:9055
optical, α-α potential using two-nucleon amplitudes in impulse approximation, (T), 22:26826
optical, barrier penetration for diffuse Woods—Saxon potential with strong interaction, (T), 22:48621
optical, barrier penetration, reflection, absorption, and resonance in, 24:35909
optical, behavior of potential for a broad single-particle resonance, 24:22213
optical, calculation of fast neutron scattering cross sections using, 24:43461 (AAEC/TM-536)
optical, calculation of matrix elements for elastic scattering bremsstrahlung, 24:15989
optical, calculation of nuclear-reaction dynamics in, (T), 25:20528
optical, calculation of nucleon-nucleus potential using Greenlees formula, (T), 25:46120
optical, calculations for forward angular distributions in neutron scattering, 23:40092 (KURRI-TR-12)
optical, calculations for intermediate resonances using k-matrix formalism, (T), 22:46820 (UCSD-10-P-11-75)
optical, calculations of form factor for symmetry potential using microscopic model of isobaric analog resonances, (T), 22:53237
optical, collective contribution to potential for, (T), 25:25816
optical, collective-model formalism with nonspherical optical potential and spherical spin—orbit coupling for fast neutron scattering by uranium-238, 23:5890
optical, collective-model generalization for proton inelastic scattering by medium-weight nuclei, (T), 22:48497
optical, complex angular momentum formalism for elastic scattering, (T), 23:23799
optical, computer application to nuclear scattering, 25:39102
optical, computer code for analysis of elastic scattering, 24:38353
optical, computer program for analysis of elastic scattering, (T), 25:28450 (N-70-42846)
optical, computer program for charged and neutral spin-0 and -1/2 particle elastic and inelastic scattering cross sections in, 24:28816 (AAEC/TM-524)
optical, computer program for determining parameters of, (T), 25:36814 (ANU-P-451)
optical, computer program for differential cross sections and polarizations for spin-0 boson and spin-1/2 fermion elastic scattering by complex nuclei in, 24:28820 (INP-689)
optical, computer program for obtaining average potentials, (T), 23:7281(R) (ORNL-4280)
optical, computer programs for solving Schroedinger equation with nonlocal potentials for continuum and bound states, 23:23753 (MIT-2098-492)
optical, computer search program with spin-orbit terms for spin-1/2 and spin-1 particles, (T), 25:31389 (ANU-P-500)
optical, coupled-channel calculations using potential with isospin coupling for analog resonances, (T), 23:10936(R) (COO-535-591)
optical, criterion for fitting oscillatory data, (T), 22:42097 (IPNO/TH-117)
optical, deformation effects on neutron total cross sections, (E/T), 22:32648
optical, deformed spin-dependent potential for proton inelastic scattering, (T), 23:5850

research at Chalk River Nuclear Laboratories April 1 to June 30, 1970, 25:9970(R) (AECL-3668)
research at Chalk River Nuclear Laboratories, April 1, 1969 to June 30, 1969, 24:1774(R) (AECL-3417)
research at Chalk River, July 1 to Sept. 30, 1968, 23: 10905(R) (AECL-3166)
research at Columbia Univ. Dept. of Chemistry, Sept. 1970—June 1970, 25:48071(R) (CU-1019-80)
research at Commissariat a l'Energie Atomique, 23: 47815(R) (NP-17994)
research at Dacca, July, 1968—June, 1969, 24:36639(R) (AECD/MISC-2)
research at Daresbury Nuclear Physics Lab. in 1968, 23: 30856(R) (NP-17900)
research at Daresbury Nuclear Physics Lab., 1970, 25: 52988(R) (NP-18909)
research at Enrico Fermi Institute Dec. 19, 1969 to Dec. 15, 1970, 25:34070(R) (COO-1167-13)
research at Florida State Univ., August 1, 1970 to July 31, 1971, (E/T), 25:31315(R) (ORO-2434-7)
research at Florida State University from October 1, 1967, to September 30, 1968, 23:37284(R) (AD-684735)
research at Florida State University from October 1, 1967, to September 30, 1968, 23:37284(R) (AD-684735)
research at Greek AEC, 1952 to 1966, 24:23037(R) (NP-18156)
research at Greek AEC, 1967, 24:23038(R) (NP-18159)
research at Grenoble University in 1970, 25:38990(R) (NP-18868)
research at Hahn—Meitner Institute, review of, (E/T), 22:9801(R) (HMI-B-50)
research at Hamburg Univ., 1969, 24:49299(R) (BMBW-FBK-70-9)
research at Harwell 500-kV Cockcroft-Walton accelerator, description of, 25:45859
research at Hebrew Univ. of Jerusalem, 1965-66, 22: 6210(R) (NP-17097)
research at IAEA laboratories, 1967, 24:9696(R) (STI/DOC-10/90)
research at Idaho Nuclear Corporation during period ending June 30, 1970, 25:48072(R) (IN-1407)
research at INS, April 1969—Mar. 1970, 25:14845(R) (NP-18601)
research at Inst. of Nuclear Research, Warsaw, 1969, 25:2497(R) (INR-1180)
research at Inst. of Nuclear Research, Warsaw, 1968, 23:51857(R) (INR-1100)
research at Inst. of Nuclear Sciences, New Zealand, 25: 44727(R) (NP-18802)
research at Inst. of Nuclear Sciences, New Zealand, Jan.-June, 1970, 25:49037(R) (INS-458)
research at Inst. of Nuclear Sciences, New Zealand, July—Dec. 1967, 23:40514(R) (NP-17963)
research at Institut A fuer Physik der Technischen Universitat Braunschweig, in 1967, 23:30963(R) (BMwF-FBK-69-5)
research at Institute of Nuclear Physics of University of Lyon in 1969, 25:25717(R) (LYCEN-7002)
research at Israel AEC, Jan.—Dec. 1967, 22:48806(R) (IA-1168)
research at Istituto Superiore di Sanita, July 1, 1967 to June 30, 1968, 23:30722(R) (ISS-68/39)
research at Juelich Nuclear Research Center, 1967, 23: 40512(R) (NP-17718)
research at Juelich Nuclear Research Center, 1969, 25: 15964(R) (NP-18602)
research at Juelich, 1968, 24:27470(R) (NP-18083)
research at Kansas State Univ. tandem Van de Graaff, 23:3861(R) (COO-1766-10)
research at Kyoto Univ., Jan. 1—June 30, 1965, 23: 34491 (KURRI-TR-22)
research at Kyoto Univ., July 1—Dec. 31, 1965, 23: 34492 (KURRI-TR-25)
research at Lawrence Radiation Laboratory, Nov. 1968 to April 1969, 23:51868(R) (UCRL-18877)
research at Max-Planck-Institut fuer Kernphysik, during 1967, 23:30920(R) (BMwF-FBK-68-51)
research at Minnesota Univ., Sept. 1968 to Aug. 1969, (T), 24:3550(R) (COO-1764-39)
research at Minnesota Univ., Sept. 1969 to Aug. 1970, (T), 25:9685(R) (COO-1764-86)
research at MIT, 1969, 25:14925(R) (MIT-2098-643)
research at Nordita, Denmark, July 1, 1965-June 30, 1966, 23:32954(R) (NP-17910)
research at Nuclear Physics Institute of University of Paris in 1970, 25:53748(R) (NP-18872)
research at Oregon State University, 25:56689 (RLO-1062-711)
research at Oregon State University, progress report for period ending July 31, 1969, 23:49394(R) (RLO-1062-691)
research at ORNL relating to nuclear cross sections, January—April, 1971, (E), 25:31204 (ORNL-TM-3378)
research at Orsay, 1968—1969, 25:48076(R) (NP-18837)
research at Orsay, May 1, 1969 to May 1, 1970, 25: 25568 (LAL-1241)
research at Orsay, summary of, 24:8781(R) (LAL-1224)
research at Osaka Univ., 1969, 24:35740(R) (OU-LNS-70-1)
research at Osaka Univ., 1970, 25:43732(R) (OU-LNS-71-2)
research at Physikalisches Staatsinstitut Institut fuer Experimentalphysik, in 1967, 23:30921(R) (BMwF-FBK-69-4)
research at Princeton from April 1969 to April 1970, 24:38145(R) (PUC-937-378)
research at Rensselaer Polytechnic Inst., Jan. 1, 1971—March 31, 1971, 25:48036(R) (RPI-328-218)
research at Rensselaer Polytechnic Inst., June 1970 to May 1971, (T), 25:31396(R) (RPI-3947-13)
research at Rice Univ., 1968, 23:9794(R) (TID-24888)
research at Rutherford, 1969, 24:47534(R) (RHEL/R-191)
research at Saha Inst., summary of, 24:22145(R) (NP-18141)
research at SUNI 5.5-MeV Van de Graaff accelerator, 1967, 22:26932(R) (NP-17434)
research at Technical University of Berlin, 1969, 24: 36652 (TUBIK-19)
research at Technische Hochschule in 1966, 23: 30933(R) (BMwF-FBK-68-38)
research at Technische Hochschule in 1967, 23: 30996(R) (BMwF-FBK-68-39)
research at Technische Hochschule in 1969, 25: 10018(R) (BMBW-FBK-70-10)
research at Technische Hochschule, 1968 annual report, 24:8883(R) (BMwF-FBK-69-37)
research at Triangle Universities Nuclear Laboratory Oct. 1, 1968 to Sept. 1, 1969, 25:12534(R) (TUNL-2)
research at Trombay 5.5-MeV Van de Graaff accelerator, 1970, 25:41147(R) (BARC-543)
research at Tunisian CEA, 21:26066(R) (NP-16474)
research at UKAEA, 25:4088(R) (NP-18528)
research at UKAEA, 1968—1969, 24:38482(R) (NP-18112)
research at Univ. of Minnesota, theoretical, 23:5550(R) (COO-1764-6)
research at Univ. of Washington, 1971, 25:46021(R) (RLO-1388-139)
research at University of Florida nuclear chemistry department in 1970, 25:38993(R) (ORO-2843-18)
research at University of Kansas, Sept. 1, 1969 to Aug. 31, 1970, 25:22986(R) (COO-1120-117)

research at University of North Carolina April 1 to June 30, 1971, 25:56748(R) (ORO-2408-45)
research at University of Notre Dame, from November 1, 1968 to October 31, 1969, 23:47039(R) (COO-427-93)
research at University of Texas in 1970, 25:34084(R) (ORO-2972-170)
research by Euratom participants in 1969, 25:7800(R) (EANDC(E)-127(U))
research implications for industry and science in Soviet Union, survey of, 22:44969
research in Belgium during 1966, 23:28561(R) (NP-17819)
research in India during 1969, 25:25706(R) (BARC-474)
research in low- and medium-energy, summaries of, 21:46184 (TID-4005(Pts.3 and 4)(2nd Ed.))
research in low-energy, conference on use of small accelerators for, 22:50487 (CONF-680411)
research in low-energy, programming and systems for on-line computer in, 22:28239
research in New Zealand, 24:9709(R) (INS-343)
research in New Zealand, Jan.—June, 1969, 25:460(R) (NP-18408)
research in Pakistan, 1967—1968, 24:36647(R) (NP-18125)
research in Pakistan, review of, 22:16093
research in Poland, review of, (E), 25:1357
research in Rumania, 24:46398
research in Sweden, 1969, 25:20133(R) (NP-18671)
research in U.S.S.R., collection of abstracts on, 24:52366(T) (NP-tr-1922)
research in U.S.S.R., collection of abstracts on, 24:52369(T) (NP-tr-1925)
research in U.S.S.R., collection of abstracts on, 24:52368(T) (NP-tr-1924)
research in U.S.S.R., collection of abstracts on, 24:52367(T) (NP-tr-1923)
research in underdeveloped countries, role of international scientific centers in promoting, 24:1886
research in university laboratories, use of computer-based data acquisition systems for, 21:34505 (CONF-660527-, pp 13-19)
research in USSR, collection of abstracts on, 24:26582(T) (NP-tr-1872)
research in, centers for, 21:29850
research in, CERN progress report for 1966 on, 21:31659(R) (NP-16811)
research in, design of isochronous cyclotron for, 22:29800
research in, development and use of computers in, 21:32530
research in, large associative memory devices for use in, 22:16928 (CEA-R-3394)
research in, on-line control by digital computers in, 23:31052 (BMwF-FBK-68-50)
research in, programming of computer-based data acquisition system for, 22:28240
research in, review of, 21:17061
research in, use of on-line computers for, 21:32524
research in, using high-energy particles, 23:30705
research on neutron-deficient nuclei at Dubna synchrocyclotron, review of recent, 23:39995
research on theoretical, at Ames Laboratory, July 1967 to June 1968, 23:1580 (IS-1900, Paper 6)
research on, 1968 Idaho Nuclear Corp, 23:26134(R) (IN-1218)
research on, computer programs for, 24:52989 (ANL-7684)
research on, conference on reactor, 23:37191 (KURRI-TR-10)
research on, review of AEC, 22:21017
research on, review of AEC, 23:17316
research on, review of, (E/T), 22:24570(R) (UCRL-17876)
research program and progress, 21:12098
research program and progress at Saha Institute, Calcutta, 21:27995(R) (NP-16755)
research program and progress, (E), 22:41949 (ISS-67/44)
research program at Emperor tandem Van de Graaff, 21:19103
research program at Indian Inst. of Technology, summary of, 24:28699
research program at LAMPF, proposed, 25:52987 (LA-4637)
research program at Saha Inst. of Nuclear Physics, summary of, 24:28700
research programs and progress at Inst. of Nuclear Sciences, New Zealand, 22:10135(R) (NP-17190)
research programs at Bhabha Atomic Research Center, India, 21:41292(R) (NP-16972)
research programs at Bose Institute, 25:37762(R) (NP-18712)
research programs at CNEN, summary of, (E), 25:46097 (RT/EL-(69)7, Paper 1)
research programs at Scottish Research Reactor Center during October 1968 to September 1969, review of, 24:29055(R) (SRRC-37/70)
research programs in Germany, government activities in planning and control of, 25:53896 (A/CONF.49/P-417)
research programs in research reactors, in Yugoslavia, 25:54178 (A/CONF.49/P-348)
research programs in, review of, 21:27467(R) (NP-16698)
research programs in, use of TRIGA-2 Pavia for, 22:50835
research programs on, at Karlsruhe, 21:12210
research programs on, description of joint Norway, Poland, Yugoslavia, and IAEA, 25:54261 (A/CONF.49/P-330)
research progress at Rutherford High Energy Laboratory, 21:31837(R) (RHEL/R-136)
research progress at School of Chemistry at Georgia Institute of Technology, annual report, 24:6848(R) (ORO-3346-54)
research progress at University of Texas during 1969, 24:22147(R) (ORO-2972-123)
research progress in, status of, 22:20773
research progress in, summary of, 22:7629(R) (COO-7-0440)
research progress on, 24:52566(R) (ORNL-4534)
research progress on, 23:34956(R) (HMI-B-80)
research progress on, 21:17555(R) (ORNL-3911)
research progress on, April 1, 1969 to March 31, 1970, 25:38969(R) (ANL-7728)
research progress, review of, (E/T), 21:15522(R) (NP-16556)
research using accelerators, review of, 23:25752
research using high-intensity neutron sources, 21:44521 (CONF-660925, pp 819-34)
research using hyperfragments, 21:15487 (CONF-660221-, pp 128-31)
research using neutron sources, review of, 21:44501 (CONF-660925, pp 47-88)
research using neutron-induced reactions, survey of, 22:39565
research using on-line computers, review of, 21:17243
research using polarized targets, (T), 21:10083
research using polarized thermal neutrons, 21:21547
research using π-mesons, review on, 24:52690
research using two-dimensional pulse-height analysis, 21:12626 (BNL-10864)
review of basic concepts in, (T), 21:46787 (NP-16901)
review of basic concepts in, (T), 21:46789 (NP-16903)
review of basic concepts in, (T), 21:46788 (NP-16902)
review of developments during 1969, 24:8319
review on current literature in, critical, 24:20053
rotation matrix in, representation as sum over Clebsch—Gordan coefficients, 21:15617 (NP-16587)
seminar on, Cambridge, Mass., July—Aug., 1967, 23:9006 (TID-24667)
stable isotope uses in, review of, 25:34813 (TID-25705)
studies in upper atmosphere, low-energy, (E), 22:15411 (NP-17106)
survey of, 23:39291
T matrix in, determination of parameters for off-shell effective-rangelike theory for off-shell, 24:43469
tables of Clebsch—Gordan coefficients and spherical harmonics, 22:42102 (UCID-2823)
technology in developing nations, requirements for, 25:53897 (A/CONF.49/P-418)
theoretical research at State University of New York at Stony Brook, September, 1969 through August, 1970, 25:25799(R) (NYO-4032-28)
thesaurus in, development of, 22:35747
training programs at Puerto Rico Nuclear Center, 22:23481(R) (PRNC-102)
training programs on basic, for use in animal research with radiation and radioisotopes, 21:12750 (STI/DOC-10/60)
use in solid-state research, review, 25:30647
uses in geology in USSR, review of, 24:9499

legal aspects of risks in, 21:30226
legal aspects of Spanish, 21:34142
legal aspects of, lectures on, 24:9841 (STI/PUB-215)
liabilities and civil responsibilities in France for, laws governing nuclear, 23:21454
materials safeguards in, 21:45628 (WASH-1076, pp 44-50)
peaceful uses of, role of U. S. in international development of, 25:39212 (A/CONF.49/P-102)
policy of Swedish government, review of, 23:48080
prediction for 1970-1985 of installed, 22:24984
predictions for needs of 1970s, effects on uranium demands of, 22:32832
production at Hanford NPR, design modifications for, 21:8118
production by thermionic reactors, fast transients in, (T), 21:7920
production cost calculations, EURATOM handbook on, 21:10127 (EUR-3079.e)
production during 1967 to 1980 of, analysis of USA estimates in, 22:27429
production growth and pattern of, 23:45045 (AECL-3293)
production in Europe, summary by country for 1968, 23:21430
production in Europe, summary of 1967, 23:11148
production in Finland from 1965 to 1980, estimate of economics of, 22:30201
production in Germany, economic comparison with conventional plants of, 22:30194
production in Japan, model for long-range, 24:11136
production in Sweden in 1975 and 1985, estimates of, 22:10009 (NP-17084)
production in U. S. and Western Europe, predictions to 1980 of, 22:27439
production in U.S.S.R., analysis of present and future, 23:4487(T) (AEC-tr-6993)
production in US through 1985, fuel requirements for, 23:11672
production of electricity in Sweden prediction to 1985, 22:20818 (NP-17271)
production of free world, predictions to 1985 of, 22:27431
production of, estimates of future, 21:17490
production of, optimum use of plutonium fuels in, 24:36857 (EUR-4474)
production of, review of UKAEA programs for, 21:42867
production of, review on methods for increased, 25:15813
production of, text of international agreement between USA, IAEA, and Mexico for, 23:13418 (TID-24767)
production requirements for 1970 to 1980 of, use of enriched uranium-235 for, 22:30209
production requirements for Japan, description of, 22:14168
production requirements of USA-built enriched uranium fueled power reactors, during 1960 to 1973, 22:24976 (WASH-1084)
production using graphite rotary expanders in high-temperature inert gases, 21:30173 (UCRL-70258)
production, effects of, on estimates of krypton-85 content of environment, 22:28499
programs in developing countries, summary of, 25:54137 (A/CONF.49/P-761)
radiation hazards to man from industrial, 21:45648
regulation by IAEA, review of development and organization for, 24:9842
regulation through Euratom treaty, 24:9846
requirements and development of European, past and future, 22:14222
requirements for Western Europe, discussion of forecast of future, 22:48697
requirements for, estimates of long-range, 25:60020
requirements in future, 21:27722
requirements in Italy, estimates of future, 21:19412
research and development programs in, organizations for Czechoslovakia and Poland, 23:19473
research in Belgium, review of, 23:41573
research on, IAEA contracts for, 25:37826 (STI/DOC-10/125)
review of U.K. program, 21:31960
safeguards in, technical requirements for, 21:45627 (WASH-1076, pp 28-34)
safety aspects of, 21:30226
safety aspects of, effects of news media on public opinion of, 25:48228
science and technology of, report to British Select Committee on, 22:14221
site selection for boiling reactors for, effects of containment system criteria on, 23:15564
sources of, for use in the sea, 21:26012
sources of, relations with the international economy, 24:11133
spinoff from technology of, effects on non-nuclear fields of, 23:6000
status of industrial, summary of 1967, 23:7384
uranium for production of world, comparison of forecast need with availability of, 22:32831
use in chemical processing industry, possible future, 22:27427
use in production of iron by electrolysis and electroreduction, feasibility of, 22:16748
uses in aerospace technology, 22:25061 (DLR-MITT-66-07)
uses in Africa, symposium on peaceful, 24:44382 (STI/PUB-233)
uses in chemical industry, 24:33728
uses in marine power supplies, discussion of, 22:1823
uses in production of iron, review on, 25:52310
uses in public utilities, discussion of, 22:1823
uses in space, discussion of, 22:1823
uses of, outlook for, 23:33139
uses of, review of European Nuclear Energy Agency actions for peaceful, 22:20836
Nuclear Power Demonstration Reactor

economics of various types of reactor, comparison of, 22:24996
economics of, analysis for optimization of, 25:37033
economics of, analysis of integrated power systems, 25: 34241
economics of, comparison of steam power plants with, 25:18057 (BNL-50235)
economics of, comparison of United Kingdom and USA, 22:20881
economics of, comparison of United States and United Kingdom, 21:46897
economics of, comparison with fossil fuel plant of, 24: 13557
economics of, comparison with fossil-fuel plants, 21: 15725
economics of, comparison with hydroelectric, 21:44811 (AD-648807)
economics of, comparison with oil fired power plants of, 25:1807
economics of, continuous-time dynamic model for optimum, 25:25888
economics of, cost factors in evaluation of, 24:28896
economics of, effects of conventional plants in integrated utility systems on, 25:53927 (A/CONF.49/P-21)
economics of, effects of costs of risk minimization on, 25:48231
economics of, effects of distance from energy consumption centers on, 24:11099 (IRS-T-16(1969), pp 13-25)
economics of, effects of electricity intensive industries on, 24:28920
economics of, effects of gas turbine load peaking system on, 25:34399
economics of, effects of generating cost variables on, 25: 59920
economics of, effects of power transmission factors on, (T), 25:34258
economics of, effects of safety requirements on, 25: 36892
economics of, effects of siting and local conditions on, 21:30105 (BNWL-CC-978)
economics of, effects of uranium reserves on future, 21: 7981
economics of, estimates of future, 21:17490
economics of, evaluation of computer programs for analysis of, 25:34253
economics of, handbook for calculation of, 21:27716
economics of, in Canada, 21:15701
economics of, in Yugoslavia, 21:15694
economics of, integrated with hydroelectric system, 25: 34246
economics of, justification factors for, 23:49529
economics of, mass production effects on component costs in, 24:28916
economics of, methods for analysis of, 25:34204
economics of, methods for calculation of, 24:13507
economics of, overall aspects of, 24:9083
economics of, PELINOMIC code for, 24:41031 (PEL-197)
economics of, problems in, 25:20751
economics of, review of, 24:18539
economics of, symposium on international extrapolation of, 22:16169
economics of, university instruction in, 25:6195
economics within a utility system, discounted cash flow method for calculation of, 25:12724 (TRG-Report-2090)
economy of, DAEDALUS-code for determining linear programming simulation of, 22:42166 (BNWL-796(App.))
effects on blood of school children in environment of, 23:24751
effects on communities of aquatic animals and plants, 23:31683
effects on environment, 24:16150
effects on environment, 25:42383
effects on environment and human health, evaluation of, 25:32434
effects on environment in USA, legislative control for, 25:37829 (A/CONF.49/P-89)
effects on environment of, analysis of public concern for, 25:39132 (A/CONF.49/P-723)
effects on environment, review of research concerning, 24:31902
effects on French electric power production system, 23: 4163(T) (AEC-tr-6986)
effects on heavy oil industry supply-and-demand of, economic projection to 1995 of, 23:4146 (NP-17671)
effects on krypton-85 content in global atmosphere, 25: 54781(T) (JPRS-53174)
effects on krypton-85 content of atmosphere in France since 1954, 24:48460 (CEA-CONF-1550)
effects on radioactive contamination of oceans, 24:9625
effects on radioisotope contamination of environment, 25:52043 (A/CONF.49/P-684)
efficiency of, economic comparison with coal-fired plants, 21:13980 (NP-16276)
efficiency of, effect of magnetohydrodynamic generator on, 21:2075 (ANL-7148)
effluent releases from, systems for control of, 25:18055
effluents from U.S., effects on environment of radioactive and thermal, 25:39183 (CONF-710416-, Paper 19)
effluents from U.S., environmental effects of radioactive and thermal, 25:10132 (BNWL-SA-3564)
effluents from, activities in France for control of air pollution from, 25:20686
effluents from, aerosol model studies of radioactivity releases from gaseous, 25:15874
effluents from, analysis of radioactive and thermal, 25: 26008
effluents from, characteristics and composition of chemical and thermal, 25:23201 (ORNL-4652)
effluents from, control methods for radioactive and thermal, 25:28623
effluents from, control of chemical, radioactive, and thermal, 25:28621 (STI/PUB-261)
effluents from, control of radioactive and thermal, 25: 23215
effluents from, control studies for radioactive and thermal, 25:8045
effluents from, effects on ecology of radioactive and thermal, 25:36970
effluents from, effects on environment in U. S. of chemical and thermal, 25:3852
effluents from, effects on environment of radioactive and thermal, 25:51021
effluents from, environmental aspects of radioactive and thermal, 24:45928 (CONF-700810-51)
effluents from, environmental effects from radioactive and thermal, 25:20683
effluents from, environmental effects of, 25:41456 (SGAE-RT-34/1970)
effluents from, environmental effects of radioactive and thermal, 25:18048
effluents from, environmental effects of radioactive and thermal, 25:18044
effluents from, monitoring and control in India of chemical, radioactive, and thermal, 25:53982 (A/CONF.49/P-536)
effluents from, proposed regulations on chemical, radioactive, and thermal, 25:23222
effluents from, safety aspects of radioactive and thermal, 25:1951 (DUN-SA-153)
effluents from, sources and control of, 25:54003
effluents from, state versus federal control of radioactive and thermal, 23:26498
effluents from, thermal effects on aquatic life in Susquehanna River from, 23:40863
effluents from, TVA studies on radioactive and thermal, 24:45905 (CONF-700810-14)
electric generators for, analysis of optimum rotation speed for, 24:43800
electric generators for, design of large-capacity turbo-, 25:15816
electric power generation by, optimization of conditions for, 23:24355
electric power generation in, in US to 2000, predictions for, 25:2393
electric power production by UK, forecasts to year 2000, 25:57633
electric power production by, in West Germany, fuel economics and requirements for, 24:9991
electric supply system for 600 MW(e), proposed guidelines for internal, 23:47204
electrical and electronic systems for, fire control methods and procedures for, 24:7043
electrical equipment for German, development of, 21: 35598
electrical output capacity of, survey of installed world, 22:25029
electrical safety circuits for, uses of, 21:38595
electrical systems for, performance requirements for Class 1, 25:51114
electrical systems for, performance requirements for Class IE, 25:51113
electrical systems for, reliability analysis methods for, 25:41263 (EUR-4517)

electrical systems for, reliability analysis method for, 25:41264 (EUR-4517, pp 13-27)
electrical systems in Belgium for, data processing systems and information retrieval systems for reliability analysis of, 25:41508 (EUR-4517, pp 221-34)
electrical systems in Canada for, reliability analysis of, 25:41266 (EUR-4517, pp 57-84)
electrical systems in Canada for, safety requirements and reliability standards for, 25:41270 (EUR-4517, pp 235-41)
electrical systems of U.K., collection and processing of reliability data for, 25:41272 (EUR-4517, pp 251-68)
electrical systems with h.r.c. fuses for, reliability analysis of, 25:41268 (EUR-4517, pp 153-78)
electricity from, use in Germany of present networks for distributing, 23:11151
electricity generation from, operating times to achieve design capacity factors for, 23:28386
electricity output from, model calculations for optimization of long-term strategies for, 24:9128
electricity production costs for, effects of capital and Pacific Northwest site costs on overall, 23:28403
electricity production costs from, POWERCO-50 code for, 23:45093 (ORNL-4116)
electricity production from different types of, comparison of costs of, 24:16090
electricity production from European, summary of 1967, 22:37451
electricity production from fast breeder reactor, economic criteria for, 23:31176
electricity production from fast reactor, prediction of, 22:1802
electricity production from German, predictions for future and status of present, 23:23834
electricity production from Italian, economic analysis of, 22:1814
electricity production from world, summary of, 22:46932
electricity production from, corporate model for economic evaluation of, 24:18532
electricity production from, economic effects on fossil fuels of, 23:28380
electricity production from, effects of changing economics on, 24:18521
electricity production from, method for evaluating cost per kWh of, 24:16208
electricity production from, PACTOLUS code using discounted cash flow method for computing costs of, 24:18471 (BNWL-1169)
electricity production from, problems and costs of, 24:16118(T) (AEC-tr-6992)
electricity production from, spin-off advantages from, 24:16129
electricity production from, survey of world-wide needs for, 22:1813
electricity production from, UKAEA method for evaluating mixed systems for, 24:16209
electricity production predictions to year 2000, 23:37459
electricity supply from German, combined nuclear-conventional systems for, 23:23865
emergency power system for, design of, 21:28135
emergency power systems for, design and performance of, 22:33593
emergency power units for, testing of diesel-electric, 23:2047
engineered safeguards for, 25:23205
engineered safeguards for, design requirements of, 25:1951 (DUN-SA-153)
engineered safeguards for, detailed failure effect analysis for, 22:37440 (HN-192)
environment survey for, economic planning of, 25:16165
environmental effects comparison with fossil fueled plants, 24:18470 (BNL-14412)
environmental effects in northwestern U. S, 24:18547
environmental effects of, 25:26012
environmental effects of, 25:28527 (DUN-SA-166)
environmental effects of, 24:33224
environmental effects of, 25:56983 (NP-18992)
environmental effects of Austrian, survey of potential, 25:51012 (SGAE-RT-40/1971)
environmental effects of effluents from, comparison of fossil fueled plant effects to, 24:26707 (BNL-14641)
environmental effects of U. S, 25:28530
environmental effects of U. S., programs for reduction of, 25:12761
environmental effects of, comparison of fossil fueled plants to, 25:28627
environmental effects of, comparison with fossil fueled plants of, 25:44143 (SGAE-RT-39/1971)
environmental effects of, estimate of potential, 25:57098
environmental effects of, need for good public relations on, 25:53986 (A/CONF.49/P-681)
environmental effects of, operating measures for reduction of, 25:23321
environmental effects of, research in Japan on, 25:23227
environmental effects of, selected materials on, 23:52292
environmental monitoring of U.S.S.R, 25:53987 (A/CONF.49/P-687)
environmental radioactivity around, control of, 25:13471
environs inhabitation by man, effects on blood picture of children, 24:21103
environs monitoring of USAEC, at Berkeley, Paducah, Portsmouth, and St. Petersburg, 24:41870
equipment and machinery for, lubrication problems in, 22:8265
equipment for construction of USSR, production of heavy, 24:46400
equipment for, feasibility of using conventional steam power plant, 23:47678
equipment for, international nuclear industries offerings in, 24:16151
evolution of U. S, 22:1801
exhaust systems for, design of filters for, 24:29425
export of British, economic factors affecting, 22:14153
fast breeder reactors for, economic study of Mt. Tom area for, 21:44850 (NYO-3530-2)
feasibility studies of magnetohydrodynamic generator using dust suspensions, 21:41851 (AEEW-M-755)
feasibility study for Argentina, 22:3841 (NP-16989)
feedwater chemistry in, conference on, 24:18639
feedwater for, conditioning processes for improved quality, 24:22398
feedwater heater design for, optimization of condensing section and drain cooler terminal temperature differences in regenerative, 23:43141
feedwater purification for, effect of oxygen on, 22:10443
filter systems for, equipment and methods for testing efficiency of, 24:16759
financing in Latin America, InterAmerican Development Bank activities in, 23:43081 (CONF-670338, pp 251-5)
financing of, effects of local conditions on utility decisions for, 24:16128
fire protection systems and procedures for, 24:3988 (DUN-SA-122(Draft))
fission product formation in, safety aspects of, 25:26010
fission product release from, computer program for radiological safety analysis of, 22:42866 (IDO-17261)
fission-product release in, evaluation of, 21:17483
fissionable material controls for, development of international standards for, 24:20974
fuel accountability and safeguards system for, future role of utility companies in developing, 25:32159 (CONF-700541-, pp 5-20)
fuel breeding rates by year 2000 in European Economic Community, 21:42742
fuel cycle costs and management procedures for, 25:23140
fuel cycle costs for, 21:46968
fuel cycle costs for, effects of local conditions on, 24:16192
fuel cycle economics in, 21:43019 (KFK-565)
fuel cycle management in Sweden, analysis of optimum, 25:53938 (A/CONF.49/P-425)
fuel cycle performance estimates for oxide-fueled, 22:32734 (ANL-7310, pp 137-248)
fuel cycles for various types of, effects of scale on economics of, 24:16193
fuel cycles for, effects of fuel fabrication on economics of, 22:14161
fuel cycles in, effects of operational limitations on economics of, 21:25645
fuel elements for, tabulation of information needed from utilities on supply of reload, 23:28387
fuel management for, procedures used in, 22:53284
fuel management for, required input for parametric studies for, 23:28386
fuel management program for USA, computer simulation of, 22:25042
fuel processing requirements for future, 22:27974
fuel processing requirements of, 21:40946 (CONF-670542-, Paper 1)
fuel requirements for all types of, computer analysis of, 24:11125
fuel requirements for anticipated growth in Canadian, 22:42157 (AECL-3136)
fuel requirements for Argentine, forecasts to 1985, 25:51642 (A/CONF.49/P-560)
fuel requirements for French, forecasts to 1985 for uranium, 25:6845
fuel requirements for, effects on uranium prospecting, 22:10398
fuel requirements for, estimates to 1985, 22:48958
fuel requirements for, in United States, 21:15790
fuel requirements in Japan for, forecasts to 2000, 24:11123
fuel requirements of central station, predictions to 1980 for uranium, 24:11120
fuel requirements over life span of, description of, 23:28387
fuel requirements to 1985 for, estimate of free world, 22:27420(T) (ORNL-tr-1825)
fuel-cycle and operating economics for future, prediction of, 22:1804
fuels for, composition and processing of uranium, 23:48464
fuels for, economics of, 22:6166
fuels for, economics of uranium, 22:47251
fuels for, warranties on energy output of, 24:17369
fuels in fast breeder reactor—thermal reactor integrated, economics of plutonium, 24:11137
gas turbines for, operation efficiency of, (T), 22:16179
generating capacity of U. S. and Puerto Rico, 21:46894
generation of electricity in, 1967 demand for, 21:45284
German program for future, 22:12043
growth dynamics and global distribution of, 21:32275(T) (AEC-tr-6719, pp 105-8)
growth of U. S., economic predictions to 1980 for, 23:9106
growth rate predictions of, computer program for, 21:30198
harbor facilities for Fukushima, construction of, 23:45454
hazards analysis of, evaluation methods for, 25:48219 (IRS-T-18(1969), pp 151-66)
hazards evaluation for, computer method for, 25:41833(R) (IA-1218)
hazards for, probabilistic analysis of aircraft, 24:33220
hazards for, probabilistic analysis of aircraft, 24:33221
hazards in U.S. from, benefit—risk analysis of possible, 24:45925 (CONF-700810-47)
hazards to public from, methods for assessment of, 23:52300
health physics experiences and personnel protection standards at, in Italy, 25:42478
health physics hazards associated with, 23:43507
heat exchanger for, design of baffled, 23:17671(P)
heat exchanger for, design of circular cross-section, 21:1498(P)
heat exchanger for, design of improved, 21:43127(P)
heat exchanger for, design of improved, 23:21866(P)
heat exchangers for, design of single fluid phase regenerative, 24:19130
heat exchangers for, design of tubular, 23:31460(P)
heat from, uses for by-product, 23:28381
heated effluents from proposed, improved methods for predicting effects on Columbia River of, 24:46333 (BNWL-SA-3193)
heated effluents from, analysis of aquatic thermal pollution effects from disposal of, 24:44098 (TRC-7743-341-b)
heated effluents from, analysis of ecological and economic effects from disposal of, 24:44097 (TRC-7743-341-a)
heated effluents from, effects of, on growth and reproduction of marine organisms, 24:29730
heated effluents from, engineering aspects of environmental effects of, 24:29435
heated effluents from, US standards for disposal of, 24:44094 (CONF-700810-29)
heavy equipment for Japanese, design of facility and equipment for decontamination of, 21:30673
helium circulators for, design of water lubricated thrust bearings for, 22:8273
hydraulics of, use of tracer techniques in, 21:28093
incorporation in the electric power system of Macedonia, 21:15695
incorporation into Pacific Northwest hydro system, planning for, 24:18536
incorporation into Yugoslav power system, 21:15692
incorporation into Yugoslav power system, 21:15693
indemnification of, discussion on amended Price-Anderson Act for, 22:44851
installation in Euratom nations of, complete survey of factors affecting, 22:12021 (EUR-3639)
instrumentation for control of, conference on, 25:46153 (IAEA-119)
instrumentation for, design and operation requirements for, 25:51058
instrumentation for, development of signaling techniques for, 23:50217
instrumentation for, development of signaling techniques for, 23:50218
instrumentation of, bibliography on, 21:13985 (RISO-M-462)
instrumentation systems for, computers and in-core, 24:7029
insurance for, IAEA panel discussions on, 24:52745 (STI/PUB-274)
insurance for, legal aspects of, 25:25954
insurance of U.S., history of liability, 25:48229
insurance programs for, feasibility of, 25:25953
integration in New England Power Exchange System, 25:59907 (CONF-710606-15)
integration into existing power distribution and district heating systems, in Hungary, 25:53894 (A/CONF.49/P-322)
integration into existing power distribution grids, in Egypt, 25:54015 (A/CONF.49/P-137)
integration into existing power distribution grids, in U.S.S.R, 25:53910 (A/CONF.49/P-718)
integration into power grid of Spain, summary of existing and future, 25:53911 (A/CONF.49/P-729)
iodine-131 release to atmosphere during operation of, programs for monitoring, 25:42388
krypton-85 release by, calculations of skin and whole-body dose to man from, 25:8667 (BNWL-SA-3233)
legal aspects of Argentina, 22:3840 (NP-16988)
license applications for, regulatory action on, 24:16114
license-application records of, 22:12065
licensing and regulation of, evaluation of state legislation for, 25:11087 (CONF-700408-3)
licensing in Italy, role of CNEN in, 24:22366
licensing in U.S. of, responsibilities of general public for, 24:45918 (CONF-700810-34)
licensing of U. S., radiation monitoring requirements for, 24:45900 (CONF-700810-4)
licensing of U.S., effects of environmental legislation on, 25:51023
licensing of U.S., JCAE hearing on antitrust review before, 24:43611
licensing of U.S., JCAE hearings on antitrust review of, 24:30965
licensing of, changes in 10 CFR Part 50 simplifying, 22:16178
licensing of, discussion of problems in, 22:22745
licensing procedures and requirements in U. S., review of, 24:38448 (CONF-700317, Paper 16)
licensing procedures for U. S., analysis of federal and state responsibilities in, 25:23213
licensing procedures for U. S., criticism of A.E.C, 25:23212
licensing procedures for U. S., summary of, 24:22436
licensing procedures in Germany, summary of, 24:22365
licensing requirements for, procedures for safety analysis report reviewing of, 25:48220 (IRS-T-18(1969), pp 167-84)
list of world, 1966, 22:24984
load control systems in Germany for, survey of, 24:52764
lubricants for, development of oil-type, 24:42304
lubrication problems in, review, 21:10178
magnetohydrodynamic generator for use with, performance of, 21:43860
magnetohydrodynamic generators for, parametric design study of rare-gas, 25:19536 (JUL-706-TP)
maintenance in France, 25:34235
maintenance of Italian, problems associated with, 21:25642
maintenance of, analysis of costs for, 24:45863 (BNL-50205, pp 33-4)
maintenance of, development of remote equipment for, 24:2418 (ORNL-TM-2712)
maintenance of, safety factors in, 21:15751
maintenance programs for, inspection schedules and records systems for preventive, 24:11111
materials for, development of corrosion-resistant, 25:45005
materials for, effects of radiation, stresses, and corrosion on, 24:49976

materials for, role of Minister of Industry in Italy in manufacture of, 24:22242
monitoring and operation of, using computers, 21:10150
occupational health programs at U. S, 21:22435
operating experience in IAEA Member States, summary of, 25:36884 (IAEA-127)
operating license application for, in Germany, 24:21199 (SZS-9/69)
operating license application for, utility planning for, 23:52286
operation and performance characteristics of USSR, 22:7829
operation by small electrical utilities, JCAE hearings on, 22:35516
operation histories of U.S.S.R, 25:20549(T) (AEC-tr-7187)
operation in Canada of, availability and reliability requirements for optimum, 25:41266 (EUR-4517, pp 57-84)
operation in developing countries, personnel requirements for, 25:36889 (UARAEE-98)
operation in developing nations, technology requirements for, 25:53897 (A/CONF.49/P-418)
operation in East Germany, liability for nuclear incidents from, 24:31031 (SZS-18/69, pp 25-34)
operation in European Communities during 1969, 25:36855 (NP-18846)
operation in European Communities during 1970, 25:36856 (NP-18847)
operation in European Communities during 1970, summary of, 25:46184
operation in Germany during 1970, summary of, 25:46183
operation in IAEA Member States, summary of, 25:34268
operation in interconnected power systems, UCPTE experience in, 25:34208
operation in Italy, stastical summary of, 24:24726
operation in mixed generation utility systems, control optimization of, 25:59922
operation in New England Power Exchange system, 25:41302
operation in Pilbara region of Australia, economics for, 24:20498
operation in Scotland, integration with hydro and steam power plant systems, 25:53902 (A/CONF.49/P-478)
operation in Spain of, 24:45895
operation in U. K., review of, 25:36863 (CONF-700653-1)
operation in U. K., safety experience of, 24:22363
operation in U. S. Pacific Northwest, joint planning program for, 25:34209
operation in U. S., conference on, 25:18036
operation in U.K. of, economics to 1980 for, 25:1806
operation in U.K., review of, 25:53941 (A/CONF.49/P-474)
operation in U.S. of, calculational models for optimum economic, 25:3797 (ORNL-4572, pp 236-41)
operation in U.S. of, responsibilities of general public for, 24:45918 (CONF-700810-34)
operation in U.S. of, review of legal aspects concerning, 25:8046
operation in U.S., status and outlook for, 25:18037
operation in utility systems, advance planning for, 25:18067
operation in utility systems, effects of load factor changes on optimization of, (T), 25:18075
operation in Western Europe, review of, 25:25894
operation of EURATOM, personnel training programs for, 22:20809 (EUR-3662)
operation of European, ten year summary of, 25:36864 (CONF-700956-2)
operation of La Hague, France, review of, 23:24356
operation of U. S., review of, 25:34203
operation of U. S., standards on training of personnel for, 25:25892
operation of U.S., review of, 24:45903 (CONF-700810-11)
operation of U.S., review of AEC regulatory program for, 25:23219
operation of world-wide, comparison with hydroelectric and steam power plants, 24:33178
operation of, analysis of costs for, 24:45863 (BNL-50205, pp 33-4)
operation of, analysis of problems for public utility, 23:49532
operation of, applicability of digital computer systems to, 22:12058
operation of, civil liability for, 21:8804 (STI/PUB-102)
operation of, comparison of methods for optimum, 24:33195
operation of, comparison of worldwide economics for, 24:49997
operation of, computer methods for evaluating environmental effects of, 25:18526 (ORNL-4584, pp 37-40)
operation of, conference on equipment and systems reliability in, 25:28546 (AECL-3670)
operation of, criteria for optimum economic, 25:5899
operation of, data acquisition and processing system for reliability evaluation and optimum management procedures for, 25:41296 (EUR-4517, pp 293-327)
operation of, economics and use of fuel elements in, 24:2072
operation of, effects of component reliability and maintainability on, 25:28554 (AECL-3670, pp 89-96)
operation of, effects of component reliability and maintainability on, 25:28552 (AECL-3670, pp 73-81)
operation of, effects of load peaking conditions on economic, 25:34236
operation of, effects of radiation environments on, 25:28572
operation of, effects on environment of, 24:11151
operation of, evaluation of biological and medical hazards to man from, 25:52235
operation of, functions of digital computers in, 21:15674
operation of, fundamentals for, 25:23115
operation of, hazards analysis for, 25:36973
operation of, IAEA code of practice for safe, 24:13487 (STI/PUB-222)
operation of, integration model analysis for optimum economic, 25:39172 (A/CONF.49/P-42)
operation of, legal aspects of, 21:30342
operation of, manpower training requirements for, 24:5778
operation of, mid-range cost analysis for optimum economic, 25:5904
operation of, monitoring requirements for, 25:25954
operation of, performance criteria for, 25:28547 (AECL-3670, pp 13-20)
operation of, physics measurements for optimum, 24:18676 (NP-18157)
operation of, plan for efficient and safe, 22:7982
operation of, power scheduling for optimum, 25:5896
operation of, procedures for startup and long-term, 24:45894
operation of, public relations aspects of, 24:13506
operation of, reliability analysis methods for evaluation of, 25:28553 (AECL-3670, pp 83-8)
operation of, review of, 21:23635
operation of, review of computer use in, 23:19482
operation of, review of problems with, 24:38447
operation of, revision of Technical Specifications for, 23:28497
operation of, safety analysis of, 24:50049
operation of, safety aspects of, 25:36892
operation of, short-range cost analysis for optimum economic, 25:5905
operation of, simulator training of personnel for, 24:40793
operational availability of U.S., review of, 21:15722
operational characteristics of, 23:47213
operational reliability of, effects on power system planning in Finland of, 25:53926 (A/CONF.49/P-8)
operations analysis for present, 21:23633
operations aspects in France, 25:34235
operations aspects in U.K., effects of load variations on optimum economic, 25:34234
operations characteristics in Germany of conceptual 1100 MW boiling, tabulation and descriptions of, 23:28419
operations descriptions of, 22:18474
operations during 1970, review of worldwide, 25:34233
operations experience with world, summary of, 22:53304
operations history in U. S. and Western Europe, 23:15566
operations history of presently operating, 21:27707
operations incidents for U.S., during October to November 1970, review of, 25:25890
operator training for, use of analog simulator and steam turbine for, 25:39168
operators for evaluation of computerized simulators for training, 23:43073
operators for, methods and costs of training, 23:28395
operators for, training and licensing requirements for, 24:18523
optimization of 125 to 500 MW(e) ORGEL type reactor, use of ORION 2 code for, 23:37446 (EUR-4067)
parameter trends of, 21:27704
participation of small electrical utilities in power from, JCAE hearings on, 22:53316
penetration of soils by reentering, method for calculation of depth of, 23:49934
performance as heat and power source for agricultural-industrial complex, 24:50499 (ORNL-TM-3019)
performance data on operational and proposed, in USA, 25:46833
performance during 1980 to 2000 of, economic comparison of USA and worldwide, 22:27428
performance guarantees for, effects on cost and contractual procedures of technical, 24:16126
performance in Canada, reliability data recording methods for, 25:41298 (EUR-4517, pp 379-87)
performance in United Kingdom, statistical summary of, 24:24724
performance of prototype, collection and use of data and information on, 21:17528
performance of U.S.S.R., review of, 22:30210
performance optimization analysis of, use of hybrid computer for, 22:50768
personnel access locks in, German standard for, 25:43996
personnel at, method for quantitative assessment of reliability and errors of operator, 23:31141 (SC-R-69-1236)
personnel for U.S., orientation and training programs for, 24:13491 (WASH-1130)
personnel for utility-owned, training requirements for, 24:7022
personnel for, licensing procedures and requirements for operator, 25:25891
personnel for, licensing requirements for, 25:28725
personnel for, retraining program for operating, 25:51124
personnel for, retraining program for operating, 25:51125
personnel for, standards for selecting and training, 25:31481
personnel for, training of, 25:39134 (CONF-710416)
personnel for, training program for replacement operating, 25:51123
personnel for, training programs for, 25:39131 (A/CONF.49/P-103)
personnel requirements for, Commonwealth Edison experience with, 24:5780
personnel requirements for, predictions of, 24:5777
personnel safety in European, technical and legal aspects of, 24:22434
personnel safety in, role of Euratom in regulating, 24:22435
personnel training programs for, list of, 23:21420 (TID-24966)
physics parameters for AGR, calculations of, 21:27729
pipe and pressure vessel failures in, bibliography on, 22:3816 (CEA-Bib-79)
pipe failures in, effects of stress intensity on, 22:27952 (GEAP-5557)
piping for, U. S. standards code for, 25:3778
piping systems for, analysis of earthquake- and thermal-induced stresses in, (E/T), 25:54850
piping systems for, ASME Standard Code for design, fabrication, assembly, and testing of, 22:40298
piping systems for, design of earthquake-proof, 23:19881
piping systems for, effects of expansion, tension, and vibration on expansion joints in, 21:30593 (JAERI-1130)
piping systems for, microfractographic and x-ray methods for detection of fatigue failure in, 24:25238
planning of second generation, in Italy, 24:18563
plutonium production in, IAEA control methods for, 24:2427
plutonium production in, measurement of electricity generation for measurement of, 25:23200 (IAEA-R-735-F)
position in U.S. power supply systems, technical and economic aspects of, 23:28424
potentials of, discussion of, 21:27721
power conversion system for, description of stored liquid heat source for auxiliary, 25:28745(P)
power conversion systems for, heated storage in rock cavities for feedwater for, 25:53917 (A/CONF.49/P-798)
power costs from Ontario Hydro, projections of, 24:52787 (AECL-3686)
power cycles for, alternate hybrid fossil—nuclear fueled MHD, 22:43952 (BNL-12569)
power cycles for, thermodynamic analysis of optimum, (T), 25:20596
power distribution and transmission from, reliability analysis of management procedures in U.K. for, 25:41297 (EUR-4517, pp 353-65)
power generation costs in Pakistan, comparison of conventional plant costs to, 24:28900
power generation costs in Turkey, comparison of conventional plant costs to, 24:28901
power generation costs in Turkey, comparison of conventional plant costs to, 24:28921
power generation costs in Yugoslavia, comparison of conventional plant costs to, 24:28902
power generation cycle for, with means for storing heat during reduced load operation, 25:60143(P)
power grid in Turkey, stability requirements for integrated, 25:34252
power grid system in Germany for, requirements for interconnected, 25:20691
power outages caused by reactor scrams in, 21:46904
power production during 1967 to 1980 of USA, estimates of, 22:27429
power production during 1969, in western world, 24:18552
power production from European, calculation of fuel cycle costs during, 22:27438
power production from worldwide, predictions of 1967 to 2000, 24:38435 (KFK-1147)
power production from, economic effects on oil industry to 1985 of, 23:7371 (NP-17703)
power production in Germany during 1969 from, 25:3800
power production of, summary of 1970 worldwide, 25:25895
power production to 2000 of U. S. and EURATOM, analysis of, 22:35513
power production to 2000 of U. S., analysis of, 22:35508
power production using combination conventional power plant and, economics of, 22:25020
power requirements in U. S. of, predictions to 1985 of, 24:38402 (CONF-700317, Paper 15)
power supply systems for BWR and PWR, design of emergency, 22:18484
power transmission from Canada, reliability analysis of, 25:41298 (EUR-4517, pp 379-87)
prediction of future needs from, tabulation of data for, 21:31954
predictions for 1970-1980, 24:16149
pressure tubes for, fabrication and quality control of, 23:41561 (CONF-681064-8)
pressure vessel design for pressurized-fluid, 21:35637(P)
pressure vessels for, design of closure for openings in prestressed concrete, 23:47673(P)
pressure vessels for, elastic—plastic analysis for design of, 22:42936 (RD/B/N-1105)
prevention of accidents in, safety measures following accidents, 23:22311
protection systems for, performance and reliability of automatic electronic, 22:37438 (DUN-SA-65)
protection systems for, performance requirements for, 25:51114
protection systems for, performance requirements for, 25:51117
protective instrumentation systems for commercial, description of, 22:18485
protective systems for, reliability analysis of, 22:10000(R) (HN-190)
public opinion attitudes toward, in Switzerland, 25:53907 (A/CONF.49/P-676)
pumps for coolant circulation in, design and performance of, 22:47263 (AECL-2713)
pumps for fast breeder, design of large sodium, 23:49993 (SAN-681-1)
pumps for, development of, 25:51677
quality assurance programs for, licensing requirements for, 25:18095 (WHAN-SA-38)
quality assurance programs for, organizational limitations and requirements for, 25:31528
quality assurance programs for, requirements of, 25:23116
radiactive wastes from, safety criteria for stack disposal of gaseous, 24:27234 (CONF-690540-, pp 22-31)
radiation accident in Bavarian, emergency planning in event of serious, 25:46876
radiation accidents at, hazards to population from, 24:7870

radiation dose to human populations from, 25:26741
radiation hazards from installation of, in or adjacent to the sea, 21:1743(R) (NYO-3109-19)
radiation hazards from, review of, 25:24439
radiation hazards to human population and soils in environs of Soviet Union, 25:29525
radiation hazards to human population from operation of, 24:29758 (BNL-14628)
radiation hazards to personnel of, in Soviet Union, procedures for reducing, 24:50945
radiation monitoring at Rheinsberg, East Germany, review of environmental, 23:465
radiation monitoring in environment of, comparison of recommendations of FAO, IAEA, ICRP, and WHO regarding programs for, 25:16159
radiation monitoring in environment of, design and performance of amphibious detection system for in situ γ, 25:55239
radiation monitoring in environs of, expansion of federal program for, 24:44514
radiation monitoring in, requirements for instruments for, 25:34869 (SZS-2/71, pp 7-11)
radiation monitoring of environment of operating, summary of information regarding programs for, 25:16160
radiation monitoring of environment of, comparison of absolute contribution, graded, and threshold approaches to development of programs for, 25:16162
radiation monitoring of environment of, criticism and recommendations for, 25:16167
radiation monitoring of environment of, design and performance of program for, 25:16161
radiation monitoring of environment of, design of graded program for, 25:16166
radiation monitoring of environment of, economics of preoperational, 25:16165
radiation monitoring of environment of, panel discussion on objectives of, 25:16158
radiation monitoring of environment of, survey of methods and objectives of, 25:16157
radiation monitoring of environs near Quad-Cities, program for, 24:48556
radiation monitoring of environs of, use of radioisotope content of fauna and flora for, 24:25438
radiation monitoring of, in United Kingdom, 22:45545
radiation monitoring of, programs of U.S. Public Health Service for, 23:6451 (PHS-PUBL.-1224)
radiation monitoring requirements for U. S., description of environmental, 24:45900 (CONF-700810-4)
radiation protection criteria and procedures at Italian, summary of, 25:53973 (A/CONF.49/P-191)
radiation protection measures for human populations during building and use of, 23:6464
radiation protection methods in France for, summary of Electricite de France, 25:53990 (A/CONF.49/P-848)
radioactive clouds from, graphic method for calculation of gamma radiation distribution in, 24:41432 (JAERI-1189)
radioactive contamination in vicinity of, effects on man, 24:48462 (CEA-CONF-1560)
radioactive contamination of environment by, surveillance programs for, 22:19348
radioactive contamination of oysters in vicinity of, 25:26742
radioactive discharges from, environmental effects of, 21:46872(T) (ORNL-tr-1773)
radioactive effluent from, evaluation of hazards to human population from, 25:55347
radioactive effluents from, 25:23205
radioactive effluents from pressurized water, 25:41361
radioactive effluents from U. S., analysis of federal and state responsibilities in regulating, 25:23213
radioactive effluents from U. S., analysis of federal and state responsibilities in regulating, 25:23214
radioactive effluents from U. S., possible hazards of, 25:23216
radioactive effluents from U. S., regulations for control of, 24:45920 (CONF-700810-36)
radioactive effluents from U.S., effects on environment of, 24:45903 (CONF-700810-11)
radioactive effluents from U.S., monitoring programs and measurements for, 25:39182 (A/CONF.49/P-87)
radioactive effluents from U.S., public opinion on guidelines for, 25:60128
radioactive effluents from U.S., safety regulations for, 25:23221
radioactive effluents from, comparison with fossil fueled power plants of, 24:45911 (CONF-700810-24)
radioactive effluents from, criteria for control of, 24:45914 (CONF-700810-28)
radioactive effluents from, development of standards for, 25:23210
radioactive effluents from, discharge limits and effects on environment of, 25:23223
radioactive effluents from, dosage to man from, 25:10159 (ORNL-NSIC-81)
radioactive effluents from, dose rates from projected release of, 25:18080 (BNWL-SA-3665)
radioactive effluents from, effects of, 24:33224
radioactive effluents from, effects of reactor operations on, 25:10162
radioactive effluents from, effects of short-term releases on annual atmospheric burden from, 25:8371 (SZS-14/70 (pp 1-10))
radioactive effluents from, effects on fresh water quality of, 25:26009
radioactive effluents from, guide for surveillance requirements for, 25:15335 (NF-67-8)
radioactive effluents from, hazards to human populations of maximum permissible, 25:23207
radioactive effluents from, hazards to human populations of maximum permissible, 25:23211
radioactive effluents from, model for air pollution by, 24:45908 (CONF-700810-20)
radioactive effluents from, permissible activity rates for atmosphere exhausted, 25:10161
radioactive effluents from, possible hazards of, 25:23225
radioactive effluents from, procedures for control of, 24:45916 (CONF-700810-31)
radioactive effluents from, projected long-term effects on ecosystems of, 25:23206
radioactive effluents from, releases during 1967 through 1970 of tritium, 25:41469
radioactive effluents from, role of Ministry of Health in Italy in controlling, 24:22368
radioactive effluents from, safety aspects of, 25:18081 (BRH/OCS-70-1)
radioactive effluents from, safety limits for release of, 25:23224
radioactive effluents from, sources and control of, 25:31531
radioactive effluents from, sources and distribution of tritium, 25:41470
radioactive effluents from, standards for, 24:33225
radioactive effluents from, standards in Sweden of limits for, 25:12757 (SSI-70-27)
radioactive effluents in Germany from, safety aspects of gaseous and liquid, 25:53980 (A/CONF.49/P-399)
radioactive emissions from, comparison of fossil fuel plant with, 24:20541
radioactive gaseous effluents from, standards for protection against, 23:12105
radioactive material release from, to atmosphere, safety criteria for, 24:27235 (CONF-690540-, pp 32-42)
radioactive releases by, legal aspects of emergency planning for, 24:7875
radioactive waste discharges from USSR, standards for, 25:7980 (CONF-700810-41)
radioactive waste disposal from proposed, to Lake Michigan, ecological effects of, 24:20969 (NUS-TM-S-60)
radioactive waste disposal from, effects of, on aquatic food chains in relation to effects on man, 24:48526 (CEA-CONF-1548)
radioactive waste disposal from, in United Kingdom, application of ICRP standards for control of, 24:48582 (CONF-700810-33)
radioactive waste disposal from, in United Kingdom, program for monitoring of environment to control radioactivity levels from, 24:48527 (CONF-700810-10)
radioactive waste from German, hazards to population from river disposal of tritium-containing liquid, 24:27312 (CONF-690540-, pp 43-56)
radioactive waste from UK, management of gaseous, 23:29139
radioactive waste from, disposal of, into international rivers, 23:12106
radioactive waste from, in the USA, 21:10565 (CONF-660208-, pp 3-16)
radioactive waste from, predicted disposal limits for, 25:39205 (A/CONF.49/P-33)
radioactive waste from, processing of, 22:2178 (UJV-1899)
radioactive waste from, safety hazards to public from, 21:19883
radioactive waste from, standards for, 24:50925 (AECL-3685)
radioactive waste handling at Soviet, 23:28981
radioactive wastes from German, economics and safety of disposal of, 23:15615
radioactive wastes from Japanese, management of gaseous and liquid, 25:51745 (A/CONF.49/P-253)
radioactive wastes from US, developments in and plans for disposal of, 22:21299
radioactive wastes from US, management of gaseous, 23:29140
radioactive wastes from, comparison of international design data and operating experience of systems for management of, 24:7616 (STI/PUB-208)
radioactive wastes from, economic aspects of methods for disposal of solid, 25:2425
radioactive wastes from, evaluation of environmental contamination from release of gaseous, 24:25252 (SZS-17/69)
radioactive wastes from, storage of, 22:36016 (RISO-M-735)
radioactivity in air near, modified Sutton equation for determination of, 21:22044
radioactivity monitoring in environment of, consideration of ecological factors in developing program for, 25:55238
radioactivity monitoring in environs of Shippingport, during 1967, 24:2610
radioactivity release rates for development of standards for, 25:10161
radioactivity release to environment from, estimation of effects on background radiation levels of long-term, 25:55200
radioactivity release to German rivers from, research on maximum allowable, 24:44093 (CONF-700810-12)
radioinduced aneuploidy in chromosomes of personnel at ENEL, ionizing, 23:12057
radioiodine production in, problems related to, 25:37567
radioisotope content in water near, development of underwater gamma spectrometers for measuring, 21:32445
radioisotope release by, in relation to content of irrigation canal sediments and water downstream on Rhone River, 25:2543
radionuclide release under normal operating conditions, compilation of average annual totals for, 25:16175
reactivity control for space electric-, use of liquid, 22:6087
regulation of U. S., role of public in, 25:54006
regulatory actions on U. S., review of, 25:12762
reliability analysis of, 25:48222 (IRS-T-18(1969), pp 213-31)
reliability data on, techniques for acquisition and processing of, 23:25997 (HN-199)
reliability of, management procedures to improve, 25:50932 (KAPL-P-3937)
requirements for small and medium size, prospects for future, 23:17179
requirements for U. S., environmental aspects of, 24:22240
requirements for, prediction of future, 21:38589
requirements in Africa of, 24:46004
requirements in Germany, projections of, 25:57005
requirements in Germany, projections of, 24:11098 (IRS-T-16(1969), pp 3-10)
requirements of future European, role of AEG in meeting, 21:35596
research and development program in Europe, summary of 1968, 23:26024
response to earthquakes, models for simulating dynamic, (T), 25:57598
response to seismic waves, effects of soil-structure interaction on, 24:50475 (ORO-3822-6)
role in scientific research and development in Canada, 22:25612 (AECL-2782)
sabotage of U.S., potential hazards to public of industrial, 23:17236 (SNE-51)
safeguard review committee operation at Idaho Nuclear Corporation, 22:19329 (IN-1041)
safeguards and inspection for, description of IAEA system for, 22:42262
safeguards of, reliability of, 21:7951
safeguards system for, with water-cooled and moderated reactors, feasibility study of, 25:21309
safety analysis of, assessment of reliability and errors of personnel in, 24:50938 (CEA-CONF-1514)
safety analysis of, comparison of maximum credible accident probability concept and reliability analysis methods for, 25:48221 (IRS-T-18(1969), pp 185-9)
safety analysis of, computer program for environmental, 25:37049
safety analysis of, data acquisition and processing systems for reliability analysis method for, 25:48218 (IRS-T-18(1969), pp 123-50)
safety analysis of, development of methods for, 25:48214 (IRS-T-18(1969))
safety analysis of, development of reliability analysis methods for, 25:48217 (IRS-T-18(1969), pp 39-97)
safety analysis of, maximum credible accident and reliability analysis methods for, 25:48216 (IRS-T-18(1969), pp 23-38)
safety and radiation protection in space, 21:4404
safety and siting of, basic concepts of earthquake effects on, 24:22806
safety aspects in Japan, 25:5937 (RISO-214, pp 457-79)
safety aspects in U.K, 25:53941 (A/CONF.49/P-474)
safety aspects in U.S., analysis of AEC public meetings on, 24:50051
safety aspects of, 25:23204
safety aspects of, 25:23205
safety aspects of, 25:23225
safety aspects of, 25:28544
safety aspects of Buenos Aires area for, 22:3835 (NP-16982)
safety aspects of development and use of, 24:22438
safety aspects of U. S, 25:23215
safety aspects of U. S, 25:23216
safety aspects of, comparison of statistical fault analysis and other methods for, 24:50057
safety aspects of, development of codes and standards on, 25:39140 (CONF-710512-13)
safety aspects of, effects of news media on public opinion of, 25:48228
safety aspects of, public information myths concerning, 25:39184 (CONF-710416-, Paper 20)
safety aspects of, public opinion arguments concerning, 25:48215 (IRS-T-18(1969), pp 3-19)
safety aspects of, review of, 25:36973
safety aspects of, review of basic, 23:6016
safety assessment using computer techniques, data store requirements for, 22:14121 (AHSB(S)R-138)
safety criteria for, 25:28675
safety criteria for U. S., review of changes in, 25:39271 (A/CONF.49/P-40)
safety engineering concepts for, discussion of, 22:25022
safety evaluation for, systems approach to, 25:8043
safety evaluation in, 22:8536
safety evaluation of, critieria for social benefit relative to risk for, 23:47145
safety experience, 21:7952
safety measures at, responsibilities of industrial physician in relation to, 24:41906
safety of Italian, ENEL technical standards for, 24:22370
safety of U. S., role of National Center for Radiological Health in, 24:22437
safety of U.S., benefits versus risks evaluation of, 24:33217
safety of, consequences of industrial sabotage on, 24:16110
safety of, correction of printed errors concerning, 23:4290
safety of, critique of policies and engineering practices on public, 23:31134
safety of, design requirements of protection systems for, 24:13511
safety of, effects of meteorological conditions on, 24:7522 (STI/PUB-211)
safety of, general requirements for, 25:23228
safety of, geologic and seismic factors influencing assessment of, 24:22807
safety of, need for good public relations on, 25:53986 (A/CONF.49/P-681)
safety of, policies in Sweden on, 25:53976 (A/CONF.49/P-304)
safety of, public relations aspects of, 22:12048
safety of, regulations in France on, 24:22364
safety of, research in public attitudes on, 25:41376
safety of, risk factor evaluation of, 25:25949
safety of, risk probability method for evaluation of, 25:31529
safety of, risk versus benefits analysis of, 25:41362
safety of, role of IAEA in establishing standards for, 24:22362
safety of, role of Ministry of Labor in Italy in, 24:22369

safety of, Swedish criteria for, 25:53977 (A/CONF.49/P-305)
safety reports for, IAEA guidelines for organization and contents of, 25:15337 (STI/PUB-272)
safety standards for, historical development of AEC, 21:23653
safety studies in France for, review of, 24:24775
safety system for, design of pressure absorbing, 21:5650(P)
safety system testing for, design provisions for, 22:5919 (CONF-671011-2)
safety systems for, description of scram portion of, 22:25024
safety tests for, list of periodic auxiliary, 25:31597 (IRS-R-1)
sales in 1971, outlook for U.S, 25:18049
sales in US during 1970, 25:29811
secondary cycle equipment economics for BHWR type, 21:34171
seismic analysis and design of, methods for determining input data for, 24:31522 (TID-25438)
seismic analysis of, response spectrum technique with nonperiodic excitation for solving equations of motion for, 23:34911 (GA-9232)
seismic design criteria for Japanese, review of development of, 25:8107(T) (NSJ-tr-161)
seismic design in Japan for, 25:5939
seismic design methods for, review of, 24:26735 (ORNL-TM-2900)
seismic design of, effects of soil—structure interaction on, (T), 25:39618
seismic effects on, conference on analysis of, 25:54166
shielding materials for, evaluation of, 21:10152
shutdown in Germany of, procedures for reporting, 25:23229
simulation for reactor operator training, 21:35635
simulation of, uses of hybrid computers for solution to partial differential equations arising in numerical, 23:40315 (CONF-690401-, pp 369-90)
site approval for, role of New Jersey in, 25:7979 (CONF-691129-2)
site criteria for, proposal for international acceptance of uniform, 22:18432
site for, effects of earthquake motions on selection requirements for, 25:18156 (ORO-3822-7)
site for, environmental radiation monitoring program for, 25:28625
site for, evaluation of concept of standard, 22:18438
site selection criteria, 21:35611
site selection for, 21:35606
site selection for Yugoslavian, criteria for, 21:15682
site selection for, effect of ground surface faulting on, 22:8207 (TID-24124)
site selection for, effects of meteorology on, 23:13877
site selection for, factors affecting, for minimal contamination of biosphere, 21:14643
site selection for, meteorological aspects of, 22:25546
site selection of, factors affecting, 21:1451
site selections for future, summary of public interest considerations affecting, 23:15658 (TID-24936)
sites for first Spanish, description of, 22:18430
sites for, computer code for optimum location of, 25:48232
sites for, effects of population distribution on evaluation of, 24:7044
sites for, effects of thermal effluent limits on, 25:46185 (CONF-700956-1)
sites for, environmental radiation monitoring programs for, 25:23209
sites for, factors affecting planning for thermal effluent treatment at, 24:18535
sites for, methods for planning thermal discharges before acquisition of, 24:7030
sites for, methods for selecting seismic design criteria for evaluating, 24:18530
sites for, preoperational meteorological surveys of, 25:16170
sites for, probabilistic method for evaluating population characteristics of, 23:37434
sites for, probability analysis of radiation dose levels at, 25:54008
sites for, seismic effects on soil behavior at, 25:8108 (TID-25580)
sites for, technical and economic aspects of ocean, 25:28643
sites for, technical and economic aspects of sea-bottom, 25:28630
sites in Mexico of, procedures for selection of, 24:45926 (CONF-700810-48)
sites of, effects on water economics of, 23:52293
siting analysis for, 21:42782
siting areas for, descriptions of Pacific Northwest, 23:28403
siting criteria for first Argentine, 22:18431
siting criteria for Japanese, analysis of, 22:14151
siting criteria for United Kingdom, 22:6056
siting criteria for, economic and safety, 22:14157
siting in Czechoslovakia, criteria for, 25:53983 (A/CONF.49/P-543)
siting in Germany in urban areas, safety factors in, 24:50000 (CONF-700810-50)
siting in Japan, factors in selection of, 24:45913 (CONF-700810-27)
siting in metropolitan areas, method for fission product dispersion calculations for, 22:18465
siting in New York State of, effects of thermal profiles of estuaries, lakes, and rivers on, 25:1845 (NP-18494)
siting in Norway, advantages of underground rock caverns for, 23:37416
siting in Norway, economics and safety aspects of underground, 25:54144 (A/CONF.49/P-290)
siting in Switzerland, factors in, 24:45902 (CONF-700810-9)
siting in U. K. of, safety assessment standards for, 24:50059
siting in U. K. of, safety evaluation policies and procedures for, 24:50058
siting in Vienna, effects of potential accidental iodine-131 dose to human thyroid glands on, 25:44147
siting of British, numerical evaluation of risk in, 22:18433
siting of Canadian, requirements for, 22:18429
siting of Chinese, in Linkou, Taipei, Taiwan, seismic refraction profiles for, 24:36390
siting of European, effects of engineered safeguards on, 24:45927 (CONF-700810-49)
siting of fast, safety criteria for, 25:8090 (BNWL-SA-3093(Vol.1), pp VI.1-32)
siting of French, safety considerations in urban, 22:18444
siting of Japanese, analysis of problems in, 22:18427
siting of Japanese, factors affecting, 22:18426
siting of Japanese, problems of coastal, 23:13864
siting of Mexican, problems in, 22:18437
siting of U. S., long-range planning for, 25:41363
siting of U.S., effects of reactor design and engineered safeguards on, 22:18428
siting of U.S., public participation in regulation of, 25:60004
siting of U.S., regional canal-lake systems for, 25:46224
siting of Yugoslav, factors affecting, 22:18435
siting of, analysis of public utility responsibilities in, 23:49579
siting of, bibliography on, 21:40568 (ORNL-NSIC-36)
siting of, bibliography on seismological considerations for, 25:39275 (ORNL-NSIC-88)
siting of, COLHEAT computer program analysis of thermal effluents for optimum, 25:1809 (BNWL-SA-2737)
siting of, ecological aspects of, 24:45899 (CONF-700810-1)
siting of, ecological factors concerning, 25:36971
siting of, economic and environmental aspects of metropolitan, 24:45919 (CONF-700810-35)
siting of, economic, environmental, and safety aspects of, 25:60119
siting of, effects of containment and engineered safeguards on, 22:18447
siting of, effects of containment on safety factors in, 22:18439
siting of, effects of cooling tower characteristics and meteorological conditions on, 24:47804
siting of, engineering safety evaluation of characteristics of, 22:18445
siting of, environmental effects on, 22:18466
siting of, factors affecting U.S, 22:18425
siting of, geologic and seismic factors in, 25:54777
siting of, interpretation of emergency radiation doses to man used as guidelines for, 25:55242
siting of, long-term ecological effects of radiation releases from, 25:12763
siting of, modifications in British policy toward metropolitan, 22:44853
siting of, policies for, 25:31482 (AECL-3740)
siting of, proposed quantitative criterion for, 22:18436
siting of, public resistance to, 25:5940
siting of, radioecological factors in, 22:18442
siting of, requirements for, 21:46898
siting of, review of studies for offshore, 25:12765
siting of, role of Washington State in setting criteria for, 25:31525 (NP-18770)
siting of, safety requirements for, 24:50049
siting of, survey on seismic factors for, 24:43681 (ORNL-NSIC-28)
siting of, technical and economic factors in, 25:23217
siting of, thermal pollution factors in, 23:47639
siting of, thermal pollution factors in, 23:47640
siting of, U.S. AEC seismic and geologic standards for criteria for, 25:28628
siting policies in U.S, 24:45904 (CONF-700810-13)
siting policy for British, results of application of practical, 22:18434
siting policy in United Kingdom, role of design and emergency actions in development of, 24:7876
siting procedures in England and Wales, 24:45907 (CONF-700810-18)
siting requirements in Japan for, analysis for coastal areas of, 24:45923 (CONF-700810-42)
siting, analysis of federal and state legal aspects of, 22:27430
social implications of, university course on, 25:41377
space heating from, analysis of optimum economic operation for, 25:37032
standardization effects on bid evaluation by utilities, 22:35489
standards for, development of, 25:50932 (KAPL-P-3937)
standards for, review of programs for development of, 25:28536
standards in U. S. for, effects on licensing procedures of, 23:49534
standby electrical power plant for, design of 2.5 MW turboalternators for, 21:17756
startup in Germany during 1968 to 1972, tables of, 24:16109
status of world, tabular summary by country of, 22:22714
steam and power conversion systems for, design, fabrication, and testing of, 24:50067
steam cycle efficiency at 400°C, 23:21853 (AECL-3221)
steam cycles for, evaluation of saturated, 21:10172
steam expansion diagrams for, method for determination of, (T), 22:37458
steam generator development for, review of, 23:19519
steam generator for, design of once-through, 24:2364(P)
steam generators for, calculation methods for design of, 25:15815
steam generators for, cooling systems for, 21:1516
steam generators for, design of once-through forced-flow, 23:38154(P)
steam generators for, design of shell and tube, 22:6524(P)
steam generators for, effects of sodium-water reaction in, 21:32288 (AI-66-152)
steam generators for, efficiency of, 24:39122
steam generators for, production and quality control of Inconel 600 tubes for, 24:46709
steam plants for fossil-fuel and, comparison of, 21:30188
steam production in, description of equipment for, 23:43453
steam separation system efficiencies of, analysis of saturated, 21:15709
steam systems for, design for moisture separator—reheaters for, 24:18534
steam systems for, method of condensate treatment in, 22:24983
steam turbine design for, 21:41078
steam turbines for, recent developments in, 24:16757
steam—water flow in components of, dynamic model for, 24:2371 (CISE-R-121)
structural components for, Japanese programs on safety of, 25:54143 (A/CONF.49/P-225)
structural design of, construction factors in, 22:10013(T) (AEC-tr-6722)
structures for, preparation of graphite, 22:23876(P)
structures of, design requirements for earthquake resistant, 25:18156 (ORO-3822-7)
survey of French, general, 22:10017
systems analysis of, 25:54396 (ORNL-4682, pp 242-9)
tables of operating and planned, of IAEA members in 1969, 23:40282
technological and economic aspects of, 22:1799
testing of, discussion of methods for on-line, 22:22748
testing programs in U.S., summary of, 25:48167
thermal discharges from, effects on thermal pollution of rivers, 24:5750
thermal discharges from, proposed procedure for evaluating effects of liquid, 23:28382
thermal effects on surface water in Germany of, 23:52294
thermal effects on surface waters, methods for controlling, 23:38096
thermal effluent effects from U.S., water quality criteria for, 25:7978 (BNWL-SA-3282)
thermal effluent effects on environment, selected materials on, 23:52292
thermal effluent effects on surface waters, incremental costs of reduction of, 24:18533
thermal effluents from Nordic countries, effects on surface waters of, 25:51020
thermal effluents from Sweden, economics of urban heating system using, 25:28574
thermal effluents from U. S., potential environmental impact of, 25:10133 (BNWL-SA-3581)
thermal effluents from U.S., ecological aspects of, 24:45915 (CONF-700810-30)
thermal effluents from U.S., effects on environment of, 25:23218
thermal effluents from U.S., JCAE hearings on AEC regulatory control of, 24:30965
thermal effluents from U.S., problems in control of, 24:47803 (NP-18389)
thermal effluents from U.S., summaries of studies on effects of, 24:50048 (TID-25534)
thermal effluents from, beneficial applications of, 25:46158
thermal effluents from, beneficial uses and effects on environment of, 25:48213(R) (HEDL-TME-71-67)
thermal effluents from, beneficial uses for, 25:51130
thermal effluents from, bibliography on effects of, 25:10159 (ORNL-NSIC-81)
thermal effluents from, computer programs for surface water capacity for, 25:23202(R) (WHAN-IR-53)
thermal effluents from, cost-benefit algorithms for effects on environment of, 25:26003 (HEDL-TME-71-23)
thermal effluents from, development of COL HEAT and TOPLYR programs for simulating ecological effects of, 25:28710(R) (HEDL-TME-71-26)
thermal effluents from, ecological effects of, 25:54005
thermal effluents from, ecological effects of, (E), 25:31527
thermal effluents from, economics of food production enclosure heating by, 25:44022
thermal effluents from, effects on ecology of Great Lakes of, 24:22372
thermal effluents from, effects on ecosystems of Connecticut River, 24:45912 (CONF-700810-26)
thermal effluents from, effects on environment of, 25:41359
thermal effluents from, effects on environment of, 24:13517
thermal effluents from, effects on Illinois Waterway, 24:317
thermal effluents from, effects on Rhine River of, 25:20685
thermal effluents from, effects on river fish populations of, 25:39181 (A/CONF.49/P-86)
thermal effluents from, effects on rivers of, 24:22423(R) (BNWL-1315-1)
thermal effluents from, effects on site selection of, 25:36971
thermal effluents from, effects on surface water ecosystems of, 25:23208
thermal effluents from, effects on surface water ecosystems of, 25:23220
thermal effluents from, effects on Swiss rivers of, 24:47727 (CONF-700810-5)
thermal effluents from, environmental effects in California of, 25:18096
thermal effluents from, environmental effects of, 24:33224
thermal effluents from, environmental effects of, 25:46278 (CONF-710427-2)
thermal effluents from, food growing uses for, 24:33200
thermal effluents from, heat transfer systems for air conditioning by, 25:23105 (ORNL-HUD-13)
thermal effluents from, listing of U.S. research programs for effects on environment of, 25:25948 (ORNL-4645)
thermal effluents from, management of, 25:10090 (CONF-700335-1)

thermal effluents from, model for evaluating ecological effects of methods for, 25:28710(R) (HEDL-TME-71-26)
thermal effluents from, morphological analysis for beneficial applications of, 25:46180 (HEDL-SA-218)
thermal effluents from, physical characteristics of plume in Lake Michigan from, (E), 25:44138 (CONF-710431-1)
thermal effluents from, predicted heat dissipation limits for, 25:39205 (A/CONF.49/P-33)
thermal effluents from, regional canal system concept for utilization of, 25:44083 (BNWL-SA-2738)
thermal effluents from, review of engineering development programs for control of, 24:18577
thermal effluents from, standards in Switzerland for, 24:45901 (CONF-700810-8)
thermal effluents from, studies for effects on environment of, 24:33226
thermal effluents from, studies in New York for effects on ecology of, 24:45917 (CONF-700810-32)
thermal effluents of 16, effects on Great Lakes ecology, 24:22372
thermal energy production by urban US, estimation for year 1980, 24:9551 (ORNL-HUD-2)
thermal pollution by, effects on fish in Columbia River, 24:25427 (NP-18200)
thermal pollution following construction of, effects of, on environment, 24:29729
thermal pollution from, computer program for calculating effects on rivers of, 22:18467
tritium monitoring near USA, during October 1969 to May 1970, 25:46835
tritium production and release by, levels of, 25:5941
tritium release from, in relation to maximum permissible dose to human populations, 24:48540 (CONF-700810-6)
tube development and fabrication for, 23:36027 (CONF-680625-5)
turbine bearings for, design of gas, 21:34092 (EUR-2757.e, pp 195-)
turbine design for, using water-cooled reactors, 21:7982
turbine generators for Japanese, design and testing of four pole, 23:26430
turbine system for, uses of gas, 21:34085 (EUR-2757.e, pp 13-)
turbine wheel failure in, evaluation of damage from, 23:40916 (NP-17975)
turbine-generator sets for, evaluation of heat rate performance of, 23:28402
turbines for desalination, optimum exhaust pressure for, 25:18565 (ORNL-TM-3291)
turbines for direct-cycle, design of regenerator for gas, 24:36452(T) (ANL-Trans-833)
turbines for large Brayton cycle, description of closed cycle, 25:15821
turbines for, analysis of optimum economic design requirements for, 25:34397
turbines for, conference on design, operation, control, and inspection of steam, 24:24779 (CONF-690549)
turbines for, control devices for large steam, 23:52297
turbines for, design and operation of steam, 25:309
turbines for, design of closed-cycle helium, 21:34090 (EUR-2757.e, pp 147-)
turbines for, economics of closed-cycle gas, 21:34089 (EUR-2757.e, pp 107-)
turbines for, economics of ion exchange method for purification of condensate from, 24:50504
turbines for, operation and control of, 23:24364
turbines for, optimum layout of gas, 21:34091 (EUR-2757.e, pp 179-)
turbines for, problems in fabrication of large steam, 25:15822
turbines for, production speedup of, 21:25647
turbines for, sodium-24 injection tracer method for measuring enthalpy of steam in, 25:13148
turbines for, tracer techniques for determination of wet steam enthalpy in, 25:18097
turbogenerators for, design and operation of four-pole, 24:357
turbomachinery for, economics of use of, 21:34094 (EUR-2757.e, pp 229-)
turbomachinery for, use of process-fluid lubrication in, 22:8266
uranium requirements of, in the United States, 21:10482
use for agricultural and industrial centers, development and operation problems of, 23:49543 (ORNL-4295)
use for electricity production in Czechoslovakia, summary of future and past, 23:26425
use for electrolysis of water, 21:35933
use for supplying heat to centralized heating system, feasibility study of, 25:37536
use in multi-purpose agro-industrial complexes, analysis of optimum, 22:44881 (ORNL-4291)
use with associated chemical process and metallurgical industries, 22:10054
uses for desalination in USSR, 21:35659(T) (AEC-tr-6885)
uses in underdeveloped countries, review of potential for, 24:16137
valves for BWR-type, design of safety, 25:57637
valves for, design and performance of high-temperature and high-pressure, 25:319
waste disposal from proposed, economics of salt formations for, 22:2323(R) (ORNL-TM-1887)
waste disposal from, economics of, 24:29483 (SZS-2/70)
waste from, economic effects of processing and use of, 22:40152 (CEA-R-3449)
waste from, use of balloons for measurement of gaseous, 21:36328
waste heat from, use to prevent freezing in the St. Lawrence seaway, 22:30770
waste processing and disposal at, review on, 21:146 (JUL-359-DE)
water purification at, evaluation of pulverized ionites for, 24:9431(T) (JPRS-49539)
Nuclear Proof Test Facility (NPTF)
see Critical Assemblies
Nuclear Quadrupole Moments
see Nuclear Electric Moments
NUCLEAR QUADRUPOLE RESONANCE
book: Nuclear Quadrupole Resonance Frequency Tables, 24:5220
book: Radiospectroscopy of Solids, 22:3218
book: Tables of Nuclear Quadrupole Resonance Frequencies, 24:35578
catalog of frequencies and coupling constants for elements and inorganic compounds, 24:12905 (IS-520(Rev.))
coupling constants for, (E/T), 23:23258
detection of double, using three spin species, 24:40201
detection of NMR and, in solids, method for, 22:46199 (UCRL-18043, pp 183-98)
electric field acting on electrons from, Stark effect and, 22:13254
equipment for measuring quadrupole spin echo at 150 to 300 MHz, 22:47416
line saturation in, theory of, 24:20003
measurement of, at 0 to -195°C, cryostat for, 23:10572 (DEMO-68/6)
measurement of, superregenerative rf spectrometer for, 23:14107
nuclear spin and spin-wave interaction effects on, 21:5331
research progress on, 25:34634(R) (COO-1385-37)
second moment of integer spins in, formula for second-order dipolar contribution to, 21:18823
spectrometer for, field effect transistors for, 22:23374
Nuclear Radiation

NUCLEAR REACTION ANALYSIS
(Chemical analysis based on the counting of prompt nuclear reaction products, e.g., gamma rays, neutrons, or charged particles.)
data for thermal neutron capture gamma-ray spectroscopy, 25:37313
development of, use of beryllium-polonium as source in, 25:18368
equipment and methods for, using 2-MeV Van de Graaff, 25:45862
method for automatic process control in manufacture of oxygen-blown steel, 25:23751
method of (p,α), for determination of light impurities in bulk heavy material, 25:57360
principles of charged particle, for light elements in electrochemistry, 25:34550
sensitivity of neutron capture γ spectroscopy, 25:23535
sensitivity of neutron capture γ spectroscopy, 25:23534
sensitivity, principles, and uses of, review on, 25:26186 (BARC-529)
uses in art identification problems, 25:51410(R) (NYO-3953-3)
uses in metallurgical processes, 25:20956
NUCLEAR REACTIONS
see also Fission
see also Nuclear Reactions (Direct)
see also Spallation
see also Thermonuclear Reactions
alpha emission in bombardment of heavy elements with alpha particles, (E), 22:39639 (UCRL-17989, pp 43-99)
alpha emission in medium-energy nucleon-induced, analysis of mechanism for, (T), 25:15173
alpha spectra from, data analysis system for coincidence measurements, 21:31708 (CEA-R-3160)
alpha transfer in heavy-ion, review of, (E/T), 25:20450
alpha-particle emission in spallation, cross sections for, (T), 22:16085
amplitude for resonance, energy dependence of, (T), 23:44949 (ITEF-659)
amplitude of resonance, formula for energy dependence in overlapping-level region for, 24:1895
amplitude of, formulas for exchange effects in, (T), 22:32680
amplitude singularities in two-particle, use of Feynman diagram to determine position of, (T), 22:18337
amplitudes for compound, K-matrix analysis for effect of direct reactions on, (T), 23:49459
amplitudes for nucleon inelastic scattering, knockout-exchange, (T), 22:42143
amplitudes for particle-exchange, formulation using Ekstein equations, (T), 23:19345
amplitudes for two-neutron transfer, two-particle, (E/T), 23:1929(R) (COO-1265-67)
amplitudes of transfer-type, calculation using the diffraction model, (T), 24:30917
analog resonances in charge-exchange, 25:28457
analog resonances in deformed region, 25:28472
analog resonances in isospin forbidden, 25:28222
analog resonances in, asymmetry in fine structure of, (T), 25:28468
analog resonances in, effect of isobaric spin mixing on, 24:30876
analog resonances in, fine structure of, (T), 25:28463
analog resonances in, microscopic calculation of escape widths of, (T), 25:28466
analog resonances in, modified Schiffer procedure for determination of spectroscopic factors for, (T), 25:28473
analog resonances in, multi-channel description of asymmetry and spreading of, (T), 23:40150
analog resonances in, R-matrix analysis for neutron spectroscopic factors for, (T), 25:28474
analog resonances in, role of anti-analog state in decay of, (T), 25:28467
analog resonances in, survey on experiments interpretations of, 25:28470
analog resonances in, survey on theories for, 25:28465
analyses using DWBA and coupled equations, comparison of, 25:34162 (LYCEN-6804, pp 179-214)
analysis of (α,2α), polar and triangular diagrams for, (T), 25:10059 (LYCEN-7039)
analysis of (d,t), (He-3,d), (p,d), and (d,n), 24:3845
analysis of (n,p), at 14 MeV for compound and direct parts, (E), 23:19209
analysis of heavy-ion induced, spectroscopic, 24:10987 (UCRL-18964)
analysis of heavy-ion transfer, using DWBA and Glauber approximation, (T), 25:12683
analysis of high-energy knock-out, using hydrodynamic model, (T), 25:20491
analysis of neutron-induced, using Kapur—Peierls formalism, (T), 23:37334
analysis of three-nucleon transfer, using pairing potential model, (T), 24:6959
analysis of threshold, for energy calibration of 20- to 40-MeV electron beam, 23:50504
analysis of, algebra of DWUCK program for DWBA, 24:49921 (COO-535-613)
analysis using DWBA, many body theory of effective force for, 24:43546
analysis using Kohn—Hulthen variational principle, (T), 24:49951
angular correlation contour plots for (p,γγ), triple, 21:7849
angular correlation measurements using Doppler-broadened gamma transitions, (E), 22:1597(R) (COO-1120-68)
angular correlation theory for polarized-beam induced, 25:53846
angular correlations in inelastic scattering, width-fluctuation effects on, (T), 23:32913
angular correlations in ion inelastic scattering with Coulomb excitation, (E/T), 21:44707
angular correlations in, design of equipment for automatic measurement of, 25:51888
angular correlations in, quasistatic perturbations of, (T), 21:44803
angular correlations with gas targets, calculation of effective solid angle for, 22:50508
angular distribution measurements for, design of target chamber with remote-positioning of silicon semiconductor detectors for, 23:45530
angular distribution of particles evaporated from the commpound nucleus in, (T), 25:31428
angular distribution of stretched E2 transitions for Gaussian substrate population of side feeding in (particle,xnγ), (T), 24:13402
angular distribution of two-body, from Hauser—Feshbach theory, computer program for, 24:22237
angular distributions for (particle, γ) and (particle, particle γ), theoretical curves for analysis of various spin sequences in, 24:49949
angular distributions for alpha inelastic scattering, energy dependence of phase rule for, (E/T), 22:20533
angular distributions for deuteron elastic scattering, analysis using Akhieser-Pomeranchuck-Blair model, (T), 22:15989
angular distributions for heavy-ion transfer, recoil damping of, (T), 23:37343
angular distributions for hole levels in (d,p), abnormal behavior in, (E/T), 23:47056
angular distributions for stripping, graphic method for calculating, (T), 25:34159 (LYCEN-6804, pp 109-24)
angular distributions for, test of generalized Pauli principle for isospin multiplet symmetry in, (T), 24:1912
angular distributions from, (T), 21:2762
angular distributions from, Monte Carlo calculation of effects of compound-nucleus lifetime on, 24:30952
angular distributions in, effects of target recoil on, (T), 23:46912
angular distributions of (d,He-3), shell effects on, (T), 23:37356
angular distributions of elastic, computer program for, 24:22210
angular momentum distribution in compound nucleus, temperature-dependent moment of inertia in, (T), 23:15527
angular momentum distribution in evaporation from excited nuclei, (T), 22:27371
angular momentum distributions of residual nuclei in compound-nucleus, (T), 22:30052
angular momentum effects in, research program on, (E), 22:39636(R) (ORO-3398-12)
angular momentum effects on compound-nucleus, (E), 22:53150
angular momentum in, complex, (T), 21:23555
angular-correlation and angular-momentum coefficients for, tables and reviews on, 21:10122
angular-momentum matching in, strong-absorption description of, (T), 25:39075
antisymmetrization of the theory of stripping, 23:42989
approximation theory for resonance, resolution stationary-principle paradox in, 24:52701
asymmetry in electron scattering by nuclei, azimuthal, (T), 22:39720
atomic perturbations in resonance, theory of, (T), 23:23756 (ORO-2408-10)
basic concepts in, review of, (T), 21:46787 (NP-16901)
beryllium-8 emission in high-energy, (E), 22:35367
bibliography for light nuclei, (E), 25:43780 (CEA-N-1327(Vol.4))
bibliography for light nuclei, index to, 25:43779 (CEA-N-1327)

conference on heavy-ion-induced, Heidelberg, July 15-18, 1969, 24:49796
conference on light nuclei, 23:21237 (ZFK-130)
conference on mechanisms for, (E/T), 25:18019
conference on, in light nuclei, 21:44542 (ZFK-122)
convergence of certain distorted-wave approximations of the Faddeev equations, 25:25815
core polarization effects in, (T), 25:20496
core polarization in the nucleon—nucleus spin—spin interaction, 25:23068
corrections to electron inelastic scattering, Coulomb, (T), 22:20578 (WASH-1079)
correlations between deuteron stripping and neutron capture to same final state, (T), 23:28304 (WASH-1124)
correlations in radiative capture, triple, (E/T), 21:42712
Coulomb and nuclear excitation processes in, DWBA analysis of interference in, (T), 23:15513
Coulomb barrier in very heavy-ion induced, effect of nuclear forces on, (T), 25:7923
Coulomb barriers for, effect of deformation on, (T), 22: 53169(R) (PPAD-647-D)
Coulomb corrections to electron inelastic scattering, (T), 23:9013 (TID-24667, pp 186-95)
Coulomb decay in heavy-particle, theory of, 25:50823
Coulomb distortion effects in, in near-barrier energy range, (T), 25:50824
Coulomb distortion in heavy-ion, 21:30047
Coulomb distortion in heavy-ion, (T), 25:3720
Coulomb excitation in deformed doubly even nuclei, corrections to reorientation effect in, (T), 22:7759
Coulomb excitation in heavy ion scattering, WKB calculations of quantal corrections for multiple, (T), 23:23808
Coulomb excitation in, theory of, (T), 23:1928 (AD-671692)
Coulomb excitation in, transient fields on recoil nuclei from, (T), 24:49942
Coulomb forces in the three-body problem, 23:42988
Coulomb interactions in fast proton radiative capture, (T), 24:43517
Coulomb potential in, Riemann method for inverse problem of determining, 24:28823 (ITF-70-6)
Coulomb stripping in heavy-ion induced, (T), 25:18031
coupled equations for, orthogonality properties of, (T), 24:15986
coupled-channel calculations of, computer program for, (T), 25:36818 (KFK-1333)
coupled-channel calculations with complex eigenvalues, 25:23078
coupled-channel of (d,p) stripping, interaction kernel and methods of numerical solutions in, 24:43488
coupled-channel theory for, factorization approximation for continuum—continuum interaction in, 24:43590
coupled-channel theory of, review on, 24:15975
coupled-channels calculations of, supplement to manual for computer code for, (T), 25:20479 (JAERI-Memo-4138)
cross section calculations (a,b), (a,bγ), and (a,bγγ), computer programs for total and differential, 23:49477
cross section calculations for nonparallel target—detector configurations, Monte Carlo, 24:4477
cross section data for cosmic-ray induced, (T), 21:37194 (N-67-19863)
cross section expression for (p,2p) and (e,e'p), (T), 25: 15156
cross section fluctuations in overlapping level region, coherence width of, (T), 21:13921
cross section for particle exchange in three-particle collisions at high energy, (T), 22:16064
cross sections above Coulomb barrier for heavy-ion transfer, Q dependence of, (T), 25:53818
cross sections and resonance parameters for neutron-induced, methods for calculating effective, (T), 23: 19112 (AE-346)
cross sections and resonance parameters for, calculation by R-matrix techniques, 21:40509
cross sections for (heavy-ion, xn), validity of Alexander—Simonoff semiempirical rule in A = 100 to 150 region for, (T), 25:20480 (JINR-E7-5499)
cross sections for (n,2n), shell effects in, (T), 23:11058
cross sections for (n,p) and (n,α) at 14 MeV, shell effects in, (E), 25:31362
cross sections for (n,p), statistical-model calculations using shell-independent parameters, (T), 25:50813
cross sections for (p,n) charge-exchange, method for estimating, (T), 23:9044
cross sections for analog resonance, Wigner cusps in threshold, 24:30876
cross sections for capture of intermediate neutrons, systematics of, (E/T), 23:23780
cross sections for charged-particle emission in, calculation by composite level-density formula, 21: 38386
cross sections for charged-particle, neutron, and proton, description of LRL evaluated library of, (E), 25:59783 (UCRL-50400(Vol.4))
cross sections for compound, computer codes for calculating, 21:35527
cross sections for compound-nucleus formation in, computer program using Hauser—Feshbach theory for calculating, (T), 25:31391 (ANU-P-512)
cross sections for compound-nucleus, calculations using statistical collision matrix, (T), 22:9969
cross sections for compound-nucleus, computer program for calculating, (T), 22:9923 (NAA-SR-Memo-12530)
cross sections for compound-nucleus, conditions on 2I + 1 rule for, (T), 24:3963
cross sections for Coulomb scattering, effects of excited states on, (T), 22:18327
cross sections for deuteron and proton elastic scattering, spin-orbit effects on optical-model calculations of, (T), 21:44772
cross sections for deuteron diffraction disintegration and scattering with excitation of one-phonon states, (T), 22:35406
cross sections for diffraction interactions of light nuclei, (T), 22:53130
cross sections for diffraction scattering, calculation using complex angular momentum method with mixing of vibrational states, (T), 22:35405
cross sections for dipole photoabsorption, effects of velocity-dependent nucleon—nucleon potential on integral, (T), 22:44779
cross sections for elastic scattering, mean square deviation of, (T), 22:35377
cross sections for elastic scattering, statistical moments for, (T), 23:19356
cross sections for elastic, computer program for, 24: 22210
cross sections for electron inelastic scattering in Born and distorted-wave Born approximations, (T), 22: 20681
cross sections for electron inelastic scattering, sum rule for, (T), 22:20734
cross sections for electron quasielastic scattering, calculations using independent-particle model with L—S coupling, (T), 22:50676
cross sections for excitation of particle-unstable states in particle transfer, resonant and nonresonant contributions to, (T), 22:42137
cross sections for excited nuclei, effect of excitation energy on, (E), 22:3652
cross sections for fast neutron-induced, energy dependence of, (T), 22:20667 (INR-830/I/PL)
cross sections for fast, (n,2n), single particle effects in, (T), 24:15995
cross sections for giant resonance, behavior near thresholds of, (T), 23:44952
cross sections for γ production, unified model of deformed nuclei for, (T), 25:20524

cross sections for Hauser—Feshbach two-body, computer program for integrated, 24:22237
cross sections for heavy-ion induced transfer, analysis using finite-range DWBA, (T), 24:20417 (JAERI-1184, pp 25-9)
cross sections for heavy-ion inelastic scattering with collective excitation, (T), 22:18333
cross sections for heavy-ion multinucleon-transfer, Q-value dependence of, (T), 25:59845
cross sections for heavy-ion multinucleon-transfer, Q-value dependence of, (T), 25:36815 (JINR-E2-5797)
cross sections for heavy-ion-induced, angular distributions and excitation functions of, (E), 21:40422 (INR-791/IA/PL)
cross sections for Maxwell—Boltzmann distribution for calculation of, Doppler broadening of, 21:17418
cross sections for meson-, nucleon-, and antinucleon-induced, above 50 MeV, 23:5944 (JINR-P2-4068)
cross sections for meson-, nucleon-, and antinucleon-induced, 23:19330(T) (ORNL-tr-2073)
cross sections for neutron capture, calculation using statistical model, (T), 22:9938
cross sections for neutron capture, condition for half-life independence in activation measurement of, 25:20518
cross sections for neutron capture, effects of pigmy resonance on calculations of, (T), 24:8919
cross sections for neutron radiative capture, calculation of resonance parameters from, 21:7819 (FEI-36)
cross sections for neutron-induced, effects of unresolved resonances on, (T), 22:18108
cross sections for neutron-induced, measurements using HENRE source, (E), 23:46977 (AD-686453)
cross sections for nucleon scattering, narrow resonances from unbound states in shell-model formalism, (T), 23:11061
cross sections for nucleon-capture, statistical method for calculation of, (T), 24:1914
cross sections for photo-, calculations using sum rules, (T), 22:27236 (NP-17348)
cross sections for photo-, calculations using Tchebycheff polynomials in integral equations, (T), 22:48571 (CEA-R-3427)
cross sections for photoinduced, independent of detector efficiency and photon spectrum, 24:30879
cross sections for photon-induced, calculations using non-local forces, (T), 25:18027
cross sections for production of different isotopes in heavy-ion, statistical-theory calculation of, (T), 25:34171
cross sections for proton-induced, below 425 MeV, literature survey on, 21:4205 (ORNL-3884)
cross sections for quasi-elastic, calculation using diffraction theory, 21:10106
cross sections for resonance scattering, time-dependent formalism for calculating, (T), 22:50684
cross sections for scattering of particles with arbitrary spin, asymptotic equality of differential, (T), 22:39723
cross sections for sequential, interference effects on, (T), 24:3866
cross sections for spacecraft shield design, 21:37527
cross sections for stripping, computer calculation of, 21:7822 (NP-16368)
cross sections for T = 1 two-nucleon transfer, (T), 24:24628
cross sections for two-nucleon transfer, role of overlap integral in, (T), 23:15512
cross sections for, calculations using two-channel multilevel form of unitary low-energy scattering matrix, (T), 23:21407
cross sections for, computer program for calculation using optical model and Hauser—Feshbach method, (T), 23:15493 (JAERI-1169)
cross sections for, continuous method for measurement of, 23:45536
cross sections for, correlated beam technique for corrections to, 24:22236
cross sections for, degrees of freedom in fluctuation analysis, (T), 21:13919
cross sections for, dependence on mass number of target nucleus, (T), 21:35506
cross sections for, effect of mutual shielding of resonances of different isotopes on, (T), 22:7766
cross sections for, effect of weight functions on energy average for, (T), 24:8963
cross sections for, effects of 2p-1h states on energy-averaged, (T), 22:53243
cross sections for, intermediate structure in, (T), 21:7821 (MIT-2098-273)
cross sections for, intermediate structure in, (T), 21:7821 (MIT-2098-273)
cross sections for, interpretation of fine structure of giant resonances in, (T), 23:5950
cross sections for, relativistic triangle-diagrams for, 24:52150
cross sections for, review of intermediate structure in, (E/T), 23:21374 (ZFK-130, pp 1-10)
cross sections for, review on statistical fluctuations in, 24:47681
cross sections for, S-matrix representation for polarized particles of arbitrary spin, (T), 25:12652
cross sections for, statistical theory for fluctuations of, 21:27625
cross sections for, synthesis and statistical analysis of, (T), 23:21409
cross sections for, with excitation of isobaric analog states, (T), 21:10087
cross sections in continuum region, statistical theory of effects of incident beam polarization, (T), 22:42129
cross sections in resonance region for neutron-induced, multilevel description of, (T), 23:17141
cross sections including charged-particle emission and fission, computer program for calculating, (T), 25:31313 (ORNL-TM-3179)
cross sections of (d,p), validity of zero-range calculations for, (T), 24:5450
cross sections of photo-, calculations using mathematical statistics, (T), 21:44776
cross sections of photo-, possible explanation of discrepancies in, (T), 23:42957 (LNF-69/18)
cross sections of photo-induced, theory of, (T), 22:5883
cross sections of quasi-elastic knockout, spin-dependent effects in, (T), 21:2771
cross-section asymmetry for proton-induced, 21:25602
cross-section calculations using fluctuation theory, computer programs for, 21:7722(R) (AEET-254)
cross-section calculations using Ohmura three-body wave functions, 21:25578
cross-section calculations using spherical optical model, computer program for, (T), 22:1562 (NAA-SR-Memo-12531)
cross-section fluctuation analysis using random matrix formalism with time reversal violation in nuclear forces, (T), 22:39627 (BNL-50082, pp 19-24)
cross-section fluctuation in, formulation using unitary pole resonance form of collision matrix, (T), 23:11060
cross-section fluctuations for, statistical theory for, 21:27625
cross-section fluctuations in continuum region, analysis using method of random matrices, (T), 22:20763
cross-section fluctuations in indirect, from statistical interference effects in sequential decays of compound nuclei, (T), 22:22644
cross-section fluctuations in, effects of beam polarization on statistical, (T), 21:35516
cross-section fluctuations in, effects of experimental resolution on width of, (T), 22:30061
cross-section fluctuations in, energy-level densities from, (T), 21:46808
cross-section fluctuations in, number of degrees of freedom in, (T), 25:3717
cross-section fluctuations in, review of statistical theory of, 21:35515
cross-section fluctuations in, review of, (T), 21:17415
cross-section parameters in, transformation between Kapur—Peierls and Wigner—Eisenbud formalisms for, (T), 24:22194 (LA-4327)
data acquisition and analysis system for proton capture and inelastic scattering experiments, 23:4054 (NP-17611)
data acquisition and control systems for, (E), 22:1597(R) (COO-1120-68)
data acquisition during, development of RAD swapping system for, (E), 25:35050 (PUC-937-396)
data acquisition system for studying three-body final states of, design of on-line CAE 510 computer-based, 23:16206
data analysis from coincidence measurements, system for, 21:7722(R) (AEET-254)
data analysis of three-body, methods of, 21:12093
data analysis using computers, programs for, 21:7818 (BNL-9108(Suppl.))
data analysis using on-line computers, 21:23543 (TID-22410)
data compilation and evaluation for neutron-induced, 22:29828 (BNL-12417)
data for nucleosynthesis, (T), 23:41771(R) (NYO-3962-1)
data summaries for experimental studies of, 22:50522 (ORNL-4317-1)
decay in, hybrid model for pre-equilibrium, (T), 25:48127
decay probabilities for, compound and precompound, (T), 22:27070
derivation of the DWBA in an exact three-particle theory, 24:11054
description above two-particle emission threshold, formalism for, 21:31850
description for nucleon transfer, using DWBA for energies below Coulomb barrier, (T), 24:52730
description of charge exchange, using direct reaction mechanism, (T), 23:37339
description of charge exchange, using direct-reaction theory, 24:40663 (ANS-RPD-2, pp 39-53)
description of elastic and inelastic scattering using phenomenological methods, survey of, (T), 22:9935
description of inelastic scattering, using direct reaction mechanism, (T), 23:37339
description of quasielastic scattering, on light nuclei, 25:56830 (LYCEN-7104, S14.1-18)
description of resonant, using multichannel treatment and quasiparticle method, (T), 25:20510
description of two-nucleon transfer, using coupled-channel Born approximation, (T), 25:15191
description of two-nucleon transfer, using DWBA with finite range interaction, (T), 25:18030
description of, effect of mass extrapolation on amplitudes for soft-pion, (T), 25:23061 (LYCEN-7017)
description of, shell-model, (T), 25:7910
description using harmonic oscillator shell-model function scheme, (T), 25:20516
description using nuclear models, 23:37337
description using refined cluster functions, (T), 24:11047
description using shell model, center-of-mass motion in, 21:31853
description using shell model, continuum-continuum interaction in, (T), 21:4348
description using shell model, lectures on, (T), 22:9948
detection of rare processes of, centrifugal spinner detector for, 22:21341
detection of, statistical model for timing inaccuracies in scintillation spectrometer, 22:28156
deuteron decay in compound, nucleon angular correlations in, (T), 25:28487
deuteron disintegration by diffraction, effect of deuteron internal structure on, (T), 22:39722
deuteron elastic scattering by heavy nuclei, optical-model potentials for, (T), 23:1953
deuteron stripping reactions (d,p) with odd-Z nuclei, angular momentum transfer in polarized, (E/T), 23:47047
development of science and technology for, 21:27883
differential cross section for A + B → C* → D + G* → D + E + F, (T), 24:13417
diffraction phenomena in, (T), 21:5583
direct mechanisms in (n,α) and (d,p), (T), 23:49443 (INR-970)
disorientation parameters in neutron capture, (T), 24:28832
dispersion corrections to electron elastic scattering, (T), 23:9011 (TID-24667, pp 167-80)
dispersion relations for nucleon—nucleus scattering, forward, (T), 22:53085
distortion in heavy-ion, theory of dynamical, (T), 25:50844
distribution of GAMMA/sub n/ and GAMMA/sub γ/ level widths, 24:15980
distributions of compound-nucleus level widths, exact, (T), 22:20764
doorway states in, 21:1141
doorway states in photon-induced, (T), 25:39068 (JAERI-1205, pp 100-2)
Doppler broadening in two-body, nonrelativistic calculation of, 22:11998
Doppler effect in resonant neutron capture, (T), 22:32696
duration of, use of x-rays to determine, (E/T), 25:34167
duration times of, causality and anticausality for, 23:23389 (ITF-68-82)
effect of neutron—proton pairing correlations on the transfer of a neutron—proton pair, 24:49939
effective interactions in three-body models for deuteron-induced, (T), 23:1948
effects in Friedmann Universe, (T), 24:28061
effects of finite range and exchange interaction in (p,n) and (n,p), (T), 24:20374
effects of higher multipole deformation of the pairing density in deformed nuclei on (p,t) and (t,p), (T), 25:43977
effects of nuclear forces on the Coulomb barrier in heavy-ion-induced, (T), 24:18457
effects of second order, on thermal neutron activation analysis, 24:13787
effects on chemical reactions, review on, 22:23063
effects on chemical systems, review of, 21:19717
eigenchannel theory for, 24:20443
electron elastic scattering by arbitrary charge density distribution, method for calculating cross sections in high-energy approximation, (T), 22:46818 (JINR-P4-3941)
electron elastic scattering by light nuclei, effects of dynamical nucleon—nucleon correlation on, (T), 23:1789
electron inelastic scattering by medium-weight and heavy even nuclei in giant resonance region, Coulomb distorted wave analysis of, (T), 23:1851
electron scattering at high energy, second-order corrections to DWBA calculations for, (T), 22:50689
emission in low-energy, use in determination of elements, 23:28725
energy distribution measurements for, design of target chamber with remote-positioning of silicon semiconductor detectors for, 23:45530
energy losses in dense stellar interiors due to URCA shells, (T), 24:39746
energy produced by, during stellar collisions, (T), 21:20704
energy-level excitations in, isospin effects in dipole, 25:50803 (CONF-690732, pp 11.1-8)
equipment for studying high-energy, design of streamer spark chamber as, 21:45404
equipment for studying noncoplanar, design of demountable spark chambers using thin aluminum foil electrodes as, 23:47759
equivalent local potentials derived from Hartree—Fock calculations, 24:43487
Ericson fluctuations in, 21:35515
evaporation spectra from compound, computer program for calculation of, 25:17952 (BNL-50246)
excitation function maxima for, (T), 21:13921
excitation functions for (α,xn), (α, pxn), (d,xn), (d,pxn), and (p,xn), estimation of, (T), 23:4052 (KFK-767)
excitation functions for, automatic system for measuring, 24:47628
excitation functions for, calculations using evaporation model, (T), 21:10095
excitation functions for, cyclotron measurements of, (E), 21:44623
excitation functions for, model for calculation using Monte Carlo method, (T), 21:10100
excitation functions for, peak-counting method for, (T), 22:22634
excitation functions for, transform techniques for statistical analysis of, (T), 23:23748 (ANU-P-429)
excitation of fission at low energies, direct, (T), 21:42677 (IAE-1179)
excitation of isomeric states in thermal neutron capture, relative probabilities for, (T), 22:42095(T) (ANL-Trans-644)
experimental facilities for studying, description of gaseous target, 21:33837
experiments and theory on, translation of Soviet papers, 21:34034(T) (NP-tr-1543)
extension of two-nucleon transfer theory to include inelastic processes, 24:45827
Faddeev equations for three-body, sufficient conditions for stability of, 23:32858
Faddeev equations for, cluster expansion of, (T), 25:5858
Faddeev—Lovelace equations for, angular momentum analysis assuming non-central pair forces of, 25:17991
final state interactions in three-particle, two-particle resonance narrowing in, (T), 24:22200
final state interactions in, review on three-body, 24:52652
final-state interactions in, analysis for three identical particles, 24:30883
final-state interactions in, analysis of three-particle, 24:24626
fine structure of doorway states, (T), 21:5587
finite range calculations for (^{6}Li,p) stripping reactions, (T), 23:49482

finite-range calculation of two-neutron transfer, (T), 25: 36828
finite-range corrections in two-nucleon transfer, (T), 25: 23081
finite-range corrections in two-nucleon-transfer, calculations of, 24:13421
finite-range effects in two-nucleon-transfer, (T), 24: 22207
fission and inelastic scattering competetion in, effect of fluctuations of partial widths on, 23:49439(T) (BNL-tr-275)
fission probability in, shell and pairing effects on, (T), 23:52172 (UCRL-18667, pp 133-67)
fluctuation theory of, 21:1142
form factors and parity conservation in general nondynamical formalism for, 21:13687
form factors for deuteron inelastic scattering, finite-size effects on, (T), 23:5882
form factors for electron inelastic scattering, effects of continuum structure on, (T), 22:27271
form factors for electron inelastic scattering, in giant dipole resonance region, method for calculating, (T), 22:20733
form factors for inelastic scattering, calculation using projected Hartree—Fock wave functions, (T), 22: 48588 (N-68-24661)
form factors for one-nucleon transfer, shell-model calculation of, (T), 24:5443
form factors for particle-transfer, effects of shell-model continuum states on, (T), 24:20449
form factors in square-well model of, effect of various, (T), 25:53825
formalism for deuteron diffraction splitting, (T), 23: 42965
formalism for nucleon scattering, (T), 21:19325
gamma angular distributions from aligned nuclei in, tables of coefficients for, 22:3787
gamma angular distributions from heavy ion-induced, (T) , 22:27335
gamma de-excitation outside reaction plane in α inelastic scattering, (T), 22:39719
gamma Doppler-shift attenuation factors and line shapes at low recoil velocities, (T), 22:1716
gamma energies for calibration of high-resolution spectrometers, tables of, 22:35386
gamma production cross sections and spectra for neutron-induced, formalism for calculating, 22:30067
gamma rays and internal conversion electrons from, review on spectroscopy of, 24:495
gamma spectra from neutron capture, (E/T), 22:16100
gamma spectra from proton capture, resonance energy separation in, (E), 22:18123(R) (RLO-1925-11)
gamma spectra from, analysis of Doppler-broadened line shapes for nuclear lifetime measurements, (E), 24: 20338 (COO-1120-90)
gamma spectroscopy of, review on, (E/T), 22:16097
gamma-gamma angular correlations from aligned nuclei in, computer program for analysis of, 21:27574(R) (NYO-GEN-72-132)
gamma-ray de-excitation of compound-nucleus-reaction products, 24:28850
gamma-ray spectroscopy in, survey on, 25:17930
generalized Hamiltonian and resonance structure function for, (T), 25:50873
giant dipole resonance in neutron radiative capture at 14 MeV, E/T), 22:35251 (NIJS-P-213)
giant resonance coupling to surface quadrupole oscillations in photon-induced, (T), 22:30058
giant resonance excitation, splitting of E1, 25:28222
giant resonance structure in photon-induced, analysis of, (T), 25:39067 (JAERI-1205, pp 91-5)
giant resonances in, description using individual particle model, (T), 23:9064
Green function method for equation in bounded region for, 23:52027
ground-state correlation effects on, (T), 21:2766
Hartree—Fock approximation for spherical nuclei, application to scattering problems, (T), 25:7911
Hauser—Feshbach theory for compound, time reversal invariant formulation of, 25:59873
heavy-ion induced, decay of high angular momentum states populated in, (T), 22:30117
heavy-ion induced, identification of short-lived activity produced in, (E), 22:30007
heavy-ion induced, isotope studies by, (E), 21:13858 (YALE-2726-H-88)
heavy-ion transfer, in sub-Coulomb energy region, (T), 24:49801
heavy-ion-induced, cross sections for Coulomb stripping in, (T), 24:49802
heavy-ion-induced, molecular state in, (T), 24:49759
heavy-ion-induced, multi-configuration Hartree—Fock theory of, 24:49755
heavy-ion-induced, potential energy surfaces for, (E/T), 24:49885
heavy-ion-induced, reorientation effect in multiple Coulomb excitation in, (E/T), 24:49756
heavy-ion-induced, statistical model for decay of compound states from, (T), 24:49822
heavy-ion-induced, systematics of nucleon tunnelling in, (T), 24:49740
identification of heavy-ion, by means of product angular distributions, (E), 25:20419
identification of, pattern recognition method for, 23: 17103(R) (ANL-7481)
inelastic processes in particle-transfer, (T), 23:42993
inelastic processes in two-nucleon transfer, (T), 24: 43565
integral equations for meson (π)-produced, 21:35514
interference between collective and direct nucleon radiative capture, (T), 22:42132
interference between levels in, (T), 21:34056
interference detection in, double irradiation technique for, 23:11466
interference effects between resonance and direct, (T), 23:15431(R) (NYO-3525-36)
interference effects in nucleus-nucleus, (T), 22:7761
interference effects in, theory of, 21:35533
interference effects in, with intermediate resonances, (T), 25:31395 (JINR-P1-5648)
intermediate state transition rates in, description using Griffin model, (T), 24:22232
intermediate structure and doorway states in, (T), 21: 19314
intermediate structure in the two-channel model of, (T), 22:30070
intermediate structure in transfer, model analysis of, (T), 25:46142
internal bremsstrahlung and mechanism of (π^{+-},π^0), (T), 24:43483
intranuclear cascades, Monte Carlo simulation of, (T), 22:16079
intranuclear-cascade calculations of secondary nucleon spectra from proton-induced, (T), 24:38350
ion elastic scattering with strong absorption and Coulomb interaction, heavy, (T), 23:1961
ion implantation by, 23:39558
isobaric analog resonances in, (T), 21:25604
isobaric analog resonances in, from Breit—Wigner theory, 21:25608
isobaric analog resonances in, review on, 25:39072
isobaric spin effects in, 24:28831
isobaric spin effects in, review on, 24:20425 (JAERI-1184, pp 101-12)
isomer production in multiple-particle-emission, compound-nucleus statistical model for calculating ratio of, (T), 25:23069
isomer production in, cross-section ratios for, (T), 21: 4356
isomer ratios for, analysis for level densities and transition strengths, (T), 22:27370
isomer ratios in neutron-capture, analysis and interpretation of, (T), 22:32690
isomer yield ratios in, gamma competition in statistical-model calculations of, (T), 21:10096
isomeric excitation in, methods for determination of yield ratios for, 24:47684
isospin effects in (n,2n), (E/T), 23:7253
isospin effects in nucleon transfer, (E/T), 24:40702
isospin mixing in deuteron-induced, semidirect mechanism for, (T), 22:50667
isospin mixing in the giant dipole resonance of self-conjugate nuclei, (T), 24:35926
isospin mixing in, shell-model analysis of elastic and inelastic channel contribution to, (T), 23:44987
isospin purity of isobaric analog resonances in, with several open channels, (T), 21:31858
isospin selection rules for, review of, 21:17414
isospin selection rules in photon induced, violation of, (T), 23:25950
isospin selection rules in, effects of electromagnetic interaction on, (T), 21:13796(R) (ORO-2972-25)
isospin sum rule for photon-induced, (T), 23:40096
isospin sum rules for T splitting of giant resonance for photon-induced, on light mirror nuclei, 24:1882
isovector excitations in photon-induced, (T), 25:56827 (LYCEN-7104, S8.1-10)
Josephson effect in nucleon-transfer heavy-ion, (T), 25: 3752
K matrix for, properties of, (T), 25:12669
kinematic calculations for, simplified method of, (T), 23: 4041 (EUR-3908)
kinematic calculations of two-body, computer program for, in FORTRAN for IBM System/360 Model 75, (T) , 22:5870 (ORNL-4179)
kinematic crossover angles for, nonrelativistic, 23:10884
kinematic parameters for, computer program for relativistic calculations of, (T), 22:14070 (EUR-3668)
kinematical calculations for binary, construction of nomogram for, (T), 24:52729
kinematics at relativistic energies, (T), 22:37394
kinematics for proton-induced cascades at 660 MeV, (T), 22:22629
kinematics for two- and three-body final state, (T), 22: 26929(R) (COO-1420-139)
kinematics of high-energy, nomograms for, (T), 21: 17396
kinematics of nonrelativistic, crossover angles in, 23: 19024 (AD-672932)
kinematics of three-particle, spatial generalization of nomographs and their use in, (T), 25:36842
kinematics of, minimum chi-squared technique for peak fitting to, 24:22100
kinematics of, relativistic, (T), 23:42964 (UJV-2067-F)
kinetics of, computer program for converting angles in lab and center-of-mass systems for analyzing, 22: 16930 (INP-565/PL)
level densities of compound nuclei in slow neutron-induced, (T), 22:42091
level density and width in compound nucleus near 20-MeV excitation energy, (E/T), 22:30101
level density parameters in (α,n), mass dependence of, (E), 23:42881
level density parameters in, energy dependence of, (E/T) , 23:19266
lifetime of compound-nucleus, Monte Carlo calculation of effect on blocking dips of, 24:30952
localization of, for nuclear surface and charge distribution studies, (T), 23:11072
mass separation in complex, review on methods and equipment for, 24:14373
matrix elements for photodisintegration and direct-capture radiative tri-nucleon, 25:17990
matrix elements for shell-model studies of nuclear spectra, 21:5584
matrix elements for two- and three-particle, (T), 21: 17401
matrix elements for, arising from non-Hermiticity of Hamiltonian operator, (T), 25:39112
matrix elements for, calculation of, 21:5585
measurement of three-body, design of 4π scintillation spectrometer for kinematically complete, 25:42124
mechanism for 3-to-5-GeV, cascade model for N* production effects on, 25:25452 (JINR-P2-5546)
mechanism for, review of research at Physikalisches Staatsinstitut on, 22:48202(R) (BMwF-FBK-68-01)
mechanism of (α,2α), in a three-body formulation, (T), 24:52646 (LYCEN-7036)
mechanism of the (α,2α) breakup reaction in three-body formulation, (T), 24:52656
mechanisms for, research at University of Rochester Chemistry Dept. from May 1, 1968 to May 1, 1969, 23:42916(R) (UR-3591-10)
mechanisms for, research on, 22:1375(R) (BMwF-FBK-67-55)
mechanisms in polyatomic molecules, 21:30484
mechanisms in, analysis using direct-interaction Feynman diagrams, (T), 25:18028
mechanisms in, comparison of calculations using analysis of averaged cross sections and statistical fluctuations, (T), 25:15151
mechanisms in, conference on, (E/T), 25:39123
mechanisms of heavy-ion induced, angular momentum effects on, (T), 25:31356
mechanisms of, review on, (T), 22:20693
meson (π) production in electron inelastic scattering, (T) , 23:23775
meson (π) production with excitation of giant resonance analogs in photo-, (T), 24:11029
mesonic contributions to photo-, (T), 25:50825
method of complex coordinates for 3-body calculations above the breakup threshold, 24:15961
microscopic analysis of (He-3,t), with N = 28 even nuclei, 24:49702
microscopic description of (γ,pn), (T), 24:49940
model for direct transfer, 25:20522
model for high-energy, in solar flares, (T), 22:19731
model for, Hilbert space properties of interaction region, (T), 22:42101 (UCD-CNL-95)
models for analysis of, review on, 24:40661 (ANS-RPD-2, pp 1-25)
Mott—Schwinger polarization in (d,p), (T), 25:25843
multichannel theory of, Coulomb wave functions in, (T), 23:32972
mutual excitation and reorientation of target and projectile in Coulomb excitation, (T), 24:18459
network for production of light elements in supernovae, (T), 24:34990
neutrino emission from solar, (T), 21:43734
neutrino emission from, in dense stellar interiors, (T), 21:33106
neutron capture, channel coupling in resonance, (E/T), 23:44817
neutron cross sections for fissile nuclei, multilevel expansion for Kapur—Peierls parameters for, 24:6964
neutron elastic scattering by Hartree-Fock field, potential, (T), 22:29941 (IPNO/TH-118)
neutron elastic scattering by square-well potential, theory using solutions of time-dependent Schroedinger equation, (T), 22:12000
neutron emission and fission width ratios for heavy compound nuclei, (T), 22:14079 (UCRL-16348)
neutron evaporation in heavy-ion-induced, (T), 24:49884
neutron evaporation spectra in, description using fluctuations in Gibbs canonical ensemble, 24:38374
neutron evaporation, computer program for calculation of relative population of angular momentum states in, 23: 31053 (CSIR-282)
neutron production in stellar, (T), 21:3587
neutron reactions (n,α), (n,n'), and (n,p), computer program for calculating compound-nucleus cross sections and angular distributions for, 23:37283 (AD-682921)
neutron resonance parameters for A = 51 to 209 nuclei, systematics of, (E), 23:5854
neutron resonance parameters for I = $^1/_2$ and $^3/_2$ nuclei, spin systematics of s-wave, (E/T), 22:53166 (CEA-R-3385)
neutron single-particle energies in Saxon—Woods potential, (T), 23:19354
neutron spectroscopic factors for, graphs for evaluation from isobaric analog widths, 23:44995
neutron strength functions for even—even transuranium nuclei, calculations using strong-coupling deformed-nucleus model, (T), 23:21358
neutron strength functions in scattering length approximation, S-matrix s-wave, (T), 22:44760
neutron thresholds to analog resonance states in, anomalous energy behavior of, (T), 21:38426
neutron transfer in heavy-ion induced, Feynman diagram analysis of, (T), 23:37341
neutron transfer in heavy-ion-induced, Coulomb T-matrix theory of, 21:42706
neutron transfer in heavy-ion-induced, in the diffraction model, (T), 23:40120
neutron tunneling mechanism for, matrix elements for, (T), 25:31419
neutron tunneling theory for low-energy, (T), 22:22640
neutron tunnelling in heavy ion-induced, (T), 22:44773
nuclear Chew—Frautschi trajectory in, for Z = 1 to 20 nuclei, (T), 24:22215
nuclear data tables for charged-particle induced, on Z = 3 to 27 nuclei, 24:8847
nuclear data tables for charged-particle-induced, on Z = 28 to 99 nuclei, 24:3910
nuclear deformation in head-on, (T), 21:29969(R) (UCRL-17299)
nuclear energy levels in, effective single-particle, (T), 21: 7846
nuclear energy-level density for high angular momentum, (T), 21:1079(R) (PPAD-593-E)
nuclear energy-level widths in, partial and total, (T), 21: 5591
nuclear materials safeguards research with photo-induced, 24:39197 (WASH-1147, pp 145-52)
nuclear materials safeguards research with photo-induced, 24:39196 (WASH-1147, pp 135-43)
nuclear materials safeguards research with photon-induced, 24:31643(R) (GA-10106)
nuclear materials safeguards research with photon-induced, 24:31641(R) (GA-9871)

nuclear materials safeguards research with photon-induced, 24:31642(R) (GA-9943)
nuclear materials safeguards research with photon-induced, 25:21281(R) (GULF-RT-10459)
nuclear materials safeguards research with photon-induced, 25:57704 (GULF-RT-A-10826)
nuclear materials safeguards research with photon-induced, 25:48879(R) (GULF-RT-10697)
nuclear materials safeguards research with photon-induced, 25:23753(R) (GULF-RT-10511)
nuclear structure effects in, 24:20442
nucleon angular and energy distributions in photodisintegration of three-particle nuclei, (E/T), 21:2614
nucleon angular correlations from meson (π) absorption at low energy, (T), 21:46813
nucleon clusters in heavy-ion-induced, (T), 24:49754
nucleon elastic scattering by one-level nuclei, generalized Hartree—Fock approximation for, (T), 22:27252
nucleon emission in high-energy photo-, Monte Carlo calculations with secondary particle—particle interactions, (T), 23:1881 (ORNL-TM-2364)
nucleon inelastic scattering by nuclei near closed shells, effective nucleon—nucleon interaction for distorted-wave description of, (T), 23:1933 (TID-24733)
nucleon optical-model potentials for, dependence of nuclear symmetry parameters, (T), 21:44764
nucleon polarization in, (T), 21:17424
nucleon polarization in, symmetry defects in measurement of, (E), 25:38988(T) (LA-tr-71-39)
nucleon production in high-energy nucleon-induced, semiempirical formula for differential cross sections of secondary, (T), 23:23751 (JINR-P2-4306)
nucleon quasi-elastic knockout in high-energy electron-induced, (T), 25:10058 (ITF-70-38)
nucleon scattering at 90 to 310 MeV, optical potential calculations for central two-body force, (T), 22:50668
nucleon scattering in continuum region, RPA calculations with ground-state correlations for, (T), 23:9051
nucleon secondary production in high-energy, equations for double differential cross sections of, (T), 23:49448(T) (ORNL-tr-2203)
nucleon transfer in heavy-ion induced, macroscopic model for analysis of, (T), 25:12661
nucleon transport in proton induced, computer program for, 23:25941 (ORNL-TM-1866)
nucleon tunneling below Coulomb barrier in heavy ion-induced, (T), 22:50560(R) (RLO-1062-681)
nucleon tunneling through potential barrier in, (T), 21:46823
nucleon—nucleon scattering lengths from Watson-Migdal theory of final-state interactions in, (T), 22:35366 (ORNL-4217, pp 82-95)
nucleus recoil ranges from, track method for determination of, 24:11061
nucleus—nucleus scattering, nuclear-density distribution in, (T), 25:5835
nuclides from, stability of short-lived, 22:14525
nuclides produced in, use of mass spectrometers for measurement of isotopic ratios of short-lived, 21:36463
observation of multinucleon transfer, method for, 23:17103(R) (ANL-7481)
occurrence in living tissues, 22:28509
off-shell effects in knockout, calculation using impulse approximation and Faddeev equations, (T), 25:12670
optical model for, effect of source on, (T), 24:8922 (JINR-P4-4511)
optical potentials for, survey of, (T), 24:20419 (JAERI-1184, pp 39-48)
optical-model analysis of nucleon—nucleus interactions, (T), 22:20721
pairing modes in two-nucleon transfer, (T), 24:24649
parity invariance in, review of, 24:15616
parity violation in, weak-interaction Hamiltonian for, (T), 25:20039
parity-violating force in, method for measuring, (T), 25:53244
partial-wave analysis of compound-nucleus, (T), 24:15803
particle and photon decay following electroexcitation, (T), 23:42992
particle distribution from, Dalitz plot evaluation of, 24:45807
particle emission by highly excited compound nuclei with high angular momentum, successive, (E/T), 22:37376 (JINR-P4-3814)
particle emission in heavy ion-induced, Monte Carlo calculation for, (T), 23:19371
particle emission rates of highly excited nuclei, (T), 22:35368
particle energy distribution from finite target thickness, minimum, (T), 21:4361
particle energy distributions from, effects of small-angle scattering on, (T), 23:13333
particle energy spectra from three-body, with single final-state interaction, (T), 23:11050 (KHVL-102)
particle evaporation from compound nuclei, angular-momentum effects in, (T), 21:1079(R) (PPAD-593-E)
particle evaporation from excited compound nuclei in, computer programs for calculating, 23:23755 (ORNL-4379)
particle exchange in heavy ion scattering, (T), 21:19328
particle identification in, development of high-rate time-of-flight system for, 25:42066
particle polarization and spin correlations in, X-coefficients for, 25:59881
particle polarization in, computer program for calculating general tensor moments of, 21:34030 (ORNL-4125)
particle production in, methods for calculation of high-energy, (T), 25:56844
particle scattering by nuclei at high energy, theory using Dirac equation with optical potential, (T), 22:9920 (JINR-P4-3568)
particle spectra and radiochemical yields from, computer calculations of, 21:7824 (ORNL-TM-1538)
particle spectra from proton-induced, at 30 to 340 MeV, secondary, (E), 21:46815
particle spectra from sequented three-body breakup, analytic expressions for, (T), 23:23759
particle spectra from statistical analysis of, (T), 22:3782
particle weak interactions at low energies in, T violation in, 23:25579 (CERN-69-7, pp 495-528)
particle—gamma angular correlations from, system for measuring, 23:19200(R) (COO-1468-3)
particle—hole excitations with complete single-particle basis, (T), 23:4074
particle-γ angular correlations in, theory for, 24:40684
penetration of double barriers, 23:37347
phase shifts for unequal-mass, numerical studies of Bethe—Salpeter equation for, 23:32804
phase-band analysis for, 23:18835
phase-shift analysis of strong absorption, parameters for, (T), 23:40102
photodisintegration of three-particle nuclei, use of Majorana exchange forces in calculating, (T), 22:5902
photon scattering by nuclei, generalized formalism for, (T), 22:50687
photon scattering in single crystals, suppression of inelastic channel in, (E), 23:32943
photon-induced at low energies, calculations using single-particle wave functions with undefined parity on odd-A nuclei, (T), 22:48596
photon-induced, review of experimental data and theory for, 25:3715 (NBS-MON-118)
polarization effects and Regge poles in resonance, 21:17397
polarization effects for A = 3 and 4 systems in, review on, 25:53835
polarization effects for A = 5 systems in, review on, 25:53836
polarization effects in nucleon transfer, (T), 25:59831 (IFA-CRD-41)
polarization in diffraction scattering of spin-1/2 particles, Coulomb effects on, (T), 21:38396
polarization in elastic scattering of spin-1/2 particles at low energy, (T), 21:23560
polarization in elastic scattering of strongly absorbed spin-$^1/_2$ particles, (T), 21:21614
polarization in, relationship of analyzing power and asymmetry to, (T), 25:53845
polarization measurements for separation of compound and direct effects in, (T), 22:1718
polarization measurements in, bibliography of possible false asymmetries and corrections in, 24:14290 (LA-4235)
polarization of elastically scattered beams, average, (T), 22:42129
polarization of spin $^1/_2$ particles from, condition for production of, (T), 23:11062
polarization phenomena in, conference on, 25:53788
polarization phenomena in, conference on, (E/T), 25:39123
polarization phenomena in, contributions of Los Alamos Scientific Laboratory to conference on, 25:5507 (LA-4465)
polarization phenomena in, coordinate systems and conventions for, 25:53833
polarization phenomena in, relation to symmetry properties, 25:53831
polarization phenomena in, review of, 23:45013
polarization phenomena in, review on, 24:20451
polarization phenomena in, review on, 25:53832
polarization phenomena in, statistical analysis of, (T), 25:12699
polarization phenomena in, time reversal invariance in, 24:26675 (LA-4373)
polarization tensor moments for polarized beam—polarized target scattering, computer program for calculation of, 24:15972
polarizations for, S-matrix representation for polarized particles of arbitrary spin, (T), 25:12652
potential barrier penetration for diffuse Woods—Saxon potential with strong interaction, (T), 22:48621
potential in Hamiltonian formalism for, mathematical representation for hard core, 24:30873 (RT/FI-(69)39)
potential in, properties of discrete and continuous spectra of radial Dirac equation for, 23:40139
potential scattering using generalized R-matrix formalism, 22:9981
potentials at large distances for, for light nuclei, 21:27624
potentials for composite particles, optical-model, (T), 22:3801
potentials for deuteron and proton elastic scattering, optical-model, 21:46826
potentials for low-energy, optical-model, (T), 22:7778
potentials for nucleon elastic scattering, spin dependence of one-body, (T), 22:20772
potentials for, finite-difference solution of Schroedinger equation for axially symmetric single-particle, (T), 25:59839 (LA-4735)
production by highly concentrated electron beams, 25:5118(P)
production of anomalous abundances by, at stellar surfaces, (T), 21:46121
production of multiply charged fragments in high-energy, survey of, (E/T), 23:19329 (JINR-P2-4160)
production of superheavy elements by, problems in, 21:28025
production of superheavy nuclei by fusion of heavy ions, (T), 22:44712
products from chemo-, decontamination of, 22:6552
products from nonrelativistic, method for determining energy as function of angular distribution in lab system for, 22:16084
products from, helium-jet recoil transport method for, 23:43578
properties of breakup, with many-particle final states as evidence for nuclear cluster structure, 24:45806
properties of quasi-elastic knockout, as evidence for nuclear cluster structure, 24:45805
properties of single-nucleon transfer, on deformed nuclei, 25:56875
properties of transfer, methods for analysis of, 25:56823 (LYCEN-7104, C3.1-40)
proton elastic scattering with isobaric analog resonance excitation, determination of spectroscopic factors from, (T), 23:1950
proton evaporation in compound, analysis of effective Coulomb barrier for, (E/T), 25:46076
proton transfer in heavy ion-induced, below Coulomb barrier, (T), 22:42140
proton transfer in heavy ion-induced, potential-energy effects in, (E), 22:24880
proton widths of analog states in heavy nuclei, (T), 22:39702
Q-value for nuclei with A = 43 to 209, (E), 23:21328
Q-value for, (E), 23:21369
Q-values for nuclei with A = 142 to 145, evaluated data compilation on, (E), 22:3735
Q-values for stable and naturally occurring nuclei, tables of, 21:46824
Q-values for three-particle, tables of, (T), 22:24888 (BMwF-FBK-67-91)
Q-values for Z = 2 to 92 nuclei, 21:2601 (UCRL-16964)
Q-values for, effect of atomic charge on, (E/T), 23:23771
Q-values for, in radioactive series, 23:21366
Q-values for, method for measurements of, (E), 23:23771
Q-values for, tables of, (E/T), 22:3768
quasi-deuteron production by gamma radiation, 23:37296
quasi-elastic electron scattering by light nuclei, (T), 23:28336
quasi-free scattering processes in, review on, 24:52652
R matrix for, invariant imbedding techniques for analysis of variations of, 24:52721
R-matrix for, formulation from nuclear-structure considerations, (T), 24:11050
R-matrix for, variation of, (T), 24:3953(R) (ORNL-4433)
R-matrix theory for, inhomogeneous, (T), 22:42133
R-matrix theory in, invariant imbedding technique in, 24:15948 (ORNL-TM-2816)
R-matrix theory of, correspondence with theory of resonators and waveguides, (T), 22:18319
R-matrix theory of, extended, 23:47088
R-matrix theory of, extension of, (T), 22:50666
R-matrix theory of, using level-matrix inversion by rank annihilation, 21:44734 (IN-1098)
radioisotope production in charged-particle induced, method for cross-section measurement of positron-unstable, 25:20283
rates in stars, effects of excited nuclear states on, (E), 23:44040
rates in stellar surface layers, (T), 22:836
rates of, methods of calculating in high-density matter, (T), 21:31879
reaction-mechanism-independent particle-gamma correlation functions using polarized particles, (T), 24:11053
rearrangement mechanism of, exact N-body theory for, 25:28485
recoil angular and range distributions from compound-nucleus, (T), 21:46810
recoil angular and range distributions from compound-nucleus, (E), 21:46764
recoil angular distributions for (α,n), calculation using spin-dependent statistical theory, (T), 24:45833
recoil atoms from heavy-ion induced, electrostatic precipitators for collecting, 21:6362
recoil charge-state distributions from, research progress on, (E/T), 22:18122(R) (NYO-2771-25)
recoil collection system for, development of helium gas-flow, 23:21332(R) (ORO-3820-1)
recoil diffusion in sheets at high temperature, 21:34045
recoil motion in nucleon scattering, (T), 23:23776
recoil polarization in, effects of atomic quadrupole interactions on, (T), 23:1878(R) (NYO-2028-3)
relation between the 2l + 1 rule and channel correlation, 25:3762
relation of Treiman—Yang angle to azimuthal angle in knockout, (T), 25:25808
relaxation time in, review on, 24:20428 (JAERI-1184, pp 131-40)
research at Australian National University, 1969, 24:43119(R) (ANU-P-484)
research at Bonn Univ, 24:7642(R) (BMwF-FBK-69-36)
research at Carnegie-Mellon University, progress report on, 24:40573(R) (NYO-2897-41)
research at Hamburg Univ., 1968, (E/T), 24:30467(R) (BMBW-FBK-70-3)
research at ISOLDE project at CERN, 24:5421
research at Lyon Institute of Nuclear Physics in 1970, 25:56742(R) (LYCEN-7101)
research at Oak Ridge National Laboratory, report to Nuclear Cross Section Advisory Committee, 24:38101 (ORNL-TM-2998)
research at Princeton from April 1969 to April 1970, 24:38145(R) (PUC-937-378)
research at Rice Univ., 1969 to 1970, (E/T), 25:59692(R) (ORO-1316-99)
research at Saha Inst. of Nuclear Physics, summary of, 24:28845
research at Technische Hochschule, 1968 annual report, 24:8883(R) (BMwF-FBK-69-37)
research at University of Chicago during 1969, 24:26597(R) (COO-1167-9)
research at University of Maryland January through September 1969, (T), 24:3952(R) (ORO-3765-22)
research at Washington Univ., Sept. 1970 to Sept. 1971, (T), 25:41255(R) (RLO-1388-611)
research in nuclear chemistry, review on, 21:31778 (NAS-NRC/Pub-1292-C)
research in USSR, collection of abstracts on, 24:26582(T) (NP-tr-1872)

research on, 22:7346 (NYO-2028-2)
research on fast neutron-induced, at School of Chemistry of Georgia Institute of Technology, 24:6848(R) (ORO-3346-54)
research on heavy-ion induced, review on, 24:47680
research on high-energy excitations in, 24:40672(R) (RPI-3947-9)
research on high-energy, using nuclear recoil techniques, 21:7692
research on Linear Accelerator Project at Rensselaer Polytechnic Institute, 24:38148(R) (RPI-328-173)
research on multiparticle, survey of, 24:28828
research on neutron-induced, at Seibersdorf reactor center, 24:8892 (SGAE-G-14/1969)
research on photon-induced, survey of, 25:18022
research on polarized proton-induced, at Saclay, 25: 56688 (LYCEN-7104, S6.1-2)
research on proton-induced, at Rutherford PLA, summary of, 24:24520(R) (RHEL/R-187)
research on transfer, review of experimental, 25:53705
research on, 1968 Idaho Nuclear Corp, 23:26134(R) (IN-1218)
research on, on-line control by digital computers in, 23: 31052 (BMwF-FBK-68-50)
research program and progress using fast neutrons, (E), 22:9802(R) (NYO-1082-9)
research program at Tata Inst. of Fundamental Research, summary of, 24:28844
research program at Tata Inst., summary of, 24:28698
research program on fast neutron-induced, 21:27566 (INR-776/I/PL)
research program on photo-, with heavy fragment emission, (E), 22:39552 (RPI-328-123, pp 64-72)
research programs for studying, review of, 21:27467(R) (NP-16698)
research programs using elastic scattering, review of, 21: 19317
research progress at University of Texas during 1969, 24:22147(R) (ORO-2972-123)
research progress on charged-particle-induced, at low energy, (E), 22:14069(R) (COO-238-51)
research progress on three-body breakup, (E/T), 23: 15346(R) (ORO-1316-70)
research using electron linear accelerators, conference on, 25:38878 (JAERI-1205)
research using high-energy heavy-ion beams, developments in experimental techniques for, 24: 43501
research using polarized targets, (T), 21:10083
research using recoil range technique, survey of, (E/T), 22:32666 (KFK-693)
research using recoil spectrometry, (E), 22:18122(R) (NYO-2771-25)
research with low-energy accelerators, symposium on, 24:28746
research with polarized deuteron beams, projects for, 23: 44948 (ANU-P-440)
residual-nuclei spin determination in type A(x,yz)B, using polarized targets, (T), 22:5909
resonance averaging in, (T), 25:31450
resonance contributions to radiative transitions in, (T), 23:15515
resonance Doppler broadening in neutron-induced, (T), 22:32444
resonance in photo-, giant dipole, (E/T), 21:19326
resonance integrals in, method for calculation of neutron, (T), 23:42986
resonance interference effects in neutron-induced, calculations using two-level approximation, (T), 23: 8921
resonance interference in neutron scattering, (T), 22: 50657 (ANL-7467)
resonance parameter distributions for interfering resonances, (T), 23:15523
resonance parameter library for neutron-induced, formulas and formats for, 23:23598 (AEEW-R-621)
resonance parameters for a potential with strongly diffuse boundary, (T), 22:11982
resonance parameters for compound system in, effect of unitarity of collision matrix on, (T), 25:15171
resonance parameters for compound-nucleus, statistical inference of neutron strength function from, (T), 25: 46096 (JAERI-13559)
resonance parameters for strongly absorbed neutrons, average, (T), 23:1882 (WASH-1093)
resonance parameters for, statistical theory for determining, (T), 22:27246
resonance parameters in, graphical method for determining, (T), 25:17955 (JINR-E4-5456)
resonance phenomena in, model for analysis of, (T), 25: 59876
resonance phenomena in, theory of isobaric analog, (T), 23:31058 (MIT-2098-528)
resonance pole expansion of low-energy collision matrix, multichannel unitary, (T), 22:24920
resonance pole width and spacing distributions for neutron-induced, (T), 23:1882 (WASH-1093)
resonance production in, intermediate, 21:19310
resonance scattering amplitude using perturbation series for one-particle Green's function, 21:44749 (ZFK-122, pp 270-4)
resonance scattering, exactly soluble three-body model of, 25:9890
resonance spacings and widths in resonance-pole expansion of collision matrix, averages and distributions of, (T), 22:42117
resonance spin determination by γ—γ coincidence measurements, method for, (T), 23:4060
resonance states in, (T), 22:32705
resonance structure in neutron-induced subthreshold fission, intermediate, (T), 22:50659
resonance structure in, doorway-state theory of intermediate, (T), 22:50688
resonance widths in proton elastic scattering by nuclei of fixed spin, isobaric analog, (T), 22:27369
resonance widths in, generalized Porter—Thomas distribution for, (T), 24:13433
resonance, analog states from, (E), 21:25520
resonance, nonorthogonality of wave functions in, 21: 10120
resonances in (p,γ), particle—hole description of giant dipole and isobaric analog, (T), 23:15517
resonances in (p,nγ) reactions, isobaric analog, (E/T), 22:9939
resonances in continuum spectrum, analysis for quasi-bound states in, 24:30927
resonances in deformed nuclei, dynamic collective analysis of quadrupole giant, 21:10112
resonances in heavy nuclei, strong channel coupling interpretation of isobaric analog, (T), 23:7295
resonances in low-energy neutron- and proton-induced, analysis for level density parameters, (T), 22:27274
resonances in low-energy neutron-induced, with high angular momentum, (T), 22:32707
resonances in low-energy, survey of research on analog, 24:28749
resonances in neutron scattering by deformed even-even nuclei, intermediate, (T), 21:21596
resonances in neutron scattering, widths of intermediate, (T), 22:27372
resonances in neutron- and proton-induced, analysis for nuclear level density parameters, (T), 22:11986
resonances in neutron-induced, Doppler broadening of p-wave, (T), 22:32439
resonances in neutron-induced, statistical properties of resonance parameters for fissile nuclei, (T), 24:6963
resonances in neutron-induced, two-level resonance formula for, (T), 23:49390(T) (EURFNR-638)
resonances in nucleon scattering, intermediate, (T), 22: 50560(R) (KLO-1062-681)
resonances in proton elastic scattering, fine structure of isobaric analog, (T), 22:44777
resonances in proton scattering, model for analysis of fine structure of analog, (T), 22:35285(R) (AERE-PR/NP-13)
resonances in proton-induced, description of isobaric analog, (T), 23:9045
resonances in proton-induced, fine structure of isobaric analog, (T), 23:4085
resonances in proton-induced, isobaric analog, (T), 23: 19253(R) (ORO-2972-80)
resonances in slow neutron-induced, probability of unresolved, (T), 23:7356
resonances in, analysis of isobaric analog, (E/T), 22: 20729
resonances in, analysis of Lane equations for isobaric analog, (T), 25:5818
resonances in, analysis of wide near-threshold, (T), 23: 23789
resonances in, average total width of compound, (T), 23: 17146
resonances in, coupled-channel calculations using optical model potential with isospin coupling for analog, (T), 23:10936(R) (COO-535-591)
resonances in, damping widths for isobaric analog, (T), 22:37393
resonances in, description of isobaric analog, 23:32966
resonances in, description of isobaric analog, 24:38379
resonances in, description of isobaric analog, 24:43596
resonances in, dynamical restriction of strength functions for, (T), 24:43591
resonances in, dynamical theory of, (T), 23:19366
resonances in, effect of charge-dependent forces on isobaric analog, (T), 24:1911
resonances in, electromagnetic and weak excitation of, (T), 24:3964
resonances in, external mixing in isobaric analog, (T), 22:7780
resonances in, fine structure in isobaric analog, (T), 23: 32962
resonances in, fine-structure analysis of isobaric analog, 25:10073
resonances in, giant and isobaric spin, (T), 21:25605
resonances in, hydrodynamic-model analysis of giant, (T), 24:18460
resonances in, K-matrix formalism for isobaric analog, (T), 24:11045
resonances in, K-matrix theory of, 21:40510
resonances in, microscopic theories of isobaric analog, (T), 24:38364
resonances in, optical-model formalism for giant, (T), 23:47084
resonances in, partial width correlations for doorway-state, (T), 25:39096
resonances in, phenomenological theory of analog, (T), 23:9054
resonances in, prediction of missing, 21:40488
resonances in, reduced widths from isobaric analog, (T), 25:15201
resonances in, resonance rescattering description of fine structure in isobaric analog, (T), 23:11048 (ITEF-625)
resonances in, review of research on isobaric analog, 24: 24653
resonances in, review of theory for giant dipole, 23: 37317
resonances in, S-matrix description of asymmetry of isobaric analog, (T), 23:47068
resonances in, shell-model description of fine structure of, (T), 24:24654
resonances in, shell-model description of structure of isobaric analog, (T), 24:15952
resonances in, single-particle resonant-state wave functions for isobaric analog, (T), 24:24625
resonances in, statistical calculation of density of doorway-state, (T), 25:43991
resonances in, superposition of interference maxima for giant, 24:38331
resonances in, survey of research on isobaric analog, 24: 40665 (CONF-691208-(Vol.1), pp 3-12)
resonances in, tensoral formulation of multi-level, multi-channel formula for, (T), 25:28454 (RT/FI-(70)38)
resonances in, threshold and penetration factors in parametrization of, (T), 22:27349
resonances in, unitarity constraints for multiple, (T), 25: 12643
resonances in, use of resonant state wave functions in description of isobaric analog, (T), 24:38311
resonances in, widths of isobaric analog, (T), 25:18029
resonant states in, probabilistic interpretation of expansion coefficients for, (T), 25:17966
review of meson (π)-induced, (E), 23:19141 (RHEL/R-166, pp 91-100)
review of stellar, (T), 22:19728
review on neutron capture, (E/T), 22:53236
review on photon-induced, 25:39064 (JAERI-1205, pp 1-11)
S' state in (He-3,d) and (t,d) stripping, (T), 23:28340
S-matrix analysis of channels like carbon-12 (α,n), determination of absolute parities by, (T), 25:53852
S-matrix analysis of, removal of ambiguous solutions in, (T), 25:41260
S-matrix for, 24:5460
S-matrix for resonance, sum rules for pole-residue matrices of, 22:1720
S-matrix for system of coupled square wells, Kapur—Peierls dispersion theory for calculation of, 25:15181
S-matrix for, cluster decomposition of, (T), 24:5448
S-matrix for, comparison of eigenchannel and R-matrix methods for calculating, (T), 22:37385
S-matrix for, Regge trajectories for Coulomb, 23:19015
S-matrix theory for, with orthogonal initial and final-state wave functions, 24:18465
S-matrix theory of resonance, channel transmission coefficients and resonance parameters in, (T), 22: 20765
S-matrix theory of resonance, lectures on, (T), 22:9943
S-matrix theory of resonance, lectures on, (T), 22:9942
scattering amplitude at high energy, impact-parameter representation for, (T), 22:53240
scattering amplitude for proton elastic scattering with isobaric analog resonance excitation, (T), 22:7690 (JINR-E2-3551)
scattering amplitude for, Euclidean expansion of, (T), 22:35407
scattering amplitudes for high-energy large-angle, Glauber formalism for, 23:15503
scattering amplitudes for inelastic, calculations using statistical collision matrix, (T), 22:9969
scattering amplitudes for spin-1/2 particles on spinless nuclei in presence of three-particle channel, (T), 22: 35409
scattering amplitudes for, non-relativistic crossed partial-wave expansion for, (T), 23:19380
scattering amplitudes in, angular momentum dependence of off-shell partial-wave, (E), 22:3760
scattering and reaction amplitudes, use of resonant states in eigenfunction expansion of, 22:16068
scattering by thin targets, energy spread of Gaussian-distributed beam in, (T), 25:10086
scattering chamber for studying three-body, design and fabrication of, 21:4714
scattering facility for 50-MeV proton, design study for large-angle, 21:26292
scattering in the two-particle RPA, 24:38355
scattering in three-particle, determination of parameters of two-particle resonance, (T), 25:36837
scattering length for resonant and nonresonant, generalized expression for, 21:42714
scattering matrix elements for, with three-particle channels, (T), 22:14098
scattering theory for, with three outgoing particles, (T), 22:48630
scattering transformation T-matrix for neutron-induced, explicit forms for, (T), 23:17052
schematic theory of, extension to isospin formalism and isobaric analog resonances, 25:28492
Schroedinger equation model for 4-nucleon, coupled channel, 25:17971
second-order effects in the Coulomb excitations of doubly even nuclei, 24:13396
selection rules for, calculations using translation-invariant shell model with nucleon correlations, (T), 23:21376 (ZFK-130, pp 58-69)
separable potentials using resonant states, 24:15968
shell effects in (n,2n), (T), 24:18455
shell-model analysis of, effect of short-range correlations in, (T), 24:15992
shell-model approach to analog resonances in an isospin basis, 24:15966
shell-model description of deuteron-induced, treatment of two-particle continuum states in, (T), 25:34179
shell-model method for calculating the splitting of resonance multiplets, 22:30091
single-particle limit for partial widths, 24:13399
spectra analysis of, computer program for automatic pulse-height, 21:14455
spectra from compound-nucleus, explanation of differences between observed and evaporation, (T), 25: 31403
spectroscopic analysis of stripping into resonance states, (T), 25:18017
spectroscopic factors and single-particle overlap functions for, exact equations for relating, (T), 23:13340
spectroscopic factors for neutron scattering, (T), 22: 27272
spectroscopic factors for one-nucleon transfer, model calculation using particle number conservation, (T), 25:39097
spectroscopic factors for single-particle transfer, calculation in SU(3) scheme, (T), 24:3962
spectroscopic factors for two-particle transfer, (T), 23: 9056
spectroscopic factors from deuteron stripping, (T), 23: 5964
spectroscopy of single-nucleon transfer, survey on, 24: 43594
spectroscopy of transfer, sum rule methods for, 23: 37353
spectroscopy of transfer, survey of problems in, 23: 37285 (CEA-CONF-1261)

spectroscopy of, review of, 21:40484
spin cutoff parameters for (n,2n), evaluation of, (E/T), 23:15419
spin cutoff parameters for neutron capture, energy dependence of, (E/T), 22:48498
spin fractionation in decay of highly excited compound nuclei, (E), 22:37316(R) (UR-3591-9)
spin selection rule for, 2I + 1, (T), 22:27366
spin structure of 1 + 1 → 0 + 0, M-matrix formalism for, (T), 22:50660
statistical equilibrium for, at high temperatures and densities, (T), 23:41786
statistical theory of, averaging procedures for overlapping resonances in, 24:1894
statistical theory of, review, (T), 22:22652
strength functions for neutron-induced, R-matrix and S-matrix, (T), 22:44759
strong second-order processes in (p,t), with deformed nuclei, (T), 25:18015
structure amplitude tables for (α,d), (T), 23:11052 (UCRL-18270)
structure of, M-matrix formalism for nondynamical, 21:13742
studies at Heidelberg tandem accelerator, 24:20340 (JAERI-1184, pp 19-24)
studies in upper atmosphere, low-energy, (E), 22:15411 (NP-17106)
studies using tandem accelerators, conference on, 24:20382 (JAERI-1184)
sum rules for electron inelastic scattering, (T), 23:9010 (TID-24667, pp 155-66)
sum rules for, (T), 23:19347
surface effects in high-energy photon and electron-induced, (T), 24:3983
survey of (n,z), 24:28713
survey of high-energy, with heavy nuclei, 21:19297
survey of neutron-induced, 23:49301
symmetry for isospin multiplet production in, theorem for, 25:36844
systematics of two-neutron transfer, analysis using pairing vibrational model, (T), 24:24650
T matrix corresponding to sum of Coulomb and separable potentials for, expansion of O(4) harmonics for off-shell, (T), 25:53830
t-matrix for, approximately separable off-energy-shell, 21:42458
T-matrix for, off-energy-shell continuation of two-nucleon, (T), 24:6965
tables for activation analysis, 21:27927
tables of structure amplitudes for (p,He-3), (T), 23:34808 (UCRL-18269)
tables of thresholds for, (E), 25:20237 (UCRL-50400(Vol.9))
tabulation of resonance, for CTR use, 25:7417 (ORNL-TM-3233)
temperature dependence of neutron resonance profiles, (T), 21:27647
tensor force in charge exchange, role of, (T), 24:3908
tensor force in charge-exchange and knock-out, formalism of two-body, 25:20508
theories of, review, (T), 22:16095
theory, 21:27317 (MIT-2098-299, pp 83-115)
theory and detection of doorway states in, (T), 23:7333
theory for compound nucleus, role of angular momentum and isobaric spin in tests of independence hypothesis for, (T), 25:59830 (CU-1019-82)
theory for deformed nuclei, using shell model, 22:3616
theory for doorway state formation in neutron-induced, (T), 22:46848
theory for elastic, resonances in, 21:13897 (NP-16431)
theory for electron elastic and inelastic scattering, eigenchannel formalism for, (T), 22:35375
theory for isobaric analog resonances and continuum states produced in, shell model approach to, 24:24676
theory for light nuclei, conference on, 23:25781
theory for light nuclei, conference on, 23:25789
theory for light nuclei, effects of Pauli principle on, (T), 25:50821
theory for meson (μ) capture, Migdal formalism for, (T), 22:48625
theory for p-shell nuclei, using cluster model, (T), 23:25964
theory for population of ground-state rotational states, validity of statistical, (T), 22:39710
theory for proton elastic scattering by A less than or equal to 31 nuclei, testing of, (E/T), 22:32513(R) (ANU-P-400)
theory for quasi-free scattering, 21:17185
theory for resonance, S-matrix for complex angular momentum, 23:25711
theory for shell model calculations for bound and resonance states in, 21:30048
theory for single-particle states, using distorted-wave t-matrix approximation, (T), 22:20723
theory for weak, analogy with elementary particle interactions in, 22:18314
theory for, analogies in statistical and communication, 24:24675
theory for, computer program for parameters in, (T), 25:48116 (ORO-2972-196)
theory for, conservation laws for Bethe—Salpeter equation in, 22:5877
theory for, differential equation method for nonrelativistic Feynman amplitude in, 25:10065
theory for, Lippmann—Schwinger and Faddeev equations for three-body systems in many-body, 24:24677
theory for, non-Hermitian Hamiltonians in, (T), 22:35403
theory for, research at University of Maryland, 25:12639(R) (ORO-3765-28)
theory for, review on many-body, 24:8954
theory including shell-model conditions and particle correlations, unified, (T), 25:50852
theory of (α,xn), statistical model formalism for, (T), 23:31071
theory of (d,p), behavior of partial-wave amplitudes in, 24:3985
theory of (d,p), validity of DWBA in, 24:43572
theory of (d,p), validity of DWBA in, 24:3869
theory of (d,pn), Gell-Mann—Goldberger relation for, (T), 23:7341
theory of (γ,np), formulation using Majorana exchange forces, (T), 23:13317
theory of (n,p) and (n,np), statistical, (E/T), 22:22561(T) (ORNL-tr-1850)
theory of (p,2p), comparison of diproton model and kinetic energy approximation in, (T), 23:25976
theory of (p,t) transfer, role of inelastic processes in, 23:52172 (UCRL-18667, pp 133-67)
theory of (t,p) stripping, effects of neutron—neutron interaction on calculated cross sections in, (T), 25:48122
theory of 50 MeV (p,2p), angular correlations in distorted wave, 23:52179
theory of alpha elastic scattering, optical-model potentials for, (T), 23:5957
theory of analog resonances with description of intermediate resonances by shell model, unified, (T), 23:5946(R) (ORO-3765-1)
theory of analog state resonances in, using K-matrix formulation of shell-model, (T), 23:5970
theory of angular momentum in inelastic scattering, formalism using diagram technique, (T), 22:14076 (LYCEN-6743)
theory of antisymmetric scattering, research progress on, (T), 22:50560(R) (RLO-1062-681)
theory of boson-broadened photo-, in light nuclei, (T), 21:31846
theory of breakup effects on elastic scattering of composite particles, (T), 22:42116
theory of breakup of few-nucleon systems, spectator poles in, (E), 22:20769
theory of channel coupling in, 21:38377(R) (PUC-937-260)
theory of channel coupling in, (T), 21:42722
theory of channel probabilities in, 21:40490
theory of charge-exchange, in $1f_7/_2$-shell nuclei, 21:40474(R) (RLO-1062-675)
theory of charged-particle scattering, Regge-pole representation of Coulomb S-matrix for, (T), 23:7335
theory of charged-particle-induced fission, interpretation of fission-fragment angular distributions in, (T), 23:25944
theory of complex, research progress on statistical, (T), 23:5946(R) (ORO-3765-1)
theory of composite particle scattering, (T), 23:10936(R) (COO-535-591)
theory of compound, 25:18021
theory of compound and intermediate resonances in, unified, (T), 23:7330 (KFKI-28/1968)
theory of compound and precompound particle decay in (n,p), (T), 22:24835(R) (BARC-305)
theory of compound, refinement of 2I + 1 rule in, (T), 23:40100
theory of compound, review of microscopic, (T), 23:23774
theory of compound-nucleus, perturbation of Porter-Thomas distribution by interactions odd under time reversal, (T), 22:27375
theory of compound-nucleus, review of, (T), 22:20761
theory of core polarization effects in shell-model formalism for proton inelastic scattering, (T), 22:27270
theory of Coulomb disintegration, 21:10092
theory of Coulomb excitation, quantum mechanical effects on γ angular correlations in, (T), 23:23805
theory of Coulomb polarization of closed-shell nuclei, (T), 22:27343
theory of Coulomb scattering, 21:19291 (AD-637003)
theory of coupling between discrete states through continuum channels, zero-range coupled-channel model for projected K-matrix, (T), 23:13337
theory of deuteron breakup, model for, 25:17964
theory of deuteron inelastic diffraction scattering, phase-shift rule in, (T), 23:13332
theory of deuteron interactions with nuclei at high energy, (T), 22:32668(T) (ORNL-tr-1907)
theory of deuteron production in high-energy proton-induced, (T), 22:30048(R) (PUC-937-307)
theory of deuteron stripping, analog resonant effects in, 24:43578
theory of deuteron stripping, analysis of BHMM, 24:15949 (UJV-2261-F)
theory of deuteron stripping, below the Coulomb barrier, 24:43573
theory of deuteron stripping, effect of repulsive core in DWBA approximation, (T), 23:13334
theory of deuteron stripping, validity of BHMM method in, 24:8962
theory of deuteron stripping, validity of sudden approximation in, 24:40683
theory of deuteron-induced, three-body, 21:31877
theory of dispersion effects in high-energy electron scattering, (T), 22:20698
theory of doorway states in, 24:1874
theory of double charge exchange, on light nuclei, 25:43962
theory of elastic scattering at medium energies, using diffraction model, 21:40468 (LYCEN-6729)
theory of elastic scattering of polarized spin-1/2 and -1 particles, using spin-orbit coupling, (T), 22:7742 (LYCEN-6752)
theory of elastic scattering of spin-$^1/_2$ particles on spin-$^1/_2$ targets, using spin-orbit, spin-spin, and tensor forces, 21:40432 (WASH-1074)
theory of elastic scattering, using diffraction model with surface absorption, (T), 22:14112
theory of elastic scattering, using time-dependent wave formalism, (T), 22:3772
theory of electric and magnetic polarization in, review of, (T), 23:40093 (KURRI-TR-12, pp 18-26)
theory of electron elastic scattering, effect of proton charge halo in, (T), 23:25912
theory of electron inelastic scattering, partial-wave, (T), 23:9012 (TID-24667, pp 181-5)
theory of electron quasielastic scattering, 21:23535 (ISS-66/44)
theory of electron scattering, lectures on, (T), 22:53221 (NRL-6729)
theory of electron-induced, modification of Goldhaber—Teller model in, (T), 23:28331
theory of exchange terms in microscopic DWBA formalism for proton inelastic scattering, (T), 22:32697
theory of excitation effects on Coulomb scattering, (T), 22:27342
theory of giant dipole resonances in photon-induced, 21:40432 (WASH-1074)
theory of giant quadrupole resonance in deformed nuclei, (T), 21:2773
theory of giant resonances and doorway states, 21:44790
theory of giant resonances in spherical nuclei, collective treatment of, 21:23572
theory of heavy ion scattering, research progress on, (T), 23:1928 (AD-671692)
theory of heavy ion scattering, statistical formalism using nuclear matter calculations, (T), 22:50674
theory of heavy ion-induced compound-nucleus, review of, (T), 23:11069
theory of heavy ion-induced particle transfer, using Feynman diagram techniques, (T), 22:9965
theory of heavy ion-induced transfer, research progress on, (T), 23:1928 (AD-671692)
theory of heavy ion-induced, review of, (T), 22:48629
theory of heavy ion-induced, statistical, (T), 22:53114
theory of heavy ion-induced, using finite-range distorted-wave Born approximation, (T), 22:26880
theory of heavy-ion induced, time-dependence of Coulomb distortions in, 23:44919
theory of heavy-ion transfer, diffraction model for, (T), 23:21268 (ZFK-130, pp 168-9)
theory of heavy-ion transfer, formulation using Glauber approximation, 24:6954
theory of heavy-ion, Josephson current in, 25:48124
theory of heavy-ion, multiple-pair transfer in, 25:48123
theory of heavy-ion-induced, 24:49881
theory of high-energy, 23:19336 (RHEL/R-166, pp 41-65)
theory of high-energy fragmentation, effect of phase-space volume in, (T), 23:28346
theory of high-energy nucleon multiple scattering, formulation using impact parameter approximation and phase-shift expansions, (T), 23:11051 (MIT-2098-495)
theory of high-energy photo-, (T), 23:21394
theory of high-energy scattering of strongly interacting composite particles, formulation using geometrical optics, (T), 22:48610
theory of high-energy, conference on, 23:19332 (RHEL/R-166)
theory of high-energy, review of, (T), 22:16090
theory of high-energy, statistical equilibrium of excited nuclei in, (T), 22:14107
theory of inelastic scattering, 21:40473(R) (PR-P-74)
theory of inelastic scattering of strongly absorbed spin-$^1/_2$ particles by spin-0 targets, (T), 22:7750
theory of inelastic scattering, coupled-channel formalism using microscopic nuclear models, (T), 22:44788
theory of inelastic scattering, exchange and microscopic formalism for, (T), 22:35293(R) (ORNL-4230)
theory of inelastic scattering, lectures on, 21:40475 (UCRL-17503)
theory of inelastic scattering, tensor force in, 21:40474(R) (RLO-1062-675)
theory of inelastic scattering, total cross section formula in, (T), 23:31086
theory of interference between prompt and delayed mechanisms, 21:38391
theory of intermediate resonances in, 21:23552
theory of intermediate resonances in, statistical, 21:15631
theory of intermediate states in, using Izumo model, (E/T), 23:19169
theory of intermediate structure in, shell-model formalism for, (T), 22:24896 (LA-DC-8192)
theory of intermediate structure in, with core excitation in residual nuclei, (T), 22:27373
theory of inverse photo-, 24:20429 (JAERI-1184, pp 146-9)
theory of ion—ion collisions, dynamical barrier in statistical, (T), 23:17139
theory of isobaric analog resonances in, 21:1150
theory of isobaric analog resonances in, 21:38414
theory of isobaric analog resonances in proton-induced, 21:27631
theory of isobaric analog resonances in proton-induced, 21:27632
theory of isobaric analog resonances in, (T), 22:7762
theory of j-forbidden, 21:19329
theory of low-energy (n,p), for nuclei near A = 45 and 90, statistical, (T), 22:20677 (UCRL-50359)
theory of low-energy proton and deuteron inelastic scattering, quadrangle graph technique for, (T), 23:19373
theory of low-energy scattering, using partial-wave description with local potentials, 21:40466 (JINR-P4-3354)
theory of low-energy, scattering-amplitude, 24:37588
theory of meson (K^-) capture, review of, 23:19339 (RHEL/R-166, pp 129-40)
theory of meson (π)-induced, review of, (T), 23:19338 (RHEL/R-166, pp 103-19)
theory of meson-induced, Foldy transformation in, (T), 23:28330
theory of monopole and quadrupole excitations in electron inelastic scattering at low momentum transfer, (T), 22:42115
theory of multi-channel, refined cluster model for, 24:45809
theory of multichannel and multilevel distributions of reduced-width amplitudes, 21:40487
theory of multichannel scattering and threshold effects, lectures on, (T), 22:9941

theory of multichannel scattering, effective-range, 21:34065
theory of multiparticle transfer, using tetragonal graphs, 25:43961
theory of neutron activation at 24 MeV, testing statistical, (E/T), 21:10093
theory of neutron capture, review of, (T), 23:34806 (ANL-7282, pp 417-25)
theory of neutron capture, review on mechanisms in, 24:47679
theory of neutron capture, survey of, 23:25943 (RT/FI-(68)55)
theory of neutron inelastic scattering, 21:42614(R) (ORO-2791-26)
theory of neutron inelastic scattering, testing of Griffin formalism for, (T), 23:13305(R) (COO-1573-48)
theory of neutron, with nucleus-plus-one-neutron systems, (T), 25:34155 (ITF-70-97-P)
theory of neutron-induced disintegration, Yukawa potential for, (T), 23:37311
theory of neutron-induced fission, effect of optical-model parameters on channel formalism for, (T), 23:9048
theory of neutron-induced, applications in reactor physics calculations, 23:52171(T) (JPRS-48331, pp 74-81)
theory of neutron-induced, lectures on, 25:7883 (BARC/I-36)
theory of neutron-induced, model for comparison of Hauser-Feshbach and Moldauer, (T), 22:44775
theory of neutron-induced, review of, 21:40482
theory of neutron-induced, review of, (T), 22:27393
theory of nuclear flattening in head-on collisions, (T), 22:27340
theory of nucleon capture by collective and direct mechanisms, (T), 22:37340(R) (EANDC(E)-89(U))
theory of nucleon ineleastic scattering, formulation using second-quantization with core polarization, (T), 23:23758
theory of nucleon scattering at low energy, shell-model formalism for intermediate resonances, 21:31851
theory of nucleon scattering, effects of exchange and Pauli principle in, (T), 23:19365
theory of nucleon scattering, effects of exchange and Pauli principle in, 21:23540 (MIT-2098-302)
theory of nucleon scattering, effects of exchange and Pauli principle in, (T), 22:5896
theory of nucleon scattering, eigenchannel formalism for, (T), 23:23791
theory of nucleon scattering, formalism using random phase approximation, (T), 22:37388
theory of nucleon scattering, Lippman—Schwinger equation in shell-model formalism for, (T), 23:19390
theory of nucleon scattering, non-relativistic crossed partial-wave expansion for, (T), 23:19381
theory of nucleon-cluster substitution, in p-shell nuclei, 21:40497
theory of nucleus—nucleus scattering at high energy, (T), 23:7344
theory of nucleus—nucleus, Pauli principle in, 25:56829 (LYCEN-7104, S12.1-4)
theory of one- and two-nucleon transfer, generalized diffraction model for evaluating amplitude in distorted-wave Born approximation in, 23:44998
theory of one-nucleon transfer, using DWBA and adiabatic approximation with collective excitations, (T), 23:23661
theory of overlapping resonances in, unified, 21:38412
theory of particle and cluster transfer in 1p-shell nuclei, fractional parentage coefficients for, (T), 23:5946(R) (ORO-3765-1)
theory of photo-, A/sup -1/6/ dependence of giant dipole resonance in, (T), 22:50673
theory of photo-, lectures on, (T), 22:53221 (NRL-6729)
theory of photo-, research program on unified, (T), 23:1882 (WASH-1093)
theory of photo-, review of, (T), 23:9035 (TID-24667, pp 485-94)
theory of photo-induced, cascade model in, 24:5441 (JINR-P2-4661)
theory of photoinduced, review of, 23:42977
theory of photon scattering, Cabibbo—Radicati sum rule for, (T), 23:32971
theory of photon-induced, modification of Goldhaber—Teller model in, (T), 23:28331
theory of polarization in quasielastic scattering with excitation of isobaric analog states, (T), 22:24899
theory of polarization phenomena in deuteron stripping, DWBA, (T), 22:27352
theory of potential restoration by Coulomb scattering phases, (T), 22:1721
theory of precompound and compound particle emission in, using exciton model, (T), 22:32731
theory of proton inelastic scattering with excitation of non-normal-parity states, (T), 22:22576
theory of proton inelastic scattering, finite-nucleus G-matrix formalism for, (T), 23:23794
theory of proton inelastic scattering, using deformed spin-dependent optical-model potential, (T), 22:22639
theory of proton radiative capture from analog states, (T), 22:7661(R) (NYO-3525-26)
theory of quadrupole radiative capture, direct mechanism in, (T), 23:25942 (RT/FI-(68)50)
theory of quantal effects in multiple Coulomb excitation, coupled-channel formalism for, (T), 22:27260
theory of quasi-elastic charge-exchange, (T), 22:7757
theory of quasi-elastic scattering, impulse approximation in, 24:3986
theory of quasi-three-body, nonlocal t-matrix formalism for, (T), 22:50696
theory of quasielastic scattering, 21:34031(R) (ORO-2915-79)
theory of radiative capture in heavy nuclei, statistical, 21:42703
theory of radiative capture, quadrupole interaction in, (T), 23:32970
theory of radiative muon capture, using Nilsson model or shell model, (T), 23:4071
theory of rearrangement, channel equations for, 21:5570
theory of rearrangement, coupled-channel formalism for, (T), 22:30057
theory of rearrangement, for light closed-shell nuclei, 21:38400
theory of rearrangement, formulation with symmetrization of interactions using generalized Fourier transformations, (T), 22:24897 (LYCEN-6784)
theory of rearrangement, Pauli exclusion principle in unified, (T), 22:35374
theory of rearrangement, symmetrization of entrance and exit channels for, 21:25582
theory of rearrangement, using impulse approximation, 21:38407
theory of rearrangement, using multichannel coupling method, 21:34025 (JINR-P4-3300)
theory of resonance scattering by central potential with decaying states, (T), 22:27345
theory of resonance scattering, exactly soluble model for, (T), 23:21391
theory of resonance scattering, lectures on, (T), 22:9944
theory of resonance, conference on, (T), 23:19319 (AERE-R-5744)
theory of resonance, lectures on, (T), 22:9949
theory of resonance, lectures on, (T), 22:48624
theory of resonance, optimization of cross section formula for, (T), 23:31072
theory of resonance, review of line broadening in, (T), 25:59847
theory of resonances and virtual states in, (T), 22:44758
theory of resonances in, using coupled-channel formalism, 21:38413
theory of resonant γ scattering, suppression of inelastic channel, (T), 23:23738
theory of resonant, modified—Fano and K-matrix approaches to, 25:23094
theory of scattering using Akhieser—Pomeranchuk—Blair model, 21:40483
theory of scattering with rearrangement, unified, (T), 22:22626
theory of scattering, description using optical model, (T), 23:25977
theory of scattering, distorted cluster states in, 21:19332
theory of scattering, time-dependent formalism for, 21:38394
theory of scattering, using impulse approximation with unitary modifications, 21:46819
theory of scattering, variational bounds in, 21:13918
theory of scattering, with nonlocal factorizing potential, 21:40464 (JINR-P2-3404)
theory of single-channel resonance scattering, (T), 23:25975
theory of single-channel scattering, relation between transmission coefficient and average resonance widths in, (T), 23:25945
theory of slow neutron-induced, algorithm for inversion of level matrix for multilevel, (T), 23:7281(R) (ORNL-4280)
theory of slow neutron-induced, with radiative channels, (E), 23:4081
theory of spallation, evaporation, (T), 23:19384
theory of spin-1 particle polarization in scattering, (T), 21:46800
theory of spin-orbit interaction in nucleon radiative capture, (E), 22:9977
theory of strong absorption and direct effects in compound-nucleus, (T), 22:27374
theory of superfluid nucleus collisions, Josephson effect in, 25:46112
theory of three-particle stripping, coupled-channel formalism using adiabatic approximation, (T), 23:17129
theory of transfer, analysis of structure factors in, 23:52185
theory of transfer, modified DWBA method for deformed nuclei, (T), 23:25952
theory of transfer, review on, 25:53842
theory of transfer, three-particle model for, (T), 23:5955
theory of transfer-type, (T), 22:7768
theory of two-neutron transfer, formation using strong-coupling rotational model, 23:52188
theory of two-nucleon stripping, including Coulomb distortion and finite-range effects, 25:43965
theory of two-nucleon transfer, in distorted-wave Born approximation, (T), 23:15492 (IKF-19)
theory of two-nucleon transfer, parity mixing in single-particle wave functions in, (T), 23:31064
theory of two-nucleon transfer, survey of microscopic and macroscopic approaches to, 24:43595
theory of two-nucleon transfer, using Nilsson model for deformed nuclei, (T), 23:19331 (PUC-937-341)
theory of two-nucleon, formalism of Lippmann—Schwinger equation for, (T), 23:40156
theory of two-particle transfer, using two-level model, (T), 22:27358
theory of, analog resonance modulation of fine structure in doorway states, 21:19330
theory of, asymptotic channel states and matrix equations in unified, (T), 22:30053
theory of, cluster representation formalism for dynamical, (T), 23:23806
theory of, comparison of R-matrix, 25:31442
theory of, coupled-channel formalism for bound states, 21:19333
theory of, coupled-channel formalism for unified, (T), 22:32684
theory of, coupled-channel formalism for, (T), 22:50560(R) (RLO-1062-681)
theory of, derivation of DWBA in shell-model, (T), 22:5895
theory of, extension of Sasakawa method to, 24:15965
theory of, factorization methods in coupled-channel, 24:49947
theory of, Faddeev-like method for unified reaction formulation with two particles in the continuum in shell-model, 24:40715
theory of, for analysis of atomic collisions, (T), 21:37166
theory of, formalism for, 21:5575
theory of, formalism using cluster model, (T), 22:14068 (BMwF-FBK-67-82)
theory of, formalism using cluster model, (T), 22:14067(R) (BMwF-FBK-67-81)
theory of, formalism using K matrix, 22:3758
theory of, formalism using relativistic harmonic oscillator group, (T), 23:23802
theory of, formalism using shell-model basis, 24:11043
theory of, formulation using invariant imbedding techniques, (T), 23:7281(R) (ORNL-4280)
theory of, general formalism for, 21:2786
theory of, graphical approach to, (T), 22:27347
theory of, in Coulomb field, 21:9951
theory of, isospin formalism for, (T), 22:9937
theory of, K-matrix formalism for, (T), 23:31083
theory of, lectures on unified, 22:48623
theory of, lectures on, (T), 23:11043 (ANU-P-382)
theory of, lectures on, (T), 22:16058 (MATSCIENCE-57)
theory of, localization of composite projectiles in many-body, (T), 22:53241
theory of, many-body calculations using the K-matrix in, 24:11034
theory of, many-body, (T), 22:27255
theory of, model calculations in unified, 21:40462 (COO-1573-20)
theory of, multichannel Schroedinger equation with nonlocal potential in, 24:5451
theory of, normalization of Gamow functions in, 25:18011
theory of, quasiparticle formalism for, (T), 22:37397
theory of, research progress on unified, (T), 23:5946(R) (ORO-3765-1)
theory of, review, 21:44741 (ZFK-122, pp 28-50)
theory of, review of new developments in, (T), 22:11978 (HMI-B-51)
theory of, review of shell-model formalism for, 23:11070
theory of, second-quantized density matrix formalism in, (T), 23:32969
theory of, shell-model, 21:44742 (ZFK-122, pp 51-5)
theory of, shell-model formalism for, (T), 23:13323
theory of, shell-model formalism using truncated Hilbert space, (T), 23:7343
theory of, simplifications to formulation of radiative three-nucleon interactions for, (T), 23:39666
theory of, single-particle poles in shell-model approach to, 24:11032
theory of, single-particle resonances in unified, 24:45832
theory of, state normalization of singular Lippmann—Schwinger equation for unified, 23:1941
theory of, statistical, 21:15609 (CONF-660221-, pp 43-55)
theory of, statistical description of complex-boundary-value problem in, 21:19336
theory of, statistical description of complex-boundary-value problems in, 21:19335
theory of, three-body scattering amplitude in modified distorted-wave Born approximation, (T), 22:9975
theory of, three-particle channels in, 24:6968
theory of, unified treatment using Rayleigh—Schroedinger variation principle in, 24:13393
theory of, use of projection operators in, (T), 22:20716
theory of, use of shell-model basis states in general, (T), 25:39070 (JINR-P4-5678)
theory of, using extended K-matrix and R-matrix formalisms, (T), 23:13305(R) (COO-1573-48)
theory of, using helicity formalism for multipole expansion of two-body interactions, 21:25591
theory of, using second-quantization formalism, (T), 22:9974
theory of, using second-quantization formalism, (T), 22:27291
theory of, with time reversal violation, (T), 22:14106
theory using cluster model, (T), 22:24889 (BMwF-FBK-67-93)
theory using constant and one-level resonating amplitudes, statistical, (T), 22:27245
theory using coupled-channel formalism, development of, (T), 22:9800(R) (COO-535-571)
theory using shell model with K-matrix formalism resonance fine structure in, (T), 22:3757 (TID-24143)
theory with multiparticle exit channels, review of, 23:25647
theory with short-range correlations for, 24:24678
three-body channels in, contribution of two-cluster channels to, (T), 24:15969
three-body model for lithium-6-induced, (T), 25:28486
threshold phenomena in, energy dependence of s-matrix for, (T), 24:49966
time determination using shadow effect in charged-particle reactions with single crystals, (T), 22:42146
time measurements in compound, method for, 24:20347 (JAERI-1184, pp 141-5)
time reversal invariance in, review of, 24:15616
time-dependent model for, (T), 25:46106
transfer amplitudes in zero-range DWBA and vertex functions for, normalization constant for, 25:17974
transfer functions for neutron-emission, effect of neglecting energy—angle correlation in, (T), 22:32695
transfer, review of heavy-ion—induced, (E/T), 24:52654
transformation matrix T^{-1} for differential scattering cross sections, method for calculating, (T), 22:9922 (NAA-SR-Memo-12489)
transition amplitude for deuteron stripping, linked-cluster expansion for, (T), 23:13327
transmission coefficients for low-energy compound-nucleus, calculation using pole-resonance form of unitary matrix, (T), 22:35377
two-body kinematics calculations for FORTRAN IV code RELKIN for, 24:40671 (LA-4349)
two-nucleon transfer, nuclear structure research with, 24:20421 (JAERI-1184, pp 67-71)
two-particle interactions in potentials, solution of Lippmann—Schwinger equation for, 23:11073
two-particle transfer in heavy-ion-induced, (T), 24:49739
unified theory for, using Weinberg quasiparticles, 24:43588

unitarity conditions in diffraction, (E), 22:30088
unitary models of resonance, 21:31875
use in high-energy multiparticle, for nuclear structure research, (T), 23:19337 (RHEL/R-166, pp 67-79)
use in nuclear structure research on deformed nuclei, survey on, 24:24643
use in preparation of new isotopes, review on, 24:16005
use in studies of nuclear structure, survey on, 23:23763
use of (p,t) and (p,He-3), for determination of parentage, (T), 23:40148
use of meson (π) induced, for study of nuclear structure, (T), 22:3802
use of radiative capture, in giant resonance research, (E), 22:5897
use of recoil, in production of hot atoms, 22:4173
use of two-nucleon transfer, for determination of nuclear parentage, 24:43576
use of two-nucleon transfer, for self-consistent nuclear spectroscopy, (T), 23:19375
uses in high-resolution isotope tracing, 25:23941
uses in metallurgy, 23:17349
uses of fission, summary of peaceful, 25:34771
uses of, in activation analysis, 21:10269
vector-model analysis of thick-target, effect of broad velocity distributions on, (T), 24:11040
virtual photon cross sections for two-body electrodisintegration, (T), 25:23095
virtuality effects in quasielastic scattering, 21:17403
wave functions for neutron elastic scattering at low energy, single-particle, (T), 21:19299
wave functions for three-body final states in, (T), 22:3221 (ORNL-TM-2008)
wave functions for, s-state component of two-particle, (T), 21:7478(R) (COO-1371-36)
wave functions near resonance and R-matrix expansion, (T), 24:52675
weak interaction processes in highly evolved stars, (T), 22:38684
width correlations and distributions in resonance neutron capture, (T), 23:42996
width distributions for, effects of small sample size on estimation of number of degrees of freedom of, (T), 23:15506
widths for resonance neutron capture, correlations of partial, (T), 22:20578 (WASH-1079)
widths of 2p-1h doorway states in, (T), 22:46820 (UCSD-10-P-11-75)
x-ray emission in heavy-ion-induced, (E), 21:29969(R) (UCRL-17299)
yields from photo-, multichannel analyzer for measuring, 21:1690
yields in single-crystal targets, channeling effects on, (E), 21:34050
yields of photo-, yield measurements using activation, (T), 21:44760
yields of recoil nuclei in high-energy-particle, comparison to diffusion yield, (T), 23:47055

NUCLEAR REACTIONS (DIRECT)
absorption model for transfer-type, (T), 24:43464 (UJV-2433-F)
amplitudes for deuteron stripping near Butler pole in DWBA formalism, (T), 22:48591
amplitudes for stripping, calculation of, (T), 21:2796
amplitudes for, computer program for DWBA calculation of transition, (T), 25:46127
amplitudes for, effects of compound particles in nonrelativistic vertex parts for, (T), 24:8937
amplitudes for, vertex functions for three-body problem for, 21:27661
amplitudes of, complex singularities of, (T), 21:4362
analog resonances in stripping and pick-up, on light nuclei, 25:28458
analog resonances in, properties of, 25:28223
analog resonances in, proton decay of, 25:28471
analysis of coplanar (p,2p), effects of detector resolution on, (T), 21:23571
analysis of deuteron stripping with correlation between spectroscopic factors for discrete states and continuum matrix elements, (T), 22:27273
analysis of deuteron stripping, spin dependence of interactions in DWBA, (T), 23:11077
analysis of single-nucleon-transfer, application of multipole sum rules to, (T), 22:16099
analysis of, coupled equations and effective potentials for, (T), 23:40154
analysis using modified phase shift method, 24:8921 (COO-427-96)
analysis using nonrelativistic square Feynman diagrams, (T), 23:42971
angular correlation symmetry of gamma rays from stripping and knock-out, effect of finite-range approximation on, (T), 21:44748 (ZFK-122, pp 189-93)
angular correlations in pick-up and knock-out, (T), 21:30071
angular distributions for (d,p) and (p,d), effects of deuteron d-state on, (T), 21:38387
angular distributions for boron-11 (p,α), analysis using plane-wave pickup and exchange formalism, (T), 22:35240
angular distributions for deuteron stripping, effects of deuteron alignment and polarization on, (T), 21:46792
angular distributions for heavy ion-induced transfer, (E), 22:26851
angular distributions for l = 1 nucleon-transfer, spin dependence of, (T), 22:7781
angular distributions for l = 3 transitions in (d,p), spin dependence, (E), 22:20522
angular distributions for neutron-pickup, spin dependence of, (E), 21:19191
angular distributions from (He-3,t), distorted-wave analysis of anomalies in, (T), 25:43848
angular distributions from nucleon-transfer, isospin dependence of, (E), 21:17391
angular distributions of (d,He-3), spin dependence of, (E/T), 22:20625
angular distributions of (He-3,t) and (p,n) transitions to 0^+ antianalog energy levels, analysis of shapes of, (T), 25:43842
angular distributions of (He-3,t) and (p,n), shapes of, (T), 25:12648
angular distributions of stripping, equations using l-space localization, (T), 21:21598
angular distributions on light nuclei, spin dependence of, (T), 21:38389
angular momentum in deuteron stripping, determination using polarized deuterons, (E/T), 21:42693
book: Direct Nuclear Reaction Theories, 25:5823
book: Excitation Mechanisms of the Nucleus. Electromagnetic and Weak Interactions, (T), 25:39114
bound states of deformed nuclei in, (T), 22:27355
bremsstrahlung emission in, pole diagram analysis of internal, (T), 24:18449
bremsstrahlung emission in, use for determination of reaction mechanism, (T), 24:18445 (ITEF-660)
bremsstrahlung production in, pole approximation calculation of internal, (T), 23:28351
bremsstrahlung spectrum in, use for identification of reaction mechanism, 24:30885
calculation of matrix element for multi-nucleon transfer, (T), 24:24614
calculation of single-nucleon-transfer, using particle—vibration-coupling model, (T), 25:43976
channel wave functions and coupled equations for, effective orthogonality of, (T), 25:31443
charge exchange contributions to, theory of, (T), 23:19253(R) (ORO-2972-80)
charge exchange effects in, (T), 24:6976
charge exchange in deuteron stripping, (T), 22:42130
charge exchange in nucleon transfer, (T), 22:27351
charge-exchange effects on (d,p) stripping, (T), 21:4349
charged-particle emission in proton-induced, with medium and heavy nuclei, (E/T), 22:7703(T) (ORNL-tr-1831)
computer program for analysis of pickup and stripping, using optical model with distorted-wave Born approximation, (T), 22:14078(R) (TID-24250)
conference on helium-3-induced, Tokyo, Sept. 6, 1967, 22:39683 (CONF-670970)
configuration mixing effects in, (T), 22:32726
configuration mixing effects on forward-angle J dependence in l = 3 pickup and stripping, (E/T), 22:37387
correlation of virtual nucleon pairs in, (T), 22:20719
correlations between deuteron stripping and neutron capture, 23:15476
Coulomb excitation in nucleon-transfer, virtual, (T), 21:23582
Coulomb excitation in, DWBA calculation of differential cross sections for quadrupole, (T), 25:59859
Coulomb repulsion in diffraction theory of (d,p) stripping, 25:53826
coupled channel theory for, 24:40668 (CONF-691208-(Vol.1), pp 37-49)
coupled channel theory for, review on, 24:20450
cross sections and yields of (d,n) and (d,p), calculation of, 21:35502 (NP-16777)
cross sections for (d,p), calculations using distorted-wave approximation, (T), 21:2775
cross sections for (d,p), calculations using Green function method, 21:25571
cross sections for (He-3,α), relative to (d,t), l dependence of, (T), 25:41230(R) (NYO-3938-4)
cross sections for (p,2p), for light nuclei, (T), 21:27658
cross sections for (p,d), effect of deuteron d-state on J-dependence of, (T), 22:27367
cross sections for (p,t) and (p,He-3), equality of absolute, (T), 22:32510
cross sections for (t,d), normalization of zero-range DWBA, (E/T), 22:50624
cross sections for (t,p) and (He-3,p), calculation use of DWBA in calculation of differential, 21:5580
cross sections for deuteron stripping, 21:34041
cross sections for deuteron stripping on deformed nuclei below Coulomb barrier, (T), 22:39716
cross sections for deuteron stripping, calculations using renormalized Born approximation, (T), 23:7228
cross sections for heavy ion-induced, with multiple neutron transfer, (E), 22:27196
cross sections for high-energy quasielastic (p,2p), in impulse approximation with proton single-particle wave functions, (T), 22:42128
cross sections for j-forbidden deuteron stripping, calculations using core-excitation model, (T), 22:42008
cross sections for quasielastic (p,2p), calculation using t-matrix formalism with local and nonlocal p-p effective interactions, (T), 22:27243
cross sections for single-nucleon transfer, peripheral-model calculations of, (T), 25:28498
cross sections for stripping, leading to decaying states, (T), 24:13397
cross sections for summed inelastic and quasi-elastic scattering of medium- and high-energy electrons and protons, (T), 25:56849
cross sections for two-neutron transfer, (T), 22:1598(R) (COO-1265-49)
cross sections for two-nucleon transfer, methods for calculating, (T), 23:21290 (CEA-R-3572)
cross sections for two-particle-transfer, (T), 21:10108
cross sections for, computer program for DWBA calculations of, (T), 25:31390 (ANU-P-507)
cross sections for, computer programs for calculating, (T), 23:19254(R) (ORO-3624-7)
cross sections for, DWBA calculation of amplitudes in rectangle diagram description of, (T), 24:22093
cross sections for, level-density measurements using average, (T), 21:21579 (TID-23787)
cross sections for, partial level densities from energy dependence of, (T), 21:10084
cross sections for, research on nuclear level densities using energy dependence of average, (T), 22:20762
cross sections in deuteron stripping, DWBA treatment of finite-range effects in calculation of differential, (T), 25:59854
cross sections of (n,2n), for nuclei of A < 100, (E/T), 21:2673
cross sections of nuclear structure from differential, 21:30054
cross-section calculations for deuteron stripping, using weakly bound projectile model, 21:34059
cross-section calculations for two-nucleon-transfer, using distorted-wave Born approximation with spin-dependent potential, 21:38408
cross-section formula for (n,2n), 21:1149
cross-section reciprocity for rearrangement, testing time reversal invariance by, (T), 22:32719
data analysis of, modified phase-shift technique for, 24:15956
data on (n,2n), for nuclei with A = 20 to 100, 21:5510
description of noncoplanar (p,2p), using distorted-wave impulse approximation, (T), 21:23570
description of transfer, using DWBA, 25:18025
description of two-particle stripping, using microscopic finite-range method, 24:35923
description using optical model, (T), 25:7917
description using phenomenological methods, survey of, (T), 22:9935
detailed balance violation in, from time reversal violation, (T), 22:32688
deuteron elastic scattering and stripping, optical model and distorted wave formalisms for, 22:32674
deuteron stripping (d,p) anomaly at threshold of neutron analog channel, analysis of, (T), 25:53824
deuteron stripping as special case of three-body problem, (T), 21:2794
deuteron stripping on strongly deformed nuclei, coupled-channel analysis of, (T), 24:52650 (UCRL-19529)
deuteron stripping, finite-range interactions in DWBA treatment of, (T), 25:59841(R) (ORO-4119-1)
deuteron stripping, weakly-bound-projectile-model calculations using Hamada—Johnston wave function, (T), 25:50878
differential cross sections and polarization in (d,p), from the WBP model, (T), 24:43484
diffraction model for first- and second-order, derivation using Hankel-transform method, (T), 24:24637
discriminator for studying A(x,nγ)B-type, development of, 21:45365 (LYCEN-6738, pp 191-200)
dispersion theory of, testing by p-γ angular correlations in boron-11 (d,p) reactions, 21:38253
DWBA analysis of (He-3,pp), 21:40507
DWBA analysis of (n,α), (T), 21:15616 (LYCEN-6638)
DWBA analysis of stripping to unbound states, (T), 25:3764
DWBA description of heavy-ion, second-order corrections to, (T), 25:20501
DWBA theory of helium-3-induced, leading to three-body final states, 21:35534
effects of D-state of the deuteron in the WBP model for (d,p), (T), 24:49957
elastic scattering of electrons by nuclei, nonstatic second-order corrections to, (T), 25:39109
empirical normalization in (t,p), (T), 24:22214
exchange effects for composite particles in, (T), 25:12691
Feynman diagrams for, calculation of three-ray apical parts for, (T), 22:35401
Feynman diagrams for, unified treatment of nonrelativistic, (T), 25:56831 (LYCEN-7104, S18.1-18)
finite-range effects in, at low energy, (T), 22:44766
form factors for (t,p), calculation using Woods-Saxon potential, (T), 22:27354
form factors for deuteron stripping, Hartree—Fock calculations of, (T), 22:20682
form factors for DWBA analysis of triton-induced two-nucleon transfer, (T), 22:39687 (CONF-670970-, pp 97-9)
form factors for nucleon transfer, effects of nuclear structure on, (T), 23:1942
form factors for pickup and stripping, approximation for, 21:27644
form factors for pickup and stripping, calculations using shell model, (T), 22:27353
form factors for pickup and stripping, method for calculation using distorted-wave Born approximation, (T), 22:9952
form factors for pickup and stripping, variational calculation with configuration mixing, 23:49458
form factors for pickup, on nuclei with two particles outside of closed shell, (T), 23:4075
form factors for stripping, methods for calculating, (T), 22:27268
form factors for two-nucleon transfer, calculations using configuration-mixed shell-model states, (T), 22:30048(R) (PUC-937-307)
formalism for DWBA analysis with direct and exchange modes, (T), 23:4057
gamma angular correlations from pick-up, calculations using distorted-wave Born approximation, 22:14085
gamma angular correlations in pickup, effect of spin-spin interaction on, (T), 22:27357
graphical treatment of stripping, 21:34028 (LYCEN-6663)
heavy-particle stripping in, PWBA calculations of differential cross sections for, (T), 25:56863
inelastic scattering differential cross sections for charged particles, computer programs for DWBA calculations of, (T), 25:43954 (INP-746)
interference between compound—nucleus and direct mechanisms at isobaric analog resonance in deuteron stripping, (T), 21:31849
interference effects between resonance and, theory of, (T), 23:15431(R) (NYO-3525-36)
internal bremsstrahlung spectra for, description by triangle mechanisms, (T), 25:12694
isobaric analog resonances in deuteron-induced, (E), 21:25525

isobaric analog resonances on even—odd targets, three-body model of, (T), 25:5872
isomer production by deuteron stripping, computer program for calculating cross sections of, 23:13310 (OU-LNS-68-12)
isospin mixing in deuteron-induced stripping, (T), 22:11949(R) (ORO-2972-47)
isospin mixing in deuteron-induced, (T), 21:46809
isospin mixing in deuteron-induced, (T), 21:2807
isospin mixing in deuteron-induced, semidirect mechanism for, (T), 22:50667
isospin nonconservation in, test for, (E), 24:13309
isospin T = 0 and T = 1 transfers in (He-3,p), effects on angular distributions of, (T), 25:59741
isospin-forbidden analog resonances in, description using K-matrix formalism, 24:15941
kinematic calculations for, simplified method of, (T), 23:4041 (EUR-3908)
Kohn's variational principal for rearrangement-type, (T), 24:45828
Landau singularity in deuteron-induced, (T), 21:1121 (AD-635915)
matrix elements for, arising from non-Hermiticity of Hamiltonian operator, (T), 25:39112
matrix elements for, comparison of wave-function and diagram formations, (T), 21:44758
mechanism for formation of three particles in, method for identifying, 22:3789
mechanism interference effects in, leading to unbound residual nuclei, (T), 24:38362
mechanism of deuteron stripping at low energies, (T), 21:2817
mechanisms for formation of three particles, identification of, (T), 23:4044 (ITEF-591)
mechanisms in, use of triangle diagrams for internal bremsstrahlung for identification of, (T), 25:56864
mechanisms of binary, identification using internal bremsstrahlung spectrum, (T), 23:7350
mechanisms of two-nucleon transfer, (E), 23:10967
mechanisms of, identification using complex singularities, (T), 22:27346
model for stripping, analytical solution of, (T), 21:23580
models for high-energy transfer heavy-ion-induced, (T), 24:49742
multi-step stripping on deformed nuclei with nonrotational states involved, (T), 25:3732
multimode transfer model for heavy-ion, PWBA calculations in, (T), 25:41257
multiparticle collision theory of, (T), 21:46834
neutron capture in (d,p), (T), 21:2782
neutron photoproduction from odd-A nuclei, (T), 22:5873
normalization factors for (t,d) stripping, (T), 23:19391
normalization factors for stripping, calculation using Hulthen potential in DWBA, 24:20461
nuclear core polarization effects in single-nucleon-transfer, (T), 21:13915
nucleon scattering by light nuclei, effects of approximate wave functions on analysis of, (T), 25:43971
nucleon transfer in, finite-range effects in DWBA calculations for, 22:18317
nucleon transfer strengths for oxygen-16, centroids and sums of, (T), 23:3955
one-particle transfer, to highly excited states in deformed nuclei, (T), 24:30915
optical model analysis of deuteron-induced, (T), 21:5586
optical model calculations of deuteron-induced, 21:2765
orbital rearrangement energy in nucleon-transfer, (T), 22:16067
particle polarization in, description using diffraction model, (T), 21:2816
particle transfer in heavy nuclei, (T), 22:46729(R) (AECL-3157)
peripheral model of light-particle, nonrelativistic, (T), 25:43966
perturbation approach to the multistep stripping on deformed nuclei, (T), 25:25837
pick-up, diagram approach to polarization effects in, (T), 25:20533
polarization calculations for deuteron stripping, using weakly bound projectile model, 21:34058
polarization effects in (d,p) stripping, j-dependence of, (T), 25:5828
polarization effects in deuteron stripping, (T), 21:46806
polarization effects in deuteron stripping, calculations using Butler—Hewitt—McKellar—May theory, (T), 22:42114
polarization effects in deuteron stripping, diffraction model for, (T), 23:21392
polarization effects in pickup and stripping, survey of, (T), 21:21610
polarization effects in three-body, pole diagram analysis of, (T), 23:13319
polarization effects in, with formation of three particles, (T), 23:4045 (ITEF-605)
polarization experiments on stripping, review of, 21:21617
polarization in (d,n) stripping on 1p-shell nuclei, (T), 23:19254(R) (ORO-3624-7)
polarization in stripping, (T), 21:13796(R) (ORO-2972-25)
polarization in, review of statistical theory of, 24:6967
polarization phenomena in, survey of, 23:37318
polarizations for stripping, computer calculation of, 21:7822 (NP-16368)
possibility of (n,α), with thermal neutrons, (T), 22:11953
potential-model calculations of, (T), 21:2793
products from transfer, diffraction effects in angular distribution of, (T), 21:17404
proton elastic scattering cross sections from three-body model of isobaric analog resonances on even—odd targets, (T), 25:5872
proton polarization from deuteron stripping, (T), 23:19385
proton polarization from deuteron stripping, (T), 21:34042
proton polarization in (d,p), below the Coulomb barrier energy, (T), 22:20704
proton polarization in deuteron stripping, 21:44770
Q-value for nuclei with A = 43 to 209, (E), 23:21328
R matrix theory of, potential scattering and spectroscopic factors in, (T), 25:50846
realistic form factors for (d,p) and (p,d), in the lead region, (T), 25:10067
rearrangement collisions and heavy-particle stripping, (T), 21:19313
research progress on direct and nucleon-transfer, (E/T), 22:1644(R) (AD-647902)
research progress on, (E), 22:1644(R) (AD-647902)
resonance interference in deuteron stripping at low energy, (T), 22:26896
resonance narrowing effects in three-particle final-state, (T), 25:28497
resonant final states in, treatment of, (T), 25:46117
S-matrix theory of, knock-out mechanism in, (T), 25:39074
scattering effects in virtual, (T), 21:4363
scattering in, coupled-channels formulation for high-energy inelastic, (T), 25:39113
scattering in, diffraction systematics of, (T), 25:25807
scattering of electrons by nuclei, dispersive effects and nuclear correlations in high-energy elastic, (T), 25:50818
selection rules for deuteron stripping with Coulomb excitation, (T), 21:46793
shell-model analysis of two-nucleon transfer, 24:30954
shell-model description, (T), 21:44745 (ZFK-122, pp 143-5)
single particle strengths in, depletion by inelastic channel coupling, (T), 25:1769
soluble three-body model of deuteron stripping, (T), 21:4328 (UCD-CNL-68)
Sopkovich approximation for, test of validity of, (T), 25:12641 (RLO-1388-595)
spectral averages in transfer, on nuclei with single active shell, (T), 23:19357
spectral averages in transfer, on targets with single active shell, (T), 22:42109
spectroscopic factors for (p,2p), on 1p-shell nuclei, (E/T), 22:26864
spectroscopic factors for (p,n), with isobaric analog resonance excitation, (T), 22:20730
spectroscopic factors for deuteron stripping and pick-up on tin isotopes, calculations using quasiparticle Tamm—Dancoff approximations, (T), 23:4006
spectroscopic factors for deuteron stripping near A = 110, g/sub 7/2/—h/sub 11/2/ anomaly in, (E/T), 23:15441
spectroscopic factors for deuteron stripping, from Butler-Born approximation, (T), 22:42110
spectroscopic factors for deuteron-induced, in deformed heavy nuclei, (T), 21:33987
spectroscopic factors for heavy ion-induced two-particle transfer, formula for, (T), 22:24895 (JINR-E4-3742)
spectroscopic factors for one-neutron transfer, calculations using Tamm—Dancoff quasiparticle approximations with Tabakin potential for tin isotopes, (T), 22:50607
spectroscopic factors for pickup and stripping, single-particle sum rules for, (T), 22:32689
spectroscopic factors for stripping, determination using distorted-wave Born approximation, (T), 22:30100
spectroscopic factors for two-neutron transfer, in vibrational nuclei, 22:30093
spectroscopic factors for two-nucleon transfer, using Tamm—Dancoff methods, (T), 22:27263
spectroscopic factors from deuteron stripping, (T), 22:42145
spectroscopic factors from, calculations using DWBA, (T), 25:7899
spectroscopic information from, calculation of, (T), 25:7900
spectroscopy of odd—odd nuclei with, (E/T), 22:32551
spin cut-off parameter for (n,2n), with isomeric excitation, (E/T), 22:24872
spin cut-off parameters for (n,2n), at 14 MeV on A = 134 to 208 nuclei, (T), 22:39701
stripping to unbound states, cross section for, (T), 24:20462
stripping, diagram approach to polarization effects in, (T), 25:20533
stripping, diffraction analysis of angular distributions from (d,p), (T), 25:56847
structure amplitudes for (p,t), on A = 4 to 224 nuclei, (T), 22:53078 (UCRL-18268)
structure peculiarities of heavy-ion two-nucleon-transfer, (T), 24:38338
sum rules for single-nucleon-transfer, multipole, (T), 21:12103
sum rules for single-particle strengths in deuteron stripping, (T), 22:9963
theories for stripping to unbound levels, faithful and pseudo-bound, 25:5869
theory and spectroscopic uses of deuteron pickup and stripping, (E), 22:5871 (UJV-1870)
theory for 2s1d-shell nuclei, reduced width calculations using projected Hartree-Fock wave functions, (T), 22:9968
theory for stripping and transfer, (T), 22:27350
theory of (α,n), statistical, (T), 22:37377
theory of (d,p) stripping, (T), 25:59848
theory of (d,p) stripping, effects of neglecting certain terms in DWBA, (T), 25:20497
theory of (d,p), intermediate approximation in, (T), 24:22211
theory of (n,2n) knock-out, calculations of amplitudes in, (T), 25:39116
theory of (n,α), using plane-wave Born approximation, 21:46685 (LYCEN-6746)
theory of (p,n) and (n,p) knockout, with finite-range effects and exchange interaction, (T), 23:19253(R) (ORO-2972-80)
theory of (t,d) stripping, (T), 22:3765
theory of (t,d), below Coulomb barrier, (T), 22:44767
theory of Coulomb stripping in heavy ion-induced, (T), 22:27344
theory of deuteron stripping, 21:19320
theory of deuteron stripping, 21:31876
theory of deuteron stripping at low energy, Butler formalism using sudden approximation for, 22:48611
theory of deuteron stripping near 10 MeV, j-dependence for 2p neutron transfer in, (T), 22:22642
theory of deuteron stripping on even-A rare-earth nuclei, using modified Nilsson orbitals, (T), 22:32649
theory of deuteron stripping, approximations for exactly solvable model in, (T), 22:27348
theory of deuteron stripping, BHMM method supported for, (T), 22:46850
theory of deuteron stripping, coupled-channel formalism in, (T), 23:40144
theory of deuteron stripping, effect of tensor forces in DWBA formalism for, (T), 23:23757
theory of deuteron stripping, errors in BHMM formulation, (T), 22:46849
theory of deuteron stripping, formalism for, (T), 22:9918 (CEA-R-3305)
theory of deuteron stripping, isospin coupling in, 25:28462
theory of deuteron stripping, nonlocal effects in distorted-wave, (T), 22:20726
theory of deuteron stripping, review of, 23:5963
theory of deuteron stripping, testing by boron-11 (d,p) reaction, (E), 22:26928
theory of deuteron stripping, using coupled-channel formalism, (T), 22:27356
theory of deuteron stripping, using distorted-wave method with adiabatic approximation, (T), 22:14096
theory of deuteron stripping, using sudden approximation, (T), 22:20725
theory of deuteron stripping, with intermediate trapping states, (T), 22:9961
theory of deuteron- and proton-induced, with isobaric analog resonance excitation, (T), 22:7661(R) (NYO-3525-26)
theory of diffraction stripping for deformed nuclei, multi-step, (T), 23:13336
theory of diffraction stripping, on deformed nuclei, (T), 23:4047 (JINR-E4-4015)
theory of effective interaction in heavy ion-induced transfer, (T), 22:27339
theory of exchange, validity of T matrix and DWBA in, (T), 23:40124
theory of finite-range effects in knockout, (T), 22:11949(R) (ORO-2972-47)
theory of finite-range knock-out, (T), 22:20712
theory of finite-size effects in two-nucleon transfer, (T), 22:27359
theory of finite-size effects on two-nucleon transfer, (T), 22:18340
theory of four- and many-body, using second-quantization formalism, (T), 22:9919 (IPNO/TH-102)
theory of heavy ion-induced neutron transfer, (T), 22:27334
theory of interference of direct and compound-nucleus mechanisms in nuclear inelastic scattering, 21:23577
theory of intermediate excitations in deuteron stripping, (T), 22:42099 (JINR-P4-3872)
theory of knock-out, research progress on, (T), 22:11950(R) (ORO-3624-1)
theory of knock-out-type, 21:21577 (NP-16448)
theory of knockout, finite-range distorted-wave formalism for, (T), 23:17130
theory of knockout, with polarized incident beams, formalism using distorted-wave Born approximation, (T), 22:35399
theory of low-energy (t,d), for spectroscopic research, (T), 22:27365
theory of multi-nucleon transfer, on deformed nuclei, (T), 22:42134
theory of multiple particle transfer, using finite-range interaction for deformed and spherical nuclei, (T), 22:14073 (JINR-E4-3624)
theory of nucleon capture, role of giant resonance in, 24:38324
theory of nucleon-transfer, 21:31839 (YALE-1807-45)
theory of one- and two-particle transfer, Green's function derivation of, (T), 25:10082
theory of one-nucleon transfer, DWBA formalism for, (T), 22:53219 (CEA-R-3574)
theory of single nucleon transfer, between complex nuclei, (T), 22:32710
theory of single-nucleon-transfer, for 1p-shell nuclei, 21:38393
theory of spin-dependent effects on (α,n) and (α,p), (T), 21:46833
theory of spin-dependent interaction in, research progress on, 21:40474(R) (RLO-1062-675)
theory of stripping, as three-body problem, 21:12110
theory of stripping, BHMM formalism for, (T), 23:9059
theory of stripping, finite-range corrections in, 21:13934
theory of stripping, on deformed nuclei, 21:44736 (JINR-P4-3447)
theory of stripping, partial-wave expansion formalism for diffraction, (T), 23:13324
theory of stripping, testing using pickup reactions with deuteron singlet state, (T), 22:18321
theory of stripping, using DWBA formalism, 21:12080 (LYCEN-6634)
theory of stripping, validity of sudden approximation, (T), 23:40124
theory of sub-Coulomb stripping, analytic, 21:15628
theory of three-nucleon stripping, using distorted-wave Born approximation, (T), 22:3785
theory of three-nucleon transfer, using stripping mechanism, (T), 23:21386
theory of three-nucleon-stripping, 21:38392
theory of two-neutron transfer, (T), 22:27022
theory of two-nucleon transfer, (T), 22:39696 (UCRL-18225)

theory of two-nucleon transfer, (T), 22:11949(R) (ORO-2972-47)
theory of two-nucleon transfer, using four-quasiparticle second Tamm—Dancoff approximation, (T), 22:27092
theory of two-nucleon transfer, with pairing potential, (T), 22:44787
theory of two-nucleon-transfer, 21:2772
theory of two-nucleon-transfer, 24:43490
theory of two-nucleon-transfer stripping, (T), 22:14097
theory of two-particle stripping on deformed nuclei, microscopic finite-range approximation for, (T), 23:25938 (IFA-FT-73)
theory of two-particle-transfer, using extended shell model with ladder approximation, 21:44761
theory of two-particle-transfer, with excitation of T = 1 particle-hole states, 21:38399
theory of two-step deuteron stripping, validity of perturbation approach for, (T), 23:23760
theory of, angular correlations and polarization in, 21:2784
theory of, corrections for noncommutativity of Hamiltonians in sudden approximation, 21:34047
theory of, decay amplitudes and overlap integrals in, (T), 22:27257
theory of, distorted-wave, 21:10118
theory of, distorted-wave approximation in, 21:5573
theory of, elastic approximation in, (T), 23:34812
theory of, lectures on, 21:5560 (ANU-P-351)
theory of, lectures on, (T), 22:3800
theory of, lectures on, (T), 22:20674 (NP-17228, pp 104-29)
theory of, lectures on, (T), 23:11043 (ANU-P-382)
theory of, orthogonality of initial and final wave functions in, 21:34048
theory of, review of, 21:34022 (INP-525/PL)
theory of, review of developments in macroscopic and microscopic, (T), 25:39126
theory of, review, (T), 22:16095
theory of, testing DWBA formalism for, (E/T), 23:7322
theory of, three-body problems in, 21:40474(R) (RLO-1062-675)
theory of, three-body, (T), 22:1727
theory of, three-particle model for, (T), 23:5975
theory of, using peripheral model, (T), 23:5956
theory of, using semiclassical model, 21:38374 (AAEC/TM-388)
theory of, using semiclassical model for distorted-wave calculations, (T), 22:1711
theory of, with channel coupling, 23:45014
theory using coupled channel formalism, 21:27645
theory using pole mechanism, testing of, 21:12109
three-particle model of stripping, exact solution of and standard approximations for, (T), 21:44789
threshold effects in (d,p), S-matrix description of, (T), 24:38377
time reversal invariance testing using detailed balance for inverse, (T), 22:14084
time-reversal invariance in, reciprocity tests of, 24:35682
transcendental functions in computer programs for evaluating, (T), 25:36813 (ANU-P-439)
transition matrix elements for two-nucleon transfer, (T), 22:42131
transitions in single-nucleon transfer, spectroscopic factors for forbidden, (T), 22:20767
two-nucleon stripping at low energies, polarization effects in, (T), 25:28496
two-nucleon transfer in the 1p shell, 24:13400
two-step collective processes in (p,t), (T), 24:52520
unified model for, review on, 24:13442
use in determination of nuclear wave functions for chlorine and sulfur isotopes, (E/T), 22:3684
use of helium-3-induced, in nuclear spectroscopy, (E), 22:39688 (CONF-670970-, pp 139-43)
use of helium-3-induced, in research on nuclear structure, 22:39684 (CONF-670970-, pp 3-12)
use of particle transfer, in research on particle unstable states, (T), 22:27244
use of transfer, in structure research, (E/T), 22:20724
use of two-neutron transfer, for testing nuclear models, (T), 22:20746
use of two-nucleon-transfer, in nuclear spectroscopy, (T), 21:15610 (CONF-660221-, pp 104-9)
vector analyzing power for deuteron stripping, calculations using weakly bound projectile model, (T), 23:15372

NUCLEAR SAFETY PILOT PLANT
aerosol density monitor for, 21:34522 (ORNL-4091, pp 102-35)
component development for support of experiments in, 21:25630(R) (ORNL-4071)
containment spray systems for, development and test programs for, 24:33419
containment spray systems of, dose reduction factor for elemental iodine removal by, 25:37029 (ORNL-TM-2412(Pt.12))
containment sprays for, methyl iodide removal by, 23:37642
containment systems for, iodine vapor removal from, 22:32796
containment vessel for, behavior of airborne iodine in, 22:27416(R) (ORNL-4228)
decontamination of containment system in, methods for, 21:27690 (ORNL-TM-1718)
design and operation of Betulla, 24:25162 (EUR-4463)
design and performance of, 21:23659
filter tests in, 21:25630(R) (ORNL-4071)
fission product behavior during meltdown of Zircaloy-2 clad uranium dioxide in, 22:10012 (ORNL-TM-1908(Pt.1))
fission product behavior in containment system of, 21:27690 (ORNL-TM-1718)
fission product behavior in reactor containment systems, experiments on, 21:25630(R) (ORNL-4071)
fission product dispersion in, measurements on, 21:35588(R) (TID-23868)
fission product removal from containment vessel atmosphere in, 21:23613 (ORNL-4050)
fission product removal in, effects of isothermal spraying conditions on particulate, (E), 24:52951 (ORNL-TM-3122)
fission product transport tests in, 21:40571(R) (ORNL-TM-1913)
instrumentation development for, 21:34521 (ORNL-4091, pp 91-101)
iodine behavior in, analysis of elemental, 22:1772(R) (ORNL-TM-1986)
iodine vapor removal from air and steam—air in, analysis of spray, 22:35604 (ORNL-4253)
methyl iodide removal using spray cooling in, 22:25098(R) (ORNL-TM-2164)
removal of cesium and uranium particles from, during Runs 59 to 62, 23:33068(R) (ORNL-TM-2588)
removal of cesium and uranium particles from, during Runs 58 to 61, 23:33067(R) (ORNL-TM-2533)
removal of cesium and uranium particles from, performance of Run 67 to Run 70, 24:4077(R) (ORNL-TM-2718)
removal of elemental iodine and iodomethane in Run 21 to 54 from, effectiveness of sprays for, 23:33066(R) (ORNL-4374)
removal of elemental iodine by basic borate spray, (E/T), 24:20581(R) (ORNL-TM-2829)
removal of iodomethane during Runs 43 to 49 from, 24:4074(R) (ORNL-TM-2283)
spray effectiveness for cesium and uranium particle removal in Run 55 to 57, 23:17235(R) (ORNL-TM-2479)
spray program for fission product removal from containment atmospheres, summary of, 25:25991
spray system for, iodine removal by borated water, (E/T), 24:46071(R) (ORNL-TM-3061)
spray system in, half-life measurements for iodine and iodomethane cleanup of, 22:20909(R) (ORNL-TM-2095)
spray systems for, iodine removal by borated water, (E/T), 24:36051(R) (ORNL-TM-2984)
spray systems for, removal of elemental iodine by basic borate, (E/T), 24:29038(R) (ORNL-TM-2919)
spray systems in, iodine and methyl iodide removal by, 24:22431(R) (ORNL-4511)
spray systems in, iodine and methyl iodide removal by, (E), 25:34392(R) (ORNL-4647)
spray systems in, iodine and methyl iodide removal by, (E), 24:22442
spray systems performance in, effects of drop size distribution on, 22:7816(R) (ORNL-TM-2057)
use for development of pressurized-water reactor high efficiency emergency spray sorption systems, 23:23940 (ORNL-4360)

book: Chemical Consequences of Nuclear Spin, 25:30669
book: Polarization and Orientation in Nuclear Physics. Vol. I. Quantum Mechanical Bases of Spin Polarization, 24:22223
calculation for four-particle states using extended Brennan—Bernstein rules, (T), 25:31399
cooling in indium by adiabatic demagnetization, (E), 21:44171
coupling constant for AKN from low-energy K^- + p interactions, consistency test for, 23:32732
determination for excited states using systematics for l = 3 transitions in (d,p) reactions, (E), 22:20522
determination for excited states, using average γ spectra from resonance neutron capture, (E/T), 22:42049
determination for isolated resonances by γ—γ coincidence measurements, method for, (T), 23:4060
determination for neighboring levels using γ—γ angular correlation and linear polarization measurements, (T), 23:23798
determination from γ decay systematics, theory for, (T), 22:37340(R) (EANDC(E)-89(U))
determination of upper state for isotropic gamma decay to final state of spin $^3/_2$, (T), 22:30071
determination using (d,p) reactions with polarized deuterons, (E/T), 21:42693
determination using circular polarization of thermal-neutron-capture gamma rays, 21:21547
distribution parameter for isomer production by (n,2n) reactions at 14.8 MeV, (E), 22:32539
equations of motion for systems containing, 21:13376
interaction with electron spin in liquids and solids in magnetic fields, (T), 21:44771
measurement by atomic-beam techniques, (E/T), 22:15336
measurement for 2p-shell nuclei using (d,p) reaction angular distributions, (E), 21:19224
measurement for radioisotopes, method for, 22:30048(R) (PUC-937-307)
measurement for short-lived nuclei using atomic-beam techniques, (E), 22:29943
measurement of, review of methods for, (E), 22:3746 (BNL-11746)
measurement program for fissile nuclei, (E), 22:37340(R) (EANDC(E)-89(U))
measurement using gamma spectroscopy in electron scattering experiments, (E/T), 23:9038 (TID-24667, pp 505-11)
measurement using Moessbauer effect, review of, 22:46833
measurement using particle—γ angular correlations from nuclear reactions, systems development for, 23:19200(R) (COO-1468-3)
measurement using polarization effects in direct reactions, (T), 23:4045 (ITEF-605)
measurement using proton elastic and inelastic scattering from analog state resonances, polarimeter for, 22:32516 (MIT-2098-422, pp 43-68)
measurement using proton polarization from scattering, 21:13796(R) (ORO-2972-25)
measurement with dynamically polarized proton target and backscattered neutrons, 25:53481
Moessbauer quadrupole hyperfine parameters for half-integral, 25:23085
neutron scattering by coherent parametrically excited spin waves, slow, (E), 22:44258
nuclear data tables on, 23:21411
orientation of, system for selecting metastable atoms by, 22:32483
polarization at low temperature, static method for, 23:23790
polarization by strong electric current in quantizing magnetic field, (E/T), 22:17753
polarization in gases, liquids, and solids, review of methods for, 22:46838
polarization in hydrated crystals, method for, 21:5594(P)
precession in axially symmetric electric field, determination of quadrupole interaction from angular correlation of, 25:34178
projection coefficients for systems of spin-$^1/_2$ particles, 21:1119 (AD-628823)
relaxation in atomic collisions, application of Franck—Condon principle to, 24:32629
relaxation mechanism of, Overhauser effect study of, 21:26977
relaxation of, 23:42472 (AD-682320)
relaxation time measurement with HA-100 spectrometer, 24:32937
selection rule for nuclear reactions, 2I + 1, (T), 22:27366
systematics for 1 + 1 → 0 + 0 nuclear reactions, M-matrix formalism for, (T), 22:50660
systematics for odd-A = 135 to 151 nuclei with (2f/sub 7/2/)$^{n-3}$ ground-state configurations, (T), 22:39668
NUCLEAR STRUCTURE

book: The Density of Levels and the Structure of Atomic Nuclei, 24:13427
book: The Spatial Quantum Mechanical Axial and Shell Structure of the Atomic Nucleus, 22:27395
boson expansion method for two-level systems, comparison with exact solution, 22:20683
calcuations for low-lying spectra in spherical nuclei, including long-range effective interactions, 25:59884
calculation for deformed nuclei using K-harmonics method, (T), 25:31439
calculation for deformed nuclei, using collective pairing force, 24:11036
calculation for even nuclei using general asymmetric rotor model, (T), 21:2810
calculation for even—even nuclei using quasiparticle method, (T), 25:15178
calculation for finite nuclei from free nucleon interactions, (T), 21:10115
calculation for ground state properties of spherically symmetric nuclei using modified delta interaction, 25:56840
calculation for low-lying, one-phonon, 0^+ levels of spherical nuclei, (T), 24:38378
calculation method for multiplicity of states, 24:43549

calculation of Coulomb displacement energies using nuclear radii of neutron analogs, (T), 23:52180
calculation of inelastic transition densities, 25:31418
calculation of 0^+ states in nuclei, application of quasi-boson method to, 24:52661
calculation of particle-hole excitations in Marumori boson expansion, (T), 25:46107
calculation of shell-model reaction matrix elements in Z = 28 region, using Reid and Yale potentials, (T), 25:56857
calculation of single-particle levels in a deformed diffuse well, 24:40670 (LA-4329)
calculation of, convergence of Truelove—Nicholls iteration scheme and Bethe—Goldstone equation for, 24:52720
calculation using two-nucleon phase shifts, 21:42697
calculations for 2s—1d shell nuclei using projected Hartree—Fock method, effect of truncation on, (T), 23:25843
calculations for 2s-1d and 2p-1f shell nuclei, expansion of projection operator in SU_3 scheme for, (T), 24:35921
calculations for 2s-1d shell nuclei, (T), 23:46930
calculations for 2s-1d shell nuclei, using particle-hole model, (T), 24:43179
calculations for 2s-1d shell nuclei, using shell model with SU(3) basis, (T), 24:13403
calculations for 5d-shell nuclei, using Hartree-Fock method with projected angular momentum, (T), 24:3970
calculations for A = 14, 18, 38, 42, 206, and 208 nuclei, using realistic single-particle wavefunction, (T), 24:15951
calculations for A = 16 to 19 nuclei using weak coupling model, 24:35912
calculations for A = 18 and 19 isobaric multiplets, (T), 24:6957
calculations for A = 21 nuclei, using SU_3 model, 24:10952
calculations for A = 300 region using momentum-dependent single-particle potential, (T), 25:46109
calculations for A = 4 through 40 nuclei, using three-part Gaussian interaction, (T), 24:3954
calculations for A = 40 region using extended core-particle coupling model, (T), 24:30742
calculations for A = 6 and 14 nuclei, using particle—hole model with residual interaction, (T), 23:28254
calculations for A = 6 to 9 nuclei using shell model with effective interactions, (T), 25:28452 (NP-18717)
calculations for bound states, iterative procedure for, (T), 23:21026
calculations for closed-shell and 1 and 2 p or h nuclei using harmonic oscillator matrix elements, (T), 23:49462
calculations for closed-shell nuclei, using Hartree—Fock method with Skyrme interaction, (T), 24:49968
calculations for deformed even-even nuclei spin-vibrational states, (T), 25:12703
calculations for deformed nuclei, iterative method for, (T), 24:38306 (NP-18279)
calculations for doubly magic nuclei, using hyperspherical expansion method with velocity-dependent potential, (T), 24:38305 (NP-18275)
calculations for doubly magic nuclei, using hyperspherical expansion method and velocity-dependent potentials, (T), 24:40682
calculations for equilibrium deformation in A = 100 region, 24:49929(T) (KFK-tr-313)
calculations for even—even 2p1f-shell nuclei, self-consistent, (T), 22:53249
calculations for even—even A = 150 to 174 nuclei, using Woods—Saxon and Nilsson potentials, 23:37212
calculations for even—even A = 150 to 176 nuclei using Woods—Saxon potential, 24:30808
calculations for even—even A = 174 through 188 nuclei, using Saxon—Woods and Nilsson potentials, (T), 23:49401
calculations for even—even A = 4 to 40 nuclei using Hartree—Fock method, 24:24620
calculations for even—even N = Z nuclei using Hartree—Fock method, symmetries in, (T), 23:30972
calculations for even—even nuclei, boson expansion method for, 24:26685
calculations for even—even nuclei, semiempirical three-parameter equation for, (T), 23:11059
calculations for even-A nuclei, applicability of collective model to, (T), 23:47075
calculations for even-even A = 44 to 58 nuclei, using Hartree—Fock and Hartree—Fock—Bogoliubov methods, (T), 24:10955
calculations for few-nucleon systems using resonating-group method, (T), 24:28854
calculations for first 2^+ and 3^- states of spherical nuclei, using Migdal theory, 24:38367
calculations for giant resonance excitations in heavy deformed nuclei, using hydrodynamic model, (T), 24:18460
calculations for ground states of light A less than or equal to 40 nuclei, self-consistent, (T), 23:4076
calculations for heavy deformed nuclei using surface delta interaction, (T), 23:8990
calculations for heavy deformed nuclei, using oscillator and Nilsson models with secondary shells, (T), 23:37312
calculations for heavy spherical nuclei using sharp seniority wave functions and spherical BCS approximation, (T), 23:7331
calculations for hypernucleic, group-theoretic structure of Talmi transformation for, (T), 23:4082
calculations for j = 9/2 orbits, nucleon seniority in, (T), 24:3978
calculations for lead region using nonlocal Tabakin potential with core polarization effects simulated by pairing + quadrupole forces, (T), 23:19314
calculations for light 4N nuclei, use of alpha-cluster model for, (T), 24:45766
calculations for light and intermediate nuclei, using effective interaction, (T), 24:15996
calculations for light deformed nuclei, using Hartree—Fock method, (T), 23:21273 (ZFK-130, pp 189)
calculations for light nuclei using generalized quasiparticle transformation, 24:22196 (UCRL-19514)
calculations for light nuclei using Hartree—Bogoliubov calculations with spherical restriction, (T), 25:15202
calculations for light nuclei using Hartree—Fock—Bogolyubov method with isospin pairing, (T), 25:3722
calculations for light nuclei using unified shell and cluster models, (T), 24:45820
calculations for light nuclei, effect of Pauli principle in, (T), 24:45821
calculations for light nuclei, unrestricted variation method for, (T), 25:20546
calculations for light nuclei, unrestricted variational method for, (T), 23:28241
calculations for light odd-A nuclei assuming particle-vibration coupling, (T), 24:38149
calculations for low-lying 2^+ levels of near magic nuclei, (T), 24:30890
calculations for low-lying octupole states of deformed even-even A = 152 to 190 nuclei, (T), 24:38366
calculations for low-lying shell-model states, iterative method for, (T), 23:13328
calculations for low-lying spectra using truncated vector space, 25:34181
calculations for N = 82 even-even nuclei using quasiparticle interactions, 25:23048
calculations for N = 82 odd-proton nuclei using shell model and Tamm-Dancoff approximation, 25:43989
calculations for N = 88 nuclei, using centrifugal stretching model, (T), 23:28306
calculations for N = Z closed-shell nuclei, using effective interaction, (T), 24:43537
calculations for neutron closed-shell nuclei using BCS approximation, (T), 22:48602
calculations for neutron single-particle states using Woods—Saxon potential with Thomas spin—orbit term, (T), 23:13339
calculations for nickel isotopes using BCS approximation, (T), 23:19349
calculations for nuclear deformation-energy surface using single-particle potential, (T), 24:30925
calculations for octupole transitions in S-D shell nuclei, using deformed Nilsson model, (T), 24:8849
calculations for octupole vibrational levels of even A = 228 to 252 nuclei, (T), 24:13365
calculations for odd single closed shell nuclei using surface delta interaction, 24:28757
calculations for odd-A nuclei, using projected quasiparticle states, 24:40680
calculations for odd-A Z = 40 to 60 nuclei using surface delta interaction with pairing effects, (T), 23:37200
calculations for one-particle levels of deformed nuclei, using diffuse potential, 24:38326
calculations for one-particle levels, using Woods—Saxon potential, (T), 24:22220
calculations for open-shell nuclei using pairing model, (T), 24:26687
calculations for p-, sd-, and pf-shell nuclei using projection method with realistic interactions, (T), 24:40666 (CONF-691208-(Vol.1), pp 13-21)
calculations for p-shell nuclei using unitary scheme, (T), 25:15169
calculations for quasiparticle states of spherical nuclei, 24:24608 (JINR-P4-4896)
calculations for rare earth region using hexadecapole deformation and rotation-particle coupling, (T), 25:12674
calculations for rare earth region using hexadecapole deformation and rotation—particle coupling, (T), 25:31414
calculations for rotational bands in even—even nuclei using angular momentum projection method, 25:31438
calculations for rotational states in large single j-shell, with quadrupole—quadrupole interaction, (T), 23:28325
calculations for rotational states of even—even nuclei with A = 152 to 190 including Coriolis decoupling and centrifugal stretching, (T), 23:5904
calculations for sd shell nuclei, using Coriolis-coupling model, (T), 24:43554
calculations for sd shell nuclei, using shell model with supermultiplet and SU(3) truncations, (T), 24:8869
calculations for sd-shell nuclei, using coupled-vibration model, (T), 23:21323
calculations for sd-shell nuclei, using shell model, (T), 24:20418 (JAERI-1184, pp 30-5)
calculations for self-consistent occupation probabilities using Bruckner-Hartree-Fock method, (T), 24:38351
calculations for single-particle levels using finite deformed potential, method for, (T), 23:19372
calculations for single-particle states in A = 177 region using Woods—Saxon potential, (T), 25:56837(T) (UCRL-Trans-10544)
calculations for single-particle states in deformed rare earth isotopes using finite potential with diffuse edge, (T), 23:17114
calculations for six-quasiparticle 0^+ states of nickel isotopes, tin isotopes, and N = 50 nuclei, 24:43296
calculations for spherical even—even nuclei including anharmonic effects, 25:56842
calculations for spherical nuclei using Brueckner-Hartree-Fock method in harmonic oscillator basis, (T), 24:38357
calculations for spherical nuclei using quasiparticle method, 24:33167
calculations for spherical nuclei, using self-consistent core-particle coupling method, (T), 23:42976
calculations for superheavy isotopes using hydrodynamic model with shell corrections, 24:43526
calculations for superheavy nuclei, comparison of macroscopic and microscopic methods for, (T), 23:52173 (UCRL-18899)
calculations for three- and four-body systems, using group theory, 24:20437
calculations for three- and four-nucleon systems using generalized separable-potential model, 24:24619
calculations for three-nucleon systems, using Hartree—Fock method with Tabakin potential, (T), 23:42849
calculations for tin isotopes, using self-consistent core—particle coupling model, 24:43422
calculations for transuranium region using Woods—Saxon potential, 25:31392(T) (BNL-tr-416)
calculations for vibrational states in rare-earth deformed nuclei, 24:24642
calculations for Z dependence of neutron single-particle states in A = 90 to 140 nuclei, (T), 23:17112
calculations for, realistic two-body forces for perturbation, 24:24672
calculations in 2s-1d shell using Hartree—Fock—Skyrme method, (T), 25:17965
calculations in lead region using independent-particle model, 24:43582
calculations in lead region using pairing-plus-quadrupole interaction, (T), 24:3955
calculations in local density approximation, (T), 24:38342
calculations in, projection operators for, (T), 25:1772
calculations of energy spectrum of low-lying states of spherical nuclei, 24:43462 (IAE-1855)
calculations of gamma-vibrational parameters and energies of deformed nuclei, (T), 25:50817
calculations of, in transition regions, (T), 25:28447 (CERN-70-30(Vol.2), pp 1129-32)
calculations on, dispersion relation approach to, (T), 24:52662
calculations using Bressel—Kerman and Reid potentials, matrix elements for, (T), 22:50560(R) (RLO-1062-681)
calculations using charge-independent pairing Hamiltonian, states of intermediate charge symmetry in, (T), 25:28490
calculations using constrained Hartree-Fock method, 24:43600
calculations using deformed potential well with steep edges, 24:30906
calculations using deformed spin-orbit potential, 25:43963
calculations using dispersion relation approach, 24:43541
calculations using harmonic oscillator wave functions, table of central-force geometrical coefficients for two-body matrix elements for, 23:23745 (AD-673524)
calculations using Hartree—Fock method, effective nonlocal potential for, (T), 25:1775
calculations using Hartree—Fock method, review of, (T), 23:21377 (ZFK-130, pp 70-82)
calculations using Hartree—Fock method, separable potential for, (T), 24:43538
calculations using Hartree—Fock, Tamm—Dancoff, and RPA methods, analysis of, (T), 24:6955
calculations using Hartree-Fock method for closed-shell nuclei, computer program for, (T), 22:39697 (UCRL-50430)
calculations using Hartree-Fock method, four-body potential for, 24:45817
calculations using Hartree-Fock method, origin of spin—orbit splitting in, (T), 23:15519
calculations using Hermitian random matrices with small imaginary part, 24:22202
calculations using improved Thomas—Fermi theory, 23:47046 (UCSD-10-P-11-68/69-95)
calculations using independent-particle formalism, separation of center-of-mass in, (T), 23:9058
calculations using local density approximation, method for, (T), 25:7922
calculations using nonstatic one-boson-exchange potential, 24:11028
calculations using nucleon-nucleon phase shifts, (T), 21:21594
calculations using pairing force, (T), 24:24648
calculations using particle-hole model, methods for, (T), 23:13311 (PUC-937-346)
calculations using pseudo LS and pseudo SU_3 coupling, 24:15955
calculations using random phase approximation with surface delta interaction, method for, (T), 23:19344
calculations using random phase approximation, effective forces for, 24:24666
calculations using random-phase approximation, validity of, (T), 24:3984
calculations using randon phase approximation, growth of multipole moments in, (T), 23:21403
calculations using realistic N + N interactions, 21:37859
calculations using realistic potentials, 24:20439
calculations using realistic potentials, (T), 25:7908
calculations using realistic two-nucleon interactions, methods and results for, 24:30871 (MIT-2098-593)
calculations using realistic two-nucleon potentials, (T), 23:19348
calculations using renormalized nuclear Brueckner—Hartree—Fock theory, 25:1770
calculations using RPA, renormalization constants in, (T), 25:28509
calculations using Schroedinger equations defined on Riemann manifold, (T), 23:19359
calculations using second-order perturbation theory, quartic isobaric multiplet mass equation for, (T), 23:25844
calculations using self-consistent fields, nonlocal one-body potentials in, (T), 24:8951
calculations using shell model for large j configuration, (T), 24:43556
calculations using shell model with two-particle Green functions, (T), 21:10108
calculations using shell model, use of energy-independent effective interactions in, (T), 24:22216
calculations using statistical methods, effects of discrete one-particle spectrum on, (T), 23:13325
calculations using Thomas—Fermi and refined liquid drop models, (T), 23:40123

calculations using two-nucleon potential, survey on, 21: 19305
calculations using variational and Hartree methods, hard-core potential representation by delta derivative interaction in, (T), 25:12659
calculations with shell correction, method for, 24:30888
central internuclear interaction in irreducible form, 21: 13911
central internuclear interaction in irreducible form, 21: 13912
charge and matter distribution in ground state, macroscopic formulation of systematics of, 24:43516
charge asymmetry of nuclear forces and purity of isobaric spin, 21:5576
charge radii from K x-ray spectra, (E), 24:38232
charge symmetry and energy levels of light mirror nuclei, 21:1127
classification of oscillator states for light nuclei, using unitary symmetry scheme, 24:38349
cluster effects in nuclear surface, analysis using (n,α) reactions, (T), 25:1736(R) (INR-1197)
cluster effects in, shell-model formalism using four-body potential for, (T), 23:4064
cluster properties of light nuclei, (T), 23:9063
cluster research using (p,pα) reactions, (E/T), 23:9031 (TID-24667, pp 455-63)
coherent pairing fluctuations and collective 0+ excitations, 21:10109
collective behavior in even—even 1f/sub 7/2/ nuclei, (T), 22:48603
collective excitation in, review of, 24:5455
collective excitations in continuum region, 24:24652
collective excitations in, description using phenomenological theory, (T), 24:1897
collective potential energy calculations in, (T), 25:50830
collective quadrupole states of even nuclei, (T), 23: 40129
collective rotations in the random-phase approximation, (T), 21:40480
collective states in exactly soluble three-level model of, mixing of, (T), 25:43972
collective vibrations and neutron-proton pairing, 21: 12096
collectivity in light nuclei, microscopic bases of, (T), 25: 20543
competition between prolate and oblate shapes in the A = 190 region, 24:43519
conference, 21:7831
conference, 22:17890
conference, 23:21237 (ZFK-130)
conference, 24:51993
conference on, 23:47064
conference on, 24:1868 (STI/PUB-220)
conference on, 24:24610 (STI/PUB-189)
conference on, 24:43491
conference on low-lying states in medium-weight and heavy nuclei, 22:48512 (JAERI-1158)
conference on, 1966 Tokyo, 22:27279
conference on, of light nuclei, 21:44542 (ZFK-122)
conference on, proceedings of 1967 Tokyo, 22:44776
configuration interactions using statistical ensembles, calculations of, (T), 25:20505
configuration mixing description of continuum states, 21:44743 (ZFK-122, pp 57-70)
configuration mixing in shell-model calculations, pseudo-nuclear model for testing concealed, (T), 23:4068
configurations in, symmetry for highly restricted partitions and angular-momentum states of equivalent-particle, 25:56848
construction of many-nucleon wave functions with given Young tableau, 21:35504 (UJV-1834)
construction of Slater determinants and quasiparticle vacuum states from finite number of fermion states, (T), 23:25960
continuum effects in, (T), 24:43598
coordinate transformations useful for describing collective states, 24:43504
core renormalization and scaling properties of residual interactions in, (T), 25:53876
correlation between Y_3 and Y_4 nuclear shapes, (T), 23: 40119
correlation experiments using (γ,np) reactions, status of, (E/T), 23:9034 (TID-24667, pp 480-1)
correlation with single-particle level density near Fermi surface, (T), 21:19338
correlation, of light nuclei from electron elastic scattering at high energies, (T), 23:28337
correlations in, few-particle, (T), 24:49941
Coulomb displacement energies in $1d_{5/2}$ shell nuclei, 23: 52133
Coulomb displacement energy for isobaric analog states in, 25:18008
Coulomb energies and neutron excess in, determination from isobaric analog resonances, (T), 23:47087
Coulomb energy differences in, review on, 24:15977
Coulomb energy differences of mirror nuclei in sd shell, (T), 25:23093
Coulomb-induced ΔT = 1 admixture in ground states, 25:10061 (NYO-2171-330)
data acquisition and processing using on-line computer, 22:22560(R) (ORO-1067-2)
data analysis using coupled-channel formalism for bound states, (T), 21:19333
data summaries for experimental studies of, 22:50522 (ORNL-4317-1)
deformation and compressibility in Hartree—Fock field, 25:59877
deformation effects in light nuclei, lectures on shell-model formalism for, (T), 22:48627
deformation effects in, role of prolate—oblate difference in, 24:24632
deformation effects of unpaired nucleons, 21:42707
deformation effects on E2 transitions in odd-A nuclei, (T), 23:44982
deformation effects on effective two-body interaction, 24:22229
deformation effects on nuclear radii, 23:40107
deformation in fissioning nuclei, asymmetric, 25:23024 (JINR-P4-5581)
deformation in odd-A deformed nuclei, influence on E2 transition probabilities, (T), 24:16003
deformation in rare earth and fissile regions, calculation using liquid-drop model with shell corrections, 24: 30904
deformation in the Z = 29 to 49, N = 49 to 81 region, 24:43520
deformation of heavy nuclei, theory of, (T), 23:4042 (IAE-1465)
deformation of, inelastic scattering cross sections for determining, (T), 21:10094
deformation parameters for rare-earth nuclei from alpha elastic and inelastic scattering, (E/T), 22:22593
deformations in 2s-1d shell nuclei, octupole, 23:40134
deformations of ground states of 50 < Z < 82 and 50 < N < 82 nuclei, equilibrium, (T), 23:13272
deformed states in light nuclei, (T), 23:37307
description for 2s1d-shell nuclei using Hartree—Fock method, Coulomb and center-of-mass corrections for, (T), 22:50694
description for A = 40 region using multiconfuration Hartree—Fock method, 24:43560
description for cluster and single-particle series in light nuclei, using exchange effects, (T), 24:8935
description for collective behavior in j/sup n/ configurations, (T), 24:35919
description for deformation in even-even 2s-1d shell nuclei with 2p-2h admixtures, (T), 24:49920 (CEA-R-4015)
description for deformed even-even nuclei using collective quadrupole excitations, (T), 25:28501
description for deformed odd-parity nuclei of small nonaxiality, (T), 25:39101
description for dipole charge-transfer excitations, (T), 24:52680
description for even-even nuclei using variable moment of inertia model, 24:47683
description for even-even nuclei, using cranking model, 24:40705
description for even-odd nuclei using independent quasi-particle model, (T), 25:34160 (LYCEN-6804, pp 125-52)
description for ground-state bands in even-even nuclei, 25:12640 (OU-LNS-70-2)
description for isobaric analog states, summary of, 24: 43596
description for light deformed nuclei, review on, (T), 24: 20432
description for light nuclei using generator coordinate method and angular momentum projection, (T), 25: 15196
description for light nuclei, use of realistic interactions for, (T), 23:47066
description for low-spin states of deformed even—even nuclei, (T), 24:24641
description for non-rotational states in odd A = 153 to 187 nuclei, 24:24645
description for nuclei in region of transition from deformation to sphericity, (E/T), 21:46715 (BNL-11796)
description for pairing vibrational states, using one-parameter model, (T), 24:43580
description for quasi-stationary highly excited states, 24: 24656
description for rotational even-even nuclei, using phenomenological theory, 24:30937
description for rotational moments of inertia, (T), 24: 38321
description for rotational, using collective coordinates, 24:30947
description for spherical even—even nuclei using Davydov—Chaban model, (T), 23:47058
description for spherical odd-A nuclei using residual surface delta interaction, 23:47044 (SGAE-PH-77/1968)
description for transition region using zero-point oscillations, (T), 25:15170
description for transitional nuclei, 24:43521
description for yrast region using nonaxial symmetric deformation, (T), 25:53820
description in continuum region using shell model, 21: 40501
description of, 23:40135
description of 1f-2p shell nuclei, review of, 23:46963
description of 2s-1d shell nuclei, (T), 23:46960
description of deformed nuclei, using generalized shells, (T), 23:44954
description of even-even deformed nuclei using projection method, (T), 25:34189
description of fp-shell nuclei, using effective n-p interaction, (T), 24:20426 (JAERI-1184, pp 113-14)
description of ground states using seniority and stretch schemes, (T), 23:7349
description of intermediate coupling states using nonorthogonal states of submodels in shell model, (T), 22:48609
description of isobaric analog and anti-analog states, (T), 24:8929
description of isobaric analog states, 21:42690
description of isobaric analog states using shell model, 24:15952
description of mixed shell-model states using SU(3) algebra, (T), 23:32967
description of nuclear bound states using cluster model functions, 24:11046
description of nuclear surface using statistical model, (T), 24:24618
description of 0^+ vibrational states using two-particle spin—orbit force, (T), 24:13408
description of rotational, using Beliaev—Zelevinsky method, (T), 25:12671
description of the collective 0^+ states in the Tamm—Dancoff approximation, 24:13414
description of, self-consistent, 21:42683(R) (UCB-34-P-141-8)
description of, theoretical framework for, 24:8931
description using cluster model, 23:32959
description using data on Coulomb energies, 25:28475
description using effective electromagnetic operators, (T), 24:5454
description using group theory, lectures on, (T), 22:9947
description using parametrized nonlocal effective field, (T), 24:8956
description using phenomenological collective models for even-A nuclei, limitations of, 23:49442 (IAE-1635)
description using quasiparticle theory, 24:24665
description using Regge trajectories in collective and shell models, 25:3723
description using shell and collective models, 25:23057 (AD-712728)
description using single-particle shell model, review of, 22:32721
description using state-dependent shell-model reaction matrix elements, 21:44765
description using theory of Fermi liquids, 21:40473(R) (PR-P-74)
description using thermodynamical approach, (T), 24: 5439 (FEI-133)
description using thermodynamical functions, (T), 24: 8868
descriptions for deformed even nuclei, phenomenological, 24:30936
descriptions for deformed odd-A nuclei, 25:53870
descriptions for superheavy nuclei, 24:20435
descriptions using effective interactions, survey of, 24: 24668
determination from atomic hyperfine structure measurements, review of, 23:36483
determination from electron reactions, review of, 22: 22272 (CONF-670923-, pp 156-95)
determination from K-mesic atoms, review of research on, 22:18110
determination from mesic atom studies, (T), 22:18311
determination from nuclear reactions, 24:28846
determination from nucleon—nucleon interactions, 24: 24670
determination of cluster, from angular distributions for d^* singlet and triplet in d + p → 2p + n interactions at 52 MeV, (E), 25:17371 (NP-18561)
determination of nuclear parentage using two-nucleon transfer reactions, 24:43576
determination of proton and neutron distribution differences using (e,e'p) and (e,e'n) reactions, (T), 24: 52644 (ISS-69/34)
determination using electron inelastic scattering as probe, (E/T), 24:30875
determination using muons and pions as probes, review of, 24:24679
determination using photons as probe, 24:35895 (KAPL-P-3866)
determination using photons as probe, 24:35896 (KAPL-P-3867)
diagrammatic method of the particle-vibration coupling model, 25:50814
difference between neutron and proton distributions, (T), 23:45008
dipole modes in, vibrational field studies of, (T), 24: 47667
Dirac equations for electron-nucleus processes in light nuclei, scattering solutions of, (E), 22:9979
ΔN = 2 coupling between one-particle orbitals in rare-earth nuclei, (T), 25:50812
E2 matrix elements from beta vibrational states, 24: 43346
effect of molecular electronic structure on, (T), 24: 22225
effective central interaction for Hartree—Fock calculations, 21:40504
effective field of a spherical system with an open subshell, (T), 21:2797
effective interaction in sd shell, T = 0, 22:37380
effective interaction parameters of the 1p shell, 25: 25823
effective interactions in, (T), 24:20452
effective interactions in, t-matrix formalism for, 21: 19303
effective many-body forces in the 1f/sub 7/2/ shell, 24: 18467
effects in nuclear reactions, 24:20442
effects in radiative transitions from highly-excited states, 24:24657
effects of Hartree—Bogoliubov transformation on nuclear ground-state symmetries, (T), 22:48597
effects of internal, on available energy for proton reactions with complex nuclei at high energies, (E), 21:27300 (NEVIS-159)
effects of mixing of states on nuclear rotational level excitation by heavy particles, 24:11058
effects of residual interactions on Coulomb energy shifts in analog states, 24:38348
effects of short-range correlations on long-range effects in charge distribution, (T), 24:43518
effects on (π^+,2p) reactions, (E), 21:46667
effects on internal conversion coefficients for E1 transitions, (T), 22:20732
effects on internal conversion, (E), 21:7782
effects on internal conversion, (T), 21:42700
effects on nuclear binding energy, (E/T), 21:10105
electron scattering experiments on, radiative corrections for, (T), 23:9016 (TID-24667, pp 231-48)
energy dependence of mass operator and T-matrix in, 23:40094
energy gap calculations using Yale—Shakin and delta interactions, (T), 24:38329
energy level densities in, calculations using spin-dependent shell model, (T), 24:11051
energy level densities in, independent-pairing model for calculation of spin cutoff factors for, 24:22113
energy level spacings in, random-matrix model for description of, (T), 24:5458
energy levels for three-nucleon system, group theoretic classification scheme for, (T), 24:13405

energy levels from photoabsorption, effect of negative-parity collective levels on dipole, (T), 24:8938
energy levels from resonances in nuclei, spreading widths for isobaric analog, (T), 25:5644
energy levels in 2s-1d shell nuclei, calculation for oxygen-16 4p-4h analogs, 24:43259
energy levels in even—even N = Z nuclei from carbon-12 to iron-52 from strong-interaction quartet model, (T), 24:52732
energy levels in j = 3/2 shell, group-theoretical analysis of, 24:3959
energy levels in shell, mixed irreducible representations of U(3) for particle—hole, 21:27321
energy levels in two- and three-body systems, calculations using strong coupling model with Yukawa potential, 24:1898
energy levels in, Fermi system with equal spacings between, 21:30033(T) (AD-648883)
energy levels in, mechanism for rotational spectrum in phonon model for, 25:53827
energy levels in, projected spectra from deformed correlated intrinsic state for, (T), 25:50840
energy levels of A = 11 to 12 nuclei, compilation of, 22:35230
energy levels of A = 167 to 183 nuclei, Coriolis correction to decoupling parameters of 1/2⁻(541) rotational band, (T), 24:22235
energy levels of A = 20 through 60 nuclei, cluster, (T), 24:1793
energy levels of deformed even—even nuclei, two-phonon, (T), 24:1896
energy levels of deformed nuclei, effect of phonon—quasiparticle interactions on, (T), 24:24644
energy levels of deformed nuclei, identification of β-vibrational, (T), 23:40145
energy levels of even—even A = 150 to 174 nuclei, calculations using superfluid model with Nilsson and Woods—Saxon potentials for quadrupole one-phonon, (T), 23:4049 (JINR-E4-4075)
energy levels of even—even nuclei, calculations using variable moment-of-inertia model for ground-state bands, (T), 23:31075
energy levels of even—even nuclei, tabulation of quasi-ground, quasi-β, and quasi-γ bands, 24:6827 (INSJ-111)
energy levels of ground-state band of even—even nuclei, nuclear-softness model for, 25:50842
energy levels of intermediate and heavy nuclei, deviations in statistical description, 23:47041 (ITEF-654)
energy levels of isobaric multiplets, Coulomb displacement in, (T), 23:23772
energy levels of light nuclei, classification using subgroup chain, (T), 23:28342
energy levels of many-body nucleon systems, method for integrating wave equation for, (T), 23:1927 (AD-671630)
energy levels of odd-A deformed rare-earth nuclei, single-particle and vibrational, 23:23773
energy levels of odd-A nuclei, analysis using Tamm—Dancoff method, (T), 23:42973
energy levels of p- and sd-shell nuclei, classification using S/sub n/ subgroups, (T), 23:28343
energy levels of spherical nuclei, statistical estimation of monopole vibrational, (T), 24:22226
energy levels of the four-nucleon systems, 21:42681 (NP-16946)
energy levels of three-proton systems, resonance widths in helium-3 (p,n) reactions, (E), 24:8833
energy levels of two-cluster nuclei, symmetry properties of orbital, (T), 24:3971
energy-level calculations in the rare earth region using diffuse potential, 21:40424 (JINR-P4-3451)
energy-level calculations in, Morse potential for, (T), 24:1910
energy-level densities and strength functions near neutron binding energy, 24:24658
energy-level densities from cross-section fluctuations, (T), 21:46808
energy-level density near Fermi surface, correlation with shell structure, 21:19338
energy-level density parameters and average level spacings in, 23:49355 (JAERI-1183)
energy-level spacings in, statistical analysis of spacing distribution of, (T), 24:38352
energy-level studies using charged-particle and (n,γ) reactions, 21:15606 (BNL-10992)
equilibrium deformations in rare-earth region, Nilsson model calculations of, 25:20367 (INR-P-1216)
equilibrium deformations in, calculation using volume conservation condition, (T), 24:52709
equilibrium deformations of ground and excited states of Z > 50 and N < 82 nuclei, (T), 23:4050 (JINR-P4-4054)
evidence for deformation in the near closed-shell nuclei, (T), 23:19277
evidence for quartet, in medium and heavy even-even nuclei, (T), 25:17666
excitation modes in isospin operators for, one- and two-particle, (T), 24:28835
expansion of stretch states in, method for, (T), 24:5461
Faddeev equations for general case of three particles with spin, angular-momentum decomposition for, (T), 25:12692
fine structure of isobaric analogue resonances, (T), 21:1143
formalism for even spherical nuclei, using random phase approximation, 22:27316
formalism for finite nuclei using Hartree—Fock method with angular momentum projection, (T), 22:32555
formalism for medium-weight nuclei, using two- and four-quasiparticle Tamm-Dancoff theory, (T), 22:22635
formalism for nuclear many-body problem using linked-cluster expansions, 22:1722
formalism for rotational states of neutron-excess nuclei, using stretch scheme, (T), 22:27308
formalism for states of high angular momentum in odd-odd nuclei, 22:20697
formalism for Z = 28, 50, and 82 even—even nuclei, (T), 22:48592
formulation for giant resonance states, lectures on, (T), 22:53221 (NRL-6729)
formulation of, review of, 22:32722
four-body problem in, calculation of bound state using strong coupling model and harmonic potential, (T), 24:6956
ground-state correlations in vibration nuclei, perturbative approach to, (T), 24:24634
ground-state properties of light closed-shell nuclei, solution of reaction matrix equation for, (T), 23:37294
group representations in relation between symplectic and quasispin, 24:43558
group symmetries for, lectures on, (T), 25:56838 (UR-875-350)
group-theoretical decomposition of effective interaction in the sd-shell, 23:40115
Hartree—Fock calculation of, Slater determinants and parity projection in, 24:52719
Hartree—Fock calculations for A = 4 to 12 nuclei, angular momentum projection in, (T), 25:7901
Hartree—Fock calculations for even—even N = Z nuclei, 24:43152
Hartree—Fock calculations for light nuclei, 24:38302 (IFA-FT-78)
Hartree—Fock calculations for s-d shell nuclei, (T), 24:3975
Hartree—Fock calculations for, isotopic spin mixing in, (T), 24:43561
Hartree—Fock calculations in 25-1d shell using Woods—Saxon basis functions, (T), 23:49363
Hartree—Fock calculations in 2s-1d shell, particle-hole admixtures to, (T), 25:12682
Hartree—Fock calculations in deformed s—d and 2p—1f shells, (T), 25:7902
Hartree—Fock calculations in, non-singular local potential for, 24:43564
Hartree—Fock calculations in, restoration of rotational symmetry in triaxial, 24:43566
Hartree—Fock calculations in, review of, 24:5453
Hartree—Fock calculations of charge radii and single-particle energies in, effect of density-dependent forces on, (T), 25:39088
Hartree—Fock calculations of, review of, 25:5859
Hartree—Fock calculations using nonlocal potential, (T), 24:15981
Hartree—Fock calculations using realistic forces and mixed parity, 24:43562
Hartree—Fock calculations using realistic potential, (T), 24:20453
Hartree—Fock calculations using simple reaction matrix, (T), 24:30939
Hartree—Fock calculations with soft-core potential, 24:20440
Hartree—Fock calculations with Wood—Saxon potential, 23:34807 (N-69-17976)
Hartree—Fock equations for, symmetry restrictions in, (T), 23:15507
Hartree—Fock problem in, relation between random phase approximation and, 22:35383
Hartree—Fock states in even—even N = Z nuclei, 2p—2h admixtures to, (T), 25:7903
Hartree—Fock theory for light α nuclei, 23:40132
Hartree—Fock—Bogolyubov calculations in 2s-1d shell, (T), 23:52132
Hartree—Fock—Bogolyubov calculations in p—f shell, 25:7918
Hartree—Fock—Bogolyubov calculations with realistic N-N interaction, 24:30942
Hartree-Fock calculations in, restoration of rotational symmetry for triaxial, (T), 24:3979
Hartree-Fock calculations of, comparison of velocity- and density-dependent potentials for, (T), 24:1873
Hartree-Fock—Bogolyubov calculations in 2s—1d and 2p—1f shells, neutron—proton pairing with T = 0 and T = 1 in, (T), 25:39080
hexadecapole deformation effects on properties of quasi-particle states of rare-earth nuclei, (T), 23:44886(T) (KFK-tr-294)
hole structure from quasi-free scattering processes, (T), 25:15156
internal conversion studies of, (T), 21:2761
isobaric analog states in, review of formalism for description of, (T), 25:28507
isobaric analog states in, review of research on, 24:24653
isobaric multiplet mass equation for, (T), 23:32956 (PUC-937-363)
isobaric spin mixing in, 24:28831
isobaric spin mixing ion, calculations using self-consistent treatment of Coulomb interactions, (T), 23:32964
isomorphic model of closed-shell nuclei, (T), 25:39077
isospin formalism for studies of, (T), 23:11054
isospin mixing in ground states, role of giant monopole state in Coulomb-induced $\Delta T = 1$, (T), 25:36845
isospin mixing in ground-state, calculation using single determinant wave functions, 24:20433
isospin polarization in the many-body problem, 24:20457
isospin structure of pairing vibrations, (T), 23:19340 (UCRL-18715)
isospin symmetry in, review of, 24:5456
isotope and shell effects in highly excited nuclei, 24:26681
isotope shift of nuclear charge distribution, 23:42990
isotope shift of nuclear charge radii, determination from K x-ray spectra, (E), 23:37256
isotope shift of the nuclear potential radius, (T), 22:30074
isotopic variation of nuclear dimensions by alpha elastic scattering, (E/T), 22:16052
K-isomerism in, systematics of, (E/T), 24:16001
kinematics of, nomograms for problems in, (T), 24:5440 (JINR-4-4109)
lectures on, 22:16092
lectures on, 22:22620 (ISS-67/23)
lectures on, 23:42958(T) (NP-tr-1787)
lectures on, 25:7887 (STI/PUB-249)
level densities in, relation between level density parameters and mass shell corrections for, (T), 23:34820
level density calculations in, effect of shell structure and pairing interaction on, (T), 25:23091
level density in near-magic nuclei, 24:38341
level density in rare earths, effects of structure of one-particle spectrum on, 24:38337
level density of degenerate Fermi systems, perturbation method for, (T), 23:32968
low-lying opposite-parity states in vibrational and transitional nuclei, (E/T), 24:43509
many body problem in, variationally determined transformation for nucleon correlations in, 24:13424
many-body problem for unfilled shells, Fock approximation in, 21:13910
many-body problem in, collective coordinates in, 21:2774
many-body problem in, Green functions for form of relativistic nucleon-meson field theory for, 24:43463 (RLO-1388-573)
many-body problem in, variational method without wave functions for, (T), 23:44988
many-quasiparticle states in, survey on, 24:43597
mass number dependence of nuclear charge and mass distributions, 21:35524
mass relations from O_h symmetry, (T), 22:30055
matrix elements for calculations in, connection between Sussex and on- and off-energy shell plane wave, (T), 23:40151
matrix elements for E2 transitions in, sign determination using phenomenological theory, (T), 24:1893
matrix elements of many particle-many hole states, 24:13419
measurements on, by conversion electrons following neutron capture, (E), 24:47668
mechanisms governing interacting systems of nucleons, microscopic theory of, (T), 25:5847
microscopic description for 2p-1f shell nuclei, (T), 25:17967
mixed-configuration shell-model calculations with N = 28, Z = 21-28, 25:1779
motion in, collective variables for, 21:25589
neutron and proton radii in, determination from semi-empirical mass formula, (T), 24:15985
neutron and proton single-particle states at the same mass number, similarity between, (T), 22:46824
neutron halo in heavy nuclei from meson (K^-) capture data, (T), 23:40140
neutron pairing states in even—even nuclei, 23:45005
neutron pairing states in even—even nuclei, (T), 23:52172 (UCRL-18667, pp 133-67)
neutron radius in, characteristics of, 24:43522
neutron separation and pairing energies in even-Z N = 82 through 126 nuclei, (E), 23:47034
neutron single-particle energies in Saxon—Woods potential, (T), 23:19354
neutron single-particle states in, calculation for spin-orbit splitting effect using velocity-dependent potential, 24:24627
neutron states in A = 140 to 150 nuclei, identification of, (E/T), 24:1861
neutron strength functions in, influence of shell stabilizing effects on, (T), 24:1901
neutron-level spacing distributions for intermediate and heavy nuclei, deviations from statistical description of, (T), 24:8941
nuclear charge distributions in, self consistent calculation for, (T), 24:1899
nuclear charge radii measurements using x-ray isotope shift, 24:24664
nuclear data sheets for A = 55 nuclei, 24:20359
nuclear field effects on, (T), 21:10085
nuclear forces in, origin of hard core in, 21:2803
nuclear interaction matrix elements for calculations in, derivation from phase shifts, (T), 24:1916
nuclear level densities in, spin dependence of, (T), 25:3765
nuclear matter calculations with soft-core potentials in momentum space, 21:13909
nuclear pairs in Cusson model of, application of parastatistics to many-body problem of, (T), 25:39120
nuclear potential for calculations in, effective two-body, (T), 23:44841
nuclear surface properties in, research using K-mesic atoms, 24:52446
nucleon correlations in nuclear surface, short-range, 21:19304
nucleon correlations in vibrational nuclei, methods for calculation of ground-state, 24:13425
nucleon correlations with contact and pairing interactions, four-body, (T), 21:2778
nucleon pair interactions in nuclei, structure of matrix elements for, 24:38339
nucleon pairing vibrations in, (T), 23:40143
nucleon separation energies, shell-model analysis of, (T), 25:3754
nucleon—antinucleon bound state, existence of heavy meson resonance as, 25:28026 (NP-18774)
nucleon—nucleon interaction for distorted-wave analysis of nucleon inelastic scattering near closed shells, effective, (T), 23:1933 (TID-24733)
nucleon—nucleon pairing calculations for, effects of self-energy term on, (T), 23:1940
nucleon—nucleon potential for calculations of, phase-shift analysis for matrix elements of, (T), 23:5971
nucleon—nucleon potential for Hartree—Fock calculations in, 23:42959 (ORNL-TM-2556)
nucleon—nucleon potential for, field-theoretic, 25:3414
nucleon—nucleon potential, one-pion-exchange contribution to weak P- and T-violating, 25:59408

numerical calculations for 1P shell nuclides using a central potential and proper exchange parameters, 22: 32706
octupole states of even-even A = 150 to 176 nuclei, (T), 24:43502
odd-even staggering of nuclear radii, 25:20520
of semi-magic nuclei, (T), 25:50815
off-shell continuation of the two-nucleon matrix with a bound state, 24:40677
orbiting clusters in even-even nuclei, 24:13422
pair correlations from double transfer reactions, (T), 24: 24649
pairing problem in, method for exact solution in LST scheme, 23:25970
pairing vibrational excitations in, research using two-neutron transfer reactions, 24:24650
pairing vibrational states in, description using generator coordinate method, (T), 23:44986
pairing vibrations in, convergence of Marumori's boson expansion for, (T), 24:15988
pairing vibrations in, derivation using Hartree—Bogolyubov and generator-coordinate methods, (T), 25:7903
parity and time reversal violation in, (T), 24:52695
parity in, review of, 24:15616
parity mixing effects in, four-particle model for analyzing, (T), 23:1946
parity violating effects and weak interactions in, experimental studies on, 25:25811
particle—hole description of, theory of, 23:31079
particle—hole excitations with complete single-particle basis, (T), 23:4074
particle—hole spectral relations in, (T), 24:15982
particle—phonon interaction in odd-A nuclei, invariance properties of, (T), 23:5947
Pauli principle in center-of-mass system, 21:27626
phase transition from spherical to deformed nuclei, 24: 43507
phase transitions between spherical and deformed nuclei, analysis using variational method, (T), 24:3982
phenomenological study of nuclear vibration, 24:43508
phonon model description of spherical nuclei, 23:44994
polarization effects in, review of, (T), 21:31831 (INP-536/PL)
potential-energy surfaces of rare-earth nuclei, collective, (T), 23:5952
projected deformed states and anharmonic vibration in spherical nuclei, 23:21378 (ZFK-130, pp 179-81)
projected Hartree—Fock—Bogoliubov calculations for p-f shell nuclei, 25:50855
projection methods in stretch scheme for, 25:17976
projection of angular momentum states from Gel'fand U(3) basis, (T), 23:1951
properties for odd-A nuclei, calculations using Samm—Dancoff approximation and surface delta interaction, (T), 23:42980
properties of j^3 configuration, 24:30950
properties of nonaxial odd-A nuclei, sum rules for, (T), 23:44991
properties of pairing in nuclei demonstrated by a solvable model, 24:11049
properties of the matrix elements of the effective interaction determined by a separation-condition variational method, 24:35904
proton and neutron distributions using an effective single-particle potential, (T), 23:44997
quadrupole transitions in, method for analysis of Moessbauer spectra from, 23:47086
quasi-particle approximation of pairing in, 23:49481
quasi-particle factorization of j shells of nuclei, development of, (T), 25:12666
quasi-particles in, gauge transformations and local charges of, (T), 25:20082
quasiparticle states in spherical nuclei, 24:24639
quasiparticle—phonon interactions in deformed nuclei, 24:43496
radii, calculations of odd—even staggering of, (T), 25: 5856
reaction amplitudes, use of resonant states in eigenfunction expansion of, 22:16068
reaction amplitudes, use of resonant states in eigenfunction expansion of, 22:16068
reaction matrix for A = 18 nuclei, 24:11042
reaction matrix theory for, Brueckner, 24:16007
relation between $\Delta\langle R/\text{sub } p/^3\rangle$ and $\Delta\beta/\text{sub } p/$ in the Nilsson model, 24:43515
relativistic corrections in shell-model calculations of, (T), 25:50663
research at BNL, July 1968 to June 1969, 24:18056(R) (BNL-50169)
research at Florida State University from October 1, 1967, to September 30, 1968, 23:37284(R) (AD-684735)
research at intermediate energies at Rice Univ., 1970 to 1971, (E/T), 25:59693(R) (ORO-1316-100)
research at ISOLDE project at CERN, 24:5421
research at OSIRIS facility, experimental techniques for, (E), 25:28107 (CERN-70-30(Vol.2), pp 1003-5)
research at Pennsylvania Univ, 21:3971(R) (NYO-2171-210)
research at Pennsylvania Univ., June 1970 to May 1971, (T), 25:40903(R) (NYO-2171-445)
research at Pennsylvania Univ., Sept. 1968 to May 1970, (T), 24:42889(R) (NYO-2171-310)
research at Saha Inst. of Nuclear Physics, summary of, 24:28845
research at Univ. of Notre Dame, 24:6947(R) (AD-692138)
research at University of Maryland January through September 1969, (T), 24:3952(R) (ORO-3765-22)
research at University of Maryland, theoretical, 25: 12639(R) (ORO-3765-28)
research at Washington Univ., Sept. 1970 to Sept. 1971, (T), 25:41255(R) (RLO-1388-611)
research in nuclear surface region using high-energy beams, (T), 23:19335 (RHEL/R-166, pp 33-9)
research in s-d shell using γ-ray angular correlation techniques, 24:28747
research in USSR, collection of abstracts on, 24: 26582(T) (NP-tr-1872)
research on A = 4, review of, 23:25790
research on closed-shell and near-closed-shell nuclei, review of, 25:12432 (LYCEN-7034, pp 117-46)
research on collective and particle states using high-energy electron inelastic scattering, (T), 23:9009 (TID-24667, pp 150-4)
research on high-isospin-nuclei and multiplets, review of, 23:11063
research on highly excited states using monoenergetic neutron capture γ beams, (E), 22:48511 (IA-1163)
research on highly-excited states using neutron spectroscopic methods, 25:34156 (JINR-E4-5711)
research on light nuclei using (π^{+-},π^{0}) reactions, (T), 23:19147
research on light nuclei using proton scattering at high energy, (T), 22:53088
research on light nuclei using single recharging of mesons (π^{+-}), (T), 23:7218
research on light nuclei, using (e,e'd) reactions, (T), 23: 19396
research on light nuclei, using low-energy nuclear reactions, 24:28830
research on medium and heavy nuclei, survey of trends in, 24:38304 (JINR-P4-5045)
research on medium-weight nuclei using isobaric analog resonance excitation, (T), 22:48575 (JAERI-1158, pp 64-7)
research on neutron-deficient lanthanides, review of, 24: 1848
research on neutron-deficient nuclei at Dubna synchrocyclotron, review of recent, 23:39995
research on nuclear charge density distributions, survey of, 23:31082
research on particle unstable states using particle transfer reactions, (T), 22:27244
research on sd-shell nuclei, using photonuclear reactions, (E), 22:18162
research on three-body, using photonuclear reactions, (T) , 23:21241 (ZFK-130, pp 213-19)
research on vibrational states using inelastic scattering, review on, 24:24651
research on, Data Summaries for, 24:1732 (ORNL-4317-2)
research on, high-energy physics applications in, (E), 22: 17891
research on, problems in current, 23:32961
research on, review of, 22:53226
research on, review of, 24:1888
research on, review of, 22:1376(R) (NYO-2171-233)
research on, review of, 24:42894
research on, review of experiments using CERN 600-MeV synchrocyclotron for, (E), 22:18310
research on, review of methods for theoretical, 25:34183
research on, use of AVF cyclotrons for, 22:15885
research on, using high-energy particles, 23:30705
research program using electron scattering at Stanford Mark III linear accelerator, lectures on, 22:37628 (ISS-68/1)
research programs using elastic scattering, review of, 21: 19317
research progress at University of Texas during 1969, 24:22147(R) (ORO-2972-123)
research techniques for, review of, 21:5575
research using (d,n) and (p,n) reactions with time-of-flight method, 21:38160 (ORNL-P-3206)
research using (d,p) and (d,t) reactions, 24:38323
research using (e,e'n), (e,e'p), and (e,e'np) reactions, (E/T), 23:9029 (TID-24667, pp 427-42)
research using (e,e'p) reactions, 21:5574
research using (e,e'x) reactions, (E/T), 23:9032 (TID-24667, pp 474-7)
research using (e,π) and (γ,π) reactions, (T), 23:9037 (TID-24667, pp 497-502)
research using (γ,π) and (π,γ) reactions, (E/T), 23: 9036 (TID-24667, pp 495-6)
research using (p,2p) reactions at medium energies, 22: 33187 (ISS-66/50)
research using (p,2p) reactions, (E/T), 23:9030 (TID-24667, pp 443-54)
research using (p,2p) reactions, review on, 24:47682
research using (p,px) reactions and neutron pickup in inner shell, (E), 23:8936 (TID-24667, pp 464-73)
research using (p,t) reactions, tables of structure amplitudes for, (T), 22:53078 (UCRL-18268)
research using (t,d) reactions at low energy, (T), 22: 27365
research using (t,p) reactions, (E), 21:15605
research using accelerators, 24:38325
research using alpha inelastic scattering, (T), 22:16082
research using alpha scattering, (E/T), 22:32708
research using angular correlation and spectroscopic methods, dissertation summary on, (E), 22:39660
research using beta decay and neutron capture, 22: 32727
research using charged particles at medium energy, 21: 5551
research using chemical effects on nuclear transitions, lectures on, 22:42096 (BNL-50100)
research using compound-nucleus reactions, review of, (T), 22:20761
research using deuteron inelastic scattering and (d,He-3) reactions, (E), 22:27008
research using diproton model for (p,2p) reactions, (T), 21:31838 (RHEL/R-136, pp 89-130)
research using direct nuclear reactions, (T), 21:34022 (INP-525/PL)
research using dynamic effects in μ-mesic atoms, (T), 23:37305
research using electron and meson (μ) scattering, radiative background in, (T), 23:9019 (TID-24667, pp 265-7)
research using electron and proton elastic scattering at high energies, review of, 22:50675
research using electron elastic and inelastic scattering, survey of, (E), 22:27380
research using electron elastic and inelastic scattering, review of, 22:18312
research using electron inelastic and quasielastic scattering, (E/T), 22:27381
research using electron inelastic scattering, (E/T), 21: 27526 (SAL-6)
research using electron quasielastic scattering on light nuclei at high energy, (T), 23:10985
research using electron scattering, 24:52676
research using electron scattering with nucleon emission, (T), 22:9964
research using electron scattering, (T), 22:16063
research using electron scattering, review of, 22:20731
research using electron scattering, survey on, 24:52677
research using electron scattering, trends in, (E/T), 23: 9007 (TID-24667, pp 93-112)
research using elementary particle reactions at 100 to 600 MeV, (T), 22:48614
research using elementary particles, review of, 21:9929
research using epithermal neutron capture, (E), 22:3686 (BNL-11903)
research using excitation of isomeric states, method for, (E/T), 22:48573 (JAERI-1158, pp 1-9)
research using fast neutron inelastic scattering, (E), 22: 27159
research using fast neutron total cross sections, 23: 47069
research using fast neutron-induced reactions, survey of, 22:39565
research using gamma spectroscopy in electron scattering experiments, (E/T), 23:9038 (TID-24667, pp 505-11)
research using γ angular distributions from heavy ion-induced reactions, (T), 22:27335
research using γ transitions in nuclei, survey of, 23: 37287 (KURRI-TR-10, pp 114-37)
research using heavy-ion-induced nuclear reactions, conference on, 23:25940 (KURRI-TR-18)
research using helium-3-induced direct reactions, (E), 22:39688 (CONF-670970-, pp 139-43)
research using helium-3-induced reactions and scattering, conference on, 22:39683 (CONF-670970)
research using helium-3-induced reactions, conference on, 22:39684 (CONF-670970-, pp 3-12)
research using high-energy electron scattering, (T), 23: 37304
research using high-energy heavy-ion beams, developments in experimental techniques for, 24: 43501
research using high-energy photonuclear reactions, (E/T), 23:21394
research using high-energy proton beams, (T), 23:19336 (RHEL/R-166, pp 41-65)
research using high-energy proton beams, description of, (E), 23:19334 (RHEL/R-166, pp 19-32)
research using high-energy reactions, conference on, 23: 19332 (RHEL/R-166)
research using hyperfragments, 21:15487 (CONF-660221-, pp 128-31)
research using inelastic scattering, lectures on, 21:40475 (UCRL-17503)
research using intermediate-state nuclear reactions, review of, (E/T), 23:21374 (ZFK-130, pp 1-10)
research using isobaric analog resonance excitation, (E/T), 22:9927
research using isobaric analog resonance reactions, survey on, 24:40665 (CONF-691208-(Vol.1), pp 3-12)
research using isobaric analog resonances in (p,γ) reactions, 21:19293 (INSJ-102)
research using isobaric analog resonances, (T), 22:7762
research using isobaric analog resonances, review of, 23: 32966
research using K-mesic atoms, (E), 23:47045 (UCRL-18891)
research using K-meson beams, 25:25813
research using meson (μ^-) capture, (T), 23:13320
research using meson (π) induced nuclear reactions, (E), 23:19141 (RHEL/R-166, pp 91-100)
research using meson (π) reactions and scattering, (E/T) , 23:9040 (TID-24667, pp 611-25)
research using meson (π) reactions at low energy, survey of, (E/T), 22:18313
research using meson (π) reactions with nuclei, (E/T), 23:19350
research using meson (π) reactions, (T), 23:19338 (RHEL/R-166, pp 103-19)
research using meson (π) reactions, review of, (E/T), 22:20736
research using meson (π^{+-}) reactions, review of, (E), 21: 46825
research using μ-mesic atoms, review of, (T), 23:37321
research using μ-mesic atoms, review on, 24:15978
research using μ-mesic atoms, review on, 24:52682
research using μ-mesic x-ray spectra, (E/T), 22:46834
research using μ-mesic x-ray spectra, survey of, 22: 20735
research using neutron capture γ resonance fluorescence, (E), 22:30043
research using neutron capture, (E), 22:26999
research using neutron elastic and inelastic scattering, (T) , 22:27379
research using neutron inelastic scattering, review of, 24: 28750
research using neutron spectroscopy methods, survey of, 24:24655
research using neutron spectroscopy, lectures on, 22: 9951
research using neutron-induced reactions with charged-particle emission, survey of, (E), 22:14077 (NYO-1082-10)
research using nuclear beta decay, survey of, 23:31092
research using nuclear reactions and scattering, survey on, 23:23763
research using nuclear reactions, (E), 23:21328
research using nuclear reactions, survey on, 24:24643

research using nuclear spectroscopy, progress report on, 24:40570(R) (CALT-63-143)
research using nucleon-transfer reactions, (T), 23:1942
research using particle scattering at very high energy, (T), 23:9025 (TID-24667, pp 359-68)
research using photonuclear reactions, (E/T), 23:9035 (TID-24667, pp 485-94)
research using polarization measurements, review of, 21:21618
research using polarized beams and targets, 21:21611
research using proton elastic scattering at 1 GeV, (E), 22:24826 (BNL-12342)
research using proton reactions above 1 GeV, 21:23402 (BNL-11285)
research using proton reactions and scattering at 1 GeV, (E), 22:26831 (BNL-12344)
research using proton reactions and scattering at 1 GeV, 21:2599 (BNL-10686)
research using proton reactions and scattering at 1 GeV, 22:29907 (ORO-1316-57)
research using proton scattering at 1 GeV, (E), 21:19174 (BNL-11035)
research using proton scattering at high energy, data analysis for, (E/T), 23:9028 (TID-24667, pp 417-23)
research using proton scattering at high energy, data analysis using Glauber formalism, (T), 23:9026 (TID-24667, pp 369-81)
research using proton scattering at high energy, data analysis and equipment for, (E/T), 23:9027 (TID-24667, pp 382-96)
research using proton-induced reactions at Rutherford PLA, summary of, 24:24520(R) (RHEL/R-187)
research using π-meson absorption experiments, 24:52694
research using π-meson scattering by complex nuclei, (E), 23:19160 (RHEL/R-166, pp 81-90)
research using reaction electron and gamma spectroscopy, status of, 23:17789 (INSJ-109)
research using resonance neutron capture γ spectroscopy, 23:11045 (BNL-12965)
research using resonance neutron capture, equipment for, 22:20578 (WASH-1079)
research using resonance neutron-capture γ-ray spectroscopy, 24:1778 (BNL-13884)
research using resonance scattering of neutron capture γ radiation, (E), 22:48510 (IA-1097)
research using resonance scattering, (T), 22:27345
research using resonance scattering, lectures on, (T), 22:9944
research using second- and third-order shell-model mass differences, (T), 22:18335
research using thermal neutron capture and fission at research reactors, 25:5474 (KFK-1197)
research using transfer reactions, (E/T), 22:20724
research using triton-induced reactions, survey of, (E/T), 22:1745
research using two-nucleon transfer reactions, 24:20421 (JAERI-1184, pp 67-71)
research using weak interactions, review on, 24:52683
research using x-ray spectra of μ-mesic atoms, (E), 21:27574(R) (NYO-GEN-72-132)
research with nucleon capture reactions, 24:38324
research with polarized deuteron beams, projects for, 23:44948 (ANU-P-440)
review of basic concepts in, (T), 21:46788 (NP-16902)
review of basic concepts in, (T), 21:46789 (NP-16903)
review of basic concepts in, (T), 21:46787 (NP-16901)
review of electron-scattering studies of electromagnetic, (E/T), 21:2603
review of experimental data and theoretical predictions concerning, (T), 25:28449 (ISS-70/17)
review of experimental data and theory on, (T), 23:19333 (RHEL/R-166, pp 7-17)
review of experiments on isobaric-analog states, 21:42682 (RLO-1388-35)
review on, 23:47080
review on, 22:41762
rotation—particle coupling in axially symmetric odd-mass nuclei, generalized treatment of, 24:43492
rotational and vibrational states in, isospin degree of freedom of pairing interaction for, (T), 24:8955
rotational band in A = 21 to 27 nuclei, K/sup π/ = 1/2$^-$, (330), (E/T), 25:50680
rotational band transitions in, SL(3,R) symmetry for, (T), 24:52712
rotational bands in, SL(3,R) representation for, (T), 24:43548
rotational bands in, SL(3,R) symmetry for, (T), 25:39084
rotational effects on nuclear shape, 24:40675
rotational states in, description using generalized Green functions, (T), 24:5462
rotational states in, random phase approximation for, (T), 23:44992
selection rules in structure of d—s shell states, SU(6) and SU(3), 22:7769
self-consistent calculations for binding energies and nuclear radii, 24:43592
self-consistent static field in the presence of two-particle-two-hole admixtures, 25:3739
self-energy of system with hard core, 25:53828
semi-classical formulation of collective states in finite nuclei, (T), 23:19355
seniority scheme for single j-shell, residual interaction for, 24:43552
seniority-1 states of the L = 0 charge- and spin-independent pairing Hamiltonian, 23:42997
sensitivity of β transitions to charge distribution, (T), 25:3744
shape isomeric states of heavy nuclei, (T), 24:20463
shell corrections for Z > 80 nuclei, (T), 23:37190 (JINR-P4-4383)
shell effects in transuranium nuclei, (T), 22:46813(T) (ANL-Trans-634)
shell effects in, stabilizing, (T), 23:49445 (ITEF-655)
shell effects on level density in near doubly magic nuclei, (T), 24:8949
shell-energy corrections for deformed nuclei, (T), 23:7360
shell-model calculations for N = 82 nuclei, (T), 23:34809
shell-model calculations for, intrinsic motion and translation-invariance in, (T), 24:45822
shell-model description for continuum region, (T), 24:24654
shells in deformed nuclei, (T), 22:27325
Siegert's theorem in, applicability of, (T), 25:59864
single-nucleon potentials in, appropriate choice of, (T), 25:20532
single-particle energy levels based on the velocity-dependent potential, (T), 24:6972
single-particle proton states in, 22:48572 (IAE-1447)
single-particle states in a deformed energy-dependent potential, 23:43003
single-particle states in spherical potential, coupled, (T), 23:23761
single-particle states in, level density formula for, (T), 24:15970
single-particle states in, review on, 24:24638
soft-pion theorems in, (T), 25:23061 (LYCEN-7017)
solution of the few-nucleon problem, 24:49924 (IAE-1879)
space symmetry in 2s-1d shell nuclei, spectral measures for, (T), 24:43553
spectral distributions in nuclei, (T), 22:16098
spectroscopic factor sum rules for, continuum contributions to, (T), 24:43589
spectroscopic factors and single-particle overlap functions for, exact equations for relating, (T), 23:13340
spectroscopic factors for two-particle transfer reactions, (T), 23:9056
spectroscopic factors from proton elastic scattering through isobaric analog resonances, calculation using isospin-dependent optical potential, (T), 23:1950
spin—orbit interactions in nuclei with large momentum, 22:5900
spin—orbit splitting, Hartree—Fock calculations of, (T), 22:16086
spin-vibrational 1$^+$ states in deformed nuclei, (T), 24:43503
stability of Hartree-Fock states against four-body correlations, (T), 22:42135
stability of heavy and superheavy elements, (T), 23:34816
statistical features of, (T), 24:5457
statistical theory for, 24:26678
statistical theory of, for medium and heavy nuclei, 23:42987
studies using tandem accelerators, conference on, 24:20382 (JAERI-1184)
study by meson reactions (π,γ) with light nuclei, 22:3802
study of short-range correlations using electron elastic and inelastic scattering, (T), 24:52653
study of, using analog—antianalog transitions, (T), 24:52657
SU(3) classification of nuclear wave functions in mixed 1p, 1d—2s shells, 21:44808
SU$_3$ description of nuclear states, (T), 21:44740 (ZFK-122, pp 20-7)
sum rules in solution of, method of nonrelativistic, (T), 25:48119
superfluid Fermi systems and ghost states in, variation of density matrix in external field for, 21:27656
supermultiplet theory of, ground-state wave functions in, (T), 22:39695 (UCRL-17989, pp 101-25)
survey of problems in, 24:1883
symmetries in, review of, 24:40692
symmetries in, review of, 24:5459
symmetry for, book on, 24:42995
symmetry for, boson operator calculus for representation theory for Sp(4) and SO(5), 23:51970
symmetry for, canonical definition of Wigner coefficients in U(n), 21:33728
symmetry for, internal labeling for compact group reduction to arbitrary subgroup in, 24:8689
symmetry for, review of tensor operators in unitary groups in, 24:20187
symmetry for, spectrum of, Casimir invariants for simple classical Lie groups in, 24:35675
symmetry for, unified approach for representations of SU(2) and SU(1,1), 24:37830
systematic structure change into the molecule-like structures in self-conjugate 4n nuclei, (T), 23:28323
systematics of Coulomb-energy differences in excited mirror nuclei, 24:38328
theories of, review of Brueckner—Bethe, Landau, and Migdal, (T), 25:36843
theory for 1f2p-shell nuclei, using deformed-orbit Hartree—Fock formation, (T), 23:1842
theory for 2s1d-shell nuclei, formalism using group representation, (T), 22:27298
theory for 2s1d-shell nuclei, using shell model, (T), 22:5809(R) (ANL-7354)
theory for A = 18 to 23 nuclei, using projected Hartree—Fock wave functions with effective interaction derived from Yale potential, (T), 23:3953
theory for actinide and superheavy elements, lectures on, (T), 23:1934 (UCRL-18355)
theory for deformed nuclei, review of, 23:31078
theory for deformed nuclei, review on, 24:38327
theory for deformed nuclei, using superfluid model, (T), 22:1741
theory for even—even nuclei, survey of microscopic and phenomenological, (T), 23:4053 (NP-17506)
theory for fp-shell nuclei, review of, (T), 22:48585 (JAERI-1158, pp 125-32)
theory for isobaric analog states, review of, (T), 23:31058 (MIT-2098-528)
theory for light deformed nuclei, Hartree—Fock formalism for, (T), 23:11047 (CEA-R-3404)
theory for multiparticle excitations, review of, 24:22197(T) (UCRL-Trans-1399)
theory for nuclear moments, 21:44738 (UCRL-17729)
theory for odd-A spherical nuclei, with quasiparticle coupling to quadrupole moment of 2$^+$ phonon, (T), 22:18240
theory for rotational states, using pair and quadrupole—quadrupole residual interactions, (T), 23:37344
theory for spherical nuclei, review of models in, (T), 22:9955
theory for spontaneously fissioning isomers, (T), 22:20644
theory for superheavy nuclei, 24:38327
theory for weakly deformed nuclei, BCS formalism for, (T), 23:4079
theory for, algebraic approach to, 24:38307 (NYO-2171-308)
theory for, quark model in, 22:20215
theory for, review on, 24:35916
theory of anharmonic vibrations in spherical even—even nuclei, (T), 23:5953
theory of collective correlations in spherical nuclei, formalism for giant resonances interacting with surface vibrations, 21:46816
theory of deformed-potential many-particle states, (T), 23:4043 (IS-T-269)
theory of dipole resonance in magic nuclei, (T), 22:7748
theory of ground-state, generalized potential formalism for, (T), 23:11044 (BARC-350)
theory of highly excited states, quasiparticle formalism for, (T), 23:1954
theory of molecule-like effects in rotational bands of light 4n nuclei, (T), 22:53235
theory of particle—hole interaction and core polarization, 21:38428
theory of single-particle states using generalized Hartree—Fock equations, (T), 23:13341
theory of spectral distributions in, (T), 25:53823
theory of, close-packed-spheron, 21:23576
theory of, formalism using cluster model, (T), 22:14068 (BMwF-FBK-67-82)
theory of, formalism using group theory, 22:1744
theory of, formalism using quasiparticle method, 21:38397
theory of, formalism using quasiparticle second Tamm—Dancoff approximation, (T), 22:26975
theory of, formulation of realistic nucleon-nucleon potentials for, (T), 22:32714
theory of, formulation using shell model, 21:35517
theory of, formulation using Sp(4) group representation, (T), 23:19364
theory of, lectures on, (T), 23:23754 (NP-17814)
theory of, molecular aspects of, (T), 22:48579 (JAERI-1158, pp 99-105)
theory of, multiconfiguration Hartree—Fock formalism for, (T), 23:17140
theory of, multiconfiguration Hartree—Fock formalism for, (T), 23:9050
theory of, parameters of Migdal formalism for, (T), 23:4077
theory of, research progress on, 21:42683(R) (UCB-34-P-141-8)
theory of, research progress on, 24:52566(R) (ORNL-4534)
theory of, research progress on unified, (T), 23:5946(R) (ORO-3765-1)
theory of, residual interactions in, 21:25579
theory of, review of collective and shell model formulations of, (T), 22:50663
theory of, review of Weekering interpretation of, (T), 23:23796
theory of, review of, (E/T), 22:20693
theory of, review of, (T), 22:50664
theory of, simplifications to formulation of radiative three-nucleon interactions for, (T), 23:39666
theory of, surface delta interaction in, 21:17421
theory of, three-nucleon calculations using realistic local potentials, 21:27640
theory of, use in calculating neutron cross sections, (T), 23:5968
theory of, using helicity formalism for multipole expansion of two-body interactions, 21:25591
theory of, using residual quasiparticle interactions, 21:23415
theory of, using surface cluster levels at high excitation energies, 23:47073
theory using elementary particle models, (T), 22:20737
theory using quasiparticle approximation and exact diagonalization methods, (T), 23:13312 (UCRL-18614)
theory using Racah treatment of residual interaction, (T), 23:19362
theory using surface delta interaction, 21:38422
three-body calculations in separable approximation for, (T), 24:13410
three-body problem in nuclear matter, (T), 22:1714
three-body problem in SU(3) representation, coordinates and observables in, (T), 23:4048 (JINR-E4-4043)
three-body problem in, analysis using separable t-matrix, (T), 24:13431
three-body problem in, case of two nucleons outside a closed-shell core, 22:11984
three-body problem in, coordinates and observables in SU(3) representation of, (T), 23:37313
three-body problem in, hard-core potential in Lippmann—Schwinger formalism for, 23:31070
three-nucleon problem in, review on, 24:15974
time reversal invariance in, review of, 24:15616
transitions between seniority-4 and seniority-2 states compared to 2-phonon-1-phonon transitions, 22:35381
two-hole states in, formalism using meson reactions (π^-, NN) for study of, (T), 25:25794 (BARC-512)
unitary-model-operator approach to, (T), 21:44794
unitary-model-operator approach to, (T), 21:44793
vibrational states in spherical nuclei, review on, 24:20444
vibrational states in, quasiparticle description of, (T), 24:24640
vibrational states of spherical nuclei, description of static quadrupole moments using self-consistent cranking approximation, 25:56860

wave functions for A = 3 and 4 nuclei, spatial symmetry in, (T), 23:25961
wave functions for low-lying states of even-even nuclei, BCS, (T), 22:42094 (ANL-7439)
wave functions for, approximation to Bethe—Goldstone, (T), 24:13426
wave functions of lowest J = 0+ states in target and residual nucleus from two-nucleon transfer reactions, (T), 23:19375

formalism for collective excitations in even spherical nuclei, using random phase approximation, 22:27316
formalism for collective excitations of even—even nuclei, review of, 23:1945
formalism for collective excitations, using quasi-boson approximation, 22:27314
formalism for collective excited states of even-even nuclei, review of, 22:1648 (ITF-67-9)
formalism for collective motion, 24:16006
formalism for deformed excited states in closed-shell nuclei, 22:14102
formalism for description of nuclear structure, review on, 24:8931
formalism for description of rotational states, 22:22643
formalism for equilibrium shapes of light nuclei, 22:9946
formalism for giant resonances in spherical nuclei, collective, 21:23572
formalism for nuclear matter, Brueckner—Goldstone, 22:1713
formalism for nuclear reactions, using shell-model basis, 24:11043

formalism for nuclear rotation, using random phase approximation, 23:44992
formalism for octupole oscillator strength distribution in even-even spherical nuclei with Z = 28 to 82, 21:1138
formalism for quasiparticle transcription in ideal space, 24:30955
formalism for spectral calculations by stretch model, 21:42711
formalism for supermultiplet of giant resonances, using realistic forces, (T), 22:20758
formalism for three nucleon systems, using separable nonlocal potential with hard-shell repulsion, 22:26814
formalism for three-body correlations in reaction-matrix calculations for nuclear matter, 22:9972
formalism for translationally invariant description of particle-hole states with continuum, (T), 22:44796
formalism for vibrating nuclei, using intermediate coupling approximation, 22:27321
formalism of close-packed-spheron, of nuclear structure, 21:23576
formalism of exactly solvable, for resonance scattering, 22:44751 (JINR-E4-3837)
formalism of exactly solvable, with pair oscillator interaction, (T), 22:39727
formalism of self-consistent Hartree-Fock calculations, 21:42709
formalism using broken-pair coupling scheme, 24:49937
formalism using Brueckner reaction matrix, 24:16007
formalism using coupling model with orbital motion, 22:1745
formalism using Hartree-Fock approximation, lectures on, 22:3756 (TID-24142)
formalism using Hartree-Fock method, pairing corrections for, 21:27627
formalism using multi-configuration Hartree—Fock approximation, 23:9050
formalism using nodal fields, review of, 23:23796
formalism using parastatistical model, 24:5445
formalism using quasiparticle method, lectures on, 22:1742
formalism using Thomas-Fermi method with local-density approximation, 22:18329
formalism using weak interaction theory, lectures on, 22:48625
formalisms for many-body problems, lectures on, 22:9945
formalisms using generator-coordinate method and random phase approximation, relation of, (T), 22:22641
formula for the charge of relativistic heavy nuclei, 23:44891
formulation for nuclear surface, analysis of Bethe's, 24:47687
formulation of three-body problem, 25:25841
formulism using mixed coupling scheme, 24:43584
four-body forces in nuclear matter, long-range, (T), 22:50695
four-body problem in, calculation of bound state using strong coupling model and harmonic potential, (T), 24:6956
four-body problem in, ground-state calculations using two-body central forces, 23:23750 (ITF-68-83)
four-body problem in, pole approximation in Faddeev—Yakubowski equations for, 24:18446 (ITEF-672)
fractional parentage and the equations-of-motion method in pairing theory, 25:31453
fractional parentage coefficients for anticommuting creation operators, 25:5822
G-matrix interaction in the 1p shell, 22:7773
gamma transitions in finite Fermi systems, 25:17983
Gartenhaus—Schwartz transformation in, 25:50806 (JINR-E4-5992)
Gaussian overlap approximation in, boson expansion corrections to, 25:46128
generalized core-polarization model for inelastic scattering, 25:50832
generalized impulse approximation of scattering, 25:20537
generalized optical model for proton elastic and quasi-elastic scattering, 22:1729
generalized optical potential in, 25:3747
generalized R-matrix analysis of simple scattering models, 21:4373
generalized seniority and structure in semi-magic nuclei, 25:50815
generator coordinate formalism in, application to nuclear collisions, (T), 25:56825 (LYCEN-7104, C6.1-12)
generator-coordinate method and random-phase approximation in, 25:18035
giant resonance and isobaric spin resonances, 21:25605
giant resonance coupling to surface quadrupole oscillations, 22:30058
giant resonances and doorway states, 21:44790
ground-state correlations as variational parameters in the many-body problem in, 25:15147 (NYO-2171-333)
ground-state correlations in extended Lipkin—Meshkov—Glick model, 25:15200
ground-state correlations in, contribution of coherent RPA modes to, 24:43585
ground-state deformation in nuclei near closed shells, 25:31451
ground-state energy of N-fermion system, lower limit of, (T), 22:44283
ground-state energy of neutron gas, 23:25958
ground-state magnetic moment calculations using first-order perturbation theory and realistic forces, 21:35532
ground-state properties of light-weight nuclei from, using Brueckner—Hartree—Fock calculations, (T), 22:3791
ground-state two-body density matrix in, variational determination of,, 24:43586
ground-state wave function in, derivation using RPA summing of perturbation theory diagrams, 25:10076
group representations in relation between symplectic and quasispin, 24:43558
Hamiltonian function for heavy nuclei in, structure of weak-interaction, 25:56768
Hamiltonian function in, diagonalization of S = 0, T = 1 charge-symmetrical, 25:20492
Hartree—Bogoliubov, application to neutron—proton pairing, 25:10060 (NP-18538)
Hartree—Bogolyubov theory with projection method, rotational and pairing correlation corrections for, (T), 22:50680
Hartree—Fock and Thomas—Fermi methods in, comparison of, 25:5873
Hartree—Fock approximation in, one-particle nuclear-density matrix in, 25:39118
Hartree—Fock calculations in s-d shell, effect of spin-dependent forces on, (T), 25:59878
Hartree—Fock calculations in, non-singular local potential for, 24:43564
Hartree—Fock calculations in, restoration of rotational symmetry in triaxial, 24:43566
Hartree—Fock calculations in, review of, 24:5453
Hartree—Fock calculations in, two-particle—two-hole mixing in, 25:50876
Hartree—Fock calculations using realistic forces and mixed parity, 24:43562
Hartree—Fock calculations with realistic hard-core potential, 21:35522
Hartree—Fock calculations with soft-core potential, 24:20440
Hartree—Fock calculations with Wood—Saxon potential, 23:34807 (N-69-17976)
Hartree—Fock energy gap in finite nuclei, 24:13420
Hartree—Fock method in, Gaussian overlap approximation for projected, 25:5815
Hartree—Fock method in, non-singular local potential for, 24:52641 (CEA-CONF-1568)
Hartree—Fock procedure for two particles in a four-dimensional function space, 25:36819
Hartree—Fock solutions in, isospin mixing of, 25:15164
Hartree—Fock, for light α nuclei, 23:40132
Hartree—Fock, Tamm—Dancoff, and RPA methods in, analysis of, 24:6955
Hartree-Fock calculations for light deformed nuclei using density-dependent interactions, 25:43986
Hartree-Fock equation in, alpha-chain type solution for, 24:45744
Hartree-Fock equations including second-order and rearrangement effects, (T), 22:37340(R) (EANDC(E)-89(U))
Hartree-Fock method in, linearized version of, 25:28519
Hartree-Fock, Slater, and Thomas-Fermi approximations in, comparison of, 25:20514
higher-order bubble corrections to two-body matrix elements in the 1s0d shell, 25:3759
hindered Gamow—Teller matrix elements in, 21:46829
hydrodynamical calculation of effective masses of binary fission, 23:32944 (BMwF-FBK-68-63)
hyperon (A) well-depth in nuclear matter, 24:13416
hyperon (A)—nucleon interaction potentials, 24:20468
hyperspherical-expansion approach to nuclear bound states, 25:3730
inclusion of P_4 term in the deformed shell-model potential, 23:28334
inertial mass parameter for fissioning nuclei, microscopic calculation of, 23:34815
inner-product integral for resonant state and shell-model applications in, 22:46821
instability of a spherical configuration in the Fermi gas model, 24:15984
integral equation method for treatment of scattering for bound particles, 21:13901
interaction between potential resonances and compound states with strong coupling in, 21:19315
interaction currents in one-meson exchange approximation, 23:11067
interaction of collective degrees of freedom in, 21:1139
interactions in Fermi system in external field, nonlocal, 23:37293(T) (UCRL-Trans-10344)
interactions in Fermi system with effective field, nonlocal, 23:5942 (IAE-1426)
interactions in the d—s shell, SU(3) reduction of, 22:7774
interactions in the p, sd, and pf shells, 22:7754
interactions in three-particle systems, weak, 23:13203
interactions in, Moessbauer test of time reversal invariance of strong, 22:50678
interactions in, optimization of phenomenological parameters of effective, 22:9929
intermediate structure in the two-channel model of nuclear reactions, 22:30070
internucleon potential in, parity-violating, 25:17545
invariance violation from velocity-dependent interactions, K, 21:23567
isobaric analog and anti-analog structure in, review on, (T), 24:8929
isobaric analog resonances from the Breit—Wigner expression, 21:25608
isobaric mass equation in, parameters for T = 3/2 multiplet in A = 4n + 1 nuclei, 25:59882
isobaric multiplet mass equation for A = 9, 13, 17, and 21, cubic term in, 25:5840
isobaric multiplet mass equation in, (T), 23:32956 (PUC-937-363)
isobaric multiplet mass equation in, model for corrections to, 24:1915
isobaric multiplets in, radiative decay-rate relation for, 25:1765
isobaric spin purity in the giant resonance, 21:25600
isobaric spin splitting of nuclear excitations, 21:25603
isobaric spin, effects of Coulomb forces on properties of, 21:25599
isobaric states and hindered Fermi matrix elements in, 21:4332
isobaric-multiplet mass equation, nonperturbative corrections to first-order, 25:17970
isobaric-spin potential in, for heavy deformed nuclei, (T), 23:40108
isospin dependence of the proton optical potential, 25:15154
isospin formalism for, 23:11054
isospin formalism in, 25:50802 (CONF-690732, pp 10.1-10)
isospin formalism in, applications of, 25:7898
isospin mixing in ground states and Fermi beta decays, 22:16094
isospin mixing in nuclear ground states, estimation using single determinant wave functions, 24:20433
isospin polarization in the many-body problem, 24:20457
isospin selection rules in, survey of, 23:19351
isospin symmetry in, review of, 24:5456
isospin-dependence of the nuclear optical potential, 23:21375 (ZFK-130, pp 11-19)
isospin-projected FBCS wavefunctions for light nuclei, 24:43489
isotope shift of nuclear charge distribution, 23:42990
isotope shifts from neutron addition, description using Hartree—Fock formalism with density-independent nucleon—nucleon potential, 22:30049 (PUC-937-314)
isovector excitations in nuclei, 24:52716
isovector magnetic moment of mirror nuclei, 24:20434
Iwamoto—Yamada cluster expansion and reaction-matrix expansion in, comparison of, 25:34180
Iwamoto—Yamada cluster expansion in, dispersion effect of nuclear medium in, 25:39081
Josephson effect in sub-Coulomb scattering of heavy ions, 25:3752
Jost function in, theorem for factorization of, 24:43469
Jost function of a nonlocal potential, 25:20539
lectures, 22:3795
lectures, 22:20669 (NP-17228)
lectures on, 23:42958(T) (NP-tr-1787)
level densities in, iterative method for calculating, 23:47052
level density formulas in, derivation for Fermi gas, 24:38317
level density in continuum region, (T), 21:42685
level density using two-body random Hamiltonian, 25:23074
local energy and Perey—Buck approximations in, simulation of nonlocal shell-model calculations by, 22:20685
local potentials in, unitary pole approximation to spin-dependent, 24:52718
long-range part of effective interaction of quasiparticles in nuclei, 24:13436
macroscopic and microscopic methods in, comparison of, 23:52173 (UCRL-18899)
magnetic moments and ft values for mirror nuclei, 23:37292 (OU-LNS-69-4)
magnetic moments in excited states from nuclear magnetic susceptibility, 21:17399
many body calculation of effective force for DWBA, 24:43546
many body problem in, approximation to Green's function for, 25:5821
many body problem in, center-of-mass localization in self-bound, 24:5444
many body problem in, separation of center-of-mass motion in, 25:46099
many body problem in, variationally determined transformation for nucleon correlations in, 24:13424
many-body approach to nuclear reactions, 22:27255
many-body calculations using the K-matrix in, 24:11034
many-body forces in, 25:20523
many-body interactions in, group classification of, (T), 22:3759
many-body nucleon systems with two-body harmonic oscillator potentials, 22:9960
many-body phase-space integrals in, method for calculating, 23:19388
many-body problem in, cluster expansion for Faddeev formalism of, 23:19389
many-body problem in, factorization of fractional percentage coefficients for, 23:5959
many-body problem in, Faddeev equations for an N-term separable potential, (T), 23:17145
many-body problem in, ground-state correlations as variational parameters in, 25:36840
many-body problem in, ground-state shape-fluctuation correlations in, (T), 23:7340
many-body problem in, group-theoretical description of, 22:9947
many-body problem in, Hartree—Bogolyubov formalism for exactly solvable model of, 23:19387
many-body problem in, lower-bound shell model for, 22:48522
many-body problem in, multiconfiguration Hartree—Fock method for, (T), 23:17140
many-body problem in, rearrangement energy for, (T), 22:3783
many-body problem in, relativistic nucleon—meson field theory for, 25:3719
many-body problem in, scattering formalism for, (E), 22:14109
many-body problem in, solution for nontrivial potentials, 21:30039
many-body problem in, two-body potentials for bound states in, 22:30104
many-body problem in, variational calculations using two-body cluster expansion, 22:27294
many-body problem in, variational method for two-body correlations in, 21:25581
many-body problem in, variational method without wave functions for, (T), 23:44988
many-body problem with attractive delta function interactions, bound-state solutions of one-dimensional, 22:46731(R) (COO-1746-8)
many-body problem with harmonic interactions, 22:46731(R) (COO-1746-8)
many-body problem with pair oscillator interaction, 22:39727
many-body problems in, algebraic approach to correct separation of center-of-mass motion in, 25:20500

many-body problems in, soft-core N—N potentials for, (T), 23:7347
many-body system of attractive fermions with arbitrary spin in one dimension, ground-state energy of, 25: 20502
many-body systems in, field theory for, 21:19323
many-boson systems in, fractional parentage coefficients for, 25:23089
many-fermion system in, R-matrix expansion for ground-state energy of, 24:52672
many-fermion systems in, time-dependent perturbation study of, 25:23090
many-particle systems in, validity of random matrix treatment for, 25:20507
mass formula in, energy-density functional form for, 25: 56853
mass formulas in, shell-model approach to, 22:30090
mass formulas, approaches to, 22:30072
mass formulas, approaches to, 22:30065
mass formulas, microscopic approach to semi-empirical, 22:30076
mass law for isobaric multiplets in, 24:13413
mass law in, derivation of Bethe—Weizsaecker, (T), 23: 9065
mass law in, description of symmetry energy term for, 24:33165
mass law in, formalism using Thomas—Fermi method, (T), 21:42684 (UCRL-17725)
mass law in, formulation with different neutron and proton radii, 24:15985
mass law in, survey on recent developments of, 24: 40667 (CONF-691208-(Vol.1), pp 23-35)
mass law in, symmetry term from Wigner supermultiplet theory, (T), 23:13305(R) (COO-1573-48)
mass quadrupole tensor and angular momentum operators for, 24:52724
mass relations in, review on, 24:15976
mass systematics for 2s + 1d shell, analysis using average energy method, 24:43550
mass systematics of the 2s-1d shell, analysis by average energy method, 23:40137
matrix elements deduced from N—N phase shifts, 23: 44999
matrix elements for one- and two-particle operators in, (T), 23:19374
matrix elements for residual interaction in sd-shell, 24: 30944
matrix elements for shell-model studies of nuclear spectra, 21:5584
matrix elements for the s-d shell, table of intrinsic, 22: 16080
matrix elements in, connection between Sussex and on- and off-energy shell plane wave, 23:40151
matrix elements of Coulomb field, operator derivation of recursion relations between radial, 22:32715
matrix elements of many particle-many hole states, 24: 13419
matrix elements of spherical tensors, tables of singles-particle reduced, 25:43982
meson (π) production in peripheral nucleus—nucleus collisions, 24:22198
meson exchange currents in weak and electromagnetic interactions, 25:20542
method of complex coordinates for 3-body calculations above the breakup threshold, 24:15961
methods in, seminar on, 25:34157 (LYCEN-6804)
microscopic approach to rotational excitations, 24:43514
microscopic description of nuclear vibrations when phonons occur at relatively low energy, 24:52659
microscopic, of nuclear collective motion, 22:30078
Migdal formalism for, parameters of, 23:4077
Migdal method in, description of, 25:34163 (LYCEN-6804, pp 215-31)
mixed-parity Hartree—Fock calculations for light nuclei using realistic forces, 24:15967
model calculations with pairing forces, 24:13401
model for high-energy photofission, 24:22195 (LUNP-6906)
model of coupling of particle-hole and 2 particle—2 hole states in continuum region, semiclassical, 21:46807
model of s-wave potentials with a hard core, 25:17993
model space calculation of the quasi-particle interaction for nuclear matter, 25:28453 (NYO-4032-37)
models of nuclear excitations, vibrational, 21:42689
moment of inertia in Hartree—Fock theory, 23:42994
moments of inertia at high rotational frequencies, 22: 27327
moments of inertia in, self-consistent formalism for calculating, (T), 21:44805
Moshinsky brackets in, derivation of sum rules and symmetry relations for generalized and ordinary, 25: 28506
multiconfiguration field theory in nuclei, 24:40678
neutron and proton effective charge corrections in, 25: 28456
neutron pairing energies in, mass and spin systematics of, 22:5882
neutron pairing states in even—even nuclei, 23:45005
neutron potentials in nuclei in isotopic sequence, 21: 1136
neutron—proton interactions in, surface delta residual, 23:47044 (SGAE-PH-77/1968)
neutron—proton pairing interaction in spherical odd-A nuclei, surface delta interaction formalism for, 23:4061
neutron-proton interactions in $1f_{7/2}$ configuration, effective, 21:44615
neutron-proton residual interaction in, 25:34182
Nilsson model for deformed phonons in, 23:34817
nonadiabatic rotational model for two strongly coupled bands in odd-mass nuclei, 23:49446 (JINR-P4-4533)
nonadiabaticity of beta vibrations in the Davydov model, 22:16081
nonlocal potential approach in relativistic nucleon-nucleon scattering, 25:5827
nonorthogonality of wave functions in resonance reactions, 21:10120
nonrelativistic electromagnetic multipole—multipole interaction between two disjoint charge distributions, 23:37330
nonrelativistic two-nucleon potential, 23:34811
nonstatic nuclear potential, review of, 22:11993
nuclear charge distribution in, 24:43522
nuclear charge radius and neutron skin thickness in, droplet-model calculation of isotope and isotone shifts in, 24:13411
nuclear compressibility in, phenomenological description for, .25:56846
nuclear deformations using the K-harmonics method, 25: 34191
nuclear density distribution in, statistical calculation accounting for radial kinetic self-energy correction to, (T), 24:3969
nuclear density in, calculation using nonlocal N-N potential, 24:33168
nuclear dynamics from muonic x-ray spectra, 22:20700
nuclear effective charges in, second-order corrections to, 24:43545
nuclear fluctuations in, unified formulation of, 21:1142
nuclear forces in, accuracy of photon correlation measurements as test of time reversal invariance of, 21:25587
nuclear masses, anomalies in, 22:32702
nuclear matrix elements in, commutator method for, 21: 7826
nuclear matter calculations using separable nucleon—nucleon potentials, 24:11033
nuclear matter reaction matrix, 24:24613
nuclear moments of inertia in, method for evaluation of, 23:40106
nuclear motion in, collective variables for describing, 21: 25589
nuclear pairing correlations in, isospin- and number-conserving formalism for, (T), 22:30073
nuclear polarization in muonic atoms of deformed nuclei, 24:49953
nuclear polarization in muonic atoms of spherical nuclei, 24:49954
nuclear potential in, continuous-spectrum aspects and finite-rank structure of self-consistent, 24:43544
nuclear potential in, energy dependence near zero energy of real local, 24:35922
nuclear potential in, formulation from Coulomb scattering data, 24:8958
nuclear potential, effect of strong interactions on weak parity-violating, 25:36458
nuclear radii, results of different methods for determining, 25:20536
nuclear rotational parameters, review of methods for determining, 21:40513
nuclear rotational spectra in, formulation using generalized Green functions, (T), 24:5462
nuclear saturation, rotational invariance, and microscopic theories of nuclear moment of inertia, 24:43512
nuclear separation energies, calculation of, 22:30082
nuclear shape in, effect of mean field on character of variation of, 21:10085
nuclear structure calculations using two-nucleon phase shifts, 21:42697
nuclear surface properties in, analysis using Brueckner method, 25:31445
nuclear symmetry energy of finite nuclei, equilibrium scheme for, 24:1880
nuclear symmetry energy of infinite nuclear matter, equilibrium scheme for, 24:1881
nuclear wave functions in unitary symmetry scheme of, two-particle fractional parentage coefficients of, 24: 1889
nuclear wave functions in unitary symmetry scheme of, fractional parentage coefficients for, 24:1892
nuclear wave functions in unitary symmetry scheme of, cluster-type fractional parentage coefficients of, 24: 1890
nucleon correlations in ground states, calculations using quasiparticle formalism, 23:9060
nucleon correlations in ground states, observation of, 23: 9022 (TID-24667, pp 325-9)
nucleon correlations in nuclei, definition of, 23:9021 (TID-24667, pp 319-24)
nucleon correlations in vibrational nuclei, intermediate coupling method for ground-state, 24:13425
nucleon correlations in, Green function method for four-body, (T), 21:21584
nucleon correlations in, testing of, 23:9023 (TID-24667, pp 330-45)
nucleon correlations in, three-body, (T), 21:30023(R) (ANL-7284)
nucleon current in, effect of conservation of, (T), 23: 13335
nucleon density distributions in, calculation using effective interaction, 24:16000
nucleon effective interaction and effective charge in collective vibration with core polarization, 22:22633
nucleon effective interaction for light and intermediate nuclei, 23:15496
nucleon effective interaction in, determination from scattering amplitude, 24:43540
nucleon effective interaction in, third-order terms in Bloch—Horowitz—Brandow expansion for, 24:43536
nucleon effective interactions in, 24:43535
nucleon effective interactions in, review on, 24:43574
nucleon effective interactions in, semi-realistic, 24:43539
nucleon exchange between two identical nuclear cores, interaction induced by, 25:17994
nucleon four-body correlations in nuclear matter, 22: 7749
nucleon interactions at small distances in, 21:37855
nucleon interactions in nuclear matter, nonlocal separable potentials for, 22:35398
nucleon interactions in, one-boson-exchange potentials for, 24:43531
nucleon interactions in, review of residual, 21:31831 (INP-536/PL)
nucleon interactions in, self-consistent theory of, 21: 25579
nucleon intrinsic motion and translational invariance in shell-model calculations, 21:31841
nucleon inverse scattering problem in, analysis using rank-two separable potentials, 23:52184
nucleon motion in deformed potential, many-particle formalism using group classification, 23:4043 (IS-T-269)
nucleon pair interactions in nuclei, structure of matrix elements for, 24:38339
nucleon pairing and separation energies of spherical nuclei, 23:23766
nucleon pairing correlations in, effects of shell structure and matrix-element fluctuations on, 21:31854
nucleon pairing correlations in, isospin and number-conserving formalism for, 22:14071 (IPNO/TH-110)
nucleon pairing interactions in, charge- and spin-independent, 21:38418
nucleon pairing interactions in, determination of strength by minimization of total energy, 24:22233
nucleon pairing interactions in, tensor forces in, 21: 44801
nucleon potentials in parity-nonconserving one-pion-exchange, 25:47900
nucleon potentials in triplet even state, nonstatic effects of OPEP in, 21:35530
nucleon potentials in, strength of repulsive, 22:5878
nucleon residual interaction in, tensor forces in, 23: 47072
nucleon residual interactions in, effect of tensor forces in, 25:3766
nucleon scattering in nuclear matter, effects of tensor forces on, 22:44798
nucleon separation energies in, calculation of single-particle, (T), 21:25566 (ISS-67/2)
nucleon—nucleon correlations from (γ,pn) coincidence experiments, short-range, (T), 24:52733
nucleon—nucleon correlations in, analysis of short-range, 25:56824 (LYCEN-7104, C4.1-17)
nucleon—nucleon interaction in superfluid model, X-representation of, 22:1709 (JINR-P4-3505)
nucleon—nucleon interaction in, description using one-boson exchange potential, (T), 25:28448 (CERN-70-30(Vol.2), pp 1133-5)
nucleon—nucleon interaction in, phenomenological description of, 23:15494 (UCRL-71436)
nucleon—nucleon interaction in, triplet—odd potentials for, 23:19346
nucleon—nucleon interactions in, analysis of potential concept for, 24:43575
nucleon—nucleon interactions in, effective, 22:27312
nucleon—nucleon interactions in, effects of core polarization on effective, 22:27311
nucleon—nucleon interactions in, electromagnetic effects in, 23:9020 (TID-24667, pp 271-86)
nucleon—nucleon interactions in, generalized seniority breaking of two-body, 22:24921
nucleon—nucleon interactions in, one-boson-exchange potentials for, (T), 22:27286
nucleon—nucleon interactions in, one-boson-exchange potentials for, 23:25955
nucleon—nucleon interactions in, phase-shift analysis of, 23:19341 (UCRL-71145)
nucleon—nucleon interactions in, renormalization of effective particle-hole, 24:13394
nucleon—nucleon interactions in, research progress on, 23:1928 (AD-671692)
nucleon—nucleon interactions in, residual, 23:19362
nucleon—nucleon interactions in, review of basic features and experimental aspects of, 25:7890
nucleon—nucleon interactions in, review on, 24:24609 (JINR-P4-4897)
nucleon—nucleon interactions in, review on potentials for, 24:43571
nucleon—nucleon interactions in, S- and P-wave effective range parameters for, 24:15606
nucleon—nucleon interactions in, separability of residual two-body, (T), 23:13338
nucleon—nucleon interactions in, separable potentials for, (T), 23:31068
nucleon—nucleon interactions in, transformation properties of Hamiltonian function for np, 24:30889
nucleon—nucleon interactions in, ultrahigh-intensity accelerator study of, 25:9810
nucleon—nucleon interactions in, velocity-dependent potentials for, 23:25967
nucleon—nucleon interactions in, velocity-dependent, 25:17998
nucleon—nucleon pairing force Hamiltonian in, isospin invariance of, 22:37391
nucleon—nucleon pairing interaction in, effects of self-energy term for, 23:1940
nucleon—nucleon potential for Hartree—Fock calculations in, 23:42959 (ORNL-TM-2556)
nucleon—nucleon potential in boson exchange theory, 22:44451
nucleon—nucleon potential in, calculation of oscillator matrix elements from phase shift data, 25:10074
nucleon—nucleon potential in, effect on two-body sum rules of nonlocality of, 25:25818
nucleon—nucleon potential in, effective nonlocal, 25: 31402
nucleon—nucleon potential in, effective triplet state, (T), 23:17143
nucleon—nucleon potential in, nature of two-pion exchange contribution to, 25:59870
nucleon—nucleon potential in, parameters for phenomenological local soft-core, (T), 25:46119
nucleon—nucleon potential in, phase-shift analysis for matrix elements of, 23:5971
nucleon—nucleon potential in, spin-isospin-independent part of, 22:42113
nucleon—nucleon potential parameters for, phenomenological, 22:32713
nucleon—nucleon potential with soft core, parameters for isotopic triplet state of two-nucleon system, 25:7914

nucleon—nucleon potential, exchange of isoscalar vector meson in nonlocal field theory for, 25:31431
nucleon—nucleon potentials for, formulation using meson theory, 22:30092
nucleon—nucleon potentials for, realistic one-boson-exchange, 22:53248
nucleon—nucleon potentials for, realistic, (T), 23:19348
nucleon—nucleon potentials from binding energies and nuclear radii of several nuclei, determination of central, 25:5831
nucleon—nucleon potentials from microscopic-model analysis of (He-3,t) reactions with light nuclei, strength parameters of effective, 25:9993
nucleon—nucleon potentials in, density-dependent, (T), 22:42087
nucleon—nucleon potentials in, determination from scattering data using Marchenko theory, 23:49450
nucleon—nucleon potentials in, equivalent nonlocal, 22:26855
nucleon—nucleon potentials in, for calculating binding energy of tritons, 24:1870
nucleon—nucleon potentials in, local phenomenological, 23:11056
nucleon—nucleon potentials in, noncentral velocity-dependent, 23:17131
nucleon—nucleon potentials in, nonstatic, 22:44793
nucleon—nucleon potentials in, off-energy-shell t matrix for local singular-core, (T), 24:24629
nucleon—nucleon potentials in, one-boson-exchange, 22:27283
nucleon—nucleon potentials in, one-boson-exchange-type, 24:42985
nucleon—nucleon potentials in, Perey relation for equivalent local and non-local, 24:11027 (LAL-1223)
nucleon—nucleon potentials in, self-consistent charge-exchange optical, 25:48115 (KFKI-71-27)
nucleon—nucleon potentials in, separable, (T), 22:5809(R) (ANL-7354)
nucleon—nucleon potentials in, soft-core, 22:27287
nucleon—nucleon potentials in, soft-core and velocity dependent, 22:9971
nucleon—nucleon potentials in, soft-core Hamada-Johnston, 22:44801
nucleon—nucleon potentials in, solution of Lovelace—Faddeev equations for local, 22:27290
nucleon—nucleon potentials in, T-matrix formalism including Coulomb effects, (T), 22:37287
nucleon—nucleon potentials with hard cores, off-energy-shell t-matrix elements for local, 22:42108
nucleon—nucleon potentials with higher-order momentum-dependent terms, 22:9967
nucleon—nucleon potentials, dependence of saturation on smoothness of, 25:12698
nucleon—nucleon tensor force in nuclear matter, approximation by local central density-dependent potential, 22:35376
nucleon—nucleon time-reversal-violating force from electromagnetic interactions, 24:35686
nucleon—nucleon-interaction matrix elements from phase shifts and Jost function, Born-approximation calculation of, 25:36853
nucleon-nucleon correlations in treatment of short-range, 25:46135
nucleon-nucleon effective interaction in, determination of f/sub 7/2/—d/sub 3/2/, 24:30943
nucleon-nucleon force in, two-pion exchange contribution to, 24:49938
nucleon-nucleon interactions in nuclear matter, nonlocal separable potential with repulsive core for, 22:39724
nucleon-nucleon interactions in single-particle potentials, wave functions for zero relative angular momentum, 21:30065
nucleon-nucleon interactions in, analysis for core polarization effects using RPA and first-order perturbation theory, 24:13440
nucleon-nucleon interactions in, effective spin dependent force for nuclear matter, 24:22234
nucleon-nucleon interactions in, one-boson-exchange potentials for, (T), 22:27281
nucleon-nucleon interactions in, pole models for, 22:20751
nucleon-nucleon interactions in, potential isospin triplet state of, 24:20445
nucleon-nucleon interactions in, research using charge-exchange reactions, 22:27009
nucleon-nucleon interactions in, triplet even potentials for, 24:49945
nucleon-nucleon interactions, weak parity-violating and strong potentials in, 25:20488
nucleon-nucleon potential in, calculations using Oakes theory of weak interactions for parity-nonconserving, 23:9043
nucleon-nucleon potential in, construction using one-boson-exchange amplitudes, 24:43529
nucleon-nucleon potential in, effective phenomenological, 24:15996
nucleon-nucleon potential in, formulation for minimal relativity requirement, 24:43534
nucleon-nucleon potential in, separable, 22:44762
nucleon-nucleon potential in, separable nonlocal, 24:13423
nucleon-nucleon potential in, soft-core, 24:45819
nucleon-nucleon potential in, very soft core, 24:43530
nucleon-nucleon potential is, isobar intermediate state contributions to, 24:43533
nucleon-nucleon potentials for many-body bound states, 22:39730
nucleon-nucleon potentials for, field-theoretical, 22:20755
nucleon-nucleon potentials for, using one-boson exchange formalism, (T), 22:20752
nucleon-nucleon potentials in, auxiliary potential method for deduction of matrix elements from N-N scattering data, 24:3981
nucleon-nucleon potentials in, derivation from one-meson-exchange amplitudes, 24:24617
nucleon-nucleon potentials in, effective density-dependent, 24:15999
nucleon-nucleon potentials in, Gilbert—Schmitt expansion for hard-core, 25:3724
nucleon-nucleon potentials in, nonlocal separable, 21:34070
nucleon-nucleon potentials in, off-shell behavior of phase-shift equivalent momentum dependent, 25:5852
nucleon-nucleon potentials in, one-boson-exchange, 23:15349
nucleon-nucleon potentials in, phenomenological, 22:39703
nucleon-nucleon potentials in, positivity conditions for velocity-dependent and quadratic spin-orbit, 25:3737
nucleon-nucleon potentials in, relation between matrix elements and phase shifts for, 24:13407
nucleon-nucleon potentials in, review on, (E/T), 22:20693
nucleon-nucleon potentials in, separable approximation to T-matrix for short-range central local, 25:43980
nucleon-nucleon potentials in, two-particle spin-orbit, 21:19292 (AD-642510)
nucleon-nucleon potentials, (T), 21:1133
nucleon-nucleon soft-core central potentials in, (T), 21:2809
nucleon-nucleon soft-core potential in, calculation of matrix elements in harmonic oscillator basis, 24:35917
number-conserving approximation to shell model, 24:15963
number-conserving sets and third-order renormalization contributions to effective nuclear interaction, 24:1905
off-energy-shell behavior of a class of phase-equivalent separable and local potentials, 24:52660
off-mass-shell form factors of the nucleon, 25:3745
off-shell t matrix for the boundary condition model, 25:25803
one-boson-exchange potentials in, analysis of semiempirical generalized, 25:28513
orbiting clusters in even-even nuclei, 24:13422
orthogonality and completeness of the rotation matrices, 22:5889
oscillations in, compressional-mode, 24:52658
P_2, P_3, and P_4 equilibrium distortions in the rare-earth region, calculation of, 24:28847
pair conversion in E0 transitions, 22:5885
pair potential parameters for three- and four-body systems in, method for, (T), 23:19140 (ITF-68-68)
pairing collective degree of freedom, 24:43511
pairing collective motion in, isospin structure of, 24:8955
pairing correlations in, collective modes associated with, 24:8960
pairing force in the quasi-boson approximation, 24:52661
pairing force in, collective treatment of, (T), 24:5438 (COO-1764-70)
pairing forces in, intrinsic deformation and gauge angle in treatment of, 24:30919
pairing forces in, number-conserving approximations for, 25:34172
pairing interaction in, iterative method for calculations using number-conserving treatment of, (T), 22:48620
pairing interaction in, methods for solution of, 24:24648
pairing problem in, method for exact solution in LST scheme, 23:25970
pairing vibrations in, convergence of Marumori's boson expansion for, (T), 24:15988
pairing-plus-quadrupole, model, 23:37319
parametrization of non-local effective field in, 24:24611 (UCSD-10-P-11-99)
parity and time-reversal invariance in, possible tests of, 22:30084
parity deformation in spherical nuclei, 23:47071
parity impurities due to static parity-nonconserving potential, 21:5581
parity violation in, effects on gamma transitions, 23:40099
partially conserved axial-vector current and meson-exchange effects in nuclear processes, 24:15782
partially conserved axial-vector current and meson-exchange effects in beta decay, 24:15960
particle—hole interaction and core polarization, 21:38428
particle-hole excitation, Coulomb force in, 21:10111
particle-hole excitations, isobaric spin in, 21:25601
particle-hole matrix in, collective features of, 24:6961
particle-particle and particle-hole forces in, indistinguishability of phenomenological, 25:39087
Pauli principle in center-of-mass system, 21:27626
penetration of double barriers, 23:37347
perturbation of statistical properties of nuclear states and transitions by interactions with time-reversal violation, 22:11945(R) (ANL-7384)
perturbation of statistical properties of nuclear states and transitions by interactions that are odd under time reversal, 22:16070
perturbation theory and the few-nucleon system in, 24:11052
perturbation treatment of degenerate levels, 21:17398
phase conventions for angular momentum eigenfunctions, 25:25836
phase shift for a soft hard-core potential, s-wave, 22:14101
phase transition from spherical to deformed nuclei, 24:43507
phenomenological study of nuclear vibration, 24:43508
potential energy dependence on quantum numbers of the unitary symmetry scheme model, 24:11060
potential energy shift for a screened Coulomb potential, (T), 21:12087
potential energy splitting in supermultiplet scheme, 24:30891
potential model approach, review of, 22:11992
potential oscillations for inelastic scattering, collective optical-model, 21:38427
potential scattering using generalized R-matrix formalism, 22:9981
potentials at fixed energy, construction using generalized translation operators, 25:17985
potentials for Hartree—Fock calculations, 22:20753
potentials for Hartree—Fock calculations on finite nuclei, equivalent nonlocal, 22:35385
potentials for inelastic scattering, generalized, 21:23566
potentials for random-phase-approximation calculations, schematic, 21:46812
potentials for three-nucleon systems in, local and nonlocal, 22:26813
potentials from nucleon—nucleon phase shifts, method for constructing separable, 23:25957
potentials in two-, three-, and infinite-nucleon systems in, separable, 25:59517
potentials in, canonical transformation relating hard-core and velocity-dependent, 25:5867
potentials in, equations for calculating equivalent local, 22:42105
potentials in, equivalent local, 22:24890 (IAE-1316)
potentials in, equivalent local, (T), 22:14094
potentials in, interpretation by means of equivalent local potentials of nonlocal separable, 25:36847
potentials in, positive-model two-body phase shifts for constructing separable, 23:4063
potentials in, reaction matrix theory of, 22:42104
potentials in, separable approximation to nonseparable, 22:50560(R) (RLO-1062-681)
potentials in, solution of Schroedinger equation for nonlocal, 22:42138
potentials in, two-body elastically equivalent, 25:46126
potentials in, velocity-dependent one-boson-exchange, 22:37384
projected Hartree—Fock spectra in the p-shell, 23:37324
properties of light nuclei by Brueckner-Hartree-Fock calculations, 21:1124 (PUC-937-223)
properties of real RPA matrices and a simple diagonalization procedure, 25:20525
properties of the matrix elements of the effective interaction determined by a separation-condition variational method, 24:35904
proton—proton interactions with bremsstrahlung production, rescattering effects in, 23:25959
pseudo nuclei, spectroscopy of, 22:16076
pulse approximation in multiple Coulomb excitation, 22:27265
quadrupole force in, derivation of radial dependence from a Woods—Saxon potential, 24:38372
quantitative test of microscopic wave functions by antisymmetrized DWBA, 23:37327
quantum mechanics in, lectures on group theory for, 25:47865
quasi-particle approximation of pairing in, 23:49481
quasi-particle coupling to pairing vibrations, (T), 22:16065
quasi-particle method in, boson method and antisymmetrization in, 25:12697
quasiparticle formalism for, 22:37397
quasiparticle interactions in Fermi, inverse lifetime for, 23:52186
quasiparticle interactions in nuclei, long-range part of effective, 23:49465
quasiparticle method in, review on, 24:24665
quasiparticle—phonon interactions in deformed nuclei, 24:43496
quasispin formalism in, description of, 23:31077
R-matrix in, invariant imbedding technique for, 24:15948 (ORNL-TM-2816)
Racah algebra in, graphic method for, 25:34158 (LYCEN-6804, pp 75-108)
radiative transitions in, effect of electronic relaxation processes on angular correlations for, (T), 23:40101
random-phase approximation and Hartree—Fock theory, extension to include ground-state correlations, 22:16087
reaction amplitudes, use of resonant states in eigenfunction expansion of, 22:16068
reaction matrix calculations in finite nuclei, 23:37323
reaction matrix elements for few-body systems, 22:26816
reaction matrix elements in, approximation to off-diagonal, 24:30945
reaction matrix equations, review of methods for solving, 21:42691
reaction matrix for A = 18 nuclei, 24:30957
reaction matrix in oscillator representation, method for Brueckner, (T), 23:13343
reaction matrix in, method for calculation of, 25:34177
reaction-matrix in, separable structure of self-consistent potential for, 24:3974
reaction-mechanism-independent particle-gamma correlation functions using polarized particles, (T), 24:11053
reduction of effective interaction in four-body correlations in light nuclei, 23:28328
relation between $\Delta<R/\text{sub } p/^2>$ and $\Delta\beta/\text{sub } p/$ in the Nilsson model, 24:43515
relation between nuclear binding and excitation energies, 25:28515
relation between the 2I + 1 rule and channel correlation, 25:3762
renormalization effect due to ground-state correlation on vibrational motion, 21:4333
renormalization of finite Brueckner theory with occupation probabilities, 24:18456
research at MIT, 10/66—10/67, 22:32074 (MIT-2098-422, pp 106-42)
research in Japan, history and underlying philosophy of, 22:11991
research on, lectures on, (T), 22:48250
research on, review of, 22:15696 (NP-17252)
research program at Aligarh Muslim Univ., summary of, 24:28841
research program at Banaras Hindu Univ., summary of, 24:28840
research program at Indian Statistical Inst., summary of, 24:28842

research program at Physics Research Lab., summary of, 24:28843
research program at Tata Inst. of Fundamental Research, summary of, 24:28844
research progress in, status of, 22:20773
residual interaction in, centrifugal terms of, 25:15168
residual interaction in, derivation of parameters from conservation laws, (T), 23:19343
residual interaction in, effect on analog state energies and neutron radii, (T), 23:19322 (BNL-13297)
residual interactions in finite, 22:32667 (NP-17478)
residual interactions of pairing and quadrupole-pairing type in, 25:17954 (INR-P-1215)
resonance parameters for a potential with strongly diffuse boundary, (T), 22:11982
resonance phenomena in, single-particle resonant-state wave functions for, 24:24625
resonance reactions and isobaric spin purity, 21:25604
resonance scattering amplitude using perturbation series for one-particle Green's function, 21:44749 (ZFK-122, pp 270-4)
resonant approximation for single-particle resonances in the renormalized RPA problem, 25:17977
review of, 23:19333 (RHEL/R-166, pp 7-17)
review of Japanese research on nuclear forces, 22:11990
review of new developments in nuclear reaction theory, 22:11978 (HMI-B-51)
role of exchange forces in nuclear deformation, 24:40673
role of mesons in nuclear saturation, 25:3763
rotation of deformed nuclei, 24:52668
rotation of nonaxial nuclei, 23:40133
rotation of strongly deformed nuclei, 24:52664
rotation—particle coupling in axially symmetric odd-mass nuclei, generalized treatment of, 24:43492
rotational and vibrational excitations of four-particle systems, (T), 22:39690 (ITF-68-14)
rotational band spectra, description by collective variable method, 22:7756
rotational motion in odd-mass deformed, 24:28824 (JINR-P4-4966)
rotational motion in, microscopic description of, 22:27317
rotational motion, microscopic theory of, 25:12647
roton hypothesis in, 24:30878
rotons in, 24:43506
RPA pairing correlation in the ground state and the favored alpha decay of even-even deformed nuclei, 24:40676
S-matrix for nuclear reactions in, 24:5460
S-matrix in, cluster decomposition of, 24:5448
saturation in, effects of tensor forces on, 25:50822
saturation of nuclear forces, implications for nuclear models of, 25:12636 (NP-18580)
scattering amplitudes and wave functions in, schematization using Weinberg's quasiparticle equations, 24:8946
scattering amplitudes, use of resonant states in eigenfunction expansion of, 22:16068
scattering phase shifts in, effects of bound states in complex energy-dependent local potentials on, 21:5577
scattering problem in the generalized Hartree—Fock approximation, 24:45826
schematic forces and number-conserving approach to spherical nuclei, 23:40130
Schroedinger equation with nonlocal separable potential in, multichannel, 24:5451
Schroedinger equation with smooth potential, asymptotic evaluation of Green's function for three-dimensional, 25:39106
Schroedinger equation with two-particle harmonic interactions in, exact solution of N-particle, 23:39621
Schroedinger equations in, solution using integration of differential forms over simplices in higher dimensional differentiable manifolds, 22:48605
second quantization in, theory and uses of, 24:24671
second random phase approximation using the generator coordinate method, 24:13395
second-forbidden contributions to allowed isospin hindered J → J beta transitions, 21:44807
second-order effects in the Coulomb excitations of doubly even nuclei, 24:13396
selection rules in, relation between level width and 2I + 1, 24:3963
self-consistent calculations for binding energies and nuclear radii, 24:43592
self-consistent core—particle coupling models, 22:42122
self-consistent fields in, coordinate-space study of, 24:38368
self-consistent fields in, nonlocal one-body potentials of, 24:8951
self-consistent nuclear calculations with a deformed basis, 24:52703
self-consistent particle and quasiparticle equations of motion, 25:25817
self-consistent single-particle Hamiltonian, 24:38384
self-consistent static field in the presence of two-particle-two-hole admixtures, 25:3739
self-consistent, of nuclear collective Hamiltonian, 21:15621
self-energy of system with hard core, 25:53828
seniority conservation in 1 g/sub 9/2/ shell, 24:52710
seniority mixing and γ vibrational bands in nuclei near A = 90, (T), 22:48582 (JAERI-1158, pp 115-17)
seniority scheme for single j-shell, residual interaction for, 24:43552
seniority-1 states of the L = 0 charge- and spin-independent pairing Hamiltonian, 23:42997
separable non-local two-nucleon potential for odd-parity triplet states, 22:1728
separable potentials using resonant states, 24:15968
separable tensor potentials, relation between triton energy and neutron—deuteron doublet scattering length for, 25:18013
separable two-nucleon interactions in, equivalent local potentials for, 25:34175
shell SU(3) classification for 1p-1h states of A = 18 nuclei, (T), 22:48467
shell-model calculations of lowest-energy states of high angular momentum, 21:31870
shell-model calculations with harmonic oscillator wave functions, 21:2763
shell-model matrix elements from a realistic potential, 23:43005
shell-model spin-orbit force radius anomaly, 21:30067
short-range correlations in the three-body problem and the Faddeev equations, 25:3731
short-range correlations in the trinucleon, 22:20687
Siegert's theorem, limits of validity of, 25:15144 (NP-18618)
single-channel resonance scattering by central potentials, 21:35508
single-particle limit for partial widths, 24:13399
single-particle M1 transition probabilities in lead region, 25:15197
single-particle model calculations with potentials of various shapes, 25:25833
single-particle operators in, method for calculation of reduced matrix elements for, 25:5808 (N-70-32786)
single-particle potential in, definition of, 24:43563
single-particle potentials and natural orbitals in, 24:11055
single-particle states in a deformed energy-dependent potential, 23:43003
single-particle states in a spheroidal harmonic oscillator potential with a deformed spin-orbit interaction and hexadecapole deformation, 25:18004
single-particle transition probabilities in harmonic oscillator potential, 23:44984
solution of coupled equations by R-matrix techniques, 21:40509
solution of Hartree—Fock equations in coordinate space, 21:42710
solution of Hartree-Fock equations with monopole-monopole interaction, (T), 21:4367
solution of the few-nucleon problem, 24:49924 (IAE-1879)
spectral relations in, many-body treatment of, 25:23099
spectral theory for the Klein—Gordon equation with an external electrostatic potential, 25:12679
spectral theory of, decomposition of quasi-regular representations of $SO_n(p,q)$ for, 21:40247
spectroscopic calculations in, formalism for, 25:56874
spectroscopic factor sum rules in, continuum contributions to, 24:43589
spin—isospin functions of identical-nucleon system, classification of, 25:5541
spin—quadrupole interactions in, and effects on collective 0⁺ states, 22:9932
spin-orbit interaction in, Galilei and translationally invariant, 24:43547
spin-orbit interaction in, properties of, 24:8940
spin-orbit splitting near closed shells, 25:23096
stability of heavy and superheavy elements, 23:34816
states of unnatural parity at the fission threshold, (T), 21:7834
statistical analysis of binding energy characteristics, 21:5592
statistical analysis of spin dependence of neutron strength functions, 24:28825(T) (KFK-tr-308)
statistical description of nuclear surface, 25:56841
statistical microstructure of nuclear excitations, 24:5457
statistical, of medium and heavy nuclei, 23:42987
strength distributions for single-particle states, 21:38402
strength of pairing force and energy gap in finite nuclei, 24:15962
stripping reactions leading to decaying states, 24:13397
Strutinsky method in, validity of, 25:20486
SU(3) coupling constants in the 2s-1d shell, 22:18346
sum rule for relation of binding energy to energies of excited states, 23:23786
sum rules in nuclear physics, derivation of progenitor, 25:12637(R) (NYO-2171-328)
sum rules in quasiparticle formalism, violation of, (T), 23:37308
superconductivity effects in nuclear level density, 22:20707
superfluid Fermi systems and ghost states in, variation of density matrix in external field for, 21:27656
surface peaking in the calculated imaginary part of the optical potential, 23:49475
surface-delta interaction in, tensor force addition to modified, 24:18447
survey, 22:1740
symmetric S- and D-state components of the triton wave function, 22:5892
symmetries in, review of, 24:5459
symmetries of quantum oscillator systems, (T), 22:44289
symmetry in the effective interaction of Kuo and Brown, 22:1730
symmetry in, internal multiplicity structure and Clebsch—Gordan series for G(2), 22:20293
symmetry in, projection operators for simple Lie groups for decomposition of reducible representations in, 25:53250
T = 1 pairing Hamiltonian in a two-level model, 25:3758
T matrix half off-energy-shell, investigation of two-nucleon, 25:50851
T matrix in, determination of parameters for off-shell effective-rangelike theory for off-shell, 24:43469
T-matrix formalism in, separable approximations for, 23:31087
T-matrix in, construction from experimental data, 24:43542
T-matrix in, construction from symmetric part, 25:12673
t-matrix in, method for fast convergence of, 24:16002
T-matrix in, off-energy-shell continuation of two-nucleon, 24:6965
T-matrix perturbation theory, application to the Faddeev equations, 22:20720
T-matrix with tensor forces in, off-energy-shell continuation of two-nucleon, 25:50820
Tabakin nucleon—nucleon potential in, 25:5825
tables of radial integrals of internal conversion at the M shell for M1, M2, E1, and E2 transitions, 24:22199
tensor force and Kowalski—Noyes representation for the t-matrix, 23:34818
tensor forces in the residual interaction, (T), 21:44781
tensor-force effects on l-forbidden M1 transitions, 25:7925
Thomas—Fermi calculations in treatment of finite nuclei, (T), 24:28839
Thomas—Fermi calculations of binding energy per nucleon, density distribution, and single-particle potentials in finite nuclei, 24:30914
three body problem in, conference on, 24:51983
three body problem in, variational calculation with central local potential, 24:40685
three- and four-body problems in, generalized separable-potential model for, 24:24619
three- and four-body problems in, transformation brackets for, 24:45815
three-body correlation function for dilute boson gas with hard-sphere interaction, ground-state, (T), 22:5872
three-body forces in nuclear matter, 24:5464
three-body forces in nuclear matter, meson (eta) exchange contribution to, 23:15511
three-body forces in, implications of PCAC theory for long-range, 22:42141
three-body forces in, π-mesic, 22:44761
three-body model for resonance phenomena, 25:18005
three-body parameters in, use of two-body parameters to analyze, 25:1778
three-body potentials in, irreducible tensor operator formalism for, 23:19377
three-body problem in, 21:46799
three-body problem in SU(3) representation, coordinates and observables in, (T), 23:4048 (JINR-E4-4043)
three-body problem in, analysis of singular-core interactions in boundary-condition model, 25:56851
three-body problem in, analysis using product solutions of systems of two non-interacting spinless particles, 24:35918
three-body problem in, analysis using separable t-matrix, (T), 24:13431
three-body problem in, application of Faddeev method to, 23:25962
three-body problem in, bound state in, 22:39731
three-body problem in, calculations using Faddeev equations, 25:20251 (NP-18678)
three-body problem in, calculations using long-range proton exchange interaction, (T), 23:13201
three-body problem in, classification of states in oscillator basis, 25:53865
three-body problem in, coordinates and observables in SU(3) representation of, (T), 23:37313
three-body problem in, Coulomb scattering in, 23:25778
three-body problem in, factorization of two-particle T-matrix for, (T), 23:11049 (JINR-P4-4144)
three-body problem in, final-state interactions in dynamical calculations of, 25:53822
three-body problem in, formalism for, 23:25963
three-body problem in, hard-core potential in Lippmann—Schwinger formalism for, 23:31070
three-body problem in, method for solution of Fadeev equation, 22:46731(R) (COO-1746-8)
three-body problem in, modification of Faddeev formalism for singular core interactions in, 25:36851
three-body problem in, new approach to, 24:28848
three-body problem in, properties of kernel of Lippmann—Schwinger equation for, (T), 23:7354
three-body problem in, realistic potentials for, 23:25785
three-body problem in, review on, 22:32670 (SLAC-PUB-409)
three-body problem in, separable approximation for, 24:13410
three-body problem in, separable nonlocal hard-core potential for, (T), 22:20771
three-body problem in, separable potentials for, 23:3930
three-body problem in, separable two-body t-matrix for, 24:6948 (ITF-69-49)
three-body problem in, single attractive and repulsive separable potential for, 22:53242
three-body problem in, solution in coordinate space, 24:43551
three-body problem in, solution of Faddeev's equations with local potentials for, 22:22621 (SLAC-79)
three-body problem in, solution using Hilbert—Schmidt kernels in two variables, 25:12693
three-body problem in, solution using six-dimensional isotropic harmonic oscillator basis, 24:52651
three-body problem in, spatial symmetry in, 23:25974
three-body problem in, survey of progress on, 23:31076
three-body problem in, tensor force for, 22:44756
three-body problem in, treatment using potential concept, 25:56872
three-body problem in, two-particle disintegration in, (T), 21:17389 (JINR-P4-3154)
three-body problem with Gaussian potential in, iterative solution of, 24:38385
three-body problem with local Yukawa potential, solution using Faddeev and variational methods, 23:15500
three-body problem with non-zero momentum, solution of Faddeev equations with nonlocal factorizing potential, 22:30085
three-body problems in, separable potentials for Faddeev equations for, 23:1882 (WASH-1093)
three-body scattering equations in, spurious solutions of, 24:8950
three-body systems in, analysis of Efimov effect for, 25:39086
three-body systems in, energy levels from resonant two-body forces in, 25:17968
three-nucleon binding energy in, calculation using rank six separable potentials, 24:49948
three-nucleon equations in, derivation using separable two-body potentials, 25:12687
three-nucleon ground-state wave function in, formulation using group theoretical methods, 24:8952

three-nucleon problem in, off-shell effects in, 24:15789
three-nucleon problem in, perturbation techniques for, 24:30956
three-nucleon problem in, review on, 24:15974
three-nucleon problem in, solution using hard-core interaction, 23:47076
three-nucleon system, 22:7758
three-nucleon system in, analysis of Hall-Post lower bound calculations for, 25:43983
three-nucleon system in, group theoretic classification scheme for states of, 24:13405
three-nucleon system in, separable-expansion method for, 25:28510
time reversal invariance of nuclear forces, study by gamma cascades in chlorine-36, 22:15997
transformation coefficients in the hyperspherical approach to the three-body problem, 25:3729
transformation scheme for harmonic oscillator wave functions, 21:2812
trinucleon binding energy in, calculation using unitary pole approximation, 24:13430
trinucleon binding energy in, calculation using variational—iterational method, 24:49925 (ITF-70-31)
triton ground-state calculation using separable nonlocal interaction with hard-shell repulsion, 21:19307
triton potentials and wave functions, 22:32693
two- and three-body bound-state results for the Tamagaki N—N potential, 23:37325
two- and three-body interactions in, unitary pole expansion for local potentials for, 24:38361
two-body forces for perturbation calculations of nuclear structure, realistic, 24:24672
two-body forces in, properties of rotational nuclei in terms of residual, 24:24674
two-body forces in, research using (He-3,t) reactions, (E/T), 22:53112
two-body harmonic oscillator potentials in, separability of Hamiltonian for, 23:32955 (NYO-3829-31)
two-body interactions in hard-core harmonic oscillator potential, 23:37346
two-body interactions in square potentials with soft repulsive cores, variational analysis using harmonic-oscillator states, 25:5849
two-body interactions in, analysis using generalized seniority scheme, 24:20436
two-body interactions in, linearization of pairing Hamiltonian for, 21:30068
two-body interactions in, matrix elements in supermultiplet and L—S coupling schemes for, (T), 23:9066
two-body matrix elements from a modified surface delta interaction, 21:46796
two-body matrix elements in statistical, Gaussian law for, 23:47061
two-body problem in, bound-state calculations using strong-coupling approximation, 24:8945
two-body problem in, expanded harmonic oscillator wave functions for, 24:15780
two-body problem with factorizable nonlocal potential, 22:35410
two-body problem with smooth velocity-dependent potential, quasiparticle formalism for, 23:10937(R) (COO-1120-78)
two-body random Hamiltonians in, Monte Carlo calculations of spacing and individual eigenvalue distributions of, 25:43968
two-body t-matrix from hard-core potential, separable expansion for, 22:53239
two-body t-matrix in, eigenfunction approximation for, 24:8948
two-body T-matrix in, off-shell construction of fixed on-shell, 25:7929
two-body wave functions in, convergence of harmonic oscillator expansions for, 24:15987
two-fluid model of nuclear rotations, 24:43499
two-nucleon hard-core interaction in a common harmonic-oscillator potential, 21:30077
two-nucleon potentials and nuclear saturation in, 25:15188
two-nucleon reaction matrix in, off-shell, 25:20485
two-nucleon transfer and pairing phase transition, 22:7753
two-nucleon transfer in the 1p shell, 24:13400
two-particle continuum Coulomb wave functions, 23:32972
two-particle interactions in, solution of Lippmann—Schwinger equation, 23:11073
two-particle transfer in deformed nuclei, 23:19331 (PUC-937-341)
two-particle transition matrix of bound states in, off-shell continuations of, 25:34176
two-quantum (γ,e) transitions, 21:1134
unified treatment of reactions and spectra including shell-model conditions and particle correlations, 25:50852
unified, of vibrational and rotational motion in even nuclei, 23:28329
unitarity conditions in diffraction reactions, (T), 22:30088
unitary models of resonance reactions, 21:31875
use of Galilean and translationally invariant operator algebra in, 21:35509
use of Hartree—Bogoliubov method in, 22:48597
variable moment of inertia models in, 25:23079
variational equations for stationary and time-dependent states, 22:7755
variational principle and Slater's generalized Hartree—Fock theory for nuclei, 24:15964
variational principles for self-consistent, of nuclear collective motion, 22:42123
velocity dependence in nucleon—nucleon interactions, 21:19309
velocity-dependent potentials in the Heisenberg picture, 23:42991
velocity-dependent potentials, application of Morse function to, 21:31871
virtuality effects in quasielastic scattering, 21:17403
volume, surface, and symmetry terms in the semi-empirical mass formula, 25:36821
wave equations for light nuclei, derivation of integro-differential, 24:13412
wave function and matrix elements in the K-harmonics method, 24:11059
wave function calculations from, comparison of cranking model and projected Hartree-Fock states for, 24:52671
wave function normalization in, single-particle, 23:37303
wave functions for ground states of A = 3 nuclei, 22:26815
wave functions for many-body systems of nucleons, 22:44770
wave functions for two-particle systems, (T), 21:23559
wave functions in, approximation to Bethe—Goldstone, 24:13426
wave functions in, construction using Hermitian random matrices with small imaginary part, 24:22202
wave functions in, s-state component of two-particle, 21:7478(R) (COO-1371-36)
wave functions of nonlocal separable potentials, comparison with equivalent local potentials, 25:36838
weak interactions in, review on, 25:1776
Wick's theorem in, theory and uses of, (T), 24:24671
Wigner coefficients for SU(3) is contained in R_3 scheme, 23:23778
Wigner coefficients of decoupling of two sd-shell particles in SU_3 representation, 24:26688
Wigner supermultiplet scheme in, application to shell-model matrix elements, (T), 23:37281 (AD-679762)
Yamaguchi equivalent local potentials, comparison with OPEP, 25:5871

shipping of, carrier liability for damage resulting from air, 24:22973
testing and proliferation of, nuclear test ban agreement on limitations on, 21:32287
testing by China, effects of, on fallout content of food in Japan, 24:34310
testing by Soviet Union and United States during 1961 to 1962, effects of, on iron-55 content of human food chains in Finland, 22:43306 (NYO-3446-11(App.))
testing in 1962, estimation of radiation dose from, 21:24548 (RA-16)
testing in China, effects of, on fallout content of beagle dogs in California, 22:10827(R) (UCD-472-114)
testing in Pacific during 1968, effects of, on environment of New Zealand, 24:41862(R) (NP-18315)
testing of Chinese, age estimation of fresh fallout from, 21:39058
testing of, analysis of systems for recording exponential signals for, 23:35455 (AD-684029)
testing of, beta activity in Israel following, 21:22408(R) (IA-914)
testing of, contamination of earth's atmosphere from, 23:38117
testing of, development and placement of grouts for underground, 22:10420 (TID-24191)
testing of, effects of, on ruthenium-106 content in seawater, 21:43416
testing of, effects on infant mortality, 25:4505 (CONF-691051-, pp 324-35)
testing of, effects on population of, 21:45648
testing of, europium-155 content in fallout from, 21:36163
testing of, fission product content in Polish soils from, 21:36106 (CLOR-63/D)
testing of, gas chromatographic analysis of gases found in post-shot tunnel systems from, 25:51364 (SC-RR-710337)
testing of, radioactive contamination of environment by, 21:14640
testing of, radiological hazards from, 22:30743

testing of, review of Nevada Operations Office experience in underground, 24:347
testing of, standards for radiation protection during, 21:22430
testing, radioactive contamination from, during 1945 to 1962, 22:40699
thermal effect of low-yield, image furnace for simulation of, 21:36191
thermal effects of, literature survey on, 21:34350 (AD-634204)
transport of fallout cesium-137 to milk following testing of, in Colorado, 23:41273
use for demolition, method for testing operational effectiveness for, 25:44463 (AD-719669)
yield of, computational disc method for determination of, 22:30741
yields of, exploded over Hiroshima and Nagasaki, 23:9939 (ORNL-4316, pp 231-69)
Nucleation

NUCLEI
(Nuclear Physics)
absorption of γ and π above 150 MeV, comparison of, (T), 24:52113 (NP-18446)
abundance anomalies in peculiar A stars, from alpha reactions in stellar surface layers, (T), 22:915
abundance in galactic and solar cosmic rays, (T), 23:46309
abundance in primary cosmic radiation of Z greater than or equal to 3, (E), 21:3711
abundance in primary cosmic radiation, (E), 22:11283
abundance in primary cosmic radiation, (T), 22:5167
abundance in primary cosmic rays during the 1965 solar minimum, (E), 23:5255
abundance in solar cosmic rays of multicharged, with same charge : mass ratio, constancy of, (E/T), 25:49643
abundance of 2 less than or equal to Z greater than or equal to 28, in galactic cosmic rays, 21:637
abundance of 28 to 62, during silicon burning in stellar interiors, (T), 22:11140
abundance of cosmic 150- to 250-MeV/nucleon Z = 16 to 30, (E), 25:4373
abundance of cosmic ultra-heavy, from fossil-track measurements in meteorites, (E), 25:35911
abundance of relativistic Z = 9 to 17, in primary cosmic radiation, (E), 25:2931
abundance of superheavy cosmic, 21:18472(T) (UCRL-Trans-1340)
abundance of very heavy, in primary cosmic radiation, (T), 23:6899
abundance of very heavy, in primary cosmic radiation, (E/T), 24:42543
abundance of Z greater than or equal to 36, in primary cosmic radiation, 21:43838 (N-67-22876)
abundance of, heavier than iron in cosmic radiation, (E), 22:19802
acceleration in solar cosmic radiation of heavy, preferential, (T), 22:23913
acceleration of ultrarelativistic, in nonthermal radio sources, (T), 23:48641
acceleration on sun, heavy, 21:43737
algorithms for problem of two centers in quantum mechanics, (T), 25:9600 (JINR-P4-5040)
alpha clustering in even-even light, superfluid model for, 21:25590
alpha clustering in heavy, (T), 22:22628
alpha clustering in heavy, (T), 22:22628
alpha decay below A = 200, boundaries for, (E/T), 22:30107
alpha decay from excited states of, (E), 22:27204
alpha decay from highly excited states, half-lives for delayed, (T), 22:48474
alpha decay in bubble chamber, S-matrix theory for classical space—time description of straight particle track production from, 23:39856
alpha decay of deformed even, analysis using nonlocal potential, (T), 25:46138
alpha decay of deformed odd-A, effects of phonon—quasiparticle interaction on, (T), 21:34036
alpha decay of heavy, 24:30754(T) (KFK-tr-309)
alpha decay of heavy, energy-mass relations for, (T), 21:40460 (AWRE-O-39/59)
alpha decay of heavy, theory using shell model, 21:38406
alpha decay of highly neutron deficient, systematics for, (E), 24:43411
alpha decay of moderately heavy, barrier penetrabilities and reduced widths for, (T), 23:11076
alpha decay of N = 127 to 156, energy tables for, 23:21366
alpha decay of N less than 128 Z greater than 81, alpha energies, half-lives, and branching ratios for, 21:44670 (UCRL-17723)
alpha decay of odd-mass, barrier penetrabilities for, (T), 21:5590
alpha decay of spherical A = 202 to 218, (T), 25:36747
alpha decay of superheavy, Q-values for, (T), 23:32930 (JINR-P7-4435)
alpha decay of Z > 81 and N < 128, α energies, branching ratios, and half-lives for, (E), 23:21367
alpha decay of, conference on, 21:46720 (JINR-P7-3202)
alpha decay of, non-Hermitian Hamiltonians for, (T), 22:35403
alpha decay of, total energy release from, (T), 25:20482(T) (RFP-Trans-72)
alpha decay properties for Z > 50, N < 126, table of, (E), 22:29995
alpha decay properties, table arranged according to energy, (E), 22:7724
alpha decay rates from heavy, analysis using two-fermion gas model, 24:8949
alpha decay rates in heavy, (T), 22:35393
alpha decay systematics for A = 142 to 204, (E/T), 22:35323
alpha differential elastic and inelastic scattering cross sections for Z = 12 to 82, at 44 MeV, (E), 21:21479 (CEA-R-3147)
alpha differential elastic scattering cross sections for light, calculations using Akhieser-Pomeranchuk—Blair model, (T), 22:22548
alpha differential elastic scattering cross sections for heavy, at 24.7 MeV, (E/T), 21:21537
alpha distributions on surfaces of even-even, calculations using shell model, (T), 21:23558
alpha elastic and inelastic scattering by A = 58 to 120, at 34.4 MeV, angular distributions for, (E), 21:21482(T) (NSJ-tr-64)
alpha elastic scattering at 167 MeV, parameters from, (E/T), 25:39058
alpha elastic scattering at 25 MeV, model analysis of, (E/T), 25:38877 (INP-735)
alpha elastic scattering at 42 MeV, detailed variations of strong absorption radii from, (E), 24:30719 (CEA-R-3948)
alpha elastic scattering at 64 MeV, analysis by eikonal approximation, (T), 25:5834
alpha elastic scattering at medium energies, microscopic analysis using optical potential, (T), 23:30971
alpha elastic scattering at medium energy, optical-model potentials for, (T), 23:7337
alpha elastic scattering by effect of nonoriented target nuclei in, 24:43601
alpha elastic scattering by light A = 4n, cross-section resonances from beryllium-8 formation in, (T), 25:53664 (INP-751)
alpha elastic scattering by light, (E/T), 24:49720
alpha elastic scattering by light, exchange contribution in, (T), 21:35511
alpha elastic scattering by spinless, Regge-pole and partial-wave analysis of glory scattering in backward, (T), 25:59846
alpha elastic scattering by Z = 12 to 27, calculations using model with sharp absorption cutoff, 21:33914
alpha elastic scattering by, analysis of backward, (T), 25:15172
alpha elastic scattering by, microscopic model for, (T), 25:17960
alpha elastic scattering by, model for microscopic analysis of, (T), 24:38300 (CTC-32)
alpha elastic scattering by, optical-model potentials for, (T), 23:5957
alpha elastic scattering by, phase-shift analysis using S-matrix with generalized parameters, 25:34130
alpha elastic scattering by, real part of alpha—nucleus potential in region of nuclear surface, (T), 25:43973
alpha elastic scattering by, resonances in, (E/T), 22:20499 (INP-577/PL)
alpha elastic scattering from, optical-model analysis using real potentials obtained from double-folding procedure, (T), 25:3755
alpha inelastic scattering by A = 7 to 140, model analysis of, 25:20274
alpha inelastic scattering by light, with spin-flip excitation, (E), 21:29930
alpha inelastic scattering by N = 28 and Z = 20, at 42 MeV, (E), 21:19238
alpha inelastic scattering by, excitation of abnormal parity states through velocity-dependent central forces, (T), 25:48120
alpha inelastic scattering by, gamma-radiation patterns from, (T), 21:31873
alpha inelastic scattering by, γ de-excitation outside reaction plane in, (T), 22:39719
alpha inelastic scattering by, isoscalar transition rates from, (T), 23:40116
alpha inelastic scattering by, role of isoscalar transition operator in, (T), 25:56876
alpha particle inelastic scattering by, effects of non-rigidity on, (T), 23:49463
alpha particle reactions with emulsion, preliminary results for intranuclear cascade mechanism for inelastic, (E), 22:44650
alpha particle scattering at high energies, algebraic simplification for calculations in quantum electrodynamics for, 22:20317
alpha reaction threshold energies for A = 5 to 260, tables of, 21:27578 (UCRL-14005)
alpha reactions (α,2α) with, analysis using Shapiro model and three-body theory, (T), 25:18032
alpha reactions (α,2α) with, polar and triangular diagrams for interpretation of, (T), 25:10059 (LYCEN-7039)
alpha reactions (α,2α) with, three-body formulation for mechanism of, (T), 24:52656
alpha reactions (α,d) and (α,p) at 25 MeV with light, distorted-wave analysis of differential cross sections for, (T), 25:56677
alpha reactions (α,d) with, microscopic finite-range approximation formalism for, (T), 23:25938 (IFA-FT-73)
alpha reactions (α,d) with, structure amplitude tables for, (T), 23:11052 (UCRL-18270)
alpha reactions (α,γ) with, equipment and methods for angular correlation measurements in, (E), 23:47886
alpha reactions (α,γ), background reduction for spectroscopy of, 25:20148
alpha reactions (α,n) and (α,p) with, effects of nucleon angular momenta on, (T), 21:38392
alpha reactions (α,n) and (α,p) with, spin-dependent effects on differential cross sections and polarizations for, (T), 21:46833
alpha reactions (α,n) in thick targets, method for estimating neutron and photon yields from, (T), 24:33173
alpha reactions (α,n) with, calculation of recoil angular distributions using spin-dependent statistical theory, (T), 24:45833
alpha reactions (α,n) with, coupled-channel analysis of, (T), 23:17129
alpha reactions (α,n) with, statistical-model calculation of angular distributions for, (T), 24:24624
alpha reactions (α,p) with odd-Z, cross-section energy dependence in, (T), 21:21579 (TID-23787)
alpha reactions (α,p) with, analysis using stripping mechanism, (T), 23:21386
alpha reactions (α,t) at 29 MeV with medium-weight, triton spectra for, (E), 23:7246
alpha reactions (α,xn) and (α,pxn) with Z = 20 to 100, excitation functions and thick-target yields for, (T), 25:12529(T) (ORNL-tr-3020)
alpha reactions (α,xn) and (α,pxn) with, estimation of excitation functions for, (T), 23:4052 (KFK-767)
alpha reactions (α,xn) with, method for estimation of excitation functions for, 25:18018
alpha reactions with compound nucleus excitation, method for analysis of, (T), 25:46139
alpha reactions with light, at low energies, cross sections and polarization effects in nucleon transfer, (T), 25:59831 (IFA-CRD-41)
alpha reactions with, model for analysis of, (T), 25:3716 (ORNL-TM-3153)
alpha reactions with, x-ray yields from, 23:23787
alpha scattering by even-even, at 12 to 16 MeV, angular distributions for, (E), 21:38276
alpha scattering by, research using, (E/T), 22:32708
alpha scattering by, validity and limits of diffraction theories for, 22:17926
alpha spectra of 83 < Z < 98, catalog of, 24:40605 (IN-1261)
alpha total cross sections for A = 60, at 24.7 MeV, (E), 21:11985 (INP-503/PL)
alpha transitions in odd—odd deformed nuclei, effect of phonon-quasiparticle residual interaction on, (T), 22:35395
alpha-cluster configurations in light, calculation using Skyrme interaction, (T), 25:59883
alpha-cluster motion in heavy, (T), 21:7835
alpha-cluster motion in heavy, (T), 21:7835
alpha-decay lifetimes for Z = 90 to 104, 21:21522 (UCRL-50183)
alpha-decay spectra of, role of angular momentum in, (T), 21:31869
alpha-decay stability and energy systematics, (T), 21:10080
alpha-particle distributions on surface of even—even, (T), 23:1957
angular momentum distribution in compound, moment of inertia dependences in equation for, (T), 23:15527
angular momentum in systems of decaying compound, distribution function for residual, (E/T), 21:38301(R) (RLO-1388-13)
anharmonic effects in even—even transition region, (T), 22:46816 (JINR-P4-3898)
anharmonic effects in spherical, (T), 25:50835
anharmonic vibrational states in spherical, (T), 22:27320
anti-neutrino absorption by, with resonance electron capture, (T), 22:24898(T) (BNL-tr-203)
antineutrino elastic scattering by, cross sections for, 22:44395
antineutrino reactions with, current algebra calculations of differential cross section relations for, 24:8614
antinucleon elastic and inelastic scattering above 50 MeV, tables for cross sections and total cross sections for, (E), 24:20085
antiproton annihilation at rest in emulsion, Monte Carlo calculation using isobar model for, (T), 25:25460
antiproton elastic scattering at 3 GeV/c at small angles in emulsions, real amplitude for, (E/T), 24:24235
antiproton elastic scattering at 3 GeV/c in emulsions, nuclear optical model parameters from small-angle, (E), 22:46855
antiproton elastic scattering at 3 GeV/c in emulsions, small-angle distribution of, (E), 22:32061
antiproton elastic scattering in nuclear emulsion at 3 GeV/c, angular distribution for, (E), 21:46688
antiproton reactions (anti p,anti n) with, cross-section calculations using optical model, 21:40477
antiproton reactions at 2.23 GeV in emulsions, helium-4 emission from, (E), 21:25477
antiproton reactions at 3 GeV/c in emulsions, annihilation radiation evaluation for, 22:20129
antiproton reactions at 3 GeV/c in emulsions, strong-absorption model for, 23:30767
antiproton reactions at 40 GeV/c, absorption cross sections for, (E), 24:1511
antiproton reactions at 5 GeV/c in emulsions, angular and momentum distributions for π^0 produced in, (E), 25:36404
antiproton reactions at 5 GeV/c in emulsions, energy and angular characteristics and mean transverse momentum of surviving anti p and properties of nonannihilation, (E), 24:12934
antiproton reactions at 5 GeV/c in emulsions, Monte Carlo calculations for double production of lithium-8 in, (E/T), 24:37624
antiproton reactions at 5 GeV/c in emulsions, re-emission of anti p in, review of, 23:18795 (CONF-671217-, pp 589-695)
antiproton reactions in emulsions at 5 GeV/c, lithium-8 angular and energy distributions from, (E), 21:46687
antiproton reactions with, model of factorized residues for, (T), 23:1955
antiproton reactions with, research program on, 21:25533
argon-40 reactions (Ar-40,xn) with, isotope production regularities for mechanism of, (E), 25:23027 (JINR-P7-5495)
atomic polarization effects, 21:41752 (BNL-11682)
baryon resonance binding to nucleons in, (T), 24:52699
baryon resonance reactions with A > 4, probability for multibaryon resonances from, 25:59521
beta and electron-capture decay of, methods for measurement of relative, (E), 25:50772
beta decay far from stability line, review of study of, (T), 25:59835 (KURRI-TR-76, pp 1-2)
beta decay half-life systematics for A > 90, (E/T), 22:1736

beta decay in odd-mass deformed, effect of charge-exchange spin—spin interactions on rate of allowed Gamow—Teller, (T), 24:30869 (JINR-P4-5003)
beta decay induced by superweak interactions, neutrinoless double, 22:26623
beta decay of 1p-, 2s1d-, and 2p1f-shell, half-life calculations using modelistic and realistic interactions, (T), 22:35362 (AD-662219)
beta decay of A = 72 to 86, matrix elements of first-forbidden, (T), 24:33166
beta decay of A approximately 132, half-lives and Q values for, (T), 25:28327 (CERN-70-30(Vol.2), pp 1001-3)
beta decay of composite, limits for parameters for interaction Hamiltonian in general form for, 24:10730
beta decay of deformed odd-mass, spin polarization effects on fast allowed, (E/T), 21:46794
beta decay of deformed, matrix elements for forbidden, (T), 24:35925
beta decay of deformed, modified Alaga selection rules for allowed, (T), 24:40713
beta decay of deformed, superfluid-model corrections to, (T), 21:2781
beta decay of even-even and even-odd, energy systematics of, (T), 21:12112
beta decay of excited states of odd—odd deformed, Random Phase Approximation calculation of Gamow—Teller transitions in, 25:36817 (JINR-P4-5744)
beta decay of heavy strength function phenomena in high energy, (E), 24:43411
beta decay of heavy, calculation of half-lives and strength functions for allowed and first-forbidden, (T), 25:59868
beta decay of heavy, hindrance factors for forbidden, (T), 23:15501
beta decay of light s—d-shell, log-ft values for, (T), 25:5599
beta decay of medium and heavy spherical, transition rates for, (T), 21:27639
beta decay of mirror, asymmetry and second-class currents in, (T), 25:53817
beta decay of mirror, meson exchange effects in, (T), 24:21993
beta decay of mirror, relativistic corrections to ft values for, (T), 24:28717
beta decay of neutron-deficient Z = 47 to 78, Q values for, (E), 25:28297 (CERN-70-30(Vol.1), pp 353-60)
beta decay of odd-A, calculation of matrix elements using non-axial model, (T), 24:6950 (ITF-69-52)
beta decay of odd-odd, log ft values for, (T), 21:17425
beta decay of oriented, angular correlations and distributions in, (T), 21:15622
beta decay of short-lived, methods for measuring spectra, half-lives, and branching ratios for, 25:38943
beta decay of spin-3/2 mirror, electromagnetic simulation of time-reversal invariance in, 24:8690
beta decay of, algebraic models for, 23:44630 (NYO-3399-202)
beta decay of, calculation of electromagnetic radiative correction for spin-averaged nonspin-flip, 22:39346
beta decay of, contribution of final-state electromagnetic interaction to time reversal violation in, 24:24413
beta decay of, electromagnetic final-state interactions and test of T invariance in, (T), 25:3424
beta decay of, elementary particle formalism for, 24:5280
beta decay of, elementary particle theory for, 21:31555 (NP-16795)
beta decay of, elementary particle theory for sum rules for, 21:31555 (NP-16795)
beta decay of, energy systematics for, (T), 23:21248
beta decay of, ft values for superallowed transitions in, (T), 21:12114
beta decay of, Hamiltonian for relation of CP nonconservation in K_2^0 decay with lepton nonconservation in, 23:44690
beta decay of, helicity of antineutrinos emitted in, (E), 25:50875
beta decay of, hindered matrix elements for allowed transitions, (T), 21:2770
beta decay of, lepton wave function variation effects on probability of, 21:25588
beta decay of, limit on lepton nonconservation from double-, 24:3602
beta decay of, meson exchange effects in, (T), 22:26617
beta decay of, method for determining L-shell vacancies for x-ray intensity ratios from energy level transitions following, 21:30045
beta decay of, neutrino hypothesis for, 23:39679
beta decay of, neutron and proton distribution effects on ft-value for superallowed, (T), 23:23804
beta decay of, nuclear parameters from spectrum from, (T), 21:29917
beta decay of, nucleon form factor effects on radiative corrections for, 21:18959
beta decay of, photon exchange effects in, 23:32684
beta decay of, pion-exchange effects in, 21:35531
beta decay of, radiative corrections to, 22:48264
beta decay of, radiative corrections to, 24:28531
beta decay of, radiative corrections to, 24:28532
beta decay of, review of elementary particle theory for, 22:18314
beta decay of, role of strong interactions and W in radiative corrections to, 22:26590 (IC-68/28)
beta decay of, static Coulomb corrections to point-nucleus Fermi function for, (T), 23:7345
beta decay of, status of Cabibbo theory for, 22:41794
beta decay of, table of function for analysis of positron spectra in, (T), 22:9928
beta decay of, theory for, 22:9557 (JEN-186-DF/I-57)
beta decay of, theory of gross properties of, (T), 23:45007
beta decay of, universality of weak vector coupling constant from positive, (T), 24:33000
beta decay of, universality of weak vector coupling constant for, 23:42634
beta decay of, weak interaction coupling constants for, (T), 23:17132
beta decay probabilities in odd-A deformed, allowed, (T), 23:49440(T) (BNL-tr-285)
beta decay to collective gamma-vibrational levels, calculation of ft values for first-forbidden, (T), 21:44774
beta processes on, in exploding stars, (T), 25:32920
beta spectra of, average energy for, (T), 22:14111
beta spectra of, data compilation for shapes of, 21:21585
beta transition probabilities for deformed odd-A, with A = 150 to 190, (E/T), 22:1692
beta transition rates in deformed rare-earth, review of data on fast, allowed, (E/T), 22:30038
beta transitions between K-mixed states in, first-forbidden, (T), 22:9976
beta transitions between odd-A deformed, N-forbidden, (T), 22:39713
beta transitions in 2s1d-shell, ft-value calculations using projected Hartree-Fock wave functions, (T), 22:9968
beta transitions in A = 144, first-forbidden, (T), 22:27232
beta transitions in A = 150 to 188 deformed, Woods—Saxon superfluidity corrections to, (T), 23:31027
beta transitions in A = 4N + 2, sum rule for strengths of Gamow—Teller, (E), 23:25845
beta transitions in A = 90 to 140 spherical, allowed, (T), 22:32570 (JINR-P6-3785)
beta transitions in deformed rare-earth, N-forbidden, (T), 22:48563
beta transitions in deformed spheroidal, matrix elements for forbidden, (T), 21:38420
beta transitions in deformed, hindrance factors for allowed, (T), 22:27387
beta transitions in deformed, matrix-element calculations using Woods-Saxon wave functions, 21:46827
beta transitions in even-A single closed shell, log-ft values for pure Gamow—Teller, (T), 23:10928 (UCLA-10-P-18-10)
beta transitions in heavy, analysis using theory of finite Fermi systems, (T), 25:36833
beta transitions in odd-mass, hindrance of allowed, (T), 21:5566
beta transitions in odd-odd vibrational, matrix elements for first-forbidden, (T), 22:27388
beta transitions in polarized, CP nonconservation and $\beta\gamma\gamma$ correlations from, 21:17409
beta transitions in, corrections to coupling constants and ft-values for $0^+ \rightarrow 0^+$, (T), 22:27386
beta transitions in, effect of Coulomb potential on $\Delta T = +-1$ Fermi, (T), 22:9953
beta transitions in, intensity of forbidden, (T), 21:21589
beta transitions of mirror, determination of axial vector and vector coupling constants in weak interactions from superallowed, (T), 25:9742
beta transitions with anomalously large log-ft values, allowed, (T), 22:48574 (JAERI-1158, pp 26-30)
beta-gamma circular polarization in, system for measuring, 22:26929(R) (COO-1420-139)
binding energies and masses of A = 130 to 180, 25:31433
binding energies and quadrupole moments of even—even, unrestricted Hartree—Fock calculations of, 21:40511
binding energies and radii of light, correlation between, (E), 24:38104
binding energies and shapes for light even-even, calculation using anisotropic oscillator with Gaussian interaction, 24:47686
binding energies and shapes for, calculations using improved Thomas—Fermi theory, 23:47046 (UCSD-10-P-11-68/69-95)
binding energies for A = 123 through 161 nuclei, (E), 23:21372
binding energies for heavy, 23:21366
binding energies for Z = 22 to 120, tables of, 22:1710 (LA-3751)
binding energies for Z = 22 to 120, tables of, 22:1710 (LA-3751)
binding energies of 2s1d-shell, calculations using projected Hartree-Fock method with Yale and nonlocal separable potentials, (T), 23:7346
binding energies of A = 3, (T), 21:40473(R) (PR-P-74)
binding energies of A = 3, explanation of difference in, (T), 23:7222
binding energies of alpha-particle, saturation properties of residual, (T), 25:59725
binding energies of closed-shell, second-order corrections to Hartree—Fock calculations using Tabakin potential, (T), 22:20760
binding energies of doubly magic, calculation using hyperspherical expansion method with velocity-dependent potential, (T), 24:38305 (NP-18275)
binding energies of even-even A = 4 to 40, calculations using Hartree—Fock method with Tabakin and Yale—Shakin forces, (T), 22:20483
binding energies of even-even A = 4 to 40, Hartree—Fock calculations of, 22:20483
binding energies of f/sub $^7/_2$/-shell, (T), 21:38377(R) (PUC-937-260)
binding energies of finite, mass formulas for, (T), 25:7891
binding energies of heavy, mass relations for, (T), 21:40459 (AWRE-O-35/59)
binding energies of light A less than or equal to 40, self-consistent calculation using soft-core potential for, (T), 23:4076
binding energies of light, calculations using Hartree-Fock method, (T), 21:4215
binding energies of light, calculations using symmetry scheme, 23:21396
binding energies of light, calculations with several nucleon—nucleon potentials for, (T), 25:20298
binding energies of light, Hartree-Fock approximation for, 24:30923
binding energies of spherical, calculations using s-wave separable interactions of, (T), 25:43959
binding energies of T/sub z/ = 0 and 1/2 A less than or equal to 61, systematics of, 22:44646
binding energies of, calculations using bach—tamaid particle formalism, (T), 22:48448
binding energies of, calculations using Hartree—Fock method with simple reaction matrix, (T), 24:30939
binding energies of, calculations using oscillator models, (T), 25:7927
binding energies of, statistical equations for, (T), 21:5592
binding energies of, systematics including excited states, (E/T), 22:11950(R) (ORO-3624-1)
binding energies of, tables of, 22:3769
binding energies of, tables of, (E/T), 22:3768
binding energies of, variational calculations of, (T), 22:44644
binding energy and charge form factors for A = 3 and 4, calculations using independent-pair wave functions, (T), 23:7355
binding energy and nuclear properties of light, calculations using three-part nucleon—nucleon potentials, (T), 25:31413
binding energy and nucleon radii correlations in N = 28 and 50 and 82, (T), 23:47081
binding energy and shape of light even-even, variational calculation using Gaussian potential, (T), 24:6949 (ITF-69-50)
binding energy calculations for finite, (T), 21:46797
binding energy distribution in, description using realistic two-body potential and realistic kinetic energy operator, (T), 22:39590
binding energy for closed-shell, method for calculations with tensor forces, (T), 23:4066
binding energy for, comparison of Hartree—Fock and limited Hartree—Fock methods for calculating, (T), 22:50692
binding energy for, comparison of Hartree—Fock and limited Hartree—Fock methods for calculating, (T), 22:50692
binding energy formula for, using monopole model, (T), 22:20747
binding energy of A = 209 to 214, calculation using effective interaction, 24:45786
binding energy of A = 3 and 4, calculations using potential matrix derived from phase shifts, (T), 23:19149
binding energy of A = 3, (T), 25:45818
binding energy of A = 3, calculation using perturbation theory in inverse powers of interaction parameters, (T), 22:14118
binding energy of A = 3, calculation using perturbation theory to inverse powers of interaction parameters, (T), 22:14072 (ITF-67-12)
binding energy of A = 3, calculations using separable two-body potentials, (T), 22:32482
binding energy of A = 3, calculations using separable two-body potentials, (T), 22:32482
binding energy of A = 3, calculations using variational and Faddeev methods, (T), 23:15500
binding energy of A = 3, rank-two separable potentials in three-body Faddeev equations for, (T), 25:5830
binding energy of closed-shell, calculations of second-order correction to Hartree—Fock using Tabakin potential, (T), 21:46814
binding energy of doubly magic, lower bound to, (T), 24:8923 (NP-18073)
binding energy of even-A, mass dependence in Weizsaecker formula for, (T), 23:42985
binding energy of finite, calculations using single-particle model with effective potential, (T), 23:23801
binding energy of finite, linear potential model for calculating, 21:34038
binding energy of ground state of A = 3, method for calculating lower bound to, (T), 22:39574
binding energy of ground-state, calculations using two-particle correlations, 21:34069
binding energy of light, (T), 21:21599
binding energy of light, calculation using shell model with central interaction in irreducible form, (T), 22:20679
binding energy of light, effective four-body nucleon interaction for, 25:28482
binding energy of light, Hartree—Fock calculations for, (T), 24:38302 (IFA-FT-78)
binding energy of one-dimensional N-body systems with inverse and inverse-square pair potentials, (T), 25:59840 (NP-19027)
binding energy of, analysis by alpha clustering concept, 23:45010
binding energy of, calculation using perturbation theory with harmonic oscillator matrix elements, (T), 23:49462
binding energy of, dependence on nuclear structure, (E/T), 21:10105
binding energy of, equilibrium theory for symmetry energy term of, (T), 24:1880
binding energy of, estimates of harmonic-oscillator potential-energy effects in intermediate states in calculations of, (T), 25:59862
binding energy of, Hartree-Fock calculation of symmetry, 24:3957
binding energy of, periodic properties in, (E/T), 23:21250
binding energy of, separable potential for N + N interactions below 350 MeV for, 22:7527
binding energy of, separable potentials for, (T), 25:59517
binding energy of, statistical expression for, (T), 25:31412
binding energy of, Thomas—Fermi approximation for, (T), 25:12635 (NP-18545)
binding energy of, validity of phenomenological renormalized Hartree—Fock theory for, 25:7847 (ORNL-4513)
binding energy per particle in shell model, (T), 23:23765
binding energy, Coulomb energy, and radius of A = 3 and A = 4, potentials for, 24:47562
binding to magnetic monopole, 25:3322

binding-energy calculations for light, convergence of cluster expansion method for, 24:13274
binding-energy dependence on tensor-force strength, parity mixing in Hartree-Fock calculations, (T), 21:10101
book: Advances in Nuclear Physics, Volume 1, (E/T), 22:22648

book: Transmutations of Nuclei, 22:44778
boron-11 reactions with heavy, upper limits for spontaneously fissionable isomers with nanosecond lifetime from, (E), 24:26638 (JINR-P7-5018)
boson elastic and inelastic scattering by, optical model computer program for cross sections for spin-0, 24:28816 (AAEC/TM-524)
boson elastic scattering by complex, computer program with optical model for differential cross sections and polarizations for spin-0, 24:28820 (INP-689)
bound states of deformed, in direct reactions, (T), 22:27355
bound states of, hyperspherical-expansion calculations of, (T), 25:31405
bremsstrahlung reactions (γ,n) at 20 MeV, yields of radioactivities from, 21:22008
bremsstrahlung scattering with isomeric activation, (E), 21:44601 (UCRL-17788)
Brueckner theory calculations for closed major shell and j subshell, 25:7847 (ORNL-4513)
calculation of matrix elements of one-body operators in many-nucleon systems, 24:43486
capture of Z greater than or equal to 3, onto geomagnetically trapped orbits from beams of interplanetary solar particles, (E/T), 25:22424
carbon-12 reactions (C-12,xn) with, isotope production regularities for mechanism of, (E), 25:23027 (JINR-P7-5495)
carbon-13 reactions at high energy with heavy, total cross section for carbon-12 production in, (T), 23:21384
charge and mass distributions for medium-weight and heavy, systematics of, (T), 23:13277
charge and mass distributions from meson charge-exchange reactions with nuclei, 23:36954
charge and matter distribution in ground state, macroscopic formulation of systematics of, 24:43516
charge and matter distributions in, (T), 22:48594
charge composition of cosmic, of elements from neon to nickel above 250 MeV/nucleon, (E), 25:35910
charge composition of heavy, in solar flare of Sept. 2, 1966, (E), 22:52408
charge composition of low-energy cosmic primaries, (E), 24:47049
charge composition of primary, (E/T), 25:4981
charge composition of Z greater than or equal to 16, in primary cosmic radiation, (E), 21:37188 (CONF-670628-7)
charge density distributions in, survey of research on, 23:31082
charge distribution in A = 3, (T), 22:20433 (JINR-P2-3705)
charge distribution in deformed, for analysis of μ-mesic x-ray spectra, (E/T), 22:20640
charge distribution in spherical, measurements using x-ray spectra of μ-mesic atoms, (E), 21:27574(R) (NYO-GEN-72-132)
charge distribution in, (T), 21:25576
charge distribution in, A-dependence of, (T), 21:35524
charge distribution in, effects of short-range correlations on long-range effects in, (T), 24:43518
charge distribution in, isotope shift of, (T), 25:20486
charge distribution in, measurement using electron scattering, (T), 22:16063
charge distribution in, research using isotope shifts in atomic spectra, (E/T), 21:12040
charge distribution of cosmic primary heavy, of Z greater than or equal to 26, (E), 25:30305
charge distribution of spherical and deformed, use of spectra of mesic atoms for determining, 21:25263
charge distribution of, effect of Jastrow correlation factor on, (T), 25:18012
charge distribution Z = 19 to 82, effects of proton addition on, (E/T), 21:44620
charge distributions and binding energy for A = 3, calculations using Ohmura hard-core wave function with admixture of S' and S states, (T), 22:50527
charge distributions and electric quadrupole moments of Z = 62 to 94, from x-ray spectra of mu-mesic atoms, (E), 21:12056
charge distributions for light, model-independent method for determination of, (T), 22:50530 (NP-17610)
charge distributions from electron elastic scattering, data analysis for, (E/T), 23:8956 (TID-24667, pp 137-45)
charge distributions from measurements of μ-mesic x-ray spectra, radiative corrections to, (T), 23:5842
charge distributions in Z = 14 to 50, measurements using K/sub α/, isotope shifts in μ-mesic atoms, (E), 22:50565
charge distributions in, analysis of electron scattering and muonic x-ray spectra for, (T), 22:22636
charge distributions in, isomer shifts from Moessbauer measurements, (E/T), 22:53095 (BMwF-FBK-68-11)
charge distributions in, methods for measuring, (E), 21:46828
charge distributions of light, measurement using x-ray spectra of μ-mesic atoms, (E), 22:26924
charge distributions of Z = 5 to 17, measurement using μ-mesic x-ray spectra, (E), 22:5778
charge distributions of, measurement using electron elastic scattering, (E), 22:27380
charge form factors for, comparison of Hartree—Fock and limited Hartree—Fock methods for calculating, (T), 22:50692
charge in light, effective, (T), 21:42698
charge of heavy primary cosmic, (T), 23:27400
charge of relativistic heavy, formula for, (T), 23:44891
charge oscillations in deformed even—even, collective, (T), 23:21398
charge radii from K x-ray spectra, isotope shifts of, (E), 22:27190
charge radii of A = 3, calculations using separable two-body potentials, (T), 22:32482
charge radii of heavy, determination from K x-ray spectra, (E), 23:37256
charge radii of odd-even rare-earth, effects of single particle excitations on, 23:28344
charge radii of, determination from x-ray isotope shifts, review, 24:19734
charge radii of, effects of collective excitations on, (E), 22:27192
charge radii of, even-odd staggering of, (T), 22:27191
charge radii of, measurement using x-ray isotope shift, 24:24664
charge spectra in Sept. 2, 1966, solar particle event, (E), 22:38654 (N-68-17252)
charge spectrum of very heavy cosmic primaries, (E), 22:1025
charge-dependent phenomena in, use of isospin structure for analysis of, (T), 24:40693
charged particle scattering by Coulomb field of, Fredholm theory for, 22:24893 (ITF-67-44)
charged particle scattering by, cross-section formula for elastic diffraction, 24:30886
charged particle scattering with bremsstrahlung production, cross-section calculations using Low's theorem, (T), 24:18448
charged particle scattering with Coulomb excitation, eigenchannel theory for, 24:38330
charged-particle diffraction scattering by, two-phonon state excitation from, (T), 21:27660
charged-particle elastic and inelastic scattering cross sections for, optical model computer program for spin-0 and -1/2, 24:28816 (AAEC/TM-524)
charged-particle elastic scattering by light, calculations using optical model, (T), 21:4338
charged-particle elastic scattering by polarized, effect of quadrupole moment on, (T), 22:53229
charged-particle elastic scattering by polarized, effects of quadrupole moments on, (T), 21:35519
charged-particle elastic scattering by, nonsingular potentials from phase shifts for, (T), 21:2811
charged-particle reactions in emulsions, method for elimination of accidental measurement errors in curvature of particle track from, (T), 23:36878
charged-particle reactions with light, at low energy, (E), 22:14069(R) (COO-238-51)
charged-particle reactions with light, continuous spectra from, (E), 21:15484 (CEA-R-3009)
charged-particle reactions with p-shell, cross-section calculations using rectangle diagrams, (T), 22:50683
charged-particle reactions with Z = 1 to 98, nuclear data tables reaction list for, 25:12366
charged-particle reactions with, for nuclear surface studies, (T), 23:11072
charged-particle reactions with, Monte Carlo calculation for particle emission in heavy, (T), 23:19371
charged-particle scattering at high energies, dynamic symmetry with continuous spectrum for, 22:44471
charged-particle scattering by, analyticity of S-matrix for complex angular momenta in, 21:23564
charged-particle scattering by, higher-order effects in Coulomb excitation from, (T), 22:16101
charged-particle scattering by, potential restoration by scattering phases for Coulomb, (T), 22:1721
charged-particle scattering by, quadrupole corrections to elastic, (T), 24:26683
charged-particle scattering by, review of Coulomb, (E/T), 23:49072 (CERN-69-22)
charged-particle scattering by, Riemann method in inverse problem for, (T), 25:30894 (ITF-70-98-P)
charged-particle scattering by, shape-dependent phase-shift expansions for, (T), 21:2815
charged-particle scattering in crystals with collective Coulomb excitation, coherent gamma emission in, (T), 21:23581
charged-particle scattering near Coulomb barrier, multiple excitation in, (T), 23:44993
charged-particle scattering with Coulomb excitation, quantum mechanical effects on γ angular correlations in, (T), 23:23805
chemical environment of, Moessbauer spectroscopy for determining, 22:2396 (ORNL-IIC-10(Vol.1), pp 18-35)
classification scheme for stable nuclei, 24:38386
cluster structure in light, (T), 23:9063
collective energies from momentum- and angular momentum-projected determinantal wave functions, cms kinetic and rotational, (T), 25:39105
collective excitations in, 21:30053
collective excitations in deformed, 0^+, (T), 22:27329
collective excitations in even—even, boson operator calculus for representation theory of SO(5) symmetry for, 23:51970
collective excitations in even-even, purity of, (T), 22:24901
collective excitations in, description using quasi-boson approximation, 22:27314
collective excitations in, heavy giant dipole ΔT_z = 1, 0, -1, (T), 22:27225
collective monopole vibrations in closed-shell, 22:1725
collective monopole vibrations in closed-shell, (T), 22:1725
collective motion in deformed, concepts and properties of, (T), 25:7892
collective motion in spherical, lectures on, 22:20670 (NP-17228, pp 3-24)
collective motion in spherical, self-consistent core-particle coupling method, (T), 23:42976
collective motion in, general formulation of microscopic theory of, (T), 25:5811
collective motion in, variational principles for self-consistent theory of, (T), 22:42123
collective motions in, mass quadrupole tensor for description of, 24:52724
collective oscillations in even spherical, effect of Pauli principle on, (T), 22:27315
collective oscillations in even spherical, effect of Pauli principle on, 22:27315
collective oscillations of even spherical, anharmonic effects on, (T), 22:27322
collective oscillations of even spherical, anharmonic effects on, (T), 22:27322
collective potential energy and shape fluctuations of even, 21:10113
collective states in, semiclassical model for, (T), 23:19355
collective states of even-even rare-earth, (T), 22:48517 (JAERI-1158, pp 39-46)
collective vibrations in even-even spherical, with neutron-proton pairing interaction, (T), 21:5571
composite particle scattering at high energies, Glauber model for amplitude of, 23:46741
composition of superheavy cosmic primary, (E), 22:21946
composition of superheavy cosmic primary, (E), 22:21946
conference on hyperfine nuclear spectroscopy, Wellington, New Zealand, Oct. 17 to 21, 1966, 21:23858 (CONF-661046)
conference on low and medium-energy nuclear physics, 23:19319 (AERE-R-5744)
conference on neutron capture gamma spectroscopy, Studsvik, Sweden, August 11—15, 1969, 24:47575 (STI/PUB-235)
configuration structures in, effects of isospin on, 24:40696
content in neutron stars, calculations of, (T), 25:27311 (CERN-70-30(Vol.2), pp 759-68)
content of heavy, in primary cosmic radiation, (T), 21:33216(R) (AD-637557)
content of Z > 22, in cosmic radiation, use of meteoritic minerals in studies on, 23:20564
conversion electron-γ and γ-γ angular correlations in crystals, perturbation by strong magnetic fields, (T), 22:42062
core polarization contribution to effective interactions in A = 18, perturbation theory calculation for higher-order, (T), 22:53253
core polarization effects in A = 15 and 17, (T), 22:35235
core polarization processes and effective interactions in, higher-order effects, 22:14089
core-particle interaction in odd-A, with ground-state spin $^1/_2$, (T), 22:24835(R) (BARC-305)
Coriolis force in deformed, 21:42683(R) (UCB-34-P-141-8)
corpuscular-radiation source during low solar-activity years in ionospheric E region, (E/T), 25:24959
correlations in, few-particle, (T), 24:49941
cosmic charged particle reactions with emulsion, high-Z, (E), 24:35609
cosmic electron reactions at high energies, electron and meson (μ) pair energy spectra from, (T), 23:36889
cosmic meson (μ) reactions with, cloud chamber study of structure functions for, (E), 25:3260
cosmic meson (μ) reactions with, spark chamber and Cherenkov counter study of μ pair production from, (E), 22:17850
cosmic meson (π) reactions at 200 GeV in emulsions, coherent particle production in, (E), 23:23370
cosmic neutrino reactions in ocean bed, upper limit for magnetic monopole production from, (T), 24:37613 (NAL-44)
cosmic nuclei reactions at 100 to 500 MeV in emulsions, angular distributions and energies of particles from, (E), 23:47027
cosmic nuclei reactions with heavy and light, above 1 TeV/nucleon in emulsions, (E), 23:51853
cosmic nucleon reactions at 1 TeV in emulsions, multiple meson production in, (E), 25:33532 (INP-713(Vol.2), pp 6-48)
cosmic nucleon reactions in upper atmosphere with, nucleon pair production from, 21:42392
cosmic nucleon reactions with nuclei in emulsions, lower bound of four-momentum transferred between groups of secondary particles in large-multiplicity jets from, (E), 25:45662
cosmic nucleus reactions with nuclei in emulsions, lower bound of four-momentum transferred between groups of secondary particles in large-multiplicity jets from, (E), 25:45662
cosmic particle reactions above 10^{13} eV in atmosphere, wide-angle shower production from, (E), 25:1377
cosmic particle reactions above 100 GeV in emulsions, production of low-energy protons in, (E), 25:56429 (INP-754)

cosmic particle reactions at 10^{13} eV in emulsions, angular distribution of secondaries produced in, (E), 23:34530
cosmic particle reactions at 10^{13} to 10^{14} eV in atmosphere, installation for studying wide-angle shower production from, (E), 25:429
cosmic particle reactions at high energies in emulsions, effect of connected stars in, (E), 22:39263
cosmic particle reactions at high energies, book on, (E), 23:39619
cosmic particle reactions at very high energies, data-analysis method for Wilson chamber study of, (E), 25:1359
cosmic particle reactions at very high energies, Wilson chamber and ionization calorimeter study of, (E), 25:1358
cosmic particle reactions with atmospheric, temperature-effect dependence on mechanism for atmospheric μ production for ratio of π and K produced in, (T), 25:7537
cosmic particle reactions with heavy emulsion, central collisions in, (E), 21:13412
cosmic proton reactions above 10 TeV in atmosphere, singularities in π^0 production in, (E), 22:44323
cosmic proton reactions at 10 to 1000 GeV in emulsions, spallation without particle production in, (E), 23:23345
cosmic proton reactions at 10^{12} to 10^{13} eV in emulsions, production of eta, K, π, p, phi, and aleph baryon in, (E), 24:35604 (SJC-P-70-2)
cosmic proton reactions at 10^3 to 10^5 GeV in air, energy dependence of cross sections for inelastic, (E), 25:40877
cosmic proton reactions at 17 and 24 GeV in emulsions, diffraction in, (E/T), 22:39262
cosmic proton reactions at 80 TeV in emulsions, production of aleph baryon in, (E), 24:35605 (SJC-P-70-3)
cosmic proton reactions in air, relation number of produced mesons (π) with interaction energy for production of meson (μ) EAS above 1 TeV, (T), 23:46659
cosmic-nucleon reactions with, many-particle mechanism in, (T), 22:21929
cosmic-ray reactions with interstellar gas, production of secondary antiprotons in, 21:37222
Coulomb displacement energies and isobaric analog resonances in heavy nuclei, 22:3753 (INP-555/PL/PH, pp 155-61)
Coulomb displacement energies and isobaric analog resonances in heavy, (T), 22:3753 (INP-555/PL/PH, pp 155-61)
Coulomb displacement energies for isobaric analog states of deformed, (E), 23:1889
Coulomb displacement energies in light, (T), 25:23080
Coulomb displacement energies in mirror, correction of isovector monopole state to, (T), 25:59871
Coulomb displacement energies in the 1f/sub 7/2/ shell, 22:37382
Coulomb displacement energies of A = 33 to 65, in 1f($^7/_2$) shell, (T), 21:21501
Coulomb displacement energies of light, shell-model calculations for, (T), 25:28479
Coulomb displacement energies of Z = 82 and 83, isotope shift in, (E/T), 22:20630
Coulomb displacement energies of, systematics of, 21:2617
Coulomb displacement energies of, systematics of, (T), 25:28478
Coulomb displacement energy for A = 36, (E), 22:27030
Coulomb displacement energy systematics for 19 < Z < 63, 21:25519
Coulomb energies and second energy differences in A = 18 and 42, (T), 24:10970
Coulomb energies and second energy differences in A = 18 to 42, calculations including pairing residual interactions, (T), 25:59860
Coulomb energies of 1f/sub 7/2/ shell, calculations using Carlson—Talmi model with seniority mixing, (T), 22:30048(R) (PUC-937-307)
Coulomb energies of A = 20 to 42, (T), 23:10936(R) (COO-535-591)
Coulomb energies of A = 42 to 50, (E/T), 22:26982
Coulomb energies of closed-shell, computer program for Hartree-Fock calculations of, (T), 22:39697 (UCRL-50430)
Coulomb energies of, A- and T-dependence of, (T), 21:21576 (N-66-27440)
Coulomb energies of, simple shell-model expressions for, (T), 22:37381
Coulomb energy differences in A = 13 to 41 mirror, Hartee—Fock calculations with isospin corrections, (T), 25:36712
Coulomb energy differences in N = 82 to 126, effect of deformation on, (E), 25:17936
Coulomb energy differences of $T_z = {}^1/_2$ mirror, (T), 23:1882 (WASH-1093)
Coulomb energy of fissioning, calculation using modified liquid-drop model, (T), 24:26680
Coulomb energy of fissioning, calculation using modified liquid-drop model, (T), 25:43952(T) (BNL-tr-424)
Coulomb energy radii from isobaric mass parabolas, (T), 23:11071
Coulomb energy separation of analog states, effect of residual interaction on, (T), 23:19322 (BNL-13297)
Coulomb energy systematics for A = 22 to 40, (E/T), 22:9845
Coulomb energy systematics for A = 22 to 40, (E/T), 22:9845
Coulomb excitation by oxygen-16 at 25 to 52 MeV, (E/T), 24:49815
Coulomb excitation in rare earth region, hexadecapole effects on, (E/T), 24:49812
Coulomb excitation of deformed even-even, second-order virtual E1 transitions in, (T), 21:30005
Coulomb excitation of deformed odd-mass, reorientation effect in, (T), 24:49813
Coulomb excitation of, imbedded in iron, perturbed angular correlations with hyperfine interactions from, 23:39560
Coulomb excitation of, multiple, (T), 21:27641
Coulomb excitation of, quantal second order perturbation theory of, 24:49816
Coulomb excitation of, time differential perturbed gamma angular distribution from recoils from, (E/T), 24:49807
Coulomb interaction in, state dependence of, (T), 22:53247
Coulomb interactions in, 21:12077 (JINR-P4-2981)
Coulomb interactions in, effects of correlative nuclear forces on, (T), 21:30043
Coulomb interference in, relativistic eikonal approximation for superposition of two interactions for, (T), 25:5434
Coulomb-energy differences of single-particle states of A = 4n + 1, systematics of, 24:38328
coupling scheme for odd-even vibrational, 22:5858
currents in many- and two-body, consistent treatment in one-boson-exchange model for matrix element evaluation for N + N exchange, 23:51950 (DESY-69/28)
currents in, consistent treatment in one-boson-exchange model for N + N exchange, 23:51950 (DESY-69/28)
data sheets for A = 213 to 228, 21:19254
data sheets for A = 70 to 77, (E/T), 21:33922
data sheets for A = 77 to 83, 21:7758
de-excitation of highly excited, dissipation of angular momentum and energy in statistical, (T), 21:31844
de-excitation of highly excited, scheme for computer calculations of, 21:31868
de-excitation of very excited, statistical calculations, 23:5938
decay and fission properties of superheavy, 24:20435
decay by double-neutron emission, possibility for, (T), 25:17896
decay by electron capture, L/K ratios for allowed and first-forbidden transitions in, (E/T), 21:10074 (ORO-3346-8(Rev.))
decay curve analysis using least squares methods, evaluation of, 23:23747 (AERE-R-5911)
decay energies of, ERPD computer program for calculating, 21:15619 (UCRL-50164)
decay modes of, chemical effects on, 22:42096 (BNL-50100)
decay of 1p shell, computer programs for SU(3) fractional parentage for deuterons, tritons, and alpha particles from, (T), 25:23062 (LYCEN-7078)
decay of compound, angular momentum fractionation in, (T), 24:49823
decay of delayed helium-3 and triton emission, (T), 23:47059
decay of highly excited, influence of spin-dependent level densities and γ-ray competition in, (T), 21:31763
decay of oriented, angular distributions and correlations of radiation from, (T), 25:23059 (LA-4565)
decay of polarized, review of time reversal violation in angular correlations of two cascade photons in, 23:49182 (ITEF-650)
decay of very heavy, (T), 22:1691
decay of, adiabatic corrections to energies of, (T), 25:23065(T) (RFP-Trans-70)
decay of, detection of NMR through product angular distributions in, 22:52853 (UCRL-18315)
decay of, dual, 22:18251
decay of, elementary particle formalism for electromagnetic, 24:5280
decay of, Fierz term from epsilon/β^+ ratio for forbidden transitions in, 21:30034
decay of, interference at intersection of levels, (T), 25:43506 (JINR-P4-5786)
decay of, isospin selection rules for, 21:17414
decay of, measurement of γ-γ angular correlations in, 25:51544(R) (NYO-4177-103)
decay of, method for determining parameters of total absorption peak in gamma spectra from, 23:16137
decay of, multi-scintillation detector arrangement for linear polarization correlation measurements of γ—γ cascades in, 22:6608
decay of, parity nonconservation effects in electromagnetic, (T), 21:13917
decay of, perturbation of angular correlations by magnetic hyperfine interactions, (T), 21:19337
decay of, quasistatic perturbations of angular correlations in, (T), 21:44803
decay of, system for measurement of electron—gamma angular correlations from, 23:16124
decay of, theory for spontaneous, 21:40153
decay of, time dependence of, 24:37667
decay of, Z dependence of radiative corrections to beta, 23:40103
decay probability for electron capture relative to beta decay, calculations of, (T), 25:28494
decay properties and energy levels for A = 21 to 228, bibliography on, (E), 22:1664
decay properties of neutron-excess, research progress on, 23:19204(R) (RPI-3948-1)
decay properties of short-lived neutron-rich, 23:28772(R) (BMwF-FBK-68-44)
decay schemes for A = 65 through 69, nuclear data sheets for, 23:8964
decay schemes of A = 59, 60, and 61, data sheets for, 22:29958
decay schemes of deformed odd-A, dissertation review on, (E), 22:39657
decay schemes of deformed, orange-type beta spectrometer for coincidence measurements of, 24:21003
decay schemes of medium-weight and heavy, dissertation summary of research on, (E), 22:39654
decay schemes of medium-weight and heavy, dissertation summary of research using electron spectroscopy, (E), 22:39655
decay schemes of, data analysis of gamma spectra for, 21:44733 (CEA-R-3285)
decay schemes of, data processing for gamma spectroscopy for determination of, 23:49353 (CEA-R-3590)
decay schemes of, processing of gamma spectrometer data for studying, 23:7776(T) (NP-tr-1713)
decay studies using fast-slow e^+-e^- coincidence techniques, dissertation review on, 22:42075
decay with proton emission, review on, 21:17411
decays of 2s-1d-shell, comparison of analogous $\Delta T = 0$ beta and gamma, (T), 25:59844
decoupling parameters for A = 159 to 183, effects of spin—spin and spin—orbit forces on, (T), 25:28484
deformability parameters for neutron-rich even—even, calculations of, (T), 22:30059
deformation and quadrupole moments of even A = 100, (T), 24:11031
deformation effects in light, lectures on shell-model formalism for, (T), 22:48627
deformation energies for fissile and rare earth, calculation using liquid-drop model with shell corrections, 24:30904
deformation energies of super-heavy, (T), 22:30081
deformation energies of transuranium and superheavy, shell corrections to, (T), 22:46813(T) (ANL-Trans-634)
deformation energies of, microscopic calculations of shell effects in, 22:30077
deformation energies of, microscopic calculations of shell effects in, (T), 22:30077
deformation energies of, shell effects in, (T), 21:15635
deformation energy of even—even, (T), 22:3751 (INP-555/PL/PH, pp 125-36)
deformation energy surfaces for, calculations using single-particle energies and wave functions, (T), 23:23788
deformation in A = 100 region, evidence for, (E), 25:5687 (UCRL-19949)
deformation in head-on collisions, (T), 22:27340
deformation in head-on reactions, (T), 21:29969(R) (UCRL-17299)
deformation in near closed-shell, evidence for, (E/T), 23:19277
deformation in Nilsson model for 2s1d-shell, hexadecapole, (T), 23:11053
deformation of A = 218 to 232, octupole, (T), 21:38398
deformation of deformed even-even, (E), 22:7712
deformation of deformed even-even, (E), 22:7712
deformation of even-even A = 8 to 36, calculations using variational method, 21:38377(R) (PUC-937-260)
deformation of even-even light, variational calculations using realistic nucleon-nucleon interactions, (T), 21:23545
deformation of even-even, quadrupole, (T), 22:39689 (ITF-68-13)
deformation of fissile, shell effects on, (T), 23:47078
deformation of ground and excited states of, equilibrium, (T), 22:53220 (INR-P-920)
deformation of heavy , dependence of ground-state energy and quadrupole moment on, 21:5563 (JINR-E4-2940)
deformation of heavy, energy of nonaxial, (T), 23:43001
deformation of heavy, equilibrium, (T), 21:44757
deformation of heavy, theory of, (T), 23:4042 (IAE-1465)
deformation of heavy, Y_{44}, (T), 22:48584 (JAERI-1158, pp 120-2)
deformation of light, calculations using Hartree—Fock method, (T), 22:20766
deformation of light, calculations using independent-particle model, 21:34060
deformation of light, Hartree—Fock formalism for equilibrium, (T), 23:11047 (CEA-R-3404)
deformation of light, in the local-density approximation, 25:17727
deformation of odd-A, systematics of, 21:15545 (CONF-660221)
deformation of rare-earth, measurement using α inelastic scattering, (E), 22:3700 (UCRL-17547(Exp.))
deformation of, centrifugal stretching effect on equilibrium, (T), 22:48581 (JAERI-1158, pp 113-14)
deformation of, effects of spin-orbit interaction on, (T), 21:31864
deformation of, effects of spin-orbit interaction on, (T), 22:32732
deformation of, effects of unpaired particles on, (T), 21:42707
deformation of, invariant imbedding techniques for analysis of variations of, 24:52721
deformation of, measurement and theory of, (E/T), 22:7760
deformation of, research using proton quasielastic scattering, (T), 22:3784
deformation of, theory of equilibrium, 21:44800
deformation parameters of light, empirical formula for, (E), 25:53873
deformation regions for, calculation of, (T), 22:30080
deformations in light, (T), 22:27303
deformations in pairing + quadrupole model, (T), 23:7353
deformations in transition, theory for, 23:44976
deformations of ground states and excited states of strongly deformed, equilibrium, (T), 22:24894 (JINR-E4-3703)
deformations of ground states of 50 < Z < 82 and 50 < N < 82 of, equilibrium, (T), 23:13272
deformations of heavy, calculation using projected wave functions, 21:5562 (JINR-E4-2934)
deformations of heavy, calculations using projected wave functions, (T), 21:23562
deformations of heavy, hexadecapole, (T), 22:20607
deformations of light, quadrupole, (T), 22:20497(R) (AECL-3009)
deformations of N = 50 to 82 with Z = 50 to 82, equilibrium, (T), 22:32568 (JINR-E4-3816)
deformations of rare-earth, calculations using projected wave functions, (T), 21:10102
deformations of rare-earth, in pairing + quadrupole model, (T), 22:20692

deformations of, calculations using Lee—Englis potential for stability of pear-shaped, (T), 23:7332
deformations of, calculations using surface delta interaction, (T), 22:20743
deformations of, in pairing + quadrupole model, (T), 22:20691
deformations, solution of Bohr's collective Hamiltonian for quadrupole, 21:596 (AD-635618)
deformed Hartree—Fock solution for, 21:4367
delayed neutron emission by, studies of, (E/T), 22:29949
densities of, as function of A, (T), 25:7915
density distributions for A = 50 to 240, Thomas—Fermi calculation of neutron and proton, (T), 25:25828
density distributions from magnetic spectrometer study of rho° production in photon reactions with complex nuclei, (E), 24:24215
density matrix of, adjacent to magic nuclei, 23:43000
description for 2s-1d-shell, using group theory, 21:7725
description for deformed even-even, using Krutov model, 25:5819
description of 1p and 2s-1d shell, using single-particle shell model, (T), 21:12099
description of 1p-shell, using Hartree—Fock and Hartree—Fock—Bogolyubov formalisms, (T), 22:29915
description of 1p-shell, using shell model, (T), 22:5809(R) (ANL-7354)
description of 2s1d-shell, Saxon—Woods potential parameters for, (T), 22:11944(R) (AECL-2780)
description of 2s1d-shell, using Hartree—Fock method with Coulomb and center-of-mass corrections, (T), 22:50694
description of 2s1d-shell, using projected Hartree—Fock wave functions, (T), 22:27302
description of 2s1d-shell, using realistic interactions with SU(3) classification of wave functions, (T), 22:30048(R) (PUC-937-307)
description of 2s1d-shell, using shell model, 21:30023(R) (ANL-7284)
description of A = 15 and 17, including deformed states, 21:38377(R) (PUC-937-260)
description of A = 3 and 4, using variational methods, (T), 21:7850
description of A = 3, review of methods for, (T), 22:39731
description of A = 3, using factorable potentials, (T), 21:15611 (CONF-660221-, pp 132-9)
description of A = 3, using Faddeev formalism with local potentials, (T), 22:22621 (SLAC-79)
description of A = 3, using modified Feshbach wave function and velocity-dependent potential, (T), 23:21243
description of A = 3, using separable potentials, (T), 23:3930
description of A = 3, using SU(3) representation, (T), 23:4048 (JINR-E4-4043)
description of A = 36 to 39 sd-shell, using shell model with Tabakin potential, (T), 23:23803
description of A = 39 to 48, using shell model with deformed states, 22:11919 (PUC-937-264)
description of A = 4 to 8, using projected Hartree-Fock method, 21:34061
description of A = 6 isobaric triplet, using three-body model, (T), 22:48466
description of closed-shell, using t-matrix formalism with harmonic oscillator representation, (T), 22:7740 (JINR-E2-3543)
description of collective motion in spherical, lectures on, (T), 22:20670 (NP-17228, pp 3-24)
description of collective oscillations in even spherical, (T), 22:27322
description of deformed even-A, using collective negative-parity asymmetric-rotor model, (T), 21:44763
description of deformed even-even, using Donner—Greiner rotation-vibration model, (T), 22:39647
description of deformed light 2s1d-shell, using superfluid model, (T), 21:23464
description of deformed odd-A, using Saxon—Woods single-particle potential with ΔN = 2 mixing, (T), 22:27242
description of deformed odd-odd, wave functions for, (T), 22:30110
description of deformed rare-earth and tranuranic, using pairing + state-independent octupole force, (T), 22:44757
description of deformed, shell corrections in, (T), 21:35505(T) (LA-tr-67-36)
description of deformed, stretch scheme for shell-model, (T), 21:44791
description of deformed, using Hartree-Fock approximation with monopole-monopole interaction, (E), 21:4367
description of deformed, using Hartree-Fock method with parity mixing, 21:34063
description of deformed, using pairing model, (T), 22:20672 (NP-17228, pp 56-69)
description of deformed, using projection of spurious center-of-mass and rotational states from many-body wave functions, (T), 22:50681
description of deformed, using shell model with pairing interaction, (T), 22:3798
description of deformed, using superfluid model, (T), 22:1741
description of deformed, using surface delta interaction, (T), 21:1148
description of dipole resonance in magic, (T), 22:7748
description of even—even 2p1f-shell, using self-consistent Hartree—Fock calculations, (T), 22:53249
description of even—even 2s1d-shell, using self-consistent Hartree—Fock—Bogoliubov theory, (T), 23:5946(R) (ORO-3765-1)
description of even-A N = Z A = 8 to 40, using Hartree—Fock method with hard-core potential, (T), 21:35522
description of even-even and odd-even vibrational, including anharmonic effects, (T), 22:5858
description of even-even, using boson approximation, (T), 22:32694
description of even-even, using Hartree—Fock method with harmonic oscillator potential and truncated wave functions, (T), 22:26792
description of finite, using Hartree—Fock method with projected wave functions, (T), 22:32555
description of giant resonances using collective model, (T), 21:46801
description of ground state of A = 3, using Hamada-Johnston potential, (T), 21:44547
description of ground states of 2s1d-shell, effects of pairing correlations in, (T), 23:19386
description of ground states of light, using Brueckner—Hartree—Fock single-particle shell model, 21:38377(R) (PUC-937-260)
description of ground states of, using seniority and stretch schemes, (T), 23:7349
description of heavy and superheavy, using spherical Hartree—Fock approximation, (T), 23:1960
description of heavy, shell-model potentials for, (T), 22:9800(R) (COO-535-571)
description of light A = 4 to 8, using projected Hartree—Fock wave functions, (T), 23:1825 (NP-17579, pp III.12-17)
description of light deformed and spherical, using nonlocal potential, (T), 21:17407
description of light sd-shell, using four-body ground-state correlations, (T), 22:50682
description of light, density-dependent central force for, (T), 22:20759
description of light, using extended two-particle shell model with ladder approximation, (T), 21:44761
description of light, using Hartree—Fock approximation, (T), 23:15346(R) (ORO-1316-70)
description of light, using Hartree—Fock theory, (T), 23:28300 (NP-17819, Chap.3.2)
description of light, using Hartree-Fock approximation, (T), 21:13807
description of light, using self-consistent field formalisms, (T), 23:5946(R) (ORO-3765-1)
description of light, using self-consistent Hartree-Fock method, 22:1743
description of light, using shell model with j-j and l-s coupling approximations, (T), 22:27300
description of medium-weight, using two- and four-quasiparticle Tamm-Dancoff theory, (T), 22:22635
description of N > 126 and Z > 82, using shell model, (T), 22:14092
description of N = 29, using shell model with configuration mixing, (T), 22:27305
description of N = Z = 2, using single-particle model, (T), 22:5809(R) (ANL-7354)
description of neutron closed-shell, using BCS approximation, (T), 22:48602
description of odd—odd, using quasiparticle model, 21:42683(R) (UCB-34-P-141-8)
description of odd-A sd-shell, using shell model with U_3 group representation, (T), 22:14110
description of odd-A, using vector coupling of single nucleons to rotational excitations, (T), 22:5873
description of odd-odd, using coupling of odd proton and neutron to symmetric rotating core, (T), 23:10937(R) (COO-1120-78)
description of odd-odd, using quasiparticle model, (T), 21:13868
description of sd-shell, using shell model, 22:20745
description of sd-shell, using shell model with noncentral interactions, 21:27628
description of spherical, using pairing approximation, (T), 22:5881
description of spherical, using pairing approximation, (T), 22:5880
description of spontaneously fissioning isomeric, as two-quasiparticle states with large deformations, (T), 22:20644
description of system of complex-spin, quantum mechanical, 22:17387
description of weakly deformed, BCS formalism for, (T), 23:4079
description using analog and isobaric spin formalism, (T), 22:3747 (CONF-660306-31)
description using cluster model, (T), 22:24889 (BMwF-FBK-67-93)
description using elementary-particle formalism, testing using helium-3 (n,p) reactions, (E), 22:11897
description using extended shell model with equations-of-motion method, (T), 22:16089
description using Galilean and translationally invariant operator algebra, 21:35509
description using Hartree—Fock method, potentials for, (T), 22:20753
description using Hartree-Fock method with parity mixing, 21:34051
description using Hartree-Fock theory, pairing corrections for, 21:27627
description using multi-configuration Hartree—Fock theory, (T), 23:9050
description using phenomenological collective models, review of, (T), 22:9936
description using quasiparticle theory, 21:38397
description using shell model with group theory, (T), 22:1744
description using shell model with harmonic oscillator potential in Galilean and translationally invariant field operator formalism, (T), 22:3771
description using shell model with nonlocal and local-equivalent potentials, 21:42686
description using shell model with pairing interaction and parity deformation of single-particle orbitals, (T), 22:3797
description using SU(4) supermultiplet theory, testing of, (T), 22:22632
description using two-body harmonic oscillator potentials with group theory, (T), 22:9960
descriptions for spherical, survey on shell-model, 25:12634 (LYCEN-7034, pp 147-72)
detection of heavy and very-heavy, from particle tracks in meteorites, (E), 25:30317
detection of heavy cosmic-ray, from fossil tracks in meteorites, 24:3207
detection of heavy, in primary cosmic radiation, (E), 21:20799
detection of light, by track analysis in cellulose nitrate and cellulose acetate, 22:16887
detection of multi-charged, method using number of electrons on track in streamer chamber for, 24:9691
detection of rare, in solids by nuclear quadrupole resonance, 21:7032
detection of superheavy, (T), 25:35592
detection of Z greater than or equal to 30 cosmic, balloon, (E), 23:27391(R) (N-69-11950)
deuteron (d,pn) reactions with, Gell-Mann—Goldberger relation for, (T), 23:7341
deuteron absorption coefficients and reaction cross sections for Z = 6 to 79 nuclei, at 4 to 28 MeV, (T), 21:21531
deuteron breakup on heavy, Nemets effect in, (E), 24:10998
deuteron clustering in heavy, (T), 22:22628
deuteron differential elastic scattering cross sections for A = 12 to 96, at 34.4 MeV, optical-model analysis of, (E/T), 21:33932
deuteron differential elastic scattering cross sections for, spin-orbit effects on optical-model calculations of, (T), 21:44772
deuteron diffraction disintegration and scattering with excitation of one-phonon states, (T), 22:35406
deuteron diffraction disintegration on, influence of nucleon potentials on, (T), 23:45011
deuteron elastic and inelastic scattering by deformed, second-order Born approximation for, (T), 23:7317
deuteron elastic and inelastic scattering by even—even, effects of strong binding in, (T), 25:36848
deuteron elastic scattering as three-body problem, (T), 21:12110
deuteron elastic scattering at 12 to 26 MeV, angular distributions for, (E/T), 21:10089
deuteron elastic scattering at 15 MeV, optical-model analysis of polarized, (T), 25:53812 (LA-DC-12577)
deuteron elastic scattering at 52 MeV by Z = 1 to 92, optical model analysis of angular distributions from, (E), 22:46711 (BMwF-FBK-68-16)
deuteron elastic scattering at 9 to 12 MeV using polarized beams, optical-model parameters for, 25:53712
deuteron elastic scattering by A = 12 to 238, angular distributions for, (E/T), 21:4346
deuteron elastic scattering by complex, computer program for calculating, 21:27623 (ORNL-TM-1831)
deuteron elastic scattering by heavy, optical-model potentials for, (T), 23:1953
deuteron elastic scattering by, analysis using Akhieser-Pomeranchuck-Blair model, (T), 22:15989
deuteron elastic scattering by, calculation of optical potentials for, 25:17987
deuteron elastic scattering by, calculations using tensor spin-orbit interaction, 21:42687
deuteron elastic scattering by, diffraction-model analysis of, (T), 23:37340
deuteron elastic scattering by, effect of polarization on, (T), 21:40496
deuteron elastic scattering by, exactly solvable model for, (T), 22:27348
deuteron elastic scattering by, formalism for polarization transfer in, (T), 25:5804 (LA-4465, pp 21.1-2)
deuteron elastic scattering by, formalism for polarization transfer in, (T), 25:53849
deuteron elastic scattering by, microscopic model for, (T), 25:17960
deuteron elastic scattering by, model for microscopic analysis of, (T), 24:38300 (CTC-32)
deuteron elastic scattering by, optical model and distorted-wave formalisms for, (T), 22:32674
deuteron elastic scattering by, optical potentials for calculating differential cross sections for, (T), 23:40152
deuteron elastic scattering by, optical-model analysis of, (E), 25:25783
deuteron elastic scattering by, optical-model calculations for, (T), 21:25592
deuteron elastic scattering by, optical-model formalism for, (T), 21:34049
deuteron elastic scattering by, optical-model parameters for, (T), 25:5854
deuteron elastic scattering by, optical-model potential for, (T), 21:13926
deuteron elastic scattering by, optical-model potential for, (T), 22:50686
deuteron elastic scattering by, review of polarization effects in, 25:53839
deuteron elastic scattering by, tensorial part of optical-model potential for, (T), 22:18326
deuteron elastic scattering cross sections for N = 50, anomalies in, (E), 22:48501
deuteron elastic scattering, lectures on cross sections and polarization from, (T), 25:12624 (ANU-P-497)
deuteron inelastic reactions above 1 GeV, cascade-evaporation model with stripping using Monte Carlo method for, 24:8669
deuteron inelastic reactions up to 30 GeV/nucleon in emulsions, intranuclear cascade model for, (T), 25:25454 (JINR-P3-5548)
deuteron inelastic scattering at high energies, calculations using Monte Carlo method with Coulomb and diffractional disintegration, (T), 23:28348
deuteron inelastic scattering by A = 12 to 64, angular distributions for, (E), 22:27008
deuteron inelastic scattering by, effects of deuteron finite size and nuclear charge diffuseness on form factors for, (T), 23:5882
deuteron inelastic scattering by, mechanism of, (T), 21:35500 (JINR-P2-3356)

deuteron inelastic scattering by, method of summation of diagrams for analysis of, 21:29564
deuteron inelastic scattering by, phase-shift rule for, (T), 23:13332
deuteron inelastic scattering near Coulomb barrier, semiclassical approximation for, (T), 23:15508
deuteron reaction threshold energies for A = 3 to 260, 21:27540 (UCRL-14002)
deuteron reactions (d,2n) at 0 to 15 MeV, cross sections for, (E), 21:42605
deuteron reactions (d,α) with light, mechanism in isospin-violating direct, (T), 25:28459
deuteron reactions (d,d) and (d,p) with, contribution of breakup channels to, (T), 24:38343
deuteron reactions (d,d'), (d,p), and (d,t) with heavy, broad-range magnetic spectrometer for studying, 21:14420 (ANL-7029, pp 1-3)
deuteron reactions (d,He-3) at 82 MeV, parameters from, (E/T), 25:39058
deuteron reactions (d,He-3) with A = 12 to 64, angular distributions for, (E), 22:27008
deuteron reactions (d,He-3) with A = 12 to 65, shell corrections in DWBA analysis of, (T), 23:37356
deuteron reactions (d,He-3), (d,t), and (d,α) at 28.5 MeV, three-detector telescope for identification of particles in, 21:3273
deuteron reactions (d,Li-6) with, analysis of features of, (T), 25:43987
deuteron reactions (d,n) and (d,p) at low energies, (T), 21:2817
deuteron reactions (d,n) and (d,p) with deformed, theory using distorted-wave method with adiabatic approximation, (T), 22:14096
deuteron reactions (d,n) and (d,p) with, charge exchange effects in, (T), 22:7661(R) (NYO-3525-26)
deuteron reactions (d,n) and (d,p) with, exactly solvable model for, (T), 22:27348
deuteron reactions (d,n) and (d,p) with, formalism for polarization transfer, (T), 25:53847
deuteron reactions (d,n) and (d,p) with, formalism for polarization transfer, (T), 25:5803 (LA-4465, pp 20.1-2)
deuteron reactions (d,n) and (d,p) with, isospin mixing in, (T), 22:11949(R) (ORO-2972-47)
deuteron reactions (d,n) and (d,p) with, linked-cluster expansion for transition amplitude for, (T), 23:13327
deuteron reactions (d,n) and (d,p) with, optical model and distorted-wave approximation for, (T), 22:32674
deuteron reactions (d,n) and (d,t) with light, peripheral model in pole approximation for comparative analysis of differential cross sections for, 24:3845
deuteron reactions (d,n) using polarized beam, analysis of neutron polarization at 0°, (T), 25:53848
deuteron reactions (d,n) with A = 90 to 120, proton decay of isobaric analog states in, (E), 21:38321
deuteron reactions (d,n) with, analysis of polarization transfer in, (T), 25:5805 (LA-4465, pp 26.1-2)
deuteron reactions (d,n) with, cross-section and spectral measurements using time-of-flight method, 21:38160 (ORNL-P-3206)
deuteron reactions (d,n) with, generalized potential for, 21:30028 (NASA-TN-D-4000)
deuteron reactions (d,np) with Z = 13 to 82, through isobaric analog resonances, (E), 21:40429(R) (RLO-1388-23)
deuteron reactions (d,np) with, (T), 21:4351
deuteron reactions (d,np) with, angular and energy distributions for, (T), 22:14115
deuteron reactions (d,np) with, calculations using optical model, (T), 21:2765
deuteron reactions (d,p) and (d,t) with A = 155 to 171, Coriolis coupling analysis of, (T), 24:6921
deuteron reactions (d,p) and (d,t) with deformed, nuclear structure research with, 24:38323
deuteron reactions (d,p) at 2.45 GeV/c in nuclear emulsions, cross sections for, (E), 24:35853
deuteron reactions (d,p) at 4 to 15 MeV, isomer production by, (E/T), 21:12024(R) (NYO-2771-19)
deuteron reactions (d,p) at 7 to 21.4 MeV with A = 10 to 91, diffraction analysis of angular distributions from, (T), 25:56847
deuteron reactions (d,p) at 7.0 to 7.5 MeV, calculations using distorted-wave Born approximation, (T), 21:27570 (MIT-2098-299, pp 52-65)
deuteron reactions (d,p) at low energies, direct mechanisms in, (E/T), 23:49443 (INR-970)
deuteron reactions (d,p) at low energies, theory for analyzing, (E/T), 22:9918 (CEA-R-3305)
deuteron reactions (d,p) below Coulomb barrier, DWBA treatment for, (T), 24:52730
deuteron reactions (d,p) below Coulomb barrier, spectroscopic factors from, (E/T), 22:20469
deuteron reactions (d,p) below the Coulomb barrier, theory for, 24:43573
deuteron reactions (d,p) near 20 MeV, adiabatic treatment of, (T), 25:28512
deuteron reactions (d,p) with 1p-shell, angular distributions for, (E), 22:5809(R) (ANL-7354)
deuteron reactions (d,p) with 1p-shell, calculations for spectroscopic factors using wave functions with effective three-body interactions, (T), 23:15373
deuteron reactions (d,p) with A = 10 to 34, spin-dependent effects in, (E), 21:23534(R) (ANL-7246)
deuteron reactions (d,p) with A = 44 pseudonium, core excitation sensitivity in, (T), 24:8959
deuteron reactions (d,p) with A = 59 to 196, isomer production in, (E), 21:7760
deuteron reactions (d,p) with Coulomb excitation, selection rules for, (T), 21:46793
deuteron reactions (d,p) with deformed heavy, spectroscopic factors for, (T), 21:33987
deuteron reactions (d,p) with deformed, (T), 21:44736 (JINR-P4-3447)
deuteron reactions (d,p) with deformed, DWBA analysis with spin-orbit interaction, (T), 23:52170 (JINR-E4-4686)
deuteron reactions (d,p) with deformed, inelastic processes in, (T), 25:43984
deuteron reactions (d,p) with deformed, interference of direct and indirect transition amplitudes in, (T), 21:19341
deuteron reactions (d,p) with deformed, intermediate excitations in, (T), 22:42099 (JINR-P4-3872)
deuteron reactions (d,p) with deformed, multi-step mechanism for, (T), 23:13336
deuteron reactions (d,p) with deformed, multistep theory of, (T), 23:4047 (JINR-E4-4015)
deuteron reactions (d,p) with deformed, perturbation approach to multistep, (T), 25:25837
deuteron reactions (d,p) with even-A rare-earth, analysis using modified Nilsson orbitals, (T), 22:32649
deuteron reactions (d,p) with stripping theory for, 21:30036
deuteron reactions (d,p) with strongly deformed, analysis using phenomenological models, (T), 25:23101
deuteron reactions (d,p) with zero-spin, neutron spin dependence in weakly bound projectile description of, (T), 23:30986
deuteron reactions (d,p) with, (T), 21:19329
deuteron reactions (d,p) with, abnormal behavior of hole levels in, (E/T), 23:47056
deuteron reactions (d,p) with, analysis of analog resonant effects in, (T), 24:43578
deuteron reactions (d,p) with, analysis of BHMM theory for, 24:15949 (UJV-2261-F)
deuteron reactions (d,p) with, analysis of multi-channel features of, (T), 25:56817 (JINR-E4-5836)
deuteron reactions (d,p) with, analysis of proton polarization using Jer-Martirosyan method, (T), 24:33169
deuteron reactions (d,p) with, analysis using modified phase-shift technique, 24:15956
deuteron reactions (d,p) with, analysis using sudden approximation, 24:20424 (JAERI-1184, pp 96-9)
deuteron reactions (d,p) with, approximation for form factors for, 21:27644
deuteron reactions (d,p) with, calculations using DWBA formalism, (T), 21:12080 (LYCEN-6634)
deuteron reactions (d,p) with, calculations using distorted-wave Born approximation with distorted spin-orbit potential, (T), 21:13922
deuteron reactions (d,p) with, calculations using distorted-wave approximation, (T), 21:2775
deuteron reactions (d,p) with, coupled-channel analysis of, (T), 23:40144
deuteron reactions (d,p) with, coupled-channel formalism for, (T), 22:27356
deuteron reactions (d,p) with, cross-section calculations using weakly bound projectile model, 21:34059
deuteron reactions (d,p) with, cross-section calculations using Green function method, 21:25571
deuteron reactions (d,p) with, D-state contribution to, 24:49957
deuteron reactions (d,p) with, determination of total angular momentum using polarized deuterons, (E/T), 21:42693
deuteron reactions (d,p) with, deuteron D-state effect and spin dependence in vector polarization for, (T), 25:53856
deuteron reactions (d,p) with, differential cross sections and polarization in sudden approximation, (T), 22:20725
deuteron reactions (d,p) with, distorted-wave calculations of d-state effects in, (T), 21:31838 (RHEL/R-136, pp 89-130)
deuteron reactions (d,p) with, DWBA formalism for, (T), 22:53219 (CEA-R-3574)
deuteron reactions (d,p) with, effect of charge-exchange scattering on, (T), 21:4349
deuteron reactions (d,p) with, effect of repulsive core in DWBA calculations for, (T), 23:13334
deuteron reactions (d,p) with, effects of deuteron d-state on, (T), 21:38387
deuteron reactions (d,p) with, effects of deuteron alignment and polarization on angular distributions for, (T), 21:46792
deuteron reactions (d,p) with, finite-range effects in, (T), 21:19320
deuteron reactions (d,p) with, isobaric analog resonance effects in, 25:28471
deuteron reactions (d,p) with, lectures on polarization in, (T), 25:12624 (ANU-P-497)
deuteron reactions (d,p) with, lectures on, (T), 22:3800
deuteron reactions (d,p) with, neutron capture in, (T), 21:2782
deuteron reactions (d,p) with, polarization calculations using weakly bound projectile model, 21:34058
deuteron reactions (d,p) with, polarization effects in, (T), 21:46806
deuteron reactions (d,p) with, polarization effects in, (T), 25:53842
deuteron reactions (d,p) with, polarization effects in, (T), 21:21610
deuteron reactions (d,p) with, polarization effects in, (T), 22:42114
deuteron reactions (d,p) with, polarization experiments on, 21:21617
deuteron reactions (d,p) with, polarized, (E), 25:25783
deuteron reactions (d,p) with, proton polarization from, (T), 23:19385
deuteron reactions (d,p) with, proton polarization in, (T), 21:2816
deuteron reactions (d,p) with, review of theory of, (T), 23:5963
deuteron reactions (d,p) with, spectroscopic factors from Butler-Born approximation, (T), 22:42110
deuteron reactions (d,p) with, spectroscopic factors from, (T), 22:42145
deuteron reactions (d,p) with, spectroscopic factors from, (T), 23:5964
deuteron reactions (d,p) with, spin dependence of vector analyzing power of, (T), 25:53857
deuteron reactions (d,p) with, use of Born approximation for analysis of, (T), 25:31400
deuteron reactions (d,p) with, validity of sudden approximation for, (T), 24:40683
deuteron reactions (d,p), analysis using S-matrix with orthogonal initial and final-state wave functions, (T), 24:18465
deuteron reactions (d,pγ) with A = 108 to 134 and A = 182 to 210, p-γ coincidence spectra from, (E), 24:26645
deuteron reactions (d,pγ) with heavy, anomalous gamma intensities from, (E), 21:10029
deuteron reactions (d,pγ) with, equipment and methods for angular correlation measurements in, (E), 23:47886
deuteron reactions (d,pγ) with, review of angular correlation experiments on, 24:28714
deuteron reactions (d,t) and (d,He-3) with N = Z, angular distributions for, (E), 22:26931 (LYCEN-6789)
deuteron reactions (d,xn) and (d,pxn) with Z = 20 to 100, excitation functions and thick-target irradiation yields for, (T), 25:12529(T) (ORNL-tr-3020)
deuteron reactions (d,xn) and (d,pxn) with, estimation of excitation functions for, (T), 23:4052 (KFK-767)
deuteron reactions (d,xn) with, method for estimation of excitation functions for, 25:18018
deuteron reactions above 1 GeV, cascade-evaporation model for, 23:37291(T) (ORNL-tr-2164)
deuteron reactions at 0.1 to 20 GeV/nucleon in emulsions, track multiplicity and correlation, and energy dependence of produced-particle scattering angle in, (T), 25:47892(T) (ORNL-tr-2503)
deuteron reactions at 23 MeV with N = 14, single-nucleon transfer, (E), 23:17103(R) (ANL-7481)
deuteron reactions at 275 MeV in emulsions, number of prongs for inelastic, (T), 23:30766(T) (ORNL-tr-1934)
deuteron reactions at 600 MeV in nuclear emulsion, statistical analysis of particle tracks from, (E), 25:33971 (JINR-P2-5261)
deuteron reactions at high energies, cross sections for dissociation and stripping, 24:45549
deuteron reactions at high energies, differential cross section ratio of π^- production in proton reactions with nuclei to π^- production in, (E), 25:47728 (JINR-P1-5819)
deuteron reactions at high energy, (T), 22:32668(T) (ORNL-tr-1907)
deuteron reactions at high energy, analysis using d-whole and 2-center schemes, (T), 24:8944
deuteron reactions in emulsions, prong distribution in, (E), 22:44650
deuteron reactions using polarized beams, method for determination of secondary standards for analyzing tensors of, 25:53859
deuteron reactions using polarized beams, method for determination of analyzing tensors in, 25:53860
deuteron reactions using polarized beams, method for determination of analyzing tensors in, 25:5802 (LA-4465, pp 11.1-2)
deuteron reactions using polarized beams, precise method for determination of analyzing tensors for use as secondary standards, 25:5806 (LA-4465, pp 27.1-6)
deuteron reactions with, bibliography on, 21:33871 (CEA-Bib-82)
deuteron reactions with, computer program for statistical-model evaporation calculations, (T), 21:12024(R) (NYO-2771-19)
deuteron reactions with, derivation of optical potential from non-local neutron and proton optical potentials, 25:39085
deuteron reactions with, effect of neutron-nucleus interaction on Coulomb breakup, (T), 25:15190
deuteron reactions with, effective interactions in three-body model for, (T), 23:1948
deuteron reactions with, external force effects on pickup and stripping, (T), 21:9868
deuteron reactions with, isospin mixing in, (T), 21:2807
deuteron reactions with, isospin mixing in, (T), 21:46809
deuteron reactions with, method for treatment of Pauli principle in breakup, (T), 25:56833 (ORO-3765-31)
deuteron reactions with, N effect as Landau singularity, (T), 21:1121 (AD-635915)
deuteron reactions with, optical-model analysis of, (T), 21:5586
deuteron reactions with, shell-model description of, (T), 25:34179
deuteron reactions with, theory and spectroscopic uses of pickup and stripping, (T), 25:5871 (UJV-1870)
deuteron reactions with, theory for, 21:27317 (MIT-2098-299, pp 83-115)
deuteron reactions with, theory of stripping, 21:31876
deuteron reactions with, three-body theory of, 21:31877
deuteron scattering by, analysis using Faddeev method with proton and neutron amplitudes, (T), 23:49461
deuteron scattering by, breakup corrections to optical potential for, (T), 24:13409
deuteron scattering by, calculation of amplitudes from composite-particle scattering theory, (T), 24:20448
deuteron scattering by, coupled channel method for direct reactions in, 21:27645
deuteron scattering by, optical potential for, (T), 24:8933
deuteron scattering by, potential, (T), 21:31856
deuteron scattering by, strength of tensor interaction in optical potential for, (T), 25:12684
deuteron scattering by, tensor optical potential for, (T), 23:28353
deuteron scattering by, three-body model of optical potential for, (T), 22:46823
deuteron scattering in multi-GeV region, Glauber theory of, (T), 25:20531
deuteron stripping reactions at 12.3 MeV with A = 9 to 208, DWBA analysis of polarized, (E), 25:39057
deuteron stripping reactions on, validity of BHMM theory for, (T), 24:8962
deuteron stripping reactions with deformed, (T), 21:2791

deuteron stripping reactions with, Faddeev three-body formulation of transition amplitude for, 22:5666
deuteron stripping reactions with, time reversal violating potential in N + N interactions for reciprocity violation in, 24:6740
deviations from I(I + 1) law in deformed, 22:20717
dipole modes of, effects of neutron excess on, (T), 24:47667
dipole states of mass-15, shell model calculations for, 25:17981
disintegration of highly excited heavy, (T), 22:35368
disintegration of light, in Coulomb field, 21:9951
disorientation in ferromagnetic metals of polarized, theory of modulation effects in resonant nuclear, 23:14914
distribution in extensive air showers at 5200 m, (E), 25:24930
E2 transitions in nonaxial even-even, sum rules for reduced probabilities of, 21:1135
echo-resonance parameters for Z = 47 to 92, from radiative-capture measurements, (E/T), 25:31303 (INR-1271)
effective charge in light, 21:42698
effective interaction in sd shell, T = 0, 22:37380
effective interactions in A = 18, higher-order core polarization contributions to, 22:53253
effective interactions in finite, lectures on, 22:48628
effective interactions in mass-18, perturbation expansion for, (T), 24:49958
effective local interactions in, 21:35507
effects of deformed, on single-particle excitation of μ-mesic atoms, (T), 23:6879
effects of low-energy heavy cosmic-ray, on surfaces of meteorites, 22:833
elastic scattering at high energies, amplitudes for small-angle, (T), 24:42987
electric field gradient tensor in, effect of Karyagin distortion on, 22:3171 (ORNL-IIC-10(Vol.1), pp 59-84)
electric fields of superheavy, quantum electrodynamics of strong, 24:24426
electric quadrupole moments for even spherical, multiple excitation correction to Coulomb excitation measurements for, (T), 23:5871
electric quadrupole moments of deformed even—even, superfluid model calculations for rotational variations in, (T), 23:5960
electric quadrupole moments of first 2⁺ states of even-even, 22:1706 (ITF-67-14)
electric quadrupole moments of odd-mass spherical, generalized Bohr-model description with core excitation for, 25:28499
electric quadrupole moments of spherical even-even, (T), 21:30026 (JINR-E4-3286)
electric quadrupole moments of, quantum-mechanical corrections to measurements using multiple Coulomb excitation, 21:46821
electric quadrupole moments of, reorientation-effect measurements of, (E/T), 22:22649
electric quadrupole transitions in odd-mass spherical, 25:15165
electric transitions in spherical, 21:10110
electrodisintegration of light, analysis of, (T), 25:3714 (ITF-70-35)
electrodisintegration of, analysis using cluster model, (T), 23:52177
electrodisintegration of, analysis using multipole expansion, (T), 23:52174
electrodisintegration of, calculation relative to photodisintegration including exchange currents, (T), 25:7913
electrodisintegration of, determination of exchange currents by, (T), 24:43523
electrodisintegration through giant resonance and quasielastic regions, strong-coupling particle-hole analysis of, (T), 25:59869
electroexcitation of, compressible mode in, (T), 24:5442
electromagnetic and isoscalar transition rates in, comparison of, (T), 23:40117
electromagnetic interactions in, description using effective operators from realistic nucleon-nucleon potentials, (T), 22:32720
electromagnetic interactions in, effective operators for, (T), 23:7334
electromagnetic properties of, calculation using projected Hartree-Fock wave functions, 21:38419
electromagnetic radii of A = 3, effects of Coulomb repulsion on, (T), 22:5756
electromagnetic transition rates for, calculation using shell model with and without shell admixing, (T), 22:7782
electromagnetic transition rates in A < 41, tables on, 21:40409
electromagnetic transition rates in, correlation effects on, (T), 23:9024 (TID-24667, pp 346-55)
electromagnetic transitions in, calculations for effective charge using random phase approximation, (T), 23:17137
electromagnetic transitions in, dependence of effective charge on multipolarity of, (T), 23:17136
electromagnetic transitions in, determination of matrix elements for, 24:43557
electromagnetic transitions in, effects of parity violation on, (T), 22:30106
electromagnetic transitions in, review of higher-order, (T), 23:44981
electromagnetic transitions in, testing using perturbed gamma angular correlations, (T), 22:3761
electron and ion inelastic scattering in stellar matter by, electromagnetic de-excitation from, 21:41740
electron and nucleon scattering at high energy, (T), 21:46785 (BNL-11722)
electron and proton scattering by, excitation of collective levels by, (T), 21:29902
electron capture by polarized, internal bremsstrahlung angular distribution in, (T), 25:25802
electron capture by, in dense stars, (T), 25:8973
electron density near, evaluation of, (T), 25:56370
electron differential elastic scattering cross sections at 4 to 8 keV, Z—dependence of, (E), 21:34008
electron differential inelastic scattering cross sections for, effects of continuum structure on, (T), 22:27271
electron disintegration of exchange currents from, (T), 24:40714
electron elastic and inelastic scattering at 100 to 250 MeV, analysis for higher order effects in, (T), 24:13429
electron elastic and inelastic scattering at high energy by light, data analysis using cluster model, (T), 23:19192
electron elastic and inelastic scattering at high energies, radiative corrections for spectra from, 23:31089
electron elastic and inelastic scattering by light deformed, cross section in Born approximation for, (T), 23:30944
electron elastic and inelastic scattering by oriented, on the basis of the α-particle model, (T), 24:13435
electron elastic and inelastic scattering by, eigenchannel formalism for, (T), 22:35375
electron elastic and inelastic scattering by, review of theory for, 23:42977
electron elastic and inelastic scattering by, structure research using, (E/T), 22:18312
electron elastic and inelastic scattering by, study of short-range nuclear correlations by, (T), 24:52653
electron elastic scattering at 750 MeV, optical potential from dynamic analysis of, (T), 24:43473
electron elastic scattering at high energies, closure approximation method for estimating nonstatic correction to, (T), 25:25456
electron elastic scattering at high energies, correlation structure of light nuclei from, (T), 23:28337
electron elastic scattering at high energy, optical potential for, (T), 24:22193 (JINR-P4-4833)
electron elastic scattering by arbitrary charge density distribution, method for calculating cross section of, (T), 22:46818 (JINR-P4-3941)
electron elastic scattering by light, cluster-expansion for correlated charge form factor for, 25:7589
electron elastic scattering by light, effect of dynamical nucleon—nucleon correlations on, (T), 23:1789
electron elastic scattering by light, method with nucleon—nucleon correlations for calculation of, 22:46712 (LNF-68/27)
electron elastic scattering by p-shell form-factor calculations using finite well wave functions, (T), 24:38369
electron elastic scattering by vibrational, dispersive effects in, (T), 24:38375
electron elastic scattering by, conservation laws for Bethe—Salpeter equation for, 22:5877
electron elastic scattering by, dispersion corrections to, (T), 23:9011 (TID-24667, pp 167-80)
electron elastic scattering by, effect of generalized deformations on monopole, (T), 24:43524
electron elastic scattering by, effect of short-range correlations on form factors for, (T), 25:46111
electron elastic scattering by, effects of virtual transitions on, (T), 21:21575 (JINR-P4-3174)
electron elastic scattering by, method for analysis assuming arbitrary Fermi-like charge density, (T), 23:25946
electron elastic scattering by, nonstatic second-order corrections to, (T), 25:39109
electron elastic scattering by, quantum electrodynamics test from, 22:5636
electron elastic scattering by, quantum electrodynamics test from, 22:5636
electron elastic scattering by, radiative corrections for, 25:59880
electron elastic scattering by, second Born-approximation calculation of radiative tail in, (T), 25:34170
electron elastic scattering by, theory of, 25:31206 (SAL-17)
electron elastic scattering by, to test shell-model theory, (T), 22:16076
electron elastic scattering form factors for light, calculation using two oscillator model with recoil corrections and nucleon-nucleon correlations, (T), 24:18357 (LNF-69/19)
electron elastic scattering with virtual excitation, (T), 21:2792
electron energy levels in field of two fixed, WKB method for determining, 22:41288 (JINR-P4-3842)
electron excitation reactions with heavy, gamma spectra from, 25:15204
electron fall to center in Coulomb field of Z > 137, Dirac equation for, (T), 25:7599
electron inelastic scattering at 50 to 1000 MeV/c, radiative background in, (T), 23:9019 (TID-24667, pp 265-7)
electron inelastic scattering at high energies, review of experiments on, 22:22271 (CONF-670923-, pp 128-55)
electron inelastic scattering at high energies, study of nuclear collective states from, (T), 22:3803
electron inelastic scattering at high energy, radiative corrections to, (T), 23:9017 (TID-24667, pp 249-50)
electron inelastic scattering at low momentum transfer, monopole and quadrupole excitations in, (T), 22:42115
electron inelastic scattering below 30 MeV, energy-loss analyzer for studying, 22:49107
electron inelastic scattering by light, Coulomb-distortion effects in M2 electroexcitation by, (T), 25:12657
electron inelastic scattering by light, spin-parity assignments from, (E/T), 22:37299
electron inelastic scattering by light, sum rules for, 21:2016 (INP-485/PL)
electron inelastic scattering by light, transverse sum rules for, (T), 21:25593
electron inelastic scattering by light, transverse sum rules for, (T), 21:25594
electron inelastic scattering by light, with the expulsion of clusters, (T), 25:50836
electron inelastic scattering by Z = 3 to 26, comparison of Born and distorted-wave Born approximations for, (T), 22:20681
electron inelastic scattering by Z = 4 to 22, (E), 23:23625 (NP-17768)
electron inelastic scattering by, analysis of photon and particle decay in, 24:52681
electron inelastic scattering by, computer program for differential and total cross sections for, 22:16066
electron inelastic scattering by, computer program for, 21:30031 (YALE-2726-E-49)
electron inelastic scattering by, Coulomb corrections to, 21:31874
electron inelastic scattering by, Coulomb corrections to, (T), 23:9013 (TID-24667, pp 186-95)
electron inelastic scattering by, Coulomb corrections to, (T), 22:20578 (WASH-1079)
electron inelastic scattering by, electromagnetic vertex from, (T), 21:3635 (N-66-19870)
electron inelastic scattering by, elementary particle formalism for backward, 24:5280
electron inelastic scattering by, form-factor calculations using Helm model, (T), 22:3762
electron inelastic scattering by, independent particle model for prediction of spectra from, (T), 23:40153
electron inelastic scattering by, independent-particle formalism for, (T), 23:28245 (LAL-1208)
electron inelastic scattering by, meson (π) contribution to, (T), 23:23775
electron inelastic scattering by, model-independent analysis of monopole excitations in, (T), 24:15959
electron inelastic scattering by, partial-wave analysis of, (T), 23:9012 (TID-24667, pp 181-5)
electron inelastic scattering by, particle and photon decay following, (T), 23:42992
electron inelastic scattering by, polarization effects for fast, (T), 21:2800
electron inelastic scattering by, radiative corrections for, (T), 22:18345
electron inelastic scattering by, radiative corrections for, (T), 22:18345
electron inelastic scattering by, research on low-momentum transfer, 24:52678
electron inelastic scattering by, sum rules for, (T), 22:5868 (INP-566/PL)
electron inelastic scattering by, sum rules for, (T), 23:9010 (TID-24667, pp 155-66)
electron inelastic scattering cross sections for, calculation using Woods-Saxon potential with spin-orbit coupling, (T), 22:5888
electron inelastic scattering cross sections for, sum rule for, (T), 22:20734
electron inelastic scattering experiments on collective and particle states of, sensitivity of, (T), 23:9009 (TID-24667, pp 150-4)
electron inelastic scattering experiments on, approximation for data analysis in, (T), 23:9008 (TID-24667, pp 146-9)
electron inelastic scattering in giant dipole resonance region, form factors for, (T), 22:20733
electron inelastic scattering in giant resonance region by medium and heavy even, Coulomb distorted wave analysis of, (T), 23:1851
electron inelastic scattering in giant resonance region of spherical, partial-wave analysis of, (T), 22:27072
electron inelastic scattering in giant resonance region, shell model description of, (T), 23:28232(R) (SAL-12)
electron inelastic scattering on, gamma angular correlation with, 21:14946 (ISS-66/31)
electron inelastic scattering with excitation of low-lying levels, analytical method for analysis of, (T), 24:38373
electron inelastic scattering with giant resonance excitation in medium-weight and heavy spherical, partial-wave analysis of, (T), 22:18330
electron inelastic scattering with γ emission in heavy, study of low-lying excited states by, (T), 25:28491
electron inelastic scattering with π-meson production, cross-section calculations using Fermi gas model, (T), 24:1913
electron interactions with bremsstrahlung production, effect of nuclear size on, 24:35913
electron interactions with, energy of partial ionization, (T), 25:1009
electron magnetic scattering by light-weight, cross sections for high-energy, (T), 21:2801
electron orbital shielding of metallic, simple model of, 24:45346
electron pair production in fields of, angular distributions and polarization of, (T), 25:17427
electron production in the Galaxy by cosmic, (E/T), 23:34242
electron quasi-elastic scattering at high energy, (T), 21:2790
electron quasi-elastic scattering with nucleon emission, radiative corrections in, 25:43979
electron quasi-free scattering with nucleon emission, analysis for nuclear neutron and proton distributions by, (T), 25:20544
electron quasielastic scattering at high energy, calculations using independent-particle model with L—S coupling, (T), 22:50676
electron quasielastic scattering by finite-temperature, analytic description using Fermi gas model, (T), 24:38363
electron quasielastic scattering by, (T), 21:23535 (ISS-66/44)
electron quasifree scattering with proton emission, effect of final-state interactions in, (T), 24:38356
electron reaction in two-layer absorber, transition effect for electron—photon shower from, 24:5269
electron reactions (e,e'2p) with, study of proton-proton correlations by, (T), 25:28491
electron reactions (e,e'd) with light, use for nuclear structure research, (T), 23:19396
electron reactions (e,e'n) and (e,e'p) at high energies, (T), 23:28336

electron reactions (e,e'n) at 600 MeV/c, neutron detection in, 22:21313 (ISS-67/18)
electron reactions (e,e'N) at high energy, calculations using independent-particle model with L—S coupling, (T), 22:50676
electron reactions (e,e'n), (e,e'p), and (e,e'α) with, counting rates for coincidence experiments on, (T), 23:9033 (TID-24667, pp 478-9)
electron reactions (e,e'n), (e,e'p), and (e,e'np) with, data analysis for, (E/T), 23:9029 (TID-24667, pp 427-42)
electron reactions (e,e'p) and (e,e'n), feasibility of studying difference between proton and neutron distributions, (T), 24:52644 (ISS-69/34)
electron reactions (e,e'p) at 300 to 600 MeV, calculations using Monte Carlo method, (T), 21:21573 (ISS-66/37)
electron reactions (e,e'p) at 300 to 600 MeV, Monte Carlo calculations for parameters of, (T), 22:7739 (ISS-67/9)
electron reactions (e,e'p) at high energies, analysis using impulse approximation, (T), 23:47079
electron reactions (e,e'p) at high energy, (T), 21:12111
electron reactions (e,e'p) with light, low-accidentals coincidence system for measuring, 25:42131
electron reactions (e,e'p) with light, structure research using, (T), 23:10985
electron reactions (e,e'p) with, annular scintillation detector system for studying, 22:6561 (ISS-67/17)
electron reactions (e,e'p) with, calculation of Coulomb distortion effects in, (T), 22:24914
electron reactions (e,e'p) with, calculations using independent-particle and Jastrow models for momentum distributions and quasi-elastic peaks from, (T), 25:39089
electron reactions (e,e'p) with, design of beta spectrometers for studying, 23:7777 (TID-24667, pp 35-8)
electron reactions (e,e'p) with, DWBA calculations of coincidence cross sections for, (T), 25:46132
electron reactions (e,e'p) with, shell-structure research by quasi-free scattering, (T), 21:31715
electron reactions (e,e'x) with, interpretation of, (E/T), 23:9032 (TID-24667, pp 474-7)
electron reactions (e,π) with, nuclear structure research by, (T), 23:9037 (TID-24667, pp 497-502)
electron reactions at 1 GeV in lead—air and lead—copper two-layer systems, transition effect for electron—photon shower from, 24:5269
electron reactions at 1.25 to 4 GeV in propane bubble chamber, cross sections for electron pair production in, (E), 23:27738
electron reactions at 1.25 to 4 GeV with, cross sections for electron—positron pair formation in, (E), 23:13017(T) (SLAC-Trans-88)
electron reactions at 10.0 and 16.0 GeV in emulsions, total and differential cross sections for meson production in, (E), 24:12922
electron reactions at 13.75 GeV in emulsions, direct production of electron pairs from, (E), 25:14525
electron reactions at 13.75 GeV in emulsions, trident production in, (E), 23:39610(R) (UCR-34-P-107-84)
electron reactions at 6 GeV in crystals, coherent bremsstrahlung from, (E/T), 23:30694 (DESY-69/14)
electron reactions at high energies, angular dependence of cross sections for wide-angle bremsstrahlung and upper limits for coupling constant for heavy electron production in, (E), 25:14529
electron reactions at high energies, differential cross sections for electron pair production in, 21:18946
electron reactions at high energies, impact factor and amplitudes for, 23:42619
electron reactions at high energies, polarization in multiphoton bremsstrahlung in, (T), 25:1450
electron reactions at high energies, soft-photon approximation for radiative corrections to cross sections of double bremsstrahlung in, (T), 25:33620
electron reactions at high energy, surface effects in, (T), 24:3983
electron reactions at low and intermediate energies, conference on, 24:26365
electron reactions at low energies, cross section for W production in Coulomb field in, (T), 22:34926
electron reactions below 150 MeV, photonuclear data index, Jan. 1965 to Jan. 1970 for, (E), 25:22961 (NBS-SPEC. PUBL-322)
electron reactions in white dwarf stars, neutrino pair production in, (T), 22:39331
electron reactions up to 2 GeV, installation for analysis of, 22:44567
electron reactions with Coulomb field of, additive potential method for solution of wave equation for displacement from, 23:36472(T) (CERN-Trans-68-11)
electron reactions with Coulomb fields of high-Z, ω, phi, and rho production from, (T), 21:2409
electron reactions with heavy, Monte Carlo calculations for, 21:3631 (AERE-R-5172)
electron reactions with heavy, rho + N → rho + N amplitudes and rho photoproduction from Drell—Trefil theory extension for coherent rho° production in, (T), 25:5336
electron reactions with light, scattering solutions of Dirac equations for, (T), 22:9979
electron reactions with nuclear field at arbitrary energies and small angles, differential cross sections for many-photon polarized bremsstrahlung from, (T), 24:24302
electron reactions with nucleon knockout at high energies with, cross-section dependence on Woods—Saxon potential parameters, (T), 25:10058 (ITF-70-38)
electron reactions with, invariant imbedding for solution of quantum mechanical problems for, 21:40180
electron reactions with, neutrino bremsstrahlung from, 25:33604
electron reactions with, rho-dominance predictions for energy and A dependence of total cross sections for, 23:42626
electron reactions with, virtual photon cross sections for two-body disintegration, (T), 25:23095
electron reactions with, wave function for periodic, formed with bound 1 = 0 state of hydrogen atoms, 23:27732
electron reactions, cross sections of τ + anti τ pair production in, (T), 25:3335
electron scattering above 10 MeV, partial-wave amplitude for, 21:31866
electron scattering at 0.2 to 2.0 MeV, Coulomb corrections to Bethe—Heitler cross sections for bremsstrahlung production by, (T), 25:28451 (N-71-10999)
electron scattering at 180 degrees by, equipment for measuring, 22:16945
electron scattering at 50 to 180 keV, polarized bremsstrahlung from, 22:9081
electron scattering at high energies, dynamic symmetry for, 22:44471
electron scattering at high energies, second-order corrections to DWBA calculations for, (T), 22:50689
electron scattering at high energy, (T), 22:9920 (JINR-P4-3568)
electron scattering at high energy, dispersion effects on, (T), 22:20698
electron scattering at high energy, dynamical nucleon—nucleon correlations in, (T), 23:37304
electron scattering at high energy, second Born corrections to cross section for bremsstrahlung production in, (T), 22:50669
electron scattering at low momentum transfer, model-independent evaluation of inelastic, (T), 22:32691
electron scattering at very high energies by light, 22:3309 (INP-555/PL/PH, pp 113-15)
electron scattering by, 22:39956 (ISS-67/30)
electron scattering by 2s1d-shell, form-factor calculations using projected Hartree—Fock wave functions, (T), 22:9968
electron scattering by corrections for effects of intermediate states in, (T), 22:27237
electron scattering by Coulomb field at high energies, distortion effects for radiation from, (T), 25:25368
electron scattering by deformed, phenomenological theory for, 24:24635
electron scattering by light deformed oriented, (T), 24:52427
electron scattering by light, M3 form factors for, (T), 22:26912
electron scattering by light, testing cluster model by, (T), 21:4226
electron scattering by light, testing nuclear cluster model by high-energy, (T), 21:7693 (AD-631176)
electron scattering by medium-weight and heavy spherical, with giant dipole resonance excitation, (T), 21:34062
electron scattering by p-shell, analysis using Nilsson orbitals with admixtures from higher major shells, (T), 23:13309 (LAL-1206)
electron scattering by p-shell, correlated charge form factors for, (T), 24:1871
electron scattering by p-shell, form factor calculations using extended Nilsson model for elastic and low-lying inelastic, (T), 23:42978
electron scattering by partially aligned nonspherical odd-A, at high energy, (T), 21:21606
electron scattering by unscreened, program for evaluating Mott scattering cross sections and Goudsmit—Saunderson angular multiple scattering distribution for, 24:28818 (BNL-50199)
electron scattering by Z = 6 to 92, coefficients for adjustment of complex scattering factors for fast, (T), 25:10055
electron scattering by, analysis for isotensor components in dipole sum rules for, (T), 25:56868
electron scattering by, angular correlations between momentum transfer and emitted nuclear fragments in, (T), 23:45006
electron scattering by, asymmetry in, (T), 22:39720
electron scattering by, data analysis method for, 24:40659 (AD-702392)
electron scattering by, description using first moment of charge distribution, (T), 23:32965
electron scattering by, design of beta spectrometers for studying, 23:7777 (TID-24667, pp 35-8)
electron scattering by, design of magnet system for elastic and inelastic 180-degree, 22:16959
electron scattering by, Dirac formalism for amplitudes and cross sections for, 22:48268
electron scattering by, effect of short-range correlations in, (T), 25:56824 (LYCEN-7104, C4.1-17)
electron scattering by, effects of energy loss on longitudinal depolarization from, 22:34287
electron scattering by, effects of nuclear structure on bremsstrahlung produced in polarized and unpolarized, (T), 25:56862
electron scattering by, effects of short-range correlations on nucleon emission in, (T), 25:50834
electron scattering by, eigenchannel theory for, 24:20443
electron scattering by, matrix elements for relativistic electrons in Coulomb fields, 24:42505
electron scattering by, nuclear structure analysis by, 22:3574
electron scattering by, nuclear structure research with, 24:52676
electron scattering by, nucleon emission from, (E), 22:3638
electron scattering by, Orsay electron linac experimental facility for studying, 23:52089
electron scattering by, radial matrix elements for, (T), 25:15195
electron scattering by, radiative corrections to, (T), 23:9015 (TID-24667, pp 219-30)
electron scattering by, radiative tail near elastic peak in, (T), 23:9018 (TID-24667, pp 251-64)
electron scattering by, review of methods and results in, (E/T), 25:38888 (LNF-70/57)
electron scattering by, review of nuclear structure from experiments on, 22:22272 (CONF-670923-, pp 156-95)
electron scattering by, sum rules for, (E), 23:19347
electron scattering by, survey of research on, 24:52677
electron scattering by, use in nuclear structure research, (E/T), 23:9007 (TID-24667, pp 93-112)
electron scattering experiments on, radiative corrections for, (T), 23:9016 (TID-24667, pp 231-48)
electron scattering from magnetic moments of, calculations using Born approximation for polarized, (T), 22:3775
electron scattering from, review of radiative corrections to, (T), 25:5800 (AD-706717)
electron scattering on embedded, neutrino-pair bremsstrahlung from hot degenerate gas of, 23:32692
electron scattering using polarized beams, triple scattering experiment on polarization vector change in large-angle, (E/T), 22:42139
electron scattering with bremsstrahlung production, 25:7806(R) (BMBW-FBK-70-14)
electron scattering with bremsstrahlung production, polarization effect of nuclear magnetic moment in, 25:5820
electron scattering with nucleon emission, 22:9964
electron small-angle multiple scattering above 250 MeV, effect of finite nuclear size on, (T), 25:20545
electron spallation at high energies, proton spectra from, (T), 24:18464
electron-capture decay energy of, measurement using inner bremsstrahlung spectra, 23:15510
electron-capture decay of Z = 14 to 98, relativistic corrections to exchange and overlap effects in, (T), 25:28495
electron-capture decay of, analysis using self-consistent potential for K- and L-, (T), 23:42972
electron-capture decay of, calculations of L/K and M/L ratios for, (T), 23:13308 (KFK-830)
electron-capture decay of, formulas for internal bremsstrahlung probability following K-shell, (T), 22:32678
electron-capture decay of, K-electron emission in K-, (T), 21:30052
electron-capture decay of, measurement of K/L ratios for, (E), 21:19232
electron-capture decay of, review of internal bremsstrahlung process in, (E/T), 23:19326 (INR-P-950)
electrons reactions with, scale-invariant light-cone SU(3) x SU(3) current commutators for universal structure functions for particle production in, (T), 25:5328
elementary particle elastic scattering by, computer program for phase-shift analysis of, 21:44735 (INP-532/PL)
elementary particle elastic scattering in resonance energy region, modified model of complex momenta for differential cross sections and polarization angular dependence of scattered particles and amplitudes of spin-0 and -$^1/_2$, (T), 25:23102
elementary particle inelastic scattering by, generalized potential for, 21:30028 (NASA-TN-D-4000)
elementary particle reactions with emulsion, at high energies, cross sections for, 21:27307
elementary particle reactions with, production of high-energy particles from, 25:27978
elementary particle reactions with, use of ionization calorimeters for recording of, 21:28257
elementary particle scattering at 1 GeV, analysis of elastic and inelastic, 25:18020
elementary particle scattering in presence of short range correlations, Glauber theory for, 25:22850
elementary-particle diffraction scattering at high energies by light, 23:1652
elementary-particle interactions in complex, Monte Carlo program for investigating, 21:21146 (IA-975)
emission of heavy, from Sun, (E), 22:21805
emission of heavy, in proton reactions with nuclei at 20 and 24 GeV/c in emulsions, double, (E), 25:1399
emission of Z = 1 to 4, in spontaneous fission of californium-252, (E), 21:19274
energies of n-particle, rigorous lower bounds on, 24:3773
energies of, as function of A, (T), 25:7915
energy calculations using BCS approximation, errors in, (T), 21:7844
energy dependence of fragmentation parameters and mean free paths of cosmic-ray, of Z greater than or equal to 10, (E), 21:37186 (CONF-670628-5)
energy dissipation in the Galaxy and Metagalaxy of cosmic, (T), 21:634
energy distributions from uranium-236 ternary fission of Z = 1 to 16, calculations using modified Geilikman model, (T), 23:7329 (INR-932)
energy distributions in uranium-236 ternary fission of Z = 1 to 16, calculations using modified Geilikman model, (T), 23:7311
energy eigenvalues of A = 4, bounds on, (T), 21:10097
energy for deformed or rotational even-even, β parameter for, (T), 21:23314 (BNL-994, pp 70-102)
energy gap and pairing force in finite, (T), 24:15962
energy gap for deformed, calculations using Migdal theory of finite Fermi systems with pair correlations, (T), 22:48606
energy gap in finite, Hartree—Fock, (T), 24:13420
energy level cascades in, diagrammatic calculation of, 23:8463
energy level classification for, boson operator calculus for representation theory of Sp(4) and SO(5) symmetry for shell-model, 23:51970
energy level decay of aligned, computer analysis of gamma—gamma angular correlations in, 22:5817(R) (NYO-GEN-72-28)
energy level deformations in even-even N = Z, (E/T), 24:24673
energy level densities in, perturbation methods for calculating, (T), 22:27377

energy level densities in, research using energy dependence of average cross sections for direct, 22: 20762
energy level densities in, shell effects in, (T), 22:39640 (UCRL-17989, pp 127-57)
energy level densities of A = 198 to 210, shell effects on, (T), 21:29969(R) (UCRL-17299)
energy level densities of neutron deficient, (T), 22:42091
energy level densities of, calculations using spin-dependent shell model, (T), 24:11051
energy level densities of, combinatorial calculation of, 24:38345
energy level densities of, determination using reaction excitation functions for isolated levels, (E), 22: 39635(R) (NYO-3938-1)
energy level densities of, effects of degenerate single-particle states on, (T), 22:44771
energy level densities of, energy dependence of, (E/T), 22:27217
energy level density distributions in, testing random-matrix model for, (T), 22:27378
energy level density in continuum region, (T), 21:42685
energy level density in near-magic, (T), 24:38341
energy level density in, (T), 22:5876
energy level density of light A less than or equal to 70, (T), 22:18171
energy level density parameters from analysis of neutron and proton resonances, (T), 22:27274
energy level density parameters from analysis of neutron and proton resonances, (T), 22:11986
energy level distribution in deexcited, 24:44056 (BNL-50205, pp 78-92)
energy level excitation by inelastic scattering, cross sections for, (T), 21:10094
energy level lifetimes in, systems for measurement of short, 25:51544(R) (NYO-4177-103)
energy level occupation probability in 2s-1d shell, projected Hartree-Fock calculation for ground-state, (T), 25:5876
energy level of doubly closed-shell, shell-model analysis with configuration mixing of mysterious second zero, (T), 25:53816
energy level parameters of, application of modified variational treatment to isobaric analog and Gamow—Teller, (T), 24:52734
energy level radiation widths at excitation energies of the order of neutron binding energy, mean, (T), 25: 56836(T) (UCRL-Trans-10542)
energy level shifts in heavy, from distortion of nuclear equipotential surfaces, (T), 24:40647
energy level structure of deformed odd-mass, from thermal neutron capture, (E), 24:47602
energy level transitions following beta decay of, method for determining L-shell vacancies for x-ray intensity ratios from, 21:30045
energy level transitions in odd-A spherical, probabilities of l-forbidden M1, (T), 22:39708
energy level transitions in odd-A, effects of deformation on E2, (T), 23:44982
energy level transitions in rotational odd-A, probability ratios for electromagnetic, (E/T), 21:1096
energy level transitions in, evaluation of E0 electron pair, (T), 23:47054
energy level transitions in, matrix elements for, 21:7826
energy level transitions in, pair spectrometer for measuring multipolarities for, 25:55040 (NP-18994)
energy level transitions of, calculation of internal conversion coefficients with nuclear field screening for, 21:25573
energy level transitions of, use of magnetic pair spectrometers for determining multipolarities of, 21: 16099 (BNL-10863)
energy levels and gaps of A = 200 to 600, calculations using Woods—Saxon potential, (T), 25:43955 (INR-1270)
energy levels and magnetic moments of A equals 6 to 14 p-shell, shell-model calculations using central and spin-orbit interactions, (T), 23:1806
energy levels and properties in 2s-1d shell, review of, (T) , 23:46960
energy levels and transitions in deformed, quasiparticle—phonon interactions in, (T), 24:43496
energy levels and transitions in, E2 matrix elements from beta vibrational states, 24:43346
energy levels at 5 to 9 MeV, method for production of variable-energy beams of gamma radiation for resonance fluorescence analysis of, 22:18199
energy levels for A = 14, (E/T), 25:36676
energy levels for A = 14, 18, 38, 42, 206, and 208, using realistic single-particle wavefunctions, (T), 24: 15951
energy levels for A = 14, Hartree—Fock calculations of, (T), 22:16062
energy levels for A = 14, Hartree—Fock calculations of, 22:16062
energy levels for A = 18 to 23, description using projected Hartree—Fock wave functions with effective interaction derived from Yale potential, (T), 23:3953
energy levels for A less than or equal to 40, isobaric analog, (E), 21:1045
energy levels for deformed even, phenomenological descriptions of rotational, 24:30936
energy levels for light deformed, review on model descriptions for, (T), 24:20432
energy levels for N = 29 and Z = 29, intermediate-coupling model for calculation of, 25:18010
energy levels for odd-N A = 153 through 171, calculation using superfluid model and Woods-Saxon potential, (T), 25:28346 (JINR-E4-5567)
energy levels from (α,n) reactions with intermediate and heavy nuclei, nuclear temperatures and densities of, (E) , 25:53809
energy levels from (α,n) reactions, lifetime measurements using Doppler shift attenuation, 23:19254(R) (ORO-3624-7)
energy levels from (d,p) reactions, spin—parity assignments for, (E), 25:25783
energy levels from (He-3,t) reactions with quasielastic scattering, isobaric analog, (T), 22:9962
energy levels from (n,γ) reactions, accidental combinations in, 21:15608 (BNL-10996)
energy levels from (n,γ) reactions, accuracy of, 21: 15607 (BNL-10995)
energy levels from (p,2p) reactions on deformed 1d-2s shell nuclei, (T), 21:2666
energy levels from argon-40-induced reactions, collective, (E), 22:5860
energy levels from charged-particle and (n,γ) reactions, 21:15606 (BNL-10992)
energy levels from Coulomb excitation, lifetime measurement using Doppler shift, (E), 21:1023
energy levels from deformed Hartree-Fock calculations, 21:23573
energy levels from deuteron stripping, single-particle strengths for, (T), 22:9963
energy levels from electron inelastic scattering, collective multipole, (T), 21:10091
energy levels from gamma resonance scattering, level widths for, (E), 25:12490
energy levels from gamma resonance scattering, properties of partial radiative widths in, 24:43593
energy levels from gamma resonance scattering, resonance parameters for, (E), 25:56782
energy levels from independent-particle model using Morse-type potential well, (T), 25:10085
energy levels from meson reactions with, review of experiments confirming existence of isobaric analog, (E/T), 25:5580
energy levels from neutron capture by 60 < A < 247, empirical dependence for total radiation width from, 24:40613 (JINR-P3-4929)
energy levels from neutron capture by Z = 16 to 57, spin assignments for, (E), 25:59780 (KFK-1401)
energy levels from neutron resonances in Z = 42 to 80, spin assignments for compound-state, (E), 25:59780 (KFK-1401)
energy levels from nuclear reactions, computer program for, (T), 25:48116 (ORO-2972-196)
energy levels from nuclei (n,γ) reactions, computer calculations of, (T), 24:47607
energy levels from pickup reactions, calculation of energy-weighted averages of spectroscopic factors for, (T), 25:59855
energy levels from pickup reactions, isospin mixing in, (T), 22:18321
energy levels from proton elastic scattering, polarization experiments on isobaric analog, (E), 22:27369
energy levels from proton elastic scattering, resonance parameters for, (T), 22:27368
energy levels from resonance neutron capture, spin—parity assignments using average γ spectra, (E), 23: 17103(R) (ANL-7481)
energy levels from single-nucleon transfer reactions on closed-shell, calculations using particle—vibration-coupling model, (T), 25:43976
energy levels in 1f/sub 7/2/ even—even, calculations using asymmetric rotor—vibrator model for, (T), 22: 48603
energy levels in 2s-1d shell, (T), 23:46930
energy levels in 2s-1d shell, calculation for oxygen-16 4p-4h analogs, 24:43259
energy levels in A = 40 region, shell model analysis of single-particle splitting in ground-state, (T), 23:47036 (ANL-7535, pp 149-50)
energy levels in bands with simple cluster structure, highly excited, (T), 23:19392
energy levels in collective, isobaric analog, (T), 25:25830
energy levels in continuum region, description using shell model, 21:40501
energy levels in Davydov model, computer program for calculating, (T), 25:31425
energy levels in deformed even, Bohr—Mottelson hydrodynamic calculations of K = 1, 2, 3 octupole vibrational, (T), 22:20705
energy levels in deformed even—even, two-phonon, (T), 24:1896
energy levels in deformed, single-particle, 21:12076 (JINR-P4-2976)
energy levels in ds-shell, spectral distribution study of SU(4) symmetry in low-lying, 25:39083
energy levels in even-even, theoretical analysis of rotational bands in, 24:8936
energy levels in excited, calculations of density of, 24: 44056 (BNL-50205, pp 78-92)
energy levels in f(7/2)-shell, effects of nucleon pairing interaction on single-particle, 21:29932
energy levels in f(7/2) region, isobaric analog, (E/T), 22:9939
energy levels in fp-shell, description using effective n-p interaction, (T), 24:20426 (JAERI-1184, pp 113-14)
energy levels in giant dipole resonance region of deformed even—even rare-earth, calculations using finite Fermi system theory, (T), 23:7282 (UJV-2081-F)
energy levels in giant dipole resonance region of heavy, collective, (T), 22:27225
energy levels in giant resonance region from electron inelastic scattering, (T), 22:27072
energy levels in giant resonance region of light, calculations using collective correlation model with surface delta interaction, (T), 23:23795
energy levels in giant resonance region, collective, (T), 21:46816
energy levels in giant resonance region, independent-particle description of, (T), 23:9064
energy levels in giant resonance region, lectures on, (T), 22:53221 (NRL-6729)
energy levels in ground-state rotational bands of deformed even-even, calculations using self-consistent Hartree—Fock—Bogoliubov formalism, 21:35525
energy levels in ground-state rotational bands of deformed even, description using two-parameter formula from experimental level systematics and nuclear hydrodynamics, (T), 22:48619
energy levels in γ band of even—even, variation of inertial parameter of, (T), 23:25949
energy levels in γ vibrational bands of deformed, (T), 22:48582 (JAERI-1158, pp 115-17)
energy levels in heavy even—even, lifetimes of 2+ and 4+ rotational, (E), 25:28353 (NP-18695)
energy levels in heavy, neutron hole—proton type collective 1⁻ excitations in, 21:25547
energy levels in heavy, wave functions and excitation cross sections for analog, (T), 21:31889
energy levels in j = 3/2 shell, group-theoretical analysis of, 24:3959
energy levels in light-weight, overlap integrals for excitation of two-hole, (T), 21:44773
energy levels in light-weight, SU, description of, (T), 21: 44740 (ZFK-122, pp 20-7)
energy levels in medium and heavy, review on isobaric-analog, (E/T), 21:42682 (RLO-1388-35)
energy levels in mirror, perturbation and energy shift of resonance, (T), 21:23547
energy levels in nuclear reactions, effective single-particle, (T), 21:7846
energy levels in odd-mass deformed, calculation of, (T), 21:5578
energy levels in quasi-β and -γ bands of even-even, (T), 22:27331
energy levels in rotational bands, description using collective variable method, 21:27622 (JINR-P4-3204)
energy levels in rotational bands, mean square radii of, (E/T), 22:50600 (MIT-2098-479)
energy levels in rotational bands, SU(3) assignments for, (T), 23:19394
energy levels in shell model, central and tensor force matrix elements for, 23:4078
energy levels in single-j shell of, exact eigenvalues of isopairing Hamiltonian for, 21:38390
energy levels in spherical even, random phase approximation for collective excitation in first 2⁺, 21: 30049
energy levels in spherical, Coulomb excitation via giant dipole resonance of, 21:25585
energy levels in spherical, from mixing of quasiparticle states, collective vibrational, 21:23568
energy levels in unresolved resonance region, statistical construction of, (T), 25:46046
energy levels in, classification of particle—hole, 21: 25586
energy levels in, correlations between partial radiative widths in neutron resonance, (T), 25:46019 (JINR-P4-5825)
energy levels in, Fermi system with equal spacings between, 21:30033(T) (AD-648883)
energy levels in, isospin effects on excitation of single-particle and single-hole, 24:40696
energy levels in, mechanism for rotational spectrum in phonon model for, 25:53827
energy levels in, review of isobaric analogy, (E/T), 25: 36676
energy levels in, self-consistent theory of collective vibrations in, 21:15621
energy levels in, shells in simple anisotropic harmonic-oscillator picture of, (T), 25:5857
energy levels in, tabulations of spin—parity assignments for, (E), 25:5792
energy levels in, theory of collective vibrational, 21: 23568
energy levels in, time-to-pulse height converter for measuring μs to s lifetimes of, 24:29601
energy levels in, use of Doppler shift attenuation method for determining lifetime of, (E), 23:49337
energy levels in, wave functions for single-particle, 21: 25572
energy levels near neutron binding energy, research using resonance scattering of neutron capture γ rays, (E), 22:48477 (JAERI-1158, pp 17-20)
energy levels near neutron separation energy in μ-mesic atoms, dipole, (T), 23:5965
energy levels near one-quasiparticle levels in odd deformed, 21:34044
energy levels of 16 less than or equal to A less than or equal to 36 d-s shell, 2s/sub 1/2/ admixture in, (E), 21:21444
energy levels of 18 < A < 38, calculations using intermediate-coupling theory, 21:25580
energy levels of 1f 2p-shell, calculations using harmonic-oscillator shell model with central residual interaction, (T), 23:1859
energy levels of 1f-2p shell, survey of research on, 23: 46963
energy levels of 1p-shell, effects of Feingold three-body vector operator on, (T), 22:30108
energy levels of 1p-shell, effects of Feingold three-body vector operator on, (T), 22:30108
energy levels of 1p-shell, research using (d,p) reactions, (E), 22:9782
energy levels of 1p-shell, shell-model analysis using effective interactions, (T), 25:53604 (COO-1120-113)
energy levels of 1p-shell, spectroscopic factors from (p,d) reactions, (E), 22:20484
energy levels of 2s/sub 1/2/1d/sub 3/2/-shell, calculations using shell model with jj-coupling approximation, (T), 22:27241
energy levels of 2s—1d shell, effect of truncation on projected Hartree—Fock calculations for, (T), 23: 25843
energy levels of 2s—1d-shell, polynomial basis in group-theory calculation of, (T), 25:36711
energy levels of 2s-1d shell, based on four particle—four hole state in oxygen-16, (E), 25:17989
energy levels of 2s-1d shell, space scalar approximation to particle—hole interaction in, (T), 22:53223
energy levels of 2s1d-shell, calculations using Hartree-Fock method with phenomenological residual interaction, 21:29900
energy levels of 2s1d-shell, classification using group representation, (T), 22:27298

energy levels of 2s1d-shell, description using projection of Hartree—Fock deformed state wave functions, (T), 22:37304
energy levels of 2s1d-shell, proton hole, (T), 22:20699
energy levels of 2s1d-shell, T = $^3/_2$ isobaric analog, (E), 21:31710 (RHEL/R-136, pp 52-88)
energy levels of 39 < A < 49, shell-model calculations of, (T), 22:7770
energy levels of A = 10, T = 2 multiplet, (E/T), 23: 1792 (COO-1265-57)
energy levels of A = 10, transition rates of analog, (E), 21:9936
energy levels of A = 11 to 12, compilation of, 22:35230
energy levels of A = 12, calculations using nonlocal factorizable potential, (T), 23:3943
energy levels of A = 120 to 170, nuclear magnetic and electric moments of low-energy 2$^+$, 24:43413
energy levels of A = 13 to 20, unified-shell-model calculation of energies and wave functions for, (T), 25: 38895
energy levels of A = 13, 14, and 15, nonnormal-parity, 25:15158
energy levels of A = 13, 21, and 37, T = 3/2 quartet, (E), 22:53129
energy levels of A = 13, 21, and 37, T = 3/2 quartet, (E), 21:46670 (UCRL-17783)
energy levels of A = 14, deformed T = 0 and 1, (T), 22:7661(R) (NYO-3525-26)
energy levels of A = 15 and 17, calculations using shell model with Saxon-Woods potential, (T), 22:39714
energy levels of A = 15 and 17, core polarization effects on, (T), 21:34032 (PUC-937-262)
energy levels of A = 15, effects of configuration mixing on T = 3/2, (T), 21:29910
energy levels of A = 15, positive-parity, (T), 21:23412 (JINR-P4-3178)
energy levels of A = 150 to 174 deformed, effects of spin-quadrupole force on collective 2$^+$, (E/T), 22: 39664
energy levels of A = 153 to 187 odd, $I^2(I + 1)^2$ corrections to rotational, (T), 23:19290
energy levels of A = 16 and 90, analog, (T), 21: 12025(R) (NYO-3525-12)
energy levels of A = 16, calculations using shell model, (T), 21:2650
energy levels of A = 16, T = 1, 21:5489 (JINR-P4-2936)
energy levels of A < 165, computer program for calculating intrinsic, (T), 25:28439 (AECL-3801)
energy levels of A = 174 to 188, superfluid model calculations for quadrupole and octupole one-phonon, (T), 23:4051 (JINR-P4-4073)
energy levels of A = 176-to-190 deformed, calculation of collective, (T), 21:42692
energy levels of A = 18, calculations using Hartree—Fock method using Hamada—Johnston and nonlocal factorizable potentials, (T), 22:1608
energy levels of A = 18, calculations using shell model with SU(3) classification for 1p-1h, (T), 22:48467
energy levels of A = 18, shell-model calculation using G-matrix elements of Hamada—Johnston potential, 25:34177
energy levels of A = 182 to 192, lifetimes and spin—parity assignments for, (E), 25:12512 (CERN-70-29)
energy levels of A = 19 to 21, calculations using α-cluster model, (T), 22:26972
energy levels of A = 2 or 3, strong coupling approximation with Yukawa potential for, (T), 23: 15145 (ITF-68-80)
energy levels of A = 2 to 4, experimental research on, (E), 21:7687 (ORO-1316-12)
energy levels of A = 20 through 60, cluster, 24:1793
energy levels of A = 20 to 28, calculations using 1d/sub/5/2/-2s/sub 1/2/ shell model, (T), 22:32521
energy levels of A = 207 to 209, calculations using static Saxon-Woods well and spin-orbit potential, (T), 21:7478(R) (COO-1371-36)
energy levels of A = 21 to 27, K/sup π/ = 1/2$^-$, (330) rotational band in, (E/T), 25:50680
energy levels of A = 25 and 29, isobaric analog, (E), 22:18163
energy levels of A = 25, calculation using shell model with SU(3) basis, (T), 24:13403
energy levels of A = 28 to 40, (E/T), 21:5504
energy levels of A = 3, (T), 21:7688(R) (USC-136-114)
energy levels of A = 3, study by method of reciprocal interaction parameter expansion of, (T), 25:28163 (ITF-70-100-P)
energy levels of A = 3, use of harmonic oscillator function with pair correlation function and soft-core nucleon—nucleon potential in calculation of ground state, 22:46729(R) (AECL-3157)
energy levels of A = 30 through 33, shell-model calculations of spectroscopic factors for, (T, 23:1831
energy levels of A = 33 to 41, 1f(7/2) and 2p(3/2), (T), 22:1631
energy levels of A = 35 to 65, systematics of 2s single-particle, (T), 25:53667
energy levels of A = 4 and 5, calculations using translation-invariant shell model, (T), 23:13195
energy levels of A = 4, calculation using Brueckner—Gammel—Thaler potential, (T), 22:26817
energy levels of A = 4, calculations using harmonic oscillator potential, (T), 21:5485
energy levels of A = 4, calculations using K-harmonics method, (T), 22:1595
energy levels of A = 4, compilation of data on, (E), 22: 18115
energy levels of A = 4, rotational and vibrational, (T), 22:39690 (ITF-68-14)
energy levels of A = 4, single-particle, (T), 21:2610
energy levels of A = 4, survey of spectroscopic studies of, 23:25790
energy levels of A = 43, even-parity, (T), 21:7478(R) (COO-1371-36)
energy levels of A = 48 to 56, calculation using mixed-configuration shell model, (T), 25:34190
energy levels of A = 4n self-conjugate, 0$^+$, (T), 21:5565
energy levels of A = 5 to 40, review on high-isospin, 23:11063
energy levels of A = 5, search for T = 3/2 isobaric analog, (E), 22:13930
energy levels of A = 58 to 116, low-lying O$^+$, (T), 21: 10050
energy levels of A = 59, 60, and 61, data sheets for, 22:29958
energy levels of A = 6 and 14, calculations using particle—hole model with residual interaction for odd-parity, (T), 23:28254
energy levels of A = 6 to 45, calculations using shell model with Hamada-Johnston potential, (T), 21:12083 (PUC-937-233)
energy levels of A = 6, description using method of deformed orbits, (T), 22:24828
energy levels of A = 6, with cluster structure, (T), 21: 33889
energy levels of A = 65 through 69, nuclear data sheets for, 23:8964
energy levels of A = 7, 8, 10, and 13, lifetimes of isobaric analog, (E), 22:26870
energy levels of A = 88, calculations using shell model, (T), 21:46831
energy levels of A = 9, 12, and 13, isobaric analog, (E), 22:37292 (UCRL-18263)
energy levels of A = 91 to 117, spin—parity assignments for, (E), 25:10031 (ORNL-4627)
energy levels of A equals 18 to 32, electric quadrupole moments for ground and first-excited, 25:20337
energy levels of A near 88 and 208, single-particle core—excitation coupling in, (T), 23:19309
energy levels of arbitrary, K harmonics method for calculating properties of low-lying, 24:30928
energy levels of asymmetric even, from rotations and β and γ vibrations, (T), 22:39682 (CNEA-207)
energy levels of beta-unstable, conference on properties and structure of, (E/T), 25:28308 (CERN-70-30(Vol.2))
energy levels of closed-neutron-shell, isobaric analog, 22: 7690 (JINR-E2-3551)
energy levels of closed-neutron-shell, isobaric analog, (T), 22:7690 (JINR-E2-3551)
energy levels of closed-shell, compact-cluster expansion for, 24:43472
energy levels of closed-shell, deformed excited, (T), 22: 14102
energy levels of closed-shell, deformed, (T), 21:17311
energy levels of closed-shell, translationally invariant description of particle-hole, (T), 22:44796
energy levels of closed-shell, unified theory including shell-model conditions and particle correlations, (T), 25:50852
energy levels of compound, average total width of, (T), 23:17146
energy levels of d-s shell, exact calculations for collective, (T), 21:4366
energy levels of deformed, 22:1746
energy levels of deformed 150 < A < 190, (E), 21: 17356 (ZfK-Pha-23)
energy levels of deformed A = 150 to 186, from deuteron inelastic scattering, collective, (E), 22:27149
energy levels of deformed and spherical, description using Tamm—Dancoff method for collective nonrotational, (T), 21:44802
energy levels of deformed axially symmetric, effects of spin-orbit interaction on, (T), 21:34026 (JINR-P4-3325)
energy levels of deformed doubly even, rotational, (T), 25:18003
energy levels of deformed even, blocking effects in K = 2 and β vibrational, (T), 23:1903
energy levels of deformed even—even A = 150 to 194, low spin, (T), 24:24641
energy levels of deformed even—even, calculations for multipole vibrational, 24:24642
energy levels of deformed even—even, description using rotator model with corrections for centrifugal stretching, (T), 23:13346
energy levels of deformed even—even, dipole, (T), 22: 53176
energy levels of deformed even-A, band mixing of rotational and K = 0$^+$, (T), 22:20741
energy levels of deformed even-A, testing Davydov-Filippov and Bohr-Mottelson models for K = 2, (T), 22:42059
energy levels of deformed even-even A = 152 to 190, calculation of low-lying octupole, (T), 24:38366
energy levels of deformed even-even, (T), 23:11057
energy levels of deformed even-even, admixture of two-phonon, (T), 21:40467 (JINR-P4-3432)
energy levels of deformed even-even, alpha-decay excitation of vibrational, (T), 21:40495
energy levels of deformed even-even, effect of phonon-quasiparticle interaction on one-phonon, (T), 21:46822
energy levels of deformed even-even, electric quadrupole moments of first 2$^+$, (T), 22:22605
energy levels of deformed even-even, in rotational bands, 21:29964 (NP-16668)
energy levels of deformed even-even, octupole vibrational, (T), 22:48478 (JAERI-1158, pp 68-70)
energy levels of deformed even-even, properties of 1$^+$, (T), 25:3727
energy levels of deformed even-even, rotational coupling of, (T), 21:38339
energy levels of deformed even-even, rotational, (T), 22: 3712
energy levels of deformed even-even, rotational, (T), 22: 3712
energy levels of deformed even-even, rotational, (T), 22: 3707
energy levels of deformed light, (T), 21:7841
energy levels of deformed nonaxial, calculation of one-particle, 22:1708 (JINR-E4-3453)
energy levels of deformed nonaxial, calculation of one-particle, (T), 22:1708 (JINR-E4-3453)
energy levels of deformed odd, theory of, 24:8865
energy levels of deformed odd—odd, β-strength functions for 0$^+$ and 1$^+$ unlike particle-hole, (T), 25: 59872
energy levels of deformed odd-A (150 to 190), configuration assignments and energy systematics of nonrotational, 25:48130
energy levels of deformed odd-A with A = 155 to 181, nonrotational, (T), 21:13856 (JINR-E4-3051)
energy levels of deformed odd-A, from thermal neutron capture, (E), 22:3698 (KFK-616)
energy levels of deformed odd-A, in actinide region, (T), 21:21558
energy levels of deformed odd-A, magnetic dipole transition probabilities for ground-state rotational-band, (T), 25:12656
energy levels of deformed odd-A, with A = 150 to 190, (E/T), 22:1692
energy levels of deformed odd-A, with A = 153 to 187, collective, (T), 22:20649
energy levels of deformed odd-even, 1f/sub 7/8/, electromagnetic moments and transition rates for, (T), 21:13826
energy levels of deformed odd-mass, with 153 less than or equal to A less than or equal to 187, (T), 21:7790
energy levels of deformed rare-earth, calculations using potential with diffuse edge, 21:40424 (JINR-P4-3451)
energy levels of deformed rare-earth, description using spin-quadrupole interactions, (T), 21:17346 (JINR-E4-3134)
energy levels of deformed rare-earth, wave functions for single-particle, (T), 22:9852 (JINR-P4-3607)
energy levels of deformed, (T), 22:1746
energy levels of deformed, accuracy of calculation of one-particle, 22:30050
energy levels of deformed, accuracy of calculation of one-particle, 22:30050
energy levels of deformed, calculations using Hartree-Fock approximation, (T), 21:9946
energy levels of deformed, collective O$^+$, (T), 22:27329
energy levels of deformed, collective, (T), 21:2774
energy levels of deformed, collective, (T), 21:9997 (JINR-E4-3025)
energy levels of deformed, concepts and properties of single-particle, (T), 25:7892
energy levels of deformed, coupling mechanisms between, (T), 25:12525 (LYCEN-7034, pp 94-116)
energy levels of deformed, cranking-model solution of rotational, (T), 22:1731
energy levels of deformed, description using adiabatic and Hartree-Fock approximations for vibrational, (T), 22:9966
energy levels of deformed, effects of Coriolis coupling on Nilsson, (T), 25:28317 (CERN-70-30(Vol.2), pp 829-45)
energy levels of deformed, effects of magnetic dipole interactions on K = $^1/_2$, (T), 23:1931 (JINR-P4-4069)
energy levels of deformed, effects of spin—quadrupole interactions on collective 0$^+$, (T), 22:9932
energy levels of deformed, even-odd staggering in vibrational band, (T), 24:49965
energy levels of deformed, extended cranking-model calculation of moment of inertia for rotational, (T), 25: 12654
energy levels of deformed, identification of β-vibrational, (T), 23:40145
energy levels of deformed, K = O$^+$, (T), 22:48580 (JAERI-1158, pp 106-12)
energy levels of deformed, lifetime measurements using recoil method for rotational, 21:38333
energy levels of deformed, magnetic moments of two-quasiparticle, (E/T), 21:44799
energy levels of deformed, method for calculating single-particle, 21:40465 (JINR-P4-3326)
energy levels of deformed, moments of inertia of rotational, (T), 21:42683(R) (UCB-34-P-141-8)
energy levels of deformed, non-adiabatic effects of rotation from isomer shifts in 2$^+$ rotational, 24:28696
energy levels of deformed, rotational, (T), 25:34160 (LYCEN-6804, pp 125-52)
energy levels of deformed, shell corrections to, (T), 23: 7360
energy levels of deformed, spin-vibrational 1$^+$, (T), 24: 43503
energy levels of deformed, structure and transition probabilities of 0, (T), 22:9851 (JINR-P4-3576)
energy levels of deformed, validity of quadrupole force in calculation of, (T), 25:5809
energy levels of doubly even, centrifugal stretching model and variable moment of inertia model for, 25: 15203
energy levels of ds-shell, in R_3 x R_3 group classification, (T), 21:38423
energy levels of even deformed, with A greater than or equal to 222, properties of octupole, 25:15205
energy levels of even Z = 56 to 62, static quadrupole moments of, (E), 25:5688 (UCRL-19961)
energy levels of even, calculations using projected wave functions for axial symmetric deformation in 2$^+$, (T), 23:21378 (ZfK-130, pp 179-81)
energy levels of even, collective quadrupole, (T), 23: 40129
energy levels of even, with quadrupolar deformation, rotation contribution to spectra from collective, (T), 24:30720 (CNEA-240)
energy levels of even—even 2s-1d shell, Hartree—Fock calculations with Woods—Saxon potential for, (T), 23: 34807 (N-69-17976)
energy levels of even—even A = 150 to 174, calculations using Woods—Saxon and Nilsson potentials for quadrupole one-phonon, (T), 23:37212
energy levels of even—even A = 150 to 176 nuclei, calculation using Woods—Saxon potential for octupole, 24:30808
energy levels of even—even A = 152 to 190, calculations including Coriolis decoupling and centrifugal stretching for rotational, (T), 23:5904

energy levels of even—even A = 174 through 188 nuclei, calculations using Saxon—Woods and Nilsson potentials for quadrupole and octupole, (T), 23:49401
energy levels of even—even A = 4 to 40, calculations using Hartree—Fock method, 24:24620
energy levels of even—even A = 90 to 150 and 186 to 206 spherical, quasi-particle description of 2^+ and 3^-, (T), 22:37379
energy levels of even—even deformed, collective 1^+, (T), 25:56819 (JINR-P4-5889)
energy levels of even—even rare-earth, admixtures of one- and two-phonon states in, (T), 22:46816 (JINR-P4-3898)
energy levels of even—even rare-earth, non-adiabaticity of β-vibrational, (T), 22:13992 (IIAE-LR-18)
energy levels of even—even spherical, analysis of quadrupole moments of first-excited, (T), 23:47043 (NP-17996)
energy levels of even—even spherical, collective, (T), 22:44799
energy levels of even—even spherical, determination of quadrupole moments of first excited, (T), 25:39111
energy levels of even—even spherical, effects of quadrupole—octupole anharmonicity on vibrational motion in, (T), 22:44749 (IFA-FT-69)
energy levels of even—even spherical, phonon model description of, (T), 23:44994
energy levels of even—even vibrational, quasiparticle theories for seniority 0, 2, and 4, (T), 23:21393
energy levels of even—even with I/sup π/ = 1^-, (T), 22:18316
energy levels of even—even Z = 6 to 82, table of quasi-beta, quasi-gamma, and quasi-ground, (E), 25:36783
energy levels of even—even, alpha-cluster calculation of ground-state energies for, (T), 25:31427
energy levels of even—even, calculation of transition probabilities and static moments for, (T), 25:5816
energy levels of even—even, classical analog of variable-moment-of-inertia formulas for rotational, (T), 25:10084
energy levels of even—even, Fermi system formalism for collective vibrational, (T), 23:25948
energy levels of even—even, isospin impurities in ground-state, (T), 25:28516
energy levels of even—even, magnetic moments of rotational, (T), 23:40105
energy levels of even—even, Mariscotti description of ground-state, (T), 25:56813 (COO-1746-57)
energy levels of even—even, matrix elements of R(5) group representation for description of, (T), 22:53233
energy levels of even—even, nonaxial rotator model calculations for, (T), 24:40669 (ITF-70-13)
energy levels of even—even, review of theory for collective, (T), 23:1945
energy levels of even—even, semiempirical three-parameter equation for, (T), 23:11059
energy levels of even—even, table of quasi-ground, quasi-β, and quasi-γ bands for, (E), 25:56651 (INSJ-127)
energy levels of even—even, tabulation of quasi-ground, quasi-β, and quasi-γ bands, 24:6827 (INSJ-111)
energy levels of even—even, transition quadrupole moments in variable-moment-of-inertia model for, (T), 25:28517
energy levels of even—even, two-parameter models for description of rotational, 22:35387
energy levels of even—even, with I/sup π/ = 1^-, (T), 22:18316
energy levels of even-A sd-shell, calculations using coupled-vibration model, (T), 23:21323
energy levels of even-A single-closed-shell, quasiparticle-model calculations for 1^+, (T), 22:37398
energy levels of even-A, applicability of collective model to, (T), 23:47075
energy levels of even-A, applicability of collective models for description of, (T), 23:49442 (IAE-1635)
energy levels of even-A, collective, (T), 22:27323
energy levels of even-A, systematics of collective model parameters for, (T), 23:4062
energy levels of even-A, systematics of collective, (T), 22:39638 (UCRL-17989, pp 1-41)
energy levels of even-even 2s1d-shell, (T), 21:5506
energy levels of even-even 2s1d-shell, calculations using Yukawa potential with Serber mixing, (T), 21:17316
energy levels of even-even A = 150 to 174, calculations using superfluid model with Nilsson and Woods—Saxon potentials for quadrupole one-phonon, (T), 23:4049 (JINR-E4-4075)
energy levels of even-even A = 150 to 176, octupole, 24:43502
energy levels of even-even A = 56 to 238, positive-parity, (T), 21:25502
energy levels of even-even closed shell, vibrational, (T), 25:34160 (LYCEN-6804, pp 125-52)
energy levels of even-even N = 80, (E), 22:27175
energy levels of even-even N = Z sd-shell, calculations using deformed Hartree—Fock method with configuration mixing, (T), 22:32522
energy levels of even-even N = Z, moments of inertia, quadrupole polarizations, and 2 particle—2 hole excitations in deformed, (E/T), 24:24673
energy levels of even-even rare-earth, anharmonic effects in, (T), 23:1894
energy levels of even-even rare-earth, systematics of collective, (T), 22:48517 (JAERI-1158, pp 39-46)
energy levels of even-even spherical, anharmonic effects in quadrupole vibrational, (T), 22:48520 (JAERI-1158, pp 90-5)
energy levels of even-even spherical, calculations using shell model with tensor forces, (T), 22:7716
energy levels of even-even spherical, description using BCS theory, (T), 22:22579 (IPNO/TH-114)
energy levels of even-even spherical, low-lying, (T), 21:13865
energy levels of even-even spherical, magnetic moments of collective, (E), 22:13994 (JINR-P4-3611)
energy levels of even-even spherical, with neutron-proton pairing interaction, collective, (T), 21:5571
energy levels of even-even transuranic, in vibrational bands, calculations using surface Δ interaction, 21:33991
energy levels of even-even, BCS and two-quasiparticle approximations for low-lying, (T), 22:42094 (ANL-7439)
energy levels of even-even, classification of collective, (T), 22:3694 (INSJ-105)
energy levels of even-even, classification of collective, (T), 22:1648 (ITF-67-9)
energy levels of even-even, description of vibrational, (T), 22:48576 (JAERI-1158, pp 71-83)
energy levels of even-even, description using shell model with residual two-body interaction, (T), 21:15638
energy levels of even-even, electric quadrupole moments of first 2^+, (T), 22:1706 (ITF-67-14)
energy levels of even-even, from alpha decay of nonspherical nuclei, vibrational, (T), 21:46786 (IAE-1266)
energy levels of even-even, gyromagnetic ratios of vibrational, (T), 21:15614 (CONF-660221-, pp 177-80)
energy levels of even-even, isobaric analog, (T), 21:34067
energy levels of even-even, low-lying, (T), 21:12018 (INSJ-101)
energy levels of even-even, phenomenological analysis of rotational, (T), 24:30937
energy levels of even-even, projection model for vibrational, 24:35876
energy levels of even-even, purity of collective, (T), 22:24901
energy levels of even-even, shape-fluctuation model of ground-state bands of, (T), 25:28481
energy levels of even-even, systematics of, 22:27332
energy levels of even-even, systematics of, (T), 22:27332
energy levels of even-Z N = 53 to 61, low-lying, (T), 21:38377(R) (PUC-937-260)
energy levels of $f(^7/_2)$-shell A = 45 to 58, Coulomb displacement energies for analog, (E), 21:25480
energy levels of finite, calculations using deformed Hartree—Fock wave functions, 21:23573
energy levels of finite, calculations using projected Hartree—Fock—Bogolyubov wave functions, (T), 22:37392
energy levels of fissile, calculation for single-particle, 24:52731
energy levels of four-particle systems, rotational and vibrational, (T), 23:11046(T) (BNL-tr-233)
energy levels of fp-shell, isobaric spin splitting in, (E), 22:26985
energy levels of ground-state band in even—even, nuclear-softness model for, 25:50842
energy levels of heavy and superheavy, calculations using Woods-Saxon potential for single-particle, (T), 25:43936
energy levels of heavy deformed axially symmetric, effects of spin-orbit interaction on, (T), 21:34026 (JINR-P4-3325)
energy levels of heavy deformed, calculations using surface delta interaction, (T), 23:8990
energy levels of heavy deformed, calculations using oscillator and Nilsson models with shell effects, (T), 23:37312
energy levels of heavy even—even, calculations using variable moment-of-inertia model for ground-state bands in, 23:31075
energy levels of heavy even—even, description using finite Fermi formalism for vibrational, (T), 22:35316
energy levels of heavy even-even, survey on, (E/T), 21:10070
energy levels of heavy odd—odd, ground state doublet, (T), 25:36528
energy levels of heavy spherical, bootstrap theory of vibrational, (T), 25:15174
energy levels of heavy spherical, sharp seniority wave functions and BCS approximation for, (T), 23:7331
energy levels of heavy, collective potential-energy surfaces for calculating, (T), 23:5952
energy levels of heavy, collective, (T), 22:9921 (JUL-Conf-1)
energy levels of heavy, from alpha transitions, vibrational, (T), 21:17358
energy levels of heavy, interacting quasi-particle description of isobaric analog, 21:38410
energy levels of heavy, isobaric analog, (T), 21:10087
energy levels of heavy, isospin implications for collective dipole, (T), 23:13322
energy levels of heavy, nearest-neighbor spacing distribution for ensembles of random matrices with nonrandom bias for calculating, (T), 22:46851
energy levels of heavy, properties of core-particle, (T), 25:36753
energy levels of heavy, proton widths of isobaric analog, (T), 22:39702
energy levels of heavy, self-consistent microscopic theory of collective Hamiltonian for, (T), 22:53255
energy levels of heavy, shape isomeric, (T), 24:20463
energy levels of heavy, strong channel coupling interpretation of isobaric analog, (T), 23:7295
energy levels of highly deformed, calculations using Nilsson model, (T), 23:19324 (CEA-R-3645)
energy levels of interacting nucleons in p-shell, effects of pairing correlations on, (T), 25:12409
energy levels of intermediate and heavy, deviations from statistical description of spacing of neutron, (T), 23:47041 (ITEF-654)
energy levels of intermediate, bootstrap theory of vibrational, (T), 25:39078
energy levels of isomeric spherical even—even, properties of collective and two-particle, 22:35404
energy levels of light closed-shell, in modified Tamm—Dancoff approximation, 4p-4h, (T), 22:7669
energy levels of light deformed, Hartree-Fock calculations for, (T), 23:21273 (ZFK-130, pp 189)
energy levels of light even—even, alpha-cluster structure of, (T), 23:31062
energy levels of light mirror, (T), 21:1127
energy levels of light mirror, displacement of corresponding, (T), 22:7763
energy levels of light mirror, displacement of corresponding, 22:7763
energy levels of light, asymmetry of T = 0 giant resonance, (T), 24:43181
energy levels of light, calculations using projection method, 21:25461
energy levels of light, classification using subgroup chain, (T), 23:28342
energy levels of light, deformed, (T), 23:37307
energy levels of light, effect of ground-state correlations in calculations using four-body correlations, (T), 25:12660
energy levels of light, effects of ground-state correlations on, (T), 25:28505
energy levels of light, exchange mechanisms for cluster and single-particle, (T), 24:8935
energy levels of light, from electron inelastic scattering, 22:53095 (BMwF-FBK-68-11)
energy levels of light, from Hartree—Fock calculations, 21:44806
energy levels of light, from Slater determinants using angular momentum projection, (T), 22:27267
energy levels of light, inverted coexistence of spherical and deformed, (T), 23:13217
energy levels of light, parity mixing for single-particle, (T), 21:27652
energy levels of light, predictions of supermultiplet model of high-isospin isobaric analog, (T), 25:31203 (LYCEN-7088)
energy levels of light, proton-hole, (T), 22:26864
energy levels of light, research methods using γ spectroscopy, 22:41978 (BNL-12621)
energy levels of light, research using (π^+,π^0) reactions, (T), 23:19147
energy levels of light, research using single recharging of mesons (π^+), (T), 23:7218
energy levels of light-weight, from photodisintegration cross sections, (E/T), 21:44563 (ZFK-122, pp 111-18)
energy levels of $lp_3/_2$-shell, calculations using pairing and isopairing forces, (T), 21:44549
energy levels of matrix elements of R(5) group representation for description of vibrational, (T), 22:53234
energy levels of medium-weight and heavy even-even, phenomenological description of high-spin, (T), 22:30018
energy levels of medium-weight and heavy even-even, in ground-state bands, (T), 21:31833 (INSJ-104)
energy levels of medium-weight and heavy, conference on low-lying, 22:48512 (JAERI-1158)
energy levels of medium-weight and heavy, dissertation summary of research using electron and γ spectroscopy, (E), 22:39654
energy levels of medium-weight and heavy, dissertation summary of research using electron spectroscopy, (E), 22:39655
energy levels of medium-weight, bound isobaric analog, (T), 21:4326 (PUC-937-222)
energy levels of medium-weight, photon resonance scattering experiments using Coulomb fragmentation of molecules, (E), 23:15431(R) (NYO-3525-36)
energy levels of N = 28, hindrance of M1 transitions of configuration-mixed, (T), 25:34032
energy levels of N = 28, role of isospin in shell-model calculation for, (T), 25:7826
energy levels of N = 50 even-A, calculations using RPA with 1p—1h core excitations for vibrational, (T), 23:31024
energy levels of N = 50, calculation for six-quasiparticle 0^+, (T), 24:43296
energy levels of N = 50, effects of core polarization on vibrational, (T), 22:53135
energy levels of N = 82, shell-model calculations of, (T), 23:34809
energy levels of N = 88, description using centrifugal stretching model, (T), 23:28306
energy levels of N not equal to Z, effects of proton—neutron correlations on ground-state and isobaric-analog, (T), 25:48121
energy levels of near magic, properties of low-lying 2^+, (T), 24:30890
energy levels of neighboring, single-hole and single-particle, (T), 21:38377(R) (PUC-937-260)
energy levels of neutron-excess, calculations using stretch scheme for rotational, (T), 22:27308
energy levels of neutron-excess, isobaric splitting of 1^- dipole, (T), 23:11055
energy levels of nonaxial odd, rotational—one-particle, (T), 25:7885 (ITF-70-47)
energy levels of nonaxial odd-A, sum rules for, (T), 23:44991
energy levels of nonaxial, Davydov-model calculations of 9/2, (T), 25:56785
energy levels of nonaxial, rotational, (T), 21:5568
energy levels of nonmagic, method for calculation of giant dipole resonance, (T), 25:10069
energy levels of nonspherical A = 150 to 190, single-particle model for, 25:48131
energy levels of odd A = 153 to 187, survey of data on non-rotational, 24:24645
energy levels of odd deformed A = 153 to 183, near one-quasiparticle levels, (T), 21:34044
energy levels of odd deformed, (T), 21:5578
energy levels of odd—even, in μ-mesic atoms, (T), 23:15495
energy levels of odd—odd deformed, Random Phase Approximation calculation of Gamov—Teller transitions in beta decay of 1^+, (T), 25:36817 (JINR-P4-5744)
energy levels of odd—odd, use of (d,α) reactions to determine, (E/T), 22:32551
energy levels of odd-A deformed, deformation influence on E2 transition probabilities of, (T), 24:16003

energy levels of odd-A spherical, description with quasiparticle coupling to quadrupole moment of 2+ phonon, (T), 22:18240
energy levels of odd-A spherical, with coupling of independent-particle mode to even vibrating core, (T), 21:42721
energy levels of odd-A Z = 40 to 60, calculations using surface delta interaction with pair effects, (T), 23: 37200
energy levels of odd-A, analysis using Tamm—Dancoff method, (T), 23:42973
energy levels of odd-A, asymmetric-core collective model for hole and negative-parity, 24:30933
energy levels of odd-A, description as one- and three-quasiparticle states using Tamm—Dancoff approximation, (T), 21:46706
energy levels of odd-mass deformed, rotational, 24: 28824 (JINR-P4-4966)
energy levels of odd-odd 2s1d-shell, calculations using SU(3) representation with exchange forces, 21:31865
energy levels of odd-odd spherical, (E/T), 22:1693
energy levels of odd-odd, (T), 21:34067
energy levels of odd-odd, deformation effects on, (T), 21:31796
energy levels of odd-odd, seniority mixing in, (T), 24: 26679
energy levels of odd-odd, with high angular momentum, (T), 22:20697
energy levels of odd-odd, with large angular momentum, (T), 22:14020
energy levels of one-dimensional N-body systems with inverse and inverse-square pair potentials, exact ground-state, (T), 25:59840 (NP-19027)
energy levels of p- and sd-shell, classification using S/sub n/ subgroups, (T), 23:28343
energy levels of pf-shell, RPA calculation of core renormalization for, (T), 25:25829
energy levels of quasirotational, spectral studies on higher-phonon, 25:15153
energy levels of rare-earth A = 150 to 190, E1 transition probabilities for single-particle, (T), 22: 44710
energy levels of rare-earth, calculations using surface delta interaction for vibrational, (T), 21:13933
energy levels of rare-earth, hexadecapole deformation effects on one-quasiparticle, (T), 23:19251 (JINR-P4-4259)
energy levels of rare-earth, hexadecapole deformation effects on one-quasiparticle, (T), 23:44886(T) (KFK-tr-294)
energy levels of rotational, polarization by atomic electrons for isomer shift between lowest 0+ and 2+, (T), 21:23314 (BNL-994, pp 70-102)
energy levels of sd-shell, description using shell model with configuration mixing, (T), 22:27301
energy levels of sd-shell, from proton inelastic scattering, (E), 22:27016
energy levels of sd-shell, from spin-flip proton inelastic scattering, (E), 22:27014
energy levels of sd-shell, low-lying, (E), 22:26992
energy levels of sd-shell, orbital rearrangement in, (T), 23:30937
energy levels of sd-shell, particle-hole, (T), 21:38244
energy levels of sd-shell, properties of analog, (E), 23: 15400
energy levels of sd-shell, research using photonuclear reactions, (E), 22:18162
energy levels of sd-shell, shell-model calculations for, (T), 24:20418 (JAERI-1184, pp 30-5)
energy levels of self-conjugate closed-shell, calculation using schematic model with separable potential, 25: 20506
energy levels of single-closed shell, configuration mixing in low lying, (T), 24:30924
energy levels of single-closed-shell spherical, calculations using quasi-boson method, 21:42683(R) (UCB-34-P-141-8)
energy levels of slightly deformed odd, calculation of quadrupole, (T), 22:16041
energy levels of spherical and spheroidal, 0+, (T), 21: 42683(R) (UCB-34-P-141-8)
energy levels of spherical calculation of low-lying, (E), 24:43462 (IAE-1855)
energy levels of spherical even, random phase approximation for collective excitation in 2-phonon, 21:30050
energy levels of spherical even—even, calculations using Davydov—Chaban model, (T), 23:47058
energy levels of spherical even—even, theory of vibrational, (T), 23:5953
energy levels of spherical even-even, effect of Pauli principle on collective vibrational, (T), 22:3736
energy levels of spherical even-even, effect of Pauli principle on collective vibrational, (T), 22:3736
energy levels of spherical odd, structure of anomalous coupling states as new collective modes, (T), 24:43505
energy levels of spherical odd-mass, quasi-particle random phase approximation for collective, (T), 25: 46125
energy levels of spherical, anharmonic effects of quadrupole forces on two-phonon, (T), 22:35320
energy levels of spherical, calculation for low-lying, one-phonon, 0+, (T), 24:38378
energy levels of spherical, calculations using Migdal theory for first 2+ and 3-, 24:38367
energy levels of spherical, calculations using Woods—Saxon potential for single-particle, (T), 23:28333
energy levels of spherical, description of quasi-rotational, (T), 21:44719
energy levels of spherical, lectures on collective, (T), 22: 3796
energy levels of spherical, momenta and transition probabilities for low-lying, 21:17410
energy levels of spherical, particle-hole amplitudes for, (T), 22:48617
energy levels of spherical, quadrupole moments of first 2+, (T), 21:30062
energy levels of spherical, quadrupole moments of first 2+, (T), 21:30061
energy levels of spherical, quadrupole-octupole interaction formalism for two-phonon, (T), 22:35319
energy levels of spherical, quasiparticle description of low-lying, 24:33167
energy levels of spherical, semi-microscopic theory of two-phonon quadrupole—octupole vibrational, (T), 25: 15157
energy levels of spherical, single-particle, (T), 23:23749 (IAE-1593)
energy levels of spherical, statistical estimation of monopole vibrational, (T), 24:22226
energy levels of spherical, with anharmonic vibrations, (T), 22:27320
energy levels of spherically symmetric, parity and residual-interaction effects on collective, (T), 21:23542 (NP-16596)
energy levels of superconducting, effect of particle-number projection on determination of ground-state, (T), 25:17999
energy levels of three-nucleon, Faddeev equations with local potentials for, 22:37162 (UCSD-10-P-10-36)
energy levels of transitional and vibrational, low-lying opposite-parity, (E/T), 24:43509
energy levels of weakly deformed, collective excitations of, 21:31884
energy levels of Z = 17 to 20, data tables for, 22:29977
energy levels of Z = 36 to 63 even—even, lifetimes of, (E), 25:5687 (UCRL-19949)
energy levels of Z = 47 to 67, data compilation on, 23: 9005
energy levels of Z > 50 and N < 82, effects of β and γ deformations on, (T), 23:4050 (JINR-P4-4054)
energy levels of Z > 50 N < 82, deformation parameters for, 23:19298
energy levels of Z > 80, shell corrections to, (T), 23: 37190 (JINR-P4-4383)
energy levels of, algebraic calculation of, 22:13870
energy levels of, analysis using four-particle model for parity mixing in, (T), 23:1946
energy levels of, apparatus for nanosecond-lifetime measurements at U-300 heavy-ion cyclotron, 25:42187 (JINR-P13-5801)
energy levels of, baryon resonances in ground state, (T), 24:52698
energy levels of, boson expansion techniques for calculating vibrational, (T), 23:4073
energy levels of, boson method and antisymmetrization of, (T), 25:12697
energy levels of, boson representation of pair correlations and collective 0+, (T), 25:36825
energy levels of, branching rules for simple Lie group embedding into simple Lie group for, 21:27393
energy levels of, calculation of coefficients of nonadiabaticity for rotational, (T), 22:16074
energy levels of, calculations using finite deformed potential for single-particle, (T), 23:19372
energy levels of, calculations using pair and quadrupole—quadrupole residual interacrions for rotational, (T), 23: 37344
energy levels of, calculations using schematic-model Hamiltonian with continuous spectrum for particle-hole, 21:30059
energy levels of, calculations using shell model with two-particle Green functions, (T), 21:10108
energy levels of, calculations using shell model without repulsive core effects, (T), 21:7757
energy levels of, calculations using Woods—Saxon potential with Thomas spin—orbit term for neutron single-particle, (T), 23:13339
energy levels of, characteristics of radiative transitions from highly-excited, 24:24657
energy levels of, classification using group theory, (T), 22:9947
energy levels of, coherence radiation in external electric and magnetic fields, (E/T), 23:20718
energy levels of, coincidence system for measuring picosecond lifetimes of, 25:29365
energy levels of, collective model calculation of quadrupole transition probabilities of, (T), 25:15177
energy levels of, collective, (T), 21:30053
energy levels of, collective, (T), 25:36839
energy levels of, complex angular momentum states of, 21:2397
energy levels of, computer method for deducing from measured transition energies, 21:32543
energy levels of, computer program using Ritz combination principle for discovery of excited, (T), 25: 12519 (KFK-1247)
energy levels of, configuration mixing in shell-model calculations for, (T), 23:4059
energy levels of, conversion electron—gamma coincidence system for subnanosecond measurements of lifetimes of, 25:18691
energy levels of, coordinate transformations useful for describing collective, (T), 24:43504
energy levels of, correlations between reduced neutron and partial radiative widths for resonance, (T), 25: 36850
energy levels of, Coulomb displacement energies of isobaric analog, (E), 23:21329
energy levels of, Coulomb displacement energies of isobaric analog, (T), 22:20678
energy levels of, Coulomb displacement energies of isobaric analog, (T), 23:9061
energy levels of, coupling between quadrupole and octupole vibrational, (T), 22:46814 (IFA-FT-68)
energy levels of, data summaries for experimental studies of, 22:50522 (ORNL-4317-1)
energy levels of, decomposition of Kronecker square of irreducible representations for selection rules for, 22: 20287
energy levels of, delayed coincidence electron—electron spectrometer for lifetime measurements of, 25:4363
energy levels of, delayed-coincidence and recoil-distance techniques for measuring lifetimes of, (E), 25:59771
energy levels of, description of isobaric analog, (T), 21: 42690
energy levels of, description of rotational, by collective variable method, (T), 22:7756
energy levels of, description using generalized Hartree—Fock equations for single-particle, (T), 23:13341
energy levels of, description using random phase approximation and second-order perturbation theory in two-vibrational-mode model, (T), 23:1952
energy levels of, description using surface cluster bands at high excitation energies, (T), 23:47073
energy levels of, determination of excitation energies for rotational, (T), 25:12695
energy levels of, determination of isospin impurities using β decay experiments, (E/T), 22:27082
energy levels of, determination of spectroscopic factors using continuum wave functions for neutron scattering, (T), 22:27272
energy levels of, determination using conversion-electron and gamma spectra, 21:38376 (NP-16890)
energy levels of, displacement of dipole isodoublet, (T), 25:59853
energy levels of, effect of Coulomb distortions on isospins of ground-state, (T), 25:28476
energy levels of, effect of discrete one-particle spectrum on statistical functions of, (T), 23:13325
energy levels of, effect of electronic structure of macromolecules on, (T), 24:22225
energy levels of, effect of multipole pairing and particle—hole fields in particle—vibration coupling in, (T), 25: 43974
energy levels of, effects of collective kinetic energy in phenomenological model for, (T), 25:34188
energy levels of, effects of ground-state shape-fluctuation correlations on, (T), 23:7340
energy levels of, effects of residual interactions on Coulomb energy shifts in analog, (T), 24:38348
energy levels of, effects of short-range correlations and charge-dependent nuclear forces on analog, (T), 25: 3753
energy levels of, electronic compensation for energy dependence in measurements of lifetimes of, 25:50724
energy levels of, energy widths of quasistationary, (T), 25:10081
energy levels of, equilibrium deformations of ground and excited, (T), 22:53220 (INR-P-920)
energy levels of, equipment and methods for coincidence measurements of lifetimes of excited, 22:27240
energy levels of, equipment using resonance fluorescence process for measuring lifetimes of, 25:51253
energy levels of, exact pseudo-nuclear model for calculation of mixed-parity configurations, (T), 23: 4068
energy levels of, excitation of isobaric analog, by quasi-elastic charge-exchange reactions, (T), 22:7757
energy levels of, fine structure in analog, (E/T), 24: 40700
energy levels of, formalism for description of collective, 21:31855
energy levels of, from direct reactions, 21:30054
energy levels of, g-factor measurements using ion implantation in ferromagnetic materials, (E/T), 22: 46839
energy levels of, g-factor measurements using sum-coincidence technique for short-lived, (E/T), 22:9848 (INP-569/PL)
energy levels of, generalized Hartree-Fock approximation for rotational, (T), 21:23508
energy levels of, group-theoretical decomposition of Kus effective interactions in sd-shell, (T), 23:40115
energy levels of, γ-γ coincidence circuit for lifetime measurements of, 25:18642 (JINR-P13-5485)
energy levels of, Hamiltonian matrix element distribution for GAMMA/sub n/ and GAMMA/sub γ/ widths of, 24:15980
energy levels of, high-energy electron scattering studies for mixture parameters of rotational, (T), 23:25856
energy levels of, higher-order effects in Coulomb excitation of, (T), 22:16101
energy levels of, in region of transition from deformation to sphericity, (E/T), 21:46715 (BNL-11796)
energy levels of, increasing complication with excitation energy of, (T), 25:12630 (JINR-E4-5469)
energy levels of, intermediate-state method for calculation of seniority-zero excited states of pairing Hamiltonian, (T), 23:1944
energy levels of, internal conversion coefficients, 21: 9293 (MIT-952-3, pp 334-48)
energy levels of, intraband B(E2) ratios for rotational, (T), 25:34185
energy levels of, isobaric analog, (E/T), 22:9927
energy levels of, isomer shift and moment measurements using γ resonance scattering, (T), 22:35384
energy levels of, isospin effects in excitation of dipole, 25:50803 (CONF-690732, pp 11.1-8)
energy levels of, isospin impurities in, (E/T), 23:19351
energy levels of, isospin purity of low-lying, (T), 24: 40695
energy levels of, K = 1/2 rotational, (T), 22:20664
energy levels of, lifetime measurement using gamma Doppler shift, 21:2652(R) (ANL-7198)
energy levels of, lifetime measurements for short-lived, (E), 22:26929(R) (COO-1420-139)
energy levels of, lifetime measurements from analysis of Doppler-broadened gamma line shapes, (E), 24:20338 (COO-1120-90)
energy levels of, lifetime measurements using Doppler-shift method, 23:21395
energy levels of, lifetime measurements using Doppler shift attenuation, (E), 22:5809(R) (ANL-7354)
energy levels of, lifetime measurements using Doppler-shift attenuation method, 23:19200(R) (COO-1468-3)
energy levels of, lifetime measurements using Doppler-effect and pulsed-beam technique, 21:23534(R) (ANL-7246)
energy levels of, lifetime measurements using Doppler-shift method, (E/T), 22:37281(R) (NYO-72-191)

energy levels of, lifetime measurements using Doppler shift attenuation method with semiconductor detectors, 21:27574(R) (NYO-GEN-72-132)
energy levels of, lifetime measurements using γ Doppler-shift attenuation, (T), 22:1716
energy levels of, lifetime measurements using γ Doppler-shift method, (E), 22:13955(R) (COO-1468-2)
energy levels of, lifetime measurements using nuclear resonance fluorescence, 24:28748
energy levels of, lifetime measurements using perturbed γ angular correlations in ferromagnetic materials, (T), 22:46841
energy levels of, lifetime measurements using twin-target Doppler shift attenuation method, 22:39527
energy levels of, magnetic beta spectrometer for short lifetime measurements of, 25:29358
energy levels of, many-body theory for ground state, 22:20703
energy levels of, matrix elements of many particle-many hole, (T), 24:13419
energy levels of, measurement by direct electronic methods, 23:17103(R) (ANL-7481)
energy levels of, meson theory for nucleon retarded interactions in many-fermion systems for, 22:11979 (IPNO/TH-100)
energy levels of, method for calculating energy and spin dependence of density of excited, (T), 25:56835(T) (UCRL-Trans-10540)
energy levels of, method for integrating wave equations for, (T), 23:1927 (AD-671630)
energy levels of, methods development for measuring lifetimes of short-lived, (E), 22:46731(R) (COO-1746-8)
energy levels of, methods for calculating lifetimes of metastable, (T), 22:53238
energy levels of, methods for including ground-state correlations in random phase approximation calculations of vibrational, (T), 23:7339
energy levels of, model for coincidence measurement of complex lifetimes of,, 25:46619 (IKF-24)
energy levels of, model for high angular momenta, 25:50843
energy levels of, modified Tamm—Dancoff approximation for neutron—proton configuration mixing in, (T), 23:31066
energy levels of, monograph on phenomenological theory of excited states, (T), 22:30109
energy levels of, nature of fine structure surrounding high-excitation analog, (T), 25:15145 (NYO-1082-25)
energy levels of, near magic numbers, single-particle, (T), 22:13985
energy levels of, neutron spectroscopic factors from isobaric analog resonance excitation, (T), 22:50671
energy levels of, nonisotropic oscillators in SU(n) symmetry for, 22:20286
energy levels of, nuclear resonance fluorescence techniques using neutron-capture gamma rays for measuring parameters of, 22:32673
energy levels of, nucleon widths of isobaric analog, (T), 21:38345
energy levels of, numerical studies of Bethe—Salpeter equation for, 23:32804
energy levels of, particle-hole, (T), 21:4355
energy levels of, perturbation of statistical properties by interactions with time reversal violation, (T), 22:11945(R) (ANL-7384)
energy levels of, phenomenological description of isobaric analog, (T), 25:50771
energy levels of, projected spectra from deformed correlated intrinsic state for, (T), 25:50840
energy levels of, proton partial widths of isobaric analog, (T), 25:36852
energy levels of, pulsed beam delayed-coincidence technique for measuring lifetimes of, 25:48969
energy levels of, quasi-boson method for calculation of O^+, (T), 24:52661
energy levels of, quasi-particle approximation and many-body Hamiltonian matrix for pairing for, 23:49481
energy levels of, quasi-spin methods and pairs of one-particle fractional parentage coefficients in seniority schemes for, 21:35528
energy levels of, quasiparticle description of highly excited resonance, (T), 23:1954
energy levels of, relation between random phase approximation and Hartree—Fock problem for, 22:35383
energy levels of, reorientation effect for measuring quadrupole moments of excited, (E/T), 24:49756
energy levels of, representations of finite transformations of U(3) symmetry for, 21:5579
energy levels of, reseach on electromagnetic properties of excited, (E/T), 25:56832(R) (NYO-3525-67)
energy levels of, research on isobaric analog, (E/T), 22:20729
energy levels of, research progress on isobaric analog, (E), 22:1644(R) (AD-647902)
energy levels of, research using gamma spectroscopy in electron scattering experiments, (E/T), 23:9038 (TID-24667, pp 505-11)
energy levels of, research using inelastic scattering, (E/T), 21:40475 (UCRL-17503)
energy levels of, research using isobaric analog resonances in (p,γ) reactions, 21:19293 (INSJ-102)
energy levels of, research using neutron capture γ spectroscopy, 23:11045 (BNL-12965)
energy levels of, research using neutron capture γ resonance fluorescence, (E), 22:30043
energy levels of, research using neutron-induced reactions with charged-particle emission, (E), 22:14077 (NYO-1082-10)
energy levels of, research using polarization measurements, 21:21618
energy levels of, review of methods for magnetic moment measurements for short-lived, 24:3966
energy levels of, review of methods for measuring magnetic moments of, 23:11065
energy levels of, review of methods for measuring lifetimes of, 23:11068
energy levels of, review of methods for measuring magnetic moments of short-lived, (E/T), 23:4046 (JINR-E3-4062)
energy levels of, review of research in lifetimes of, 24:28793
energy levels of, review on collective octupole, (T), 22:48578 (JAERI-1158, pp 96-8)
energy levels of, rotational, (T), 21:1123 (JINR-P-2865)
energy levels of, schematic interactions for random-phase-approximation calculations of, (T), 21:46812
energy levels of, self-consistent method for core polarization corrections in shell-model calculations for, (T), 23:1937
energy levels of, sensitivity of electron inelastic scattering studies of collective, (T), 23:9009 (TID-24667, pp 150-4)
energy levels of, shell model approach to isobaric analog and continuum, (T), 24:24676
energy levels of, shell-model calculation of quadrupole moments, E2 transition probabilities, and wave functions for rotational, (T), 25:39119
energy levels of, shell-model calculations of lowest-energy high-angular-momentum, 21:31870
energy levels of, shell-model description of rotational, (T), 22:20744
energy levels of, simple chamber for recoil-distance measurement of lifetimes of, 25:22993
energy levels of, single-photon counting for lifetime measurements of, 24:19205
energy levels of, spectroscopic factors from (d,p) reactions below Coulomb value, (E/T), 22:20469
energy levels of, spectroscopic factors from isobaric analog resonances in proton elastic scattering, (T), 22:18336
energy levels of, spin determination using neutron capture data, (E), 22:3689(R) (GA-7820)
energy levels of, statistical theory of angular-momentum distribution in, 21:21603
energy levels of, strength distributions for single-particle, (T), 21:38402
energy levels of, strength functions of one-hole two-particle, (E), 21:1019
energy levels of, stroboscopic observation of Larmor precession in, (T), 23:42962 (OU-LNS-69-3)
energy levels of, structure information from alpha and gamma transitions, (T), 25:12629 (JINR-E4-5135)
energy levels of, structure parameters of neutron strength function and stabilizing shell effects in excited, 24:28819(T) (BNL-tr-333)
energy levels of, sum rule for relation of binding energy to, (T), 23:23786
energy levels of, sum-coincidence method for g-factor measurements of short-lived, 22:10580
energy levels of, systematics of Coulomb and excitation energies of isobaric analog, (T), 24:40697
energy levels of, target chamber for lifetime measurements of, 24:30647
energy levels of, technique for measurements of short lifetimes for, 24:47634
energy levels of, theory of isobaric-analog, (T), 25:39124
energy levels of, third moment of Hamiltonian in terms of two-body matrix elements for calculating, 24:52737
energy levels of, time analysis system for lifetime measurements of, 21:16244
energy levels of, time measuring circuits for scintillation detectors used for measuring, 23:669
energy levels of, time-dependent behavior of classical model for reactions involving isobaric analog, (T), 25:5848
energy levels of, unified derivation of cranking-model and Peierls—Yoccoz expressions for energy of rotational, (T), 25:12646
energy levels of, use of Doppler shift to measure lifetimes of, 24:26583
energy levels of, use of heavy ions for measuring electric and magnetic moments and gyromagnetic ratios of excited, 24:26640 (MIT-2098-601)
energy levels of, use of isobaric analog resonances for studying, (E/T), 24:40703
energy levels of, use of multipole sum rules to study vibrational, (T), 22:16099
energy levels of, use of resonance fluorescence analysis by Compton scattering for measuring lifetimes of, 22:18198
energy levels of, use of uhf electric fields for determining lifetime of, 23:49452
energy levels of, vacuum recoil correction to Doppler shift attenuation measurement of lifetimes for, 24:40706
energy levels of, variational calculation of energies and population probabilities for paired, (T), 25:31360
energy levels of, variational derivation of variable-moment-of-inertia model for rotational, (T), 25:41256
energy levels of, wave function in method of strong coupling for ground-state, 23:31055 (ITF-69-10)
energy levels of, Wigner—Majorana energy and matrix elements of SU(3)-invariant interactions for ground-state, (T), 24:30911
energy levels of, with single closed shell or single hole in closed shell, (E), 22:1667
energy levels populated by stripping reactions, unbound, (T), 24:20462
energy levels with $(d(^1/_2)^2$/sub 5+ / configurations in light, (E), 21:29969(R) (UCRL-17299)
energy levels with doubly closed shell plus one nucleon, (T), 21:4342
energy levels with fixed isospin in, distribution of, (T), 24:40696
energy levels with nonnormal parity in 1p-shell, calculations using shell model, (T), 22:26861
energy levels with single closed shell, description using shell model, (T), 21:7842
energy levels with unnatural parity in strongly deformed even, (T), 21:7834
energy losses of super-high energy cosmic, from relic radiation and light, (T), 25:38687
energy of deformed, calculation using unified model, 24:35924
energy of deformed, rotation-projected expectation values for, (T), 22:53225
energy of heavy primary cosmic, (T), 23:27400
energy of, calculation of effects of deformation on total, 25:17963
energy of, effects of deformation on, 23:49444 (INR-1039)
energy parameters for light, for use in Monte Carlo nuclear evaporation programs, 21:7824 (ORNL-TM-1538)
energy shift in light, second-order, (T), 21:21583
energy spectra and path length of heavy cosmic, steady-state, 21:37223
energy spectra during solar quiet time for cosmic, of Z greater than or equal to 10, 21:5096
energy spectra in cosmic radiation of low-energy heavy, (E), 21:7039
energy spectra of heavy, in primary cosmic radiation, 23:5262
energy spectra of heavy, in primary cosmic radiation, (T), 24:8368
energy spectra of heavy, in primary cosmic radiation, 23:5263
energy spectra of high-energy cosmic, in atmosphere, (T), 22:21931
energy spectra of pairs of nuclei, core-excitation effects on, 22:9931
energy spectra of pairs of, effect of core excitation on, (T), 22:9931
energy spectra of primary cosmic, (E), 22:11282
energy spectra of primary cosmic, (E/T), 25:4981
energy spectra of solar, Explorer-35 data from July 20, 1967 to May 14, 1968 of Z greater than or equal to 3, (E), 25:43231
energy spectra of superheavy cosmic, 21:18472(T) (UCRL-Trans-1340)
energy spectra of superheavy cosmic primary, (E), 22:21946
energy spectra of Z greater than or equal to 2 to 21, in primary cosmic radiation, (E), 22:21947
energy spectra of Z greater than or equal to 20, in cosmic radiation, (E), 21:37187 (CONF-670628-6)
energy spectra of Z greater than or equal to 3 primary cosmic, (E), 24:28126
energy spectrum and defomation of even—even, (T), 25:31411
energy spectrum of cosmic heavy, during solar quiet time, 21:27019 (N-67-11376)
energy spectrum of cosmic, (E), 23:3307
energy spectrum of cosmic, between 2 x 10^{16} and 10^{14} eV, (E), 21:31269
energy spectrum of heavy, in near-vertical EAS, (T), 21:639
energy-level calculations using charge-independent pairing interaction, 21:19334
energy-level classification of doubly even, (E/T), 22:3793
energy-level classification using group theory, 21:44739 (ZFK-122, pp 9-19)
energy-level densities and spacings in intermediate and heavy, calculations using Fermi gas model, 22:1712
energy-level densities and spacings in intermediate and heavy, calculations using Fermi gas model, (T), 22:1712
energy-level densities and strength functions near neutron binding energy for A = 10 to 80 and A = 142 to 170, 24:24658
energy-level densities and transition strengths from analysis of isomer ratios, (T), 22:27370
energy-level densities for A = 51 to 205, from neutron capture data, (E/T), 21:2684
energy-level densities from charged-particle evaporation spectra, (T), 22:9957
energy-level densities from cross-section fluctuations, (T), 21:46808
energy-level densities from energy dependence of direct-reaction cross sections, partial, (T), 21:10084
energy-level densities in, iterative method for calculating, (T), 23:47052
energy-level densities in, measurement using energy dependence of direct reaction cross sections, (T), 21:21579 (TID-23787)
energy-level densities of A = 20 to 22, calculations using shell model with exchange and quadrupole forces, 21:33927
energy-level densities of A = 9 to 201, from neutron inelastic scattering, (E), 21:12063
energy-level densities with pairing interactions, (T), 21:7833
energy-level density and spacing distributions, (T), 21:23534(R) (ANL-7246)
energy-level density and structure of, correlation of, (T), 21:19338
energy-level density for partially random Hamiltonians for, (T), 24:49960
energy-level density in light residual, statistical model calculations of, (T), 23:23797
energy-level density in, using two-body random Hamiltonian, (T), 25:23074
energy-level density of, formulation of, (T), 22:5809(R) (ANL-7354)
energy-level density parameters and average level spacings in, 23:49355 (JAERI-1183)
energy-level description in the Tamm—Dancoff approximation, collective O^+, (T), 24:13414
energy-level displacements in mirror, (T), 21:2779
energy-level electromagnetic transition rates in, corrections due to ground-state correlations, (T), 22:16091
energy-level excitation and lifetime measurements using gamma resonance fluorescence, (E), 21:19231
energy-level excitation in nuclear reactions, effects of ground-state correlations on, (T), 21:2766

energy-level lifetime measurements by center of gravity shifting method, design of differential converter for, 23:29269
energy-level lifetime measurements in nanosecond region, using neutron inelastic scattering with intense pulsed beams, 22:32728
energy-level lifetime measurements in picosecond range, coincidence methods for, 21:45411
energy-level lifetime measurements of, time-to-pulse height converter for, 24:19273
energy-level lifetime measurements of, two-parameter centroid shift coincidence method for, 24:38258
energy-level lifetime measurements on, Monte Carlo program for Doppler shift analysis for, 23:44989
energy-level lifetime measurements using DSA method, effect of target backing material on, 25:45926
energy-level lifetimes of, delayed coincidence measurement of nanosecond, 21:17355 (ZfK-Pha-20)
energy-level lifetimes of, formalism for analysis of Doppler-broadened shapes for, 24:38122
energy-level lifetimes of, properties of parallel-plate avalanche counters for measurement of, 21:24205
energy-level lifetimes of, table of values published from 1967 to 1970, (E), 24:52546 (AE-400)
energy-level lifetimes of, techniques for measurement of electromagnetic, 21:35436 (BNL-11484)
energy-level parameters for Z = 11 to 21, data compilation for, (E), 22:9819
energy-level population of even—even spherical, by beta decay, (T), 24:13437
energy-level positions and widths from charged-particle spectra, effects of final-state Coulomb interactions on, (E/T), 22:32500
energy-level positions in complex, correlations of single-particle, (T), 23:5969
energy-level schemes and decay properties for A = 142-to-145, evaluated data compilation on, (E), 22:3735
energy-level schemes for, numerical construction of, 23:1911
energy-level shifts in light, from meson (π) capture, (T), 22:27390
energy-level spacing distributions for mixed spin and parity, (T), 21:27637
energy-level spacing distributions in heavy, finite-sample effects on, (T), 22:5809(R) (ANL-7354)
energy-level spacings in, effect of time-reversal violation on, (T), 22:5615
energy-level spectra of, from fission processes, (T), 21:27651
energy-level spin assignments in 2p-shell, from spin dependence of (d,p) reaction angular distributions, (E), 21:19224
energy-level structure of A = 3 and 5, (T), 21:9928
energy-level structure of even-even, calculations using asymmetric rotor model, (T), 21:2810
energy-level transition densities for dipole excitations of N > Z, (T), 22:1723
energy-level transition densities for dipole excitations of N > Z, 22:1723
energy-level transition densities in, (T), 25:31418
energy-level transition intensities of deformed, (T), 21:44768
energy-level transition matrix elements for monopole Coulomb excitation, research using μ-mesic x-ray spectra, (T), 22:35378
energy-level transition multipolarities from internal pair formation data, (T), 22:20709
energy-level transition probabilities for 1f2p-shell, deformed Hartree—Fock calculations for E2, (T), 23:1842
energy-level transition probabilities for A = 18 to 22 sd-shell, (T), 22:35293(R) (ORNL-4230)
energy-level transition probabilities for actinide and rare-earth, systematics of K-forbidden, (E/T), 22:18236
energy-level transition probabilities for deformed, Coriolis corrections to electromagnetic, (T), 21:31862
energy-level transition probabilities for deformed heavy, (T), 22:39670
energy-level transition probabilities for deformed even—even, calculations using rotational—vibrational model for E0, (T), 23:13315
energy-level transition probabilities for even-A rare-earth, reduced E1, 21:30016
energy-level transition probabilities for even-even, E2, (T), 22:32694
energy-level transition probabilities for γ vibrational bands, E2, (T), 22:39712
energy-level transition probabilities for isomeric, with oblate deformation, (T), 22:48583 (JAERI-1158, pp 118-19)
energy-level transition probabilities for odd-A deformed, (T), 23:49440(T) (BNL-tr-285)
energy-level transition probabilities for odd-A rare-earth, (T), 22:42100 (JINR-P4-3935)
energy-level transition probabilities for odd-A spherical, calculations of l-forbidden M1, (T), 23:10989
energy-level transition probabilities for odd-odd spherical, E2 and M1, (T), 22:39707
energy-level transition probabilities for rotational bands of deformed even-even, E2, (T), 22:39630 (ITF-68-7)
energy-level transition probabilities for rotational bands of even-even, E2, (T), 23:9002
energy-level transition probabilities for rotational bands of deformed A = 150 to 190, E2, (T), 22:22595
energy-level transition probabilities for rotational bands of A = 150 to 190, calculations using Davydov model, (T), 22:13993 (IIAE-LR-19)
energy-level transition probabilities for sd-shell A = 18 to 22, shell-model calculations of E2, (T), 22:29927
energy-level transition probabilities for vibrational bands of deformed, E1, (T), 22:27324
energy-level transition probabilities for vibrational bands of deformed even-even, E2, (T), 22:27139
energy-level transition probabilities for, calculations in rare earth region using rotation—vibration model, (T), 23:28315
energy-level transition probabilities of deformed even-even, ratios of E2, (T), 22:16043
energy-level transition rates for, methods development for calculating, (T), 22:50560(R) (RLO-1062-681)
energy-level transition rates in medium-weight and heavy, (E), 22:22587 (NP-17386)
energy-level transition rates in, effects of configuration mixing on l-forbidden M1, (T), 22:44764
energy-level transition rates in, roton description of rotational, (T), 24:28836
energy-level transition strengths in keV neutron capture, (E), 22:27100
energy-level transitions and effective quadrupole charge in odd near-magic, E2, 21:31890
energy-level transitions from (α,3n) and (α,4n) reactions, γ intensity distributions from rotational E2, (E), 21:40429(R) (RLO-1388-23)
energy-level transitions from (n,γ) reactions, tables of, (E), 25:36718 (AAEC/TM-585)
energy-level transitions from alpha inelastic scattering, (T), 21:4354
energy-level transitions from β vibrational states of odd-A deformed, conversion coefficients and E0/E2 mixing ratios for, (T), 22:42056
energy-level transitions from compound states in deformed, electromagnetic, (T), 25:17956 (JINR-P4-5562)
energy-level transitions from high-spin states of deformed odd-A, γ angular distributions from, (E), 21:46817
energy-level transitions from meson (π) and proton reactions in GeV range, excitation cross sections for, 22:35412
energy-level transitions from octupole states in even-even deformed, branching ratios for E1, (T), 25:3751
energy-level transitions in 1p-shell, (E), 22:26888
energy-level transitions in 1p-shell, relative phases of E2 and M1 matrix elements for, (E/T), 21:23436
energy-level transitions in A = 15, E2/M1 mixing ratio for, (T), 22:35235
energy-level transitions in A = 175 to 243, internal conversion coefficients and matrix elements for E1, (E), 25:20457
energy-level transitions in A = 182 to 192, relative intensities, internal conversion coefficients, and multipolarities of, (E), 25:12512 (CERN-70-29)
energy-level transitions in A = 186 to 196, multipole mixing ratios for, (T), 25:28316 (CERN-70-30(Vol.2), pp 779-812)
energy-level transitions in A = 26, reduced isoscalar and isovector E2 matrix elements in, 25:15163
energy-level transitions in A = 3, electromagnetic, (T), 22:26793
energy-level transitions in A = 72 to 86, β—γ correlations for once-forbidden, (T), 24:30929
energy-level transitions in A = 90 to 92 and 140 to 142, review of, (E), 25:28343 (CERN-70-30(Vol.2), pp 1125-7)
energy-level transitions in beta decay of, time reversal invariance tests in electromagnetic final-state interaction contribution to triple-product correlation coefficient in, (T), 25:43660
energy-level transitions in complex, consistent treatment in one-boson-exchange model for N + N exchange currents for corrections to, 23:51950 (DESY-69/28)
energy-level transitions in deformed even-even, calculations using Davydov-Rostovsky formalism for E(2) 4$^+$ to 2$^+$, (T), 24:26689
energy-level transitions in deformed even-even, L/M conversion coefficient ratios for E2, (E), 21:1099
energy-level transitions in deformed even-even, rotational, (E), 21:1109
energy-level transitions in deformed even-even, SL(3,R) symmetry for rotational-band, (T), 24:52712
energy-level transitions in deformed even-even, systematics of E2, (E), 22:7713
energy-level transitions in deformed heavy, dissertation summary on research using spectroscopic methods, (E), 22:39661
energy-level transitions in deformed odd-A, collective effects in, (T), 21:21557
energy-level transitions in deformed odd-A, hindered E1, (E/T), 22:48515 (JAERI-1158, pp 21-5)
energy-level transitions in deformed odd-A, internal conversing coefficients for E1, (T), 21:31789
energy-level transitions in deformed odd-odd, selection rules for spin-flip electromagnetic, (T), 21:30032 (ZfK-Pha-26)
energy-level transitions in deformed, from multiple Coulomb excitation, (T), 21:10025
energy-level transitions in deformed, harmonic oscillator wave functions for, (T), 23:42970
energy-level transitions in deformed, L-subshell ratios for E2, (E), 21:7809
energy-level transitions in deformed, M1 strength functions for, (T), 25:3683
energy-level transitions in deformed, probabilities for E2, (T), 25:56735 (FEI-202)
energy-level transitions in deformed, selection rules for M2, (T), 21:23534(R) (ANL-7246)
energy-level transitions in deformed, tabulation of hindrance factors for K-forbidden, 23:49423
energy-level transitions in even—even, isospin properties of E1, (T), 23:15431(R) (NYO-3525-36)
energy-level transitions in even—even, nonaxial rotator model calculations for E1 and E2, (T), 24:40669 (ITF-70-13)
energy-level transitions in even-even deformed, description of M1 rotational, (T), 25:3726
energy-level transitions in even-even Z = 10 to 94, from neutron inelastic scattering at 7 to 14 MeV, (T), 21:21441 (UCRL-50181)
energy-level transitions in even-Z, pair-conversion for E0, (T), 22:5885
energy-level transitions in excited, radiative widths for, (T), 22:32679
energy-level transitions in ground-state bands of medium-weight and heavy even-even, electromagnetic, (T), 21:31833 (INSJ-104)
energy-level transitions in ground-state rotational bands of deformed odd-A, E2, (T), 22:39706
energy-level transitions in heated, partial widths for radiative, 22:5899
energy-level transitions in heated, partial widths for radiative, (T), 22:5899
energy-level transitions in heavy deformed, unified model for probabilities of, (T), 25:28353 (NP-18695)
energy-level transitions in heavy, atomic corrections to E2, (T), 22:7637(R) (COO-1573-33)
energy-level transitions in heavy, calculations using Saxon—Woods potential including pair correlations and Cariolis interactions for E1, (T), 25:53745 (JINR-P4-5872)
energy-level transitions in high-spin, competition between E2 and M1, (T), 21:2785
energy-level transitions in light, analog to anti-analog, 25:28224
energy-level transitions in magnetic resonance of oriented, anisotropy of, (T), 23:46562
energy-level transitions in medium-weight and heavy, numerical simulation of γ cascades for, (T), 23:4002 (RT/FI-(68)20)
energy-level transitions in medium-weight odd-A, (T), 22:48516 (JAERI-1158, pp 31-8)
energy-level transitions in nonaxial odd-A, electromagnetic, (T), 21:2724
energy-level transitions in nonaxial, Davydov-model calculations of probabilities for E2, (T), 25:56785
energy-level transitions in odd deformed A = 155 to 183, calculations using finite-Fermi system theory for single-particle E1 ΔK = 1, (T), 23:5877
energy-level transitions in odd-A deformed, N-mixed Nilsson orbitals in E1, (T), 25:50868
energy-level transitions in odd-A medium-weight, l-forbidden M1, (T), 21:30069
energy-level transitions in odd-A, E2, (E/T), 22:14038
energy-level transitions in odd-A, K-conversion coefficients for, (E/T), 22:18351
energy-level transitions in odd-A, unified model description of E1 ΔK = +-1, (T), 24:20386
energy-level transitions in odd-mass, E1 ΔK = 0, (T), 23:40039
energy-level transitions in oriented, tables of coefficients for analysis of angular distributions of gamma rays from, (T), 25:41253 (LA-4677)
energy-level transitions in parity nonconservation in γ, (T), 23:42969
energy-level transitions in polarized, conversion-electron emission during E1 and M1, (T), 21:17420
energy-level transitions in radioactive, tables of energies and intensities of, (E), 25:20368 (JAERI-Memo-4189)
energy-level transitions in rotational bands of deformed even-even, E2, (T), 21:35462 (NP-16859)
energy-level transitions in s-d shell, analog, 23:46956
energy-level transitions in self-conjugate, attenuated magnetic, (T), 22:13949
energy-level transitions in self-conjugate, conjugate, and non-conjugate, analog, (E/T), 24:40701
energy-level transitions in single-particle-transfer reactions, calculations using projection from Nilsson orbitals, (T), 21:23534(R) (ANL-7246)
energy-level transitions in spherical, theory of E0, E1, and E2, 21:10110
energy-level transitions in translead, internal conversion coefficients for 2$^+$ $\rightarrow$ 0$^+$, (E), 23:21331 (MIT-952-5(Pt.1), pp 200-314)
energy-level transitions in Z = 1 to 46, from thermal neutron capture, 22:9820
energy-level transitions in Z = 36 to 63, (E), 25:5687 (UCRL-19949)
energy-level transitions in Z = 7 to 21, calculations of E2, (T), 25:28189
energy-level transitions in, angular correlations of linearly polarized cascade photons from, (T), 23:47057
energy-level transitions in, applicability of Siegert's theorem to electric, (T), 25:59864
energy-level transitions in, calculations using anisotropic Saxon—Woods potential, (T), 22:22630
energy-level transitions in, computer program for constructing level schemes from, (E), 25:34141
energy-level transitions in, conversion-electron polarization correlations in, (T), 21:40492
energy-level transitions in, determination of branching ratios using sum-coincidence spectrometers, (E/T), 23:1908
energy-level transitions in, determination of K-forbiddenness of E1 and M1, from neutron resonances to low-lying energy levels, (T), 25:46019 (JINR-P4-5825)
energy-level transitions in, differential angular correlations for, (E), 21:15543 (BMwF-FBK-66-39)
energy-level transitions in, dissertation summary on research using directional correlation methods, 22:39658
energy-level transitions in, E0 admixture determination by gamma—gamma directional correlation measurements in, 24:40679
energy-level transitions in, effect of electron shell on γ radiation for, (T), 23:42917
energy-level transitions in, effects of core polarization on hindrance of charge-exchange E1, (T), 25:36836
energy-level transitions in, effects of higher-order electromagnetic, (T), 21:31859
energy-level transitions in, effects of nonlocal BCS pairing interaction in electric, (T), 25:59863
energy-level transitions in, effects of parity violation on gamma, (T), 23:40099
energy-level transitions in, effects of valence shell structure on internal conversion, (T), 25:43953(T) (BNL-tr-427)
energy-level transitions in, exactly solvable quantum-mechanical model for, (T), 25:35891

energy-level transitions in, gamma angular distributions from, (T), 21:34046
energy-level transitions in, gamma angular distribution curves for spin-1/2 to -7/2, (T), 21:40491
energy-level transitions in, gamma angular distribution curves for spin-1/2 to -9/2, (T), 21:40491
energy-level transitions in, gamma-ray multiplicities and isomeric cross section ratios for, (T), 21:2736
energy-level transitions in, graphs for analysis of (1—3) gamma—gamma directional correlations in, (T), 25: 31312 (ORNL-4619)
energy-level transitions in, γ-γ angular correlation function for parity-mixed, (T), 21:5589
energy-level transitions in, isospin formalism for, (T), 24:40694
energy-level transitions in, lectures on unified theory for electromagnetic, (T), 22:48623
energy-level transitions in, linear polarization coefficients for isotropic angular distributions of gamma rays from, (T), 25:25747
energy-level transitions in, M-, N-, and O-subshell conversion coefficients for, (T), 21:17417
energy-level transitions in, M2, (T), 22:5809(R) (ANL-7354)
energy-level transitions in, method for calculating correlation coefficients for triple cascade, (T), 25: 25719 (NP-18644)
energy-level transitions in, method for determining parity nonconserving admixtures in, 23:49319
energy-level transitions in, method using mixing ratios for determining, 23:26540
energy-level transitions in, methods for measurement of internal conversion coefficients for, (E), 25:50772
energy-level transitions in, multipolarity assignment using γ—γ angular correlation and linear polarization measurements, (T), 23:23798
energy-level transitions in, multipolarity mixing parameters for, (T), 21:40493
energy-level transitions in, nuclear properties from γ spectra for, 23:37287 (KURRI-TR-10, pp 114-37)
energy-level transitions in, perturbation factor for arbitrary correlation time for perturbed angular correlations in, (T), 25:39079
energy-level transitions in, phase-defined reduced matrix element for multipole mining ratios of, 25:31420
energy-level transitions in, rate formula for first-order, (T), 21:40474(R) (RLO-1062-675)
energy-level transitions in, search for distinct classes of M2, (E/T), 25:14983 (NP-18492)
energy-level transitions in, selection rules for, (T), 23: 2663 (NP-17612)
energy-level transitions in, shell-model calculations of E2, (T), 22:44765
energy-level transitions in, spin dependence of probabilities for, (T), 22:14114
energy-level transitions in, statistical theory of gamma de-excitation, (T), 25:31406
energy-level transitions in, survey of M2, (E/T), 21: 44583
energy-level transitions in, T-invariance violation in, 25: 47925
energy-level transitions in, tables of abundances, energies, half-lives, and production modes of, (E), 25:28400
energy-level transitions in, tables of gamma—gamma directional-correlation coefficients for, (T), 25:28401
energy-level transitions in, tabulations of lifetimes and spectroscopic and hindrance factors for, (E), 25:5792
energy-level transitions in, test of time reversal invariance using mixed dipole—quadrupole, (T), 25: 36540
energy-level transitions in, theory of gamma angular distributions from, 21:21590
energy-level transitions in, theory of quadrupole, (T), 21:44778
energy-level transitions in, total intensities of isovector, (T), 24:52716
energy-level transitions near N = 28, from (t,p) reactions, (T), 21:12092
energy-level transitions of A = 13 to 20, unified-shell-model calculations of M1 and E2, (T), 25:38895
energy-level transitions of, parity nonconserving internucleon potential effects on, 23:46765
energy-level transitions of, parity violation with time reversal invariance violation in resonant absorption of polarized photon emission from mixed M(1), E(2), and E(1), (T), 23:51973
energy-level transitions of, review of time reversal invariance in angular correlation coefficients for E1, M1, and E2, 23:49182 (ITEF-650)
energy-level transitions of, structure information from analog—antianalog, (T), 24:52657
energy-level transitions of, systematics of E1, 21:30037
energy-level width and spacing and transmission coefficients in, relation between, 25:10077
energy-level widths in nuclear reactions, partial and total, (T), 21:5591
energy-levels of medium-weight, research using isobaric analog resonance excitation, (T), 22:48575 (JAERI-1158, pp 64-7)
EO conversion in, dimensional effects on, (T), 21:4330
equation of state for neutron matter in heavy, (T), 24: 44851
equilibrium deformations of even-even, with N = 50 to 82 and Z = 50 to 82, (T), 22:32568 (JINR-E4-3816)
equilibrium shapes of light, calculations using independent-particle model, (T), 22:9946
exchange currents in, from photon and electron disintegration, (T), 24:40714
excitation by electron beams, use of storage ring in, 23: 46868
excitation energy of, dependence of average nuclear field on, (T), 25:12632 (JINR-P4-5084)
excitation in high-energy reactions, with approach to statistical equilibrium, (T), 22:14107
excitation of rotational states in even, collective, (E), 25: 31409
excitation of, microscopic approach to rotational, (T), 24:43514
excitation of, pulse approximation in multiple Coulomb, (T), 22:27265
excitation of, rotation as intrinsic, (T), 24:30931
excitation process for, SU(2) symmetry and sum rules for, 24:45563
excitation quantum numbers in, effects on binding and excitation energies of, (T), 25:43958
excitations in even—even deformed A = 150 to 190 and A greater than 227, review of monopole, (E/T), 25: 23022 (JINR-P4-5422)
excitations in spherical, possibility of quasi-rotational, (T) , 25:31407
excitations in, correlation between quasiparticle and collective, (T), 25:25796 (JINR-E4-5578)
excited states in deformed nuclei, quadrupole moments of first 2⁺, 21:30061
excited states in spherical nuclei, quadrupole moments of first 2⁺, 21:30062
existence of K-mesic, from assumption of positive sign of real part of amplitude of K + N interactions at low energies, (T), 25:20002 (IFVE-STF/SPK-70-30)
existence of large Z and A, in superdense matter, (T), 25:40202
existence of stable superheavy, 23:13262 (JINR-P7-4199)
external fields in superfluid, determination of effective, 22:9930
fermion elastic and inelastic scattering cross sections for optical model computer program for spin-1/2, 24: 28816 (AAEC/TM-524)
fermion elastic scattering by complex, computer program with optical model for differential cross sections and polarizations for spin-1/2, 24:28820 (INP-689)
fermion elastic scattering by, single-particle wave functions using nonlocal optical-model potentials, (T), 21:12106
fission at moderate excitation energies, α emission in, (E), 22:3720
fission barrier of, exact calculation of penetrability of two-peaked, 25:15004
fission barriers for superheavy, calculations using single-particle potential parameter sets, (T), 23:19393
fission of even—even compound, near threshold, pairing effects in, (T), 25:23060(T) (LIB/Trans-333)
fission of even—even, moment of inertia at saddle point of low-energy, (T), 22:50661
fission of excited compound, statistical analysis of, (T), 24:3976
fission of heavy, existence and consequences of a scission barrier in, (T), 24:35903
fission of heavy, model calculations of energy and angular distributions of light nuclei from, 24:28821 (INR-P-1138)
fission of heavy, proton-induced, (E), 21:1110
fission of heavy, saddle point calculation of, 21:7694 (IA-1082, pp 27-74)
fission of highly-excited, features of, (T), 24:24663
fission of very heavy, spontaneous, (T), 22:1691
fission of Z < 84, research at Western Washington State College, 1970 to 1971, (E), 25:56750(R) (RLO-1759-25)
fission of Z = 85 to 110 compound, mass and charge distributions for, (E/T), 24:30804
fission of, ambiguities in R-matrix parameters for interfering resonances with two channels for, (T), 25: 59829 (COO-2022-11)
fission of, asymmetric deformation in, (T), 25:23024 (JINR-P4-5581)
fission of, dependence of channel width on excitation energy, (T), 21:19277
fission of, description of saddle-point deformation using single-particle model, 21:34066
fission of, lifetime measurements using blocking effects in single crystals, 21:31834(R) (ORNL-4082)
fission of, model of, (T), 21:2717
fission of, nuclear moments of inertia in saddle point, (E) , 21:15568 (JINR-P7-3105)
fission of, one-particle aspect of spontaneous, 22:3750 (INP-555/PL/PH, pp 123-4)
fission of, pairing gap parameters and transition points in pairing-plus-quadrupole model of, (T), 25:59867
fission of, role of rotational motion in Coulomb, (T), 24: 49889
fission of, status of studies on, 24:52551 (CONF-690916-(Vol.1), pp 4-22)
fission of, studies of energy in, 24:22665(R) (AECL-3521)
fission of, survey of theory of, 21:15546 (CONF-660221-, pp 1-27)
fission of, use of liquid drop models to simulate, (E), 21: 36250
fluorine-18 reactions (F-18,O-16) with light, spectroscopic factors for, (T), 22:24895 (JINR-E4-3742)
flux of cosmic, of 3 less than or equal to Z less than or equal to 5, 6 greater than or equal to Z greater than or equal to 9, and Z greater than or equal to 10 during solar minimum, 23:8487
flux of heavy, in primary cosmic radiation, (E), 24:3211
flux of metagalactic, upper limit for, 23:22951
flux of solar, at activity minimum of 1964—1965, (E), 22:13105
flux of trans-iron, in primary cosmic radiation, (E), 23: 41994
flux of Z greater than or equal to 3 primary cosmic, (E), 22:24081
flux of Z greater than or equal to 6 cosmic-ray, over Texas in March 1962, 21:46182 (N-67-18984)
forces in $1p_{1/2}$-shell, pairing and isopairing, 21:44549
forces in A = 14, evidence for tensor, 22:44612
forces in A = 14, tensor, (E/T), 22:44612
forces in A = 16, core-polarization corrections to particle-hole, (T), 21:15491
forces in many-body systems, 21:46803
forces in superconducting, quadrupole pairing, 22:20740
forces in, accuracy of photon correlation measurements as test of time reversal invariance of, 21:25587
forces in, calculations of effective, from nucleon—nucleon forces, (T), 21:4327 (PUC-937-229)
forces in, description of spin—orbit, (T), 23:21402
forces in, general relativistic scalar field theory in complex Weyl space for π mesonic x rays for repulsive, (T), 25:47969
forces in, lectures on, 23:17128 (MIT-2098-518)
forces in, n + n interactions at low energies for properties of, 24:33022
forces in, range of residual central, 23:13326
forces in, range of residual, (T), 23:15514
forces in, review of meson effects on, (T), 24:45547
forces in, saturation properties of, 23:19328 (ITF-68-66)
forces in, scattering lengths of n + n interactions for test of hypothesis of symmetry with respect to charge for, (E/T), 25:43534 (NP-18814)
forces in, theory of two-body effective, (T), 25:59850
form factors for, effect of short-range correlations on, (T) , 22:30048(R) (PUC-937-307)
form factors of, from electron elastic scattering, 21: 29460
formalism for anharmonic effects in deformed even-even, (T), 21:40467 (JINR-P4-3432)
formation in stellar matter, (T), 25:6926 (NP-18544)
formation of heavy proton-rich, in stellar atmospheres, (T), 21:20649
four-body correlations in light closed-shell, (T), 22: 27296
four-body correlations in light, reduction of effective interaction in, (T), 23:28328
fractional parentage coefficients for (1d-2s)-shell, calculation using the projection-operator method, (T), 25:31426
fractional parentage coefficients for 1f, 2p-shell, 21:4358
fractional-parentage and Clebsch—Gordan coefficients in 2s—1d shell, tables of, 21:40498
fragmentation of heavy primary cosmic, in the Galaxy, (T), 22:19807
fragmentation of primary cosmic, in interstellar hydrogen, (T), 23:51406
fusion by heavy ions, effects of angular momentum in, (T), 25:23033(R) (ORO-3924-5)
gamma absorption and emission by, chemical and structural effects on, 21:17412
gamma absorption by bound, in crystals, cross section for, 21:29352
gamma acoustic resonance absorption in, (T), 25:43493
gamma angular correlation coefficients for dipole and quadrupole transitions in, formulas for calculating, (T), 23:19323(T) (BNL-tr-246)
gamma angular correlation coefficients for, tables of, 22: 3774
gamma angular correlations for determining mixing parameters, (T), 21:40469 (NP-16950)
gamma angular correlations for, selection rules for interference in perturbed, (T), 22:46842
gamma angular correlations from aligned, coefficients for, 22:3788
gamma angular correlations from aligned, computer program for least squares analysis of, 21:33954(R) (AECL-2687)
gamma angular correlations from dipole and quadrupole transitions in, coefficients for calculating, (T), 22: 44750 (ITEF-564)
gamma angular correlations from, detector system for measurement of, 21:15542 (BMwF-FBK-66-38)
gamma angular correlations from, effect of finite time-resolution on differential perturbed, 23:17777
gamma angular correlations from, effects of electron magnetic relaxation on, (T), 22:5866 (BNL-11884)
gamma angular correlations from, review of methods for measuring and interpreting perturbed, (E/T), 22:32709
gamma angular correlations from, zero-field resonance from isotropic hyperfine interaction in perturbed, (T), 22:46843
gamma angular correlations in even-A, influence of combined static and time-dependent quadrupole interactions on, (T), 25:14477
gamma angular distributions from aligned nuclei, tables of coefficients for, 22:3787
gamma cascades from oriented, effects of T-noninvariance of nuclear forces on correlation function for, 21:40476 (UJV-1789)
gamma emission by, limit on induced pseudotensor form factor of axial-vector current from sign of circularly polarized, 24:37724
gamma emission following orientation by capture of polarized neutrons, (T), 21:21616
gamma emission from neutron inelastic scattering, effects of width fluctuations on, (T), 21:42614(R) (ORO-2791-26)
gamma emission, review of uses of Moessbauer effect in, 23:30661
gamma inelastic scattering with isomeric excitation, review of, 22:32703
gamma nonresonant elastic scattering at low energy, (T), 21:15615 (CONF-660221-, pp 255-9)
gamma perturbed angular correlations (PAC) from, measurements using, 22:9982
gamma radiation diffraction from, in crystals, resonance, 22:38740
gamma radiation scattering from, in crystals, theory of resonance, 22:38736
gamma reactions (γ,³He) and (γ,⁴He) with, equipment for measuring cross sections for, 22:27534 (NBS-TN-421)
gamma reactions (γ,γ') at 6 and 8 MeV, analytical use of isomers produced by, 21:35882
gamma reactions with A = 2 to 260, tables of threshold energies for, 21:29968 (UCRL-14006)
gamma reactions with, giant dipole resonance in, (E/T), 21:19326
gamma resonance absorption and fluorescence of, (E/T), 22:46853
gamma resonance absorption and scattering, 21:17423

gamma resonance absorption by oriented, multipole mixtures in, (T), 23:15521
gamma resonance scattering by, directed radiation from, (T), 21:7839
gamma resonance scattering by, facility for studying, 25:25599
gamma resonance scattering by, research program on, 22:37340(R) (EANDC(E)-89(U))
gamma resonance scattering using gaseous sources, effects of gas kinetics collisions on, (E), 21:33918
gamma resonance scattering using liquid and solid sources, (T), 22:44786
gamma resonant radiation diffraction from, in Sn-119 single crystal, (E), 23:27721
gamma scattering by polarized, birefringence in, (T), 21:10116
gamma scattering by, activation cross sections for, (E), 21:10011(T) (ANL-Trans-373)
gamma scattering by, activation cross sections for, (T), 21:10077(T) (ANL-Trans-375)
gamma scattering by, activation cross sections for, (T), 21:10076(T) (ANL-Trans-372)
gamma scattering by, generalized expression for scattering length for resonant and nonresonant, 21:42714
gamma scattering by, parity and time reversal violations in resonance, 23:27839
gamma spectra from medium and heavy, comparison of neutron-capture, 23:3546
gamma spectra from neutron capture, method for calculating, 21:40471 (ORNL-P-3299)
gamma spectra from neutron capture, method for calculating, 21:31836 (ORNL-TM-1867)
gamma spectra from proton capture, resonance energy separation in, (E), 22:18123(R) (RLO-1925-11)
gamma spectra in 400 to 1300 keV region, precise comparison and measurement with lithium-drifted germanium detector, 25:48983
gamma spectra of odd-odd, from neutron capture, (E), 21:2667
gamma spectra of, least square analysis of, 22:33634 (AD-665666)
gamma spectra of, method for analysis of pulse-height, 21:3301
gamma spectra of, variance—covariance matrix for, 23:16144
gamma vibration of deformed, at equilibrium and the saddle point, (T), 25:12628 (INR-P-1201)
gamma-gamma angular correlations for, effect of magnetic resonance on, (T), 22:18315
gamma-ray mixing ratios in mirror, (T), 25:18006
Gamow—Teller matrix elements of mirror, configuration mixing effects in, (T), 24:18458
generalized seniority and structure in semi-magic, (T), 25:50815
generation of heavy, on the Sun, (E), 22:2734
giant dipole resonance in, isospin splitting of, (E), 22:7685
giant resonances in closed-shell, calculations using realistic forces, (T), 22:41962
giant resonances in closed-shell, calculations using realistic forces, (T), 22:41962
ground state of even, generator-coordinate method for description of rotational spectra of, 24:52728
ground-state correlations in spherical "superconductor", (T), 21:44775
group-symmetry breaking in, measures for, 22:14090
gyromagnetic ratios of deformed, cranking-model calculations of, 22:20684
gyromagnetic ratios of deformed, cranking-model calculation of, (T), 22:20684
gyromagnetic ratios of odd-odd, collective, (E/T), 21:27583
hadron elastic and inelastic scattering at high energies, effect of correlations in, (T), 24:3977
hadron elastic and inelastic scattering by light, medium, and heavy, at high energies, consistency of multiple scattering theory for, 24:13117 (INP-682, pp 12-47)
hadron elastic and inelastic scattering by, Coulomb interaction in, 24:52123
hadron elastic and near-elastic scattering at high energies, role of Coulomb interactions in, 24:20094 (INP-687)
hadron reactions at 1 to 100 TeV in emulsions, fireball model for N* production in, 22:41810 (INR-P-915)
hadron reactions at 3.0 to 25 GeV/c in, helium-8 production from, (E), 22:3255
hadron reactions at high energies with, summation of Glauber multiple-scattering series for amplitudes of, 23:32768
hadron reactions at high energies, diffraction theory for, 24:52134
hadron reactions at high energies, effect of difference in proton and neutron distributions on, 25:47906
hadron reactions at high energies, Glauber corrections for, (T), 23:23505
hadron reactions at high energies, Glauber model for, (T), 24:45541 (INP-697)
hadron reactions at high energies, Glauber series for, 23:23498
hadron reactions at high energies, model for, 24:40411
hadron reactions at high energies, Reggeon diagram for asymptotic theory of, 24:42992
hadron reactions at high energies, review of Glauber theory for, (E/T), 25:36533
hadron reactions at high energies, two-body correlation function and correlation effects on, (T), 24:3706
hadron reactions at high energies, unitarity for separation of two groups of degrees of freedom in, 24:13116 (INP-682, pp 1-11)
hadron reactions with nuclei at high energies, diffractive, inelastic, (T), 24:20140
hadron reactions with, Glauber model for coherent production in, 24:18110 (CONF-690330-, pp 152-60)
hadron reactions with, instability criterion for properties of intermediate compound systems in, (T), 25:36599
hadron reactions with, review of coherent multiparticle production, 25:47908
hadron reactions with, Woods—Saxon and Gaussian density distributions for total cross sections for, 24:35670
hadron scattering at high energies by heavy, Glauber representation for amplitude of, 23:36951 (JINR-E2-4455)
hadron scattering at high energies by light, review of coherent, (E), 25:38753
hadron scattering at low and high energies, peripheral models for, 22:17927
hadron scattering by, Coulomb corrections to, (T), 25:1553
half lives for, computer program for analysis of decay curves, 21:13896 (IS-1501)
half lives of, exact measurement of, 21:15603
half-life measurements for short-lived, using modulated excitation source, (E/T), 22:32677
half-life of intrinsic states in deformed odd-A, (E), 22:53215
half-lives of A = 440 to 480, Strutinsky-shell-correction calculation of, (T), 25:28310 (CERN-70-30(Vol.2), pp 646-53)
half-lives of A = 6 to 167, (E), 25:38963
half-lives of A = 75 to 147, (E), 25:28340 (CERN-70-30(Vol.2), pp 1093-1103)
half-lives of isomeric, tables of, 22:48464
half-lives of, methods for accurate measurement of, 22:29990
half-lives of, table of, (E), 25:20368 (JAERI-Memo-4189)
half-lives of, use of prediction analysis in designing experiments for measuring, 22:18338
Hartree—Fock approximation for spherical, dependence on two-body interaction, 25:7911
Hartree—Fock calculations for deformed light, review of, 22:22651
Hartree—Fock calculations for N = Z even, of 2s-1d shell, parity-mixed, 25:17992
Hartree—Fock energy gap in deformed, for Rosenfeld interaction, 25:17978
hazards of cosmic, in manned space missions, 22:6919
heavy fragment emission from highly excited, (T), 22:14513 (BNL-50057, pp 60-78)
heavy ion anelastic scattering by Z = 8 to 26, macroscopic model for, (T), 25:12661
heavy ion elastic scattering by light, (E/T), 24:49720
heavy ion elastic scattering by, effective Schroedinger equations for, (T), 25:46141
heavy ion scattering by, analysis using semi-classical approximation, 24:20441
heavy ion scattering by, research on, 24:43599
heavy-ion elastic scattering by identical, resonant exchange of nucleons in, (T), 24:49741
heavy-ion reactions (HI,xn) with 100 less than or equal to A less than or equal to 150, Alexander and Simonoff's semiempirical rule for cross sections for, (E/T), 25:39029
heavy-ion reactions (HI,xn) with fissionable, product identification by means of angular distributions, (E), 25:20419
heavy-ion reactions at 210 MeV with intermediate, cross sections for delayed protons from, (E/T), 25:28300 (CERN-70-30(Vol.1), pp 457-86)
heavy-ion reactions with light, nucleon clusters in, (T), 24:49754
heavy-ion reactions with, compound nucleus production in, (T), 24:49818
heavy-ion reactions with, in sub-Coulomb energy region, transfer, (T), 24:49801
heavy-ion reactions with, production of transmendelevium elements by, 24:48124
heavy-ion reactions with, transfer of two particles in, (T), 24:49739
heavy-ion scattering by, Coulomb and nuclear excitation interference effects in, (T), 24:49808
heavy-ion scattering by, Coulomb distortion in, (T), 24:13415
heavy-ion scattering by, distortion of Coulomb excitation in, (E/T), 24:49817
heavy-ion scattering by, statistical model for, 24:52726
helium-3 elastic and inelastic scattering by light, exchange effects in, (T), 24:1756
helium-3 elastic scattering at 10 to 40 MeV by A = 40 to 210, optical-model analysis of, (E/T), 25:17823
helium-3 elastic scattering below 40 MeV by A > 40, optical-model potential for, 25:53716
helium-3 elastic scattering by A = 12 to 207, analysis using optical potential, (T), 25:3769
helium-3 elastic scattering by calculation of optical potentials for, 25:17987
helium-3 elastic scattering by medium-weight, testing optical model by, (E/T), 21:11991(R) (UCOL-535-561)
helium-3 elastic scattering by Z = 6 to 50, analysis using strong absorption model, (T), 24:52539
helium-3 elastic scattering by Z = 6 to 50, at 29 MeV, (E), 21:13818
helium-3 elastic scattering by, diffraction-model analysis of, (T), 23:37340
helium-3 elastic scattering by, optical potential for, (T), 25:50853
helium-3 elastic scattering by, optical-model analysis of, (E/T), 22:39686 (CONF-670970-, pp 41-96)
helium-3 elastic scattering by, optical-model analysis of, (E/T), 22:39685 (CONF-670970-, pp 13-39)
helium-3 elastic scattering by, optical-model analysis of, (T), 22:48615
helium-3 elastic scattering by, review of polarization effects in, 25:53839
helium-3 inelastic scattering by medium-weight, (E/T), 21:11991(R) (UCOL-535-561)
helium-3 reactions (^{3}He,d) with light, peripheral model in pole approximation for comparative analysis of differential cross sections for, 24:3845
helium-3 reactions (He-3,2p) with, DWBA treatment of, 21:40507
helium-3 reactions (He-3,α) with, normalization constant in, (T), 24:49845
helium-3 reactions (He-3,α), (He-3,d), and (He-3,p) with, DWBA analysis of, (E/T), 22:39685 (CONF-670970-, pp 13-39)
helium-3 reactions (He-3,αγ) with, review of angular correlation experiments on, 24:28714
helium-3 reactions (He-3,d) with light, transfer amplitudes in DWBA and vertex functions for, 25:17974
helium-3 reactions (He-3,d) with, cross-section calculations using Ohmura three-body wave functions, 21:25578
helium-3 reactions (He-3,dγ) with, equipment and methods for angular correlation measurements in, (E), 23:47886
helium-3 reactions (He-3,n) with p-shell, analysis for distortion and polarization effects in, (T), 25:15192
helium-3 reactions (He-3,n) with, calculations using pairing potential, (T), 22:44787
helium-3 reactions (He-3,p) with 1p-shell, pole and four-point diagrams for, (T), 21:10121
helium-3 reactions (He-3,p) with light, isospin pairing collective excitations in, (T), 24:20423 (JAERI-1184, pp 83-7)
helium-3 reactions (He-3,p) with odd—even, isospin effects on angular distributions from, (T), 25:59741
helium-3 reactions (He-3,p) with, DWBA calculations of angular distributions for, (T), 23:15492 (IKF-19)
helium-3 reactions (He-3,t) with N = 28 even, microscopic analysis of, (T), 24:49702
helium-3 reactions (He-3,t) with quasielastic scattering, angular distributions of differential cross sections for, (T), 22:9962
helium-3 reactions (He-3,t) with, analysis of quadratic spin-orbit effects in, (T), 25:53858
helium-3 reactions (He-3,t) with, selective orbital angular momentum transfer in, (E), 24:20322
helium-3 reactions with A = 12 to 28, excitation functions for beryllium-7 production in, (E), 21:5520
helium-3 reactions with A = 4 to 260, tables of threshold energies for, 21:27577 (UCRL-14004)
helium-3 reactions with, analysis for imaginary isovector term in optical potential for, (T), 25:28461
helium-3 reactions with, analysis of helium-3 break-up using adiabatic approximation, (T), 23:37310
helium-4 elastic scattering by, calculation of angular distributions for, with account for inelasticity, (T), 22:16073
hyperfine fields in ferromagnetic materials at implanted, review, 25:17273 (COO-7-585)
hyperfine interaction of excited states in, research using pulsed beam technique with resonance of perturbed angular correlation, (E/T), 22:44797
hyperfine magnetic fields in crystal lattices, dissertation summary on research using γ angular correlations, (E), 22:39659
hyperon (A) binding energy in 1p-shell, effect of density dependent N—N forces on, (T), 24:30948
hyperon (A) binding energy in, Bethe—Goldstone and Green function formulations for, 24:52128
hyperon (A) binding energy in, corrections to, (T), 21:5569
hyperon (A) binding energy in, effect of A → Σ conversion on, 24:52121
hyperon (A) binding energy in, effect of two-pion-exchange ANN force on, 22:3459
hyperon (A) binding energy in, from hyperfragment decay, (E/T), 22:5508
hyperon (A) binding energy in, A—N potentials for, 22:52991
hyperon (A) binding in, reaction-matrix calculation of, 24:49959
hyperon (A) reactions in freon bubble chamber, cross sections for, (E), 24:15467
hyperon (Σ$^-$) capture at rest in emulsions, model for hyperfragment production from, (E/T), 22:7437
hyperon (Σ$^-$) reactions at rest in emulsions, hyperfragment production from, (E), 24:21934
hyperon stability in, (T), 24:24405
independent-particle mode coupling to even vibrating core in odd-A spherical, 21:42721
instability of spheroidal super-heavy, 22:46826
intensity enhancements of interplanetary shock-associated Z greater than or equal to 3, 1967—1968, (E), 25:7223
intensity variations of cosmic primary, during Feb. 1964 to Feb. 1965, (E), 21:31273
intensity variations of cosmic, in geomagnetic equator region, (E), 21:31270
intensity variations of primary cosmic, (E), 21:31267
interaction mean free paths and fragmentation probabilities of heavy, above 10 GeV/nucleon in emulsions, (E), 25:36394
interaction mean free paths and fragmentation probabilities of heavy cosmic, above 10 GeV/nucleon in air and hydrogen, emulsion study of, (E/T), 25:36394
interaction of collective degrees of freedom in, 21:1139
interaction of cosmic high-energy heavy, with radiation in expanding Universe, (T), 24:12619
interaction of two identical dipole, in molecules, (T), 21:33117 (JINR-P4-3297)
interactions in 2p/sub 3/2/-1f/sub 7/2/, (E), 21:7763
interactions in, bilinear form from infinitesimal operators of U(3(n-1)) group for central internuclear, (T), 24:30912
interactions in, bilinear irreducible structure from infinitesimal operators of U(3(n-1)) and internuclear, (T), 24:30913
interactions of heavy, effect of nuclear forces on Coulomb barrier in, (T), 25:7923
interactions of heavy, electron pair production in, 23:46257

interactions of loosely-bound, with external electromagnetic field, 23:3669
interactions of system of four, rotational energy of, (T), 23:32592 (ITF-68-76)
interactions with neutrons, 24:40606(R) (IN-1317)
interactions with nuclei of heavy primary cosmic, (E), 23:51398 (AD-689283)
intermediate-vector boson reactions with, μ flux in deep mines as evidence against hypothesis for strong interactions in, (T), 25:14735
internal conversion coefficients and particle parameters for Z = 60, 64, 68, 72, 76, 80, 84, 88, 92, and 96, tables of, (T), 22:7738 (COO-1420-137)
internal conversion coefficients at 50 keV to 10 MeV for Z = 3 to 30, (E/T), 25:28271
internal conversion coefficients for every fifth value from Z-30 to 100 and for lowest four electric and magnetic transition multipoles, table for K, (T), 23:40155
internal conversion coefficients for heavy even-even, measurement program on, (E), 22:32573 (MIT-2098-422, pp 69-94)
internal conversion coefficients for Z = 20 to 65, calculation of K, (T), 23:45003
internal conversion coefficients for Z = 30 to 103, tables of K-, L-, and M-, 22:24919
internal conversion coefficients for Z = 6 to 95, at gamma threshold energies, (T), 22:3773
internal conversion coefficients for, calculation of K and L, (T), 21:46791(T) (BNL-tr-122)
internal conversion coefficients for, comparison of theoretical predictions on, (T), 22:44789
internal conversion coefficients for, Hartree—Fock—Slater calculations of high energy K, (T), 23:4065
internal conversion coefficients for, method for determining cascade gamma ray, 22:7776
internal conversion coefficients for, tables of, 21:10045
internal conversion coefficients of, methods for determining, 21:4213
internal conversion electron particle parameters for E2 transitions in deformed rare-earth, (E), 22:27185
internal conversion in, electron-gamma directional correlations in, (T), 21:12074 (CEA-R-3025)
internal conversion in, nuclear structure effects on, (T), 21:35471
internal conversion in, structureless K- and L-shell particle parameters for, (T), 21:13931
internal conversion M/L and (N + O)/M ratios for E2 transitions in Z = 56 to 78, (E), 22:7730
internal conversion of, higher-order corrections to, (T), 25:5826
internal conversion particle parameters for Z = 30 to 103, tables of K-, L-, and M-, 23:4084
ion elastic and inelastic scattering cross sections for, (T), 21:5567
ion elastic scattering by, quasimolecular nuclear optical potentials for heavy, (T), 23:49480
ion elastic scattering with strong absorption and Coulomb interaction, heavy, (T), 23:1961
ion inelastic scattering with collective excitation, (T), 22:18333
ion inelastic scattering with Coulomb excitation, angular correlations for, (E/T), 21:44707
ion inelastic scattering with multiple Coulomb excitation, WKB calculations of quantal corrections for, (T), 23:23808
ion interactions with, formalism for spin-$^3/_2$, 25:5807 (LA-4465, pp 35.1-2)
ion reactions in nuclear emulsions at very high energy, multiply charged particle emission in, (E), 22:18334
ion reactions with rare-earth, spin distributions in, (T), 21:15624
ion reactions with, collection of products of, on perforated materials and filters, 24:43123
ion reactions with, description using Feynman diagram techniques for particle transfer, (T), 22:9965
ion reactions with, design and performance of gas-filled mass spectrometers for investigation of products from, 23:35545 (JINR-P13-4453)
ion reactions with, excitation function for neutron evaporation in, (T), 24:35897 (TID-25391)
ion reactions with, review of compound-nucleus theory of, (T), 23:11069
ion reactions with, review on heavy, 24:47680
ion reactions with, statistical-theory calculations of cross sections for nucleon-transfer, (T), 25:34171
ion reactions with, survey on heavy, 25:5817
ion scattering by, sub-Coulomb transfer in, (T), 24:49735
ion scattering with Coulomb excitation, (E/T), 21:19339
ionization from heavy cosmic, at SST and lower altitudes, (E), 23:34300
isobaric analog levels of heavy, description using interacting quasi-particle formalism, 21:38410
isobaric analog states in medium-weight, bound, 21:4326 (PUC-937-222)
isobaric analog states of isobaric, Coulomb energy systematics of, 21:4359
isomer ratios for, calculations using compound-nucleus statistical model, (T), 25:23069
isomeric states in spherical even—even, collective and two-particle, (T), 22:35404
isomeric transition probabilities for N = 81, M4, (E), 23:23734
isomeric transitions in stable, data tabulation for, 21:25465 (NIM-41)
isomeric transitions in, multipolarity assignment using L x-ray patterns, (E), 22:48541
isomeric transitions with half-lives of 10^{-6} to 10^{-1} sec in Z = 63 to 83, research on, (E), 22:35285(R) (AERE-PR/NP-13)
isomers of Z = 83 to 92, cross sections for production of spontaneously fissioning, (E), 25:28306 (CERN-70-30(Vol.1), pp 575-87)
isospin mixing in even—even, (T), 25:15159
isotope shift in heavy, calculations using WKB approximation, (T), 21:4350
isotope shifts for isobaric pairs of, nuclear properties from, (T), 25:31404
isotope shifts from neutron addition, description using Hartree—Fock formalism with density-independent nucleon—nucleon potential, (T), 22:30049 (PUC-937-314)
isotopic ratio measurements of short-lived, use of mass spectrometers for, 21:36463
isotopic shift in spherical, (T), 21:2798
kinematics for proton-induced cascades at 660 MeV, (T), 22:22629
lepton reactions with, differential cross section for trident production in, (T), 21:18964
level densities from excitation functions of isolated levels, (E/T), 24:6878
level densities in Fermi gas formalism for A = 30 to 65, energy dependence of, (T), 23:21321
level density in heavy, energy dependence of, (T), 23:25951
level density in, (T), 22:5876
level density parameter in A = 24 to 48, 22:20686
level density parameters for, energy dependence of, (E/T), 23:19266
level spacings from neutron capture cross sections, average, (E/T), 23:8969
Lie algebra for, state labeling and matrix representation constructions of G_2, (T), 25:1579
lifetime analysis of, correction of moment method for finite range of integration for, 22:46847
lifetime measurements for, review on Doppler shift attenuation method for, 24:43557
lifetime predictions for super-heavy, with Z = 104 to 115, (T), 22:7775
lifetimes of heavy deformed, delayed coincidence method for measuring, (E), 25:28353 (NP-18695)
lithium-6 ion reactions (Li-6,p) with spherical and deformed, finite range calculations for, (T), 23:49482
lithium-6 reaction (Li-6,p) with, finite-range calculations using Gaussian two-particle residual interaction, (T), 22:14073 (JINR-E4-3624)
lithium-6 reactions (Li-6,α) with light, spectroscopic factors for, (T), 22:24895 (JINR-E4-3742)
lithium-6 reactions (Li-6,d) with light, at low energy, (T), 22:15951 (JINR-P4-3681)
lithium-6 reactions with, direct, dissociation, and cluster transfer mechanisms of, (T), 24:49743
lithium-6 reactions with, survey of research on, 24:28716
lithium-7 reactions with, direct, dissociation, and cluster transfer mechanisms of, (T), 24:49743
lithium-7 reactions with, survey of research on, 24:28716
magic regions and masses for super-heavy, predictions of new, 21:1126 (UCRL-16843)
magic regions and masses for super-heavy, predictions of new, 22:32701
magic regions and masses for super-heavy, predictions of new, (T), 22:32701
magic regions for super-heavy, prediction of, (T), 21:1126 (UCRL-16843)
magnetic charge distributions in, description using theory of finite Fermi systems, (T), 22:32685
magnetic dipole γ-ray strength function for heavy deformed, calculation using Nilsson model with pairing and spin-spin interactions, (T), 23:47067
magnetic dipole interactions in deformed, 22:46817 (JINR-P4-3934)
magnetic dipole interactions in odd-A deformed, calculations using Tamm—Dancoff method, (T), 23:25910
magnetic dipole moment of odd-mass, meson two-body exchange-current effects on static, (T), 24:30867 (CEA-R-3960)
magnetic dipole moments and transition probabilities for strongly deformed, (E/T), 22:1747
magnetic dipole moments of odd-mass spherical, generalized Bohr-model description with core excitation for, 25:28499
magnetic dipole moments of, calculations using Wigner supermultiplet approximation, (T), 23:5958
magnetic dipole moments of, effects of nonlocal currents on, (T), 21:34068
magnetic dipole transition operators for quadrupole excitations in even-even, 21:2799
magnetic fields in solids, review of methods for determining internal, 22:35402
magnetic hyperfine anomaly, classical derivation of, 22:7169
magnetic moment of arbitrary spin, sum rule for, 21:27643
magnetic moment of spherical and deformed, use of spectra of mesic atoms for determining, 21:25263
magnetic moments and spins of short-lived, methods for determining, (E), 25:27914 (CERN-70-30(Vol.1), pp 361-81)
magnetic moments for excited states of, (T), 22:14091
magnetic moments of complex, consistent treatment in one-boson-exchange model for N + N exchange currents for corrections to, 23:51950 (DESY-69/28)
magnetic moments of deformed A = 150 to 190, (T), 22:24904
magnetic moments of deformed, corrections for spin-orbit interaction, (T), 21:38415
magnetic moments of deformed, effects of spin—orbit and spin—spin forces on, 25:3692
magnetic moments of ground states of odd-A spherical, (T), 23:10989
magnetic moments of $_{71}$Lu($^7/_2$) and mirror, comparison between calculated and experimental, 21:26973 (PUC-937-257)
magnetic moments of odd-A, effects of interaction currents on, (T), 23:11067
magnetic moments of spin-1 and -$^3/_2$, sum rule for, 21:2804
magnetic moments of two-quasiparticle states of deformed, 21:44799
magnetic moments of, effects of N_{11}* isobar on, (T), 25:39076
magnetic moments of, measurement using Coulomb recoil implantation in ferromagnetic foils, (T), 21:38388
magnetic moments of, spin-orbit corrections to, (T), 21:44780
magnetic moments, g factors, and hyperfine fields of intermediate and heavy, review of measurement of, (E/T), 25:39050
magnetic octupole moments of, effect of pairing correlations on, (T), 21:30060
magnetic properties of, effects of spin polarization on, (T), 22:46829
magnetic resonance of polarized beta-emitting, (E), 21:33907
magnetic resonance structures in dynamic polarization of, with broadened ESR line, 22:31963
magnetization vector for spin-1 quadrupolar, interacting with electric-field gradients, (T), 21:46802
mass difference for A = 40, (E), 22:13973
mass difference of mirror, effects of anomalous magnetic moment of nucleons on, (T), 23:45009
mass differences for 82 less than or equal to N less than or equal to 126, (E), 23:21371
mass distribution beyond charge distribution in, from optical model analysis of neutron elastic scattering, (T), 22:50679
mass distribution in, A-dependence of, (T), 21:35524
mass distribution in, determination using isobaric analog resonances, (T), 25:20534
mass equation for A = 9, 13, 17, and 21, cubic term in isobaric multiplet, (T), 25:5840
mass formula for deformed, development of semiempirical, 22:30089
mass formula for extreme neutron-rich, (T), 25:24742
mass formula for, liquid droplet, (T), 25:30036(R) (NYO-3962-3)
mass formula for, volume, surface, and symmetry terms in semi-empirical, (T), 25:36821
mass formulae for, (T), 24:23548(R) (NYO-3962-2)
mass formulas for neutron-rich, pairing and shell corrections for, (T), 25:28293 (CERN-70-30(Vol.1), pp 275-306)
mass formulas for, approaches to, (T), 22:30072
mass formulas for, approaches to, (T), 22:30065
mass formulas for, microscopic approach to semi-empirical, (T), 22:30076
mass hexadecapole moments of 2s, 1d shell, Hartree—Fock—Bogolyubov calculations of, (T), 25:10008
mass law for, derivation of Bethe—Weizsaecker, (T), 23:9065
mass law for, formalism using liquid drop model with deformation, pairing-energy, and shell corrections, 22:1710 (LA-3751)
mass law for, formalism using liquid-drop model with Thomas—Fermi method, (T), 21:42684 (UCRL-17725)
mass law for, formulation using liquid-drop model with shell and deformation corrections, (T), 23:23770
mass law for, shape dependence of liquid-drop term in, (T), 23:31061
mass law for, testing by r-process theory of nucleosynthesis, 21:42679 (LA-DC-8950)
mass law for, Thomas-Fermi formulation of, (T), 23:23769
mass laws for, comparison of, (T), 23:23764
mass laws for, formulations using different nuclear models, (T), 23:3972
mass measurement of, ion cyclotron resonance method for, 24:30935
mass measurements for A = 133 through 153, (E), 23:21372
mass numbers of, from heavy ion-induced reactions with multiple neutron emission, determination from excitation functions, (T), 22:16056 (JINR-P7-3657)
mass of light, nuclear drop model for formula for discrepancies in spectroscopic data for, 22:32681
mass of, comparison of formulas for calculating, (T), 23:42999
mass of, computer program for table look-up of, 25:5735
mass of, electron rest mass as universal constant for, 24:20089
mass predictions for A > 140, methods development for, (T), 23:15430(R) (MNC-3783-2)
mass relations, 21:38377(R) (PUC-937-260)
mass relations from O_h symmetry, (T), 22:30055
mass tables for A > 212, 23:21366
masses and stability of heavy, predictions from nuclear systematics, (T), 23:21365
masses for A = 130 through 208, 24:1825
masses for A less than or equal to 80, table for, 23:30922 (KFK-829)
masses for isobaric multiplets of, (E/T), 24:13413
masses of deformed, development of semiempirical formula for, (T), 22:30089
masses of Garvey—Kelson, liquid-drop, and shell-model equations for, (T), 25:28291 (CERN-70-30(Vol.1), pp 165-216)
masses of highly neutron rich and deficient, methods for studying, 23:21368
masses of highly unstable, extrapolation procedures for determining, (T), 25:28292 (CERN-70-30(Vol.1), pp 263-73)
masses of neutron-rich, (T), 25:55678
masses of odd-A, derivation of liquid-drop formula for, (T), 25:43916
masses of super-heavy, prediction of, (T), 21:1126 (UCRL-16843)
masses of Z > N, (T), 21:7700
masses of, calculations using liquid-drop model with shell terms based on Nilsson model with Strutinsky normalization and BCS pair correlations, (T), 25:28441 (CERN-70-30(Vol.1), pp 217-62)
masses of, method for direct determination of, 25:26547 (CERN-70-30(Vol.1), pp 307-19)
masses of, shell effects in, (T), 21:15635

masses of, shell-model approach to formulas for, (T), 22: 30090
masses of, theory of anomalies in, (T), 22:32702
mean square radii of, determination from proton elastic scattering using optical model, (T), 22:30100
meson (K) capture in K-mesic atoms, (T), 21:42695
meson (K) double charge-exchange reactions with light, cross sections for, (T), 25:9974 (JINR-P2-5286)
meson (K) elastic and inelastic scattering above 50 MeV, tables for cross sections and total cross sections for, (E), 24:20085
meson (K) reactions above 50 MeV, cross-section data compilation for, 23:19330(T) (ORNL-tr-2073)
meson (K) reactions above 50 MeV, cross-section data compilation for, 23:5944 (JINR-P2-4068)
meson (K) reactions at 1 to 900 GeV, cross sections and resonances in coherent production of particles in, (E/T), 24:47481
meson (K) reactions at high energies, charge and mass distributions in nuclei from charge-exchange, 23:36954
meson (K) reactions at low energies, reaction-matrix method and statistical model of, 25:30906
meson (K) reactions with, properties of, 22:18110
meson (K) reactions with, quark model for relations between differential cross sections for neutral vector meson production in γ reactions with nuclei and total cross sections for, (T), 25:1442 (ITF-70-40)
meson (K) reactions with, Regge-pole model for high-energy, 21:42395
meson (K) reactions with, review of diffractive processes in, (T), 25:17501
meson (K^0) regeneration amplitude on, test of Pomeranchuk theorem from, 24:33019
meson (K^0) regeneration on, predictions from Pomeranchuk theorem for K + N interactions for, 24: 28551
meson (K^0) regeneration on, spin effects in, 22:13714 (JINR-P2-3621)
meson (K^-) absorption at rest in emulsion, Q-value distribution for detection of A-He^3, A-Li^6, and A-Be^9 produced in, (E), 25:36401
meson (K^-) absorption at rest in emulsions, properties of Σ^- and Σ^+ produced in, (E), 25:36400
meson (K^-) absorption at rest, extrapolation of $K^- + p$ interactions below threshold from, (T), 25:30902
meson (K^-) absorption by complex, role of Y_0^* resonance in, (T), 23:40104
meson (K^-) absorption by heavy neutron halo studies by, (E/T), 25:7847 (ORNL-4513)
meson (K^-) absorption by, implications for neutron distribution, (E/T), 23:13342
meson (K^-) capture at rest in diamond-loaded emulsions, separation into light and heavy nuclei, charged $\Sigma\pi$ pair, and Σ^+ and Σ^- production from, (E), 24:6693
meson (K^-) capture by emulsion nuclei, evidence for neutron distribution in surface of heavy nuclei from, 21:25490
meson (K^-) capture by emulsion, evidence for neutron excess in surface of nuclei from, 21:25489
meson (K^-) capture by heavy, as evidence for neutron halo, (T), 23:40140
meson (K^-) capture by nuclei from atomic orbitals, rates of peripheral, 25:1570
meson (K^-) capture by, approximations in calculation of rates of, 22:44442
meson (K^-) capture by, description of, (E/T), 23:19339 (RHEL/R-166, pp 129-40)
meson (K^-) capture by, x-ray spectra for, (E), 23:47045 (UCRL-18891)
meson (K^+) elastic scattering at 240 to 300 MeV in emulsions, optical model analysis of, 22:18323
meson (K^-) interactions $K^- + (Z,N) \rightarrow$ eta + (Z-1,N,A) in, tests of unitary symmetry by, 21:33750
meson (K^-) interactions $K^- + (Z,N) \rightarrow \pi^- + (Z,N-1,A)$ in, tests of unitary symmetry by, 21:33750
meson (K^-) interactions with emulsion, at 1.5 GeV/c, general characteristics, production, and decay of hyperfragments from, 21:25244
meson (K^+) reactions at 0 to 5 GeV/c in emulsions, rates for hyperfragment production from, (E), 25:38655
meson (K^-) reactions at 1.5 and 3.5 GeV/c, Monte Carlo calculation of lifetime of heavy hyperfragments from, 24:42991
meson (K^-) reactions at 1.5 GeV/c in emulsions, binary hyperfragment production from, (E), 22:17877
meson (K^-) reactions at 1.5 GeV/c in emulsions, very short-range hyperfragment production from, (E), 22: 32066
meson (K^-) reactions at 1.5 GeV/c in nuclear emulsions, hammer tracks of helium-8 fragments from, (E), 22: 15688
meson (K^-) reactions at 1.5 to 10.1 GeV/c in emulsions, Monte Carlo calculations for double production of lithium-8 in, (E/T), 24:37624
meson (K^-) reactions at 1.5, 3.0, 5.0, and 10.1 GeV/c with, hyperfragment production in, (E), 23:8754
meson (K^+) reactions at 10 GeV in heavy-liquid bubble chambers, $Q^+(1275)$ enhancement and K(890) in coherent production of $K^+\pi^+\pi^-$ systems in, (E), 25: 19913
meson (K^+) reactions at 10 GeV/c in heavy-liquid bubble chamber, cross sections and momentum transfer distributions for coherent production of $K2\pi$, $K3\pi$, and $K4\pi$ systems in, (E), 25:19913
meson (K^+) reactions at 10 GeV/c in heavy-liquid bubble chambers, cross sections for $Q^+(1275)$ + N interactions in nucleus in, (E/T), 25:19913
meson (K^-) reactions at 3, 5, and 10.1 GeV/c in emulsions, lithium-8 production from, (E/T), 23:14981
meson (K^-) reactions at 3.0 GeV/c in emulsions, hyperfragment production in, (E), 25:5277
meson (K^-) reactions at 3.0 to 10.1 GeV/c in emulsions, double hyperfragment production and decay from, (E), 22:13664
meson (K^-) reactions at 40 GeV/c, absorption cross sections for, (E), 24:1511
meson (K^-) reactions at 5.5 to 12.7 GeV/c in bubble chamber, Q^-—N total cross section determination from $K^-\pi^+\pi^-$ system production in, (E), 24:51979
meson (K^-) reactions at 5.5 to 12.7 GeV/c in heavy-liquid bubble chamber, K(890) and Q coherent production in two-, three-, four-, and five-meson states from, (E), 25:33551 (LAL-1244)
meson (K^-) reactions at 5.5 to 12.7 GeV/c, total cross sections for $Q^- + N$ interaction from coherent production of Q^- in $K\pi\pi$ final states from, 25:47756
meson (K^-) reactions at 6 GeV/c in emulsions, production of Ξ-B^{11} and $\Lambda\Lambda$-C^{11} from, (E), 24:47381 (CONF-690557-(Vol.2), pp 758-75)
meson (K^-) reactions at 6 GeV/c in emulsions, spallation model for hypernuclei production from, (E/T), 22: 5508
meson (K^-) reactions at rest and 1.5 GeV/c in emulsions, Λ binding energy in $Z > 4$ hyperfragment production from, (E), 23:14965
meson (K^-) reactions at rest in emulsions, Λ-He^5 hyperfragment decay mode determination from, (E), 22:34848 (NP-17481)
meson (K^-) reactions at rest in emulsions, production of (Σ^-n) bound state from, (E), 22:7450
meson (K^-) reactions at rest in emulsions, search for Λ—He^{5*}, Λ—Li^6, and Λ—Be^{9*} production in, (E), 24: 32964
meson (K^-) reactions in nuclear emulsions, spallation model for hyperfragment production in, (T), 22:27253
meson (K^-) reactions with light, pair absorption model for, 22:29721
meson (K^-) reactions with nuclei, production of Ξ-Z hyperfragments in, 23:10831
meson (μ) absorption by, asymmetry of neutron emission in, (T), 21:10117
meson (μ) capture by complex, Primakoff plot for, (T), 21:12091
meson (μ) capture by light zero-spin, γ spectra and partial rates for, (E), 23:13245
meson (μ) capture by, analysis using UFI theory, (T), 23:46941 (NP-17979)
meson (μ) capture by, angular correlations between momentum transfer and emitted nuclear fragments in, 23:45006
meson (μ) capture by, angular distribution of neutrinos from, (T), 21:44792
meson (μ) capture by, calculations using shell-model formulation of Migdal's theory, 21:35517
meson (μ) capture by, description using shell model with universal Fermi interaction, 21:31829 (COO-1573-13)
meson (μ) capture by, elementary particle theory for, 21:31555 (NP-16795)
meson (μ) capture by, elementary-particle theory of, 22: 3351
meson (μ) capture by, gamma—neutrino correlations in polarized, (T), 22:14117
meson (μ) capture by, induced pseudoscalar form factor in, (T), 22:5898
meson (μ) capture by, interaction mechanism in, (T), 23:44967
meson (μ) capture by, lectures on Migdal formalism for, (T), 22:48625
meson (μ) capture by, neutron asymmetry in polarized, (T), 24:11039
meson (μ) capture by, relation to neutrino scattering, (T) , 24:40344
meson (μ) capture by, second-order corrections to amplitudes for, (T), 21:7706
meson (μ) capture by, T nonconservation in, (T), 21: 4003 (INP-494/PL/PH)
meson (μ) capture by, time dependence of particle correlations in, (T), 24:52663
meson (μ) capture by, two-particle correlation function in Fermi gas model for, 22:24913
meson (μ) capture by, weak interaction coupling constants for, (T), 23:17132
meson (μ) capture matrix elements for closed-shell, effects of spin-orbit force on, (T), 21:31728
meson (μ) capture rates in double-closed-shell, effects of SU(4) breaking on, 24:37842
meson (μ) elastic scattering by, quantum electrodynamics test from, 22:5636
meson (μ) energy levels in mesic atoms, perturbation calculations for, (T), 22:48618
meson (μ) inelastic scattering at 50 to 1000 MeV/c, radiative background in, (T), 23:9019 (TID-24667, pp 265-7)
meson (μ) reaction with, as probe of nuclear structure, review of, 24:24679
meson (μ) reactions at 10.5 GeV in emulsions, total and differential cross sections for meson production in, (E), 24:12922
meson (μ) reactions at 10^{13} to 10^{14} eV in atmosphere, installation for studying wide-angle shower production from, (E), 25:429
meson (μ) reactions at 100 GeV, proposed experiment for search for W production in, 24:51913 (TID-25473(Vol.4), pp 191-9)
meson (μ) reactions at 100 GeV/c, search for heavy meson (μ) from wide-angle bremsstrahlung in, (E), 24: 6746 (PURC-2137-15)
meson (μ) reactions at 12 GeV/c in emulsions, total cross sections for particle production in, (E), 25:17367
meson (μ) reactions at 4.9 to 15.9 GeV/c in emulsions, diffractively produced rho in, (E), 25:33526
meson (μ) reactions at 6 and 12 GeV in emulsions, K values from multiple Coulomb scattering in, (E), 24: 37609
meson (μ) reactions with Coulomb field of, cross section for bremsstrahlung production in, (T), 21:2408
meson (μ) reactions with Coulomb fields of high-Z, ω, phi, and rho production from, (T), 21:2409
meson (μ) reactions with nuclei at 50 to 100 GeV, coherent, incoherent, and inelastic cross sections for W-meson production in, (T), 25:3340
meson (μ) reactions with, cross section for electron pair production in, 21:31883
meson (μ) scattering at 2.5 to 14.8 GeV/c at small angles in emulsions, multiple scattering techniques and particle energy determination from angular distributions in, (E), 25:12089
meson (μ^-) absorption by nuclei, asymmetry and spectrum of high-energy neutrons emitted in polarized, 23:42636
meson (μ^-) capture at high energies, relativistic effects on, (T), 22:13728
meson (μ^-) capture at rest in emulsions, high-energy proton spectrum from, (E), 24:35860 (ITEF-707)
meson (μ^-) capture by complex, coupling constants and nuclear structure from, (T), 22:16077
meson (μ^-) capture by complex, theory for, 23:44965
meson (μ^-) capture by complex, weak interaction theory for, 21:44331 (JINR-P2-3258)
meson (μ^-) capture by heavy, independent-particle shell model for systematics of, (T), 22:30098
meson (μ^-) capture by heavy, processes during, (T), 21: 41820
meson (μ^-) capture by light, (E/T), 23:10939 (JINR-E4-4092)
meson (μ^-) capture by light, calculations using Fermi gas model, 21:27530
meson (μ^-) capture by light, universal V—A theory for, 22:5577
meson (μ^-) capture by nuclei, interaction constants for, (T), 22:13717
meson (μ^-) capture by, angular correlations in, 22:11987
meson (μ^-) capture by, angular distribution of nuclear recoils and emitted neutrons from, 23:15062
meson (μ^-) capture by, complex resonance mechanism for neutron angular distribution symmetry, energy spectra, and charged particle emission from, (T), 23: 52169 (JINR-E4-4601)
meson (μ^-) capture by, conference on, 21:41819
meson (μ^-) capture by, coupling constants in, 21:4201
meson (μ^-) capture by, description using Migdal theory, (T), 22:27389
meson (μ^-) capture by, Doppler effect and internal bremsstrahlung in, (T), 25:53629
meson (μ^-) capture by, effect of short-range correlation in, (T), 25:56824 (LYCEN-7104, C4.1-17)
meson (μ^-) capture by, elementary particle formalism for, 24:5280
meson (μ^-) capture by, equality of matrix elements for, 23:15518
meson (μ^-) capture by, gamma—neutrino angular correlation from, (T), 21:27538
meson (μ^-) capture by, giant-resonance excitations in, (T), 21:21473
meson (μ^-) capture by, hyperfine effects in radiative, (T), 24:35928
meson (μ^-) capture by, induced pseudoscalar coupling in, 24:5281
meson (μ^-) capture by, lectures on models for, (T), 25: 56809 (CERN-71-14, pp 67-99)
meson (μ^-) capture by, method for measuring neutrino—gamma angular correlations in, 22:7764
meson (μ^-) capture by, neutron and recoil angular distributions from, (E/T), 23:17147
meson (μ^-) capture by, neutron angular distribution from polarized, (T), 21:34031(R) (ORO-2915-79)
meson (μ^-) capture by, neutron angular distribution from, (T), 22:27256
meson (μ^-) capture by, neutron asymmetry from $\mu^- + p \rightarrow n + \tau$ interactions in, (T), 22:13716
meson (μ^-) capture by, neutron asymmetry from, (T), 21:17388 (JINR-P4-3153)
meson (μ^-) capture by, nuclear Coulomb effects on induced pseudoscalar interaction in, (T), 24:42928
meson (μ^-) capture by, nuclear structure research with, (T), 23:13320
meson (μ^-) capture by, particle correlations and hyperfine effects in, (T), 24:52687
meson (μ^-) capture by, radiative, (T), 21:42373
meson (μ^-) capture by, radiochemical techniques for rate to all particle-stable final states in, (E/T), 25:53813 (LA-DC-12780)
meson (μ^-) capture by, resolution effect in τ—γ correlation measurements in, 25:23846
meson (μ^-) capture by, resonance mechanism in, 24: 52685
meson (μ^-) capture by, review of elementary particle theory for, 22:18314
meson (μ^-) capture by, review of weak interaction theory for, 21:42329
meson (μ^-) capture by, review of weak interaction theory for, 22:15739
meson (μ^-) capture by, review of, (T), 23:49083
meson (μ^-) capture by, Siegert theorem for, 22:9568
meson (μ^-) capture by, system of NE 213 liquid scintillation with neutron—gamma discrimination for determining, 23:16121
meson (μ^-) capture by, theory using Nilsson model or shell model for initial and final nuclei, (T), 23:4071
meson (μ^-) capture by, use of spark chambers for studying, 21:16111 (CONF-660918-, pp 79-81)
meson (μ^-) capture rates for, calculation using shell model, (T), 22:27394
meson (μ^-) capture with nuclear excitation, τ—γ correlations in, (T), 23:44968
meson (μ^-) inelastic scattering by, radiative corrections for, (T), 22:18345
meson (μ^-) radiative capture by, analysis of γ—γ angular correlations in, (T), 24:52686
meson (μ^+) reactions at 10.3 GeV in emulsions, structure functions for, (E), 25:3260
meson (μ^-) reactions at 15.9 GeV in emulsions, structure functions for, (E), 25:3260
meson (μ^-) reactions at 53 MeV in nuclear emulsions, search for conserved-vector-current mechanism in, (E), 22:14034
meson (μ^+) reactions at high energies, self-coupling of weak lepton currents in $\mu^+ + \tau$ + anti τ production in, 25:40939 (COO-264-560)

meson (μ^+) reactions at high energies, total W production cross sections in, (T), 25:17453 (COO-1573-73)
meson (μ^-) reactions in matter, (T), 25:31448
meson (μ^-) reactions with, polarization effects in W production from, (T), 24:52035 (TID-25473(Vol.4), pp 185-6)
meson (μ^-) reactions, lepton conservation in positron emission from, (T), 24:5277
meson (π) absorption at low energy, nucleon angular correlations from, (T), 21:46813
meson (π) absorption by light, lectures on, (T), 25:56810 (CERN-71-14, pp 155-228)
meson (π) absorption by, ambiguity of the Galilean-invariant operator for, (T), 23:34819
meson (π) absorption by, effect of final-state interactions on initial-state nucleon—nucleon correlations, (T), 23:37306
meson (π) absorption by, PCAC hypothesis for Kroll-Ruderman theorem for radiative, 24:38312
meson (π) absorption by, use in nuclear structure research, 24:52694
meson (π) absorption with double nucleon emission, orbital, (T), 21:34031(R) (ORO-2915-79)
meson (π) absorption with single-nucleon emission, Hartree—Fock analysis of, (T), 25:50857
meson (π) and nucleon reactions below 10 TeV, Monte Carlo method for intranuclear cascade with many-particle interactions from, 22:13770 (JINR-P2-3604)
meson (π) capture by, cross-section calculations using Fermi-liquid model, (T), 23:13331
meson (π) capture by, review of research on, 23:44966
meson (π) capture by, use in research on nuclear properties, (E/T), 23:9036 (TID-24667, pp 495-6)
meson (π) capture by, validity of soft-pion theorems for radiative, (T), 23:40118
meson (π) coherent dissociation $\pi \rightarrow 2\pi$ in field of, possible measurement of $\gamma + \pi \rightarrow 2\pi$ interaction cross sections from, (T), 22:32084
meson (π) double charge-exchange reactions with light, cross sections for, (T), 25:9974 (JINR-P2-5286)
meson (π) elastic and charge-exchange scattering by deformed, cross sections for, 24:52585
meson (π) elastic and inelastic scattering above 50 MeV, tables for cross sections and total cross sections for, (E), 24:20085
meson (π) elastic scattering by, lectures on forward dispersion relations for, (T), 25:56810 (CERN-71-14, pp 155-228)
meson (π) elastic scattering by, low-energy theorems for, (T), 25:20019 (LYCEN-7081)
meson (π) energy level transitions in medium-weight, study of 2p-level shifts and widths for 3d—2p, (E), 22:27040
meson (π) inelastic reactions above 1 GeV, change of cascade mechanism for, (T), 24:15599(T) (ORNL-tr-2258)
meson (π) inelastic reactions at 5 GeV, change of mechanism for, (T), 24:8668
meson (π) interactions at several hundred MeV, cross-section calculations using Glauber theory, (T), 25:20490
meson (π) interactions with, properties of optical potential for, (T), 25:31421
meson (π) interactions with, review of research on, 24:52690
meson (π) interactions with, soft pion theorem for, 24:52700
meson (π) multiple scattering by light, spin—isospin formalism for, (T), 24:40410 (RLO-1388-570)
meson (π) reactions (π,2π) with complex, (T), 24:49767
meson (π) reactions (π,2π) with, integral equations for, 21:35514
meson (π) reactions (π,γ) with light, nuclear structure from, (T), 22:3802
meson (π) reactions (π,N), 21:1020
meson (π) reactions (π,π^0) with, cross-section calculations using impulse approximation, (T), 24:26684
meson (π) reactions above 1 GeV, Monte Carlo method for multiparticle production in, 22:46424
meson (π) reactions above 100 GeV, one-fireball model for azimuthal correlations for, 24:42993
meson (π) reactions above 2 GeV, Glauber theory for double charge exchange in, (T), 25:50147 (JINR-P2-5865)
meson (π) reactions above 20 GeV, spectrometer and cloud chamber study of energy transfer to π^0 in, (E), 25:1405
meson (π) reactions above 5 GeV, mechanism for intranuclear cascade production in, (E/T), 23:51951 (JINR-P2-4662)
meson (π) reactions above 50 MeV, cross-section data compilation for, 23:19330(T) (ORNL-tr-2073)
meson (π) reactions above 50 MeV, cross-section data compilation for, 23:5944 (JINR-P2-4068)
meson (π) reactions and scattering at low energy, structure research using, (E/T), 22:18313
meson (π) reactions at 0.01 to 100 GeV, cascade evaporation model for Monte Carlo method for calculating, (T), 25:59508(T) (ORNL-tr-2514)
meson (π) reactions at 0.01 to 20 GeV in emulsions, Monte-Carlo calculations of intranuclear cascades from, (T), 24:10689
meson (π) reactions at 0.1 to 10 GeV, cross-section calculations using Glauber theory, 24:8926(T) (ORNL-tr-2235)
meson (π) reactions at 1 to 900 GeV, cross sections and resonances in coherent production of particles in, (E/T), 24:47481
meson (π) reactions at 100 to 1000 GeV, intranuclear cascade production in, (E/T), 24:52020
meson (π) reactions at 16 GeV/c, A_1 coherent production in, (E), 23:23368
meson (π) reactions at 20 GeV/c in emulsions, angular distribution of charged secondaries in, (E), 23:34545
meson (π) reactions at 50 GeV, cascade calculations for, (T), 24:35669
meson (π) reactions at 50 to 1000 GeV, review of multiparticle production in, (E), 25:5273
meson (π) reactions at 50 to 80 GeV in emulsions, intranuclear cascade model calculations for, 23:36952 (JINR-P2-4510)
meson (π) reactions at 60 GeV in emulsions, K/π ratio of secondaries in shower production from, (E), 25:14509 (INP-718)
meson (π) reactions at 60 GeV in emulsions, production of low-energy protons in, (E), 25:56429 (INP-754)
meson (π) reactions at 60 GeV/c in emulsions, helium production in, (E), 25:9660
meson (π) reactions at high and superhigh energies, cascade calculations for, (T), 25:1552 (JINR-E2-5282)
meson (π) reactions at high and superhigh energies, multiple-particle interactions, resonance production, and changes in nuclear matter density during intranuclear cascades from, (T), 24:1616 (JINR-E2-4607)
meson (π) reactions at high energies in emulsions, frequency distribution of heavy prongs from, (E), 22:7438
meson (π) reactions at high energies with intranuclear cascades, statistical calculations for inelastic, 23:30754(T) (ORNL-tr-2123)
meson (π) reactions at high energies, charge and mass distributions in nuclei from charge-exchange, 23:36954
meson (π) reactions at high energies, diffraction dissociation for πrho final state in, (E/T), 25:5386 (CONF-700314-, Paper 14)
meson (π) reactions at high energies, optical potential for, (T), 24:52141
meson (π) reactions at high energies, review of, (E), 25:7653 (CONF-690608-, pp 143-64)
meson (π) reactions at high energies, two-body correlation function for elementary cross section for, (T), 24:3706
meson (π) reactions at low and medium energies, lectures on, (T), 25:56807 (CERN-71-14)
meson (π) reactions in emulsions at 200 GeV, intranuclear cascade model for, 22:34980 (JINR-P4-3800)
meson (π) reactions in GeV range, excitation cross sections for energy-level transitions from, 22:35412
meson (π) reactions in mesic atoms, strong interaction effects on energy levels and wave functions from, 23:36503
meson (π) reactions in, properties of many-particle interactions from cascade production in, 22:29700(T) (ORNL-tr-1800)
meson (π) reactions near Δ(1236), optical model for, (T), 25:53225 (FRNC-TH-51)
meson (π) reactions with emulsion, at 200 GeV, coherent production of particles in, 21:27304 (INR-774/VI/PH)
meson (π) reactions with heavy, cross section for A_1 production in, 22:41809
meson (π) reactions with light, Adler self-consistency condition for, 23:28237
meson (π) reactions with nuclei above 6 GeV, coherent production of 3π state in, 23:23494
meson (π) reactions with nuclei at 100 to 1000 GeV, intranuclear cascade production in, (E/T), 24:52020
meson (π) reactions with nuclei at 45 to 200 GeV in emulsions, 3π and 5π production in, (E), 25:9635 (INP-722)
meson (π) reactions with nuclei below 18 GeV in emulsions, multiple production, (E), 22:7439
meson (π) reactions with nuclei, independent-particle model in Glauber theory for A_1 production from diffraction dissociation in, (T), 24:49532
meson (π) reactions with, absorption and dispersion corrections to πN optical potential for, 25:59516
meson (π) reactions with, activation experiments with, (E/T), 23:9041 (TID-24667, pp 637-9)
meson (π) reactions with, Adler—Weisberger sum rule and Goldberger—Treiman relation for, 23:4083
meson (π) reactions with, analysis using two-step cascade and evaporation model, (T), 24:3953(R) (ORNL-4433)
meson (π) reactions with, as probe of nuclear structure, review of, 24:24679
meson (π) reactions with, coherent and incoherent production of A_1 and A_3 in, (T), 24:10781
meson (π) reactions with, diffraction dissociation mechanism for A_1 resonance production from, (T), 21:23334
meson (π) reactions with, effect of nuclear radius on l > 0, (T), 23:34810
meson (π) reactions with, finite-mass correction to soft-pion limit for charge-exchange amplitude of, 23:32767
meson (π) reactions with, Foldy transformation for, (T), 23:28330
meson (π) reactions with, in atmosphere, (T), 22:21934
meson (π) reactions with, lectures on soft pion theorems for, (T), 25:56808 (CERN-71-14, pp 1-65)
meson (π) reactions with, nuclear structure research by, (E/T), 23:9040 (TID-24667, pp 611-25)
meson (π) reactions with, one-pion-exchange contribution to rho production by, (T), 21:30051
meson (π) reactions with, quark model for relations between differential cross sections for neutral vector meson production in γ reactions with nuclei and total cross sections for, (T), 25:1442 (ITF-70-40)
meson (π) reactions with, Regge-pole model for high-energy, 21:42395
meson (π) reactions with, research at Virginia Univ., 1970-71, (E), 25:38863(R) (ORO-4043-2)
meson (π) reactions with, review of data on, (E), 23:19141 (RHEL/R-166, pp 91-100)
meson (π) reactions with, review of diffractive processes in, (T), 25:17501
meson (π) reactions with, sigma-commutator term from, 25:47902
meson (π) reactions with, theory of charge-exchange, 25:43978
meson (π) reactions with, threshold singularities of internal bremsstrahlung spectrum for mechanism of, (T), 24:49373 (UJV-2439-F)
meson (π) reactions with, total cross sections for coherent pair production in, (T), 25:45768 (JINR-P1-5807)
meson (π) reactions with, two-step processes in, (T), 24:52691
meson (π) reactions with, use in nuclear structure research, (E/T), 23:19350
meson (π) reactions with, use in research on nuclear structure, (E/T), 22:20736
meson (π) reactions with, Veneziano model study of $\gamma + \pi \rightarrow \pi + \pi$ interactions from two-body meson (π) production from, 23:51892
meson (π) reactions, method for deriving angular correlations for rho production in, 22:41774 (NP-17531)
meson (π) scattering at 5 to 25 GeV/c, spark chamber for momentum analysis of, 21:16106 (CONF-660918-, pp 39-40)
meson (π) scattering by light, dispersion-relation approach to axial-vector nuclear sum rules and exchange effects in, (T), 25:39108
meson (π) scattering by light, spin and isospin effects in Glauber theory for, 24:52400
meson (π) scattering by, cross-section calculations using Fermi-liquid model, (T), 23:13331
meson (π) scattering by, elementary particle treatment of, (T), 24:15990
meson (π) scattering by, forward dispersion relations for, (T), 24:49769
meson (π) scattering by, nuclear structure research by, (E/T), 23:9040 (TID-24667, pp 611-25)
meson (π) scattering by, review lectures on nonvanishing pions in, (T), 25:56811 (CERN-71-14, pp 289-378)
meson (π) scattering by, scattering lengths for, (E/T), 25:9791
meson (π) scattering lengths for, (T), 24:6969
meson (π^0) interactions with heavy, energy transfer in, (E), 22:21938
meson (π^- and μ^-) capture by, excitation of giant resonance analogs in, 24:52679
meson (π^- and μ^-) capture rates for light, relation between, (T), 23:5805
meson (π^+ and π^-) absorption by, use of π^+/π^- cross-section ratio to test neutron density parameters, (T), 24:52692
meson (π^+ and π^-) reactions at 1 to 2500 MeV, computer program for intranuclear-cascade calculations of, (T), 25:36733 (ORNL-4564)
meson (π^-) absorption and charge-exchange reactions with, analysis using two-step intranuclear-cascade evaporation model, (T), 24:24630
meson (π^-) absorption by correlated nucleon pairs in complex, (T), 21:7478(R) (COO-1371-36)
meson (π^-) absorption by light, (E), 22:9781
meson (π^-) absorption by light, effects of nuclear distortion on nucleon emission in, (T), 22:18350
meson (π^-) absorption by light, with two-nucleon emission, (E), 22:13945
meson (π^-) absorption by nucleon pairs in, nucleon recoil energy distributions and rates of, 21:25584
meson (π^-) absorption by, multiple-scattering effects on nucleon-nucleon correlations from, (T), 24:6952
meson (π^-) absorption by, particle-hole model analysis of radiative, (T), 25:46144
meson (π^-) absorption by, shell-model calculation of, (T), 25:50856
meson (π^-) absorption by, short-range nucleon—nucleon correlations from shell-model description of, 25:9982
meson (π^+) absorption followed by single-nucleon emission, (T), 24:35902
meson (π^-) absorption with emission of two nucleons, (T), 22:27238
meson (π^-) absorption with two-nucleon emission, effects of short-range N—N correlations on, (T), 21:35526
meson (π^-) and (π^+) reactions with isoscalar, meson (π) electromagnetic structure from, (T), 21:27340
meson (π^-) and (π^+) reactions with, rho" daughter resonance detection in (T), 25:9786
meson (π^-) capture at 15 MeV in emulsions, double charge exchange in, (E), 22:46335 (JINR-P1-3946)
meson (π^-) capture by compound, pole model for, (T), 22:32676
meson (π^-) capture by, analysis of two-nucleon emission in, (T), 24:30941
meson (π^-) capture by, particle energy spectra from, (T), 23:7281(R) (ORNL-4280)
meson (π^-) capture by, use for observing volume collective excitations in nuclear matter, (T), 22:53224
meson (π^-) charge-exchange scattering by light, at 2.8 GeV/c in freon bubble chamber, cross section for, 21:25241
meson (π^-) diffraction and inelastic scattering at 3.5 GeV/c in emulsions, (E), 23:23379
meson (π^-) interactions at 16 GeV/c in C_2F_5Cl bubble chamber, coherent production of 5π final states from, (E), 23:7096
meson (π^-) interactions $\pi^- + (Z,N) \rightarrow K^0 + (Z-1,N,A)$ in, tests of unitary symmetry by, 21:33750
meson (π^+) interactions $\pi^+ + (Z,N) \rightarrow K^+ + (Z,N-1,A)$ in, tests of unitary symmetry by, 21:33750
meson (π^+) quasifree scattering at 117 MeV with proton emission from light, cross sections and angular distributions for, (E), 24:33118
meson (π^-) radiative absorption and meson (μ^-) capture by, relation between, 22:5552
meson (π^-) radiative absorption in, rescattering effects in, (T), 23:42983
meson (π^-) radiative capture by, relation between axial currents in nuclei and, (T), 23:42981
meson (π^-) radiative capture by, soft-pion theorem for, 24:49773

meson (π^-) reactions (π^-,2N) with double-magic, general formalism in terms of partial wave analysis for two-nucleon potential scattering for, 23:42982
meson (π^+) reactions (π^+,2p) at 40 to 260 MeV, missing-mass spectrometer for studying, 23:16143
meson (π^+) reactions (π^+,2p) at 60 MeV, mechanism of, (E/T), 21:44785
meson (π^+) reactions (π^+,2p) with 1p-shell, (T), 22:48475
meson (π^+) reactions (π^+,2p) with Z = 1 to 26 and 82, at 80 MeV, cross sections and proton spectra for, (E), 21:46667
meson (π^-) reactions (π^-,2$\pi^-\pi^+$) with, angular criteria for, (T), 25:53869
meson (π^-) reactions (π^-,eta) at 7.82 GeV/c, differential cross sections for, (E), 25:56432
meson (π^-) reactions (π^-,π^0) at 7.82 GeV/c, differential cross sections for, (E), 25:56432
meson (π^+) reactions (π^+,π^0) with complex, effects of p—n correlations on, 22:3460
meson (π^-) reactions (π^-,π^0) with complex, effects of p—n correlations on, 22:3460
meson (π^+) reactions (π^+,π^0p) at 112 MeV with light, kinematic analysis of, (E), 25:34005
meson (π^-) reactions (π^-,π^-n) with, method for analysis of, 21:27658
meson (π^+) reactions (π^+,$\pi\alpha$) and (π^+,πd) at 112 MeV with light, (E), 25:34002
meson (π^-) reactions above 100 GeV, interaction mechanism for multiple particle production from, (E/T), 23:51951 (JINR-P2-4662)
meson (π^+) reactions at 11.7 GeV/c in heavy-liquid bubble chamber, coherent production of $\pi^+\pi^+\pi^-$ in, (E), 25:50076
meson (π^-) reactions at 12 GeV/c in heavy-liquid bubble chamber, production of Δ^{++}(1236), rho^0(765), and rho rho π(2420) enhancement in, (E), 25:14562 (TID-25640)
meson (π^-) reactions at 15 and 16 GeV/c, 2π^+ and π^- final-state coherent production from, (E), 21:33609(R) (AD-637734)
meson (π^-) reactions at 15 and 16 GeV/c, cross sections for rho^0, f^0, and ω^0 production in, (E), 25:30741
meson (π^-) reactions at 16 GeV/c with, coherent production of $\pi^-\pi^0\pi^0$ final states in, (E), 22:44331
meson (π^-) reactions at 16 GeV/c, A$_1$ and rho production in 3π final states from, (E), 22:24565
meson (π^-) reactions at 16 to 200 GeV/c, energy dependence of cross sections for coherent production of 3π and 5π systems in, (E/T), 25:20029
meson (π^-) reactions at 16 to 60 GeV/c in nuclear emulsions, interaction lengths and cross sections for, (E), 25:47758
meson (π^-) reactions at 16.2 GeV in emulsions, (E), 25:7559
meson (π^-) reactions at 17 GeV in emulsions, selection technique for coherent, (E), 25:30736 (JINR-P1-5565)
meson (π^-) reactions at 17 GeV/c in emulsions, electron pair production from, (E), 22:5488
meson (π^-) reactions at 17.2 GeV in emulsions, coherent production of $\pi^-\pi^+\pi^-$ in, (E), 23:51865
meson (π^-) reactions at 17.2 GeV in emulsions, coherent production of mesons (π) in, (E), 23:18809
meson (π^-) reactions at 17.2 GeV in emulsions, properties of showers produced in, (E), 25:36418
meson (π^-) reactions at 17.2 GeV/c in emulsions, Monte Carlo calculations for double production of lithium-8 in, (E/T), 24:37624
meson (π^+) reactions at 185 to 295 MeV in emulsions, cross sections for π^- and π^+ production in, (E), 25:19919
meson (π^-) reactions at 2.94 GeV/c, direct production of electron pairs in, (E), 25:9661
meson (π^-) reactions at 3.5 GeV/c in emulsions, emission of hammer tracks from, (E), 25:1400
meson (π^-) reactions at 3.5 GeV/c in emulsions, heavy short-range hyperfragment production from, (E), 22:5500
meson (π^-) reactions at 3.86 GeV/c in freon bubble chamber, transverse momenta of neutral strange particles produced in, (E), 24:51974
meson (π^-) reactions at 3.86 GeV/c in freon bubble chamber, momentum and angular distributions for K^0 and Λ production in, (E), 25:33556
meson (π^-) reactions at 40 GeV/c, absorption cross sections for, (E), 24:1511
meson (π^-) reactions at 45 and 60 GeV/c in emulsions, cross sections of coherent production in, (E), 24:40264 (JINR-P1-5072)
meson (π^-) reactions at 5.1 GeV/c in propane bubble chamber, total cross sections for, (E), 24:24256
meson (π^-) reactions at 50 GeV/c in emulsions, (E), 23:32638
meson (π^-) reactions at 50 MeV to 26 GeV, energy dependence of cross sections for, 24:8831(T) (ORNL-tr-2236)
meson (π^-) reactions at 60 GeV in emulsions, coherent, (E), 25:17398
meson (π^-) reactions at 60 GeV in emulsions, meson (π) pair production and properties of π + p and π + n interactions in, (E), 24:10673
meson (π^-) reactions at 60 GeV/c in emulsions, (E), 25:1410 (JINR-P1-5326)
meson (π^-) reactions at 60 GeV/c in emulsions, average multiplicity and coherent production in, (E), 24:30459 (INP-694)
meson (π^-) reactions at 600 to 1600 MeV, absorption and diffraction cross sections for, (E), 22:15681 (PPAD-630-F)
meson (π^+) reactions at 80 to 280 MeV, activation cross sections for, (E), 22:24834
meson (π^-) reactions at high energies in heavy-liquid bubble chamber, review of coherent production of multipion final states in, 22:39270 (CERN-68-7(Vol.1), pp 537-55)
meson (π^-) reactions at high energies, review of coherent π production in, 23:18795 (CONF-671217-, pp 589-695)
meson (π^+) reactions at high energies, review of, (T), 25:15148(T) (ORNL-tr-2399)
meson (π^-) reactions at high energies, total cross sections for, 25:47796
meson (π^-) reactions in emulsions at 17.2 GeV/c, diffraction production of mesons (π) in, (E/T), 24:21939
meson (π^-) reactions with complex, at 17 and 45 GeV, Deck model for diffraction coherent production of π in, (T), 25:43646 (JINR-P1-5775)
meson (π^+) reactions with emulsion nuclei at 70 MeV, (E), 21:25239
meson (π^-) reactions with light, at 3.86 GeV/c in freon bubble chamber, production of K^{0}antiK^0(1280) in, (E), 22:34852
meson (π^-) reactions with light, at 4 GeV/c in freon bubble chamber, cross sections and mass distributions for coherent production of $\pi^+2\pi^-$ system in, (E), 25:59316
meson (π^-) reactions with light, charge exchange in, (E), 21:17308
meson (π^+) reactions with spherical, optical model for, 25:15184
meson (π^-) reactions with, existence of isonuclei and mechanism of double charge exchange in, (T), 22:32155
meson (π^+) reactions with, existence of isonuclei and mechanism of double charge exchange in, (T), 22:32155
meson (π^+) reactions with, mechanism for double charge exchange in, (T), 22:32675
meson (π^-) reactions with, mechanism for double charge exchange in, (T), 22:32675
meson (π^+) reactions with, polarization of lithium-8 fragments produced by, (E), 25:53771
meson (π^-) reactions with, review of rho^0 production from, (E), 22:22311 (CONF-670923-, pp 452-83)
meson (π^-) s-wave scattering lengths for A = 3 to 24, determination from π-mesic atom transitions, (E/T), 24:3844
meson (π^{+-}) reactions at 80 to 280 MeV with light, cross sections for, (E), 23:19376
meson (π^{+-}) reactions in nuclear emulsion at 40 to 176 MeV, angular and energy distributions for charge-exchange, (E), 22:14024
meson (π^{+-}) reactions with A = 12 to 238, at 50 to 300 MeV, cascade calculations for, (T), 21:38235 (ORNL-4128)
meson (π^{+-}) reactions with, use in research on nuclear structure, (E), 21:46825
meson capture by, recent developments in μ-, 24:52684
meson interactions in Coulomb field of, pseudoscalar meson photoproduction on mesons from, 22:41823
meson motion in infinite medium of, scalar and vector Cherenkov radiation emission from charged, (T), 24:28510
meson reactions (π,πN) with light, mechanism for, (T), 24:1765
meson reactions (π^-, 2$\pi^-\pi^+$) and (π^-, 3π^- 2π^+) at 17 and 45 GeV in emulsions, mean free paths for coherent, (E), 25:59313
meson reactions (π^-,2n) with light, angular distributions and excitation energy spectra from, 25:48021
meson reactions (π^+,2p) with light, analysis of mechanism for, (T), 24:38126
meson reactions (π^+,2p) with light, angular distributions and excitation energy spectra from, 25:48021
meson reactions (π^-,NN) with, formalism for studying two-hole states using, (T), 25:25794 (BARC-512)
meson reactions (π^-,np) with light, angular distributions and excitation energy spectra from, 25:48021
meson reactions (π^+,p) with, rescattering corrections to, (T), 25:39117
meson reactions (π^-,$\pi^+\pi^-\pi^-$) at 25 to 50 GeV/c, proposed experimental study of, 25:47761
meson reactions (π^-,rho$^-$) and (π^-,rho^0) with A = 20 to 208, at 30 GeV, Glauber multiple scattering calculations for coherent and incoherent, (T), 25:3406 (IFVE-STF-69-71)
meson reactions (π^-,rho$^-$) and (π^-,rho^0) with A = 20 to 208, at high energies, Glauber theory for coherent and noncoherent, (T), 25:7688
meson reactions at high energies, Regge pole model for, 22:1450 (AD-648017)
meson reactions at high energies, specific character of cascade calculations for double charge exchange in, 22:7488 (JINR-P2-3562)
meson reactions with, local change of intranuclear matter density in formulation of model for intranuclear cascade production in, (T), 25:53227(T) (ORNL-tr-2502)
meson reactions with, research program on, 21:25533
meson reactions with, scattering lengths from energy levels of mesic atoms, 23:41946
meson reactions with, theory based on Lagrangian formalism for π + N interactions for, (T), 24:10789
meson scattering at high energies, study of composite hadron potential strong interactions from, (T), 24:1615 (INP-679)
meson scattering by, relation of scattering length to level shifts and widths of mesic atoms, 24:23764
meson(π) interactions with, survey of research on, 25:56873
meson(π) reactions at 200 GeV in emulsions, intranuclear cascade production in, (E), 25:33532 (INP-713(Vol.2), pp 6-48)
meson(π) reactions at 30 to 2700 MeV, intranuclear cascade calculation of, 24:45627 (CONF-691101-, pp 42-62)
meson(π^-) interactions at 16 GeV/c, coherent production at three and five pion final states in, 22:9519
mesons (K$^-$) interactions K$^-$ + (Z,N) $\rightarrow$ π^0 + (Z-1,N,A) in, tests of unitary symmetry by, 21:33750
mesons (K$^-$) reactions at 1.5 GeV/c in, hyperfragment and strange particle production in, (E), 24:10684
mesons (μ) capture by, second-class G-parity properties in, (T), 25:56854
mesons (π^-) reactions with light and heavy emulsion, at 17.2 GeV, (E), 21:15504
model of finite spherical, number-conserving approach to pairing-force, 21:31843
model of odd—odd, jj-coupling, 21:26973 (PUC-937-257)
Moessbauer effect for two transitions in, interference effects in, (T), 22:48608
Moessbauer effect in ferromagnetic materials, two-quantum resonance in, (T), 21:34039
Moessbauer effect uses of various, survey of, 23:14863 (INP-571, Paper 9)
Moessbauer effect with electric quadrupole splitting, (T), 21:34052
moment of inertia and quadrupole moment of, calculations, 21:4331
moment of inertia of, (T), 25:23079
moment of inertia of, saturation, rotational invariance, and microscopic theories of, 24:43512
moments of inertia at high rotational frequencies, 22:27327
moments of inertia for 2s1d-shell, method for calculating, (T), 22:9970
moments of inertia for ground-state bands of light, (T), 22:53246
moments of inertia for rare-earth, calculations using superfluid model, (T), 21:15629
moments of inertia for Z = 17 to 82, (E/T), 23:7265
moments of inertia of deformed even-even, (E), 22:7712
moments of inertia of deformed, calculation of, (T), 25:25800
moments of inertia of deformed, calculations using collective model, (T), 23:23793
moments of inertia of deformed, method for calculation of, (T), 23:9042
moments of inertia of heavy, (T), 24:24631
moments of inertia of heavy, at saddle point, (E/T), 22:1669
moments of inertia of heavy, corrections to calculations for, (T), 24:24633
moments of inertia of light, 23:5946(R) (ORO-3765-1)
moments of inertia of nonaxial, calculation using superfluid model, (T), 21:5568
moments of inertia of odd-A, calculations using superfluid model, 21:40500
moments of inertia of rare-earth, with particle number conserving states, (T), 21:2813
moments of inertia of rotational states of deformed, 21:42683(R) (UCB-34-P-141-8)
moments of inertia of rotational, (T), 24:38321
moments of inertia of, self-consistent formalism for calculating, 21:44805
moments of inertia of, solution of Hartree-Fock-Bolgolyubov equations in cranking model for, (T), 22:27326
motion in center-of-mass system in, Pauli principle for, 21:27626
motion in deformed heavy, rotational and vibrational, (T), 21:23549
motion in deformed heavy, rotational and vibrational, (T), 21:23548
motion in diatomic molecules, coupling to electron motion, (T), 21:29021
motion in odd-A, coupling of core excitation and single-particle, 21:31857
motion in, renormalization effect due to ground-state correlation on vibrational, 21:4333
multiconfiguration field theory in, 24:40678
neon-22 reactions (Ne-22,xn) with, isotope production regularities for mechanism of, (E), 25:23027 (JINR-P7-5495)
neutrino (τ/sub μ/) scattering by, cross sections for, (T), 23:19342
neutrino elastic scattering by, cross sections for, 22:44395
neutrino emission from, in hot dense stars, (T), 25:58492
neutrino emission from, overenriched in neutrons, (T), 23:51165
neutrino fission at 100 MeV, determination of neutrino electromagnetic form factor from cross section for, (E/T), 25:30777 (JINR-P2-5705)
neutrino inelastic scattering by, differentiation among hadronic, electronic, and muonic neutrinos from polarization of leptons from, (E), 23:46671
neutrino reactions (τ,μ) with, final-state Coulomb corrections to differential cross sections for, (T), 24:49425
neutrino reactions (τ,μ^-) with, mass number dependence of cross sections for, (T), 24:45485
neutrino reactions (τ,μ^-W$^+$) at high energies, angular and energy distributions for W production in, 25:59410
neutrino reactions (τ,pμ^-) with, method for separating nuclear effects for study of τ + N $\rightarrow$ τ + N interactions from, (T), 24:52045
neutrino reactions at 1 to 20 GeV, cross sections for W production in, 24:52042
neutrino reactions at 1.5 to 40 GeV, kinematic distributions of lepton triplets from production in, (T), 25:38722
neutrino reactions at 100 MeV, determination of electromagnetic form factor of neutrino from cross section for giant resonance excitation from, (E/T), 25:30777 (JINR-P2-5705)
neutrino reactions at high energies, cross sections for, (T), 24:47423
neutrino reactions at high energies, predictions of PCAC hypothesis for cross sections of inelastic, 22:11631
neutrino reactions at high energies, self-coupling of weak lepton currents in τ + μ^- + μ^+ production in, (T), 25:40939 (COO-264-560)
neutrino reactions at high energies, surface effects in, (T), 24:10700(T) (SLAC-Trans-102)

neutrino reactions at high energies, total cross sections for W-boson production in, 25:14641
neutrino reactions at high energies, total W production cross sections in, (T), 25:17453 (COO-1573-73)
neutrino reactions below 500 GeV, total cross section for W^{+-} and μ^{+-} production in, (T), 23:30740
neutrino reactions with high-Z, above 25 GeV, proposed experiment for spark chamber search for W production in, 24:51914 (TID-25473(Vol.4), pp 201-7)
neutrino reactions with nuclei at 50 to 100 GeV, coherent, incoherent, and inelastic cross sections for W-meson production in, (T), 25:3340
neutrino reactions with, angular and momentum distributions of μ^+ and e^+ in direct production of lepton pairs in, (T), 25:59415
neutrino reactions with, Coulomb corrections to Adler PCAC test in, 25:59406
neutrino reactions with, cross section dependence on mass number for, 23:25504 (CERN-69-7, pp 61-71)
neutrino reactions with, cross sections for, (T), 23:46330
neutrino reactions with, current algebra calculations of differential cross section relations for, 24:8614
neutrino reactions with, form factors for $\pi^0 \rightarrow 2\gamma$ and axial variant of $\pi \rightarrow e + \nu + \gamma$ decays and parameter for dependence of form factor on momentum transfer for cross sections for e^- and π^+ production in, (T), 25:38723
neutrino reactions with, hadron-like behavior of cross sections for, (T), 21:12115
neutrino reactions with, model for near-forward, 25:7614
neutrino reactions with, shell structure effects in quasielastic, 25:34168
neutrino reactions with, weak, (T), 24:42930
neutrino scattering by, current commutation relations for cross section sum rules for, 22:9531
neutrino scattering by, current commutation relations in quark field algebra for, 24:37726
neutrino scattering by, relation to meson (μ) capture, (T), 24:40344
neutron absorption and fission cross sections for A = 242 to 252, in thermalized reactor spectrum, (E), 22:20566 (DP-MS-67-111)
neutron absorption by, Doppler-broadened line-shape functions for p-wave resonances in, (T), 21:38313
neutron absorption by, iterative method for intermediate resonance approximation, 21:44533
neutron absorption cross sections for odd—even, empirical approach to systematics of, (T), 23:4055 (NRL-6783)
neutron absorption resonance integrals for Z = 33 to 93, (E), 21:38308
neutron absorption resonance integrals for, measurement using Advanced Reactivity Measurement Facility, 22:35198 (IN-1195)
neutron absorption resonance integrals in multiregion lattices, computer program for calculating, 21:46642 (JAERI-1134)
neutron activation cross sections for A = 23 to 232, testing statistical theory by, (E/T), 21:10093
neutron activation cross sections for A = 23 to 238, at 2 keV, (E), 23:28304 (WASH-1124)
neutron activation cross sections for, method for calculating, 21:42716
neutron activation rates in reactors, computer program for, 21:7636 (ORNL-TM-1674)
neutron and proton distributions in, difference between, (T), 23:45008
neutron and proton distributions in, use of quasi-free scattering reactions for analysis of, (T), 25:20544
neutron capture above 1 MeV by A = 70 to 170, statistical analysis of cross sections for, (T), 22:46749
neutron capture and fission cross sections and resonance integrals for Z > 88, method for calculating thermal, (T), 22:20565 (CONF-680307-18)
neutron capture and fission cross sections and resonance integrals for Z = 88 to 106, method for estimating thermal, (T), 22:24852 (BNL-12353)
neutron capture and fission cross sections for, computer program for least-squares analysis using multilevel formalism, 21:35387 (COO-1546-5)
neutron capture at 0.01 eV to 1 MeV by, time-of-flight facility for cross section measurements for, 25:37633
neutron capture at 10 to 100 keV, compilation of gamma spectra and intensities for, (E), 25:56655 (ORNL-TM-3379)
neutron capture at 14 MeV by A = 24 to 138, integrated cross sections for fast, (E), 25:12474
neutron capture at 14 MeV with compound nucleus excitation, description modes in, (E), 24:30748
neutron capture at 200 keV, statistical analysis of, (T), 25:50859
neutron capture at 24 keV by A = 55 through 232, cross-section calculations for, (T), 23:49371
neutron capture at 30 keV by A = 60 to 203, cross sections for, (T), 25:25703 (AAEC/E-211)
neutron capture at 30 to 1400 keV by A = 115 to 238, cross sections, excitation functions, and gamma spectra from, (E/T), 25:31303 (INR-1271)
neutron capture at resonance energies, review of theory of, (T), 23:34806 (ANL-7282, pp 417-25)
neutron capture by 2s1d-shell, gamma spectra from resonance, (E), 21:35444
neutron capture by 60 < A < 247, empirical dependence for total radiation widths from, 24:40613 (JINR-P3-4929)
neutron capture by A < 220, review of cross sections for non-radiative, 25:15120
neutron capture by A = 24 to 239, tables of gamma rays from, (E), 25:36718 (AAEC/TM-585)
neutron capture by A = 39 to 205, resonance and thermal, (E), 23:1882 (WASH-1093)
neutron capture by A = 45 to 204, cross sections and resonance parameters for intermediate, (T), 25:14979 (AAEC/E-198(Suppl.1))
neutron capture by A = 6 through 207, γ spectra and Q-values for, (E), 23:21284
neutron capture by fissionable, gamma spectrometer development for studies of thermal, 24:47639
neutron capture by heavy, cross-section ratios and gamma spectra from cascade theory, (T), 25:12626 (FMRB-33/70)
neutron capture by light, measurement of Doppler broadening of high-energy γ lines from thermal, (E), 23:17103(R) (ANL-7481)
neutron capture by medium-weight and heavy, γ cascade simulation for resonance, (T), 23:4002 (RT/FI-(68)20)
neutron capture by medium-weight and heavy, research program on fast, (E/T), 22:39606(T) (LA-tr-68-18)
neutron capture by medium-weight and heavy, survey of theoretical models and experimental data in 1 to 2 MeV region, (E/T), 23:25943 (RT/FI-(68)55)
neutron capture by oriented, method for calculation of disorientation parameters in, (T), 24:28832
neutron capture by Z = 1 to 46, compilation of γ spectra from, 22:9820
neutron capture by Z = 11 to 83, high-resolution γ spectra for, (E), 23:10993
neutron capture by Z = 17 to 80, gamma circular polarization from polarized thermal, (E), 25:59780 (KFK-1401)
neutron capture by Z = 32 through 66, cross-section evaluation for fast, 25:38919 (CCDN-NW-10)
neutron capture by Z = 47 to 67, data compilation for thermal, 23:9005
neutron capture by, accuracy of cross section measurements using scintillation tanks, 25:31173(R) (RPI-328-200)
neutron capture by, analysis of correlations in resonance, (T), 24:30926
neutron capture by, analysis of gamma radiation from polarized, (T), 25:43831 (INR-1262)
neutron capture by, analysis of reaction mechanisms in, 24:47679
neutron capture by, angle measuring device for Cauchois gamma spectrometer for measuring, 22:14827
neutron capture by, angular correlation of gamma cascades from, 24:47597
neutron capture by, cascade model for calculation of γ spectra for, (T), 23:30953
neutron capture by, channel coupling in resonance, (E/T), 23:44817
neutron capture by, channel theory of resonance and thermal, 24:47671
neutron capture by, coincidence spectrometer for studying gamma rays from, 23:43575
neutron capture by, compilation of γ spectra from thermal, 22:39648
neutron capture by, computer program for calculating time-dependent populations of isotopes in, (E), 25:43889 (LA-4708)
neutron capture by, computer program for cross-section calculations for fast, 24:49932 (RT/FI-(69)44)
neutron capture by, conversion electron spectra from, 24:47668
neutron capture by, correlation between reduced neutron and radiative widths for resonance, 25:56818 (JINR-E4-5880)
neutron capture by, crystal and semiconductor spectrometers for measuring spectra from, 21:14423 (BNL-10991)
neutron capture by, determination of parity nonconserving admixtures from polarized, 23:49319
neutron capture by, effect of doorway-state resonances in, (T), 25:36834
neutron capture by, energy dependence of radiative strength function for fast, (T), 23:11041 (AAEC/TM-467)
neutron capture by, facility using electron linear accelerator and scintillation—semiconductor detector system for measuring gamma spectra from, 23:21182 (GA-9221)
neutron capture by, gamma resonance scattering from thermal, 21:15510 (CONF-660221-, pp 75-9)
neutron capture by, gamma spectra from channel, (T), 24:47672
neutron capture by, gamma spectroscopic studies on statistical properties of, 24:47613
neutron capture by, γ energy measurements using neutron binding energy of compound nucleus, (E), 21:40675(R) (IN-1083)
neutron capture by, γ spectroscopy using resonance, 23:11045 (BNL-12965)
neutron capture by, in mass region A = 40 to 70 at 10 to 100 keV, gamma spectra from, (E/T), 24:47611
neutron capture by, instrumentation for measurement of gamma spectra from, 24:47578
neutron capture by, level parameters from gamma spectra from epithermal, 24:30684 (BNL-14468)
neutron capture by, mechanism of thermal and epithermal, 21:42717
neutron capture by, method for calculating gamma spectra from, 21:31836 (ORNL-TM-1867)
neutron capture by, method for determining average widths for high-energy radiative transitions from, 21:31804
neutron capture by, method for measuring average γ spectra from resonance, 23:17103(R) (ANL-7481)
neutron capture by, nuclear structure research with, 24:38324
neutron capture by, pair formation spectrometer for studying gamma transitions in, 22:10590
neutron capture by, performance of liquid scintillation detectors for measurement of cross sections for, 25:2435 (RPI-328-202)
neutron capture by, performance of lithium-drifted germanium gamma spectrometers for studying, 21:17871
neutron capture by, properties of neutron filters for studying thermal, 24:30668 (RT/FI-(69)3)
neutron capture by, resolution of lithium-drifted germanium and diffraction-type spectrometers for analysis of gamma rays, 23:47797
neutron capture by, review of energy-level transitions from keV, 25:20227 (AAEC/TM-565)
neutron capture by, review of gamma spectroscopy of, 25:20447
neutron capture by, review of theory and experimental methods for studying, (E/T), 22:53236
neutron capture by, semidirect capture analysis of gamma spectra from, (E/T), 25:31332
neutron capture by, spectroscopic techniques and measurements for, 24:6908
neutron capture by, statistical calculations of gamma spectra from, (T), 24:47607
neutron capture by, statistical-model description of γ-ray intensities from thermal, (T), 25:46110
neutron capture by, use of germanium detectors in Compton-suppression technique for γ-spectroscopic studies of, (E/T), 24:47577
neutron capture by, use of lithium-drifted germanium detectors for measuring gamma spectra from thermal, 23:17784 (BLG-425, Paper 4)
neutron capture cross section at 24 keV, p-wave, (T), 24:15993
neutron capture cross sections for A = 23 to 127, thermal, (E), 21:7759
neutron capture cross sections for A = 23 to 208, at 13.4 to 15.0 MeV, (E), 21:13839
neutron capture cross sections for A = 27 to 197, at 3 MeV, (E), 22:3683
neutron capture cross sections for A = 27 to 209, at 14.7 MeV, (E), 21:13839
neutron capture cross sections for A = 45 to 243, statistical estimation of thermal, (T), 22:14026
neutron capture cross sections for A = 69 to 86, thermal, (E), 21:35437(R) (EANDC(E)-76(U))
neutron capture cross sections for Z = 41 to 75, at 10 to 150 keV, 21:17353 (KFK-455)
neutron capture cross sections for Z = 41 to 75, at 10 to 150 keV, (E), 21:35437(R) (EANDC(E)-76(U))
neutron capture cross sections for, energy dependence of partial resonance and thermal, (T), 21:15535
neutron capture cross sections of 2s1d, 21:12013(R) (EANDC(OR)-44(L))
neutron capture cross sections of light and medium-weight, at 1 eV to 1 MeV, (E), 21:7755
neutron capture cross sections, measurement using sphere transmission with Monte Carlo data analysis, 21:15467 (N-66-37044)
neutron capture in nuclear explosions, survey on multiple, 25:41236
neutron capture in stars, heavy-element synthesis by, (T), 22:5905
neutron capture in stars, models for synthesis of heavy elements, (T), 22:18205 (FEI-64)
neutron capture in the resonance region, mechanism for, (E), 24:26627(T) (ANL-Trans-811)
neutron capture with isomeric excitation, relative probabilities for, (T), 22:20666 (FEI-79)
neutron cross sections and resonance integrals for, computer program for calculating, 21:38295 (AAEC/E-164)
neutron cross sections and resonance parameters for, MUFT calculations of Doppler-broadened, (T), 22:18087
neutron cross sections and resonance parameters for Z = 1 to 99, CCDN data tabulation on, 23:3891 (CCDN-NW-4)
neutron cross sections and resonance parameters for, bulletin of information center, 21:25399(T) (ANL-Trans-168)
neutron cross sections and resonance parameters for, data evaluation techniques for, 23:5769
neutron cross sections and resonance parameters for Z = 61 to 87, compilation of, 21:33958 (BNL-325(2nd Ed.)(Suppl.2)(Vol.2C))
neutron cross sections and resonance parameters for Z = 41 to 60, 21:11919 (BNL-325(2nd Ed.)(Suppl.2)(Vol.2B))
neutron cross sections and resonance parameters for, calculation with resonance-resonance interference, (T), 22:3588 (GA-8203)
neutron cross sections for A < 220, evaluation of thermal and resonance, 25:15101
neutron cross sections for fissionable, methods of measurement and data analysis for, 23:5925
neutron cross sections for heavy even-even, computer program for calculation using deformed-nucleus optical model, (T), 22:1563 (NAA-SR-Memo-12532)
neutron cross sections for, status of measurement programs on fast, 23:5776
neutron cross sections in resonance region, methods of measurement and data analysis for, (E/T), 23:5778
neutron cross sections of fissile, effect of level interference on slow, (T), 25:59879
neutron cross sections of heavy even-even, evaluation using deformed optical-model potential, (T), 21:23541 (NAA-SR-Memo-12314)
neutron cross sections of oriented, black nucleus model for total, 21:31886
neutron decay of, possible examples of two-, (T), 25:59740
neutron decay of, possible instances of, (T), 25:39071(T) (UCRL-Trans-1444)
neutron differential elastic and inelastic scattering cross sections for, corrections due to finite volume of scatterer for thermal, (T), 25:5504
neutron differential elastic scattering cross sections and polarizations for A = 59 to 209 nuclei at 4 MeV, (T), 21:23442(T) (ANL-Trans-462)
neutron differential inelastic scattering cross sections for Z = 4 to 82, at 15 MeV, (E), 21:17338 (AD-647225)
neutron differential scattering cross sections for, tables of, 21:11916 (ANL-6172)
neutron differential scattering cross sections for bound, thermal, (T), 21:10079
neutron distribution in moving light, calculation of, 25:38854

neutron distribution in, surface effects in, (E/T), 23:13342
neutron distributions in, calculations using hydrodynamical model, (T), 25:46129
neutron distributions in, use of effective single-particle potential for calculating, (T), 23:44997
neutron elastic and inelastic scattering at 14 MeV by Z = 4 to 82, strong absorption model analysis of fast, (T), 23:1949
neutron elastic and inelastic scattering by deformed A less than or equal to 40, (T), 22:37340(R) (EANDC(E)-89(U))
neutron elastic and inelastic scattering by light, analysis for reaction mechanisms in fast, (E), 25:14898
neutron elastic and inelastic scattering cross sections for A = 48 to 238, effects of compound-nucleus structure on fast, (T), 22:27379
neutron elastic scattering angular distributions for, computer programs for analysis of, (T), 22:3745 (ANL-7306)
neutron elastic scattering at 0 to 16 MeV, polarization calculations using local optical-model potential, (T), 22:16013 (LA-3788)
neutron elastic scattering at 0.037 eV to 18 MeV, angular distributions for, 21:27579 (UNC-5099)
neutron elastic scattering at 0.7 to 1.2 MeV by A = 48 to 238, polarization in, (E), 25:53706
neutron elastic scattering at 0.8 to 1 MeV, differential cross sections and polarization for, (E), 23:28304 (WASH-1124)
neutron elastic scattering at 1.5 to 8.1 MeV, dissertation summary on, (E), 23:17050 (NP-17773)
neutron elastic scattering at 25 and 96 MeV, optical-model potentials for, (T), 21:44764
neutron elastic scattering at 4 MeV by medium- and heavy-weight, cross sections for polarized, 25:53707
neutron elastic scattering at 4 MeV, optical-model analysis of, (T), 22:24918
neutron elastic scattering at 6 to 24 MeV, optical-model analysis of, 21:34071
neutron elastic scattering at E < 50 MeV on A > 40, optical model parameters for, 23:52168 (COO-1265-59)
neutron elastic scattering at low energy, in monatomic gas model, (T), 21:21406
neutron elastic scattering at low energy, single-particle wave functions for, (T), 21:19299
neutron elastic scattering by A = 23 to 238, optical-model analysis of fast, (E/T), 22:24840
neutron elastic scattering by A = 27 to 209, optical-model potential for fast, (E/T), 22:27278
neutron elastic scattering by doubly closed-shell, (E), 22:20578 (WASH-1079)
neutron elastic scattering by heavy, analysis of reported small-angle anomalies in, (T), 25:28500
neutron elastic scattering by heavy, calculation technique for multigroup transfer matrices for, (T), 25:23046
neutron elastic scattering by heavy, survey of data on electric polarization in, 23:40031 (KURRI-TR-12, pp 3-17)
neutron elastic scattering by light, optical-model analysis of fast, (T), 22:30051
neutron elastic scattering by medium-weight and heavy, optical-model analysis of, (T), 22:18300
neutron elastic scattering by square-well potential, theory using solutions of time-dependent Schroedinger equation, (T), 22:12000
neutron elastic scattering by Z = 22 to 83, polarization in, (E), 21:13840
neutron elastic scattering by, analysis for spin and parity of resonances in fast, 24:49928 (KFK-1189)
neutron elastic scattering by, criterion for weak perturbing systems for, (T), 22:13865
neutron elastic scattering by, intermediate resonances from excitation of 2p-1h doorway states in, (T), 22:46820 (UCSD-10-P-11-75)
neutron elastic scattering by, nonlocal optical-model potential for, (T), 21:44756
neutron elastic scattering by, optical-model parameters for, (T), 24:6975
neutron elastic scattering by, polarization in, (T), 21:42713
neutron elastic scattering by, spin-spin interaction effects on, (T), 21:13914
neutron elastic scattering by, time-dependent wave formalism for, (T), 22:3772
neutron elastic scattering from polarized, measurement of scattering lengths from, (T), 25:12533 (TKK-F-A-123)
neutron elastic scattering, lectures on cross sections and polarization from, (T), 25:12624 (ANU-P-497)
neutron emission and fission at moderate excitation energies, (E), 21:40429(R) (RLO-1388-23)
neutron emission by highly excited, energy and angular correlations of, (T), 25:50807 (JINR-P4-5927)
neutron emission from, energy spectra and probabilities for delayed, (T), 25:3713 (CEA-N-1333)
neutron emission probabilities of precursor, semi-empirical treatment of delayed, 24:22106
neutron excess for stable, (T), 21:23576
neutron fission at 14 MeV, delayed neutron emission from fission products from, (T), 25:23015 (AERE-R-6596)
neutron fission cross sections at low energy, interpretation of, (T), 22:18349
neutron fission cross sections for alpha-emitting and spontaneously fissioning, method for measuring, (E/T), 22:20571 (LA-DC-9188)
neutron fission cross sections for, computer programs for calculation from raw experimental data, (T), 22:9759 (EUR-3652)
neutron fission cross sections for, conference on fast, 21:23536 (JAERI-1126)
neutron fission cross sections of, resonance interference with Doppler broadening, (T), 21:15626
neutron fission of heavy, alpha spectra from ternary, (T), 21:31880
neutron fission of heavy, experimental facilities and methods for studying, 21:44660 (CONF-660925, pp 789-818)
neutron fission of Z = 90 through 101, barrier—binding energy correlations for thermal, (T), 23:37245
neutron fission of Z = 90 through 101, cross-section correlations in thermal, (T), 23:47038(T) (BNL-tr-286)
neutron fission of, computer library of product yields from, (E), 25:23016 (AERE-R-6642)
neutron fission of, delayed neutron emission from fission products from thermal and fast, (T), 25:23015 (AERE-R-6596)
neutron fission of, description of near-barrier, 25:5850
neutron fission of, double-humped barrier in quasi-classical approximation for, (T), 25:23058(T) (LA-4386-TR)
neutron fission of, effects of nucleon pairing correlations on, (T), 21:35499 (FEI-67)
neutron fission of, mass and charge distributions from thermal and 14-MeV, 22:20975(R) (BMwF-FBK-67-89)
neutron fission of, method for predicting prompt neutron yields from thermal, (T), 25:28355(R) (TID-25659)
neutron fission of, properties of neutron filters for studying thermal, 24:30668 (RT/FI-(69)3)
neutron fission of, quasiclassical approximation for double barrier in, (T), 24:22192(T) (BNL-tr-311)
neutron fission of, quasiclassical correlation for angular anisotropy in, (T), 22:9926(T) (ANL-Trans-548)
neutron fission of, quasiclassical relation for angular anisotropy in, (T), 22:5903
neutron fission of, structure in subthreshold, (T), 23:19320 (AERE-R-5891)
neutron forward scattering amplitudes and cross sections for A = 56, (T), 22:20668 (LA-DC-9179)
neutron halo in heavy, from meson (K^-) capture data, (T), 23:40140
neutron inelastic scattering at 2.75 MeV, method for studying gamma spectra from, (E), 22:32561
neutron inelastic scattering by 2s1d-shell, DWBA analysis using SU(3) model, (T), 22:20497(R) (AECL-3009)
neutron inelastic scattering by even—even, effects of exchange interaction on, (T), 22:44675
neutron inelastic scattering by even-even, effects of pairing correlations on, (T), 21:34053
neutron inelastic scattering by excited states of, kernel for describing, (T), 25:36707
neutron inelastic scattering by heavy, research using time-of-flight method with Van de Graaff accelerator, 21:31770 (BMwF-FBK-67-04)
neutron inelastic scattering by medium and heavy, analysis using quasi-compound nucleus theory, (T), 23:40004
neutron inelastic scattering by polarized, separation of coherent and incoherent components in polarized, (T), 25:14869
neutron inelastic scattering by spherical even—even, collective effects in, (T), 23:7358
neutron inelastic scattering by, computer program for gamma angular distributions from, 21:12082 (ORO-2791-20)
neutron inelastic scattering by, conference on, 21:17262 (JAERI-1113)
neutron inelastic scattering by, description for single-level, (T), 24:33171
neutron inelastic scattering by, design of lithium-drifted germanium spectrometer for studying, 23:47798
neutron inelastic scattering by, gamma emission in, (T), 21:4325 (ORO-2791-19, pp 75-135)
neutron inelastic scattering by, method for measuring excitation functions for, 23:42974
neutron inelastic scattering by, quasi-compound nucleus theory for, (T), 23:40149
neutron inelastic scattering by, review of research on, 24:28750
neutron inelastic scattering by, statistical analysis of, (T), 25:31436
neutron inelastic scattering by, statistical theory of neutron energy spectra from, 25:17958 (N-70-38168)
neutron inelastic scattering by, statistics in time-of-flight measurements of, 25:46025
neutron inelastic scattering by, width-fluctuation corrections for, (T), 21:42614(R) (ORO-2791-26)
neutron inelastic scattering cross sections for, calculation of fast, (T), 22:18081
neutron interactions with polarized, review on polarized, 25:53843
neutron J = 0 pairing states in even—even, use of boson expansion method for calculating, 23:45005
neutron nonelastic cross sections for, method for measuring fast, 21:15461 (CONF-660221-, pp 69-73)
neutron overloading of, at high densities, (T), 23:41785
neutron pair separation energies for, comparison of predictions of mass laws for, (T), 23:3972
neutron pairing energies of, mass and spin systematics of, (T), 22:5882
neutron pairing states in even—even, (T), 23:52172 (UCRL-18667, pp 133-67)
neutron radii of, determination from Coulomb energy separation of isobaric analog states, (T), 23:19322 (BNL-13297)
neutron radii of, determination from π-mesic atom data, (E/T), 24:18452
neutron reaction and total cross sections for A = 1 to 236, at 14 MeV, 21:25393 (EANDC(US)-58(U))
neutron reaction rate with Maxwellian distribution of, (T), 21:11954
neutron reactions (n, charged particle) with, telescope arrangement of radiation detectors for charged particles from, 22:43065
neutron reactions (n,2n) at 14 MeV and in fission spectrum, cross sections for, (T), 22:3596
neutron reactions (n,2n) at 14 MeV, DWBA analysis assuming direct mechanism, (T), 24:30815
neutron reactions (n,2n) at 14 MeV, isomeric cross-section ratios for, 25:15182
neutron reactions (n,2n) at 14.2 and 14.8 MeV with A = 19 to 141, cross sections for, (E), 25:38925 (NP-18712, pp 19-34)
neutron reactions (n,2n) at 14.5 MeV, computer code for cross-section calculations for, 24:10946 (UCRL-50736)
neutron reactions (n,2n) at fast energies, analysis using free Fermi gas model, (T), 24:30882
neutron reactions (n,2n) at low energies with heavy, T-matrix method for calculating, (T), 25:31394 (ITF-70-95-E)
neutron reactions (n,2n) with A = 134 to 208, spin cut-off parameters for fast, (T), 22:39701
neutron reactions (n,2n) with A = 20 to 100, 21:5510
neutron reactions (n,2n) with A = 39 to 232, empirical formula for cross sections for, (E), 25:34075 (KFKI-71-8)
neutron reactions (n,2n) with heavy, calculations of amplitudes and final-state-interaction effects in, (T), 25:39116
neutron reactions (n,2n) with medium-weight and heavy, analysis of single-particle effects in fast, (E/T), 23:17098
neutron reactions (n,2n) with Z = 9 to 47, cross sections for, (E), 21:15509 (CONF-660221-, pp 66-8)
neutron reactions (n,2n) with, analysis using Fermi gas model, (T), 25:50861
neutron reactions (n,2n) with, cross-section formula for, (T), 21:1149
neutron reactions (n,2n) with, cross-section measurement using Fermi watertank method, (E/T), 21:40443
neutron reactions (n,2n) with, cross-section measurements using gamma yields, (E), 21:1061
neutron reactions (n,2n) with, Monte Carlo scatter corrections for cross sections of, 22:14788
neutron reactions (n,2n) with, shell effects in cross sections for, (T), 23:11058
neutron reactions (n,2n) with, single particle effects in fast, (T), 24:15995
neutron reactions (n,3n) in fission spectrum, cross sections for, (T), 22:3596
neutron reactions (n,α) and (n,γ) with resonance excitation, analysis of α and γ decays in, (T), 25:34186
neutron reactions (n,α) and (n,p) at 14 MeV with A = 28 to 210, analysis of statistical spectra from, (T), 22:3782
neutron reactions (n,α) and (n,p) near 14 MeV, statistical analysis of shell effects in, (T), 25:56869
neutron reactions (n,α) and (n,p) with Z = 8 to 25, at 14 MeV, (E), 21:17340(R) (AEET-267)
neutron reactions (n,α) at low energies, direct mechanisms in, (E/T), 23:49443 (INR-970)
neutron reactions (n,α) at thermal energies, possibility of, (T), 22:11953
neutron reactions (n,α) with, analysis for α-cluster probability by, (T), 25:50854
neutron reactions (n,α) with, analysis for cluster structure in nuclear surface by, (T), 25:1736(R) (INR-1197)
neutron reactions (n,α) with, as tool for studying neutron resonances, 25:28345 (JINR-E3-5483)
neutron reactions (n,α) with, cross sections for, (T), 22:11985
neutron reactions (n,α) with, use of ionization chambers with scintillation detectors for measurements in fast, 22:38009
neutron reactions (n,α), (n,2n) and (n,p) at 14.5 MeV with intermediate-weight, cross section systematics for, (E), 24:26668
neutron reactions (n,α), (n,2n), and (n,p) with A = 14 to 41, cross sections for, (E), 21:7715
neutron reactions (n,α), (n,p), and (n,2n) at 14.5 MeV with medium-weight, systematics of cross sections for, (E/T), 25:3643
neutron reactions (n,α), (n,p), and (n,2n) with A = 15 to 200, relative cross sections at 13.5 and 15 MeV for, (E), 25:46075
neutron reactions (n,d), (n,p), and (n,t) at 14 MeV, use of semiconductor coincidence detectors for studying, 21:45366 (LYCEN-6738, pp 201-4)
neutron reactions (n,γ) and (n,n'γ) with, multiparameter analyzer for studying fast, 24:27382 (CEA-R-3981)
neutron reactions (n,γ) at 15 keV to 15 MeV, gamma spectra from, (E/T), 22:16100
neutron reactions (n,γ) with, crystal spectrometers for measurements in, 21:12627 (BNL-10994)
neutron reactions (n,γ) with, design of large magnetic spectrometer for internal conversion electrons emitted during, 23:43590
neutron reactions (n,γ) with, double-focusing beta spectrometer for measuring conversion electron spectra from thermal, 22:6633
neutron reactions (n,γ) with, flat-crystal gamma spectrometer for studying, 23:11824
neutron reactions (n,γ) with, scintillation detectors for measuring total number of resonance captures in, 22:19095 (IAE-1349)
neutron reactions (n,γ) with, scintillation detectors for measuring total number of resonance captures in, 23:4801(T) (ANL-Trans-642)
neutron reactions (n,p) and (n,α) at 14 MeV, shell effects in cross sections for, (E), 25:31362
neutron reactions (n,p) and (n,α) with, compound-nucleus calculations of cross sections for low-energy, 25:15207
neutron reactions (n,p) at 14 MeV with Z = 12 to 52, analysis for compound and direct parts in, (E), 23:19209
neutron reactions (n,p) at 14 MeV with Z = 8 to 33, cross sections for, (E/T), 22:32729
neutron reactions (n,p) at 14 MeV, shape analysis of proton spectra from, (E/T), 24:15833
neutron reactions (n,p) at 14.8 MeV with 45 A = 6 to 167, cross sections for, (E), 25:38963
neutron reactions (n,p) at 14.8 MeV with Z = 3 through 68, cross sections for, (E), 25:50661

neutron reactions (n,p) at 5.3 to 20 MeV, DWBA calculations with exchange interactions and finite range, (T), 24:15957
neutron reactions (n,p) with 6 less than or equal to Z less than or equal to 50, at 14.5 MeV, cross sections for, (T), 21:23556
neutron reactions (n,p) with A = 14 to 190, cross sections for, (E), 21:4212
neutron reactions (n,p) with A near 45 and 90, cross-section calculations using statistical theory, (T), 22:20677 (UCRL-50359)
neutron reactions (n,p) with analog-dipole excitation, collective theory for, 25:36835
neutron reactions (n,z) with, survey of research on, 24:28713
neutron reactions at 0.047 to 14.8 MeV with 48 A = 7 to 239, differential and integrated cross sections for, (E), 25:41204 (ORO-2791-32)
neutron reactions at 0.5 to 42 MeV with A greater than 26, expression for total cross sections for, (E), 25:48113
neutron reactions at 1 to 3500 MeV, computer program for intranuclear-cascade calculations of, (T), 25:36733 (ORNL-4564)
neutron reactions at 10 and 27 GeV/c, total cross sections for, (E), 23:10817
neutron reactions at 14 MeV with, ΔE—E semiconductor telescope detector for studying, 22:23263 (CEA-R-3378)
neutron reactions at 14 MeV, mass dependence of total cross sections for, (T), 25:12344
neutron reactions at 14/4 MeV with medium-Z, model analysis of activation cross sections for, (E/T), 25:43951
neutron reactions at 14.7 MeV, equipment and method for studying isomers produced in, 25:48982
neutron reactions at 2 keV with A = 23 to 238, activation cross sections for, (E), 24:40607 (IN-1317, pp 1-63)
neutron reactions at 2.062 to 2.573 GeV/c in propane bubble chamber, Λp resonances in, (E), 22:46322 (JINR-E1-4022)
neutron reactions at 27 GeV/c, spark chamber study of total cross sections for, (E), 22:39248 (CERN-68-7(Vol.1), pp 523-36)
neutron reactions at 600 MeV, π^- and π^+ production in, (E), 24:40249(T) (ORNL-tr-2347)
neutron reactions at 8 to 21 GeV/c, total cross sections for, 25:47909
neutron reactions at high energies in emulsions, neutron spectrum determination from grey prongs in stars from, (E), 21:28213 (UCRL-17063)
neutron reactions below 10 MeV, doorway state theory of, (T), 22:46848
neutron reactions in fission spectrum, rates for, 23:49301
neutron reactions in thin targets, computer program for calculation of activities produced from fast, (T), 25:23063 (NP-18649)
neutron reactions in unresolved resonance region, method for calculation of cross sections for, (T), 25:56870
neutron reactions with 1p- and 2s1d-shell, γ spectra and cross sections for fast, (E), 23:23626 (NP-17794)
neutron reactions with A = 2 to 260, tables of threshold energies for, 21:29966 (UCRL-14000)
neutron reactions with A < 220, activation resonance integrals for, (E/T), 25:15124
neutron reactions with A < 220, evaluation of data above resonance region, 25:15123
neutron reactions with A greater than or equal to 20, formula for gamma production cross sections for, (T), 21:11992 (UCRL-50185)
neutron reactions with compound nucleus excitation, unified model for analysis of, 24:52640 (AI-AEC-12931)
neutron reactions with core-plus-one-neutron, theoretical analysis of, (T), 25:34155 (ITF-70-97-P)
neutron reactions with even-even, with collective excitation, square-well optical-model potential for, (T), 22:18352
neutron reactions with fissile nuclei, resonance, (E/T), 23:5916
neutron reactions with fissile, computer program for generating Reich and Moore parameters for multilevel unresolved resonances in, 24:49865 (WAPD-TM-935)
neutron reactions with fissile, multilevel effects in cross sections for, (T), 25:25722(R) (ORNL-4592)
neutron reactions with light and medium-weight nuclei, computer program for cross-section calculations using spherical optical model, 22:1562 (NAA-SR-Memo-12531)
neutron reactions with light, analysis for reaction mechanisms in fast, (E), 25:14898
neutron reactions with nuclei at 600 MeV, cross sections for π^+ production in, (E), 21:40144 (JINR-P1-3400)
neutron reactions with radiative channels, theory of, (T), 23:4081
neutron reactions with Z = 1 to 20, compilation of angular distributions and cross sections for, 25:5549 (BNL-400(3rd Ed.)(Vol.1))
neutron reactions with z = 26 to 79, resonance parameters, radiative widths, spins, and level spacings for resonances in, (E), 24:8861(T) (UCRL-Trans-10397)
neutron reactions with Z = 6 to 26 and 82, at 15 MeV, γ production cross sections for, (E), 21:42570
neutron reactions with Z = 6 to 82, differential gamma production cross sections for fast, (E), 21:25518 (WASH-1071)
neutron reactions with, (E/T), 25:9948
neutron reactions with, analysis of resonance structure using distribution-free statistics, (T), 25:46134
neutron reactions with, coincidence counter arrangement for detection of charged particles from, 21:30716
neutron reactions with, coincidence detectors for analysis of fast, 23:4818
neutron reactions with, computer program for generating cross sections and resonance shielding parameters for, 24:30866 (AAEC/TM-520)
neutron reactions with, correlations between reduced neutron widths and partial radiative widths of resonances, (T), 25:46094(T) (BNL-tr-417)
neutron reactions with, counter telescope for measuring angular distribution and energy of charged particles produced in, 22:6638
neutron reactions with, detector shielding for measuring total cross sections for, 25:6551
neutron reactions with, direct excitation of fission degrees of freedom by fast and slow, 21:31888
neutron reactions with, effect of nonuniform targets on total cross section measurements for, 25:36811
neutron reactions with, energy dependence of average radiation widths for, (T), 25:15209
neutron reactions with, energy dependence of energy level density from, (T), 25:15208
neutron reactions with, index to data in Experimental Cross Section Information Library, 25:28356 (UCRL-50400(Vol.3))
neutron reactions with, lectures on cross-section calculation methods, (T), 25:7883 (BARC/I-36)
neutron reactions with, motion-induced, temperature-independent effects on, (E), 25:34109
neutron reactions with, multiple scattering corrections for cross section measurements for, 25:34143
neutron reactions with, research program on fast, (E/T), 21:5552
neutron reactions with, resolution of photopeaks in gamma spectra from, 21:34029 (NIM-80)
neutron reactions with, review of theories of, 21:40482
neutron reactions with, role of special motion states in, 25:15206
neutron reactions(n,α), (n,γ),(n,n'γ), (n,p), and (n,2n) at 0.025 eV and 3 and 14 MeV, cross sections, threshold energies, half-lives, and gamma energies from, (E), 25:5685 (KFKI-70-18-NAC)
neutron resonance absorption at intermediate energies, calculation of resonance integrals using generalized intermediate resonance method, (T), 24:26653
neutron resonance absorption by, temperature dependence of profiles for, (T), 21:27647
neutron resonance absorption integrals for fission-product, data evaluation using single-level resonance parameters, 21:35463 (RT/FI-(67)4)
neutron resonance area analysis using mutual-indication method, (T), 23:8909
neutron resonance area analysis using mutual-indication method, selection of foreign resonance for, (T), 23:8910
neutron resonance capture by, computer-based multiparameter magnetic tape recording system for gamma ray measurements in, 21:32540
neutron resonance capture by, few-group formalism for, (T), 21:9904 (AEEW-R-489)
neutron resonance cross sections at low energies, computer program for, (T), 25:56814 (COO-2022-7)
neutron resonance data files for, computer program for preparing, 23:5773
neutron resonance densities in rare-earth, effects of nuclear deformation on, (T), 22:42015 (JINR-P4-3925)
neutron resonance Doppler broadening in, (T), 21:42526 (RPI-328-97, pp 131-43)
neutron resonance Doppler broadening, (T), 21:42638
neutron resonance integral equation for, correction factor for, (T), 21:9908
neutron resonance integrals and Doppler coefficients, computer program for calculating, 21:42522 (NAA-SR-12509(Vol.1))
neutron resonance integrals for Z = 25 to 90, tables of, 21:17288
neutron resonance integrals for, calculations using two-level formalism for effective, (T), 23:5751 (RT/FIMA-(68)2)
neutron resonance integrals in continuum region, infinitely dilute, (T), 21:40458
neutron resonance integrals of, calculation of Doppler-broadened functions for, 21:27648
neutron resonance parameter distributions for interfering resonances, (T), 23:15523
neutron resonance parameters for A > 220, evaluation of data on, 25:15094
neutron resonance parameters for A < 220, neutron-spectroscopy analysis of, 25:15095
neutron resonance parameters for A = 51 to 209, systematics of, (E), 23:5854
neutron resonance parameters for fissile, (E/T), 23:5916
neutron resonance parameters for fissile, computer program for converting R-matrix to Kapur—Peierls formalism, 23:42913 (ORNL-TM-2599)
neutron resonance parameters for strongly absorbed neutrons, average, (T), 23:1882 (WASH-1093)
neutron resonance parameters for, corrections for self-indication method for determining, (T), 22:24911
neutron resonance parameters for, correlations of, (T), 22:14066
neutron resonance parameters for, cross-section data analysis for, (E/T), 23:5778
neutron resonance parameters for, determination using mutual-indication method, (T), 23:8909
neutron resonance parameters for, determination using mutual-indication method, (T), 23:8910
neutron resonance parameters for, measurement using slowing-down-time spectrometers, 21:15565 (CONF-660221-, pp 273-8)
neutron resonance parameters for, methods for resolution corrections to, (E/T), 22:41917 (CNAEM-51)
neutron resonance parameters for, self-indication method for determining, (T), 22:24912
neutron resonance parameters from transmission data, computer program for least squares area analysis, 21:11923 (GA-6906)
neutron resonance parameters of fissile, statistical properties of, (T), 24:6963
neutron resonance parameters of fissionable, correction for unresolved resonances, (T), 21:15584
neutron resonance parameters of fissionable, correlations of, (T), 22:18214(T) (BNL-tr-187)
neutron resonance parameters of I = $^1/_2$ and $^3/_2$, spin dependence of s-wave, (E/T), 22:53166 (CEA-R-3385)
neutron resonance positions in complex, correlations of, (T), 23:5969
neutron resonance resolution and spacing, (T), 21:17272
neutron resonance scattering by A = 147 to 193, at 0.5 to 25 eV, (E), 21:25561
neutron resonance scattering by, analysis of unbound levels using method of Weinberg quasiparticles, (T), 25:43988
neutron resonance self-shielding factors for fast reactor materials, (T), 22:53066 (KFK-770)
neutron resonance spin assignment by simultaneous analysis of capture, fission, and total cross-section data, (T), 23:5774
neutron resonance spin assignment for, method for, 23:17103(R) (ANL-7481)
neutron resonance spins for fissionable, methods for determining, (E), 22:18294
neutron resonances in A = 155 to 176 rare-earth, systematic properties of, (E/T), 21:30012
neutron resonances in A = 60 to 247, analysis of radiative widths of, (E/T), 25:34045
neutron resonances in unresolved regions, probability for missing, (T), 23:7356
neutron resonances in, statistical estimation of average spacing in, (T), 24:15946 (AAEC/TM-515)
neutron resonances in, with 51 less than or equal to A less than or equal to 205, 21:7819 (FEI-36)
neutron resonances of, correlations between particle radiative widths and degree of K-forbiddenness of, (T), 25:50685
neutron s-wave strength function and potential scattering radius for, calculations using optical model, 21:23546
neutron scattering at 10 GeV/c, Glauber model calculations for total cross sections for, 24:3698
neutron scattering at 14.8 MeV, nonelastic cross sections for, 21:16185
neutron scattering at 24 MeV, calculations using optical model, (T), 21:4343
neutron scattering at low energies, analysis using attractive square-well potential, (T), 25:31415
neutron scattering at low energies, wave packets in theory for, 21:27441
neutron scattering below 2 MeV, optical model parameters for, (T), 25:50858
neutron scattering by chemically bound, theory of, 21:25411
neutron scattering by deformed even-even, intermediate resonances in, (T), 21:21596
neutron scattering by even-even rotational, computer program using coupled-channel formalism, 21:35503 (RT/FI-(67)10)
neutron scattering by heavy, effects of long-range interactions in, (T), 21:23534(R) (ANL-7246)
neutron scattering by heavy, imaginary part of optical potential for, (T), 22:30069
neutron scattering by oriented, cross section and spin-flip probability for, (T), 22:44791
neutron scattering by polarized, magnetic, (T), 21:27636
neutron scattering by, analysis of velocity-dependent potentials for, (T), 25:46118
neutron scattering by, analytic solution using Woods—Saxon potential for S-wave, (T), 23:9057
neutron scattering by, design and performance of 4π neutron source for measuring cross sections for, 21:40359
neutron scattering by, effects of nuclear surface in, (T), 25:1767
neutron scattering by, electromagnetic and weak interaction contribution to potential for, (T), 25:1773
neutron scattering by, influence of magnetic moment interaction with Coulomb field on, (T), 23:25953
neutron scattering by, method for imposing conditions of experimental resolution broadening on theoretical models for, 25:50833
neutron scattering by, Monte Carlo computer program for finite-geometry and polarized multiple-scattering corrections to polarization data from, 22:7625
neutron scattering by, resonance interference in, (T), 22:50657 (ANL-7467)
neutron scattering by, use of analytical and Monte Carlo methods for determining multiple scattering corrections in analysis of, 22:1579
neutron scattering by, widths of intermediate resonances in, (T), 22:27372
neutron scattering cross sections for, effects of 2p-1h states on, (T), 22:53243
neutron scattering cross sections of non-fissionable, measurement using time-of-flight method, (E/T), 22:16000 (CEA-R-3360)
neutron scattering cross sections of, optical-model calculation of fast, (T), 21:4365
neutron scattering from even—even nonspherical, analysis using optical model and statistical theory, (T), 23:25954
neutron scattering from polarized, in magnetically ordered solids, spin-dependent thermal, 24:45722
neutron scattering near excitation threshold of lower level in, gamma spectrometer system for measuring, 23:41055
neutron scattering on, fast Fourier transformation of time-of-flight spectra for obtaining intermediate scattering functions for cold, 25:32267
neutron separation and pairing energies in even-Z N = 82 through 126, (E), 23:47034
neutron separation energies for even-even, systematics of, 22:20714
neutron separation energies for even-even, systematics of, 22:20714
neutron separation energies of ground states of, calculation using supermultiplet theory, (T), 22:39695 (UCRL-17989, pp 101-25)

neutron single-particle states in, calculation for spin-orbit splitting effect using velocity-dependent potential, 24: 24627
neutron spectroscopy of heavy, review of, (E/T), 25: 1735(T) (BNL-tr-351)
neutron stability of, shell-model calculation of, (T), 24: 8942
neutron strength function and potential scattering radius for A = 40 to 200, s-wave, (T), 22:35314
neutron strength functions and scattering radii for A = 50 to 200, energy dependence of, (E), 22:18285
neutron strength functions for A = 60 to 203, (T), 25: 25703 (AAEC/E-211)
neutron strength functions for even-even, calculation from radiative capture cross sections, 21:17405
neutron strength functions for heavy even—even, calculations using strong-coupling deformed-nucleus model, (T), 23:21358
neutron strength functions for heavy even-even rotor, calculation using deformed nuclear optical model, (T), 22:27093
neutron strength functions for heavy even-even, effect of nuclear deformation, (T), 22:18211 (NAA-SR-Memo-12538)
neutron strength functions for medium and heavy, (T), 21:10071
neutron strength functions for medium-weight and heavy, (T), 22:16017(T) (BNL-tr-189)
neutron strength functions for statistical analysis of spin dependence of, (T), 24:28825(T) (KFK-tr-308)
neutron strength functions for, R-matrix and S-matrix, (T), 22:44759
neutron strength functions for, statistical analysis of spin dependence of, (E), 24:30887
neutron strength functions for, tables of S-wave, 21: 21591
neutron strength functions in scattering length approximation, S-matrix s-wave, (T), 22:44760
neutron strength functions of A = 51 to 209, mass dependence of, (E), 23:13226 (CEA-R-3609)
neutron total cross sections at 0.1 to 10.0 MeV, intermediate structure in, (E/T), 25:20445
neutron total cross sections for Z = 1 to 94, effects of nuclear deformation in fast, (T), 25:28169
neutron total cross sections for Z = 1 to 94, effect of nuclear deformation on fast, (E/T), 23:10934
neutron total cross sections for Z = 12 to 83, fluctuations in fast, (E), 21:35451
neutron total cross sections for Z = 12 to 83, search for intermediate structure in fast, (E), 22:20537
neutron total cross sections for, effect of nonuniform targets on transmission measurements of, 25:31173(R) (RPI-328-200)
neutron total cross sections of A = 51 to 209, time-of-flight measurements of, (E), 23:5854
neutron total cross sections of even-odd, at low energy, (E), 21:2661
neutron total cross sections of Z = 1 to 94, at 2.5 to 15 MeV, (E), 25:28170
neutron total scattering cross sections for, giant-resonance effects on, (T), 21:31848
neutron transport cross sections for Z = 13 to 82, at 0.65 MeV, (E), 23:10959(T) (BNL-tr-242)
neutron—proton correlations in light, 24:11035
neutron—proton correlations in light, analysis using Green's function, 23:47082
neutron—proton correlations in light-weight, (T), 21: 42678 (JINR-P4-3431)
neutron—proton correlations in medium and heavy, (T), 25:5853
neutron—proton correlations in, criteria for Slater determinants and quasiparticle vacuum states for, 23: 31088
neutron—proton interactions in mirror, charge-exchange effect on effective, (T), 25:50848
neutron—proton interactions in N = 29, effective, 22: 27306
neutron—proton interactions in odd—A, (T), 21:31842
neutron—proton pairing correlations in N not equal to Z light, T = 0, (T), 24:35907
neutron—proton pairing correlations in, generalized BCS method for, (T), 23:21379 (ZFK-130, pp 182-3)
neutron—proton pairing in light-weight, (T), 21:44752 (ZFK-122, pp 343-8)
neutron—proton pairing in light-weight, (T), 21:44752 (ZFK-122, pp 343-8)
neutron—proton pairing interaction in spherical odd-A, surface delta interaction formalism for, (T), 23:4061
neutron—proton pairing interactions in, behavior near critical point, (T), 23:21380 (ZFK-130, pp 184-5)
neutron—proton residual interactions in shell-model configurations, (T), 23:52120 (UCRL-18667, pp 65-132)
neutron-level spacing distributions for intermediate and heavy, deviations from statistical description of, (T), 24:8941
neutron-proton correlations in light, analysis using R5 group, 25:20493
neutron-proton interactions in heavy, (T), 21:4334
neutron-proton interactions in heavy, (T), 21:4335
neutron-proton pairing interactions in N = Z, (T), 21: 19319
Nilsson intrinsic states in odd-A, (E/T), 22:53215
nuclear binding energies and charge radii for even—even A = 12 to 208, Hartree—Fock calculation of, (T), 25: 36712
nuclear charge distribution of deformed, (E/T), 25: 1739(R) (NYO-73-293)
nuclear charge distribution of, comparison of Fermi and oscillator, (T), 23:49455
nuclear charge distributions for intermediate and heavy, self consistent calculations for, (T), 24:1899
nuclear charge distributions in odd-A, calculations using Fermi liquid model, (T), 23:52183
nuclear charge distributions in, isotope-shift of, (T), 24: 49935 (UCSD-10-P-11-105)
nuclear data sheets for A = 21 to 228, keywords and recent references for, 23:25881
nuclear data sheets for A = 50 through 54, 24:43309
nuclear effective charges for, second-order corrections to, (T), 24:43545
nuclear electric quadrupole moments of first 2⁺ levels in spherical, calculation in two-quasiparticle approximation, (T), 23:47060
nuclear electric quadrupole moments of Z = 7 to 21, (T), 25:28189
nuclear isomer shift in rotational, self-consistent cranking model calculation for linear polarization contribution to, (T), 24:52711
nuclear magnetic dipole interactions in odd-A deformed, (T), 23:40097
nuclear magnetic resonance of, effect of two rotating magnetic fields on perturbed angular correlations in, (T), 24:24179
nuclear mass and deformation properties of A > 100, dependence of pair correlations on, 24:49927 (JINR-P4-5125)
nuclear orientation at low temperatures, static method for, 23:23790
nuclear orientation of spin >1, dynamic, (T), 23:49470
nuclear properties of A = 14, shell-model calculations of, (T), 25:23087
nuclear properties of light, conference on, 23:25781
nuclear properties of light, conference on, 23:25789
nuclear properties of Z greater than or equal to 83, summary of work in France on, 25:12524 (LYCEN-7034, pp 84-93)
nuclear quadrupole moment of, effects of bound μ meson on, (T), 25:43913
nuclear quadrupole moments and deformation parameters for A = 150 to 190 and A > 220, tables for, 25:1742
nuclear quadrupole moments of A = 182 to 196, (T), 25:28316 (CERN-70-30(Vol.2), pp 779-812)
nuclear quadrupole moments of oriented, determination using perturbed angular correlations, (T), 24:30892
nuclear radii and surface properties for N = Z closed-shell, calculation using effective interaction, (T), 24: 43537
nuclear radii of, determination using fast neutron total cross sections, 23:47069
nuclear radii of, effect of nonoriented target nuclei in determination by alpha scattering, 24:43601
nuclear scattering by, use of nuclear-structure calculations in description of, (T), 24:38359
nuclear stability of A = 230 to 250, effects P_3 degree of freedom on, (T), 24:3980
nuclear stability of Z = 114, self-consistent shell-model calculations for, (T), 23:31073
nuclear structure properties of 2s-1d shell, calculations using Hartree—Fock—Bogolyubov theory, (T), 23: 52132
nuclear structure properties of light, description using realistic interactions, (T), 23:47066
nuclear structure properties of odd-A, calculations using Samm—Dancoff approximation and surface delta interaction, (T), 23:42980
nuclear temperature of residual, from (n,p) reactions, (E/T), 24:15833
nuclei scattering at high energies, study of composite hadron potential strong interactions from, (T), 24:1615 (INP-679)
nucleon and antinucleon reactions above 50 MeV, cross-section data compilation for, 23:19330(T) (ORNL-tr-2073)
nucleon and antinucleon reactions above 50 MeV, cross-section data compilation for, 23:5944 (JINR-P2-4068)
nucleon binding by long-range potentials, (T), 21:1131
nucleon binding energies in light, (T), 21:13929
nucleon binding energy in, 21:5574
nucleon binding energy in light and medium-weight, (T), 21:12105
nucleon binding energy in, effect of nuclear mass on, 21: 31885
nucleon binding energy in, one-meson-exchange potentials for N + N interactions at 0 to 400 MeV for, (T), 22:11694
nucleon bound states in Woods—Saxon well in, computer program for, (T), 24:45800 (RT/FI-(69)30)
nucleon capture at high energies, effective charge factor for E1, (T), 25:5839
nucleon capture by, spin-orbit interaction in, (T), 22: 9977
nucleon capture in giant resonance region by, cross sections for, (T), 24:47609
nucleon cluster structure in light, research using (Li-6,α) reactions, (T), 22:26879
nucleon clustering in heavy, 21:17430
nucleon clustering in heavy, (T), 21:1137
nucleon clusters in light, research using reactions at high energy, (E), 22:14116
nucleon clusters in p-shell, formalism for, (T), 23:25964
nucleon collective motion in, roton theory for, 24:30878
nucleon correlations and momentum distributions in, research using high-energy proton experiments, (E/T), 23:9028 (TID-24667, pp 417-23)
nucleon correlations in finite, variational method for two-body, 21:25581
nucleon correlations in ground states of, observation of, (T), 23:9022 (TID-24667, pp 325-9)
nucleon correlations in ground-state, calculations using quasiparticle formalism, (T), 23:9060
nucleon correlations in p-shell, methods for studying, (T), 23:21376 (ZFK-130, pp 58-69)
nucleon correlations in surface of, short-range, 21:19304
nucleon correlations in, definition of, (T), 23:9021 (TID-24667, pp 319-24)
nucleon correlations in, Green function method for four-body, (T), 21:21584
nucleon correlations in, research using (γ,np) reactions, (E/T), 23:9034 (TID-24667, pp 480-1)
nucleon correlations in, research using particle scattering at very high energy, (T), 23:9025 (TID-24667, pp 359-68)
nucleon correlations in, research using proton scattering at high energy, (E/T), 23:9027 (TID-24667, pp 382-96)
nucleon correlations in, short-range, (T), 22:11944(R) (AECL-2780)
nucleon correlations in, testing of, 23:9023 (TID-24667, pp 330-45)
nucleon correlations in, unitary-model-operator approach to, (T), 23:1928 (AD-671692)
nucleon correlations with contact and pairing interactions, four-body, (T), 21:2778
nucleon Coulomb and particle—hole interactions in shells of, Wigner supermultiplet scheme for, 23:51969
nucleon current in, effect of conservation of, (T), 23: 13335
nucleon decay in, SU(6) estimate of effective nonleptonic parity-violating coupling in, 23:34634
nucleon density distribution in, (T), 22:48606
nucleon density distribution in, statistical calculation accounting for radial kinetic self-energy correction to, (T), 24:3969
nucleon density distributions for cascade calculations, (T), 23:7281(R) (ORNL-4280)
nucleon density distributions in finite, calculations using model with effective potential, (T), 23:23801
nucleon density distributions in N = Z and A = 40, 100, and 200, calculation using effective interaction, (T), 24:16000
nucleon density distributions in, research using high-energy facilities, 23:19333 (RHEL/R-166, pp 7-17)
nucleon density in, corrections for oscillations in calculations of, 25:17961
nucleon density of deformed, calculation using independent-particle model, 25:31437
nucleon differential inelastic scattering cross sections for, double-scattering corrections to, (T), 21:30056
nucleon distribution in, (T), 22:32686
nucleon distribution in, (T), 22:32686
nucleon distribution in, calculation using Fermi-gas theory, (T), 22:14093
nucleon effective interaction for light and intermediate, phenomenological, (T), 23:15496
nucleon effective interactions in A = 18, number-conserving third-order renormalization contributions to, (T), 24:1905
nucleon effective interactions in, survey of two-nucleon studies on, 23:47065
nucleon elastic and inelastic scattering above 50 MeV, tables for cross sections and total cross sections for, (E), 24:20085
nucleon elastic and inelastic scattering by, (T), 24:22209
nucleon elastic and inelastic scattering by, exchange effects in microscopic description of, (T), 24:52649 (TID-25504)
nucleon elastic and inelastic scattering by, realistic interactions for exchange effects in microscopic descriptions of, (T), 25:31432
nucleon elastic scattering and polarization by, diffraction-model calculations of, (T), 21:46795
nucleon elastic scattering at 4 to 30 MeV by A = 40 to 210, polarization in, (T), 25:53867
nucleon elastic scattering at high energy, cross sections for, (T), 21:17392
nucleon elastic scattering at large angles, cross section and polarization in, (T), 23:45004
nucleon elastic scattering at low energy, polarization in, (T), 21:23560
nucleon elastic scattering at low energy, resonances in, (T), 21:13924
nucleon elastic scattering by light, calculations using impulse approximation with multiple scattering, (T), 21:27650
nucleon elastic scattering by light, effects of approximate wave functions on analysis of, (T), 25:43971
nucleon elastic scattering by Z = 13 to 92, variation of real well depth of nonlocal potentials in optical-model analysis of elastic, (T), 25:53878
nucleon elastic scattering by, analysis using Regge pole theory, (T), 25:50872
nucleon elastic scattering by, angular momentum methods for studies on, 24:52717
nucleon elastic scattering by, computer program for optical-model analysis of, 25:56815 (INP-741)
nucleon elastic scattering by, exact optical-model description of, 21:44746 (ZFK-122, pp 146-8)
nucleon elastic scattering by, generalized Hartree—Fock approximation for, (T), 22:27252
nucleon elastic scattering by, optical-model potential for, 21:31860
nucleon elastic scattering by, polarized, (E/T), 21:21597
nucleon elastic scattering, perturbation theory of, 24: 24681
nucleon emission from, stability against, (T), 21:37040
nucleon fission at low energies, research at Catholic Univ., (E/T), 24:52568(R) (TID-25351)
nucleon ground-state correlations in light, (T), 24:1906
nucleon ground-state correlations in, boson expansions for, 24:40717
nucleon inelastic reactions above 1 GeV, change of cascade mechanism for, (T), 24:15599(T) (ORNL-tr-2258)
nucleon inelastic reactions at 5 GeV, change of mechanism for, (T), 24:8668
nucleon inelastic reactions with, conservation laws in elementary act for intranuclear cascade calculation of, 22:22410 (JINR-P4-3714)
nucleon inelastic scattering at 156 MeV, analysis using WKB method with impulse approximation, (T), 21: 21607
nucleon inelastic scattering at medium energies, analysis using coupled-equation method and DWBA, (T), 24: 49918 (CEA-R-3950)
nucleon inelastic scattering at medium energies, microscopic analysis using realistic potentials, 25: 31393 (COO-1051-34)

nucleon inelastic scattering by 2s1d-shell, description using independent-particle model, (T), 21:17318(R) (AECL-2659)
nucleon inelastic scattering by single-hole, description using finite Fermi system, (T), 23:42984
nucleon inelastic scattering by, analysis using spin-orbit interaction, (T), 25:56826 (LYCEN-7104, C7.1-36)
nucleon inelastic scattering by, antisymmetrized distorted wave theory for, 25:34192
nucleon inelastic scattering by, antisymmetrized distorted-wave approximation for, (T), 21:12102
nucleon inelastic scattering by, antisymmetry in distorted-wave calculations of, (T), 22:1726
nucleon inelastic scattering by, DWBA analysis using realistic nucleon—nucleon interactions of, (T), 25:59858
nucleon inelastic scattering by, effective nucleon-nucleon interaction for, (T), 21:13930
nucleon inelastic scattering by, factorization approximation for continuum—continuum interaction in coupled-channel theory for, 24:43590
nucleon inelastic scattering by, formalism for, (T), 25:12701
nucleon inelastic scattering by, interference of direct and compound-nucleus mechanisms in, (T), 21:23577
nucleon inelastic scattering by, interference of prompt and delayed mechanisms in, (T), 21:38391
nucleon inelastic scattering by, knockout-exchange amplitudes for, (T), 22:42143
nucleon inelastic scattering by, parity violation in γ circular polarization from, (T), 25:39100
nucleon inelastic scattering by, polarization in, (T), 21:2816
nucleon inelastic scattering by, second-quantization formalism including core polarization, (T), 23:23758
nucleon interaction in odd^{+}odd, effective, (T), 22:48587 (JAERI-1158, pp 138-44)
nucleon interaction in pf-shell, effective, (T), 22:48586 (JAERI-1158, pp 133-7)
nucleon interactions at small distances in, 21:37855
nucleon interactions below 330 MeV in, meson model of nuclear forces for, 21:17135 (JINR-P4-3135)
nucleon interactions in 2s—1d shell of, core-polarization corrections to, (T), 25:10079
nucleon interactions in 2s1d shell, calculations using SU(3) representation, 21:38377(R) (PUC-937-260)
nucleon interactions in A = 40 to 60, 1f/sub $^{7}/_{2}$/-2p/sub $^{3}/_{2}$/, (T), 21:17393
nucleon interactions in ds-shell, 21:25580
nucleon interactions in heavy, residual, (T), 21:35437(R) (EANDC(E)-76(U))
nucleon interactions in light, bound states with coupling constant for, 23:18878 (ITF-68-45)
nucleon interactions in N = 29, effective, (T), 22:27306
nucleon interactions in sd-shell, effective two-body matrix elements for, (T), 22:20696
nucleon interactions in, (T), 21:2077 (TID-23318, pp 173-86)
nucleon interactions in, accuracy of approximate methods for superfluid model, 21:23537 (JINR-P4-3124)
nucleon interactions in, equivalent potentials and many-body forces in, 21:13906
nucleon interactions in, generalized seniority breaking of two-body, 22:24921
nucleon interactions in, matrix for central forces for irreducible form of central, 21:19311
nucleon interactions in, method of bosons for transcription of quasi-particle in ideal space for, 23:16970
nucleon interactions in, models for, 21:17136 (JINR-P4-3136)
nucleon interactions in, parity conservation and time-reversal invariance in, 21:4003 (INP-494/PL/PH)
nucleon interactions in, π and meson resonance exchange contribution to nuclear forces, 22:39431
nucleon interactions in, self-consistent theory of, (T), 21:25579
nucleon interactions in, surface delta, (T), 21:17421
nucleon interactions in, tensor forces in residual, (T), 21:44781
nucleon interactions in, theory of effective local, 21:35507
nucleon interactions in, variational calculations on three-body problem with realistic local potentials for, 23:32775
nucleon magnetic moments in, contribution of pion currents to, (T), 21:27657
nucleon momentum distributions in, research using (e, e'n), (e,e'p), and (e,e'np) reactions, (E/T), 23:9029 (TID-24667, pp 427-42)
nucleon motion in, electric form factor for few-nucleon system from, 24:30953
nucleon motions in closed-shell, self-consisten potential for individual, 21:15620
nucleon pairing approximation for shell model, (T), 22:7751
nucleon pairing correlation functions for, determination of, (T), 22:48614
nucleon pairing correlations in double magic, (T), 21:44751 (ZFK-122, pp 337-42)
nucleon pairing correlations in even—even N = Z, generalized Bogoliubov transformation for charge-symmetric, (T), 23:9052
nucleon pairing correlations in even-even, with particle-number conservation, (T), 21:46811
nucleon pairing correlations in, effects of shell structure and matrix-element fluctuations on, 21:31854
nucleon pairing correlations in, isospin and number-conserving formalism for, (T), 22:14071 (IPNO/TH-110)
nucleon pairing correlations in, without violation of conservation laws, (T), 22:9950
nucleon pairing energies for A = 100 to 256, calculations using superfluid model, (T), 22:14065
nucleon pairing energies for deformed and spherical A = 100 to 256, calculations using superfluid model, (T), 22:7741 (JINR-P4-3584)
nucleon pairing energies for deformed and spherical 100 < A < 256, calculations using superfluid model, 21:34027 (JINR-P4-3329)
nucleon pairing energies in, systematics of, (T), 23:28304 (WASH-1124)
nucleon pairing interaction in A = 8 to 56, (T), 21:40494
nucleon pairing interaction in even-even N = Z, weak, (T), 22:27304
nucleon pairing interaction in, (T), 22:1741
nucleon pairing interactions for non-degenerate j levels in, charge-independent, (T), 22:5908
nucleon pairing interactions in f($_{7}/_{2}$)-shell, 21:29932
nucleon pairing interactions in, charge- and spin-independent, 21:38418
nucleon pairing interactions in, formalism for, (T), 21:17431
nucleon pairing interactions in, tensor forces in, 21:44801
nucleon pairing vibrations in, (T), 23:40143
nucleon potential for n-nucleon system of, S-matrix for two-, 22:35363 (AD-665366)
nucleon potentials for even-even, semi-empirical, 21:15613 (CONF-660221-, pp 171-5)
nucleon potentials for Hartree—Fock calculations of, (T), 22:32718
nucleon potentials in, meson theory for, 23:31056 (JINR-P4-4376)
nucleon potentials in, strength of repulsive, (T), 22:5878
nucleon quasi-free scattering by, review of research on, 23:37352
nucleon radiative capture by, compound-nucleus model of, (T), 25:31303 (INR-1271)
nucleon reactions above 1 GeV, Monte Carlo method for multiparticle production in, 22:46424
nucleon reactions above 1 TeV in emulsions, shower production in, (E), 22:39254(T) (ORNL-tr-1956)
nucleon reactions above 10 GeV, model for mechanism for, 21:46554
nucleon reactions above 10 TeV in emulsions, fireball model for, 22:5597 (INR-813/VI/PH)
nucleon reactions above 100 GeV, Monte Carlo method for many-body interactions in, 22:1379 (JINR-P2-3508)
nucleon reactions above 100 GeV, one-fireball model for azimuthal correlations for, 24:42993
nucleon reactions above 20 GeV, spectrometer and cloud chamber study of energy transfer to π^0 in, (E), 25:1405
nucleon reactions above 3 GeV/c, extrapolation method for N and π differential production cross sections from, (T), 24:28562 (ORNL-4542)
nucleon reactions above 5 GeV, mechanism for intranuclear cascade production in, (E/T), 23:51951 (JINR-P2-4662)
nucleon reactions and inelastic scattering on light, cross-section relations using charge-independent forces, (T), 21:23413 (UCRL-50197)
nucleon reactions and scattering on, gamma angular distribution coefficients for, 21:30030 (ORO-2791-21)
nucleon reactions at 0.01 to 100 GeV, cascade evaporation model for Monte Carlo method for calculating, (T), 25:59508(T) (ORNL-tr-2514)
nucleon reactions at 0.1 to 100 TeV in emulsions, angular distributions, pionization and fireballs in, (E), 25:9635 (INP-722)
nucleon reactions at 1.2 x 10^{10} to 2.5 x 10^{13} eV in emulsions, (E), 24:20074
nucleon reactions at 10^{13} to 10^{14} eV, production of EAS from, (E), 24:21932
nucleon reactions at 25 to 400 MeV, computer program for cascade calculations, (T), 22:16059 (ORNL-4220)
nucleon reactions at 50 to 80 GeV in emulsions, intranuclear cascade model calculations for, 23:36952 (JINR-P2-4510)
nucleon reactions at high and superhigh energies, multiple-particle interactions, resonance production, and changes in nuclear matter density during intranuclear cascades from, (T), 24:1616 (JINR-E2-4607)
nucleon reactions at high and superhigh energies, cascade calculations for, (T), 25:1552 (JINR-E2-5282)
nucleon reactions at high energies with intranuclear cascades, statistical calculations for inelastic, 23:30754(T) (ORNL-tr-2123)
nucleon reactions at high energies, cross sections for inelastic, (T), 23:27823
nucleon reactions at high energies, cross sections for coherent and incoherent particle production in, (T), 22:22419
nucleon reactions at high energies, model for production of two angular distribution maxima in, 22:46461
nucleon reactions at high energies, optical potential for, (T), 24:52141
nucleon reactions at high energies, Regge pole model for, 22:1450 (AD-648017)
nucleon reactions at high energies, review of total cross sections for, (E), 25:7679 (CONF-690608-, pp 167-87)
nucleon reactions at high energies, two-body correlation function for elementary cross section for, (T), 24:3706
nucleon reactions at high energies, very high-momentum nuclear components for cross section upper limits for far subthreshold production of quarks in, (T), 25:20026
nucleon reactions at high energy, characteristics of, 24:5446
nucleon reactions at medium energies, review of, 24:52135
nucleon reactions in, properties of many-particle interactions from cascade production in, 22:29700(T) (ORNL-tr-1800)
nucleon reactions with A = 12 to 238, at 50 to 400 MeV, cascade calculations for, (T), 21:38235 (ORNL-4128)
nucleon reactions with collective modes of, coupled-channel calculation of, (T), 25:7916
nucleon reactions with, analog resonances in, (T), 24:40699
nucleon reactions with, angular distributions in cosmic, (T), 22:21932
nucleon reactions with, conservation laws for internal nuclear cascades in, 23:21128
nucleon reactions with, local change of intranuclear matter density in formulation of model for intranuclear cascade production in, (T), 25:53227(T) (ORNL-tr-2502)
nucleon reactions with, Regge-pole model for high-energy, 21:42395
nucleon reactions with, research on, 22:11980(R) (UCLA-10-P-18-4)
nucleon reactions with, theory for, 21:27317 (MIT-2098-299, pp 83-115)
nucleon rearrangement energy of light closed-shell, (T), 21:38400
nucleon scattering at 90 to 310 MeV, optical potential calculations for central two-body force, (T), 22:50668
nucleon scattering at high energies, diffractional peak width behavior for Gaussian, (T), 25:5424 (IFVE-STF-69-83)
nucleon scattering at high energies, nucleon—nucleon correlation effects on, (T), 24:13443
nucleon scattering at high energies, study of composite hadron potential strong interactions from, (T), 24:1615 (INP-679)
nucleon scattering at high energy, multipole analysis of, (E), 24:38303 (ITF-70-18)
nucleon scattering at high energy, theory using impact parameter approximation and phase-shift expansions, (T), 23:11051 (MIT-2098-495)
nucleon scattering at low energies, shell-model description of, 24:28855
nucleon scattering at low energy, shell-model formalism for intermediate resonances in, 21:31851
nucleon scattering at very high energies by light, 22:3309 (INP-555/PL/PH, pp 113-15)
nucleon scattering by A = 4, 5, and 6, analysis using refined cluster model, (T), 25:53851
nucleon scattering by light, analysis using multiple scattering optical model potential, (T), 22:27250
nucleon scattering by nonspherical, potential, (T), 21:7830
nucleon scattering by rotational, computer program for adiabatic coupled-channel analysis of, 23:42963 (RT/FI-(69)7)
nucleon scattering by, accuracy of off-shell amplitudes for, (T), 21:30046
nucleon scattering by, analysis using effective N-N interaction with core polarization and exchange effects, 24:15958
nucleon scattering by, calculation of s-wave phase shift for, (T), 22:14101
nucleon scattering by, core polarization in spin—spin interaction in, (T), 25:23068
nucleon scattering by, description using shell model, 21:31852
nucleon scattering by, effect of final-state interactions on initial-state nucleon—nucleon (T), 23:37306
nucleon scattering by, effective local optical-model potential for, 21:30063
nucleon scattering by, effects of exchange and Pauli principle on, (T), 21:23540 (MIT-2098-302)
nucleon scattering by, effects of exchange and Pauli principle, (T), 22:5896
nucleon scattering by, effects of exchange and Pauli principle in, (T), 23:19365
nucleon scattering by, effects of knockout—exchange mechanism on, (T), 24:40718
nucleon scattering by, eigenchannel calculations for, (T), 23:23791
nucleon scattering by, estimation of resonant-state lifetimes in, (T), 24:45830
nucleon scattering by, formalism for, (T), 21:19325
nucleon scattering by, formalism using random phase approximation, (T), 22:37388
nucleon scattering by, formulation of optical potential in RPA framework, (T), 25:46113
nucleon scattering by, forward dispersion relations for, (T), 24:49769
nucleon scattering by, isospin dependence of optical model potentials for, (T), 24:40698
nucleon scattering by, isotopic dependence of optical model parameters for, (T), 24:18462
nucleon scattering by, kinematic correlations in, 21:30064
nucleon scattering by, linear-response theory for, (T), 24:6958
nucleon scattering by, Lippman—Schwinger equation in shell-model formalism for, (T), 23:19390
nucleon scattering by, microscopic analysis using optical potential, 25:18023
nucleon scattering by, microscopic description using optical model, (T), 25:56822 (LYCEN-7104, C1.1-13)
nucleon scattering by, narrow resonances from unbound states in shell-model formalism, (T), 23:11061
nucleon scattering by, non-relativistic crossed partial-wave expansion for, (T), 23:19381
nucleon scattering by, nuclear Chew—Frautschi trajectory for, (T), 24:22215
nucleon scattering by, nuclear effects in multiple, (T), 24:52689
nucleon scattering by, nucleon polarization in, (T), 21:17424
nucleon scattering by, optical potential term in, (T), 21:25606
nucleon scattering by, recoil motion in, (T), 23:23776
nucleon scattering by, Regge theory for, (T), 23:13330
nucleon scattering by, role of compound nucleus levels in, (T), 24:33170
nucleon scattering by, RPA calculation of scattering matrix for, (T), 24:43587

nucleon scattering by, RPA calculation of scattering matrix for, (T), 24:24621
nucleon scattering by, Schroedinger equation for, (T), 21:10081
nucleon scattering by, single-particle resonances in RPA treatment of, (T), 25:3718
nucleon scattering by, structure in cross section for, (T), 24:38310
nucleon scattering by, surface coupling model for intermediate structure in, (T), 23:37342
nucleon scattering by, target spin dependence in optical-model description of, 25:15152
nucleon scattering in continuum region, RPA calculations with ground-state correlations in, (T), 23:9051
nucleon scattering up to 100 MeV, optical-model analysis of, (T), 21:44784
nucleon scattering with compound resonances, analysis using microscopic shell model, 24:8930
nucleon separation and pairing energies of spherical, calculations using effective two-body forces and Hartree-Bogoliubov approximation, (T), 23:23766
nucleon separation energies for, measurement using quasi elastic scattering experiments, (E/T), 21:25566 (ISS-67/2)
nucleon separation energies of, shell-independent systematics of, 22:35396
nucleon separation energies of, shell-independent systematics of, 22:35396
nucleon spallation cross sections for 9 less than or equal to A less than or equal to 32, (E/T), 21:25443
nucleon stability of light high-isospin, review of research on, 23:11063
nucleon structure in, model for, 24:52127
nucleon total cross sections at high energies, 25:47796
nucleon transfer from 1p-shell nuclei, spectroscopic factors for, (T), 21:38393
nucleon tunneling through potential barrier in nuclear reactions, (T), 21:46823
nucleon two-body interactions in, generalized seniority breaking of, (T), 22:24892 (IPNO/TH-121)
nucleon—nucleon correlations in, research using electron elastic scattering at high momentum transfer, (T), 21:31832 (INP-540/PL)
nucleon—nucleon forces in, calculation of effective forces from, 21:4327 (PUC-937-229)
nucleon—nucleon interactions in finite, effective, 22:27310
nucleon—nucleon interactions in heavy, review of Thomas—Fermi statistical approximation for meson theory of, (T), 25:17953(T) (BNL-tr-368)
nucleon—nucleon interactions in, lectures on effective, (T), 23:1935 (UCRL-18445)
nucleon—nucleon interactions in, residual, (T), 23:19362
nucleon—nucleon interactions in, tests for P and T violation in weak, 21:29601
nucleon—nucleon pairing interaction in, effects of self-energy term for, (T), 23:1940
nucleon—nucleon potential in, one-boson-exchange models for calculating, 24:37804 (NYO-4032-22)
nucleon—nucleon potentials for finite, 21:19305
nucleon—nucleon separable potentials in three-nucleon, test of Tabakin, 23:45001
nucleon—phonon interactions in, model for, 21:19300
nucleon-nucleon correlations in, measurement of time-dependent, using electron inelastic scattering, (T), 21:13907
nucleon-nucleon correlations in, research using proton elastic scattering at 1 GeV, (E), 21:29885
nucleon-nucleon interaction matrix elements in shell model, calculation from scattering phase shifts, 21:44754
nucleon-nucleon interaction with spin-orbit force, central-tensor, (T), 21:10098
nucleon-nucleon interactions for Hartree-Fock calculations, (T), 21:4336
nucleon-nucleon interactions in, representation using symmetry group, (T), 21:21599
nucleon-nucleon interactions in, residual, (T), 21:12075 (JINR-E4-3034)
nucleon-nucleon potentials in light, analysis of central, 25:20494
nucleosynthesis of neutron-rich, in supernova envelopes, (T), 24:23548(R) (NYO-3962-2)
nucleus reactions at high energies in emulsions, target mass and collision number dependence of heavy cosmic, (E), 24:42875
observations of solar low-energy, during 1967 at widely separated locations, (E), 25:55956
occurrence in neutron star matter, (T), 24:44879
octupole oscillator strength distribution in even-even spherical, with Z = 28 to 82, (T), 21:1138
octupole vibrational levels in deformed even, Bohr—Mottelson hydrodynamic calculations of K = 1, 2, 3, (T), 22:20705
octupole vibrations in deformed, 21:4279
octupole vibrations of deformed heavy, description using pairing + state-independent octupole force, (T), 22:44757
octupole vibrations of deformed, with N = 90 to 114 and N greater than 134, (T), 21:4279
odd-parity states in A = 6 and A = 14, 22:35382
odd-parity states in A = 6 and A = 14, 22:35382
one-particle states of deformed, accuracy of calculation of, 22:30050
optical potential of compound, 21:44769
orientation at low temperatures by ferromagnetic materials, (E), 21:23136 (CEA-R-2987)
orientation by optical pumping, (E), 21:46726 (UCRL-17765)
orientation experiments using low-energy neutrons, 23:17066
orientation of targets of, by beam excitation, 24:13235
orientation of, review of, 22:46566 (CERN-68-32)
orientation of, review of thermal equilibrium, 21:17413
origin of 20 < A < 62, in explosive nucleosynthesis, (T), 24:44867
overlap integrals for excitation of two-hole levels in light-weight, 21:44773
oxygen-16 reactions with heavy, upper limits for spontaneously fissionable isomers with nanosecond lifetime from, (E), 24:26638 (JINR-P7-5018)
pairing correlations in excited, with non-zero angular momentum, (T), 25:43969
pairing effects in deformed, Green function formulation of Migdal theory for, (T), 23:5977
pairing energy in spherical, equilibrium, (T), 25:50805 (JINR-E4-5925)
pairing forces in, description using quasiparticle approximation and exact diagonalization methods, (T), 23:13312 (UCRL-18614)
pairing in light, Hartree—Fock—Bogolyubov calculations of T = 0 and T = 1, (T), 25:17969
pairing in, demonstrated by a solvable model, (T), 24:11049
pairing interactions in, method for calculating in LST scheme, (T), 23:25970
parity and time reversal violation in, (T), 24:52695
parity and time-reversal invariance in, possible tests of, (T), 22:30084
parity deformation in spherical, 23:47071
parity states of A = 15, weak coupling calculation for positive, 25:17980
parity violating effects and weak interactions in, experimental studies on, 25:25811
particle binding by long-range potentials in nonrelativistic approximation, (T), 21:1131
particle differential inelastic scattering cross section for, (T), 21:4357
particle diffraction scattering by, integral cross sections for, (T), 22:18318
particle diffraction scattering with strong absorption, 21:27633
particle elastic and inelastic scattering by, computer program for, 21:4371
particle elastic and inelastic scattering by, method of complex angular momentum for cross sections for, 21:31887
particle elastic scattering at high energies, optical potential for, 23:52015
particle elastic scattering by, calculations using DWBA formalism, (T), 21:12080 (LYCEN-6634)
particle elastic scattering by, diffraction theory of polarization in spin-1/2, 21:38396
particle elastic scattering by, isospin effects on, 21:7827
particle elastic scattering by, observation of nonlocal effects in, 24:40708
particle elastic scattering with strong absorption, description using Regge representation, (T), 21:2780
particle elastic scattering with strong absorption, polarization in, (T), 21:21614
particle evaporation from excited compound, computer programs for calculating, 23:7281(R) (ORNL-4280)
particle inelastic reactions at high energies, cascade—evaporation model of, (T), 24:52114(T) (ORNL-tr-2373)
particle inelastic scattering at high energies, coupled-channels formulation for, (T), 25:39113
particle inelastic scattering by, computer program for multipole expansion of Woods-Saxon potential for, (T), 21:12081 (ORNL-TM-1709)
particle inelastic scattering by, formulas for excitation cross sections for, (T), 21:10094
particle inelastic scattering by, polarization calculations using optical model, (T), 21:21609
particle inelastic scattering by, violation of P invariance in circular polarization of photons from, (T), 24:10799
particle interactions at high energies, amplitude and cross sections for coherent production of stable and unstable particles in, (T), 25:25453 (JINR-P2-5604)
particle quasi-elastic scattering by, diffraction theory of, 21:10106
particle reactions at 4 to 200 GeV, coherent production from, 21:42397
particle reactions at high energies in emulsions, simultaneous detection of Dalitz pairs and localization of origins of π^0 produced in, (T), 24:40227 (IFA-CR-60)
particle reactions at high energies in quantum electrodynamics, 23:21153
particle reactions at high energies, coherent and incoherent production in, (T), 24:52059
particle reactions at high energies, computing process for intranuclear cascades from, 23:25645(T) (ORNL-tr-2130)
particle reactions at high energies, diffraction dissociation in, (T), 24:37811
particle reactions at high energies, lectures on diffraction in coherent and incoherent, (T), 25:22837 (INP-712(Vol.1), pp 107-43)
particle reactions at high energies, method for sampling inelastic π + N and N + N interactions in cascade theory calculations for, 22:7525 (JINR-P2-3561)
particle reactions at high energies, nucleon cascades in, 24:28565
particle reactions at high energies, optical limit of Glauber theory for, 25:3317
particle reactions at high energies, research on, 23:30705
particle reactions at high energies, review of experimental data on deuteron, triton, and alpha particle production in, 23:18796 (JINR-P2-4258)
particle reactions at high energies, specific character of cascade calculations for strange particle production from, 22:7488 (JINR-P2-3562)
particle reactions at high energy, production of multiply charged fragments in, (E/T), 23:19329 (JINR-P2-4160)
particle reactions at relativistic energies, kinematic broadening in, 22:37394
particle reactions at super high energies, specific character of cascade calcultions for, 22:7488 (JINR-P2-3562)
particle reactions at very high energies, hadron spectrum from cross sections for, 25:30905
particle reactions at very high energies, multiplicity in, (T), 25:14736
particle reactions below 200 GeV, computer program for simulating, 23:34615 (ORNL-TM-2627)
particle reactions in medium and heavy, theory of coherent and incoherent production of particles in, 22:39429
particle reactions with excited, resonance width determination from interference of identical particles in, (T), 25:45727
particle reactions with light, review of coherent, 22:32120
particle reactions with, analysis of mechanism of secondary particle production in, (T), 22:22413
particle reactions with, conference on, 25:47903
particle reactions with, Coulomb interference corrections to, 23:32770
particle reactions with, incoherent contributions to, 23:36871
particle reactions with, nuclear production mechanism for distinguishing between kinematic enhancements and resonances in, 24:1621
particle reactions with, one-particle exchange in coherent, 25:47904
particle reactions with, performance of silicon detector target for coherent, 25:46638
particle reactions with, radiation detectors for study of coherent, 25:46636
particle reactions with, shell theory for electromagnetic properties of, 23:39629
particle reactions with, theory of coherent and incoherent, 25:47796
particle reactions with, time of penetration through potential barrier for, (T), 21:27659
particle reactions with, unstable particle scattering for parameter violation of quasi-stationary levels in resonance production in, (T), 25:45823
particle scattering at high energies by, relation between Glauber approximation and Watson multiple-scattering equation for, 23:15152
particle scattering at high energies by, total cross sections for, (T), 23:13110
particle scattering at high energies, multiple diffraction theory for, (T), 22:17974
particle scattering at high energies, Reggeized absorption model for, (T), 25:5433
particle scattering at low energy, partial-wave description using local potentials, 21:40466 (JINR-P4-3354)
particle scattering by computer program for coupled-channel calculations of cross sections for, 21:40470 (ORNL-4152)
particle scattering by deformed, (T), 21:2767
particle scattering by light, at high energies, (T), 21:4324 (JINR-P-2881)
particle scattering by spin-3/2, projection operators for, 21:46495
particle scattering by, amplitudes and cross sections for diffraction, (T), 21:44782
particle scattering by, collapse onto scattering center in quantum mechanics for attractive potentials in, 24:40221
particle scattering by, cross sections for elastic diffraction, (T), 21:27653
particle scattering by, differential equations for half-off-shell matrix elements for, 23:15272
particle scattering by, exactly solvable model for compound resonance in, 22:44751 (JINR-E4-3837)
particle scattering by, forward amplitude with nuclear correlations and overlapping potentials for, 24:40709
particle scattering by, model for, (T), 21:2783
particle scattering by, multiple-scattering expansion of theoretical optical potential for, 25:36523
particle scattering by, polarization in spin-1, (T), 21:46800
particle scattering by, polarization phenomena in spin-1/2 and -1, 21:12094
particle scattering by, theories of, 21:15633
particle scattering by, time dependence of resonance, (T), 22:50684
particle scattering by, transformation matrices for, (T), 21:13925
particle scattering in presence of overlapping levels by, theory of resonance, (T), 25:7886 (JINR-P2-5328)
particle scattering in, Faddeev part in integral equations for six-point Green function for three-body, 23:52016
particle scattering theory for, distorted cluster states in, 21:19332
particle scattering theory for, lectures on, 21:5560 (ANU-P-351)
particle scattering theory for, variational bounds in, 21:13918
particle transfer reactions in heavy, (T), 22:46729(R) (AECL-3157)
particle—hole amplitudes of excited states in spherical, (T), 22:48617
particle—phonon interaction in odd-A, invariance properties of, (T), 23:5947
particle-hole excitation of, Coulomb force in, (T), 21:10111
particles separation energies for Z = 22 to 120, tables of, 22:1710 (LA-3751)
phase transition from spherical to deformed, analysis using variational method, (T), 24:3982
phonon—quasiparticle interactions in deformed odd-A, (T), 22:27328
phonon—quasiparticle interactions in deformed, (T), 24:24644
phonon-quasiparticle interaction in deformed even-even, (T), 21:46822
phonon-quasiparticle interaction in deformed, (T), 22:39694 (JINR-P4-3903)
photoabsorption cross section for three-body, calculation using Gammel—Brueckner potential for E1, (T), 23:37107
photoabsorption cross sections for deformed even—even, (T), 22:53176

photoabsorption cross sections for, analysis for nonlocal effects using separable potential, (T), 24:38383
photoabsorption cross sections for, effects of velocity-dependent nucleon—nucleon potential on integral dipole, (T), 22:44779
photodisintegration at low and intermediate energies, conference on, 24:26365
photodisintegration in giant resonance region, 22:7784
photodisintegration in giant resonance region, nuclear model calculation of final states in, (T), 23:40160
photodisintegration of A = 3 and 4, cross sections for, (T), 23:19149
photodisintegration of A = 3, analysis using dipole sum rule and realistic potentials, (T), 25:3768
photodisintegration of A = 3, cross sections for, (T), 22:7631
photodisintegration of heavy cosmic, in Colgate's supernova-acceleration model for cosmic rays, (T), 24:1304
photodisintegration of three-particle, effects of interaction of final nucleons on, (E/T), 21:2614
photodisintegration of three-particle, use of Majorana exchange forces in calculating, (T), 22:5902
photodisintegration of, calculation relative to electrodisintegration including exchange currents, (T), 25:7913
photodisintegration of, determination of exchange currents by, (T), 24:43523
photodisintegration of, exchange currents from, 24:40714
photodisintegration of, method for determination of cross sections for, 24:30879
photodisintegration of, theory of, (T), 22:13931
photofission of, description of near-barrier, 25:5850
photon absorption and scattering by deformed heavy, theory of, 21:31847
photon absorption by 1d-2s shell, configuration splitting of giant dipole resonance in, (T), 21:7730
photon absorption by deformed, giant quadrupole resonance in, (T), 21:2773
photon absorption by rare-earth, probabilities for collective E2 and E3 transitions in, (T), 21:30003
photon absorption by spherical even—even, giant quadrupole resonance coupling to surface vibrations in, (T), 24:38344
photon absorption by spherical, effects of surface vibrations on total cross sections for, (T), 21:23572
photon absorption by spherical, giant resonances in, (T), 21:1151
photon absorption by, dispersion sum rule for anomalous magnetic moment of nucleon from, 21:33657
photon absorption by, limits of validity of Siegert's theorem in, (T), 25:12649
photon absorption by, rho + N cross section effects on total cross sections for, (T), 25:22819
photon absorption by, spin dependence of cross sections for, (T), 21:5564 (JINR-P2-2974)
photon absorption cross section for oriented, in polarized beams, (T), 22:42125
photon absorption cross sections for, calculations using sum rules, (T), 22:27236 (NP-17348)
photon absorption cross sections for, effects of exchange Majorana forces on, (T), 22:24903
photon absorption in giant resonance region by heavy deformed, analysis using hydrodynamic model, 24:18460
photon absorption in giant resonance region of light, calculations using collective correlation model with surface delta interaction, (T), 23:23795
photon absorption in, vector meson dominance in, 23:18844
photon absorption with giant resonance excitation, research using radiative capture, (E), 22:5897
photon attenuation coefficients at 10 keV to 100 GeV, data tabulations and mechanisms for, 24:3492 (NSRDS-NBS-29)
photon attenuation coefficients in 1 < Z < 92, at 10 keV to 100 GeV, data tabulations and mechanisms for, 24:3492 (NSRDS-NBS-29)
photon Compton scattering on, total-cross-section sum rule for, 22:15720
photon cross sections for Z = 1 to 100, at 0.001 to 100 MeV, tables of, 22:5869 (LA-3753)
photon elastic and inelastic scattering by even-even, collective model analysis of tensor polarizability in giant resonance region, (T), 25:28489
photon elastic and inelastic scattering by, analysis of, (T), 25:3655
photon elastic and inelastic scattering by, spectra for neutron-capture, (E), 23:44924
photon elastic scattering by, conservation laws for Bethe—Salpeter equation for, 22:5877
photon emission from excited, violation of P invariance in circular polarization in, (T), 24:10799
photon energy absorption coefficients at 10 keV to 100 MeV, data tabulations for, 24:3492 (NSRDS-NBS-29)
photon exchange in, review of time reversal noninvariant angular correlations in virtual, 23:49182 (ITEF-650)
photon inelastic reactions at high energies, intranuclear cascade model for, 24:28827(T) (ORNL-tr-2267)
photon inelastic scattering by, at 180 < A < 208, intensity anomaly in, (T), 24:47603
photon inelastic scattering with pion production, excitation of giant resonance analogs in, 24:52679
photon interactions in field of, streamer chamber study of electron pair and triplet production in, 21:42244
photon interactions with lepton pair production, analysis for interference effects in, (T), 24:52019
photon interactions with spinless, coherent production of eta resonances from polarized, (T), 23:7115
photon interactions with, bubble chamber for studying π production in, 25:21434
photon interactions with, research at Notre Dame Univ, 25:1763(R) (COO-427-105)
photon interactions with, survey of theories and experiments on, 24:52697
photon mass attenuation and energy absorption coefficients at 10 keV to 10 MeV for, tables of, 23:20177 (CEA-R-3655)
photon reaction cross sections for Z = 1 to 94, at 0.001 to 15.0 MeV, 21:17297 (UCRL-50178)
photon reaction cross sections for Z = 1 to 95, at 0 to 150 MeV, data index for, 21:17354 (NP-16603)
photon reactions (γ,2γ) in electrostatic fields of, differential cross sections for, 21:38300 (NASA-TM-X-1403)
photon reactions (γ,2N) with double-magic, general formalism in terms of partial wave analysis for two-nucleon potential scattering for, 23:42982
photon reactions (γ,α) with, use for studying cluster structure, 24:20455
photon reactions (γ,e^+e^-) with, vector dominance model for rho—ω mixing in, 25:59364
photon reactions (γ,n) and (γ,p) at 40 to 140 MeV, shell model analysis with short-range nucleon-nucleon correlations, (T), 25:28488
photon reactions (γ,n) and (γ,p) with, angular-distribution calculations using j-j coupling model, 21:40499
photon reactions (γ,n) at 22 MeV with Z = 23 to 82, neutron angular distributions from, (E), 22:44656
photon reactions (γ,n) at 250 MeV, yields from, (E), 25:25767
photon reactions (γ,n) up to 30 MeV, review of, (E/T), 25:20448
photon reactions (γ,n) with heavy, angular distributions and spectra for, (E), 21:27569 (MIT-2098-299, pp 19-34)
photon reactions (γ,n) with light, mesonic contributions to, (T), 25:17957 (LUNP-7010)
photon reactions (γ,n) with, intermediate-coupling theory of, 21:31846
photon reactions (γ,np) with, description using Majorana exchange forces, (T), 23:13317
photon reactions (γ,np) with, nuclear correlation studies by, (E/T), 23:9034 (TID-24667, pp 480-1)
photon reactions (γ,p) and (γ,α) with, testing nucleon correlations by, (T), 23:9023 (TID-24667, pp 330-45)
photon reactions (γ,p) with 50 < A < 125, at 20 to 30 MeV, (E), 21:19217
photon reactions (γ,p) with Z < 80, at 20 MeV, yield curves for, (E), 22:35313
photon reactions (γ,p) with, research at Ames Laboratory on, 23:1580 (IS-1900, Paper 6)
photon reactions (γ,pn) with, short-range nucleon—nucleon correlations in, (T), 24:52733
photon reactions (γ,π) with, current commutation relations for, (T), 23:19342
photon reactions (γ,π) with, nuclear distortion effects on π emitted from, (T), 24:40712
photon reactions (γ,π) with, nuclear structure research by, (T), 23:9037 (TID-24667, pp 497-502)
photon reactions (γ,π) with, π-nucleus final-state interactions in, (T), 25:50865
photon reactions above 100 MeV, accuracy of photon-difference method for calculation of cross sections for, 25:50723
photon reactions above 2 GeV, vector dominance for energy dependence of rho^0 + N total cross sections and cross section for incoherent rho^0 production in, (T), 23:51877 (DESY-69/30)
photon reactions above 2 GeV, vector dominance for meson (rho^0) incoherent production from, 23:51898
photon reactions above 230 MeV, determination of multipole amplitudes from π^0 production in, 25:33645
photon reactions at 1 to 2 GeV, differential cross sections for $\pi^+\pi^-$ production in, (E), 22:22287
photon reactions at 1.1 GeV, total eta—N cross section in, (E), 23:18782
photon reactions at 1.600 GeV, eta + N interaction total cross section from, (E), 23:23359 (LNF-69/4)
photon reactions at 10 GeV, test of linearity of quantum electrodynamics equations from cross section of, (T), 22:48360
photon reactions at 10 keV to 100 GeV, data tabulations for, 24:3492 (NSRDS-NBS-29)
photon reactions at 121 keV to 10.827 MeV with Z = 6 to 92, cross sections for, (E), 25:36799
photon reactions at 2 GeV with complex, review of, 24:21963
photon reactions at 2.6 and 6.8 GeV, magnetic spectrometer study of cross sections and nuclear density distributions from rho^0 production in, (E), 24:20055 (DESY-69/50)
photon reactions at 2.6 to 6.8 GeV, cross sections for rho^0 production in, (E), 24:51893
photon reactions at 2.62 MeV, streamer chamber study of pair production in, (E), 25:17363
photon reactions at 2.75 MeV, pair production cross sections for, (E/T), 25:31361
photon reactions at 3 to 16 GeV, incoherent π production in, 25:22734
photon reactions at 3 to 16 GeV, vector dominance for incoherent production of mesons (rho^0) and (π^+) and total cross sections for, (T), 24:18140
photon reactions at 30 to 400 MeV, computer program for intranuclear-cascade calculation for, (T), 25:50809 (ORNL-4687)
photon reactions at 300 to 1000 MeV, possible mass spectrographic study of multiple particle production in, (E), 23:27737
photon reactions at 40 to 300 MeV, model calculations of, 24:15812
photon reactions at 5.5 GeV/c, angular distributions for ω production in, (E), 25:5249 (DNPL/R-7, pp 87-94)
photon reactions at 55 to 85 MeV, absolute neutron yields and energy spectra from, (E), 25:39031
photon reactions at 6.2 GeV with complex, rho^0 production from, (E), 23:14952
photon reactions at 6.2 GeV/c, γ—rho coupling and reabsorption cross sections from coherent rho production in, (E), 24:24216
photon reactions at 65 MeV, design and performance of stilbene scintillation neutron spectrometers for studying, 21:34492
photon reactions at 8 and 16 GeV with complex, π^+, π^-, and K$^+$ production in, (E), 24:5234
photon reactions at 9 GeV with, rho—N cross section and γrho coupling constant from rho production in, (E), 23:16924
photon reactions at 9.15 GeV, rho—N total cross sections and γ—rho coupling constant from cross sections for rho production in, (E), 24:15445
photon reactions at high energies in emulsions, cross sections for triplet production in, (E), 25:17362
photon reactions at high energies with, Regge amplitude for absorption in antinucleon production in, (T), 22:20194
photon reactions at high energies, accurate calculation of tables for radiation lengths from total cross sections for, 23:32598 (DESY-69/8)
photon reactions at high energies, coherent and incoherent production in, (T), 24:52059
photon reactions at high energies, cross sections for production of two electron pairs from, (T), 24:49380
photon reactions at high energies, cross sections for π^0 production in, 23:36868(T) (SLAC-Trans-96)
photon reactions at high energies, dynamical effects of instability in nonresonant and rho^0 production in π^+—π^- pair production in, (T), 25:43604
photon reactions at high energies, Glauber theory of multiple scattering for cross sections for total photon absorption and vector meson and π^- and π^+ production in, (T), 25:19955
photon reactions at high energies, Glauber theory approximation of rhoN cross sections from rho production in, 25:3317
photon reactions at high energies, mechanisms for, 24:24281
photon reactions at high energies, meson (ω) Regge trajectory, sign of $\pi^0 \rightarrow 2\gamma$ decay amplitude, and test of vector dominance model predictions from meson (π^0) production from, (T), 23:51891
photon reactions at high energies, optical model for, (T), 25:19955
photon reactions at high energies, ω - rho interference in, 25:5325 (DNPL/R-7, pp 115-38)
photon reactions at high energies, production of nonresonant $\pi^+\pi^-$ pairs in, (T), 25:38698
photon reactions at high energies, surface effects in, (T), 24:10700(T) (SLAC-Trans-102)
photon reactions at high energies, total cross sections for, (T), 24:10700(T) (SLAC-Trans-102)
photon reactions at high energies, two-body correlation function for coherent and incoherent meson (rho^0) production from, (T), 24:3706
photon reactions at high energies, unstable particle + nucleon cross sections from rho^0 production in, (T), 22:22419
photon reactions at high energies, vector dominance model for asymmetry in π^+ production in, (T), 25:53075
photon reactions at high energies, vector-meson dominance model for, 25:12151
photon reactions at high energies, Woods—Saxon radii from magnetic spectrometer study of rho^0 production in, (E), 24:24230
photon reactions at high energy, nucleon energy spectra from, (T), 23:7281(R) (ORNL-4280)
photon reactions at high energy, surface effects in, (T), 24:3983
photon reactions at high energy, with lepton pair production, (T), 21:35520
photon reactions at large momentum transfers, cross sections for incoherent production of neutral vector mesons in, (T), 25:47776 (JINR-P2-5864)
photon reactions at low and intermediate energies, conference on meson production in, 24:26366
photon reactions below 120 GeV, proposed experiment for total cross sections of hadron production from, 24:51886 (TID-25473(Vol.4), pp 149-60)
photon reactions below 150 MeV, photonuclear data index, Jan. 1965 to Jan. 1970 for, (E), 25:22961 (NBS-SPEC. PUBL-322)
photon reactions below 230 MeV, determination of multipole amplitudes from π^0 production in, 25:33646
photon reactions in Coulomb field at high energies, hadron production in, 25:56457
photon reactions in emulsions, asymmetry ratio and differential cross sections in opening angle for electron pair production in, (E), 25:17364
photon reactions in giant resonance region, pair-production cross sections for, (T), 21:21588
photon reactions in two-layer absorber, transition effect for electron—photon shower from, 24:5269
photon reactions near threshold with, mass number dependence of cross section for production of π^0 in, 21:40182
photon reactions near threshold, cross sections for heavy-meson production in, 22:7471
photon reactions with A = 6 to 209, at 20 MeV, activation data for, (E), 22:22614
photon reactions with complex nuclei, pseudoscalar meson production in, (E), 24:24278
photon reactions with complex, amplitude of rho^0 coherent production in nonforward, (T), 22:29653 (DESY-68/15)
photon reactions with complex, at 4 to 8.8 GeV, dipion mass spectra, angular distributions, rho—γ coupling constant, and rho + N total cross sections from rho production in, (E), 25:45631
photon reactions with complex, at high energies, nuclear radii and density distributions from magnetic spectrometer study of rho^0 production in, (E), 24:24215
photon reactions with complex, at high energies, review of rho, phi, and ω production in, (E), 25:52997
photon reactions with complex, cross sections for coherent production of mesons (eta) in, 24:45457

photon reactions with complex, effects of anomalous real parts of amplitude on rho—ω phase in, 25:45704
photon reactions with complex, extension of optical model analysis of coherent production of rho° in, 24:24275
photon reactions with complex, ω—γ coupling constant and ω—N scattering amplitude from, (E/T), 25:40860
photon reactions with complex, real part of rhoN scattering amplitude from, 24:1541
photon reactions with complex, relative phase angle in leptonic decay of rho, ω, and phi from production in, 24:33005
photon reactions with complex, review of particle production in, (E/T), 24:20061
photon reactions with complex, review of rho° production in, (E/T), 24:51894
photon reactions with complex, review on rho, ω, and phi production in, 25:5301 (DNPL/R-7, pp 29-70)
photon reactions with complex, rho + rho' model for rho° production in, 24:8598
photon reactions with complex, rho and phi production in, (E), 23:10740
photon reactions with complex, vector meson production in, 24:24279
photon reactions with complex, vector-dominance and optical models for, 23:42616
photon reactions with Coulomb field of, at 900 MeV, angular distribution of electron pairs from, (E), 25:53000
photon reactions with Coulomb field of, coherent production of 0° ππ(750) in, 24:30476 (CONF-690521-, pp 439-45)
photon reactions with double-closed-shell, effects of SU(4) breaking on charged meson (π) production in, 24:37842
photon reactions with doubly closed-shell computer program for coupled-channel calculation of cross sections in one-particle—one-hole approximation for, 24:30872 (RT/FI-(69)29)
photon reactions with emulsion, at 0.4 to 1 GeV, cross sections for, (E), 23:14944
photon reactions with giant dipole resonance excitation, A/sup -1/6/ dependence of, (T), 22:50673
photon reactions with heavy, at high energies, lectures on rho and ω production in, (T), 25:22726 (INP-712(Vol.1), pp 97-106)
photon reactions with heavy, Drell—Trefil theory extension for rho° coherent production in electron reactions with heavy nuclei for amplitudes of rho° production in, (T), 25:5336
photon reactions with heavy, review of hadron production from, (E), 23:51876 (DESY-69/21)
photon reactions with intermediate, cross sections for, (E), 25:56782
photon reactions with light mirror, isospin sum rules for T splitting of giant resonance for, 24:1882
photon reactions with light, model for rho° coherent production in, (T), 25:5336
photon reactions with light, silicon surface-barrier hodoscope for studying pion production in, 24:21019
photon reactions with light, time-of-flight spectrometer for angular distribution measurements of neutrons from, 24:27401
photon reactions with modified fermion propagator in quantum electrodynamics, asymmetric lepton pair production in, 22:46495 (DESY-68/36)
photon reactions with Moessbauer, spectra from, (E), 25:36346
photon reactions with nuclei at high energies, quark model for total cross section relations for, (T), 25:14595 (ITF-70-63-P)
photon reactions with nuclei, effect of sign of ω—phi mixing angle on rho—ω interference in lepton pair production in, 24:18136
photon reactions with polarized, T violation in resonance, (T), 21:15380
photon reactions with quasi-deuteron production, nucleon—nucleon correlations in, (T), 23:37296
photon reactions with soft-pion theorem for threshold meson (π) production in, 23:42981
photon reactions with spin-0, determination of spin and parity of X°(960) from, (T), 25:53063
photon reactions with spinless, Primakoff effect for eta production in, (T), 22:39317 (JINR-P2-3845)
photon reactions with, accuracy of photon-diffference method for calculation of cross sections in, 25:30773 (DESY-71/3)
photon reactions with, analysis using Feynman diagrams, (T), 25:31435
photon reactions with, angular correlations between momentum transfer and emitted nuclear fragments in, (T), 23:45006
photon reactions with, as nuclear structure probes, 24:35895 (KAPL-P-3866)
photon reactions with, as probes of nuclear structure, 24:35896 (KAPL-P-3867)
photon reactions with, boson production with S = T = 0 from, (T), 22:3319
photon reactions with, Compton graph contribution to e⁺e⁻ and μ⁺μ⁻ pair production from, (T), 21:42305
photon reactions with, conservation laws for Bethe—Salpeter equation for, 22:5877
photon reactions with, cross section for μ⁺ - μ⁻ atom production from, (T), 23:46643(T) (SLAC-Trans-97)
photon reactions with, cross sections for, (T), 21:1132
photon reactions with, determination of real part of Compton amplitude for, 24:26390 (AD-694033)
photon reactions with, direct excitation of fission degrees of freedom by, 21:31888
photon reactions with, effect of final-state interactions on properties of rho production in, 24:28513
photon reactions with, effect of rho—ω mixing in e⁺—e⁻ pair production in, 24:26394 (DESY-70/13)
photon reactions with, elementary-particle treatment of meson(π) production in, 24:49381
photon reactions with, ENDF formats and procedures for storage of data on, (T), 25:59838 (LA-4549)
photon reactions with, Glauber model for coherent production in, 24:18110 (CONF-690330-, pp 152-60)
photon reactions with, hadron-like behavior of cross sections for, (T), 21:12115
photon reactions with, incoherent contributions to vector meson production in, 23:36871
photon reactions with, isolation of Regge trajectories in π and vector meson production in, (T), 24:24308
photon reactions with, isospin sum rule for, (T), 23:40096
photon reactions with, low-energy theorems for π production in, (T), 25:20019 (LYCEN-7081)
photon reactions with, momentum transfer in meson (π°) production from, (T), 21:17084
photon reactions with, multiperipheral production mechanism and duality for rho'(1500) production in, 25:53097
photon reactions with, multipolar sum rules for, (T), 21:30070
photon reactions with, optical model for relative phase between rho° and ω° produced in, (T), 24:49387
photon reactions with, performance of multichannel analyzers for determining yields in, 23:16199
photon reactions with, polarization tensor in quantum electrodynamics for amplitude of coalesence into photons in, (T), 25:1598 (NP-18473)
photon reactions with, production of (μ⁺μ⁻) bound state in, (T), 24:8651
photon reactions with, proof of impossibility of neutrino—antineutrino pair production from, (T), 23:42592
photon reactions with, quark model for relations between total cross sections for π and K reactions with nuclei and differential cross sections for neutral vector meson production in, (T), 25:1442 (ITF-70-40)
photon reactions with, real part of Compton amplitude from electron bremsstrahlung and pair production in, 24:13009
photon reactions with, relative sign of Coulomb and Regge amplitudes in coherent neutral pseudoscalar production in, (T), 24:35624 (ITF-70-21)
photon reactions with, review of particle production in, (E), 23:23330
photon reactions with, review of rho and ω production in, (E/T), 25:5248 (DNPL/R-7, pp 71-85)
photon reactions with, review of rho° production from, (E), 22:22311 (CONF-670923-, pp 452-83)
photon reactions with, review of vector dominance model for vector meson production in, (T), 25:53076
photon reactions with, review of vector dominance model for total cross sections for particle production in, (T), 25:53076
photon reactions with, review of vector meson production in, (E), 24:51879 (DESY-70/32)
photon reactions with, review on, 25:3715 (NBS-MON-118)
photon reactions with, review on vector meson production in, 23:27767 (SLAC-PUB-589)
photon reactions with, rho° + N total cross section estimate from, 21:33712
photon reactions with, rho° production and decay inside nucleus from, (T), 25:5336
photon reactions with, rho—ω interference and phase of amplitude in, 24:24290
photon reactions with, rho-dominance for energy and A dependence of total cross sections for, 23:42626
photon reactions with, single-difference unfolding method for measuring cross sections for, 25:17624
photon reactions with, sum rule for, 21:15292
photon reactions with, test of vector dominance model in, 24:24298
photon reactions with, use in research on nuclear structure, (E/T), 23:9035 (TID-24667, pp 485-94)
photon reactions with, use of sum rules for integrated cross sections for, 22:17833
photon reactions with, vector meson production in, (T), 24:42930
photon reactions with, W-meson pair production from, 22:13724
photon reactions with, width of dipole resonance in, (T), 21:2721
photon reactions with, Wilson expansion chamber for measurements on, 24:4450
photon reactions with, yield measurements using activation, (T), 21:44760
photon resonance scattering by, Doppler integral for, 21:38379
photon resonance scattering by, properties of partial radiative widths in, 24:43593
photon scattering amplitude at low energy, in Thomson limit, (T), 22:9959
photon scattering at 10 to 80 MeV, dipole oscillator strengths from, (E), 24:28706
photon scattering at arbitrary energies and small angles in Coulomb field of, differential cross sections for electron pair and photon production in, (T), 25:5335
photon scattering at high energies, amplitudes for Delbrueck, 23:42618
photon scattering at high energies, asymptotic behavior of matrix element for Delbrueck, 23:42620
photon scattering at high energies, impact factor for Delbrueck, 23:42614
photon scattering by A = 9 to 59, in giant resonance region, differential cross sections for, (E), 21:17305
photon scattering by vibrational, in giant resonance region, (T), 21:4337
photon scattering by, (T), 22:18343
photon scattering by, amplitude and differential cross section for, 25:28070
photon scattering by, dynamic collective model formalism for, (T), 23:21401
photon scattering by, evaluation of Cabibbo—Radicati sum rule for, (T), 23:32971
photon scattering by, Glauber theory of multiple scattering for corrections to wide-angle bremsstrahlung from Compton, (T), 25:19955
photon scattering by, sum rules for Compton, 21:18957
photon scattering by, survey of research on, 23:37354
photon scattering cross sections for, generalized formalism for, (T), 22:50687
photon scattering in field of, polarization of electron pairs and photons from, (T), 25:12158
photon scattering in giant resonance region, cross sections for, (T), 22:14108
photon spallation up to 1.1 GeV in emulsions, hammer track formation in, (E), 25:50051
photon total cross sections at high energies, 25:47796
physical constants for, methods for determining, 22:15339
polarization by absorption of polarized thermal neutrons, 21:4340
polarization by cycles of thermal mixing, method of dynamic, 21:25596
polarization by dynamic cooling, (T), 23:14917
polarization by hyperfine structure coupling, (T), 21:44762
polarization by optical pumping in solids, techniques for, (T), 22:5906
polarization by polarized γ rays, density-matrix calculation for, (T), 23:19369
polarization effects in single-nucleon-transfer reactions, (T), 21:13915
polarization effects in, review of, (T), 21:31831 (INP-536/PL)
polarization from capture of polarized thermal neutrons, (E), 21:33907
polarization from quasielastic scattering with excitation of isobaric analog states, (T), 22:24899
polarization in electric and magnetic fields, review of theory for, (T), 23:40093 (KURRI-TR-12, pp 18-26)
polarization in gases, liquid, and solids, review of methods for, 22:46838
polarization in gases, liquids, and solids, review of methods for dynamic, 21:44737 (UCB-34-P-20-OR-4)
polarization in radiation targets, methods for, 21:42504
polarization in single crystals from magnetic interactions, (T), 24:3474
polarization of closed-shell, Coulomb, (T), 22:27343
polarization of deformed, (E/T), 25:1739(R) (NYO-73-293)
polarization of excited states of, using Moessbauer effect, (E), 23:1878(R) (NYO-2028-3)
polarization of recoil, effects of atomic quadrupole interactions on, (T), 23:1878(R) (NYO-2028-3)
polarization of spin-1, effect of nuclear spin—lattice relaxation on, (T), 23:48962
polarization of, Bloch—Siegert effect in dynamic, (E/T), 24:18042
polarization of, cross-relaxation effects on dynamic, (T), 21:12097
polarization of, design and testing of Q-meter for measuring high, 21:17931
polarization of, effects of electron resonance saturation on dynamic, (T), 25:17310
polarization of, methods for, 23:8903
polarization of, possibility of, using ultrasound, (T), 25:12007
polarization of, research on dynamic, 25:5150(R) (UCB-34-P-20-PR-16)
polarization of, transformation from Overhauser effect to solid effect in dynamic, (T), 21:44771
positron elastic scattering by, radiative corrections for, 25:59880
positron production in Coulomb fields of Z > 137, (T), 25:1459
potential energy of A = 218 to 232, dependence on octupole and quadrupole deformation parameters, (T), 22:14074 (JINR-E4-3629)
potential energy of A = 218 to 232, effects of quadrupole and octupole deformation parameters on, (T), 22:27239
potential energy shift of, for screened Coulomb potential, (T), 21:12087
potential energy surfaces for heavy, in the two-center model, (T), 25:25824
potential energy surfaces in even—even, collective, (T), 25:50830
potential for N + N interactions in, self-consistent charge-exchange optical, (T), 25:48115 (KFKI-71-27)
potential in Hamiltonian formalism for, mathematical representation for hard core, 24:30873 (RT/FI-(69)39)
potentials for A = 3, local and nonlocal, (T), 22:18114
potentials for complex, optical-model, (T), 21:11991(R) (UCOL-535-561)
potentials for light, density-dependent central, 22:20759
potentials for, N + N → N + N + γ interactions for off-shell properties of two-nucleon elastic, (T), 24:15601
potentials for, universal constants in special relativity theory for, 23:18971
potentials in, phenomenological three-body, (T), 25:15160
potentials of heavy deformed, isobaric-spin, (T), 23:40108
potentials of, electron pair spontaneous production in short-range rectangular well-type, (T), 25:1459
probabilities of Elambda and allowed β transitions in odd-A deformed, calculations using Saxon—Woods potential, (T), 23:25909
production and measurement of short-lived, on-line isotope separator system for, 24:22023 (CERN-70-3)
production and properties of highly neutron-deficient, (E), 22:30025
production and properties of low-energy, from proton inelastic reactions with 12 < Z < 83 nuclei at 0.010 to 5 GeV, (T), 25:56522(T) (ORNL-tr-2520)
production and properties of ultra-neutron-deficient, (E), 22:30026
production and study of highly unstable spherical and magic, (T), 22:30095
production from proton spallation of medium-weight nuclei at 60 MeV to 2.9 GeV, cross sections for, (T), 25:12439

production in proton reactions with iron at 1 and 3 GeV, Monte Carlo calculations of, 23:21127
production of A > 250, by r-process nucleosynthesis, (T), 23:15430(R) (MNC-3783-2)
production of alpha-emitting, in proton reactions with gold-197 at 20 GeV, (E), 21:12049
production of delayed-neutron emitting, (E), 22:29912
production of heavy, by multiple neutron capture in thermonuclear explosions, 22:1654 (LA-3738)
production of heavy, by multiple neutron capture in thermonuclear explosions, (T), 21:35480
production of heavy, in Cyclamen thermonuclear explosion, (E), 22:32619
production of heavy, in supernovae, (T), 22:29165
production of heavy, in thermonuclear explosions, (E), 22:29844
production of heavy, neutron emission and fission width ratios for compound nuclei in, (T), 22:14079 (UCRL-16348)
production of heavy, prior to s process, (T), 24:27922
production of highly unstable, comparison of methods for, 22:30113
production of isomeric, by bremsstrahlung scattering, (E), 21:44601 (UCRL-17788)
production of isomeric, by thermal neutron capture, (T), 22:42095(T) (ANL-Trans-644)
production of isomeric, by thermal neutron capture, (T), 22:14113
production of light neutron-rich, in heavy ion transfer reactions, (E), 25:3648 (JINR-E7-5319)
production of light, in proton reactions with aluminum at 600 MeV, (E), 24:40255
production of light, in proton reactions with bromine and silver nuclei at 25 GeV/c in nuclear emulsions, (E), 21:12064
production of spontaneously fissioning, in boron-10 reactions with thorium-230, (E), 21:40440
production of superheavy, by fusion of heavy ions, (T), 22:44712
production of superheavy, methods for, 23:32960
production of superheavy, with Z = 126, A = 310, (T), 22:1690
production of two- and three-baryon-resonance, in Δ + N potential interactions, quasinuclear model for, (T), 25:7690
production of unstable, by photonuclear reactions, (E), 22:30114
production of Z = 114 to 126, methods for, 23:13262 (JINR-P7-4199)
production of Z = 114, using heavy ion-induced reactions, (T), 22:18209 (JINR-D7-3548, pp 39-47)
production of Z = 126, methods proposals for, 22:39673
production of Z greater than or equal to 3, in antiproton reactions with silver and bromine at 5.0 GeV/c, 22:35279
production of, double irradiation technique for cross-section studies of, 23:11466
production of, Markov processes for, 23:34546 (AD-679890)
production of, review of methods for, (T), 25:28309 (CERN-70-30(Vol.2), pp 605-44)
projected Hartree—Fock spectra in light, 21:44577 (ZFK-122, pp 354-9)
propagation in interstellar space and solar system, cosmic, 21:13406
propagation of cosmic-ray, in interstellar space and solar system, 21:46180 (N-67-18631)
properties far from the beta-stability valley, review of, (T), 25:28444 (CERN-70-30(Vol.1), pp 497-516)
properties far from the region of beta stability, conference on, (E/T), 25:28440 (CERN-70-30(Vol.1))
properties of 1s shell, Bolsterli—Feenberg perturbation procedure for calculation of momentum-dependent, 25:15185
properties of A = 191 to 205, deformation and orbital, 21:31823
properties of beta-emitting, for recoil polarization measurements, 22:7744 (NYO-2028-2, pp 121-7)
properties of cosmic-ray, 22:52553
properties of even—even, microscopic and phenomenological models for, (T), 23:4053 (NP-17506)
properties of even-even, description using microscopic models, 21:5559 (AD-641192)
properties of heavy, dissertation summary of spectroscopic studies on, (E), 22:50648
properties of highly unstable, review of experimental techniques for studying, (E), 25:28290 (CERN-70-30(Vol.1), pp 21-45)
properties of isomeric, compilation of, 21:44658 (CEA-R-2830)
properties of medium and heavy, statistical theory of, 23:42987
properties of odd-A, with A near 190, systematics of, 22:1624
properties of odd-even, calculations using Nilsson model, (T), 21:7832
properties of rotational, in terms of two-body forces, 24:24674
properties of s-d shell, from Hartree—Fock calculations using a realistic two-body force, 22:5890
properties of s-d shell, from Hartree—Fock calculations using a realistic two-body force, (T), 22:5890
properties of short-lived, conference on measurement of, (E), 25:59834 (KURRI-TR-76)
properties of short-lived, review of properties of, (E), 25:59782 (KURRI-TR-76, pp 21-6)
properties of spherical, pairing and separation energies, oscillator constants, and nucleon radial distributions, (T), 25:7919
properties of super-heavy, from revised mass formula, (T), 22:30021
properties of super-heavy, revised mass formula calculation of, 22:30021
properties of Z = 20 to 120, liquid-drop-model calculations of binding energies, shape coefficients, and spin—parity assignments, (T), 25:28441 (CERN-70-30(Vol.1), pp 217-62)
properties of, calculations using nucleon-nucleon phase shifts, (T), 21:21594
properties of, data tabulations on, (E), 21:44657
properties of, deformation and rotational, 22:24910
properties of, determination from hyperfragment decay, (E), 22:17853
properties of, measurement using Moessbauer effect and perturbed angular correlations, 21:2608
properties of, meson two-body exchange current effects on electromagnetic, (T), 24:30867 (CEA-R-3960)
properties of, modified liquid-drop and Thomas-Fermi models for average, (T), 22:50658 (UCRL-18214)
properties of, reaction-matrix theory of ground-state, (T), 25:59851
properties of, relations with elementary particle properties for, (T), 24:24262
properties of, review of measurements using Moessbauer effect, 23:19252 (KURRI-TR-8, pp 4-23)
properties of, review of techniques for measuring, 25:23814
properties of, review of theoretical predictions of chemical, (T), 25:28309 (CERN-70-30(Vol.2), pp 605-44)
proton (anti p) reactions at 5 GeV/c in emulsions, beryllium-8 emission in, (E), 22:20513
proton (p,n) reactions with light, method for estimating compound cross section for, (T), 23:9044
proton and neutron distributions in heavy, calculation using deformed single-particle model, (T), 24:40687
proton decay of, conference on, 21:46720 (JINR-P7-3202)
proton decay of, possible examples of two-, (T), 25:59740
proton decay of, possible instances of, (T), 25:39071(T) (UCRL-Trans-1444)
proton differential elastic scattering cross sections for, spin-orbit effects on optical-model calculations of, (T), 21:44772
proton differential inelastic scattering cross section for, effects of core polarization on, (T), 21:40502
proton distributions in, use of effective single-particle potential for calculating, (T), 23:44997
proton elastic and inelastic scattering at 6 to 17.5 MeV by A = 23 to 35, core-excitation analysis of differential and integrated cross sections from, (T), 25:28261
proton elastic and inelastic scattering at 600 MeV by light, eikonal and multiple-scattering analysis of, (E/T), 25:38876
proton elastic and inelastic scattering by deformed, second-order Born approximation for, (T), 23:7317
proton elastic and inelastic scattering by, asymmetries, cross sections, and depolarizations from polarized, (E), 25:39056
proton elastic and inelastic scattering by, isobaric analog resonances in, (T), 21:12101
proton elastic and inelastic scattering by, measurement of spectroscopic factors from analog resonances in, 24:11030
proton elastic and inelastic scattering with isobaric analog excitation, model for analysis of, (T), 24:30938
proton elastic and inelastic scattering with isobaric analog excitation, determination of spectroscopic factors in, 25:28464
proton elastic and inelastic scattering with isobaric analog excitation, review on, 25:28469
proton elastic and inelastic scattering with isobaric analog excitation, model for analysis of, (T), 24:11037
proton elastic and inelastic scattering with isobaric analog excitation, model for analysis of, (T), 24:49931 (RLO-1388-578)
proton elastic and near-elastic scattering at high energies, role of Coulomb interactions in, 24:20094 (INP-687)
proton elastic scattering at 100 MeV by light, optical-model analysis of, (T), 23:3962
proton elastic scattering at 11 MeV by A = 45 to 76, optical-model analysis of, (T), 23:7359
proton elastic scattering at 11 MeV, real potential well depth for, (T), 22:14082
proton elastic scattering at 20 GeV, computer program for cross sections for, 22:13780
proton elastic scattering at 20 to 61.4 MeV by A = 12 to 208, optical-model analysis with real Saxon—Woods derivative term, (T), 25:43967
proton elastic scattering at 27 GeV/c in emulsions, amplitudes for, (T), 21:25595
proton elastic scattering at 30 to 180 MeV, optical potential for, (T), 24:6966
proton elastic scattering at 30.3 MeV, nucleon-density distribution and two-body potentials for analysis of, (T), 24:38346
proton elastic scattering at E < 50 MeV on A > 40, optical model parameters for, 23:52168 (COO-1265-59)
proton elastic scattering at high energies, phenomenological analysis of elastic, (T), 23:40122
proton elastic scattering below 3 MeV by light, review of experiments on, 24:28712
proton elastic scattering by A = 12 to 206, at 21 MeV, polarization angular distributions in, (E), 21:21453
proton elastic scattering by A = 32 to 120, correlation of differential cross sections and polarizations for, (E/T), 22:24900
proton elastic scattering by A = 48 to 64, polarization and cross-section calculations using optical model, (E/T), 21:13847
proton elastic scattering by analog and compound energy levels of, amplitudes for resonant, (T), 25:15146 (NYO-1082-29)
proton elastic scattering by deformed, spin-dependent optical potential for, (T), 23:28352
proton elastic scattering by heavy, angular distributions for, (E), 21:15598
proton elastic scattering by spin-zero, formula for polarization in, (T), 22:27264
proton elastic scattering by Z = 26 to 30, at 28 MeV, (E/T), 21:7688(R) (USC-136-114)
proton elastic scattering by, analysis using optical potential with real surface term, (T), 25:53853
proton elastic scattering by, computer program for resonance analysis of, 21:40472 (ORO-2972-34)
proton elastic scattering by, Coulomb interference in polarized, (T), 23:32958
proton elastic scattering by, fine structure of isobaric analog resonances in, (T), 22:44777
proton elastic scattering by, formalism for polarization transfer in, (T), 25:53849
proton elastic scattering by, formalism for polarization transfer in, (T), 25:5804 (LA-4465, pp 21.1-2)
proton elastic scattering by, isobaric analog resonances in, (E/T), 22:27254
proton elastic scattering by, optical potential for, (T), 24:43568
proton elastic scattering by, optical-model parameters for, (T), 24:6975
proton elastic scattering by, polarization and cross-section calculations using optical model, 21:31828 (CEA-Bib-83)
proton elastic scattering by, with one open shell, analysis of core polarization effects from, (T), 23:49476
proton elastic scattering with excitation of isobaric analog resonances in, neutron spectroscopic factors from, (T), 22:50671
proton elastic scattering with isobaric analog excitation, fine structure analysis of, (T), 24:43579
proton elastic scattering with isobaric analog excitation, formalism for analysis of, (T), 25:53855
proton elastic scattering with isobaric analog excitation, method for analysis of, (T), 25:31276
proton elastic scattering with isobaric analog resonances, (T), 21:10099
proton elastic scattering with isobaric analog resonance excitation, isospin-dependent optical-model formalism for determining spectroscopic factors from, (T), 23:1950
proton elastic scattering, lectures on cross sections and polarization from, (T), 25:12624 (ANU-P-497)
proton fission at 500, 750, and 1000 MeV, analysis using nuclear reaction theory, 25:31417
proton fission of heavy, review of, 25:36802
proton inelastic interactions at 0.1 to 30 GeV, Monte Carlo calculation of intranuclear cascades in, (T), 23:49172(T) (ORNL-tr-2200)
proton inelastic scattering at 0.2 to 30 GeV, Monte Carlo method for intranuclear cascades in, 23:30765 (JINR-P2-4402)
proton inelastic scattering at 17.5 MeV by, semiconductor detector system for measuring small-angle, 22:16884
proton inelastic scattering at 20 GeV in emulsions, absorption mean free paths for, (E), 22:29621
proton inelastic scattering at high energies, method for analyzing small-angle contribution to angular distributions in, (T), 23:28345
proton inelastic scattering at medium energy, method for measuring small-angle, 22:30048(R) (PUC-937-307)
proton inelastic scattering by 2s1d-shell, at 17.5 MeV, (E), 21:2646
proton inelastic scattering by even, spin-dependent effects in, (T), 23:37299
proton inelastic scattering by medium-weight, at 155 MeV, (E), 21:7739
proton inelastic scattering by octupole and quadrupole levels of even—even medium-weight, at 11 MeV, 25:17996
proton inelastic scattering by s-d shell, analysis of deformation in polarized, (T), 25:56828 (LYCEN-7104, S9.1-7)
proton inelastic scattering by, analysis of spin-dependent effects in, (T), 24:11038
proton inelastic scattering by, antisymmetrization and exchange in DWBA calculations of cross sections for, (T), 25:39127
proton inelastic scattering by, calculation using projected Hartree—Fock wave functions, (T), 24:6974
proton inelastic scattering by, coupled-channel analysis of intermediate triton formation in, (T), 25:46124
proton inelastic scattering by, cross-section calculations using quadrangle graphs, (T), 24:38380
proton inelastic scattering by, deformed spin-dependent optical-model potential for, (T), 22:22639
proton inelastic scattering by, description of analog resonances near compound-nucleus overlapping levels in, (T), 25:15179
proton inelastic scattering by, double-scattering corrections to distorted-wave impulse-approximation calculations of, (T), 25:50847
proton inelastic scattering by, effect of L-S interaction on, (T), 25:18026
proton inelastic scattering by, effects of L—S coupling on partial-wave amplitudes for, (T), 25:39125
proton inelastic scattering by, exchange effects with realistic interaction for, (T), 25:12676
proton inelastic scattering by, fast-slow coincidence system for four-angle correlation measurements, 21:29941
proton inelastic scattering by, Hauser—Feshbach computer program for, 23:42968
proton inelastic scattering by, intermediate structure in, (T), 22:24896 (LA-DC-8192)
proton inelastic scattering by, microscopic description using DWBA with antisymmetrization, (T), 24:43527
proton inelastic scattering by, microscopic model for analysis of, (T), 24:49919 (CEA-R-4000)
proton inelastic scattering by, polarization and cross-section calculations using distorted-wave Born approximation, 21:31828 (CEA-Bib-83)
proton inelastic scattering by, review of polarization effects in, 25:53840

proton inelastic scattering by, spectroscopic factors from isobaric analog resonances in, 25:17973
proton inelastic scattering by, system for four-angle correlation measurements, 21:29942
proton inelastic scattering experiments on, data acquisition and analysis system for, 23:4054 (NP-17611)
proton inelastic scattering on atmospheric, cosmic, (E), 22:2830
proton inelastic scattering through isobaric analog resonances, isospin purity of doorway wave functions for, (T), 21:27631
proton inelastic scattering through isobaric analog resonances, cross sections for, (T), 21:27632
proton inelastic scattering using polarized beams, nuclear structure effects on asymmetry in, (T), 25:53854
proton inelastic scattering with excitation of isobaric analog resonances, cross-section calculations using internal Coulomb mixing, (T), 23:9045
proton inelastic scattering with isobaric analog excitation, description for, (T), 24:38379
proton inelastic scattering with isobaric analog resonance excitation, fine structure in cross sections for, (T), 23:4085
proton interactions at several hundred MeV, cross-section calculations using Glauber theory, (T), 25:20490
proton momentum distributions in, determination using particle quasi-elastic scattering, (E/T), 21:17408
proton momentum distributions in, research using (p,2p) reactions, (E/T), 23:9030 (TID-24667, pp 443-54)
proton pairing energies in even-even, 22:22594
proton pairing energies in even-even, (T), 22:22594
proton quasi-free scattering by, (T), 21:17185
proton reaction threshold energies for A = 2 to 260, tables of, 21:27576 (UCRL-14001)
proton reactions (p,2n) and (p,3n) with Z = 21 to 83, empirical formula for cross sections for, (E), 25:34075 (KFKI-71-8)
proton reactions (p,2p) and (p,pn) with, shell-model theory for, (T), 24:40715
proton reactions (p,2p) at 0.16 to 1 GeV, description using distorted-wave impulse approximation with proton single-particle wave functions, (T), 22:42128
proton reactions (p,2p) at 100 to 500 MeV with Z = 22, 26, and 28, proton spectra, excitation energies, and angular correlations for, (E), 25:5606(R) (UCSB-34-P-144-7)
proton reactions (p,2p) at 387 MeV with, design of magnetic spectrometers for momentum analysis of, 24:2481
proton reactions (p,2p) at 600 MeV, magnet—spark chamber system for studying, 25:17619
proton reactions (p,2p) at medium energies, nuclear structure research from, 22:33187 (ISS-66/50)
proton reactions (p,2p) with deformed, with quasielastic scattering, (T), 22:3784
proton reactions (p,2p) with light, analysis using pole graph method, (T), 24:1872
proton reactions (p,2p) with light, differential cross sections for, (T), 21:27658
proton reactions (p,2p) with Z = 20 to 28, at 156 MeV, (E), 21:15527
proton reactions (p,2p) with, cross-section calculations using distorted-wave t-matrix approximation, (T), 22:50696
proton reactions (p,2p) with, data analysis using knockout model, (E/T), 23:9030 (TID-24667, pp 443-54)
proton reactions (p,2p) with, description using diproton model, 21:31838 (RHEL/R-136, pp 89-130)
proton reactions (p,2p) with, di-proton model for, (T), 21:1129
proton reactions (p,2p) with, off-shell effects in, (T), 25:12670
proton reactions (p,2p) with, review on nuclear structure research with, 24:47682
proton reactions (p,2p) with, uncertainties in diproton-model calculations for, (T), 23:25976
proton reactions (p,α) with light deformed, (E), 21:46491(R) (COO-1371-43)
proton reactions (p,α) with, analysis for α-cluster probability by, (T), 25:50854
proton reactions (p,d) at 156 MeV with A = 6 to 40, DWBA analysis of, (T), 23:19368
proton reactions (p,d) with 2s1d-shell N = Z, angular distributions and spectroscopic factors for, (E), 22:44664
proton reactions (p,d) with A = 44 pseudonium, core excitation sensitivity in, (T), 24:8959
proton reactions (p,d) with approximation for form factors for, 21:27644
proton reactions (p,d) with light, peripheral model in pole approximation for comparative analysis of differential cross sections for, 24:3845
proton reactions (p,d) with, (E), 21:33808 (RHEL/R-129, pp 97-106)
proton reactions (p,d) with, adiabatic treatment of, (T), 25:28512
proton reactions (p,d) with, d-state effects on deuteron polarization in, (T), 21:21613
proton reactions (p,d) with, isobaric analog resonance effects in, 25:28471
proton reactions (p,d) with, lectures on polarization in, (T), 25:12624 (ANU-P-497)
proton reactions (p,d), (p,He-3), and (p,t) with, nuclear structure determinations from, (E), 21:33812 (RHEL/R-144, pp 73-83)
proton reactions (p,γ) with isobaric analog excitation, method for analysis of, (T), 25:31276
proton reactions (p,γ) with light and intermediate, distribution of radiation widths from, (T), 25:3767
proton reactions (p,γ) with, computer program for calculating yields from, (T), 25:36732 (NRL-7230)
proton reactions (p,γ) with, data acquisition and analysis system for experiments on, 23:4054 (NP-17611)
proton reactions (p,γ) with, design of cold trap for background suppression in resonance, 23:19100
proton reactions (p,γ) with, isobaric analog and dipole resonances in, (T), 21:25567 (NYO-3525-16)
proton reactions (p,γ) with, nuclear structure research with, 24:38324
proton reactions (p,γ) with, particle—hole description of giant dipole and isobaric analog resonances in, (T), 23:15517
proton reactions (p,He-3) and (p,t) with, cross-section calculations using distorted-wave Born approximation with spin-dependent potential, 21:38408
proton reactions (p,n) and (p,2n) at 400 MeV, model analysis of, (T), 25:23098
proton reactions (p,n) and (p,2n) with A = 27 to 197, at 7.0 to 15.0 MeV, (E), 21:9979
proton reactions (p,n) and (p,2n) with Z = 13 to 79, excitation functions for, (E), 21:7718
proton reactions (p,n) at 23 MeV with A = 26 to 165, spectra and DWBA analysis of angular distributions from, (E), 25:59789
proton reactions (p,n) at 5.3 to 20 MeV, DWBA calculation with exchange interactions and finite range, (T), 24:15957
proton reactions (p,n) populating isobaric analog states, method for angular distribution measurements of, 25:37593
proton reactions (p,n) through isobaric analog resonances, analysis using optical model with volume form for isospin-dependent potential, (T), 23:21408
proton reactions (p,n) with A = 90 to 209, cross sections for, (E/T), 21:23534(R) (ANL-7246)
proton reactions (p,n) with analog-dipole excitation, collective theory for, 25:36835
proton reactions (p,n) with excitation of isobaric analog resonances, fine structure in cross sections for, (T), 23:4085
proton reactions (p,n) with isobaric analog excitation, description for, (T), 24:38379
proton reactions (p,n) with isobaric analog resonance excitation, cross sections for, (T), 23:9045
proton reactions (p,n) with isobaric analog resonance excitation, spectroscopic factors for, (T), 22:20730
proton reactions (p,n) with isobaric analog resonances, (T), 21:10099
proton reactions (p,n) with isobaric analog resonance excitation, (T), 22:7661(R) (NYO-3525-26)
proton reactions (p,n) with light and medium-weight, effective two-body force from DWBA analysis of, (T), 22:27363
proton reactions (p,n) with, computer program for DWBA calculations of charge-exchange, 21:25568 (RHEL/R-131)
proton reactions (p,n) with, computer programs for distorted-wave calculations, 21:31838 (RHEL/R-136, pp 89-130)
proton reactions (p,n) with, counter-ratio system for detecting high-energy neutron thresholds in, 21:26169
proton reactions (p,n) with, cross-section and spectral measurements using time-of-flight method, 21:38160 (ORNL-P-3206)
proton reactions (p,n) with, description of analog resonances near compound-nucleus overlapping levels in, (T), 25:15179
proton reactions (p,n) with, effect of compound nucleus levels on isobaric analog resonances in, 25:43893
proton reactions (p,n) with, effects of isospin term and various form factors on optical-model analysis of, (T), 25:53877
proton reactions (p,n) with, isobaric analog states and polarization from, (E), 21:33812 (RHEL/R-144, pp 73-83)
proton reactions (p,n) with, polarization calculations using optical-model potential for quasielastic, (T), 21:31863
proton reactions (p,n) with, target chamber for measuring threshold energy of, 23:19026 (ANU-P-414)
proton reactions (p,p) at 19.7 MeV, phase-shift analysis for high-precision polarization data from, 22:3256
proton reactions (p,pd) at 1 GeV, short-range correlations in, (T), 22:20280
proton reactions (p,pd) at 600 MeV with light, Fermi distribution of nucleons from, (E), 25:38876
proton reactions (p,pd) at high energies, effects of nuclear pair correlations on differential cross sections for, (T), 25:46122
proton reactions (p,pγ) with, equipment and methods for angular correlation measurements in, 23:47886
proton reactions (p,pn) with, DWBA analysis for singlet deuteron state on, (T), 23:15381
proton reactions (p,pn) with, method for analysis of, 21:27658
proton reactions (p,pπ⁺π⁻) with, angular criteria for, (T), 25:53869
proton reactions (p,pπ⁺π⁻) with, proposed experimental study of diffraction dissociation, 25:47737
proton reactions (p,π), quantum mechanical treatment of cross sections for, (T), 25:39090
proton reactions (p,t) and (p,He-3) at 45 MeV on 5-d shell, cross sections for, (E), 24:18401
proton reactions (p,t) and (p,He-3) with, cross-section formula for T = 1 transfer, (T), 24:24628
proton reactions (p,t) and (p,He-3) with, use for determination of parentage, (T), 23:40148
proton reactions (p,t) on deformed, cross-section calculations using strong-coupling rotational model, (T), 23:52188
proton reactions (p,t) with 1p-shell, analysis using zero-range DWBA, 25:28204
proton reactions (p,t) with A = 4 to 224, tables of structure amplitudes for, (T), 22:53078 (UCRL-18268)
proton reactions (p,t) with collective spherical, at 30 MeV, two-step processes in, (T), 24:52520
proton reactions (p,t) with medium-weight even-even nuclei, cross sections for, (T), 21:2772
proton reactions (p,t) with, computer program using distorted-wave Born approximation, 21:7478(R) (COO-1371-36)
proton reactions (p,xn) with Z = 20 to 100, excitation functions and thick-target yields for, (T), 25:12529(T) (ORNL-tr-3020)
proton reactions (p,xn) with, estimation of excitation functions for, (T), 23:4052 (KFK-767)
proton reactions above 100 GeV, interaction mechanism for multiple particle production from, (E/T), 23:51951 (JINR-P2-4662)
proton reactions and scattering on, isobaric analog resonances in, (T), 21:38414
proton reactions and scattering on, optical-model potential for, (T), 21:15637
proton reactions and scattering on, optical-model potential for, (T), 21:12089
proton reactions at 0.05 to 30 GeV in emulsions, Monte Carlo method for calculating intranuclear cascades from, 24:6732
proton reactions at 0.06 to 20 GeV with complex, overlapping potentials in formulation of multiple scattering theory for, 24:8677
proton reactions at 0.1 to 20 GeV/nucleon in emulsions, track multiplicity in, (T), 25:47892(T) (ORNL-tr-2503)
proton reactions at 1 GeV, experimental studies of nucleon correlations from, 25:27958
proton reactions at 1 to 3500 MeV, computer program for intranuclear-cascade calculations of, (T), 25:36733 (ORNL-4564)
proton reactions at 1 to 900 GeV, cross sections and resonances in coherent production of particles in, (E/T), 24:47481
proton reactions at 1.2 GeV/c, Monte Carlo calculation of nucleon double differential distributions for, (T), 23:42979
proton reactions at 1000 GeV in emulsions, K/π ratio of secondaries in shower production from, (E), 25:14509 (INP-718)
proton reactions at 19.3 GeV/c, high-energy currents for total cross sections for, 21:42386
proton reactions at 19.8 GeV/c in emulsions, energy spectra and angular distribution of heavy secondary particles from, (E), 23:52122
proton reactions at 19.8 GeV/c in emulsions, particle coherent production mechanism and N'(1470) production in, (E), 25:22672
proton reactions at 2.26 GeV in emulsions, helium-4 emission from, (E), 21:25477
proton reactions at 20 and 23 GeV in emulsions, fireball formation in, 23:18798
proton reactions at 20 and 24 GeV/c in emulsions, double emission of heavy fragments from, (E), 25:1399
proton reactions at 20 GeV in emulsions, D, T, ³He, and ⁴He fragment production in, (E), 24:3513
proton reactions at 20 GeV/c in emulsions, emission of hammer tracks from, (E), 25:1400
proton reactions at 20 GeV/c in emulsions, heavy short-range hyperfragment production from, (E), 22:5500
proton reactions at 20 GeV/c in nuclear emulsions, beryllium-8 production in, (E), 23:10969
proton reactions at 20 to 23 GeV in emulsions, diffraction production of particles in, (E), 22:44322
proton reactions at 20 to 23 GeV, process of fireball formation in, 24:21930
proton reactions at 20 to 600 GeV, Glauber model for nucleon—nucleon interaction in cross sections of, 24:21994
proton reactions at 20.8 GeV/c in emulsions, distributions of transverse momenta of secondary particles in, (E), 22:32053
proton reactions at 20.8 GeV/c in emulsions, mechanism for π⁺ and π⁻ diffractive production in, (E), 25:1406
proton reactions at 21 and 24 GeV in emulsions, resonance production in, (E), 22:44321
proton reactions at 21 and 24 GeV/c in nuclear emulsions in strong magnetic fields, particle diffraction production in, (E), 22:7679
proton reactions at 22 GeV/c with light emulsion, particle production in, (E), 23:1820
proton reactions at 22 GeV/c with light emulsion, primary energy estimation for, (E/T), 23:10951
proton reactions at 22.8 GeV/c in emulsions, method for identification of shower particles from, (E), 25:36402
proton reactions at 23 GeV in emulsions, momentum, angular, and energy distributions from quasi-nucleon, (E), 25:1403
proton reactions at 24 and 27 GeV/c, in nuclear emulsions, (E), 22:1687
proton reactions at 24 and 28 GeV in bubble chambers and emulsions, methods of primary energy determination for jet production from, (T), 22:20133
proton reactions at 24 GeV/c in emulsions, complete disintegration in, (E), 22:22298
proton reactions at 24 GeV/c in emulsions, deuteron emission in, (E), 25:36403
proton reactions at 24 GeV/c in emulsions, double emission of Z > 3 fragments in, (E), 22:44326
proton reactions at 24 GeV/c in emulsions, N(1240) production in, (E), 24:40252
proton reactions at 24 GeV/c in emulsions, review of fast deuteron and triton emission from, 23:18795 (CONF-671217-, pp 589-695)
proton reactions at 25 GeV/c in emulsions, azimuthal angular distribution of secondary particles in diffractional generation in, (E), 22:32051
proton reactions at 25 GeV/c in emulsions, fragment emission in, (E), 21:4250
proton reactions at 25 GeV/c, diffractional production of mesons (π) in, (E), 22:22625
proton reactions at 26 GeV in emulsions, emission of excess of light mesons in relation to Dalitz pairs in, (E), 25:9642

proton reactions at 28 GeV in emulsions, along-the-track scanning method for total cross section for, (E), 22: 29624
proton reactions at 28.8 GeV/c, effective mass spectrum of low-energy proton pairs from, (E), 24:26372
proton reactions at 3 GeV/c at small angles in emulsions, computer test programs for, 22:20690
proton reactions at 3 GeV/c in emulsions, (E), 23:32616
proton reactions at 3 GeV/c in emulsions, strong-absorption model for, 23:30767
proton reactions at 30 to 2700 MeV, intranuclear cascade calculation of, 24:45627 (CONF-691101-, pp 42-62)
proton reactions at 30 to 340 MeV, secondary particle spectra from, 21:46815
proton reactions at 400 MeV to 24 GeV with intermediate, calculation of spallation cross sections for, (T), 25:36689 (NP-18820)
proton reactions at 400 to 660 MeV, mean number of secondary neutrons evaporated from, (E), 22:20127
proton reactions at 450 MeV, meson (π) production in, (T), 22:35388
proton reactions at 50 to 1000 GeV, review of multiparticle production in, (E), 25:5273
proton reactions at 570 MeV, angular distributions of helions from, (E), 24:18361
proton reactions at 6 to 10 GeV, yields of K, π, and anti p from, 23:27820 (ITEF-620)
proton reactions at 6 to 25 GeV/c in emulsions, Monte Carlo calculations for double production of lithium-8 in, (E/T), 24:37624
proton reactions at 6.2 and 22.5 GeV in emulsions, cascade and evaporation processes in, (E), 23:18797
proton reactions at 660 MeV, production of slow π mesons in, (E), 25:53010
proton reactions at 80 TeV in emulsions, aleph baryon production in, (E), 25:9641
proton reactions at 85 MeV, beryllium-7 production in, (E), 21:7744
proton reactions at 9 GeV in emulsions with heavy, production of π^+ and π^- (< 11 MeV) in, (E), 22: 1384
proton reactions at 9 GeV in emulsions, fast deuteron emission in, 22:7436
proton reactions at 9 GeV in emulsions, yield of slow π^- and π^+ from, (E), 22:39260
proton reactions at 90 to 300 MeV, cross-section calculations using elastic scattering data, (T), 21:23565
proton reactions at high energies, differential cross section ratio of π^- production in deuteron reactions with nuclei to π^- production in, (E), 25:47728 (JINR-P1-5819)
proton reactions at high energies, frequency distribution of heavy prongs from, 22:7438
proton reactions at high energies, review of, (T), 25: 15148(T) (ORNL-tr-2399)
proton reactions at high energy, correlation of spallation fragment and product properties in, (T), 23:13316
proton reactions at high energy, impact parameter multiple scattering theory for, (T), 23:11051 (MIT-2098-495)
proton reactions below 150 MeV, photonuclear data index, Jan. 1965 to Jan. 1970 for, (E), 25:22961 (NBS-SPEC. PUBL-322)
proton reactions below 28 GeV in emulsions, multiple production from, (E), 22:7439
proton reactions in emulsions at 25 GeV/c, diffraction production of mesons (π) in, (E/T), 24:21939
proton reactions in GeV range, excitation cross sections for energy-level transitions from, (T), 22:35412
proton reactions with 12 < Z < 83, at 0.010 to 5 GeV, properties of low-energy nuclei from, (T), 25:56522(T) (ORNL-tr-2520)
proton reactions with 1p-shell, calculations of spectroscopic factors using wave functions with effective three-body interactions, (T), 23:15373
proton reactions with A = 11 to 27, cross sections for production of carbon-16, lithium-9, and nitrogen-17 by, (E), 22:29918
proton reactions with atmospheric, diffraction dissociation mechanism for heavy-triplet production in cosmic, 24:15603
proton reactions with emulsion, cross for elastic scattering of target protons in, (E), 25:33545
proton reactions with heavy emulsion, at 14 and 24 GeV/c, recoil ranges from, (E), 21:19259
proton reactions with heavy emulsion, at 14 GeV/c, charged-particle emission in, (E), 21:19258
proton reactions with heavy, at 10 to 700 MeV, (T), 21: 2720
proton reactions with heavy, at 20.8 GeV/c in emulsions, π^+ and π^- diffraction production in, (E), 25:53012
proton reactions with isobaric analog excitation, formalism for, (T), 23:40126
proton reactions with light, at 22.8 GeV/c in emulsions, review of particle production in, 23:18795 (CONF-671217-, pp 589-695)
proton reactions with medium-weight and heavy, at 156 MeV, charged-particle emission in, (E), 21:31801
proton reactions with N = 82, (E/T), 24:52566(R) (ORNL-4534)
proton reactions with nuclei at 20 GeV in emulsions, D, T, ^{3}He, and ^{4}He fragment production in, (E), 24:3513
proton reactions with several open channels, isospin purity of isobaric analog resonances in, (T), 21:31858
proton reactions with Z = 12 to 92, at 400 MeV, sodium-22 and -24 production cross sections for, (E), 22:9816
proton reactions with Z = 26 to 30, at 17 MeV, (E), 21:7688(R) (USC-136-114)
proton reactions with, (n - p) radius difference from model of meson (π) production in, 23:23495
proton reactions with, α—nucleon cascades in, (T), 24: 8925(T) (ORNL-tr-1704)
proton reactions with, bibliography on, 21:33871 (CEA-Bib-82)
proton reactions with, cross sections for π^+ production in, 25:53239
proton reactions with, cross sections for quark-pair production in, (T), 25:47901
proton reactions with, effects of intermediate resonance states in coherent production of N(1480) and N(1688) in, 25:41027
proton reactions with, in solar atmosphere, (T), 23: 16609
proton reactions with, isobaric-spin conservation for proton emission probability in compound-nucleus, (T), 25:59830 (CU-1019-82)
proton reactions with, model of factorized residues for, (T), 23:1955
proton reactions with, review of diffractive processes in, (T), 25:17501
proton resonances in heavy, theory for isobaric analog excitation, (T), 23:28272 (ITF-68-84)
proton scattering at 1 GeV, high-resolution nuclear spectroscopy project for, 25:47999
proton scattering at 100 to 200 MeV, polarization from, (E/T), 25:39058
proton scattering at 16 to 22 MeV, optical model analysis of, (T), 23:37289 (N-69-22934)
proton scattering at 180 MeV, optical-model potentials with nonlocal corrections, 21:31838 (RHEL/R-136, pp 89-130)
proton scattering at 19.3 GeV/c, (T), 21:17395
proton scattering at 19.8 GeV/c in emulsions, multiple Coulomb, (E), 23:16923
proton scattering at 20 GeV, N + N interactions in, (E/T), 22:5499 (INP-567/PL/PH)
proton scattering at 6 to 30 GeV/c, spark chamber for momentum analysis of, 21:16106 (CONF-660918-, pp 39-40)
proton scattering at 730 MeV, use of lithium-drifted silicon detectors for determining, 21:3298
proton scattering at high energies, lectures on correlations for, (E), 25:22668 (INP-712(Vol.1), pp 144-72)
proton scattering at high energies, small-angle, (T), 21: 2808
proton scattering by A = 48 to 76 nuclei, analysis for real part of optical potential for, (T), 24:43569
proton scattering by medium and heavy zero-spin, polarization and differential cross section measurements of, (E/T), 22:36154
proton scattering by Z = 3 to 92, at 20 GeV, partial-wave analysis using strong absorption model, (T), 21: 19324
proton scattering by, (E), 21:33808 (RHEL/R-129, pp 97-106)
proton scattering by, approximations in Bethe formula for Coulomb—nuclear interference in, 22:3464
proton scattering by, cross sections and polarizations for, (E), 21:33812 (RHEL/R-144, pp 73-83)
proton scattering by, method for analysis of anomalies in elastic, 23:19379
proton scattering by, review of recent experiments on polarized, 21:46765
proton scattering by, stripping theory for, 21:30036
proton scattering by, theory of isobaric analog resonances in, (T), 22:5893
proton scattering by, validity and limits of diffraction theories for, 22:17926
proton scattering experiments at high energy, data analysis using Glauber formalism, (T), 23:9026 (TID-24667, pp 369-81)
proton scattering experiments at high energy, data analysis and equipment for, (E/T), 23:9027 (TID-24667, pp 382-96)
proton scattering from collective states of, (E/T), 21: 42669
proton scattering near isobaric analog resonances, review of polarization effects in, 25:53841
proton scattering with hyperon production, two-step processes in, (T), 24:52691
proton scattering with isobaric analog excitation, microscopic shell-model description of, (T), 24:11044
proton scattering with isobaric analog excitation, analysis of resonance widths in, (E/T), 25:25684
proton total cross sections at 10, 16, 17, and 28 MeV, effect of Z = 28 shell closure on, (E/T), 22:13927(R) (USC-136-132)
proton total cross sections of A = 54 to 68, anomalous dip in, (E), 21:7745
proton triple scattering measurements at 140 MeV, 21: 21450
proton—neutron interactions in A = 90 to 140, effective, (T), 23:17112
quadrupole excitations in even-even, magnetic dipole transition operators for collective, 21:2799
quadrupole excitations of even—even, from alpha inelastic scattering, (E/T), 24:38336
quadrupole force in, derivation of radial dependence from a Woods—Saxon potential, 24:38372
quadrupole giant resonances in deformed, dynamic collective analysis of, 21:10112
quadrupole moments of even—even, in the range A = 148 to 192, (E/T), 22:11957
quadrupole moments of neutron-rich A = 4 to 40, variational calculation of, (T), 25:31238 (ITF-70-83-E)
quadrupole moments of odd deformed, in the range A = 153 to 191, (E/T), 22:11957
quadrupole resonance of spin-$^3/_2$, kinetic equations for, 21:16992
quadrupole transitions in, method for analysis of Moessbauer spectra from, 23:47086
quadrupole vibration in spherical even—even, effective mass and stiffness parameter for, 22:35390
quasiparticle approximation for, fluctuation-dissipation theorem from, 22:26583
quasiparticle description of 2^+ and 3^- states of even—even spherical, 22:37379
quasiparticle interactions in, origin and form of long range parts of effective, (T), 23:49465
radiation length for, total cross sections of pair production for accurate calculation of tables for, 23: 32598 (DESY-69/8)
radiative transitions in, effect of electronic relaxation processes on angular correlations for, (T), 23:40101
radii of A = 3, dependence on interaction parameter of, (T), 25:28163 (ITF-70-100-P)
radii of complex, magnetic spectrometer study of rho^0 photoproduction on complex nuclei at high energies for Woods—Saxon, 24:24230
radii of complex, magnetic spectrometer study of rho^0 photoproduction on complex nuclei at high energies for Woods—Saxon, (E), 24:24215
radii of light, calculations with several nucleon—nucleon potentials for, (T), 25:20298
radii of neutron-rich A = 4 to 40, variational calculation of, (T), 25:31238 (ITF-70-83-E)
radii of spherical, calculations using s-wave separable interactions of, (T), 25:43959
radii of, determination using fast neutron elastic scattering, (E/T), 23:19206
radii of, measurement using neutron and proton scattering, (T), 23:1929(R) (COO-1265-67)
radii of, odd-even staggering of, 25:20520
radioactivity growth-decay data from, least square analysis of, 22:33634 (AD-665666)
radius from rho photoproduction reactions, 25:5301 (DNPL/R-7, pp 29-70)
range, stopping power, and terminal ionization in any nongaseous material for 0.01- to 500-MeV/amu, computer program for, 24:26677 (UCRL-19391)
reaction angular distributions for light, spin dependence of, (T), 21:38389
reaction cross sections for, effect of excitation energy on, (E), 22:3652
reaction matrix elements for 0f-1p shell, (T), 22:37378
reaction matrix elements for A = 50 and 90, calculations using Hamada—Johnston interaction, 21: 38377(R) (PUC-937-260)
reaction matrix elements for closed-shell, calculation using realistic forces, 22:32506
reaction matrix for A = 18, (T), 24:30957
reaction matrix for A = 18, calculation using nonlocal separable potential, (T), 24:11042
reaction matrix for doubly magic, solution of Bethe—Goldstone equation for, (T), 22:32683
reaction matrix for doubly magic, solution of Bethe—Goldstone equation for, (T), 22:32683
reaction matrix in finite, calculation of, 25:3742
reaction matrix in oscillator representation for light, method for calculating Brueckner, (T), 23:13343
reaction matrix theory for finite, 21:27638
reaction Q-values for stable and naturally occurring, 21: 46824
reaction-matrix elements for light, method for calculating, 21:38403
reactions (e,e'x) at high energy, cross-section calculations using impulse approximation, (T), 21:21574 (ISS-66/45)
reactions (p,n) and (α,n) in stellar, and their reverse rates endoergic, (T), 23:44041
reactions at 6 GeV/c in emulsions, production of $\Lambda\Lambda$-C^{11} and Ξ-B^{11} from, (E), 25:22688 (JEN-217-IFIC/I-4)
reactions in emulsions at 10 to 1000 GeV/nucleon, fragmentation without visible particle production from, (E), 21:29886
reactions in nuclear emulsions at >1 TeV, nucleon isobar production by N + N interactions from, 22: 24533
reactions in stars, partition functions for, (T), 24:37031
reactions matrix elements derivation for light, 21:30044
reactions of A = 13 to 20, unified-shell-model calculations of spectroscopic factors for pickup and stripping, (T), 25:38895
reactions of complex, theorem for symmetries for isospin multiplet production in, 25:36844
reactions of cosmic primary in nuclear emulsion, (E), 22:29314
reactions of cosmic, at 0.010 to 1 TeV/nucleon in emulsions, fragmentation without visible production from, (E), 22:3236 (INR-792/VI/PH)
reactions of cosmic, with interstellar matter, (T), 21: 3712
reactions of heavy cosmic, with emulsion nuclei, fragmentation parameters for, 22:21976
reactions of heavy cosmic, with nuclei at high energies in emulsions, target mass and collision number dependence of, (E), 24:42875
reactions of heavy primary cosmic, with emulsion nuclei above 10^{12} eV, multiple meson production in, 21: 37676
reactions of high-energy, astrophysical implications of, (T), 22:29102
reactions of light, potentials at large distances for, (T), 21:27624
reactions of light, with nuclei, diffraction interaction in, (T), 21:21465
reactions of secondary, emitted from relativistic heavy primary reaction in emulsion, (E), 22:24074
reactions of spin-1/2 and spin-1, interaction Hamiltonian for relativistic, 23:39669
reactions of, models of resonance, 21:7856(R) (ANL-7255)
reactions of, time dependence of, 24:37667
reactions with A < 5 hyperfragments, (T), 21:12113
reactions with electromagnetic fields, full isospin invariance concept for, (T), 24:40694
reactions with heavy and light nuclei above 1 TeV/nucleon in emulsions, central, (E), 23:51853
reactions with heavy nuclei, Coulomb distortion in, (T), 21:30047
reactions with identical nuclei, interference effects in, (T), 22:7761
reactions with light nuclei above 700 MeV/nucleon in emulsions, energy distribution and mean energy of nonrelativistic doubly charged particle production in, (E), 25:59274

reactions with light, shell model approach to, (T), 24:24676
reactions with nuclei as quasi-free nucleons in nuclear emulsions, search for excited baryons in, 22:11585
reactions with nuclei at 0.15 GeV/nucleon in emulsions, cascade and evaporation processes in, (E), 23:18797
reactions with nuclei at 1 TeV/nucleon in emulsions, analysis of central, (E), 23:42554
reactions with nuclei at 1.2 x 10^{10} to 2.5 x 10^{11} eV/nucleon in emulsions, (E), 24:20074
reactions with nuclei at 600 MeV, classical absorptive-gas model for calculation of meson (π^+) production in, 25:20031
reactions with nuclei at high energies in emulsions, lower bound of four-momentum transferred between groups of secondary particles in large-multiplicity jets from, (E), 25:45662
reactions with nuclei at high energies, cross sections for inelastic, (T), 23:27823
reactions with nuclei at high energy, (T), 23:7344
reactions with nuclei at high energy, Glauber multiple-scattering theory for meson production in, 23:32665
reactions with nuclei at very high energies in emulsions, angular distribution and transverse momentum of p and α produced in, (E), 25:7549
reactions with nuclei in emulsions, baryon resonance production from peripheral, (E), 22:15671 (INR-P-816/VI/PH)
reactions with nuclei, cross section for intermediate-vector boson production in, 24:40346
reactions with nuclei, liquid model calculations of flattening in idealized, 23:49449 (UCRL-17541)
recoil measurements in high-energy nuclear reactions, 21:7692
recoil polarization in magnetic fields, effect of atomic hyperfine quadrupole interactions on, (T), 23:23777
recoil ranges from spallation, track method for determination of, 24:11061
reorientation effect for, review on theory for, 25:12522 (LYCEN-7034, pp 42-57)
research at Lund Univ., 1970, (E), 25:56643(R) (NP-19018)
research at Minnesota Univ., Sept. 1968 to Aug. 1969, (T), 24:3550(R) (COO-1764-39)
research on short-lived beta-emitting, 22:30112
research on short-lived beta-emitting, conference on, 22:30111
research on short-lived, using on-line isotope separator, (E), 22:20646
research on three-particle, using photodisintegration, (E/T), 21:27642
research on, (T), 21:46491(R) (COO-1371-43)
research on, review of, (E/T), 22:24570(R) (UCRL-17876)
residual interactions in spherically symmetric, 21:40478
resonance parameters for A = 60 to 203, calculated and measured values for, (E/T), 25:25703 (AAEC/E-211)
resonance states and energy shift in mirror perturbation of, 21:23547
resonances in collective, isobaric analog, 25:25830
resonances in, baryon, (T), 25:18000
resonances in, external mixing in isobaric analog, (T), 22:7780
resonances in, Mittag—Leffler expansion of S-matrix integral representation for, 24:26533
resonances with two fission channels in, ambiguities in R-matrix parameters for interfering, (T), 25:59829 (COO-2022-11)
rigidity spectrum in primary cosmic radiation, medium and heavy, (E), 25:43178
rotation at high angular momentum, model for, 25:50843
rotation of deformed, (E), 24:52668
rotation of nonaxial, (T), 23:40133
rotation of rare-earth, angular momentum projection approach to, (T), 25:20541
rotation of strongly deformed, (T), 24:52664
rotation of, fixed-particle-number corrections to cranking theory of, 24:43495
rotation of, generalized SU(3) rotons in Elliot model for, (T), 24:49956
rotation of, roton theory for, 24:30878
rotation of, roton theory of, 24:43506
rotation of, unified theory of, 24:22212
rotation spectra in, cranking-model calculations for, 24:52673
rotation—particle coupling, in odd-mass axially symmetric, generalized treatment of, (T), 24:43492
rotation-vibration transition region of, approximation for, (T), 25:20527
rotational and vibrational motion of, unified microscopic description of, (T), 23:28349
rotational bands in deformed even-even, SL(3,R) symmetry for, 25:5801 (AD-706835)
rotational energies of, semiempirical formula for, (T), 21:44795
rotational energy of deformed, (T), 25:18014
rotational invariance in centrifugal stretching of deformed, 25:23067
rotational motion in odd-mass deformed, review of status of, 24:28824 (JINR-P4-4966)
rotational parameters for, review of methods for determining, 21:40513
rotational spectra of deformed, Hartree—Fock calculation of, (T), 25:15143 (LYCEN-7050)
rotational states of deformed, calculation of, 24:47670
rotational states of spherical, Coriolis anti-pairing theory of, (T), 25:31408
rotational transition in muonic atoms, asymmetric doublet from magnetic hyperfine splitting of, (T), 22:43897
rotational variables formalism for deformed, separation of variables in, 25:25826
rotations in random-phase approximation, collective, (T), 21:40480
scattering by light nuclei, analysis using generator coordinate formalism, (T), 25:56825 (LYCEN-7104, C6.1-12)
scattering by nuclei above 50 MeV/nucleon, tables for cross sections and total cross sections for elastic and inelastic, (E), 24:20085
scattering by nuclei at high energies, liquid drop model for elastic and inelastic, (T), 25:30901
scattering by nuclei, analysis using diffraction model, 24:49967
scattering by nuclei, diffraction theory of, (T), 21:44783
scattering by nuclei, effect of antisymmetrization on density distribution for, (T), 25:31423
scattering by nuclei, meson (π) production in peripheral, (T), 24:22198
scattering by nuclei, potential well depth in two-center shell model for, (T), 25:39069 (JINR-E4-5767)
scattering by, theory based on optical model, 22:5152
scattering cross sections of, S-matrix theory for reformulation of generalized impulse approximation for, (T), 25:20537
scattering in A = 3, with pair interaction, (T), 25:45818
scattering in matter, Monte Carlo program for calculating angular distributions and ranges for multiple, 23:44989
scattering length of A = 3, rank-two separable potentials in three-body Faddeev equations for doublet, (T), 25:5830
scattering of primary cosmic, on starlight and cosmic microwave background, (T), 24:3209
search for neutron-deficient, research program on, (E), 22:37316(R) (UR-3591-9)
search for Z = 114, using argon-40 reactions with curium-244 and curium-248, (E), 22:39640 (UCRL-17989, pp 127-57)
selection rules for, hypothesis of commutative super-, 22:34868 (JINR-E2-3799)
self-consistent fields in heavy, local, 25:15167
separation energies of, generalized Hartree—Fock equations for, (T), 23:13341
shape-fluctuation model of ground-state bands in even-even, 25:28481
shapes of light even—even, general method for calculating ground-state, (T), 25:36702
shell-model calculations on N = 30, 21:40505
short-range correlations in, (T), 24:24678
single-particle energies of doubly closed-shell, effects of isospin on, (T), 25:41261
single-particle levels of average field in deformed, 21:12076 (JINR-P4-2976)
space symmetry in 2s-1d shell, spectral measures for, (T), 24:43553
spallation in emulsions, high-energy helium-3 and t emission from, (T), 22:13778
spallation in nuclear emulsions, (E), 22:40365
spallation of 48 less than or equal to Z less than or equal to 96, cross sections for, (T), 24:28768 (CONF-690814-10)
spallation with alpha-particle emission, cross sections for, (T), 22:16085
spectra and intensity of cosmic-heavy-primary, (E), 23:42001
spectra for finite, Hartree—Fock—Bogolyubov projected, (T), 22:37392
spectra in cosmic radiation charge and energy, 22:2861
spectra in static deformed potential, rotational, (T), 24:47669
spectra of cosmic (Z <20), design of cosmic-ray telescope for measuring differential, 21:32431
spectra of extremely heavy primary cosmic, charge, (E), 25:19532
spectra of heavy, during solar minimum, 1965, 22:2860
spectra of low-energy heavy primary cosmic charge and energy, (E), 22:21978
spectra of primary cosmic, (E), 25:30307
spectra of rotating, effects of rotational invariance on, (T), 24:43376
spectra of, orthogonal group in O(n) chain for quasi-spin formalism for, 21:44786
spectra of, research on, 22:1375(R) (BMwF-FBK-67-55)
spectra of, unitary irreducible representations of SL(n,C) R(n^3) symmetry for, 24:52172
spectral distributions in, (T), 25:31430
spectral distributions in, (T), 25:31429
spectral distributions in, calculation of, 21:25569 (UR-875-190)
spectroscopic information on, from excitation of isobaric analog states, (E/T), 22:30094
spectrum of heavy cosmic, solar system and interstellar space effects on, (T), 21:5094 (N-66-30336)
spectrum of the energy operator for atoms with stationary, (T), 21:610
spherical, schematic forces and number-conserving approach to, (T), 23:40130
spin coupling for, spin probability distribution from nonpolarized, (T), 25:50801 (CEA-N-1455)
spin polarization effects in odd-A deformed, analysis using Tamm—Dancoff method, (T), 23:17133
spin systematics for odd-A = 135 to 151, with (2f/sub 7/2)$^{+-3}$ ground-state configurations, 22:39668
spin—orbit interactions in, with large momentum, (T), 22:5900
spin—quadrupole forces and collective levels in deformed, (T), 22:30096
spin-orbit interaction and spin-wave resonance in heavy, (T), 22:24866
stability against pear-shaped deformations, (T), 22:3779
stability of elongated, with high angular momenta, (T), 22:35293(R) (ORNL-4230)
stability of heavy, shapes for, (T), 21:21595
stability of light, limits of, 22:30048(R) (PUC-937-307)
stability of N > or = 158, (T), 23:15430(R) (MNC-3783-2)
stability of N > or = 158, systematics of, (T), 23:1964
stability of spheroidal super-heavy, liquid drop model for, (T), 22:46826
stability of superheavy, (T), 22:22583 (JINR-P7-3733)
stability of superheavy, (T), 22:39640 (UCRL-17989, pp 127-57)
stability of superheavy, bounds for, (T), 23:47020
stability of superheavy, calculations for Z = 114 and 164 regions, (T), 23:23739
stability of superheavy, calculations of shell corrections and deformation energies for, (T), 23:9047
stability of superheavy, calculations using Thomas—Fermi model, (T), 24:22217
stability of superheavy, model-independent calculation of alpha and beta, 24:15954
stability of superheavy, shell-model calculations for, (T), 23:17134
stability of, far from stability line, (T), 25:28289 (CERN-70-30(Vol.1), pp 1-19)
stability of, review of theoretical predictions of, (T), 25:28309 (CERN-70-30(Vol.2), pp 605-44)
stabilization of axially symmetric shape and (pf)^2 mixing in sd-shell, (T), 25:36822
Sternheimer R shielding factor with allowance for exchange effects, 24:45002
strong absorption radii of medium-A, microscopic description of isotopic dependence of, (T), 25:1768
structure of 2s-1d shell, description using group theory, 21:7725
structure of closed-shell, isomorphic model of, (T), 25:39077
structure of light, review of hyperfragment binding energy for study of, 21:40238
structure of spherical, review of, formalism for, (T), 22:9955
structure phase transitions of N approximately 90, from dipole resonance excitations, (T), 24:43480
structure research using charged particles at medium energy, 21:5551
sum rules for, single-particle, (T), 22:32689
surface and volume vibrations in quadrupole deformed, (T), 21:46804
surface delta interaction in deformed, 21:1148
surface delta interaction in deformed, (T), 21:30055
surface depth and energy for, self-consistent field calculation for, 22:20757
surface energy and thickness of, corrections to Thomas—Fermi theory for, 24:52706
surface energy and thickness of, self-consistent-field calculations for, (T), 21:7836
surface of, determination of properties of, (E/T), 25:36824
surface properties from π production in p + N interactions at 600 MeV, 22:24665
surface properties of heavy, calculations using Thomas-Fermi formalism with density-dependent central forces, (T), 22:44768
surface properties of, in terms of nucleon—nucleon interactions, 24:24670
surface properties of, review, (E/T), 21:42688
surface region of, research using nuclear reactions, (T), 23:11072
surface vibration effects on density distributions in, hydrodynamic model for nonlinear, (T), 22:11989
symmetry energy of, explanation of neutron stars using, (T), 25:6946
symmetry for, book on, 22:7465
symmetry for, computer program for arbitrary 3n—j symbols for SU(2), 24:20188
symmetry for, computer program for Clebsch—Gordan coefficients for, 22:22329 (INP-559/PL)
symmetry for, eigenvalues of Casimir operators in, 22:24574
symmetry for, general formula for branching rules for Lie algebra in, (T), 25:7693
symmetry for, internal labeling for compact group reduction to arbitrary subgroup in, 24:8689
symmetry for, matrix elements of finite transformations of U(n), (T), 25:12235
symmetry for, semistretched and fundamental isoscalar factors of SU(3), 24:24409
symmetry for, transformation matrices between U_3 contains U_2 and U_3 contains O_3 chains in, (T), 25:1589
symmetry group for, test of SU(4), 24:6962
synthesis of heavy, at high density, (T), 21:44718
synthesis of Z = 126 and N = 184, calculation of cross sections for, (T), 22:30097
tensor coupling constants for A = 13 and 20, induced, (E/T), 25:36710
theory for deformed, Nilsson Hamiltonian on asymptotic basis in, (T), 25:53811 (FRNC-TH-27)
theory for finite, book on, 25:33819
theory for superheavy, in quantum electrodynamics of strong fields, 24:24426
theory for very light, kinetic energy as perturbation in many-body problem in, 22:14100
theory of ground states of, generalized potential formalism for, (T), 23:11044 (BARC-350)
theory of three-nucleon, (T), 22:7758
theory of, as elementary particles, 21:31555 (NP-16795)
thermonuclear reactions at high density in medium and heavy, (T), 22:15319
three-body forces in, π-mesic, (T), 22:44761
track registration in cellulose nitrate at energies down to 55 keV, (E), 21:8614
transition probabilities for deformed even-A, Clebsch-Gordan coefficients for, (T), 21:10123
transition probabilities for rotational bands of deformed even-even, E2, (T), 22:39630 (ITF-68-7)
transition radiation absorption by, resonance, (T), 25:9703 (JINR-P2-5042)
transitions of complex, information from alpha and gamma, 25:12629 (JINR-E4-5135)
transport of short-lived recoil, helium-jet method for, 23:43578
tritium inelastic reactions up to 30 GeV/nucleon in emulsions, intranuclear cascade model for, (T), 25:25454 (JINR-P3-5548)
triton elastic and inelastic scattering by light, exchange effects in, (T), 24:1756

triton elastic scattering at 10 to 40 MeV by A = 40 to 210, optical-model analysis of, (E/T), 25:17823
triton elastic scattering below 40 MeV by A > 40, optical-model potential for, 25:53716
triton elastic scattering by A = 24 to 116, analysis using optical potential, (T), 25:3769
triton elastic scattering by A = 9 to 20, optical-model analysis of, (E/T), 22:26883
triton elastic scattering by Z = 6 to 50, analysis using strong absorption model, (T), 24:52539
triton elastic scattering by, calculation of optical potentials for, 25:17987
triton elastic scattering by, optical potential for, (T), 25:50853
triton elastic scattering by, optical-model analysis of, (T), 22:48615
triton elastic scattering by, optical-model analysis of, (E/T), 22:39686 (CONF-670970-, pp 41-96)
triton elastic scattering by, review of polarization effects in, 25:53839
triton reactions (t,d) below Coulomb barrier, (T), 22:44767
triton reactions (t,d) with, cross-section calculations using Ohmura three-body wave functions, 21:25578
triton reactions (t,d) with, differential cross section for, (T), 22:3765
triton reactions (t,d) with, normalization factors for, (T), 23:19391
triton reactions (t,p) on deformed, cross-section calculations using strong-coupling rotational model, (T), 23:52188
triton reactions (t,p) with 1p-shell, pole and four-point diagrams for, (T), 21:10121
triton reactions (t,p) with even A = 40 to 46 pseudonium, core excitation sensitivity in, (T), 24:8959
triton reactions (t,p) with medium-weight even-even nuclei, cross sections for, (T), 21:2772
triton reactions (t,p) with p-shell, analysis for distortion and polarization effects in, (T), 25:15192
triton reactions (t,p) with, amplitude for, (T), 22:14097
triton reactions (t,p) with, calculations using pairing potential, (T), 22:44787
triton reactions (t,p) with, cross-section calculations using quadrangle graphs, (T), 24:38380
triton reactions (t,p) with, distorted wave analysis using product of initial and final waves, (T), 24:20422 (JAERI-1184, pp 72-8)
triton reactions (t,p) with, empirical normalization in DWBA analysis of, (T), 24:22214
triton reactions (t,p) with, form factor for DWBA analysis of, (T), 22:39687 (CONF-670970-, pp 97-9)
triton reactions (t,p) with, two-nucleon transfer in, (T), 22:39696 (UCRL-18225)
triton reactions at 0.1 to 20 GeV/nucleon in emulsions, track multiplicity in, (T), 25:47892(T) (ORNL-tr-2503)
triton reactions at low energy survey on, 24:28715
triton reactions with A = 3 to 260, tables of threshold energies for, 21:29967 (UCRL-14003)
triton reactions with, analysis of triton break-up using adiabatic approximation, (T), 23:37310
triton reactions with, bibliography on, 21:17317 (AD-640270)
triton reactions with, bibliography on, 21:33871 (CEA-Bib-82)
unrestricted Hartree—Fock treatment of finite, 21:40511
velocity-dependent potentials for use in large, 22:30062
vertex part equation for, normalization problem for homogeneous, 24:30934
vibrational characteristics of fissioning, in equilibrium and at saddle point, liquid drop model calculation of, 23:40114
vibrational fields in, (T), 24:47667
vibrational motion of even—even spherical, quadrupole—octupole anharmonicity in, (T), 22:44749 (IFA-FT-69)
vibrations in closed-shell, bootstrap theory of, 25:15176
vibrations in closed-shell, extended-particle-phonon-coupling theory of, 25:15176
vibrations in, bootstrap theory of, (T), 25:10063 (RLO-1925-46)
vibrations in, general microscopic theory of, (T), 25:7907
wave equations for light, derivation of integro-differential, (T), 24:13412
wave functions for 1p-shell, (T), 21:23534(R) (ANL-7246)
wave functions for A = 14, determination using β and γ matrix elements, (E/T), 22:44612
wave functions for A = 3 and 4, polarized, (T), 21:27649
wave functions for A = 3 and 4, spatial symmetry in, (T), 23:25961
wave functions for A = 3, (T), 22:48450
wave functions for A = 3, coupled partial differential equations for radial, (T), 21:46818
wave functions for A = 3, spatial symmetry in, (T), 23:25974
wave functions for deformed axially symmetric, calculation solving Schroedinger equation with scattering potential, (T), 22:5907
wave functions for deformed odd-odd, 22:30110
wave functions for even-even A = 12 to 40, Hartree—Fock, (T), 23:11047 (CEA-R-3404)
wave functions for high-Z, local self-consistent field for one-particle, 24:28822 (ITF-69-64)
wave functions for rotational, Hartree—Fock theory for, (T), 23:42994
wave functions for sd-shell, SU(3) coupled, (T), 21:31838 (RHEL/R-136, pp 89-130)
wave functions for, velocity-dependent potential approximating Morse function for single-particle, (T), 24:43466
wave functions in shell model, testing by knockout reactions, (E/T), 22:22624
wave functions of deformed, accuracy of calculation of one-particle, 22:30050
wave functions for ground-state, trial, (T), 25:5838
wavefunction for light, isospin-projected FBCS, (T), 24:43489
weak-coupling model of particles and holes in sd shell, 21:19308
width distribution for heavy, with small time-reversal odd term in hamiltonian, 23:39781
x-ray spectra of heavy spherical, effects of nuclear excitations on muonic, (T), 24:13404
NUCLEI, ANTI-
abundance in Milky Way, (E), 24:12614
abundance in primary cosmic radiation, (E), 22:29314
charge of antihelium-3 produced in proton reactions with aluminum at 70 GeV, (E), 25:7544
mass and electric charge of antihelium-3 in proton reactions with aluminum at 70 GeV, (E), 25:14540 (IFVE-SEF-70-16)
mass of antihelium-3 produced in proton reactions with aluminum at 70 GeV, (E), 25:7544
production of antihelium-3 in proton reactions with aluminum at 70 GeV, cross sections for, (E), 25:14540 (IFVE-SEF-70-16)
production of antihelium-3 in proton reactions with aluminum at 70 GeV, differential cross sections for, (E), 25:7544
reactions of cosmic primary, in nuclear emulsion, (E), 22:29314
NUCLEI (CELLS)

effects of volume of, on x radiosensitivity of wheat, 25:24099
effects of, on control of synthesis of proteins and ribonucleic acid in amoeba, 21:10797
effects on cell systems, 22:30938 (UCRL-17751, pp 27-40)
effects on survival of γ-irradiated thymocytes, 21:45540
effects on survival of irradiated cells, 25:4691
effects on x-radiosensitivity of segments of Drosophila eggs, 24:6105
estradiol accumulation in, of target tissues in rats, tritium tracer study of, 23:35591
grafting of amphibian, effects of, on radioinduced chromosome aberrations and gene mutations, 24:48492
growth of, from neurons and supporting cells from ganglia of chicks and mice, effects of media containing deuterium oxide on, 21:14630
hyalinization of nucleolus in, of Spirogyra cells exposed to low-power ruby laser beam, 21:11150
immune reactions in chickens to isolated, from chicken thymus and rabbit liver, 21:45496(R) (COO-1073-10)
incorporation of tritiated thymidine by, in plant roots, 21:20421(R) (NYO-3561-3)
iodine content of, in liver and muscle of rats, effects of hypothyroidism and thyroxine on, 23:6399
isoelectric point of, effects on radiosensitivity of tumors, 24:32234
isolation of oocyte, from Rana pipiens, 22:28283 (ORNL-4100, pp 75-96)
isolation using zonal centrifugation, 23:22189(R) (ORNL-4273(Summ.))
karyotype changes in, of callus cultures of Haplopappus gracilis, effects of grafting and media supplements on, 22:12180(R) (ORO-3348-2)
labeling of tissue culture, use of electron-microscope autoradiography to determine, 23:11972 (CONF-671111-, pp 661-77)
measurement of volume in relation to radiosensitivity chromosomal fraction, 24:34289
mutations induced in nucleic acids in, of Euglena gracilis by nitrosoguanidine, repair of, 23:45688 (AECL-3334)
niobium-95 uptake by, in rat liver, 21:14593
phosphorus-32 uptake by DNA in, of liver cells in hepatectomized rats, 21:41364
polyriboadenylate synthesis by, of sea urchin embryos, 22:53498 (LA-3848, pp 11-20)
radiation dose to thyroid, in rats, comparison of mean absorbed iodine-125 and iodine-131, γ, 24:51073
radiation dose to, following uptake of tritium-labeled thymidine, β, 24:7728 (BNL-14124)
radiation dose to, from tritium-labeled thymidine, β, 24:50889 (CONF-691212-, pp 315-23)
radiation dose to, in intestine and liver of rats following ingestion of tritium oxide, β, 23:31756
radiation dose to, in tissues of mice following ingestion of tritium-labeled thymidine, β, 24:46613
radiation dose to, in Vicia faba root cells following incorporation of carbon-14 or tritium-labeled thymidine, estimation of absorbed β, 24:14494
radiation effects on, 22:6711 (BARC-287)
radiation effects on activity of acid and alkaline phosphatases in, of liver and spleen cells in rats, whole-body x, 22:6730
radiation effects on activity of enzymes in, of brain in rats, x, 22:23447
radiation effects on activity of RNA polymerase in, of rat tissues, effects of adrenalectomy and fasting on x, 23:17933
radiation effects on ATP synthesis in thymus, 24:11934
radiation effects on ATP synthesis in, review of, 21:30786
radiation effects on chemical and physical properties of, in brain of rats, x, 22:23447
radiation effects on cholinesterase activity of, from brain, x, 22:51375
radiation effects on content of amino acids in, of brain in rats, x, 22:23447
radiation effects on content of DNA and histones in plant, effects of dose on γ, 24:27541
radiation effects on content of DNA and volume of, in human thyroid following iodine-131 therapy of hyperthyroidism, β and γ, 23:2763
radiation effects on count of, in bone marrow of mice following injection of isologous cells from bone marrow, lymph nodes, or thymus, lethal x, 24:14528
radiation effects on cultured chick embryo fibroblasts and retinal cell, effects of MEA on γ, 21:32707
radiation effects on development and differentiation of structures in, of hemp (Cannabis sativa) seedlings, x, 21:13006
radiation effects on development of, in cells of Hordeum vulgare and Oenothera hookeri, x, 25:515
radiation effects on diameter of, γ and x, 21:45521
radiation effects on division of, in yeast, effects of malt-agar medium on, 22:31290
radiation effects on DNA content in, of rat lens epithelium, x, 21:32576
radiation effects on DNA content of, in animal cells, microbeam uv, 22:8449
radiation effects on DNA content of, in lymphocytes of liver and spleen in rats, x, 22:21433
radiation effects on DNA content of, uv, 22:19249
radiation effects on DNA in, of Lens esculentum incubated in uridylic acid, γ, 21:10768
radiation effects on DNA synthesis in, α, 21:8686
radiation effects on DNA synthesis in, of Morris hepatoma cells, tritium tracer study of, 24:11963
radiation effects on DNA synthesis in, of rat liver, x, 24:44602
radiation effects on DNAase activity in isolated, x, 21:34564 (USNRDL-TR-67-62)
radiation effects on dry weight and water volume in rabbit bronchial epithelium, γ, 25:32584
radiation effects on Ehrlich ascites, cobalt-60 γ, electron, and x, 23:20318
radiation effects on enzymes in, of liver and spleen of rats, whole-body ionizing, 22:40589
radiation effects on expulsion of, from late erythroblasts of mice, comparison of, with cytokinesis, x, 24:41967
radiation effects on fine structure of, in alveolar cells of lungs of dogs, x, 21:16494
radiation effects on formation and content of lipid peroxides in, of rat liver, acute x, 23:4887
radiation effects on function of, in biological materials, laser, 24:2569
radiation effects on function of, in tissue differentiation of fish embryo, 21:1799
radiation effects on G_2 phase, of Amoeba proteus, incidence of repair synthesis following γ, 23:2740(R) (COO-78-174)
radiation effects on glycolysis in, of isolated calf thymus cells, ionizing, 24:11940
radiation effects on hematopoietic, 25:46953
radiation effects on incorporation of carbon-14-labeled amino acids into, of rats, γ, 24:50731
radiation effects on incorporation of tritium-labeled thymidine in, of KB cells, uv, 24:32148
radiation effects on interactions of, with cortex in frog eggs, uv, 24:34629(R) (RLO-2011-7)
radiation effects on karyotype of transplanted newt, γ, 21:6658
radiation effects on lymphocyte, from lymph nodes of rats, 23:6392
radiation effects on macro- and micro-, of Stylonychia, x, 25:58096
radiation effects on membrane permeability in, of rat thymocytes, cesium-137 γ, 24:34088
radiation effects on membrane permeability in, of salivary glands in butterfly larvae, 24:9753
radiation effects on membrane permeability of, protective effects of esculamine against, 25:16226
radiation effects on metabolic processes associated with division of, in synchronous cultures of slime mold, γ, 22:25713 (COO-78-163, pp 64-125)
radiation effects on morphology and volume of, of Ehrlich ascites, fast electron and x, 21:16510
radiation effects on morphology of, in cultured animal cells, uv, 22:19249
radiation effects on morphology of, in epidermal rat cells, uv, 22:49253
radiation effects on morphology of, in epidermis of guinea pigs and man, uv, 24:32155
radiation effects on morphology of, in liver cells of mice, whole-body γ, 22:28386
radiation effects on morphology of, in Yoshida ascites tumor cells in rats, x, 21:28383
radiation effects on morphology of, KB cells, electron microscopic study of localized uv, 22:40541
radiation effects on neurosecretory, of endocrine glands and hypothalamus of dogs, late whole-body x, 21:28649
radiation effects on nucleoli of, in grasshopper neuroblast, uv, 21:16333
radiation effects on number of nucleolar organizers in, of Nigella, γ, 22:49297
radiation effects on number of, in mouse organs, whole-body x, 21:8924
radiation effects on Paramecium, during conjugation, γ, 21:18034

radiation effects on phosphate and thiol groups in, of rat thymus, 21:18150
radiation effects on phosphorylation in, of cotton, effects of dose on γ, 22:19294
radiation effects on production of lipid peroxide by, from liver cells of rats, electron, 22:454
radiation effects on proliferation of micro-, in rat kidneys, effects of contralateral nephrectomy on whole-body, 24:14519
radiation effects on properties of histones in, x, 21:45557
radiation effects on properties of polydeoxyribonucleotides in, of lymph tissues of mice, x, 22:23445
radiation effects on protein synthesis by, in rat liver, intestine, and spleen, γ, 21:8719
radiation effects on pycnosis in, of lymphocytes of mice, protective effects of cysteamine against x, 22:25887
radiation effects on rate of protein synthesis in HeLa, 21:20089
radiation effects on rate of thymidine uptake by, in regenerating rat liver cells in relation to cell phase, tracer studies of x, 23:50866
radiation effects on regulating mechanisms in, from crickets, effects of partial-cell exposure on x, 23:784
radiation effects on respiration in thymocyte, kinetics and mechanisms of in vitro and in vivo γ, 24:27532
radiation effects on RNA polymerase activity in, of rat tissues, whole-body x, 23:2786
radiation effects on rye root meristem, γ, 21:36752
radiation effects on sarcolemma-cell- and schwann-cell-, of mice, tritium tracer study of x, 22:38221
radiation effects on segmentation of, in granulocytic leukocytes in blood of man, effects of dose on γ, 22:40907
radiation effects on size and ratio of, to cytoplasm in epithelium of axolotl, effects of RNA on latent x, 22:51362
radiation effects on size of dill plants, x, 25:27081
radiation effects on size of, in bone marrow in rats, internal β, 22:51937
radiation effects on size of, in rabbit heart muscle, chronic whole-body x, 24:2574
radiation effects on size of, in Spathidium spathula, x, 23:38755
radiation effects on Spathidium spathula micro-, x, 21:8977
radiation effects on stability of histones in rat liver and thymus gland, γ, 25:44936
radiation effects on structure of, in cells of small intestine in rats, sublethal cobalt-60 γ, 23:38475
radiation effects on structure of, in thymocytes of rats, effects of phosphates on γ, 22:21581
radiation effects on susceptibility of, to degradation by endogenous deoxyribonuclease, x, 22:25760
radiation effects on synthesis and utilization of ATP in, of thymus in rats, whole-body x, 22:30951
radiation effects on synthesis of ATP and hexosephosphates in, γ, 21:22798
radiation effects on synthesis of DNA in, of Paramecium caudatum, effects of temperature adaptation on x, 22:21608
radiation effects on synthesis of DNA in, uv and x, 24:50741
radiation effects on synthesis of DNA, nucleoprotein, and RNA in, of germ cells of male rats, x, 22:51418
radiation effects on synthesis of protein by, of cells from liver of partially hepatectomized rats in vitro, whole-body γ, 22:43431
radiation effects on thiol content of, of liver from rats, effects of dose on electron, 22:19247
radiation effects on thymus, photoreactivation of uv, 21:24321
radiation effects on ultrastructure of, of duodenal crypt cells of mice, x, 22:33963
radiation effects on uptake of cytidine and thymidine by DNA in, of hepatomas in mice, x, 23:6400
radiation effects on uptake of orotic acid by RNA in, of rat liver, tracer study of x, 24:14404
radiation effects on uptake of tritiated thymidine by, use of autoradiographic processing technique in studies of uv, 21:11073
radiation effects on uptake of tritium-labeled thymidine by, of HeLa cells, uv, 24:7758
radiation effects on uptake of tritium-labeled thymidine by, of HeLa cells, γ, 23:26947
radiation effects on uptake of tritium-labeled thymidine by DNA of, in regenerating liver of rats, x, 21:41336
radiation effects on uptake of tritium-labeled thymidine by, in small intestine of mice, protective effects of mixtures of AET, glutathione, and serotonin against x, 22:21557
radiation effects on volume of Ehrlich tumor, electron and x, 21:24590
radiation effects on volume of, in blackeyed peas, flax, and oats, effects of pretreatment with ice-water on determination of, 23:10111 (ORO-661, pp 103-27)
radiation effects on volume of, in guinea pig cerebellum, x, 21:6664
radiation effects on volume of, in malignant and nevus melanomas, x, 21:4864
radiation effects on volume of, in roots of wheat, γ, 22:587
radiation effects on volume of, in thyroid follicular epithelium of rats after strontium-90 injection, latent β, 24:51053
radiation effects on, biochemical analysis of laser and uv, 21:45534
radiation effects on, following uptake of tritium-labeled thymidine by cultured mammalian cells, β, 22:45382 (EUR-3290f-e, pp 73-7)
radiation effects on, in antibody-forming cells of mice, x, 23:24554
radiation effects on, in bone marrow of monkeys, latent γ, 22:21609
radiation effects on, in cerebellum of mice, deuteron, 22:4691
radiation effects on, in epidermal cells of Allium cepa, phase microscopy of x, 21:24658
radiation effects on, in epithelium of duodenal crypts of mice, x, 21:11042
radiation effects on, in gastrointestinal tract of mice, comparison of fast neutron and x, 22:40935
radiation effects on, in green algae, γ and x, 23:45957
radiation effects on, in heart of rabbits, x, 22:28682
radiation effects on, in liver cells of mice, laser, 22:51965
radiation effects on, in oviducal mouse embryos following exposure of unfertilized eggs, x, 21:6615(R) (TID-23371)
radiation effects on, in plants in tropical rain forests, γ, 25:21949 (TID-24270, pp G.15-20)
radiation effects on, in solar plexus of rats, effects of dose on x, 22:10723
radiation effects on, in species of Abies, Picea, and Tsuga, 25:606
radiation effects on, of adrenal cortical cells of rats, electron microscopy of x, 22:45395
radiation effects on, of algae, laser, 22:12783
radiation effects on, of bipolar cells in rabbit retina, γ, 21:20409
radiation effects on, of cervical carcinomas, x, 21:11056
radiation effects on, of cultured cells, comparison of laser and x, 22:6736
radiation effects on, of cultured cells, uv, 23:45871
radiation effects on, of cultured mammalian cells, tritium β, 22:43456
radiation effects on, of Ehrlich carcinoma cells in mice, x, 22:49191
radiation effects on, of fish embryos, x, 22:51353
radiation effects on, of fungi, laser microbeam, 24:41774
radiation effects on, of glial cells in cats and man, 21:11053
radiation effects on, of hair-bulb cells of rat, x, 21:20075
radiation effects on, of hamster fibroblasts, RBE for α and x, 24:32156
radiation effects on, of HeLa cells stained with acridine orange, x, 21:8947
radiation effects on, of HeLa cells, uv and microbeam, 21:14608
radiation effects on, of hematopoietic cells, γ and x, 23:38792
radiation effects on, of hepatoma ascite cells, combined effects of phytohemagglutinin on, 22:33942
radiation effects on, of human lymphocytes, classification of x, 23:10099
radiation effects on, of KB cells, laser, 24:7977
radiation effects on, of L cells, effects of cell cycle and dose on x, 23:29718
radiation effects on, of lymphocytes and thymocytes of rats, effects of dose and incubation time on, 22:33756
radiation effects on, of nerve cells in rats, combined effects of crush injury on x, 22:31221
radiation effects on, of oocytes of Drosophila and Habrobracon wasps, uv, 21:16491
radiation effects on, of organ of Corti cells in guinea pigs, x, 24:48430
radiation effects on, of Physarum, 21:6738
radiation effects on, of plants, effects of ploidy on, 21:43407
radiation effects on, of rat liver, chemiluminescence and ESR studies of, 22:51401
radiation effects on, of rat thymocytes, combined effects of valinomycin on, 23:805
radiation effects on, of rat thymus, relation of, to effects on DNA, γ, 21:36727
radiation effects on, of Saccharomyces gametes, lethality induced in zygotes by uv, 21:9025
radiation effects on, of sciatic nerve of rats, effects of crushing nerve on x, 23:20095
radiation effects on, uv, 22:427
radiation injuries to structures of, electron microscope studies of, 21:14714
radiation injuries to, protective effects of AET, methylallylisothiourea, thioacetamide, and thiourea against α and γ, 22:49388
radioinduced aberrations of, in cultured embryonic fibroblasts, γ, 23:4906
radioinduced aberrations of, in rats, x, 21:39358
radioinduced abnormal, in root tip cells of Tradescantia, combined effects of clinostat, space flight factors, and vibration on incidence of strontium-85 γ, 24:25447
radioinduced abnormalities in embryo and endosperm, of Melandrium, x and γ, 21:36748
radioinduced abnormalities in embryo and endosperm of Lilium, γ and x, 21:36751
radioinduced abnormalities of Tradescantia, in embryos and endosperm, x and γ, 21:28424
radioinduced abnormalities of, in vaginal cells after radiotherapy of cervical carcinomas, use of, as prognostic guide, 21:12987
radioinduced changes in, of rat thyroid during development of neoplasms, β, 22:2534(R) (COO-1243-8)
radioinduced chromosome aberrations in, of synchronized Chinese hamster cells, effects of cell phase at exposure on lethal, 24:21271
radioinduced concentration of pyknotic endothelial, on walls of leptomeningeal vessels of cerebral cortex of dogs, determination of laser, 21:20346
radioinduced damage in, of E. coli, effects of, on damage from subsequent thymine starvation, 21:6727 (NP-16399)
radioinduced decomposition of, of glial and nerve cells of rats, effects of dose on, 22:51361
radioinduced deformation and displacement of, in TMV-infected tobacco cells, in vitro, γ, 22:40961
radioinduced degeneration of, in neoplastic cells of mouth, γ, 22:36196
radioinduced fragmentation of, in leukocytes in vitro, microwaves, 21:20375
radioinduced fragmentation of, in mesenteron of fruit flies, effects of pupal exposure on x, 21:24568
radioinduced giant, in small intestine of mice, protective effects of AET against x, 21:45731
radioinduced inactivation of, in Neurospora crassa, accelerated particle and x, 22:12835
radioinduced increase in double, in lymphocytes following therapy, 21:36692
radioinduced ionization in, in relation to RBE, 22:31084
radioinduced malformations of, in granulocytes of guinea pigs, whole-body x, 23:45908
radioinduced nuclear homogenization and pyknosis in, 21:18149
radioinduced pycnosis in, of oocytes of fish, x, 22:10870
radioinduced pycnosis in, role of genetic variations among individuals on, 24:12272
radioinduced pycnosis of, in cultured human lymphocytes, extracorporeal β and γ, 24:34142
radioinduced pyknosis in, of kidney cells, effects of dose on uv, 22:49210
radioinduced pyknosis of, in thymocytes of rats, effects of respiration on x, 22:21437
radioisotope uptake by, in intestinal mucosa of chickens, calcium-45 and strontium-85, 25:16002 (ORO-678, pp 94-101)
radiolysis in embryos of hybrids of fish, 22:21584
radioprotective effects of, on DNA, ionizing, 22:23564
radiosensitivity in cultured HeLa cells, effects of Janus green content of culture media on ruby laser, 23:38749
radiosensitivity in L cells, uv, 22:49507
radiosensitivity in rat brain cells in comparison to astrocytes, neurons, and oligodendrocytes, 24:25554
radiosensitivity in relation to volume, 21:36740
radiosensitivity in relation to whole organism, 21:34796
radiosensitivity of amphibians, effects of volume on, 24:32195
radiosensitivity of Colletotrichum gloeosporoides spore, comparison of uv and x, 22:36406
radiosensitivity of cultured human leukocyte, cobalt-60 γ, 23:29378
radiosensitivity of generative, of pollen, γ, 24:44632
radiosensitivity of membranes of, in spleen, liver, kidneys, and lymphoid cells, comparative, 24:50740
radiosensitivity of Netrium, light and uv, 22:52023
reactions of quinones in, 21:36745
reconstruction of, effects of stage of, on x-radiosensitivity of Paramecium caudatum, 22:21607
retention of sulfur-35-labeled cysteamine in rat thymus, mechanism of, 25:32441
RNA metabolism in, of ascites cells, 22:12173(R) (NYO-3621-5)
RNA nucleotidyl transferase activity in hepatic, of rats, inhibition of, by nickel carbonyl, 22:6216(R) (ORO-3461-9)
role in growth of Paramecia, genetic communication, 22:53495(R) (COO-235-49)
role in photoreactivation of uv-irradiated Amoeba proteus, 24:9918
sedimentation from slime molds, use of alkaline sucrose gradients for, 22:28288 (ORNL-4100, pp 166-77)
structure of membrane of, in liver cells, 25:37866 (ANL-7770, pp 48-54)
sulfur-35-labeled AET and cystamine uptake by, in rat liver and spleen, 21:4820
synthesis of ribosomal RNA in transplanted, of Amoeba proteus, phosphorus-32 tracer study of, 23:29302
synthesis of RNA in isolated, of Drosophila, carbon-14 and tritium tracer study of, 23:33585
tritium activity in isolated, of rat liver cells, 24:41734 (ANL-7635, pp 292-302)
tritium labeling of, in fetus of rats, 22:40601
tritium uptake by, in duodenal crypt cells of mice following single or sustained injection of tritium-labeled thymidine, 23:38392
tritium-labeled water toxicity to, 22:51459
ultrastructures of, in germinating Rhizopus spores, 21:11162(R) (UCD-34-P-73-11)
volume in gymnosperms, correlation with γ radiosensitivity, 21:22774 (NP-16636)
volume in seed plants, effects of, on x-radiosensitivity, 25:11020
volume in wheat cells in relation to radiosensitivity, 22:43477
volume of gymnosperm seeds in relation to γ-radiosensitivity, 22:45725
volume of Gymnosperm, effects of, on radiosensitivity, 21:32796(R) (TID-23842)
volume of plant cells, in relation to x-radiosensitivity, 22:14905 (BNL-50057, pp 111-22)
volume of plants, effects of, on γ- and fission neutron-radiosensitivity, 22:19456
volume of, in γ- and x-irradiated pine trees used as index of radiosensitivity, 21:6710 (RM-4904-TAB)
volume of, in x-irradiated Ehrlich adenocarcinoma ascites cells, 21:6700
volume of, in x-irradiated Ehrlich adenocarcinoma ascites cells, 21:6698
volume of, in x-irradiated Ehrlich adenocarcinoma ascites cells, 21:6699
volume, in heterokaryon cells formed by fusion of hen erythrocytes and human HeLa cells, 23:45669
zinc-65 content in, of carbon tetrachloride-damaged liver of rats, 21:28368
NUCLEIC ACID
see also Nucleotides
activities of, use as genetic probe, 25:2047(R) (TID-25568)
analysis of labeled, for tritium in presence of cesium chloride, efficiency of scintillation solutions containing colloidal silica and glass beads for, 23:47390
binding to 3,4-benzpyrene, 22:25716(R) (NYO-3538-7)
biosynthesis of plant, in vitro, 25:31720(R) (ORO-3982-10)
book: Progress in Nucleic Acid Research and Molecular Biology, Vol. 5, 21:14611
chemical properties of, 21:10238 (ORNL-3999, pp 132-3)
chemical structure in relation to radiobiology, 23:35848

chemistry, function, and structure of, conference on, 25: 32356 (CONF-690841-(Abstr.))
cobalt incorporation by, in chick embryo, 21:8687
complexes with uranium, composition and stability constants for, 25:49098(T) (ANL-Trans-899)
conference on, Radiation Research Society, 24:6029
conformation and interaction of, effects of hydrophobic-stacking force on, 22:25716(R) (NYO-3538-7)
content of liver of chick embryo, effects of albumin on, 23:16229
content of rats, effects of ovariectomy on, 23:41206
content of, in bone marrow of irradiated rabbits, effects of callicrein on, 21:4815(R) (EUR-2477.f(Vol.3))
distribution in embryos of Vanda sp, 22:40953(R) (UH-235-P-6-5)
effects of foreign, on bacteria, 21:11138(R) (NYO-3116-4)
effects on γ-radiosensitivity of bacteriophages, 22:597
electromagnetic field effects on content of, in viscera of rabbits, 23:50839
energy absorption by, from calf thymus, electron, 21: 20074
energy potential of chemical bonds in, computer calculation of, 22:12202 (UCRL-17966)
labeling with phosphorus for use in metabolism studies, 25:26617
lectures, 22:37628 (ISS-68/1)
metabolism of, reaction mechanisms for, 21:32560(R) (HUX-2643-34)
metabolism of, strontium-90 effects on, in mouse spleen, 21:13020
mutations induced in, in nucleus of Euglena gracilis by nitrosoguanidine, repair of, 23:45688 (AECL-3334)
nucleosides and nucleotides incorporation into, carbon-14, phosphorus-32, and tritium tracer studies of, 24: 36694
phosphorus-32 sorption by, in tobacco plants, 21:8737
phosphorus-32 uptake by, in rat lymphoid tissues, effects of dose on tracer studies using β, 23:16239
photobiology research on, 25:2015(R) (NYO-2798-54)
photochemistry of, exposed to uv radiation, implications in genetics, review of, 21:12771
plutonium binding with, in bones and liver, 25:8595(T) (LF-tr-41, pp 7-125)
production in lymphocytes of man, effects of phytohemagglutinin on, 21:32736(R) (EUR-3455.d)
protection from radiation, use of chemical agents for, 21:22516
radiation damage repair mechanisms in, 21:22398
radiation effects on, 25:46721
radiation effects on Acetabularia mediterranea synthesis of, γ, 25:52000
radiation effects on biochemical structure of, effects of dose on gamma, 25:26660
radiation effects on compounds related to, in mushrooms, γ, 24:48739
radiation effects on constituents of, review of, 25:51990 (A/CONF.49/P-633)
radiation effects on content in above-ground parts and roots of pea and wheat plants, γ, 25:57941
radiation effects on content of, in brain of rats, effects of age on x, 23:35635 (UCLA-12-725)
radiation effects on content of, in food, 23:29940
radiation effects on content of, in hepatic cells of rabbits and rats, iodine-131 β and γ, 22:45435
radiation effects on content of, in rat liver, effects of direct electric current on x, 23:9878
radiation effects on content of, in spleen and thymus, comparison of cobalt-60 γ ray, conventional, 15 mv x ray, 23:20363
radiation effects on excretion of metabolites of, in rat urine, mechanism of effects of cysteamine on γ, 25: 42625
radiation effects on function and structure of, 25:32357 (CONF-691227)
radiation effects on metabolism of compounds of, in rats, review of prolonged γ, 22:23653
radiation effects on metabolism of hepatic, in mice, effects of thymus extracts on x, 23:26699
radiation effects on metabolism of, in animals, review of whole-body, 21:45532
radiation effects on metabolism of, in barley during ontogenesis, γ, 22:52022
radiation effects on metabolism of, in cultured dog lymphocytes, effects of test environment on x, 23: 12008 (UCD-472-115, pp 78-82)
radiation effects on metabolism of, in cultured dog lymphocytes, x, 23:12007 (UCD-472-115, pp 75-7)
radiation effects on metabolism of, in Escherichia coli, x, 22:19266
radiation effects on metabolism of, in kidneys and liver of rabbits following enteral uranium administration, 24:23370
radiation effects on metabolism of, in larvae of Dictyocaulus filaria, x, 23:773(T) (JPRS-45305)
radiation effects on metabolism of, in liver of rats, γ and x, 22:49259
radiation effects on metabolism of, in lymph nodes and thymus of mice, combined effects of estradiol on x, 24:596
radiation effects on metabolism of, in mice and rats, mechanisms for, 25:42623
radiation effects on metabolism of, in retina of rabbits, x, 23:29362
radiation effects on metabolism of, in wheat rootlets, x, 23:10115
radiation effects on metabolism of, review of, 21:28409
radiation effects on metabolism of, tracer study of x, 21: 45533
radiation effects on molecular changes in, review on ionizing and uv, 23:47570
radiation effects on precursors of, in yeast, β and γ, 22: 45723
radiation effects on primary and secondary structure of, review of, 21:45531
radiation effects on pyrimidine bases of, in Escherichia coli, comparison of, to effects of ozone and sodium hypochlorite, 22:51389
radiation effects on structure of, effects of dose on γ, 23:17960
radiation effects on synthesis in plant cells, gamma, 21: 437
radiation effects on synthesis of dill, lettuce, and spinach, role of recovery in sensitivity to x, 25:46746
radiation effects on synthesis of, in barley, fast neutron, 24:17164
radiation effects on synthesis of, in biological materials, laser, 24:2569
radiation effects on synthesis of, in Blepharisma during regeneration, carbon-14 tracer study of uv, 25:26648
radiation effects on synthesis of, in bone marrow cells and reticulocytes of rabbits, combined effects of dose and massive hemorrhage on γ, 24:11953
radiation effects on synthesis of, in Chinese hamster cells, effects of age on x, 22:25786
radiation effects on synthesis of, in Escherichia coli, uv, 21:1847(R) (ORO-2139-10)
radiation effects on synthesis of, in lymphocytes of man, x, 21:32736(R) (EUR-3455.d)
radiation effects on synthesis of, in Micrococcus radiodurans, dose dependence of gamma, 25:26639
radiation effects on synthesis of, in seedlings of peanuts, effects of postirradiation storage on x, 21:32799
radiation effects on synthesis of, in seeds of barley, γ, 22:28709
radiation effects on synthesis of, in uv-exposed E. coli, 21:1846(R) (ORO-2139-9)
radiation effects on thymine in, of Streptococcus faecalis, protective effects of azathymine and azauracil against uv, 22:519
radiation effects on uracil incorporation into, of potatoes, inhibitory effects of antibiotics on γ, 25:32363
radiation effects on, in developing rat brain, ionizing, 23: 26687 (UCLA-12-706, pp 45-72)
radiation effects on, in living systems, uv, 24:7757
radiation effects on, in mammalian cells, review of early, 22:40552
radiation effects on, in potato tubers, 23:12249(T) (ORNL-IIC-14, pp 5-19)
radiation effects on, in relation to excited electronic states, 22:30937 (UCRL-17751, pp 1-26)
radiation effects on, kinetics of photoreactivation of uv, 21:24323
radiation effects on, mechanism of action of, 21:12932
radiation effects on, molecular role in, 25:37736
radiation effects on, of bacteria and bacteriophages, review of, 22:14916
radiation effects on, of cells, effects of dose on, 22: 30966
radiation effects on, of rat liver cells, effects of thyroxine on x, 24:51065
radiation effects on, of Streptomyces griseus, effects of wavelength on uv, 21:45852
radiation effects on, protective effects of cysteamine against x, 23:11994 (NYO-910-75, pp 37-46)
radiation effects on, review of, 22:49224
radiation effects on, review of mechanism of uv, 24: 50717
radiation effects on, review of uv, 21:12765
radiation effects on, role of cytosine photohydrates in uv, 23:14123
radiation effects on, tritium β, 21:26330(R) (N-67-11851)
radiation effects on, uv, 23:8072
radiation effects on, x, 22:421(R) (NYO-910-57)
radiation-induced linkage of, to 3,4-benzpyrene, photo-, 22:25716(R) (NYO-3538-7)
radioactivity of mercury-203 in, of rat brain, 21:14568
radioinduced changes in function of, review of, 21:30786
radioinduced changes in metabolism of, in Xanthium, γ, 21:13066
radioinduced chemiluminescence of aqueous solutions of, x, 23:4700
radioinduced dimer formation in aqueous solutions of derivatives of, effects of oxygen on uv, 21:30782
radioinduced formation of radicals in, ionizing, 21:43332
radioinduced free radical formation in, ESR studies of, 23:35652
radioinduced free radicals in, charged particle, 22:28368
radioinduced free radicals in, ESR spectra for, 21:43335
radioinduced increase of, in corn and radishes, effects of seed exposure on x, 22:38499(T) (JPRS-44845)
radioinduced reactions of hydrogen and hydrogen radicals with, ESR study of, 21:26385
radioinduced reactions of hydrogen and hydrogen radicals with constituent parts of, ESR study of, 21: 26385
radioinduced structural modification of macromolecules of, ionizing, 21:24314
radiolysis of aqueous chloride solutions of, 23:26687 (UCLA-12-706, pp 45-72)
radiolysis of aqueous chloride solutions of, reactions of Cl_2^- and hydroxyl radicals in electron steady-state and pulse, 23:47528
radiolysis of aqueous solutions of, reaction kinetics of, 23:35158
radiolysis of derivatives of, effects of pH on, 25:6375
radiolysis of solid, effects of electron dislocation and molecular weight on resistance to, 25:54636
radiolysis of, in vivo, products from, 25:6364 (NP-18583)
radiolysis of, reactions and spectra of free radicals produced by pulse, 25:49099 (UCLA-12-815, pp 1-36)
radioprotective effects of bone marrow, on blood coagulation in rats, lethal x, 25:44834
radioprotective effects of extracts of, from hematopoietic tissues, 21:10982
radioprotective effects of hydrolysates of, on yeasts, fast neutron, 23:38621
radioprotective effects of isologous, on mice, x, 24: 21212
radioprotective effects of, at macromolecular level, 21: 4799
radioprotective effects of, on axenic mice, x, 22:4659
radioprotective effects of, on botulinum type E toxins, α, 24:50725
radioprotective effects of, on cells and organisms, conference on, 23:12131(T) (AEC-tr-6646/4A)
radioprotective effects of, on crown gall tissue, x, 23: 12132(T) (AEC-tr-6646/4A, pp 83-9)
radioprotective effects of, on immune reactions of rats, x, 23:11937(T) (AEC-tr-6646/4A, pp 147-50)
radioprotective effects on bone marrow of rats, 25:49219
radioprotective effects on coagulation and fibrinolysis of rat blood, x, 25:42537
radiosensitivity in relation to base composition, 22: 47478
reaction mechanisms of, in vitro protein synthesis, 22: 40615(R) (EUR-3889)
reactions of derivatives of, with radiolytic hydroxyl radicals and hydrated electrons, 23:47531
reactions of free radicals with constituents of, in aqueous solutions, applications of chromatography, ESR measurements, and pulse radiolysis in studies on, 23: 9844 (UCLA-12-686, pp 67-84)
replication errors in RNA polymerase system in, 22: 25716(R) (NYO-3538-7)
research at CRNL in Canada during 1969, 24:41754 (AECL-3430, pp 5-18)
separation by ligand-exchange chromatography, 22: 14429 (ORNL-4196, pp 44-54)
structure of, research on, 21:19294 (ISS-66/29)
synthesis during mitotic cycle of slime mold, electrophoretic and tracer study of, 22:25713 (COO-78-163, pp 64-125)
synthesis in animal cells, inhibitory effects of sulfhydryl-containing radioprotective drugs on, 24:12123
synthesis in animals, tracer study of mechanisms for, 23 50240
synthesis in chicken embryos following infection by ultraviolet-irradiated vesicular stomatitis virus, 25:8806
synthesis in Chinese hamster cells, effects of inhibition of, on radiation repair, 22:25785
synthesis in grasshopper embryos, effects of physical state of chromatin on, 21:22241(R) (ORO-3546-3)
synthesis in γ-irradiated barley plants, role of plant hormones in, 25:2597
synthesis in mammals, reaction mechanisms for tritium uptake from labeled water during, 24:21060 (UCRL-50781)
synthesis in mouse tissues, effects of estradiol on, 21: 20393
synthesis in polytene chromosomes of Rhynchosciara, 22:28399 (ORNL-4100, pp 40-7)
synthesis in x irradiated thymocytes, 21:1718
synthesis of, effects of nitrogen mustard and radiation on, 21:10901
synthesis of, effects of, on transfer of prophage-inducing activity by ultraviolet-irradiated Escherichia coli, 21: 22810
synthesis of, in interphase nuclei of Vicia faba, 21:9007 (ORNL-3999, 160-5)
synthesis of, inhibition of, by colicine E2, 21:8675 (ORNL-3999, pp 134-9)
synthesis of, research on mechanisms of, 24:38659(R) (HUX-2643-60)
tritium uptake by, in rats in relation to uptake by liver lipids following administration of labeled pyrimidines, 24:5991
use for treatment of radiation injuries, 21:34682
use for treatment of radiation injuries, 23:22330
use to restore radioinduced damage in cells and organisms, review of, 22:40552
labeling of end-groups of, uses of enzymatic phosphorylation for, 21:32602
NUCLEIC ACID, DEOXYRIBO-
5-bromodeoxyuridine and 5-iododeoxyuridine uptake by, in neoplastic and normal cells in mice, tracer study of, 25:4602
5-bromodeoxyuridine uptake by, effects of, on sensitivity of murine mast cell tumors to radiomimetic agents and x rays, 21:11074
absorption spectra for, microwave, 23:48263
analysis for tritium, efficiency of scintillation counters for, 21:33
analysis of priming activity of, in chromosomes of amphibia, 22:28402 (ORNL-4100, pp 62-9)
analysis of rabbit pancreas, for trace amounts of copper, gold, manganese, and zinc by neutron activation and radiochemical separation, 23:49763
analysis of transforming, of Hemophilus influenzae, biochemical and genetic, 22:25715(R) (NYO-1371-51)
annealing of lambda bacteriophage, in relation to linear redundancy in chromosomes, 24:21110
base composition of, in uv-radioinduced mutants of Bacillus sp, 23:22258
binding to aminothiols, 21:24447
binding with cystamine, effects on radioprotective properties of cystamine, 21:3416 (UCRL-16806, pp 39-41)
biological properties of, effects of methylation on, 23: 13599(R) (CU-3957-1)
biosynthesis of, effects on effectiveness of mutagens in mutation breeding in crop plants, 24:34262
book: Nuclear Physiology and Differentiation, 23:43725
book: Radiobiophysics of the Nucleoproteins, 25:42274
breakdown of x-irradiated, in E. coli, effects of cysteine on, 21:28698
capacity in irradiated nuclei of rat thymus to support DNA-dependent RNA synthesis, 21:18150
carbon-14 activity in, of lymphoma cells of mice, effects of DNA-ase on, 24:31825
carbon-14 incorporation in genetic effects of, 21:22452
carbon-14 uptake by yeast cell, effects of incorporation in thymine or thymidine on, 25:39958
carbon-14-labeled leucine content in nuclear material of, in thymus gland of whole-body x-irradiated rats, 21: 22697

carcinogen damage to, of mammalian cultured cells, repair processes following quinoline, 4-nitro-,1-oxide, 25:8611
chain configuration of, effects of heat and hydrogen peroxide on, 22:23448
characteristics of, in uv-induced mutants of bacteriophage, 21:22819
characterization and fractionation of tobacco leaf transfer, 25:60284 (RLO-2225-T-15-7)
characterization of cellular and spore, of Bacillus subtilis, 23:2806 (SAN-632-3)
characterization of cytoplasmic symbiont, of Paramecium, 22:53495(R) (COO-235-49)
characterization of mitochondrial molecules of isogenic wild-type and vegetative-petite diploid strains, 25: 20878(R) (NYO-3997-7)
characterization of satellite, of slime mold, 22:25712 (COO-78-163, pp 39-63)
charge carriers in solvated, nature of, 24:22525 (COO-1714-7)
chemical basis of radiosensitization by 5-bromouracil and thymine substitution in, 24:48435
chemical changes of, kinetics of radiation and mutagen-induced, 21:24371
chemical properties in bacterial nucleoids, use of uranyl ions in analysis of, 21:26335
complexes with copper, radiation effects on, stability of reduced complex following γ, 25:49101
complexes with histone, analysis of irradiated, for histone, using 8-anilinonaphthalene-1-sulfonic acid or uv spectrophotometry, 22:51056
complexes with histone, radiation effects on dissociation of histone from, γ, 22:51056
complexes with histone, separation of dissociated histone from irradiated, by precipitation or sedimentation with dilute sodium chloride solutions, 22:51056
complexes with metals, radiation effects on chemical binding in, γ, 23:45337
complexes with nucleoproteins, radiation effects on bonding, with DNA γ, 24:50735
complexes with proflavine, radiation effects on electron transfer in, ESR spectral studies on γ, 25:26638
complexes with RNA in liver of irradiated rats, 24: 23122
complexes with uranium in relation to elimination from man, 23:38443
conference on modification, mutation, and reactivation of, 24:31933
content in bacteriophages, method of measurement of, 21:16535
content in bone marrow, effects of AET and callicrein on, 21:4814(R) (EUR-2477.f(Vol.2))
content in Escherichia coli, effects of thymine content in culture medium on, 21:20288
content in interphase chromosomes, 21:13016
content in ram sperm, relation to uptake of phosphorus-32 and strontium-89, 21:14570
content in rat tissues, effects of chlormethine on, 21: 8690
content in rat tissues, effects of triethylene melamine on, 21:8690
content in tumor cells used for detecting cellular degeneration, 21:34708
content of algae, effects of, on x-radiosensitivity, 22: 31280
content of ascites cells, effects of, on radiosensitivity, 24:34583
content of ascites tumor cells, effects on x-radiosensitivity, 22:40781
content of bacteriophage following infection of Escherichia coli, repair of, 22:30414 (ORNL-4100, pp 148-51)
content of bacteriophages, effects of, on uv- and x-radiosensitivity, 22:49645
content of bones of rabbits, effects of plutonium-239 uptake on, 22:25971
content of cell nuclei in γ-radioinduced mutants of wheat, 22:17050(R) (EUR-3606)
content of chromosomes in slime molds, calculation of, 22:28288 (ORNL-4100, pp 166-77)
content of endonuclease from phage-infected Escherichia coli, 22:30414 (ORNL-4100, pp 148-51)
content of Escherichia coli, effects of genetic strain on, 24:930
content of Escherichia coli, heavy water effects on, 23: 22242
content of free, in rat thymocytes following γ irradiation, effects of phosphates on, 21:20063
content of gymnosperm seeds in relation to γ-radiosensitivity, 22:45725
content of Haplopappus gracilis, effects of, on sensitivity to radiomimetic compounds, 22:31139
content of heart of rats, effects of hypertrophy on, 24: 34015 (ACRH-1000-173)
content of human epithelioma cells, relation of, to radiosensitivity, 23:50901
content of hybrid between RNA and T2, in Escherichia coli following infection with uv-irradiated T2 phage, 23:7955
content of liver cells of amphibians, correlation with x-radiosensitivity, 25:4475 (NYO-3554-8)
content of Micrococcus radiodurans, determination of rate of increase in, 22:23410(R) (NYO-3319-17)
content of mitochondria, relation of, to dry mass, 23: 6349(R) (NYO-3361-11)
content of nuclei of Escherichia coli mutant in relation to x-radiosensitivity, 23:45690 (ANL-7535, pp 3-5)
content of nucleus in wheat cells in relation to radiosensitivity, 22:43477
content of pea seedlings, effects of cesium-137 toxicity on, 22:10739 (BNWL-480, pp 127-51)
content of rat organs, effects of uranyl nitrates on, 23: 50322
content of salivary gland chromosomes of Drosophila hydei, autoradiographic and cytophotometric study of, 23:20139
content of satellite, in Crustacea, 22:28288 (ORNL-4100, pp 166-77)
content of serially transplanted, x-irradiated Ehrlich ascites cells, effects of, on radiosensitivity, 23:43847
content of thyroid cells, effects of iodine-131 on, 25: 49078 (COO-1784-24)
content of tumor cells, pulse fluorometric measurement of, 25:41650(T) (LA-tr-71-47)
content of tumor tissues in relation to radiosensitivity of implanted ascites hepatomas in mice and uterine cervical carcinomas in man, 23:41390
content per chromosome in barley in relation to rate of radioinduced mutations per roentgen, 22:36230
continuity in Escherichia coli, 21:8678 (ORNL-3999, pp 166-75)
correlation on changes in synthesis of, with changes in radiosensitivity of Sarcophaga peregrina R.-D. pupae, 21:22752
cytosine—guanine pairs of, effects of hydroxylamine on, 21:10789
dark repair mechanisms of uv radiation damaged, of Escherichia coli, 21:22815
degradation in Bacillus subtilis by methyl methanesulfonate, 21:39339
degradation in Escherichia coli by decay of tritium-labeled compounds, 22:19250
degradation of alkylated, intermediates in, 24:29117 (COO-2040-2)
degradation of uv-irradiated, by Micrococcus lysodeikticus extracts, preferential, 21:41339
denaturation in deuterium oxide, thermal, 22:28274 (ANL-7278, pp 250-82)
denaturation of, low-angle light-scattering studies on, 23: 13599(R) (CU-3957-1)
density in mitochondria of Tetrahymena, 22:12744 (BL-207)
detection in kinetosomes of Paramecia, evaluation of methods for, 22:53495(R) (COO-235-49)
determination in seawater as measure of microbial biomass concentrations, 23:50404(R) (UCSD-10-P-20-50(Pt.1))
determination in Tetrahymena pyriformis W. by neutron activation methods, 21:27922
determination of chain length of, from chromosomes of hamster cells using electron microscopy and computer techniques, 22:16974(R) (ORO-2832-56)
determination of content of, in irradiated mammalian cells in vitro by microspectrophotometry, 21:16292
determination of direct and indirect effects of γ-irradiation on, in E. coli phage, 21:11139(R) (ORO-2832-47)
determination of protozoan, using activation analysis, 21:32579
determination of radiation damage to, by use of base composition, melting point, and molecular weight, 21: 12783
determination of, evaluation of methods for, 21:11097
deuterium sorption by, in salmon sperm, 21:16264
distribution of carbon-14-labeled, in irradiated and unirradiated rats, 21:20068
DNAase activity specific for uv-irradiated, in HeLa cells, 25:42272
duplication of chromosome, in tumor cells, 25:8632 (EUR-4526)
effect of chromosome-breaking agents on activity of polymerase and nuclease of, 21:8678 (ORNL-3999, pp 166-75)
effect of excision of pyrimidine dimers on formation of breaks on bacterial, 21:8678 (ORNL-3999, pp 166-75)
effectiveness of heterologous, for treatment of acute radiation sickness in γ-irradiated dogs, 25:44845
effects of 5-bromodeoxyuridine incorporated in, on x radiosensitivity of chromosomes of Drosophila larvae, 21:22707
effects of 5-bromouracil-containing, on electron-radiosensitivity of aqueous solutions, 25:4542
effects of 5-bromouracil-labeled, on uv-radiosensitivity of bacteria, 22:33787
effects of content of, in wheat cell nuclei on sensitivity to fast neutrons and x rays, 21:4788
effects of content of, on uv-radiosensitivity of bacteriophages lambda+ and lambda62, 25:42300
effects of depressed synthesis of, on survival of irradiated L cells, 25:26969
effects of halogenated pyrimidine analogue-containing, on radiosensitivity of cells, 25:4537
effects of incorporation of bromodeoxyuridine in, on radiosensitivity of mouse lymphoma cells, 21:10926
effects of irradiated, on distribution and types of mutation in Drosophila larvae, 21:8773
effects of isologous, on repair of irradiated Vicia faba root cells, 25:44790
effects of replication of, on repair of nitrogen mustard-induced injury in Escherichia coli, 21:13073 (UCRL-16898, pp 97-116)
effects of replication of, on repair of radiation injury in Escherichia coli, 21:13073 (UCRL-16898, pp 97-116)
effects of strand involvement of, on mutation induction in Schizosaccharomyces pombe, 21:36545
effects of strandedness of, on x-radiosensitivity of mutagenesis in Drosophila, 21:36541
effects of tritiated thymidine-labeled, on cells of rat intestine, liver, and spleen, 21:8911(R) (NYO-2778-4)
effects of tritium-labeled, on bacteria and bacteriophages, lethal and mutagenic β, 24:31923
effects of uv-irradiated, on formation of specific antibodies in rabbits, 25:44781
effects of uv-irradiated, on serologic reactions in rabbits, 21:4752
effects of viral, on human chromosomes, aberrant, 24: 25443
effects of whole-body gamma radiation on structure of, in rat spleen, 21:8989
effects of, in recovery processes from uv- or methyl methane sulfonate-induced injury to Bacillus subtilis mutant, 21:24675
effects of, on development of competence in Hemophilus influenzae, 21:12951(R) (LA-3610)
effects of, on uv radiosensitivity of human skin, review of, 21:14757
effects on back-mutation frequency in Escherichia coli, 21:22399
effects on development of megakaryocytes in bone marrow of rats, 22:28284 (ORNL-4100, pp 127-34)
effects on DNA of γ-irradiated pea seeds, homologous, 22:15113
effects on Drosophila following ingestion, mutagenic, 22: 51490(R) (ORO-3014-3)
effects on eggs of Drosophila following ingestion, mutagenic, 23:33668(R) (ORO-3844-1)
effects on excretion of β-aminoisobutyric acid, deoxyuridine, and thymidine by whole-body γ-irradiated rats, 23:43694
effects on genetic recombination in uv-irradiated lambda phage, 24:31905 (UCRL-19708)
effects on γ-radiosensitivity of Staphylococcus aureus, 22:15125(R) (RLO-1730-2)
effects on irradiated cells, exogenous, 23:26686 (NP-17819, Chap.3.3)
effects on mitosis in root cells of irradiated Vicia faba, 23:12237(T) (AEC-tr-6646/4A, pp 77-81)
effects on moths, mutagenic, 22:6211(R) (NYO-2902-10)
effects on moths, mutagenic autologous, 22:3974(R) (NYO-2902-11)
effects on mutagenesis in EMS-treated and uv and x-irradiated Escherichia coli, 25:13421
effects on natural immunity of γ-irradiated rats, homologous, 25:44828
effects on radiation injuries and sickness of rats, therapeutic, 22:25898
effects on radiosensitivity of bacteria, 24:21326
effects on radiosensitivity of spores, 25:4726
effects on reactions of hydrated electrons with metachromatic dyes, 22:42783
effects on reactions of polycations with hydrated electrons, 22:42783
effects on recovery from chromosome damage in x-irradiated Crepis capillaris, 25:42356
effects on recovery of Vicia faba chromosomes from x-radioinduced injuries, 22:47524
effects on recovery of x-irradiated synchronized L-cells, combined effects of cell phase on highly polymerized, 24:12133
effects on repair of γ-radioinduced chromosome aberrations in bone marrow cells of rats, high-polymer homologous, 25:44826
effects on repair processes in x-irradiated Vicia faba meristem root cells, exogenous, 25:44961
effects on RNA synthesis in liver of irradiated rats, 25: 16027
effects on spleen-nodule count in x-irradiated mice, 22: 556
effects on survival of γ-irradiated rats, 23:43694
effects on survival of lethally irradiated mice, 21:8913 (ORNL-3999, pp 99-111)
effects on survival of x-irradiated young chickens, effects of source on, 23:43805
effects on uv radiation effects on proteinase activity, 21: 22281
effects on uv- and x-radiosensitivity of Escherichia coli, 22:36412
effects on x radiosensitivity of phage lambda, 25:24483
effects on x-radiosensitivity of Escherichia coli, 25:4725
effects on x-radiosensitivity of mitosis in regenerating tissues of salamanders, 21:34749
electric conductivity of films of, 24:41765
electromagnetic field effects on content of, in viscera of rabbits, 23:50839
excision of pyrimidine dimers from uv irradiated, in vitro, 21:8714
excision of, in x-irradiated Micrococcus radiodurans, 21: 14609
fate of donor, in mutant strains of Haemophilus influenzae, 24:23164
fate of heterologous and homologous, during transformation of pneumococcus, 22:14905 (BNL-50057, pp 111-22)
function and structure of, 21:11002 (BNL-10722)
genetic transformation by, in bacteria, 21:34630(R) (NYO-1371-52)
guanine-cytosine pairs in, of uv-radioinduced mutant of Bacterium paracoli, 24:6028
hydrolysates of, effects on hematopoiesis in fast neutron-irradiated rats, 24:34676
inactivation by thermal hydrogen atoms as indirect radiation effect, 23:31656
inactivation of bacterial, effects of nitrogen mustard, uv, and x rays on, review of, 21:24368
inactivation of single stranded, in bacteriophage phi X 174, effects of nitrous acid on, 23:43703
inactivation of transforming, effects of chemical mutagens on, 21:32624
induction of synthesis of cellular, by simian virus in contact-inhibited and x-irradiated cultured animal cells, 21:3382
infectivity of Hemophilus temperate H1C1 phage and prophage, 22:25715(R) (NYO-1371-51)
ingestion by eggs of Drosophila in relation to incidence of mutations, 23:33668(R) (ORO-3844-1)
inhibition of synthesis of, during repair of x radiation damage, effects of drugs on, 21:32718
inhibition of synthesis of, effects of, on x-radiosensitivity of synchronous Chinese hamster cells, 21:36491
integration of extracellular chromosomal, into nuclei of recipient mammalian cells, autoradiography of, 25: 2515
irradiation effects on content of, in rat liver, x, 21:6444
irradiation effects on, from bacteriophage, molecular breaks resulting from, x, 21:6435
isolation from Bacillus subtilis, procedure for, 22: 49185(R) (YALE-2653-33)

isolation of high molecular weight, from cultured neural tumor cells, 25:57286 (UCLA-12-832)
kinetics of, role in interferon production in chick embryo cells, use of ultraviolet radiation in study of, 21:4775
labeling of Escherichia coli, with carbon-14 for chromatographic analysis of γ- or uv-induced formation of thymine dimers, 21:20034 (UCLA-12-612, pp 15-36)
labeling of oxygen and phosphorus of phosphodiester bonds of, with oxygen-18 and phosphorus-32, 21:16297
labeling rat liver cell and spleen lymphocyte, with tritium-labeled thymidine, 25:55110(R) (TID-25801)
labeling with 5-bromodeoxyuridine as a substitute for thymine, in culture media for Drosophila larvae, 21:22707
labeling with carbon-14- or tritium-labeled thymidine, effects on mice, 21:20392
labeling with thymidine-incorporated tritium, effects of, on replication kinetics of ileal cells in rats, 22:45660
labeling with tritium in vitro, 21:3384
labeling with tritium in vitro, exchange method for, 24:34002
localization of specific fractions of, in cells, tracer technique for, 24:21049
macromolecular structure of, effects of denaturation and methylation on, 23:13599(R) (CU-3957-1)
measurement of bond strength of, by phenol method, 21:22755
measurement of surface activity of tritium labeled, 21:6404
metabolism in Escherichia coli infected by mutants of Bacteriophage T4, 25:23498 (UR-49-1419)
metabolism in frog eggs, preparation of phosphorus-labeled-nucleic acids for studies of, 25:26617
metabolism in mammary tumors of mice, iodine-125 tracer study of, 22:23412 (NYO-3924-1)
metabolism in rats treated with radioprotective compounds following lethal irradiation, 21:10924
metabolism in yeast cells, relation of radiosensitivity to inhibition of, 25:13604
metabolism of bacterial, in Arabidopsis, 25:6710(R) (EUR-4492)
metabolism of tritium-labeled thymidine in, of leaf cells in plants, 21:41357
modification by chemotherapeutic agents, effects of, on radiosensitivity of cells, 22:12873
molecular size of mammalian, methods for determining using zonal centrifuge, 24:31840 (ORNL-4558, pp 29-32)
molecular structure of DNA in, effects of DNAase on, 24:21084
molecular structure of, effects of radioprotective compounds on, 23:29581
molecular structure of, in mouse hematopoietic tissue, comparison with deoxyribonucleic protein, 21:8738
molecular topology during cell cycle in synchronous cultures, 25:20877(R) (NYO-3997-6)
molecular weight and structure of, isolated from parvovirus ratti, 23:4508(T) (ORNL-tr-1798)
molecular weight distribution of lymphoma cell, effects of tritium on, 25:46684
molecular weight distributions of, use of sedimentation in sucrose gradient for calculating, 24:4334
molecular weight in mammalian cells, methods for in situ measurements of, 23:29344(R) (COO-1704-6)
molecular weight of mammalian, tritium effects on, 25:26592
monomerization of thymine-containing dimers in uv-irradiated, by yeast photoreactivating enzyme in presence of light, 21:16265
mutagenic effects of γ-irradiated calf thymus, in Drosophila larvae, 21:22835
nearest neighbor frequencies of, from mitochondria and nucleus of Physarum polycephalum, 23:2740(R) (COO-78-174)
neutron activation of phosphorus in, 22:462
nuclear transmutation effects on, in living cells, repair of lethal and mutagenic, 24:31926
nucleoprotein breakdown to form, in irradiated cell nuclei, 21:18149
nucleotide composition in, of bacteria in relation to γ-radiosensitivity, 21:41375
nucleotide composition of γ-irradiated, from Gossypium hirsutum, 21:8692
nucleotide content of, of radioinduced mutants of cotton, comparison of, to initial form, 22:43284
phosphorus-32 activity in, of goiter and thyroid carcinoma, 21:12781
phosphorus-32 content of, in Drosophila, 22:23463
phosphorus-32 content of, of spinach chloroplasts, effects of light on, 24:557
phosphorus-32 radioinduced single chain interruptions in, of bacteriophage, 21:22379
phosphorus-32 uptake by, in mitochondria and nuclei of liver cells in rats, 21:41364
phosphorus-32 uptake by, in rat lymphoid tissues, effects of dose on tracer studies using β, 23:16239
phosphorus-32 uptake by, in roots, effects of 8-ethoxycaffeine on, 23:35610
photochemical changes in base pairs of, molecular excitation events preceding, 25:26094 (COO-2039-9)
photochemistry of, 24:7445 (RLO-2014-9)
photochemistry of, exposed to uv radiation, implications in genetics, review of, 21:12771
photoinduced formation of pyrimidine dimers in, 21:8680
photoinduced production of pyrimidine dimers from enzymatic hydrolysates of, uv, 25:32358 (COO-1793-4)
photolysis of thymine in, in solutions, characterization of products of uv, 24:21075
photolysis of, excited states and transient species in, 22:2099(R) (TID-24136)
photolysis of, thymine phototrimer production in uv, 25:15436 (NYO-2798-49)
photoreactivation of pyrimidine dimers of, in Paramecium aurelia, 22:28399 (ORNL-4100, pp 40-7)
photoreactivity of transforming, extracted from uv-irradiated Bacillus subtilis spores or ruptured sporoplasts, effects of yeast enzyme on, 23:38461
photosensitivity of, in bacteriophage T4upsilon$_{11}$, 21:26382
precursor of, possibility of tritiated thymidine as, 21:8724
production of free radicals by, use of EPR method for determining, 24:9765
production of single-strand breaks in, of Ehrlich ascites cells by methyl hydrazine, 24:9882
properties of pulse-labeled, in ascites cells, chemical and physical, 21:22236(R) (EUR-2959.e)
properties of, chemical, biological, physical, 21:16261(R) (EUR-3059.f)
protection against radiation injury by use of proteins, 21:22639
protection of, against hydrogen atom addition, ESR study of, 21:8691
protective effects of calf thymus, on liver injuries and survival in γ-irradiated rats, 21:12945
protective effects of exogenous spleen, on antibody formation in irradiated rats, 21:11075
purification of polymerase of, by acrylamide gel electrophoresis, 22:7953(R) (NYO-910-61)
pyrimidine dimer induction in solutions of, by uv radiation, 21:8680
radiation chemistry of, 24:7445 (RLO-2014-9)
radiation chemistry of, review of uv, 21:24369
radiation damage in, repair of, 21:22772
radiation damage mechanisms in, 23:13784
radiation damage to thymine in, of Micrococcus radiodurans, repair of γ, 25:26643
radiation damage to, of bacteria, review of mechanisms for repair of ionizing and uv, 24:48404
radiation damage to, of Escherichia coli, model for excision repair of, 25:8636 (SU-326-P-7-X-22)
radiation dose effects on content of, in potatoes, gamma, 21:437
radiation dose effects on uv absorption value of, 21:372
radiation dosimetry in iodine-125-labeled, in relation to Auger effect, 24:44485 (EUR-4452, pp 787-800)
radiation effects of 5'P and 5'OH groups in bacteriophage, protective effects of glycerol against x, 24:2567(R) (NYO-3797-7)
radiation effects of synthesis of, in human lymphocytes, low dose x, 25:8647
radiation effects on 5-bromouracil substituted, from bacteriophages, mechanism for uv, 22:31000
radiation effects on 5-bromouracil-substituted, in cultured mammalian cells, repair mechanisms for uv, 25:46750
radiation effects on ability of, to inhibit transformation of Bacillus subtilis, effects of 10 to 100 kR dose on, 24:7747
radiation effects on activity in animal cells, 21:22359
radiation effects on activity of, in brain of guinea pigs, effects of folic acid on acute x, 21:32703
radiation effects on activity of, in liver, lymph nodes, and spleen of rats, γ, 22:51867
radiation effects on activity of, in viruses, uv, 21:32810
radiation effects on adenovirus, inactivation effects of, on T antigen induction, uv, 21:13084
radiation effects on algae, effects of wavelength on uv, 21:43539
radiation effects on antigenicity of, uv, 22:49197
radiation effects on aqueous solutions of, lytic γ, 22:30984
radiation effects on aqueous solutions of, role of hydroxyl radicals in γ, 22:45397
radiation effects on availability of template sites of, γ, 24:39427(R) (COO-1313-24)
radiation effects on Bacillus subtilis germinating spore, biochemical mechanisms for repair of electron, 25:46714
radiation effects on Bacillus subtilis, repair capacity of competent cells following uv, 25:51996
radiation effects on Bacillus subtilis, x, 25:29463
radiation effects on bacteria, review of uv, 21:24380
radiation effects on bacterial and mammalian, in relation to radiosensitivity of cells, effects of repair capabilities on ionizing and uv, 24:11951
radiation effects on bacterial and viral, schemes for excision-repair of uv, 23:16444
radiation effects on bacterial, combined label method for in vivo demonstration of repair replication following uv and x, 24:48754
radiation effects on bacterial, enzymatic mechanisms for repair of uv, 24:48755
radiation effects on bacterial, repair mechanisms for uv, 23:933(R) (NIRS-6)
radiation effects on bacterial, review of repair and replication following uv and x, 23:48265
radiation effects on bacterial, review of uv, 23:2744(R) (ORO-3596-6)
radiation effects on bacterial, role of nucleases in dark repair following uv, 23:48284
radiation effects on bacteriophage, determination of molecular weight following γ, 23:47973
radiation effects on bacteriophage, effects of wavelength on physicochemical uv, 22:30942
radiation effects on bacteriophage, in relation to synthesis in mutants of Escherichia coli, repair of uv, 24:31935
radiation effects on bacteriophages, centrifugal analysis of x, 21:24370
radiation effects on base composition of, in Bacterium paracoli and Escherichia coli, uv, 23:6422
radiation effects on base composition of, in Staphylococcus aureus, uv, 23:33677
radiation effects on base composition ratios in, of normal and penicillin-induced filamentous cells of Salmonella typhi, uv, 21:24686
radiation effects on base content of, in rabbit bone marrow, x, 22:33737
radiation effects on base pairing in, of pea seeds, 22:51399
radiation effects on base ratios of, in bacteria exposed to sunlight, uv, 25:16383(R) (UCB-34-P-156-X-2)
radiation effects on base synthesis of, in relation to thymidine incorporation, 24:11943
radiation effects on bases, hydrogen bonds, and sugar phosphate chains of, in aqueous solutions, 24:9764
radiation effects on binding of tritium-labeled dactinomycin by, of hepatocytes of mice, effects of administration route on x, 25:11285
radiation effects on binding of, in Mycoplasma laidlawii, 23:26965
radiation effects on biological activity of, 23:13780
radiation effects on biological activity of in vitro, reaction mechanisms for uv and x, 23:6355(T) (UCRL-Trans-10237)
radiation effects on biological activity of, in cells in relation to degree of radiation injuries, uv, 22:38234
radiation effects on biological and physical properties of pneumococcal, following disintegration of incorporated phosphorus-32 or tritium, β, 25:29459
radiation effects on biological and physical properties of, from disintegration of incorporated phosphorus-32 or tritium, 25:16048
radiation effects on biosynthesis of lymphocyte, in human renal transplant candidates following extracorporeal treatment of blood, 23:41480
radiation effects on biosynthesis of, in cultured HeLa cells, x, 23:45869
radiation effects on biosynthesis of, in cultured cells, effects of proliferation rates on x, 24:6101
radiation effects on biosynthesis of, in liver and spleen of rats, x, 23:24516
radiation effects on biosynthesis of, in mice, early x, 22:19243
radiation effects on biosynthesis of, in serogenous gland in Bombyx mori, tritium tracer study on γ and uv, 25:32519
radiation effects on bonding of small molecules to, electron, 24:20823
radiation effects on bonding of, with proteins of DNP, 24:50735
radiation effects on breakdown and synthesis of, in Escherichia coli (B/r) and (B/sub s-2/) and Salmonella typhimurium, comparison of x, 24:41776
radiation effects on breakdown of, in Escherichia coli mutants, uv, 23:24594
radiation effects on breakdown of, in Escherichia coli, effects of genotype on uv, 24:7806
radiation effects on breaks in, of LS/Bl lymphosarcoma cells in mice, effects of dose on x, 25:24307
radiation effects on calf thymus, spectra and decay kinetics of luminescence from electron, 24:2221
radiation effects on capacity of T4 bacteriophage to induce degradation of host, uv, 23:43914
radiation effects on carbon-14 incorporation by, x, 21:30767 (BMwF-FBK-66-49)
radiation effects on catabolism of, in rats, γ, 23:50359
radiation effects on cellular synthesis of, review of, 21:28425
radiation effects on cellulose columns containing T$_4$, chromatographic method for isolation of proteins from Escherichia coli following uv, 23:48275
radiation effects on chemical and physical properties of, x, 22:25713 (COO-78-163, pp 64-125)
radiation effects on chemical, molecular biology, and physical processes in, mechanism of uv, 25:55136
radiation effects on chick embryo, uv, 21:26560(R) (ORO-2978-17)
radiation effects on chromatographic profile of rat liver, sensitizing effects of p-hydroxymericuribenzoic acid on, 25:21745
radiation effects on coliphage, protective effects of cysteamine against γ, 21:36648
radiation effects on complex of, with protein in chromatin, effects of dose on, 24:16984
radiation effects on complexes with RNA in cesium chloride density gradient system, cobalt-60 γ, 24:50712
radiation effects on components of, chemical analysis of uv, 22:19286
radiation effects on concentration of, in human kidney, cobalt-60 γ, 23:26695
radiation effects on content and synthesis of, in Saccharomyces, x, 21:24683
radiation effects on content and synthesis of, in mouse tissues, x, 21:22333
radiation effects on content in liver of rats during regeneration, effects of extracts from calf blood against γ, 21:28548
radiation effects on content in polyploid plants, 21:24388
radiation effects on content of developing rat brain, x, 25:49286(R) (UCB-34-P-82-11)
radiation effects on content of dill plants, x, 25:27081
radiation effects on content of glial and nerve cells of rabbit hypothalamus, x, 25:46745
radiation effects on content of nitrogen bases in, of guinea pig brain, protective effects of folic acid against x, 23:4878
radiation effects on content of pyrimidine nucleotide blocks in, of rabbit bone marrow, x, 24:11947
radiation effects on content of, in adrenal glands of rats, x, 22:14957
radiation effects on content of, in ascites tumor cells, effects of repeated exposure on, 22:6741
radiation effects on content of, in barley and wheat, effects of seed exposure on γ, 23:16434
radiation effects on content of, in blood of rabbits, combined effects of cholera infections on x, 23:38773
radiation effects on content of, in bone marrow and spleen of rats, protective effects of Mumie against x, 25:16231
radiation effects on content of, in bone marrow of guinea pigs, effects of thymic shielding on, γ, 21:22607

radiation effects on content of, in bone marrow of guinea pigs, fast electron, 21:8920
radiation effects on content of, in bone marrow of rabbits, x, 22:28665
radiation effects on content of, in brain of mice, deuteron, 23:12192 (BNL-13065)
radiation effects on content of, in carcinomas of mice, effects of 6-azauridine on, 23:24691
radiation effects on content of, in cell nuclei, 22:19249
radiation effects on content of, in cells during mitosis, 21:30917
radiation effects on content of, in cells of Escherichia coli K 12, comparison of γ, proton, and uv, 25:13371
radiation effects on content of, in cerebellum of rats, x, 24:34630(R) (UCB-34-P-82-X-1)
radiation effects on content of, in chicken embryos following exposure of eggs, x, 24:51058
radiation effects on content of, in deoxyribonucleoprotein in spleen and thymus of mice, effects of heparin on, 25:24410
radiation effects on content of, in diploid and haploid yeast cells, 23:14134
radiation effects on content of, in Escherichia coli, γ, 22:26008
radiation effects on content of, in fetal rats in relation to growth, cobalt-60 γ, 24:23325 (CONF-690501-, pp 375-9)
radiation effects on content of, in frog embryos, uv, 22:25996
radiation effects on content of, in granulocytic leukocytes in guinea pigs, whole-body, 24:603
radiation effects on content of, in human cervical cancer cells, α, γ, and x, 24:910
radiation effects on content of, in human thyroid cell nuclei following iodine-131 therapy of hyperthyroidism, β and γ, 23:2763
radiation effects on content of, in hypertrophic kidney of rats, γ, 22:40920
radiation effects on content of, in intestinal homogenates of guinea pigs and rats, x, 23:50348
radiation effects on content of, in intestine of mice and rats, γ, neutron, and x, 22:49552
radiation effects on content of, in intestines of rats, x, 22:40595
radiation effects on content of, in kidney of mice, x, 22:43422
radiation effects on content of, in leaves of salvia, phosphorus-32 β, 22:36410
radiation effects on content of, in livers of mice, local x, 24:23113
radiation effects on content of, in melanomas of man, 23:22203
radiation effects on content of, in mice livers, effects of actinomycin on x, 24:21213
radiation effects on content of, in mice, effects of partial shielding on cobalt-60 γ, 23:41237
radiation effects on content of, in nuclei of animal cells, microbeam uv, 22:8449
radiation effects on content of, in nuclei of epithelial cells of rat lens, spectrophotometric determination of, x, 21:32576
radiation effects on content of, in nuclei of lymphocytes in liver and spleen of rats, x, 22:21433
radiation effects on content of, in nuclei of roots of Vicia faba, effects of gravity on x, 24:42026 (ANL-7635, pp 313-31)
radiation effects on content of, in organs of rats, effects of prenatal exposure on, 25:16309 (ORO-678, pp 7-13)
radiation effects on content of, in organs of rats, effects of sodium gallate on x, 24:50713
radiation effects on content of, in parenchyma cells from liver of embryonic and newborn rats, 21:34793
radiation effects on content of, in plant cell nuclei, effects of dose on γ, 24:27541
radiation effects on content of, in proembryo stages of barley, ionizing, 25:13405
radiation effects on content of, in Purkinje cells of neonatal rat brain following maternal exposure, effects of fetal age on x, 23:8058
radiation effects on content of, in rat adrenals, effects of ACTH on x, 23:16231
radiation effects on content of, in rat brain, in utero x, 22:49249
radiation effects on content of, in rat kidneys, x, 21:26533
radiation effects on content of, in rat liver, 21:11097
radiation effects on content of, in rat testes, phosphorus-32 β, 24:34691
radiation effects on content of, in rat tissues following prenatal exposure, whole-body γ, 23:10050 (ORO-661, pp 14-15)
radiation effects on content of, in rat tissues, x, 21:8690
radiation effects on content of, in seeds of barley, γ, 22:28709
radiation effects on content of, in shoots of corn and radishes, effects of dose on x, 22:33977
radiation effects on content of, in spleen and thymus of mice, quantitative analysis of electron, cobalt-60 γ, and x, 23:2939
radiation effects on content of, in spleen cells of rats, effects of homologous bone marrow transplants on x, 25:24388
radiation effects on content of, in spleen of mice, protective effects of bone marrow transplants against x, 22:19251
radiation effects on content of, in Tetrahymena, effects of heat on mixed γ and neutron, 23:6558 (AD-671943)
radiation effects on content of, in thyroid cells of rats, iodine-131 β and γ, 23:772(R) (COO-1243-13)
radiation effects on content of, in tissues of rats, method for measuring x, 22:8441
radiation effects on content of, in transplanted Yoshida sarcoma cells in rats, effects of low temperature on x, 23:14261
radiation effects on content of, in tumor cells of rats, combined effects of cooling on x, 21:39334
radiation effects on content of, in wheat, latent γ, 23:17943
radiation effects on content of, in yeasts, x, 23:29895(R) (NYO-3998-1)
radiation effects on content of, of brain of mice, deuteron, 23:38772
radiation effects on cottonseed, γ, 25:44391
radiation effects on cultured animal cell, relation of cell repair and survival to, 25:24302
radiation effects on cultured eukaryotic cell, repair of uv, 25:46902
radiation effects on cultured LL cell, effects of hydroxyurea on γ, 25:44887
radiation effects on cyclic labeling of, in L cells, combined effects of starvation or treatment with DNP on low dose γ or x, 24:21073
radiation effects on cytosine arabinoside-induced chromatid breaks in, uv, 25:24124
radiation effects on deamination in aqueous, gamma, 21:10390
radiation effects on degradation and repair of bacterial, effects of nalidixic acid on x, 25:39966
radiation effects on degradation of, by DNAase, 22:2485
radiation effects on degradation of, by DNAase in carbon-14- and tritium-labeled cells, β, 22:464
radiation effects on degradation of, in Escherichia coli, effects of rifamycin on γ, 24:2840
radiation effects on degradation of, in Escherichia coli, effects of temperature on cobalt-60 γ, 23:45647
radiation effects on degree of membrane association of subsequently transferred, in Escherichia coli minicells, 25:49112
radiation effects on density and molecular structure of, uv, 21:36516
radiation effects on developmental increases in content of, in brain of young rats, 100 to 1500 R x, 24:23105 (CONF-690501-, pp 857-75)
radiation effects on distribution of, in lymphocytes, in vitro, 25:39928
radiation effects on distribution of, in pituitary gland of mice, effects of dose on uv, 22:6732
radiation effects on double- and single-strand, protective effects of histone reconstitution and salts against cesium-137 γ, 24:11930 (ORO-2832-79, pp 13-41)
radiation effects on double-strand breakage of, x, 23:8093
radiation effects on E. coli, effects of dose and temperature on products from uv, 25:41833(R) (IA-1218)
radiation effects on elastoviscous properties of, in bacteria, protective effects of compounds against γ, 23:17954
radiation effects on electric conductivity of, in gap cells, uv, 24:41765
radiation effects on Escherichia coli, model for photoreactivation of uv, 25:37729 (ANL-7770, pp 19-26)
radiation effects on Escherichia coli, regeneration and restoration mechanisms for uv, 25:37765(R) (NYO-3893-20)
radiation effects on Escherichia coli, role of endonuclease in repair of uv, 25:57928
radiation effects on Escherichia coli, x, 21:32621
radiation effects on excision of pyrimidine dimers from, effects of bacterial extracts on uv, 22:28288 (ORNL-4100, pp 166-77)
radiation effects on exogenous nucleoside utilization in, by cultured human cells, x, 25:13380
radiation effects on extraction from thymocytes with phenol and sodium tricholoroacetate, in vitro x, 21:17974
radiation effects on extraction of, from tissues of rat thymus gland with phenol and sodium trichloroacetate, whole-body x, 21:17997
radiation effects on fate of exogenous, in L cells, uv, 23:11933(T) (AEC-tr-6646/4A, pp 59-62)
radiation effects on films of, effects of humidity on uv, 24:19301
radiation effects on fluorescence in solutions of, uv and x, 21:22358
radiation effects on fluorescence in, γ, 23:9466
radiation effects on formation and dissociation of enzyme substrate-complexes in, of Haemophilus influenza and yeasts, rate constants for, 25:8651
radiation effects on formation of thymine photoproducts in, uv, 21:22265
radiation effects on formation of, review of ionizing, 21:26401
radiation effects on fractions of liver, from rats, 23:45659
radiation effects on free radical production in, of phiX174 bacteriophage, protective effects of cysteamine against γ, 25:496
radiation effects on frozen aqueous solutions of, radiothermoluminescence study of γ, 24:11600
radiation effects on function and structure of, 21:6401(R) (EUR-2983.e)
radiation effects on function and structure of, in comparison with effects of hydrogen atoms, γ, 24:11957
radiation effects on generation and synthesis times for, in lymphoid cells from thoracic duct of calves, 21:6610 (BNL-10657)
radiation effects on genetic properties of, of Escherichia coli, uv, 23:16267
radiation effects on genetic recombination in A-T region of, uv, 24:31908
radiation effects on genetic recombination of, in T4 bacteriophage, uv, 24:29737
radiation effects on HeLa cell, effects of bromouracil substitution on uv, 22:51838
radiation effects on HeLa cell, inhibitory effects of acriflavine and hydroxyurea on repair following, 25:39901
radiation effects on Hemophilus influenzae, reextraction study of integration and repair of uv, 25:52271
radiation effects on heterologous, effects of, on genetics of Drosophila following ingestion, γ and x, 22:12831
radiation effects on histone interactions of, of rat thymus, whole-body 1000 R x, 24:34093
radiation effects on host cell, repair of uv, by infecting T4 bacteriophage, 22:51541
radiation effects on incorporation of carbon-14 labeled thymidine in, 21:17961
radiation effects on incorporation of nucleotide precursors into, of splenic lymphocytes from hamsters, x, 22:23604
radiation effects on incorporation of phage phie, into spores of Bacillus subtilis, effects of phosphorus-32 decay on electron, 25:16386
radiation effects on incorporation of thymidine by, in human lymphocytes, uv, 22:16991
radiation effects on incorporation of thymidine into, of rat tissues, x, 24:6004
radiation effects on incorporation of tritium into, effects of dose on ionizing, 23:11929(T) (AEC-tr-6646/4A, pp 21-4)
radiation effects on incorporation of tritium-labeled thymidine by, of mitochondria and nuclei in cells of regenerating liver of rats, x, 21:41336
radiation effects on incorporation of tritium-labeled thymidine into, of oocytes of guinea pigs, x, 25:13367
radiation effects on infectious, of bacteriophage phiX174, proton, 23:26691
radiation effects on infectivity of bacteriophage T7, for lysozyme spheroplasts, uv, 21:32584
radiation effects on infectivity of phage, combined effects of heat on γ, 22:38504
radiation effects on inhibitory activity of, in transformation of Bacillus subtilis, x, 22:15120
radiation effects on initiation of unscheduled synthesis of, in muscle cells of chick embryos, in vitro uv, 25:29650
radiation effects on insect, effects of, on rate of metamorphosis, γ, 21:36711
radiation effects on intermolecular energy transfer between histone and, in deoxyribonucleohistone solutions, ESR spectral studies on effects of calcium on β, 23:45341
radiation effects on isolated, 25:29462
radiation effects on isolated, from appendix of rabbits, chromatographic analysis of, 21:26344
radiation effects on level of guinea pig, γ, 21:26525
radiation effects on loach sperm, RBE of fast neutrons and γ rays, 21:22755
radiation effects on loss and replacement of, in rat skin, 24:21281(R) (NYO-2785-4)
radiation effects on macromolecular organization of, ionizing, 22:14955
radiation effects on mammalian cell, effects of dose on repair replication of x, 25:52179 (UCSF-10-P-2-134)
radiation effects on matrix function of, effects of wavelength on uv, 21:30792
radiation effects on melting point and thermal denaturation of, from thymus of rats, whole-body 1000 R x, 24:34093
radiation effects on melting point and viscosity of phage, in vivo and in vitro, γ, 23:13777
radiation effects on membrane association of conjugally transferred, in Escherichia coli minicells, x, 25:42735
radiation effects on metabolism in perfused tissues from rats, labeled-thymidine study of x, 21:22258
radiation effects on metabolism of wheat embryo, γ, 21:36503
radiation effects on metabolism of, by protozoa, γ, 22:25712 (COO-78-163, pp 39-63)
radiation effects on metabolism of, in algae, γ, 21:45847
radiation effects on metabolism of, in animals as indicator of radiation injury, 25:42403
radiation effects on metabolism of, in bone marrow and intestine of mice, ionizing, 22:25766
radiation effects on metabolism of, in cultivated mammalian cells, x, 21:28344 (NP-16452)
radiation effects on metabolism of, in embryonic rats, whole-body x, 21:30887
radiation effects on metabolism of, in embryos of barley, phosphorus-32 tracer study of effects of developmental stage and tissue differentiation on x, 22:28360
radiation effects on metabolism of, in Escherichia coli, effects of mutants of bacteriophages T3 and T7 on uv, 22:14937
radiation effects on metabolism of, in Euglena gracilis, 23:45667
radiation effects on metabolism of, in human tumor cell cultures, x, 22:43211
radiation effects on metabolism of, in isolated perfused rat intestine, x, 22:49227
radiation effects on metabolism of, in L cells, uv, 23:11938(T) (AEC-tr-6646/4A, pp 155-8)
radiation effects on metabolism of, in L cells, uv, 22:49507
radiation effects on metabolism of, in mammalian cells, effects of DNAase on x, 23:11934(T) (AEC-tr-6646/4A, pp 65-7)
radiation effects on metabolism of, in man, 23:31989
radiation effects on metabolism of, in man, 21:41393(R) (NP-16856)
radiation effects on metabolism of, in man and rats, ionizing, 22:51478
radiation effects on metabolism of, in mice and rats, carbon-14-labeled deoxycytidine tracer study of x, 24:592
radiation effects on metabolism of, in rat liver and intestine, x, 21:24545(R) (EUR-3263.e)
radiation effects on metabolism of, in rat thymocytes, in vitro x, 25:44773
radiation effects on metabolism of, in rats, effects of fat content of diet on, 22:45444
radiation effects on metabolism of, in spleen of rats fed diets of differing fatty acid contents, 21:26376
radiation effects on metabolism of, neutron, 22:33919

radiation effects on metabolism of, review of ionizing, 23:43698
radiation effects on methylation and replication of, in Escherichia coli, uv and x, 24:34238(R) (ORO-3596-10)
radiation effects on methylation of, in Escherichia coli, uv, 25:37732(R) (NYO-2358-17)
radiation effects on mice protected by heterologous rat, x, 21:396
radiation effects on Micrococcus luteus, role of nucleases in repair of uv, 25:57935
radiation effects on molecular structure and viscosity of, protective effects of low temperature and thiourea aginst, 23:2901
radiation effects on molecular structure of, 21:14629
radiation effects on molecular structure of, 23:48167
radiation effects on molecular structure of calf thymus, 21:17978
radiation effects on molecular structure of DNA in, x, 24:21084
radiation effects on molecular structure of, effects of DNAase on, 23:24515
radiation effects on molecular structure of, effects of adenine-thymine composition on, 23:7956
radiation effects on molecular structure of, electron microscope study of uv, 24:16975
radiation effects on molecular structure of, from Escherichia coli, lytic uv, 22:28288 (ORNL-4100, pp 166-77)
radiation effects on molecular structure of, in liver and thymus of rats, effects of dose on, 22:23435
radiation effects on molecular structure of, in rat thymus, γ, 21:36727
radiation effects on molecular structure of, of phage T2 and T4, 22:40559
radiation effects on molecular weight distribution of, in Chinese hamster chromosomes, cesium-137 γ, 23:9888
radiation effects on molecular weight distribution of solutions of, 25:29470
radiation effects on molecular weight of, in Ehrlich ascites cells, use of guanidinium chloride in alkaline sucrose gradient for determination of x, 25:26629
radiation effects on molecular weight of, in Escherichia coli, 23:16224 (NIRS-7, pp 21-35)
radiation effects on molecular weight of, in L cells, effects of caffeine on uv, 25:24424
radiation effects on molecular weight of, synthesized in L cells containing pyrimidine, uv, 25:35207
radiation effects on molecular weight of, synthesized by Escherichia coli and Salmonella typhimurium, 25:46728
radiation effects on molecules of, x, 21:8718
radiation effects on mouse endometrial glandular epithelium, 600-R x, 25:26659
radiation effects on Neurospora, photoreactivation of uv, 21:36767
radiation effects on nitrogen base composition of, from Bacterium paracoli, effects of dose on uv, 21:45549
radiation effects on nucleotide composition of, in hematopoietic tissue of mice and monkeys, effects of dose on γ, 24:11939
radiation effects on number of epithelial cells synthesizing, in intestine of mice, effects of dose on single-dose, whole-body γ, 24:46656
radiation effects on oxidative cleavage of, in brain and spleen of animals, x, 21:41371
radiation effects on paramagnetic centers in, EPR study of, 22:28292
radiation effects on paramagnetic centers of, effects of light on, 24:21078
radiation effects on paramagnetic resonance of, effects of menadione or riboflavin on γ, 21:41370
radiation effects on phage phiX174, inhibitory β, uv, and x, 25:13382
radiation effects on phage, uv, 21:36764
radiation effects on phi X 174 phage, molecular mechanism of, 23:38892
radiation effects on phosphorus content of, in liver of hepatectomized x-irradiated rats, 21:16269
radiation effects on phosphorus-32 retention and hyperchromicity of, thermal neutron, 23:41255
radiation effects on phosphorus-32 retention in, effects of exposure time on fast neutron and γ, 24:2581
radiation effects on phosphorus-32 uptake by, of ascites hepatoma cells in rats, combined effects of carcinostatics on cobalt-60 γ, 22:31025
radiation effects on physico-chemical properties of, x, 23:6383
radiation effects on physicochemical properties of, x, 21:10819
radiation effects on polarity of phage lambda, x, 25:26692
radiation effects on priming ability of calf thymus, for DNA polymerase, x, 21:34600
radiation effects on priming ability of, in chick fibroblasts, x, 22:45427
radiation effects on priming activity of, for DNA-nucleotidyltransferase, x, 22:25713 (COO-78-163, pp 64-125)
radiation effects on priming activity of, for Escherichia coli DNA polymerase, x, 21:36489
radiation effects on production of, in bone marrow cells of rabbits, effects of dose on, 24:36803
radiation effects on properties of, in bone marrow of rabbit leg, x, 21:8712
radiation effects on properties of, in liver of kangaroo rats, tritium β and γ, 22:49184 (UCRL-50461)
radiation effects on protein moiety of, effects of, on type of mutation induced in genes, uv, 22:25784
radiation effects on pyrimidine nucleotide blocks in, of rabbit bone marrow, x, 23:45655
radiation effects on radioinduced human cell, bromodeoxyuridine photolysis method for measuring repair following uv, 25:32317
radiation effects on rat liver synthesis of, regeneration studies on x, 25:44918
radiation effects on rat thymus, methods for determining lethal and sublethal whole-body x, 25:24048
radiation effects on rat tissue, sensitizing effects of hydroxymercuribenzoic acid on, 25:42535
radiation effects on rate of formation of thymine dimers in, of L cells, uv, 21:24336
radiation effects on rate of replication of, in murine lymphoma cells, tracer study of x, 24:48407
radiation effects on rate of synthesis of, in chromosomes and nuclei in cells of regenerating rat liver, relation of cell phase to x, 23:50866
radiation effects on rate of synthesis of, in cultured cells, x, 25:16279 (NIRS-9, pp 15-53)
radiation effects on rate of synthesis of, in human lymphocytes in vitro, effects of temperature on electron and uv, 24:39435
radiation effects on rate of synthesis of, in regenerating rat liver, tracer study on x, 24:34124
radiation effects on ratio of, to histones in liver, spleen, and thymus of rats, 24:21079
radiation effects on ratio of, to protein and RNA in slime molds, 22:43480
radiation effects on reaction between, and furocoumarins, uv, 22:16995
radiation effects on reaction of psoralen with, role of thymine in uv, 22:47454
radiation effects on reactions between furocoumarins and, uv, 23:2791
radiation effects on reactions of, with adenine, caffeine, and thymine, uv, 24:34104
radiation effects on reactions of, with carbon-14-labeled 5-methoxypsoralen, 22:4578
radiation effects on reactions of, with polypeptides, γ, 23:45344
radiation effects on recombination in, of lambda bacteriophage, effects of oxygen on x, 24:48396(R) (NYO-3797-10)
radiation effects on recombination of lambda, with host bacterial DNA, uv, 25:503
radiation effects on recombination of, in bacteriophage lambda, uv, 23:48280
radiation effects on release of, by phage lambda, x, 25:26693
radiation effects on release of, from nuclei of chick embryos, x, 24:14606
radiation effects on repair mechanism of, in bacteria, 24:21326
radiation effects on repair of bacterial, mechanism of effects of chloramphenicol on x, 25:39967
radiation effects on repair replication of, of HeLa cells, uv, 22:51410
radiation effects on replicating mechanism of, in microorganisms, ionizing and uv, symposium on, 23:48267
radiation effects on replication mechanism of, in Escherichia coli following lambda prophage induction, 24:34772
radiation effects on replication of repaired, in cultured human aneuploid and diploid cells, comparison of uv, 25:6652
radiation effects on replication of, by host cell and lambda bacteriophage, uv, 22:28362
radiation effects on replication of, in cultured leukocytes from swine, γ, 22:40830 (ORO-657, pp 35-45)
radiation effects on replication of, in Escherichia coli, effects of oxygen on x, 22:31294
radiation effects on replication of, in Escherichia coli, effects of acriflavine on uv, 24:36698(R) (NYO-3893-15)
radiation effects on replication of, in Escherichia coli, uv, 24:36699(R) (NYO-3893-16)
radiation effects on replication of, in hamster cells, correlation of, with chromosome duplication, x, 22:33781
radiation effects on replication of, in HeLa cells, effects of dose on x, 22:6742
radiation effects on replication of, in synchronous cultures of Escherichia coli, mutagenic uv, 25:18966
radiation effects on role of, in RNA synthesis, γ, 21:41363
radiation effects on role of, in septum formation of Escherichia coli uv, 22:23432
radiation effects on secondary structure of, effects of dose on ionizing, 23:29368
radiation effects on secondary structure of, spectrophotometric study of x, 24:11936
radiation effects on sedimentation properties of, in cultured Chinese hamster cells, effects of dose on x, 24:25402
radiation effects on semiconservative replication of bacteria, effects of nalidixic acid on uv, 25:27125
radiation effects on sheep sperm, β, 21:45573
radiation effects on single and double strand breaks in, of phage T7, 24:50771
radiation effects on single- and double-strand breaks in, mechanism of uv, 25:55308
radiation effects on solutions of double- and single-stranded, effects of temperature on, 23:790
radiation effects on solutions of, effects of fluorescein and other dyes on γ, 23:26295
radiation effects on solutions of, mechanisms in cobalt-60 γ, 23:4872
radiation effects on solutions of, quantitative determination of nitrogen bases and nucleosides released following, 25:52004
radiation effects on specific activity of, in T cells, x, 24:48669
radiation effects on stability of, in bacteriophage, x, 22:23476
radiation effects on stability of, in Escherichia coli, effects of caffeine and iodoacetamide on cobalt-60 γ and uv, 23:45974
radiation effects on stability of, in Escherichia coli, 21:24294 (NIRS-5, pp 19-25)
radiation effects on stability of, in nuclei of thymocytes of rats, 22:21437
radiation effects on staining reactions of, to Feulgen and methyl green in amoebae, x, 22:49189
radiation effects on structure and replication of, in Trichophyton, mutagenic uv, 23:9854
radiation effects on structure and synthesis of, in HeLa cells, uv and x, 24:586(R) (NYO-910-122)
radiation effects on structure and synthesis of, mechanisms of ionizing, 22:40568
radiation effects on structure of, 21:12790
radiation effects on structure of, 23:13780
radiation effects on structure of, 23:13778
radiation effects on structure of bacteriophage, 25:35259
radiation effects on structure of cell, 25:35197
radiation effects on structure of recombinant region of, in transformation heterozygotes of pneumococci, repair mechanisms for, 22:28353
radiation effects on structure of seed embryo, effects of homologous DNA on repair of, 25:29716
radiation effects on structure of yeast, in relation to genetic damage, uv, 25:55183
radiation effects on structure of, from bacteriophage T_3, argon ion, 22:30952
radiation effects on structure of, in bacteria, uv and x, 21:13073 (UCRL-16898, pp 97-116)
radiation effects on structure of, in bacteriophage phi X 174, γ, 22:21412
radiation effects on structure of, in Micrococcus radiodurans, γ, 23:7930(R) (NYO-3776-2)
radiation effects on structure of, in sperm of Drosophila, β, 22:28426
radiation effects on structure of, ionizing, 22:23448
radiation effects on structure of, low-dose x, 25:46741
radiation effects on structure of, of fish, effects of dose on γ, 23:17956
radiation effects on structure of, of Micrococcus radiodurans, effects of content of cytosine and guanine on γ, 22:40580
radiation effects on structure of, protective effects of DNP and cell nuclei on ionizing, 22:23564
radiation effects on structure of, uv and x, 21:8701
radiation effects on structure of, x, 22:2502 (AECL-2665)
radiation effects on submolecular structure of, from thymus of rats, effects of temperature and time interval before repeated exposure on intensity and pattern of, 24:23123
radiation effects on survival of, in vitro and in vivo uv, 23:12012(R) (UCLA-34-P-124-5)
radiation effects on synchronous HeLa cell culture, repair and replication follwing x, 25:46712
radiation effects on synthesis and repair of, in lambda phages of Escherichia coli mutant, uv, 25:37905
radiation effects on synthesis in ascites leukemia cells in mice, x, 21:18130
radiation effects on synthesis in bacteria and yeast, 21:20440(R) (TID-23502)
radiation effects on synthesis in Chlamydomonas, dark repair of uv, 25:57925
radiation effects on synthesis in cotton root cells, γ, 21:22798
radiation effects on synthesis in cultured liver cells, x, 21:1712
radiation effects on synthesis in cultured mouse L cells, x, 21:20363
radiation effects on synthesis in Escherichia coli of, 24:48509
radiation effects on synthesis in human cells in culture, uv, 21:22335
radiation effects on synthesis in L cells, effects of thymine and uracil-thymine dimers on uv, 21:20056
radiation effects on synthesis in mouse bone marrow cells synchrony testing using x, 21:20403
radiation effects on synthesis in mouse tissues, x, 21:20393
radiation effects on synthesis in protozoa, γ and uv, 21:9022 (COO-78-143)
radiation effects on synthesis in rat thymocytes, x, 21:1718
radiation effects on synthesis of, 21:43333
radiation effects on synthesis of, 24:21270
radiation effects on synthesis of amphibian embryo, effects of dose on x, 25:57944
radiation effects on synthesis of bacteria, uv and x, 25:49320(R) (ORO-3596-16)
radiation effects on synthesis of barley seed, γ, 25:46743
radiation effects on synthesis of by Escherchia coli, effects of radiosensitivity on uv, 22:33727
radiation effects on synthesis of face fly germ cell, effects of dose on γ, 25:46958
radiation effects on synthesis of HeLa cell, effects of 5-fluorouracil on uv, 25:58082
radiation effects on synthesis of hybrid RNA-, in pea embryos, tracer study of γ, 22:43237
radiation effects on synthesis of mammalian cell, determination of length of chromosome replicons from, 25:51997
radiation effects on synthesis of mitochondrial and nuclear, in Morris hepatoma cells, tritium tracer study of, 24:11963
radiation effects on synthesis of mitochondrial and nuclear, in regenerating rat liver, whole-body x, 25:44771
radiation effects on synthesis of mouse kidney cell, γ and uv, 25:55129
radiation effects on synthesis of rat liver, β, 21:36707
radiation effects on synthesis of RNA on templates of, from bacteriophages, γ, 22:38193(R) (EUR-3912)
radiation effects on synthesis of, at various sites in HeLa cells, uv microbeam, 22:36217
radiation effects on synthesis of, by Bacillus subtilis, uv, 22:14943
radiation effects on synthesis of, by bacteria, methods for measurement of uv, 23:9894
radiation effects on synthesis of, by cells of cervical neoplasms in man, use of tritium-labeled thymidine and autoradiography to study γ and x, 22:40943

radiation effects on synthesis of, by cells of thymus gland of mice, whole-body x, 22:4572
radiation effects on synthesis of, by Chinese hamster cells, uv, 22:47521
radiation effects on synthesis of, by Escherichia coli, effects of glucose, histidine, thymine, or uracil starvation on uv, 22:47451
radiation effects on synthesis of, by Haemophilus influenzae, uv, 23:38458
radiation effects on synthesis of, by L cells in vitro, x, 23:6568 (N-68-23533)
radiation effects on synthesis of, by L cells, uv, 22:45438
radiation effects on synthesis of, by lambda bacteriophage, uv, 22:51426
radiation effects on synthesis of, by mammalian cells, relation of, to cell phase, x, 22:28676
radiation effects on synthesis of, by mammalian cells, 21:45514
radiation effects on synthesis of, by mutants of Micrococcus radiodurans, repair of uv, 23:33678
radiation effects on synthesis of, by rat hepatoma cells, γ, 23:45658
radiation effects on synthesis of, by Saccharomyces vini, γ, 22:47640
radiation effects on synthesis of, by seeds of peas, tracer study of ionizing, 22:28388
radiation effects on synthesis of, by slime mold, uv, 23:50935
radiation effects on synthesis of, by tumors of rats, effects of dose fractionation on x,, 22:2481
radiation effects on synthesis of, combined effects of endoxan on x, 22:43436
radiation effects on synthesis of, during meiosis in Chlamydomonas reinhardi, effects on recombination of genes on cobalt-60 γ, 22:49310
radiation effects on synthesis of, during scar formation in rat spinal cord, tracer study of x, 23:47958
radiation effects on synthesis of, effects of, on radiosensitivity of cells, 23:7968
radiation effects on synthesis of, in algal flagellates, γ, 21:13072 (COO-1117-10)
radiation effects on synthesis of, in animal cells, laser, 23:41420
radiation effects on synthesis of, in ascites sarcoma cells, magnetic field, 25:6642
radiation effects on synthesis of, in bacteria, uv and x, 22:4712
radiation effects on synthesis of, in barley plants, effects of seed exposure on γ, 23:6607
radiation effects on synthesis of, in bone marrow and lymphocytes of mice in relation to duration of mitosis, x, 22:21481
radiation effects on synthesis of, in bone marrow cells, x, 23:29347 (UCRL-18347, pp 149-54)
radiation effects on synthesis of, in brain cells of rats, tritium β, 23:29377
radiation effects on synthesis of, in brain of infant rats, tracer studies of x, 23:26909
radiation effects on synthesis of, in brain of rats, 21:20034 (UCLA-12-612, pp 15-36)
radiation effects on synthesis of, in bromouracil-substituted mammalian cells, protective effects of cysteamine against uv, 22:8588
radiation effects on synthesis of, in cell nuclei, uv and x, 24:50741
radiation effects on synthesis of, in cells of Drosophila, mice, and rats, x, 24:34120
radiation effects on synthesis of, in cells of embryonic heart of rats, x, 24:51014
radiation effects on synthesis of, in cells of mice, γ, neutrons, and x, 21:45791
radiation effects on synthesis of, in cells of rat embryos, tracer study of x, 23:50342
radiation effects on synthesis of, in cells, repair of x, 24:48586
radiation effects on synthesis of, in cells, uv, 22:33933
radiation effects on synthesis of, in cerebrum of rat embryos, autoradiographic study of x, 23:22424
radiation effects on synthesis of, in cervical cancer cells, 21:12942
radiation effects on synthesis of, in chick embryos, x, 21:34739(R) (COO-1270-1)
radiation effects on synthesis of, in Chinese hamster cells, combined effects of caffeine on uv, 23:38480
radiation effects on synthesis of, in Chinese hamster cells, uv, 24:19347
radiation effects on synthesis of, in Chlamydomonas, synergistic effects of actinomycin D or chloramphenicol on γ, 21:34824
radiation effects on synthesis of, in Chlorella vulgaris, uv, 22:21631
radiation effects on synthesis of, in Chlorella, effects of dose and life cycle stage on γ, 22:45412
radiation effects on synthesis of, in Chlorella, γ, 23:6353 (SGAE-BL-29/1968)
radiation effects on synthesis of, in Chlorella, γ, 23:24530
radiation effects on synthesis of, in chromosomes of Bacillus subtilis and Escherichia coli, uv and x, 25:4456(R) (ORO-3596-15)
radiation effects on synthesis of, in clones of x irradiated Ehrlich ascites tumor cells, effects of dose on x, 24:48664
radiation effects on synthesis of, in corneal cells of rabbits during wound healing, strontium-90 β, 23:41240
radiation effects on synthesis of, in corneal epithelial cells of dogfish, effects of iododeoxyuridine on γ and uv, 22:12769
radiation effects on synthesis of, in corneal epithelium of rats, β, 23:2781
radiation effects on synthesis of, in corneal epithelium of rats, strontium-90 β, 22:45411
radiation effects on synthesis of, in cultured cells, effects of fibroma virus infection on cesium-137 γ, 24:32160
radiation effects on synthesis of, in cultured Chinese hamster cells in relation to incidence of chromosome aberrations, uv, 22:21467
radiation effects on synthesis of, in cultured Chinese hamster cells, effects on, on mitosis, x, 23:33627
radiation effects on synthesis of, in cultured diploid cells from human amnion, x, 22:43214
radiation effects on synthesis of, in cultured fibrosarcoma and L cells, electron and γ, 25:52176 (A/CONF.49/P-358)
radiation effects on synthesis of, in cultured hamster cells, effects of prior incorporation of brominated pyrimidines on visible light, 24:34576
radiation effects on synthesis of, in cultured hamster cells, effects of cell age on x, 24:12280
radiation effects on synthesis of, in cultured hamster cells, effects of cell cycle on uv, 23:45643 (ANL-7535, pp 198-9)
radiation effects on synthesis of, in cultured human cells, x, 25:8743
radiation effects on synthesis of, in cultured human lymphocytes, effects of phytohemagglutinin on recovery from, 23:31649
radiation effects on synthesis of, in cultured human kidney cells, x, 23:20115
radiation effects on synthesis of, in cultured human lymphocytes, effects of hydroxyurea on x, 24:12045
radiation effects on synthesis of, in cultured human leukocytes, 24:21273
radiation effects on synthesis of, in cultured mammalian cells, molecular basis for effects of exogenous DNA on restoration following x, 25:11243
radiation effects on synthesis of, in cultured melanocytes, uv, 23:12185
radiation effects on synthesis of, in cultured monkey kidney tissues and infection SV-40 virus, x, 24:819(T) (ORNL-tr-2129)
radiation effects on synthesis of, in cultured pea root meristem cells, effects of hypoxia on recovery following 300 R cesium-137 γ, 24:19330
radiation effects on synthesis of, in developing eggs of sea urchins, uv and x, 22:28337
radiation effects on synthesis of, in Dictyostelium, effects of mitotic stage on, 24:27721
radiation effects on synthesis of, in differentiating chicken feather cells, x, 24:41950
radiation effects on synthesis of, in dogs during simulated space flight, γ, 25:32577
radiation effects on synthesis of, in Drosophila, effects of dose fractionation on uv, 21:39388
radiation effects on synthesis of, in duodenal crypt cells in mice, γ and x, 22:12745 (CONF-671120-1)
radiation effects on synthesis of, in E. coli, uv, 21:3457
radiation effects on synthesis of, in eggs of Bombyx mori, γ, 22:28373
radiation effects on synthesis of, in Ehrlich ascites cells, γ, 22:14917
radiation effects on synthesis of, in embryo cells of mice following infection with polyoma virus, x, 23:33861
radiation effects on synthesis of, in embryos of Misgurnus fossilis, comparison of, with radiotoxin effect, 22:23423
radiation effects on synthesis of, in epidermis of guinea pig flanks, use of tritium-labeled thymidine for studying, 24:23114
radiation effects on synthesis of, in epidermis of mice, uv, 24:27529
radiation effects on synthesis of, in epithelial cells of intestine in silver salmon, effects of temperature on x, 22:10740 (BNWL-480, pp 153-93)
radiation effects on synthesis of, in Escherichia coli, effects of genetic strain on, 21:22814
radiation effects on synthesis of, in Escherichia coli, effects of dose and genetic strain on γ, 25:42729 (NYO-2804-40)
radiation effects on synthesis of, in Escherichia coli, effects of thymine and tryptophan on uv, 23:31685(R) (NYO-3893-10)
radiation effects on synthesis of, in Escherichia coli, repair of uv and x, 22:8493
radiation effects on synthesis of, in Escherichia coli, combined effects of reductone and uv, 25:13610
radiation effects on synthesis of, in Escherichia coli in relation to centrifugal banding density, γ, 24:14428
radiation effects on synthesis of, in Escherichia coli, tritium tracer study of γ, 23:20449
radiation effects on synthesis of, in Escherichia coli, photoinduced reversal of combined effects of acriflavine on uv, 22:8664
radiation effects on synthesis of, in Escherichia coli, effects of nalidixic acid and sex factor on uv, 24:48414
radiation effects on synthesis of, in excised pea roots, effects of carbohydrate supply on x, 22:28390
radiation effects on synthesis of, in eyes β, 25:8609
radiation effects on synthesis of, in face fly germ cells, γ, 25:32524
radiation effects on synthesis of, in fetal rat livers following exposure in utero, cobalt-60 γ, 24:34097
radiation effects on synthesis of, in first postirradiation life cycle of cultured mammalian cells, 22:40587
radiation effects on synthesis of, in germ cell nuclei of male rats, x, 22:51418
radiation effects on synthesis of, in germinating wheat seeds, x, 21:14766
radiation effects on synthesis of, in goldfish intestine cells, effects of dose fractionation on 2 and 4 kR whole-body x, 24:32159
radiation effects on synthesis of, in gut epithelial cells of man in relation to thymine excretion patterns, x, 22:45508(R) (PG-Report-826)
radiation effects on synthesis of, in hamster cells, uv, 22:23397(R) (COO-1704-4)
radiation effects on synthesis of, in hamster cells, x, 22:28274 (ANL-7278, pp 250-82)
radiation effects on synthesis of, in HeLa cell cultures, effects of cell stage at exposure on uv, 22:6753
radiation effects on synthesis of, in HeLa cell cultures, effects of dose on γ and x, 23:31652
radiation effects on synthesis of, in HeLa cells, x, 22:36212
radiation effects on synthesis of, in HeLa cells, effects of cell phase and dose fractionation on uv and x, 25:21597
radiation effects on synthesis of, in HeLa cells, carbon-14 and tritium β, 22:6719 (UCSF-10-P-2-33)
radiation effects on synthesis of, in HeLa cells, combined effects of uv and x, 22:36402
radiation effects on synthesis of, in HeLa cells, effects of acriflavine and dose on uv, 23:38484
radiation effects on synthesis of, in HeLa cells, effects of cell cycle on, 22:40603
radiation effects on synthesis of, in human amnion cells, effects of dose and growth rate on x, 25:26630
radiation effects on synthesis of, in human cells, photosensitizing effects of trisoralen on uv, 25:26808
radiation effects on synthesis of, in human kidney cells in vitro, x, 22:51457
radiation effects on synthesis of, in human lymphocytes, acute stimulatory ionizing and uv, 23:800
radiation effects on synthesis of, in human skin, tritium tracer study of uv, 23:38464
radiation effects on synthesis of, in human spermatogonia and spermatocytes, x, 25:8789(R) (NYO-4034-2)
radiation effects on synthesis of, in intestinal cells of mice, recovery mechanisms for γ, 22:36203
radiation effects on synthesis of, in intestinal epithelium of goldfish, effects of temperature on x, 23:16225 (NIRS-7, pp 36-55)
radiation effects on synthesis of, in intestinal epithelial cells in goldfish, effects of dose and temperature on recovery time following x, 24:19304
radiation effects on synthesis of, in intestine and tongue epithelium of mice, combined effects of Endoxan on, 22:36315
radiation effects on synthesis of, in intestine and liver of rats, x, 22:12814
radiation effects on synthesis of, in intestine and melanomas of mice, x, 22:49219
radiation effects on synthesis of, in intestines of mice, comparison of radiomimetic drugs with x, 23:2958
radiation effects on synthesis of, in kidneys and regenerating liver of rats, relation of histone phosphorylation to γ, 23:50292
radiation effects on synthesis of, in L cells of mice, effects of tritium-labeled thymidine on β, 22:19274
radiation effects on synthesis of, in L cells, effects of cell phase on x, 22:36202
radiation effects on synthesis of, in L cells, effects of energy deprivation on x, 23:2946
radiation effects on synthesis of, in L cells, theoretical calculation of uv, 22:31005
radiation effects on synthesis of, in lambda phage repressors, mechanism for inhibitory uv, 25:37914
radiation effects on synthesis of, in lambda repressors, inhibitory uv, 25:37913
radiation effects on synthesis of, in Langerhans cells of epidermis in monkeys, uv, 21:36534
radiation effects on synthesis of, in lens epithelium of rats, effects of wounds on x, 24:23354(R) (COO-1024-35)
radiation effects on synthesis of, in lens epithelium of rats, x, 25:27000
radiation effects on synthesis of, in liver mitochondria of rats, comparison of effects of testosterone to small-dose x, 25:46730
radiation effects on synthesis of, in liver of partially hepatectomized rats, x, 24:16990
radiation effects on synthesis of, in liver of rats, γ, 22:31211
radiation effects on synthesis of, in liver of rats, in comparison to actinomycin inhibition, x, 23:909
radiation effects on synthesis of, in liver, spleen, and thymus of rats, x, 23:7938
radiation effects on synthesis of, in lung cells of mice, combined effects of influenza virus on x, 22:31012
radiation effects on synthesis of, in lymph nodes of man and mice, effects of dose on x, 23:29835
radiation effects on synthesis of, in lymphoid tissues of rats, effects of adrenalectomy on subsequent inhibitory whole-body γ, 25:29672
radiation effects on synthesis of, in macronucleus of Paramecium caudatum, effects of temperature adaptation on x, 22:21608
radiation effects on synthesis of, in mammalian cells, uv, 23:20116
radiation effects on synthesis of, in mammalian cells following suppression by hydroxyurea, stimulating uv, 24:6001
radiation effects on synthesis of, in mammalian cells, review of uv, 25:21806
radiation effects on synthesis of, in mammalian cells, protective effects of catalase against uv, 21:43328
radiation effects on synthesis of, in mammalian cells following induction of pyrimidine dimers, mathematical model for calculating uv, 25:37858
radiation effects on synthesis of, in mammalian cells, uv, 22:21426
radiation effects on synthesis of, in meristem cells of pea roots, γ, 22:40962
radiation effects on synthesis of, in mitochondria and nuclei of rat liver cells, x, 24:44602
radiation effects on synthesis of, in mixed cultures of dog leukocytes, x, 21:34566
radiation effects on synthesis of, in mouse intestinal epithelium, 21:11001 (BNL-9494)
radiation effects on synthesis of, in mouse liver, effects of yeast RNA extracts on recovery from, 21:8854
radiation effects on synthesis of, in mouse livers, whole-body γ, 25:39934
radiation effects on synthesis of, in mutant of Saccharomyces, uv and x, 24:598

radiation effects on synthesis of, in mutants of Escherichia coli, effects of, on cytokinesis, uv, 24: 41759
radiation effects on synthesis of, in mutants of Escherichia coli B, effects of strain on uv, 24:14628
radiation effects on synthesis of, in mutants of Haemophilus influenzae, effects of dose on uv, 24: 41763
radiation effects on synthesis of, in mycoplasma laidlawii, uv, 23:10124
radiation effects on synthesis of, in nerve cells of rabbits, tritium tracer study of x, 22:43455
radiation effects on synthesis of, in nucleus and cytoplasm, α, 21:8686
radiation effects on synthesis of, in Oenothera and wheat, x, 25:18910
radiation effects on synthesis of, in organs of mice, chromatographic study of x, 23:47969
radiation effects on synthesis of, in plants, x, 21:16525
radiation effects on synthesis of, in proliferative cells in duodenal crypts of mice, whole-body x, 21:24619
radiation effects on synthesis of, in quiescent center of angiosperm roots, x, 24:25592
radiation effects on synthesis of, in rabbit nerve cells, whole-body x, 22:36183
radiation effects on synthesis of, in radioresistant and radiosensitive Escherichia coli, uv, 24:928
radiation effects on synthesis of, in rat bone marrow, 21: 14622
radiation effects on synthesis of, in rat embryos, x, 21: 14584
radiation effects on synthesis of, in rat liver following partial hepatectomy, 21:16296
radiation effects on synthesis of, in rat liver, x, 25:44934
radiation effects on synthesis of, in rat liver, x, 23:17914
radiation effects on synthesis of, in rat lymphocytes as indicator of dose, in vitro effects of phytohemagglutinin on, 25:42404
radiation effects on synthesis of, in rat thyroid, x, 24: 19354
radiation effects on synthesis of, in rats, combined protective effects of antibiotics, bone marrow, and vitamins against, 21:43454
radiation effects on synthesis of, in rats, protective effects of radioprotective compounds in combination with therapeutic agents against, 21:3427
radiation effects on synthesis of, in regenerating liver of rats, effects of iodine-125-labeled IUDR on whole-body x, 22:28621 (ANL-7278, pp 1-94)
radiation effects on synthesis of, in regenerating liver, 21:45513
radiation effects on synthesis of, in regenerating rat liver, phosphorus-32 β, 23:6369
radiation effects on synthesis of, in regenerating rat liver, x, 23:31692
radiation effects on synthesis of, in regenerating cells of injured spinal cord in rats, x, 22:40926
radiation effects on synthesis of, in roots of beans, corn, and peas, 24:2831
radiation effects on synthesis of, in salivary glands of Drosophila larvae, x, 25:11246
radiation effects on synthesis of, in sea urchin eggs, uv, 21:8910 (COO-78-142, pp 120-37)
radiation effects on synthesis of, in sea urchin eggs, γ, 21:8910 (COO-78-142, pp 120-37)
radiation effects on synthesis of, in slime molds, γ and x, 23:31819(R) (COO-78-200)
radiation effects on synthesis of, in Spathidium spathula, x, 23:38755
radiation effects on synthesis of, in starved Escherichia coli, uv, 23:33641
radiation effects on synthesis of, in succeeding generations of HeLa cells, x, 25:32613
radiation effects on synthesis of, in synchronized Chinese hamster cells, effects of cycloheximide on x, 25:32557
radiation effects on synthesis of, in T-cells, x, 21:26556 (NP-16630)
radiation effects on synthesis of, in temperature-sensitive mutants of Escherichia coli, γ, 23:48278
radiation effects on synthesis of, in Tetrahymena, 21: 18025
radiation effects on synthesis of, in Tetrahymena, x, 21: 1843 (AD-640596)
radiation effects on synthesis of, in Tetrahymena, uv and x, 22:12744 (BL-207)
radiation effects on synthesis of, in thymic cells of rats, 24:12284
radiation effects on synthesis of, in thyroid gland of rats, β, 21:41367
radiation effects on synthesis of, in thyroid gland of rats, β, 22:2534(R) (COO-1243-8)
radiation effects on synthesis of, in tissues of rat eye, strontium-90 β, 22:45655
radiation effects on synthesis of, in tobacco cells, photoreactivation of uv, 24:11965
radiation effects on synthesis of, in uv-irradiated E. coli, quantitative analysis of, 21:16315
radiation effects on synthesis of, in vaccina virus, cobalt-60 γ, 23:31996
radiation effects on synthesis of, in vaginal epithelium cells of rats, effects of dose on γ, 24:46576
radiation effects on synthesis of, in yeast cells in relation to fluctuations in DNA polymerase, x, 22:40605
radiation effects on synthesis of, in yeast cells in relation to mutation induction, uv, 25:44980
radiation effects on synthesis of, in yeast, uv and x, 22: 426
radiation effects on synthesis of, in yeasts, effects of ploidy on x, 23:7954
radiation effects on synthesis of, magnetic field, 25:6676
radiation effects on synthesis of, repair of uv, 24:17037
radiation effects on synthesis of, review of mechanisms of, 22:40612
radiation effects on synthesis of, use of, for selective destruction of neoplasms, β, 22:17030
radiation effects on synthesis of, uv and x, 21:8701
radiation effects on synthesis of, x, 21:28381
radiation effects on T4 bacteriophage, effects of host cell radiosensitivity on repair of uv, 22:51367
radiation effects on T7, from Escherichia coli in vitro in relation to initiation specificity of RNA polymerase, uv and x, 24:14431
radiation effects on template activity of Bacillus subtilis, RNA synthesis following x, 25:29467
radiation effects on template activity of, effects on RNA synthesis of γ, 24:25393
radiation effects on template properties of, effects of dose on x, 25:8610
radiation effects on the incorporation of tritium-labeled thymidine into, of splenic lymphocytes from hamsters, x, 22:23603
radiation effects on thermal stability of, in rat livers, combined effects of AET and thiamine pyrophosphate on ionizing, 23:29351
radiation effects on thermoluminescence of, γ, 23: 35136(R) (PRNC-128)
radiation effects on thymidine incorporation in cultured rat thymus cell, factors affecting x, 25:55127
radiation effects on thymine content in, from cotton seeds, γ, 21:34586
radiation effects on thymine dimerization in, of lymphosarcoma cells in mice, effects of acridine derivatives on uv, 25:24308
radiation effects on thymine-containing dimers of, effects of light and yeast photoreactivating enzymes on uv, 22:28288 (ORNL-4100, pp 166-77)
radiation effects on thymus cell, photoreactivation of uv, 21:24321
radiation effects on timing of synthesis of, during cell cycle of cultured Chinese hamster ovary cells, x, 24: 39575
radiation effects on transcribing, in Pseudomonas effuse, effects of, on base sequence of mRNA, uv, 21:32578
radiation effects on transcription and transfer of coded information from bacteriophage, 21:9027
radiation effects on transcription and translation during synthesis of, in Escherichia coli, effects of genetic strain on cobalt-60 γ, 24:16996
radiation effects on transcription of plant, γ, 25: 42716(R) (COO-1313-29)
radiation effects on transcription on, ionizing or uv, 24: 34090
radiation effects on transduction frequency in, of bacteriophage Plbt, 24:7744
radiation effects on transfection by bacteriophage, in Bacillus subtilis, uv, 23:50340
radiation effects on transfer of Escherichia coli, uv, 25: 52001
radiation effects on transfer of induced free radicals from, to cysteamine in annealed samples, effects of dose on x, 25:49102
radiation effects on transferred F' factor in bacteria, effects of gene types on uv, 25:35271
radiation effects on transformation activity of bacterial, effects of 5-bromouracil substitution on uv, 22: 49185(R) (YALE-2653-33)
radiation effects on transformation of his_2 and try_2 markers in Bacillus subtilis, x, 25:29468
radiation effects on transforming ability of, from vegetative cells and spores of Bacillus subtilis, electron, 22:16984
radiation effects on transforming ability of, in Hemophilus influenzae, uv, 22:28288 (ORNL-4100, pp 166-77)
radiation effects on transforming activity of solutions of, when injected into cells, x, 21:8671 (COO-78-142, pp 82-119)
radiation effects on transforming activity of, effects of single strand breaks on, 23:50333(R) (YALE-2653-34)
radiation effects on transforming activity of, effects of 5-bromo-2'-deoxyuridine incorporation on uv, 21:43334
radiation effects on transforming activity of, from Bacillus subtilis, ionizing, 23:2740(R) (COO-78-174)
radiation effects on transforming activity of, in Bacillus subtilis system, x, 22:25713 (COO-78-163, pp 64-125)
radiation effects on transforming bacteria, repair of uv, 25:27124
radiation effects on transforming, by integration into Haemophilus influenzae genome, repair of, uv, 24: 17000
radiation effects on transforming, combined effects of deoxyribonuclease, dimethylsulfate, and nitrous acid on uv, 22:30971
radiation effects on transforming, from Aspergillus niger, uv, 23:33686
radiation effects on transforming, from Haemophilus influenzae in relation to subsequent integration into cells, uv, 24:16999
radiation effects on transforming, from Haemophilus influenzae, effects of low temperatures on uv, 23: 38485
radiation effects on transforming, in Bacillus subtilis, bacteriophage T3, and Escherichia coli, protective effects of acridine orange against cesium-137 γ, 25: 8707
radiation effects on transforming, in Bacillus subtilis recipients, mechanism for prophage induction following uv, 25:37912
radiation effects on transforming, in Haemophilus influenzae, effects on acriflavine on uv, 21:20449
radiation effects on transforming, mutagenic uv, 21: 32624
radiation effects on transforming, of Bacillus subtilis, effects of iodine compounds on, 24:50765
radiation effects on transforming, of Hemophilus, in relation to survival, uv, 24:44419
radiation effects on transforming, of Micrococcus radiodurans, uv, 22:51443
radiation effects on transforming, of Streptococcus challis, comparison with chemical mutagens and low pH, uv, 24:31907
radiation effects on tritium exchange in salmon sperm, combined effects of dose and temperature on γ, 24: 44418
radiation effects on tritium incorporation by, 23:7964
radiation effects on tritium-labeled thymidine incorporation by, in Arabidopsis thaliana, 21:26668
radiation effects on tritium-labeled, effects of, on rate of enzymic degradation, γ, 21:41338
radiation effects on unscheduled synthesis of mammalian cell, in relation to cell survival and chromosome number, x, 25:52182
radiation effects on unscheduled synthesis of, in HeLa cells, tritium tracer study of effects of temperature on uv, 25:13554
radiation effects on uptake of adenosine and deoxyadenosine by, tritium tracer study in L cells of x, 24:4571
radiation effects on uptake of cytidine and thymidine by, in mitochondria and nuclei of hepatomas in mice, x, 23:6400
radiation effects on uptake of tritium-labeled thymidine by, of non-dividing cells of mice, x, 23:35852
radiation effects on uptake of tritium-labeled thymidine by, in cultured cells, x, 23:24708
radiation effects on viscosity of sodium chloride solutions of, effects of addition of calcium chlorides and iron sulfates, ionic strength of solution, and temperature on uv, 22:28382
radiation effects on viscosity of, in loach sperm, protective effects of chemical agents against x, 23: 18084
radiation effects on viscosity of, of fish sperm, 23:29365
radiation effects on viscosity of, protective effects of actinamine, dactinomycin, and GED against γ, 25: 21594
radiation effects on yield of, from calf thymus deoxynucleoprotein, γ and uv, 21:34603
radiation effects on, action spectrum studies following mutagenic uv, 23:20170
radiation effects on, activity of endonuclease on uv, 24: 27549
radiation effects on, biophysical aspects of, 23:50823
radiation effects on, chemical and physical factors affecting ionizing, 22:40615(R) (EUR-3889)
radiation effects on, concentration dependence of Bacillus subtilis-phage SP82 transfection, uv, 21:28693
radiation effects on, degradation by mutants of Salmonella typhimurium, uv, 22:40650
radiation effects on, demonstration of sytem for repair of uv, 22:25822
radiation effects on, effects of altitude on cosmic, 22: 14951
radiation effects on, effects of benzopyrene, dyestuffs, and furocoumarin on uv, 21:41372
radiation effects on, effects of phage T_4 induced endonuclease on dark repair following uv, 25:42269
radiation effects on, effects of pyrimidine dimer formation on photoreactivation of uv, 22:21424
radiation effects on, effects of, on reactivation of uv damage in bacteriophage lambda, uv, 24:17173
radiation effects on, effects of, on RNA synthesis, γ and uv, 24:21082
radiation effects on, effects of, on synthesis of cytosine heteroadduct, uv, 23:38463
radiation effects on, electron-spin-resonance spectra following γ, 23:17932
radiation effects on, ESR studies of cobalt-60 γ and uv, 23:41241
radiation effects on, ESR studies of x, 24:4560(R) (NYO-910-121)
radiation effects on, ESR study of protective effects of cysteamine against acute x, 22:49463
radiation effects on, extraction of, from HeLa cells, effects of dose on uv, 25:10975
radiation effects on, from bacteriophage T-2 and rat thymus, effects of hydrodynamic forces following, 22: 49198
radiation effects on, from crabs, uv, 22:28288 (ORNL-4100, pp 166-77)
radiation effects on, from Escherichia coli, use of DNA-agar annealing process in, 21:6735
radiation effects on, from reconstituted nucleohistones, x, 22:16974(R) (ORO-2832-56)
radiation effects on, in algae and viruses, photoreactivation of uv, 21:41362
radiation effects on, in animals, review of ionizing and uv, 22:51495
radiation effects on, in ascites, L, and lymphosarcoma cells in relation to cell survival, effects of dose on repair of x, 25:52177 (A/CONF.49/P-554)
radiation effects on, in bacteria and viruses, 22:21410(R) (YALE-2653-30)
radiation effects on, in bacteria, repair of uv, 22: 19309(R) (SU-326-P-7-194)
radiation effects on, in bacterial and mammalian cells, autoradiography studies on, 25:15992
radiation effects on, in bacteriophage T1, comparison of γ and uv, 23:32003
radiation effects on, in bacteriophage-Escherichia coli complex, direct and indirect γ, 21:34827
radiation effects on, in bacteriophages in relation of uptake of tritium-labeled precursors, β, 23:26966
radiation effects on, in bacteriophages, damaging, 24: 8024
radiation effects on, in bacteriophages, fast proton, 23: 41511
radiation effects on, in biological materials, following incorporation of carbon-14, phosphorus-32, or tritium, β, 24:27569 (CONF-690540-, pp 273-88)
radiation effects on, in brain of rats, effects of enzymes on x, 22:25723 (UCLA-12-668, pp 71-84)
radiation effects on, in cells of developing palate of mice, β, 22:40902
radiation effects on, in cells of human skin, uv, 23: 33639
radiation effects on, in Chinese hamster cells, effects of dactinomycin and nitrogen mustard on x, 24:23302
radiation effects on, in cotton seedlings following seed exposure, γ, 25:44765

radiation effects on, in cultured Chinese hamster cells in relation to incidence of chromosome aberrations, x, 23:26719
radiation effects on, in Drosophila melanogaster, uv, 21:36540
radiation effects on, in E. coli bacteriophages, effects of acridine orange and visible light on repair following uv and x, 25:24484
radiation effects on, in E. coli, synergistic γ and uv, 21:39535
radiation effects on, in endometrial gland epithelium of mice, x, 25:21891
radiation effects on, in Escherichia coli and bacteriophage, photoenzymatic repair of uv, 21:16541
radiation effects on, in Escherichia coli in relation to development of prophages and synthesis of colicin, uv, 24:21076
radiation effects on, in Escherichia coli, effects of lethality of, uv, 21:16544
radiation effects on, in Escherichia coli, repair mechanism for uv and x, 25:6668 (CONF-691106-, pp 280-96)
radiation effects on, in Escherichia coli, review of aberrant, 22:40622
radiation effects on, in Euglena, repair of uv, 23:45688 (AECL-3334)
radiation effects on, in grasshopper neuroblasts in relation to chromosome reversion, x, 25:24052
radiation effects on, in Haemophilus influenzae, determination of repair rate of uv, 25:8650
radiation effects on, in hepatectomized rats, effects of dose and time on, 25:27020
radiation effects on, in homopolymer synthesis in RNA polymerase system, 23:15908
radiation effects on, in L cells, mechanism of repair of, 23:33810
radiation effects on, in liver of rats, chemicophysical, 22:51450
radiation effects on, in liver of rats, mechanisms of repair following whole-body x, 23:35650
radiation effects on, in lymphoma cells from mice, effects of dose on tritium β, 22:6719 (UCSF-10-P-2-33)
radiation effects on, in lymphoma cells, repair of, 23:45648
radiation effects on, in mammalian cells in culture, repair mechanisms for, 25:37856 (A/CONF.49/P-93)
radiation effects on, in mammalian cells, review of early, 22:40553
radiation effects on, in mammals, mechanism of repair by enzymes, ionizing and uv, 22:38409
radiation effects on, in mitochondria of rat liver, effects of age and dose on x, 23:22235
radiation effects on, in mouse tissue nuclei, use of specific antibodies for detection of whole-body uv, 25:44781
radiation effects on, in Mycoplasma laidlawii, x, 25:24482
radiation effects on, in normal and denervated muscles of rabbits, whole-body x, 22:49217
radiation effects on, in nucleoproteins, γ, 21:36511
radiation effects on, in rabbit hematopoietic system, effects of dose on x, 25:29637
radiation effects on, in rabbit sperm, 21:22709
radiation effects on, in rat thymocytes in vitro, whole-body x, 21:32793
radiation effects on, in relation to binding ability and priming activity for DNA polymerase, x, 23:2740(R) (COO-78-174)
radiation effects on, in relation to cell death, 24:48479 (UCSF-10-P-2-110)
radiation effects on, in relation to damage to fetal and neonatal mammals, 24:23108 (CONF-690501-, pp 919-42)
radiation effects on, in relation to mechanisms in mutagenesis, review of ionizing and uv, 24:34266
radiation effects on, in relation to mutations, review of mechanisms in, 23:43746
radiation effects on, in relation to paramagnetic centers, γ, 24:11937
radiation effects on, in relation to production of antibodies in rabbits, uv, 22:14928
radiation effects on, in relation to radiosensitivity, for repair system, 24:32283
radiation effects on, in Saccharomyces, 21:13076
radiation effects on, in skin cells of man, effects of xeroderma pigmentosum affliction on repair following uv, 24:32259
radiation effects on, in T_2 bacteriophages, evaluation of thymine dimerization for determining, 24:48750 (ISS-69/38)
radiation effects on, in Tetrahymena, repair of uv and x, 22:21587
radiation effects on, in tissues of mice following ingestion of tritium-labeled thymidine, β, 25:42262
radiation effects on, in uv-induced inactivation of microorganisms, thymine model for, 21:16299
radiation effects on, in vacuum, inactivating uv, 23:47975
radiation effects on, in viruses, photoreactivation of uv, 23:45665
radiation effects on, in vitro, effects of, on response to denaturing agents, 24:745
radiation effects on, lethal and mutagenic photoproducts of uv, 22:25792
radiation effects on, mechanism of ionizing and uv, 23:50832 (PHS-999-RH-33, pp 2-4)
radiation effects on, mechanisms for protective effects of sulfhydryl and other agents against, 24:12120
radiation effects on, mechanisms of repair of uv and x, 22:38200 (UCSF-10-P-2-41)
radiation effects on, mechanisms of x, 22:12824
radiation effects on, mutagenic effects of, on Bacillus subtilis, x, 23:4923
radiation effects on, of animal cells, in relation to radiosensitivity, 23:50802
radiation effects on, of Bacillus subtilis, effects of strain on repair of uv, 24:36704
radiation effects on, of Bacillus subtilis, mutagenic x, 22:45496
radiation effects on, of bacteria and bacteriophages, phosphorus-32 β, 23:48272
radiation effects on, of bacteria and bacteriophages, review of ionizing and uv, 22:49251
radiation effects on, of bacteriophage infecting Escherichia coli, mechanisms in in vivo repair of uv, 24:44420
radiation effects on, of bacteriophage phiX174, role of elastic nuclear collisions in proton, 23:20138
radiation effects on, of bacteriophage, mechanism of tritium β, 23:24772
radiation effects on, of bacteriophage, repair of uv, 22:51321
radiation effects on, of bacteriophage, uv, 22:45497
radiation effects on, of bacteriophages, protective effects of glycerol and molecular structure against γ and x, 23:16241
radiation effects on, of Chinese hamster cells, molecular study of γ, 24:12044 (ORO-2832-79, pp 2-11)
radiation effects on, of cultured cells, fluorometry of ionizing, 24:48418
radiation effects on, of cultured Chinese hamster cells, effects of metabolic inhibitor compounds on repair replication following uv, 24:48594
radiation effects on, of cultured human cells, repair replication in relation to recovery following uv, 24:29711 (UCSF-10-P-2-93)
radiation effects on, of cultured human diploid cells, effects of dose on normal replication following repair of uv, 24:44425
radiation effects on, of cultured mammalian cells, mechanisms in repair of x, 24:32144(R) (ORO-3884-2)
radiation effects on, of cultured mammalian cells, dark repair of, uv and x, 22:31217
radiation effects on, of cultured vertebrate cells, effects of cell type and post-irradiation environment on repair mechanisms for uv, 24:48686
radiation effects on, of Drosophila following uptake of carbon-14 or tritium-labeled thymidine, β, 23:38524(R) (ORO-3728-2)
radiation effects on, of epidermal rat cells, biochemical uv, 22:49253
radiation effects on, of erythrocytes of chickens, fast neutron, 23:926
radiation effects on, of Escherichia coli and Micrococcus luteus, biochemical and genetic mechanisms for repair of uv, 24:48756
radiation effects on, of Escherichia coli B, method for analysis of excision-repair of uv, 22:14942
radiation effects on, of Escherichia coli strain deficient in excision-repair of pyrimidine dimers, mutagenic uv, 22:33792
radiation effects on, of Escherichia coli, analysis of photoenzymatic repair of, uv, 25:8652
radiation effects on, of Escherichia coli, effects of 5-fluorouracil on repair of uv, 22:40969
radiation effects on, of Escherichia coli, effects of caffeine and 8-chlorocaffeine on dark repair of uv, 22:51435
radiation effects on, of Escherichia coli, mechanisms of recovery from uv, 22:12806
radiation effects on, of Escherichia coli, protective effects of cysteamine and enzymes against uv, 23:10023
radiation effects on, of Escherichia coli, repair synthesis of uv, 22:52036 (ORO-3596-7)
radiation effects on, of Escherichia coli, sensitizing effects of N-ethylmaleimide on γ, 22:21569
radiation effects on, of Escherichia coli, use of cesium chloride for analysis of x, 22:31293
radiation effects on, of Escherichia coli, uv, 23:17990
radiation effects on, of fetal and neonatal mammals, mechanisms for, 23:29742 (UCLA-12-719)
radiation effects on, of fibroblasts from normal human skin and skin of xeroderma pigmentosum patients, role of enzymes in repair of uv, 24:23121
radiation effects on, of green algae, role of photoreactivating enzymes in repair of uv, 25:29713(R) (COO-1793-5)
radiation effects on, of hamster cells, comparison of uv and x, 24:48662 (UCSF-10-P-2-114)
radiation effects on, of Hartmannellid amoeba, effects of dose on γ, 22:40914
radiation effects on, of HeLa cells, effects of drugs on repair replication following uv, 24:48593
radiation effects on, of HeLa cells, repair replication of uv, 23:20113
radiation effects on, of Hemophilus influenzae, repair following x, 23:48283
radiation effects on, of Hemophilus influenzae, use of acriflavine for determining recovery from uv, 23:2991
radiation effects on, of human fibroblasts, effects of xeroderma pigmentosum on repair replication of uv, 24:48398 (UCSF-10-P-2-113)
radiation effects on, of human xeroderma pigmentosum cells, repair synthesis following, uv and x, 25:2535
radiation effects on, of human Xeroderma pigmentosum cells, repair replication following uv, 24:48593
radiation effects on, of labeled chicken embryos, phosphorus-32 β, 24:32213
radiation effects on, of lambda bacteriophage, lytic γ, 23:933(R) (NIRS-6)
radiation effects on, of lambda/sub vir/ or T, bacteriophages infecting Escherichia coli, preference of host-repair enzyme system for repair of uv, 23:48261 (NYO-2740-6, pp 303-18)
radiation effects on, of loach sperm in comparison to effects of ethylenimine, ionizing, 24:16976
radiation effects on, of LPP-1 virus, photoreactivation of uv, 24:19374(R) (ORO-3630-7)
radiation effects on, of lymphosarcoma cells, ionizing, 22:36177
radiation effects on, of mammalian cell cultures, tritium β, 22:43456
radiation effects on, of Micrococcus lysodiekticus, characterization of repair enzymes for uv, 23:47972
radiation effects on, of Micrococcus lysodiekticus, enzymes, 23:47972
radiation effects on, of Micrococcus radiodurans, dose fractionation of degratory, 25:16385
radiation effects on, of microorganisms, 22:14916
radiation effects on, of microorganisms, uv, 23:26751
radiation effects on, of Mycoplasma, repair replication following uv, 24:7755
radiation effects on, of Paramecium aurelia, production of pyrimidine dimers following uv, 23:2795
radiation effects on, of Pelomyxa nuclei, protective effects of transplants of unirradiated amoebae against uv, 24:41892 (ANL-7635, pp 186-99)
radiation effects on, of phage α, relation of, to synthesis of α messenger RNA, 22:25783
radiation effects on, of phi X 174 phage following treatment with 5-bromouracil, uv, 22:47558
radiation effects on, of phiR bacteriophage, repair mechanisms for uv, 23:933(R) (NIRS-6)
radiation effects on, of rat liver, effects of deoxyribonuclease on x, 23:20136
radiation effects on, of rat lymphocytes, fluorescent-cytochemical method for detection of in vitro or in vivo, 24:34079
radiation effects on, of recombination-deficient mutants of Escherichia coli, repair mechanisms for uv and x, 24:48757
radiation effects on, of Salmonella typhimurium, uv, 22:49653
radiation effects on, of sand dollar zygotes, effects of, on cell division, uv, 22:43432
radiation effects on, of Schizosaccharomyces pombe, mutagenic uv, 22:10747
radiation effects on, of sea urchin eggs, role of repair synthesis in prefertilization recovery from ionizing, 23:2740(R) (COO-78-174)
radiation effects on, of Secale sp., effects of seed exposure on x, 23:38536
radiation effects on, of Serratia bacteriophage, photoreactivational repair of uv, 22:36422
radiation effects on, of Serratiaphage kappa, combined effects of incorporated bromouracil on mutagenic uv and x, 22:40637
radiation effects on, of Streptococcus, dark repair of uv, 22:23689
radiation effects on, of T2 bacteriophage, γ, 23:11995(R) (ORO-2832-74)
radiation effects on, of thymus cells in mice, x, 23:48225
radiation effects on, of Ustilago maydis, mechanism of repair of uv, 23:31704
radiation effects on, of viruses, 24:4594 (EUR-4249)
radiation effects on, of xeroderma pigmentosum cells, repair synthesis following uv, 25:2567
radiation effects on, of yeast, gene locus for repair of uv and x, 25:4480
radiation effects on, phosphorus-32 and tritium tracer study of, 24:32143(R) (N-69-13276)
radiation effects on, photoproduct formed from uv, 22:33768
radiation effects on, photoreactivation and repair of uv, 22:49223
radiation effects on, photoreactivation of uv, 21:24322
radiation effects on, progress report on, 24:21321(R) (RLO-353-42)
radiation effects on, protective effects of calcium ions and histones against, 22:45408
radiation effects on, protective effects of formaldehyde against cesium-137 γ, 23:31650
radiation effects on, protective effects of normal aliphatic diamines, cystamine and β,β'-diaminodiethylsulfide against x, 22:38379
radiation effects on, protective effects of propyl gallate against, EPR study of γ, 25:505
radiation effects on, relation of effects to radiation damage in the organism, 21:14562(T) (JPRS-38943)
radiation effects on, repair of, 22:6711 (BARC-287)
radiation effects on, repair replication following uv, 24:48753
radiation effects on, replication and genetic recombination following, 23:16276
radiation effects on, review of biochemical and physiological, 23:780
radiation effects on, review of HCR-initiated release of thymine dimers following uv, 22:25793
radiation effects on, review of ionizing, 22:23629
radiation effects on, review of mechanism of uv, 24:50717
radiation effects on, review of neutron, 25:58089
radiation effects on, review of radiotoxins role in recovery from γ or x, 22:25910
radiation effects on, review of repair mechanisms for uv, 24:31946
radiation effects on, role of DNA-pyrimidine dimer photomonomerase in photoreactivation of uv, 25:8606(R) (ORO-3630-10)
radiation effects on, use as biological dosimeter, 25:44809
radiation effects on, use of degradation products of pyrimidine in estimation of γ, 25:51990 (A/CONF.49/P-633)
radiation effects on, use of ESR spectroscopy for study of γ, 21:20064
radiation effects on, uv fluorescence spectra of ionizing, 22:36176
radiation effects on, x, 21:22400
radiation injuries to Micrococcus radioduran, role of enzymes in repair of, 25:37728(R) (AECL-3860)
radiation injuries to, of bacteriophages and Escherichia coli, review of repair mechanisms, 23:24591
radiation repair of, by temporary blocking of replication, uv, 25:4463
radioinduced alterations of base composition of, in mutation in Agrobacterium tumefaciens, putative uv, 24:668

radioinduced base degradation and denaturation of Bacillus subtilis, x, 25:29466
radioinduced binding of N-ethylmaleimide to, effects of oxygen on x, 23:14122
radioinduced binding of, to N-ethyl-maleimide in aqueous solutions, x, 23:47954 (UCLA-12-724, pp 71-87)
radioinduced binding of, to psoralen, 21:45550
radioinduced binding of, with furocoumarins, photosensitizing effects of long wavelength uv, 24:48406
radioinduced breakage in double-end single-strand, of Bacillus megaterium phage, x, 21:34822
radioinduced breakage of molecules of lambda phage, in Escherichia coli mutants, repair of uv, 22:40629
radioinduced breakage of strands of, relation of RBE to repair mechanisms of, 24:44634 (EUR-4452, pp 51-81)
radioinduced breakage of, in bacterial and mammalian cells, effects of oxygen on x, 23:33628
radioinduced breakdown in Escherichia coli, 21:32786
radioinduced breakdown of, in Escherichia coli, effects of caffeine on uv and x, 24:41760
radioinduced breaks and cross-links of single strands of, uv, 24:39433
radioinduced breaks and crosslinking of, genetic mechanisms of repair of, 23:35653
radioinduced breaks and molecular damage in, of bacteriophage, γ, 24:34238(R) (ORO-3596-10)
radioinduced breaks in algae, mechanisms of repair following γ, 25:35257
radioinduced breaks in bacteriophage, within host bacteria, 21:11140(R) (ORO-2832-48)
radioinduced breaks in chains of, in Polyoma virus, γ, uv, and x, 22:21640
radioinduced breaks in Chinese hamster cell, effects of age on x, 25:26625
radioinduced breaks in double strand, of murine lymphoma cells, x, 25:18911
radioinduced breaks in Ehrlich ascites tumor cells, effects of ATP production on rejoining of x, 25:42632
radioinduced breaks in L cell, effects of energy deprivation on repair of x, 25:18908
radioinduced breaks in mammalian cell, review of repair replication following uv and x, 25:46947 (UCSF-10-P-2-135)
radioinduced breaks in mammalian, review of repair mechanisms for uv and x, 25:57943
radioinduced breaks in molecules of, in Escherichia coli, effects of oxygen on, 22:33793
radioinduced breaks in molecules of, method for detection of x, 23:41242
radioinduced breaks in polynucleotide chains of, in isolated samples, leukemia cells, and micrococcus radiodurans, x, 21:26698
radioinduced breaks in single-stranded, of T4 bacteriophage, effects of host enzymes on repair of uv, 22:30953
radioinduced breaks in strands of, from Bacillus subtilis, γ, 22:28290(R) (NYO-2653-29)
radioinduced breaks in strands of, tritium β, 24:584(R) (COO-1603-3)
radioinduced breaks in sugar-phosphate backbone of, in bacteriophages, frequency of γ, 23:24572
radioinduced breaks in T4 phage, role of polynucleotide ligase in repair of uv, 25:42297
radioinduced breaks in, effects of polynucleotide ligase on recovery from x, 25:35108
radioinduced breaks in, mechanism for, 24:39429
radioinduced breaks in, of Bacillus subtilis spores, effects of germination on repair of electron, 23:50335
radioinduced breaks in, of cultured L cells and of liver cells in mice, repair of x, 23:26692
radioinduced breaks in, of cultured L cells, protective effects of DNP against x, 23:38478
radioinduced breaks in, of Ehrlich ascites cells in vitro, rejoining of x, 24:7740
radioinduced breaks in, of Escherichia coli, effects of, on sex factor, x, 23:47971
radioinduced breaks in, of Micrococcus radiodurans, repair of γ, 23:7963
radioinduced breaks in, of Micrococcus radiodurans, repair of x, 23:11928(T) (AEC-tr-6646/4A, pp 1-5)
radioinduced breaks in, of mouse leukemic cells, estimation of double-strand and single-strand, x, 23:29439
radioinduced breaks in, of rat sarcoma cells, effects of, on DNA polymerase reaction, 24:31860
radioinduced breaks in, of Salmonella thompson in relation to radiosensitivity and repair, γ, 24:27722
radioinduced breaks in, of T4 and T7 bacteriophages, effects of oxygen and sulfhydryl compounds on γ, 24:34777
radioinduced breaks in, of T5 bacteriophage, enzymic repair of phosphorus-32 β and x, 23:2790
radioinduced breaks in, role of enzymes in repair of x, 23:24571
radioinduced breaks of single-strand, in Bacillus subtilis, effects of 5-bromouracil on uv, 24:34800
radioinduced breaks of strands of, in Ehrlich ascites tumor cells, x, 25:4567
radioinduced breaks of, in bacteriophage, β, 21:43349
radioinduced breaks of, in Escherichia coli, target theory interpretation of, 22:36218
radioinduced chain breaks in, for studies on molecular weight dependence of genetic transcription, 25:10977
radioinduced chain breaks in, protective effects of dopamine against x, 23:26821 (YALE-3960-1)
radioinduced chain breaks of, in human cells, effects of affliction with xeroderma pigmentosum on repair of uv and x, 23:33836 (UCSF-10-P-2-78)
radioinduced chain breaks of, in mammalian cells, repair mechanisms for uv and x, 23:33836 (UCSF-10-P-2-78)
radioinduced changes in composition and content of pyrimidine nucleotides in, of cotton shoots following seed exposure, γ, 25:11307
radioinduced changes in molecular structure of, in guinea pig skin, x, 23:50347
radioinduced changes in replication cycle of, in Escherichia coli, uv and x, 24:39436
radioinduced changes in structure of, in comparison to DNP, 23:24513
radioinduced chemical and structural changes in transforming, mechanisms for phenotypic expression following x, 25:29469
radioinduced chemical modification of, role of thymine radiolysis in, 24:41762
radioinduced chromatid or chromosome aberrations in, of Allium cepa following exposure of seeds, x, 24:918
radioinduced cleavage of circular single-stranded, of phiR bacteriophages, uv, 22:12806
radioinduced cleavage of strands of, in bacteriophages, in sperm, and in solutions, γ, 23:17953
radioinduced complexing with nitroxide free radicals, binding energy and reaction kinetics for electron, 25:51994
radioinduced cross links in Bacillus subtilis, x, 25:29465
radioinduced crosslinks and double single strand breaks in, effects of oxygen on γ, 25:26637
radioinduced cyclobutyl pyrimidine dimers in, of Escherichia coli, protective effects of acridine dyes against uv, 24:2719
radioinduced damage in vertebrate cell, effects of cell type and postirradiation conditions on repair of uv, 25:26635
radioinduced damage in, of Micrococcus luteus, use of nucleases for determining uv, 25:10959 (BNL-50203, pp 27-40)
radioinduced damage of, in Escherichia coli, study of repair mechanisms in uv, 25:11008 (BNL-50203, pp 14-26)
radioinduced damage of, in fibroblasts from skin of xeroderma pigmentosum patients, excision repair of uv, 25:24041 (UCSF-10-P-2-129)
radioinduced damage of, in tissues of kangaroos and opossums, photoreactivation of uv, 23:47977
radioinduced damage of, protective effects of chloride ions against γ, 25:10962
radioinduced damage of, protective effects of cystamine, GED, and pentamethylenediguanidine against, 25:26801
radioinduced damage to Escherichia coli and phage, mechanisms and repair of uv and x, 24:657(R) (NYO-3797-8)
radioinduced damage to streptomycin resistance marker in bacterial, photoreactivation of uv, 21:24320
radioinduced damage to, in cultured mammalian cells, repair processes following carcinogenic uv and x, 25:8611
radioinduced damage to, in lambda bacteriophage, excision and replication repair mechanisms for uv, 24:39434
radioinduced damage to, in Tetrahymena pyriformis, excision repair mechanisms for uv, 24:9783
radioinduced damage to, in Tetrahymena, mechanisms in repair of uv or x, 23:799
radioinduced damage to, of Micrococcus radiodurans, effects of bromouracil on repair of x, 24:23120
radioinduced decrease of content of, in dorso-lateral prostates of rats, x, 25:13366
radioinduced degradation of bacteria and yeast, enzymatic repair of uv and x, 25:49319 (AECL-3961)
radioinduced degradation of bacterial, effects of phenethyl alcohol on x, 25:39965
radioinduced degradation of Escherichia coli, effects of dose, genetic strain, and temperature on rate of repair of γ, 25:42731 (NYO-2804-42)
radioinduced degradation of Escherichia coli, effects of dose and genetic strain on γ, 25:42729 (NYO-2804-40)
radioinduced degradation of Escherichia coli, effects of anoxia and genetic strain on repair of γ, 25:42728 (NYO-2804-39)
radioinduced degradation of Escherichia coli, mechanisms for repair of γ, 25:42727 (NYO-2804-38)
radioinduced degradation of Micrococcus radioduran, identification of nucleases responsible for repair of uv, 25:49319 (AECL-3961)
radioinduced degradation of Micrococcus radioduran, x, 25:26627
radioinduced degradation of, by recombination deficient mutants of Escherichia coli, uv and x, 23:33689
radioinduced degradation of, from Escherichia coli, density gradient studies in vitro and in vivo of tritium β, 22:33709(R) (COO-1603-2)
radioinduced degradation of, in Bacillus subtilis, effects of glucose on uv, 21:39339
radioinduced degradation of, in Bacillus subtilis, effects of recovery on uv, 24:50862
radioinduced degradation of, in Bacillus subtilis, relation of, to strand breaks, uv and x, 24:50711(R) (YALE-2653-41)
radioinduced degradation of, in bacteria, 21:34821(R) (NYO-2804-10)
radioinduced degradation of, in bacteria, effects of actinomycin, chloramphenicol, and proflavine on, 23:41234
radioinduced degradation of, in bacteria, review of uv, 25:4462
radioinduced degradation of, in bacterial extracts, uv, 21:28374
radioinduced degradation of, in Escherichia coli, 21:20107
radioinduced degradation of, in Escherichia coli, 24:34077(R) (NYO-2804-27)
radioinduced degradation of, in Escherichia coli and Salmonella typhimurium, mechanisms for x, 25:498
radioinduced degradation of, in Escherichia coli mutants deficient in DNA polymerase, 24:48506
radioinduced degradation of, in Escherichia coli ras-mutant, uv and x, 24:48509
radioinduced degradation of, in Escherichia coli, effects of caffeine on photoreactivability of lambda phage for uv, 22:40965
radioinduced degradation of, in Escherichia coli, tritium tracer study of γ, 23:20448
radioinduced degradation of, in Escherichia coli, as correlated to cell death, 24:14428
radioinduced degradation of, in Escherichia coli, γ, 22:52060
radioinduced degradation of, in Escherichia coli, mechanisms for fast proton and γ, 23:24551
radioinduced degradation of, in Escherichia coli, effects of bacteriophage infection on, γ, 22:36211
radioinduced degradation of, in Escherichia coli, combined α and uv, 23:17911
radioinduced degradation of, in hamster cells, uv, 23:45654
radioinduced degradation of, in hamster cells, uv, 24:19298(R) (COO-1704-15)
radioinduced degradation of, in L cells of mice, effects of post-treatment with iodoacetamide on x, 23:45651
radioinduced degradation of, in L cells, in relation to repair processes, 24:594
radioinduced degradation of, in mammalian cells in relation to dose, tritium tracer study of x, 23:20376
radioinduced degradation of, in Micrococcus radiodurans, combined effects of chloramphenicol on x, 25:4536
radioinduced degradation of, in Micrococcus radiodurans, protective effects of cysteamine against x, 25:4536
radioinduced degradation of, in Micrococcus radiodurans and murine lymphoma cells, effects of dose, oxygen content, and temperature on repair of x, 25:4536
radioinduced degradation of, in microorganisms, role of DNA polymerase in γ, uv, or x, 24:48400
radioinduced degradation of, in mutant of Escherichia coli, mechanisms for uv, 22:49268
radioinduced degradation of, in relation to radiosensitivity of Escherichia coli, γ, 23:20121
radioinduced degradation of, in solutions, mechanisms for γ, 24:50720
radioinduced degradation of, in uv-radiosensitive mutants of Escherichia coli, 22:40628
radioinduced degradation of, of Micrococcus radiodurans, effects of actinomycin, anoxia, and chloramphenicol on x, 24:34110
radioinduced degradation of, of mutants of Escherichia coli, uv, 24:34094
radioinduced degradation of, protective effects of chemical agents against γ, 21:36509
radioinduced degradation of, protective effects of chemical agents against γ, 22:2525
radioinduced degradation of, uv, 25:26657
radioinduced delay in post-fertilization synthesis of, in sea urchin embryos following egg exposure, 24:41954
radioinduced delay in replication of Escherichia coli, effects of dose on uv, 25:42290
radioinduced deletions in, of Bufo blood lymphocytes, effects of dose on, 25:6684
radioinduced denaturation of, for use in infecting spheroplasts of Pseudomonas, γ, 25:42273
radioinduced denaturation of, from hydras and sponges, effects of, on uv absorption curves, x, 22:51407
radioinduced depression of synthesis of, in regenerating rat liver, dosimetric factors affecting x, 21:8696
radioinduced destruction of, effects of chloride ions on γ, 25:49099 (UCLA-12-815, pp 1-36)
radioinduced dimerization of cytosine and thymine in, uv, 23:50339
radioinduced dimerization of pyrimidine from, effects of copper on uv, 24:23115
radioinduced dimerization of pyrimidines in, of Paramecium, photoreactivation of uv, 22:8445
radioinduced dimerization of thymine in, of skin cells, uv, 23:50341
radioinduced dimerization of, effects of bacteriophage T2 and uv-radiosensitive mutants of T4 on repair of uv, 24:14422
radioinduced dimerization of, from bacteriophage T4, effects of extracts from T4-infected Escherichia coli on in vitro repair of uv, 24:14429
radioinduced dimers in lambda phage, protective effects of cysteamine against uv, 23:38622
radioinduced dimers in thymine of, structure of uv, 22:36216
radioinduced dimers in, of 5-bromouracil-substituted lambda bacteriophage, protective effects of cysteamine against uv, 23:38623
radioinduced dimers in, of 5-bromouracil-substituted lambda phage, protective effects of cysteamine against uv, 23:38624
radioinduced double and single breaks and cross links in, of bacteriophage T1, γ, 24:41768
radioinduced double and single strand breaks in Bacillus subtilis, viscometric studies on x, 25:29464
radioinduced double cleavage of, in coliphage lambda, role of hydrodynamic shear in mechanism of, 24:50697
radioinduced double strand breakage in, of mammalian cells, existence of strand rejoining mechanism for cellular repair following γ, 25:8605(R) (ORO-2832-85)
radioinduced double strand breaks in bacterial, repair mechanisms of alpha, 25:24480
radioinduced double strand scissions in isolated mammalian, indirect mechanism for γ, 25:8605(R) (ORO-2832-85)
radioinduced double-strand breaks in, effects of, on cell survival, 25:6639(R) (YALE-2653-42)
radioinduced double-strand breaks in, of Bacillus subtilis, electron microscopy of, 23:50333(R) (YALE-2653-34)
radioinduced double-strand scissions in, of T4 phage, phosphorus-32 β, 24:34045
radioinduced electric conductivity in films of, x, 25:16036
radioinduced ESR signals in 5-bromouracil-substituted, of Bacillus subtilis, effects of wavelength on uv, 23:45668
radioinduced excision of pyrimidine dimers from xeroderma pigmentosum cell, effects of dose on uv, 25:46709 (UCSF-10-P-2-136)
radioinduced excisions in, of Escherichia coli, saturation of dark repair enzyme system for uv, 23:38473

radioinduced excited states in, ESR spectra of uv, 22:12823
radioinduced formation of cyclobutyl dimers and thymine photoproducts in, uv, 22:23409(R) (NYO-2798-32)
radioinduced formation of radicals in, effects of physical state on, 22:47480
radioinduced formation of thymine dimers in, effects of drying on uv, 22:23398 (IA-1128, pp 147-55)
radioinduced formation of thymine dimers in, transfer of, under repair conditions, uv, 23:2788
radioinduced formation of thymine photoproducts in, uv, 22:23409(R) (NYO-2798-32)
radioinduced formation of thymine products in, mechanism for uv, 22:25715(R) (NYO-1371-51)
radioinduced formation of thymine radicals in, protective effects of cystamine against γ and uv, 23:2765
radioinduced formation of trans-synthymine dimers in, identification and photoreactivation of uv, 22:47464
radioinduced fractionation of, in solutions, protective effects of propylgallate against x, 21:12946
radioinduced free radical damage of, effects of 5-bromouracil and n-ethylmaleimide and sulfhydryl compounds on, 24:50709 (UCLA-12-789)
radioinduced free radical formation in, ESR studies of, 23:35652
radioinduced free radical formation in, of bacteriophage phi X 174, effects of pH on protective effects of cysteamine against cobalt-60 γ, 22:25782
radioinduced free radicals in aqueous solutions of, reactions of, with triacetoneamine-N-oxyl, 25:4541
radioinduced free radicals in constituents of, uv, 22:43256
radioinduced free radicals in thymidine moiety of, γ and x, 21:41365
radioinduced free radicals in, EPR of γ and x, 21:20051
radioinduced free radicals in, use of tritium-labeled hydrogen iodide and hydrogen sulfide to label, γ, 22:25759
radioinduced hybridization of, in vitro neutron and tritium β, 23:2766
radioinduced hybridization of, with messenger RNA, x, 21:16278
radioinduced hydrogen transfer in dry salmon sperm, effects of temperature and scavengers on yields from γ, 25:41837
radioinduced inactivation of bacteriophage, fast proton, 25:16387
radioinduced inactivation of genetic markers in, of Bacillus subtilis, uv, 23:38526
radioinduced inactivation of infectious, low-energy proton, 25:21589
radioinduced inactivation of molecules of, indirect, 21:28360
radioinduced inactivation of phage, effects of wavelength on uv, 22:21420
radioinduced inactivation of phage, uv, 21:1711
radioinduced inactivation of replication of, in Escherichia coli, role of dimer excision in uv, 24:36698(R) (NYO-3893-15)
radioinduced inactivation of transformation-active, from streptomycin-resistant Streptococcus challis, protection against γ, 21:36515
radioinduced inactivation of transforming bacteria, mechanism of x, 25:35269
radioinduced inactivation of transforming, in Haemophilus influenzae, shape of curves for uv, 22:43490
radioinduced inactivation of transforming, in mutants of Bacillus subtilis, uv, 23:26696
radioinduced inactivation of transforming, in mutants of Bacillus subtilis, repair of, by photoreactivating enzymes, uv, 24:31858
radioinduced inactivation of transforming, of Haemophilus influenzae, indonuclease reactivation of uv, 24:27548
radioinduced inactivation of transforming, of Rhizobium bacteriophage, effects of frequency on reversal of uv, 22:4580
radioinduced inactivation of transforming, recovery mechanisms for uv, 24:50742
radioinduced inactivation of transforming, tritium β, 22:47463
radioinduced inactivation of transforming, uv, 21:14605
radioinduced inactivation of virus, uv, 25:26691
radioinduced inactivation of, effects of cytosine dimers on, uv, 21:16277
radioinduced inactivation of, from coliphage T1, host cell reactivation of uv, 25:32630
radioinduced inactivation of, in bacteriophage phi X 174, γ and uv, 23:43703
radioinduced inactivation of, in bacteriophages, 21:13074 (UCRL-16898, pp 117-22)
radioinduced inactivation of, in Tetrahymena, photoreactivation of uv, 23:35657
radioinduced inactivation of, in tobacco mosaic virus, uv, 21:14605
radioinduced inactivation of, in viruses, photoreactivation of uv, 21:22802(R) (UCB-34-P-116-2)
radioinduced inactivation of, role of strand scission in, 22:45463
radioinduced incorporation of precursors by, repair of uv, 24:41757
radioinduced increase in heat lability of calf thymus, 21:17978
radioinduced inhibition of phosphorus-32 uptake by, of rat thymus, ionizing, 22:45447
radioinduced inhibition of synthesis of, 23:20087
radioinduced inhibition of synthesis of cultured mammalian cell, role of pyrimidine dimers in uv, 25:49114
radioinduced inhibition of synthesis of, analysis of viral induced DNA synthesis in cells following x, 25:26691
radioinduced inhibition of synthesis of, effects of, on mitotic cycle of mammalian cells, uv, 22:30988
radioinduced inhibition of synthesis of, in cell nuclei, 21:36745
radioinduced inhibition of synthesis of, in cultured HeLa and human amnion cells, photoreactivation of uv, 25:13377
radioinduced inhibition of synthesis of, in embryonal systems of rats, whole-body x, 23:50850
radioinduced inhibition of synthesis of, in embryonic rat brains, whole-body x, 24:11944
radioinduced inhibition of synthesis of, in epithelium of small intestine in rats, x, 24:34689
radioinduced inhibition of synthesis of, in Escherichia coli, effects of, on cell division, 22:36188
radioinduced inhibition of synthesis of, in intestine tissue cultures from chicken embryos, protective effects of cysteamine against x, 24:12106
radioinduced inhibition of synthesis of, in intestine tissue cultures from chicken embryos, effects of RNA on repair of x, 24:12106
radioinduced inhibition of synthesis of, in oncogenic viruses, γ and uv, 21:36773
radioinduced inhibition of synthesis of, in regenerating liver of rats, mechanisms of x, 23:26686 (NP-17819, Chap.3.3)
radioinduced inhibition of synthesis of, in uv-irradiated HeLa cells, x, 22:43209 (UCSF-10-P-2-39, pp 2-51)
radioinduced inhibition of synthesis of, in Yoshida sarcoma of rats, sensitizing effects of ametohepazon on, 23:16336
radioinduced injuries to fungal, correlation between repair and recombination, 21:22395
radioinduced injuries to, of mutant cells of Escherichia coli, method for measuring uv, 24:19375
radioinduced injury reversion in, 21:22394
radioinduced injury to, photoreactivation of, by enzyme from blue-green alga, uv, 24:14414(R) (ORO-3630-8)
radioinduced lability of, molecules, x, 21:372
radioinduced lesions in phage, repair of uv, 24:50764
radioinduced lesions in transforming, repair of, by photoreactivating enzymes, 23:20131
radioinduced lesions in, mechanism of recovery and repair following uv, 23:20079 (BNL-50058, pp 1-16)
radioinduced lesions in, of cultured mammalian cells, repair of uv and x, 25:6656
radioinduced lesions in, of epidermal cells of mice, use of immunofluorescence techniques to demonstrate whole-body uv, 23:33631
radioinduced lesions in, of Escherichia coli, 21:11138(R) (NYO-3116-4)
radioinduced lesions in, of Escherichia coli, effects of photoenzymatic repair inhibition by caffeine of uv, 25:8649
radioinduced lesions in, of Escherichia coli, effects of phenotype on excision repair of uv, 23:20147 (BNL-50058, pp 17-55)
radioinduced lesions in, of Serratia marcescens, uv and visible light, 22:51554
radioinduced lesions in, repair mechanisms following uv and x, 24:34784
radioinduced lesions in, role of photoreactivation in repair of, 25:21807
radioinduced lesions of, effects of, on genetics of uv and x, 23:43690
radioinduced lesions of, in Escherichia coli and T1 bacteriophage, repair of, by photoreactivating enzymes, uv, 23:20130
radioinduced lesions of, in Haemophilus, effects of temperature on photoenzymatic repair of uv, 23:38476
radioinduced lesions of, relation of mutation and recombination to repair mechanisms following β, uv, and x, 23:50334
radioinduced linkage of, to 3,4-benzpyrene, x, 22:25716(R) (NYO-3538-7)
radioinduced low molecular weight, in bacteria in relation to radiosensitivity, x, 22:45410
radioinduced luminescence in solutions of, 23:33625(T) (AD-843709)
radioinduced luminescence in, mechanisms for uv, 22:49199
radioinduced lysis of, effects of, on efficiency of radiovaccination, 21:45768
radioinduced mutagenicity of fish sperm, in Drosophila melanogaster, 21:26372
radioinduced mutation of single- and double-stranded, calculation of, 22:36225
radioinduced mutations affecting repair mechanisms of, in Escherichia coli, effects of low temperature on uv, 22:483
radioinduced mutations for loss of ability to repair lesions in, in Salmonella typhimurium, location of uv, 23:45713
radioinduced mutations in, of phages T2 and lambda, role of cleavage in γ, 24:50831
radioinduced mutations of, in silkworms, base-analogue enhancement of, 24:666
radioinduced photochemical lesions in, of lambda phage, determination of, using electron microscopy, uv, 22:40560
radioinduced photochemical reactions of, with cysteine in Escherichia coli, uv, 23:31647
radioinduced photoproducts in, of Escherichia coli, uv, 25:8633 (NP-18483)
radioinduced photoproducts of thymine in, of Escherichia coli, effects of low temperature on uv, 22:51447
radioinduced photoreaction between 8-methylpsoralen and, 23:49868
radioinduced production of atomic hydrogen in, of bacteriophage, γ, 22:45415
radioinduced production of single-strand breaks of, in Escherichia coli, relation of, to survival, x, 22:49231
radioinduced pyrimidine dimers in Bacillus subtilis, use of endonuclease from Micrococcus lysodeikticus for recognition of uv, 25:42285
radioinduced pyrimidine dimers in lambda phage, effects of Escherichia coli genotype on repair of uv, 24:6153
radioinduced pyrimidine dimers in, of cells of Chinese hamster culture, mechanism of excision of uv, 21:34620
radioinduced pyrimidine dimers in, of cultured human cells, loss of uv, 22:51957
radioinduced pyrimidine dimers in, of cultured plant cells photoreactivation of uv, 23:29344(R) (COO-1704-6)
radioinduced pyrimidine dimers in, of Escherichia coli, recombinational repair of, 24:34260
radioinduced pyrimidine dimers in, of Escherichia coli in relation to mutagenesis, uv, 22:23457
radioinduced pyrimidine dimers in, of Paramecium aurelia, effects of, on mutagenesis, 21:45505 (TID-24056)
radioinduced random breaks in, by γ irradiation of bacteriophage, method of calculating, 24:4334
radioinduced reactions with benzo[a]pyrene, comparison of products of chemically and photoinduced reactions with those from x, 25:142 (TID-25513)
radioinduced reduction in rate of synthesis of, in cells, 21:30785
radioinduced repair synthesis in, effects of inhibitors of DNA, protein, and RNA synthesis on uv and x, 24:50707(R) (COO-1747-3)
radioinduced replication for, in chromosome of Escherichia coli, uv and x, 23:24595
radioinduced replication of, in Escherichia coli mutant, effects of temperature on γ, 22:23455
radioinduced scission in, of Escherichia coli, protective effects of cysteamine against x, 22:25780
radioinduced scission of, of hamster chromosomes, protective effects of cystamine against γ, 23:17930
radioinduced scissions in, of Escherichia coli, effects of purine or thymidine starvation on x, 22:25780
radioinduced single and double breaks in, of mammalian cells, effects of hydrated electrons, hydroxyl radicals, and hydrogen atoms on x, 25:16217 (UR-49-1389)
radioinduced single and double strand breaks in bacteria, γ, 25:35268
radioinduced single breaks in calf thymus, determination of terminal groups following γ, 24:50716
radioinduced single cleavages in, of rat thymus and liver, γ, 23:24514
radioinduced single strand breaks in bacteria, effects of dose rate, oxygen, and temperature on x, 25:26655
radioinduced single strand breaks in bacterial, effects of chloride ions on gamma, 25:24476
radioinduced single strand breaks in cultured mammalian cell, protective effects of cystamine or cysteamine against x, 25:42522
radioinduced single strand breaks in Ehrlich ascites cell, hamster lung cell, L cell, and porcine kidney cell, mechanisms of repair in x, 25:26953
radioinduced single strand breaks in mammalian cell, relation of repair replication to rejoining of x, 25:37734 (UCSF-10-P-2-133)
radioinduced single strand breaks in mouse L cell, effects of metabolic inhibitors on repair of x, 25:35224
radioinduced single strand breaks in murine lymphoma cell, effects of cystamine, cysteamine, and temperature on, 25:32589
radioinduced single strand breaks in Salmonella typhimurium, effectiveness of repair following x, 25:32627
radioinduced single strand breaks in, of Escherichia coli, protective effects of MEA against, 23:41245
radioinduced single strand breaks in, of Escherichia coli, effects of T4 endonuclease on uv, 25:13411
radioinduced single strand breaks in, of Escherichia coli, effects of temperature on x, 25:11007 (BNL-50203, pp 1-13)
radioinduced single- and double-strand breaks in phi X-174 replicative form of, effects of LET on, 25:57952 (LBL-28)
radioinduced single-chain breaks in Escherichia coli, effects of culture medium on repair of x, 25:18912
radioinduced single-strand breaks in Chlorella, effects of cell phase on repair of γ, 25:52253 (A/CONF.49/P-213)
radioinduced single-strand breaks in double-stranded circular, effects of dose on, 25:55133
radioinduced single-strand breaks in Escherichia coli mutant, role of DNA polymerase in repair of x, 25:42326
radioinduced single-strand breaks in Escherichia coli mutant, repair of uv and x, 25:42331
radioinduced single-strand breaks in Escherichia coli, effects of iodoacetamide and potassium iodide on repair of x, 25:46719
radioinduced single-strand breaks in Escherichia coli, relation between repair and lethality in x, 25:42357
radioinduced single-strand breaks in human lymphocyte, kinetics of repair of electron, 25:57958
radioinduced single-strand breaks in radiosensitive Escherichia coli B mutant R 15, x, 25:52024
radioinduced single-strand breaks in, effects of hydroxyurea on x, 25:46718
radioinduced single-strand breaks in, of cultured mammalian cells, mechanism for rejoining of x, 24:14423
radioinduced single-strand breaks in, of cultured hamster cells, rejoining of γ, 23:20132
radioinduced single-strand breaks in, of Escherichia coli, effects of glucose on repair of x, 24:32280
radioinduced single-strand breaks in, of P388 F cells, effects of dose rate on electron, 25:11028
radioinduced single-strand breaks in, of parental and DNA polymerase-deficient mutant strains of Escherichia coli, uv and x, 25:47058
radioinduced single-strand breaks in, of T cells, effects of cell phase on rejoining of x, 23:50343
radioinduced single-strand breaks in, protective effects of cystamine and cysteamine against, 25:6712
radioinduced single-strand breaks in, transforming activity in pneumococcus following, 25:47062
radioinduced single-strand breaks in, uv, 25:6639(R) (YALE-2653-42)
radioinduced single-strand breaks in, yield of uv, 23:29344(R) (COO-1704-6)

radioinduced single-strand breaks of, in dilute solutions, method for detection of, γ, 22:36187
radioinduced single-stranded breaks in, of rec and uvr mutants of Escherichia coli, repair of x, 24:41758
radioinduced strand breakage of, in Bacillus subtilis cells and spores, electron, 24:46587
radioinduced strand breaks in bacteriophage, effects of LET on charged particle, 25:16043
radioinduced strand breaks in phage, accelerated argon and carbon ion, 23:35655
radioinduced strand breaks in, comparison of RBE of β particles, charged particles, protons, and x radiation for, 25:6634 (CONF-691106-, pp 153-72)
radioinduced strand breaks in, effects of oxygen enhancement ratio on, 22:51396
radioinduced strand breaks in, in Escherichia coli, protective effects of Polysorbate 80 against cobalt-60 γ, 25:19027
radioinduced strand breaks in, in vitro, effects of MEA on frequency of x, 25:4456(R) (ORO-3596-15)
radioinduced strand breaks in, of Escherichia coli, protective effects of glycerol, 1,2,3-indantrione, methyl sulfoxide, N-ethyl malemide, and thiourea against electron, 25:4551
radioinduced strand breaks in, regeneration by polynucleotide ligases in vitro following γ, 25:42268
radioinduced strand breaks of Micrococcus radiodurans (bacteria), high-energy alpha and γ, 25:24473
radioinduced strand breaks of, in bacteria and bacteriophages, effects of triacetoneamine N-oxyl on x, 25:4550
radioinduced strand breaks of, in cultured mammalian cells, mechanisms for repair of x, 25:24050
radioinduced strand breaks of, in Escherichia coli, repair mechanisms for uv, 25:34079(R) (NP-18683)
radioinduced strand separation in, in vitro, x, 24:44441
radioinduced structural defects in, conference on, 21:24367
radioinduced synthesis in polytene chromosomes of Drosophila, uv and x, 25:57951 (COO-1747-6)
radioinduced synthesis of, in chromosomes of Drosophila, x, 23:6344 (COO-1747-1)
radioinduced synthesis of, in cultured human lymphocytes, kinetics of ionizing, 24:7737
radioinduced synthesis of, in fern spores, effects of dose fractionation on x, 25:8614
radioinduced synthesis of, in HeLa cells, tritium tracer study of x, 24:11952
radioinduced synthesis of, in human lymphocytes, effects of anoxia and phytohemagglutinin on electron and x, 23:41246
radioinduced thymine dimerization in, effects of molecular weight on uv, 21:39329
radioinduced thymine dimerization in, from calf thymus, uv, 21:17984
radioinduced thymine dimers in, from Micrococcus luteus, effects of endonuclease and exonuclease on repair of uv, 23:38469
radioinduced transfer of free radicals from, to cysteamine in DNA-cysteamine system, effects of cysteamine content, pH, and pyrimidine content of DNA on x, 24:46580
radioinduced unscheduled synthesis of, in mammalian cells, effects of dinitrophenol and puromycin on uv and x, 25:27002
radioinduced variation in photochemical reactivity of thymine of, in Bacillus subtilis spores, uv, 21:28697
radiolysis in 3-methylpentane glass at 77°K, luminescence studies on γ, 22:35831 (PRNC-116)
radiolysis in human amnion cells, x, 22:49212
radiolysis in small intestine of mice, 22:12906
radiolysis of, 25:20998 (RISO-M-1332)
radiolysis of 5-bromouracil-substituted, mechanism of uv, 25:46710(R) (YALE-2653-45)
radiolysis of 5-bromouracil-substituted, pulse, 23:47954 (UCLA-12-724, pp 71-87)
radiolysis of actively synthesizing, in Escherichia coli, fast proton, 22:40598
radiolysis of aqueous solutions of calf thymus, effects of l-histidine on products formed by x, 24:25394
radiolysis of aqueous solutions of, effects of chloride ion on, 22:25723 (UCLA-12-668, pp 71-84)
radiolysis of aqueous solutions of, effects of chloride ions on γ, 24:29309 (UCLA-12-775)
radiolysis of aqueous solutions of, EPR studies on protective effects of propyl gallate on mechanisms of, 23:2348
radiolysis of aqueous solutions of, kinetics of free radical reactions with oxygen following pulsed, 24:44422
radiolysis of aqueous solutions of, mechanisms of pulsed-electron, 23:9420(R) (GA-8872)
radiolysis of aqueous solutions of, protective effects of propyl gallate against, 23:9430
radiolysis of aqueous solutions of, protective effects of phenylalanine against γ, 23:8047
radiolysis of aqueous solutions of, yields of hydrogen from γ, 22:47167
radiolysis of bacterial, in Bacillus subtilis, combined effects of actinomycin D on γ, 22:40591
radiolysis of bacterial, repair of x, 22:28288 (ORNL-4100, pp 166-77)
radiolysis of bacteriophage, protective effects of glycerol against x, 24:2567(R) (NYO-3797-7)
radiolysis of calf thymus, effects of solvents on cobalt-60 γ, 24:585 (N-69-31619)
radiolysis of chilled aqueous solutions of, thermal properties of radicals from, 23:11548
radiolysis of DNA from bacteriophage T4, genetic control of endonucleolytic cleavage following uv, 24:7730
radiolysis of Escherichia coli, effects of enzyme activity on ionizing, 23:6401
radiolysis of Escherichia coli, in comparison to radiolysis of bromouracil-substituted DNA, 23:41232 (UCLA-12-737)
radiolysis of frozen aqueous solutions of, ESR spectral studies on free radicals produced by γ, 25:34654
radiolysis of frozen aqueous solutions of, in relation to protonation of thymidine anions, 24:39426(R) (AI-AEC-12974)
radiolysis of labeled, in Escherichia coli, protective effects of chemical compounds against electron, 24:16992
radiolysis of nucleosides of, γ, 24:233
radiolysis of solid, effects of electron dislocation and molecular weight on resistance to, 25:54636
radiolysis of solutions of, protective effects of dopamine against x, 23:6555
radiolysis of thymus, optical absorption spectra of transients from electron pulse, 23:15890
radiolysis of, absorption spectra of free radicals formed by pulse, 25:49099 (UCLA-12-815, pp 1-36)
radiolysis of, characterization of thymine-derived products from uv, 21:30772
radiolysis of, chemical study of γ, 22:47456
radiolysis of, effects of bromouracil substitution on, 24:41773
radiolysis of, effects of chloride ions on, 23:9844 (UCLA-12-686, pp 67-84)
radiolysis of, effects of nucleotide sequence on γ, 22:12801
radiolysis of, effects of radiation dose on formation of free radicals in low-temperature electron, 23:9486
radiolysis of, ESR spectral studies on effects of N-ethylmaleimide on free radical yields from x, 25:44789
radiolysis of, excited states and transient species in, 22:2099(R) (TID-24136)
radiolysis of, in aqueous solutions, γ, 25:4459 (UCLA-12-782, pp 23-47)
radiolysis of, mechanism of x, 24:20791(R) (NYO-4106-1)
radiolysis of, pulse, 23:47954 (UCLA-12-724, pp 71-87)
radiolysis of, reactions of free electrons in, 23:21727 (AI-AEC-12744, pp 179-82)
radiolysis of, reactions of hydroxyl radical in electron pulse, 23:47527
radioprotective effects in bacteria, uv, 25:27122
radioprotective effects of highly polymerized, on survival of in vitro x-irradiated rat thymocytes, 21:24459
radioprotective effects of homologous, in Escherichia coli, 21:18032
radioprotective effects of injected heterogeneous, in mice and rats, x, 21:45732
radioprotective effects of injections of heterologous, on rats, γ, 22:36328
radioprotective effects of injections of marrow, on life spans and mortality in mice, 21:4833
radioprotective effects of solution content of, against γ-induced single strand breaks, in DNA, 22:36187
radioprotective effects of transforming, on Bacillus subtilis, x, 23:2989
radioprotective effects of, against chromosome aberrations in calf liver cells, x, 22:36327
radioprotective effects of, against human chromosome aberrations, x, 24:31920
radioprotective effects of, against lethal doses, review of, 23:12133(T) (AEC-tr-6646/4A, pp 91-6)
radioprotective effects of, in combination with other protectants on mice, spleen weight method for testing, 25:13478
radioprotective effects of, in rat liver and rats, cobalt-60 γ, 23:14231
radioprotective effects of, on blood cell count and survival of rabbits, γ, 24:32046
radioprotective effects of, on chromosomes of medullary cells of man, 24:747
radioprotective effects of, on chromosomes of rats, x, 23:12047(T) (AEC-tr-6646/4A, pp 115-19)
radioprotective effects of, on Clostridium botulinum toxins, γ, 24:48764
radioprotective effects of, on hematopoiesis in mice, x, 23:12137(T) (AEC-tr-6646/4A, pp 121-5)
radioprotective effects of, on liver of rats, γ, 22:10783
radioprotective effects of, on lymph system in rats, γ, 22:51867
radioprotective effects of, on mice and rats, effects of age on x, 23:12191(T) (AEC-tr-6646/4A, pp 97-102)
radioprotective effects of, on mitosis of L cells, γ, 23:12140(T) (AEC-tr-6646/4A, pp 151-4)
radioprotective effects of, on rats, effects of molecular weight on γ, 23:12134(T) (AEC-tr-6646/4A, pp 103-6)
radioprotective effects of, on rats, γ, 22:6849
radioprotective effects of, on rats, γ, 23:12136(T) (AEC-tr-6646/4A, pp 111-13)
radioprotective effects of, on rats, γ and x, 23:12135(T) (AEC-tr-6646/4A, pp 107-10)
radioprotective effects of, on reproduction of male rats, x, 23:12138(T) (AEC-tr-6646/4A, pp 127-32)
radioprotective effects of, on RNA metabolism in testis of rats, x, 23:11939(T) (AEC-tr-6646/4A, pp 159-63)
radioprotective effects of, on seminiferous epithelium of rats, x, 23:12139(T) (AEC-tr-6646/4A, pp 133-7)
radioprotective effects of, on transfecting and transforming activity of bacteriophage phi 29, γ, 22:432
radioprotective effects on blood of rats, fast neutron, 25:24206
radioprotective effects on chromosomes of tumor cells, γ, 25:52106 (A/CONF.49/P-257)
radioprotective effects on, on peas, fast neutron, 24:6140
radiosensitivity in cultured Escherichia coli, x, 23:2985
radiosensitivity in vivo and in vitro, comparison of, 25:10966
radiosensitivity of bacteriophage, in aqueous solution, mechanisms for x, 21:24332
radiosensitivity of BUdR-labeled, in Bacillus subtilis, uv and x, 21:24689
radiosensitivity of Escherichia coli, effects of amino acid starvation during synthesis on uv, 25:47059
radiosensitivity of highly polymerized rat, effects of DNAase on, 21:34595
radiosensitivity of mammalian, during synthesis, uv, 21:36494
radiosensitivity of novobiocin resistance marker in Hemophilus influenzae, effects of genetic mismatch and target size on uv, 25:52037
radiosensitivity of pure, comparison of x, with radiosensitivity of nucleohistones, 21:22232 (BMwF-FBK-66-36)
radiosensitivity of sedimentation rate of, in Bacillus subtilis, effects of dose on x, 25:10960 (BNL-50203, pp 82-90)
radiosensitivity of, effects of repair processes on x, 24:11961
radiosensitivity of, effects of temperature on x, 23:48288
radiosensitivity of, in Lens esculentum seed incubated in uridylic acid, γ, 21:10768
reaction sites of, for furocoumarin photoreaction, 22:25917
reaction with OH free radicals, determination by pulse radiolysis, 23:26687 (UCLA-12-706, pp 45-72)
reactions of irradiated dry, with tritiated hydrogen iodide or hydrogen sulfide, yields of tritium-labeled products from, 23:47524
reactions of, with proteins in uv-irradiated E. coli correlated with temperature, 21:14586
reactions of, with xylohydroquinone, 21:20431
reactions with 5-hydroxybenzo[a]pyrene, kinetics of, 25:142 (TID-25513)
reactions with atomic hydrogen, effects of temperature on, 23:11941 (AI-AEC-12721, pp 357-61)
reactions with benzopyrene, iodine-induced, 23:6094 (NYO-3538-11)
reactions with Daunomycin, 22:14906 (BNL-50057, pp 123-37)
reactions with hydrogen atoms, 23:21727 (AI-AEC-12744, pp 179-82)
reactions with hydrogen atoms, 23:50331 (AI-AEC-Memo-12861)
reactions with hydrogen, ESR spectra of, 22:27396(R) (AI-AEC-12638)
reactions with hydroxide radicals, rate constant for, 22:2167
reactions with hydroxyl radical, determination of, by pulse radiolysis, 22:25723 (UCLA-12-668, pp 71-84)
reactions with hydroxyl radicals, determination of, by pulse radiolysis, 22:49202
recombination with bacterial chromosomes, Salmonella typhimurium, 23:2993
recovery from methyl methanesulfonate-induced damage, 21:18011
recovery from uv-induced damage, 21:18011
REE of various radiations on phage, within host bacterium, 21:11139(R) (ORO-2832-47)
rejoining of broken pieces of, following x irradiation, 21:12797
relation of time of synthesis of, to radioinduced chromosome aberrations, 21:16313
release by DNP in spleen and thymus and x-irradiated mice, 21:20040
repair in bacteria, 24:39450(R) (AECL-3451)
repair in irradiated bacteria in relation to chromosome recovery, 25:57970
repair mechanism of molecules of, in bacteriophage, 21:8675 (ORNL-3999, pp 134-9)
repair mechanism of, in Micrococcus radiodurans, effects of N-methyl-N'-nitro-N-nitrosoguanidine and combined effects of radiation on, 22:49309
repair of bacterial, research on, at CRNL during 1969, 24:39425(R) (AECL-3565)
repair of damaged bacterial, during replication, 21:22392
repair of radiation damaged Escherichia coli, 21:22397
repair of uv- and x-irradiated, mechanisms for, 21:24372
repair of uv-damaged, in vivo, 21:10727(R) (SU-326-P-7-17)
repair replication in uv-irradiated human xeroderma pigmentosum cells, 25:26634
repair replication of uv-irradiated cultured leukemic and normal leukocytes, tritium tracer study of, 23:35842
repair replication of, in uv-irradiated Escherichia coli, 25:11008 (BNL-50203, pp 14-26)
repair replication of, in uv-irradiated Escherichia coli, effects of nitrogen mustard on mode of, 23:48270
repair synthesis of, genetic analysis of uv and x-radiosensitive mutants of Escherichia coli defective in, 25:13428
replication cycle in Escherichia coli in relation to excision repair system, genetic analysis of role of, in uv and x-radiosensitivity, 24:42041
replication during infection of Escherichia coli by bacteriophage T4 in relation to phosphorus-32 suicide stabilization, 24:34044
replication during S phase in cells of Physarum polycephalum, use of cycloheximide for sequential initiation of, 23:2740(R) (COO-78-174)
replication in Bacillus subtilis, effects of amino acid starvation on, 25:37899 (ANL-7770, pp 118-30)
replication in Bacillus subtilis, effects of chemicals on initiation of, 23:48264
replication in bacteria, fungi, and virus, 23:16274
replication in bacteriophage T4 and Escherichia coli, 24:7385(R) (NYO-910-126)
replication in bacteriophage T4, preparation of tritium-labeled thymidine for studies of, 25:26570
replication in lambda phage, mechanism of, 23:47917
replication in mitochondria of Saccharomyces cerevisiae, 24:42031
replication in phage T4 infecting cells, 24:51114
replication in Physarum polycephalum in relation to radiosensitivity, 24:39586 (COO-78-228)
replication in Physarum polycephalum, biochemical analysis of, 22:25713 (COO-78-163, pp 64-125)
replication in thymus and γ-radioinduced thymomas in mice, tracer study, 25:4460
replication in uv-irradiated Escherichia coli, mechanism of, 23:48269
replication in uv-radioinduced mutants of Escherichia coli, role of polynucleotide ligase in, 23:48271
replication in uv-radiosensitive mutants of Escherichia coli, effects of temperature on, 24:14467

replication of bacterial, following actions of methylmethanesulfonate, mitomycin C, nitrogen mustard, and nitrosoguanidine, combined label method for in vivo demonstration of repair, 24:48754
replication of cytoplasmic and nuclear viral, in chick embryo fibroblasts, following infection with γ-irradiated FV3 virus, 25:6653
replication of individual strands of, in cells of Physarum polycephalum, tracer study of polarity of, 23:2740(R) (COO-78-174)
replication of, during transfer of F'Lac by Escherichia coli during conjugation, 21:13075 (UCRL-16898, pp 123-7)
rescue from uv-irradiated T_4 phage, effects of dose on, 23:48268
role in enzymatic repair following irradiation, 23:20317 (CEA-R-3676)
role in genetic transformation of bacteria, 22:39951 (BNL-50101)
role in radiation mutagenesis in Drosophila melanogaster, 21:24534
role in radiobiological phenomena, molecular mechanisms in, 25:35101
role in x-radioinduced protrophic yeast mutants, 25: 13425
role of cross links of, in inactivation of bacteriophage lambda, F' episomes, and Escherichia coli by combined psoralen and uv radiation, 25:55361
role of tritium-labeled, in radioinduced death of mammalian cells, 25:58086
sedimentation analysis of tritium-labeled, from Escherichia coli, 24:11931 (ORO-2832-79, pp 42-4)
sedimentation coefficient of, in deuterium oxide, determination of, 22:28274 (ANL-7278, pp 250-82)
separation from barley embryos, 25:6674(R) (RLO-2221-T-2-5)
separation from mixed tRNA feed by isopropanol precipitation, 22:27864 (ORNL-4204, pp 16-21)
separation from other cell fractions using zonal centrifuge, 23:22189(R) (ORNL-4273(Summ.))
separation of fractions of, from marrow of irradiated rabbits, 21:34610
separation of pyrimidine nucleotide blocks in, method for, using chromatography and electrophoresis, 23: 45655
sequence determination using electron microscopy, feasibility of, 25:53752(R) (ORNL-4659)
size of mitochondrial, from different organisms and different tissues of same organism, constancy of, 23: 8016(R) (ACRH-29)
sodium salt, radiolysis of aqueous solutions of, ultrasonic absorption studies on γ, 25:2285
sorption of tritium-labeled, by mouse fibroblast cells, 21: 20026(R) (EUR-2765.f)
specific activity of, in mammary glands of rats, effects of estrus cycle on, 24:41720 (ANL-7635, pp 115-53)
stability during alcohol extraction, effects of uranyl acetates on, 22:49255
stability in radioresistant and radiosensitive yeasts, 25: 52258
stability of double helix of, factors affecting, 21:22477 (BNL-994, pp 124-39)
stability of T7 bacteriophage, in concentrated potassium trifluoroacetate solutions, equation for measuring, 23: 9361 (UCRL-18216, pp 45-80)
stability of, in uv-irradiated E. coli, 21:6729
stability to thermal denaturing in vitro, effects of bis-(2-aminopropyl) disulfide and cysteamine on, 25:49217
staining of sea urchin egg, evaluation of methods for, 22:25712 (COO-78-163, pp 39-63)
strand break repair in human, 5-bromodeoxyuridine photolysis mechanisms for, 25:60268 (CONF-711014-1)
strand breaks induced in, of Ehrlich ascites tumor cells by methyl hydrazide, 25:4567
structural changes in, conference on, 21:24367
structure in animal and bacterial viruses, relation between function and, 22:40615(R) (EUR-3889)
structure in bacteria, effects of nitrogen mustard on, 21: 13073 (UCRL-16898, pp 97-116)
structure in E. coli, effects of tritium decay on, 21: 20025(R) (COO-1603-1)
structure in pneumococci, repair of effects of mitomycin C on, 22:28353
structure in viruses, effects of mercury on, 23:31266 (UCRL-50629)
structure of microorganism, conference on repair of defects in, 22:40582
structure of yeast, effects of, on uv- or x-radiosensitivity, 22:31292
structure of, effects of chemical modification on macromolecular, 24:13670(R) (CU-3957-6)
structure of, effects of chemical modifications on macromolecular, 25:18279 (CU-3957-10)
structure of, effects of chemical modifications on macromolecular, 25:15432(R) (CU-3957-9)
structure of, effects of solvents and temperature on changes in, 22:14905 (BNL-50057, pp 111-22)
structure of, use of image intensifiers for x-ray diffraction studies on, 24:39407
superconductivity in double-stranded, possibility of room-temperature, (T), 23:46430
synthesis and metabolism in Physarum polycephalum, tracer study of effects of hydroxyurea on, 23:2740(R) (COO-78-174)
synthesis by chromatin, effects of physical state of chromosomes on, 23:33626(R) (ORO-3546-7)
synthesis by Escherichia coli infected with different bacteriophages, 21:13078
synthesis by Escherichia coli, effects of canavanine on, 21:47007(R) (COO-1562-2)
synthesis by HeLa cells, effects of hydroxyurea on, 22: 8436(R) (NYO-910-58)
synthesis by transferred nuclear nodes from Stentor polymorphus in cytoplasm of Stentor coeruleus, 22: 33718 (UCLA-12-640, pp 61-80)
synthesis during cell cycle in mice, comparison of autoradiographic methods for measurement of, 24: 31799
synthesis during cell cycle of Anacystis nidulans, 24: 36742
synthesis during cell cycle, effects on survival of bacteria with tritium-labeled chromosomes, 24:32277
synthesis during conjugation of Escherichia coli, 22: 28404 (ORNL-4100, pp 97-103)
synthesis during development of chick lens, 22:28283 (ORNL-4100, pp 75-96)
synthesis during mitosis, effects of, on x-radiosensitivity of tumor cells, 21:45604
synthesis in animal and plant cells, methods for chemical inhibition of, 21:26401
synthesis in animal cells, 22:12173(R) (NYO-3621-5)
synthesis in animals and plants, review of role of thymidine kinase in, 23:43251 (UCRL-50571)
synthesis in Bacillus subtilis, tritium tracer study of, 24: 41796 (ANL-7635, pp 162-85)
synthesis in bacteriophage, tracer study of, 21:16297
synthesis in barley roots, in relation to γ-radioinduced chromosome aberrations, 22:40630
synthesis in blood cells of leukemia patients, autoradiographic studies, 21:30799
synthesis in bovine liver cells, effect of irradiation from ^{3}H-thymidine on, 21:1712
synthesis in cell cultures after exposure to carbon-14-labeled nitroquinoline oxide, 25:8746
synthesis in cell cultures, mechanism of action of metabolic inhibitors on, 21:14569
synthesis in cells of adult and fetal mice and rats, tracer studies of diurnal fluctuations in, 23:2747(T) (UCRL-Trans-10211)
synthesis in cells of Vicia faba roots, tracer study of effects of indole acetic acid on, 23:29894 (COO-1625-26)
synthesis in cells, rationale for use of tritium-labeled thymidine to study, 23:11970 (CONF-671111-, pp 621-32)
synthesis in cells, tracer study of kinetics of, 23:45618
synthesis in Chlamydomonas reinhardii in relation to x-radiosensitivity, 24:34760
synthesis in cultured human cells, effects of caffeine and platinum on, 23:29344(R) (COO-1704-6)
synthesis in cultured human cells, tracer studies using tritium-labeled-precursors and autoradiography, 25: 21534
synthesis in cultured human lymphocytes from peripheral blood, tracer study of, 23:43649 (AAEC/TM-506)
synthesis in cultured mammalian cells in relation to unbalanced growth, inhibition of, 23:9834(R) (NYO-910-70)
synthesis in cultured mammalian cells, effects of cystamine and cysteamine on, 25:6712
synthesis in cultured mammalian cells, role of early and late synthesized proteins and RNA in, 23:9834(R) (NYO-910-70)
synthesis in cultured thymus cells of mice and rabbits, tracer study of effects of bone marrow extract on, 23: 45789
synthesis in cultures of Escherichia coli in relation to mitotic cycle, 22:28397 (ANL-7278, pp 144-69)
synthesis in cytoplasmic, in Physarum, 21:8671 (COO-78-142, pp 82-119)
synthesis in duodenum and mammary tumors of mice, use of tritium-labeled thymidine and iodine-131-labeled IUDR injected for tracer studies in normal, 24:50702
synthesis in eggs of Arbacia, effects of pressure on, 22: 434
synthesis in epidermis of mice, autoradiography of, using carbon-14 and tritium-labeled thymidine, 24:41720 (ANL-7635, pp 115-53)
synthesis in epithelial tissues of rats, autoradiographic study of diurnal variations in, 24:31796
synthesis in Escherichia coli infected with T4 light particles, 23:48266
synthesis in Escherichia coli infected with uv-irradiated T4 phage, 25:13616
synthesis in Escherichia coli, ability of lethally uv-irradiated bacteriophage phi x 174 to inhibit, 24:14633
synthesis in Escherichia coli, effects of cysteine on, 23: 8033
synthesis in Escherichia coli, effects of deuterated media on, 25:49086
synthesis in Escherichia coli, effects of, on loss of photoreversibility of uv-radioinduced lethal injuries and mutation, 24:2628
synthesis in Escherichia coli, effects of, on sensitivity to phosphorus-32 decay products, 25:10946
synthesis in Escherichia coli, tracer study of, 21:16297
synthesis in Escherichia coli, tracer study of using tritium-labeled thymidine, rate of, 22:16974(R) (ORO-2832-56)
synthesis in germinating seed of Crepis capillaris, effects of, on x radiosensitivity, 21:32619
synthesis in graft complexes of Stentor coerulus, role of cytoplasm in regulation of, 21:20034 (UCLA-12-612, pp 15-36)
synthesis in grasshopper neuroblast, effects of actinomycin D on, 22:28407(R) (ORO-2575-41)
synthesis in hair follicles of lambs, autoradiographic and tritium-labeled thymidine localization of, 25:13337
synthesis in HeLa cell cultures, effects of material from liver of γ-irradiated rats on, 23:35843
synthesis in HeLa cells, effects of inhibition of, on survival, 23:50365
synthesis in HeLa cells, effects of inhibitors of, on survival of x-irradiated cells, 22:36185
synthesis in HeLa cells, effects of uv-irradiation of various cellular sites on, 21:14608
synthesis in HeLa cells, tracer studies of role of proteins and RNA in, 23:11993 (NYO-910-75, pp 26-31)
synthesis in human bladder tumors for diagnosis of malignant stages, tritium tracer studies on, 25:29585
synthesis in human bone marrow cells in vitro, tritium tracer study of, using labeled thymidine and autoradiography or biochemical analysis, 24:29633
synthesis in human lymphocyte chromosomes, use of x-radioinduced aberrations for study of, 23:31715
synthesis in human tissues obtained at autopsy, use of pulse labeling with tritium-labeled thymidine and autoradiography for measurement of phase of, 24: 29634
synthesis in hyperplastic epidermis in mice, use of tritium-labeled thymidine for determining, 24:25359
synthesis in lens epithelium of rats, use of tritium for studying, 24:23355(R) (COO-1024-40)
synthesis in leukemic and mononucleosic cells, carbon-14 and tritium tracer study of, 24:546
synthesis in living tissues, effects of radiation and radioprotective compounds on, 21:8744
synthesis in lymphocytes, effects of deuterium oxide on, 23:7932(R) (RLO-581-26)
synthesis in lymphoma cells of mice, effects of, on cell volume, 24:2763 (COO-78-208)
synthesis in man, efficiency of labeling chromosomes to study, 23:11973 (CONF-671111-, pp 679-94)
synthesis in mice following lymphoma transplantation, use of radioisotopes for determining, 24:36800(R) (CALT-767-P-6-X-4)
synthesis in mitochondria and nuclei of Tetrahymena, 22:12744 (BL-207)
synthesis in mitochondria of Tetrahymena, mechanisms of, 22:1926(R) (NYO-3588-6)
synthesis in mixed culture of x-irradiated lymphoid cell lines and peripheral lymphocytes, 23:33811
synthesis in mixed cultures of dog leukocytes, effects of freezing and thawing on, 21:34566
synthesis in mouse intestinal cells, additive effects of hydroxyurea and x radiation on, 25:24386
synthesis in mouse skin cells, effects of hydroxyurea on, 25:24386
synthesis in neoplastic cells circulating in blood, tracer study of, 23:50251
synthesis in neural retina of x-irradiated rats, 21:6626
synthesis in normal and malignant tissues in man, carbon-14 and tritium double labeling method for measurement of duration of, 24:44401
synthesis in Physarum polycephalum, sequential initiation of, 24:33567 (COO-78-226)
synthesis in radioresistant mutants and wild types of Escherichia coli, effects of p-fluorophenylalanine on, 22:45733
synthesis in radiosensitive E. coli, effects of phosphorus-32 β decay on, 21:12794
synthesis in rat liver, effects of γ-irradiated sucrose solutions on, 23:35977
synthesis in rat tissues, effects of γ-irradiated sucrose solutions on, tracer study of, 23:16417
synthesis in relation to mitosis in Tetrahymena, effects of nutritional conditions on, 21:10239 (USNRDL-TR-1084)
synthesis in roots of Vicia faba, inhibition of, 22:47505
synthesis in salt-induced mutant of Escherichia coli, 23: 24774
synthesis in spleen and thymus of rats, effects of AET and cysteamine on, 25:4596
synthesis in split skin preparations, tritium autoradiographic study of, 21:24359
synthesis in thymus gland of rats, effects of AET, cysteamine, 2-mercaptoethanol, and penicillamine on, tracer study of, 25:4592
synthesis in thymus, effects of cysteamine on, in relation to radioprotective mechanisms, 24:12128
synthesis in tumor cells, inhibition of, by lymphocytes from peritoneal exudate of immunized syngeneic guinea pigs, 24:44453
synthesis in uv-irradiated bacteria, effects of acriflavine on, 22:49644(R) (NYO-3893-1)
synthesis in uv-irradiated E. coli and subsequent repair, factors affecting, 21:6737
synthesis in uv-irradiated Escherichia coli, effects of amino acid starvation on, 25:4731
synthesis in uv-irradiated synchronized cultures of E. coli K-12, 21:10836
synthesis in uv-radiosensitive strains of Escherichia coli, effects of 5-fluorouracil deoxyriboside and nalidixic acid on, 24:21061
synthesis in Vicia faba, effects of, on frequency of x-radioinduced chromosome aberrations, 22:14988
synthesis in x-irradiated hamster cells, effects of, on recovery, 23:11930(T) (AEC-tr-6646/4A, pp 25-9)
synthesis in yeasts, effects of, on recovery from radiation damage, 24:12322
synthesis induced by uv-irradiated SV40 virus, 24:34778
synthesis of 5-hydroxymethyluracil or uracil-containing, during bacteriophage infection of Bacillus subtilis, 25: 23435(R) (COO-2101-1)
synthesis of γ-irradiated Pisum root meristem, effects of temperature on, 21:11120
synthesis of, combined effects of chloramphenicol and 5-fluorodeoxyuridine on, 22:30414 (ORNL-4100, pp 148-51)
synthesis of, during phases of mitotic cycle in thymidine labeled cells, 21:10723 (N-66-21274)
synthesis of, effects of chemical mutagens on, 21:4790
synthesis of, effects of, on survival of γ-irradited Chinese hamster cells, 24:48587
synthesis of, effects on radioinduced chromatid and chromosome aberrations in Crepis capillaris, 24:23176
synthesis of, in algal flagellates, effects of actinomycin D on, 21:13072 (COO-1117-10)
synthesis of, in amphibian eggs, effects of deuterium on, 22:43448
synthesis of, inhibition by AET and cysteamine, 24: 34388
synthesis of, modified autoradiographic technique for diurnal variation of cell count during, 25:8589
synthesis of, relation to x-ray-induced mutations in Paramecium, 21:16324

synthesis patterns in ascites tumor cells, use of tritium-labeled thymidine to determine, 21:41323
synthesis time in human mucosa cells, measurements of, in vitro using tritium-labeled thymidine, 22:51453
tautomeric interconversion in A-T and G-C base pairs of, solution of time dependent equations for, 22:44964 (UCRL-50412)
thorium-232 uptake by, in rat liver, 22:51371
thymidine incorporation in, of x-irradiated bovine liver cells, 21:20041
transfer in E. coli during conjugation, 21:22772
transfer of carbon-14-thymidine-labeled, to minicells of Escherichia coli, 22:28404 (ORNL-4100, pp 97-103)
transfer of phosphorus-32-labeled, to bacteriophage progeny, 21:22253
tritium exchange between water and, 24:5665
tritium incorporation into human, through food chain following Project Rulison detonation, estimation of, 24:39472 (UCRL-50791)
tritium incorporation into, genetic and somatic effects of, 24:31959 (HASL-229)
tritium-labeled thymidine incorporation by, 25:6674(R) (RLO-2221-T-2-5)
tritium-labeled thymidine incorporation in lymphoma cell, survival following, 25:42251
tritium-labeled thymidine incorporation into, of tissues of mice, effects of mitotic rate on specificity of, 25:13358
tritium-labeled thymidine uptake by, development of injuries from, 21:45833
tritium-labeled thymidine uptake by, of ascites tumor cells, 21:41324
tritium-labeled, effects of growth in presence of, on viability of E. coli, 21:20025(R) (COO-1603-1)
ultrastructure of mitochondrial, from Physarum polycephalum, double-labeled renaturation study of, 23:2740(R) (COO-78-174)
uptake by bacteria during transformation, effects of EDTA on, 22:49185(R) (YALE-2653-33)
uptake by radioactive precursors, by x-irradiated Ehrlich ascites tumor cells, effects of anoxia and glucose on, 24:34135
uptake of tritium-labeled thymidine by, effects of histones on, 22:439
uptake of tritium-labeled thymidine by, effects of, on survival of cultured mammalian cells, 22:45382 (EUR-3290f-e, pp 73-7)
uptake of tritium-labeled thymidine by, in hamster tissues, effects of dose and specific activity on, 23:45604 (ANL-7535, pp 37-9)
uptake of tritium-labeled thymidine by, in relation to radiation dose to cell nuclei, β, 24:7728 (BNL-14124)
uptake of tritium-labeled, by bacteria during genetic transformation, autoradiographic study of, 23:22195
use for treatment of radiation sickness in mice and rats, 23:50857
use of bacterial, for protection of γ-irradiated mice and rats, 21:10932
use of high-polymer heterologous, for treatment of radiation sickness in dogs, 24:23244
use of phosphorus-32-labeled, to study effects of endotoxins on spleen cell proliferation in mice, 23:38389
use to restore radioinduced damage in cells and organisms, review of, 22:40766
viscosity of, effects of free radicals on, 22:25764
volume of plant cells in relation to x-radiosensitivity, 22:14905 (BNL-50057, pp 111-22)
yield following deproteinization of γ or uv-irradiated DNP solutions, effects of degree of complexation and radiation dose on, 24:27536
albumin—deoxyribonucleic acid, radiolysis of, EPR spectra of radicals from electron, 23:9486
cysteamine—deoxyribonucleic acid, radiation effects on, ESR study of, 21:8743
cysteine—deoxyribonucleic acid, radiolysis of aqueous solutions of, mechanisms of pulsed-electron, 23:9420(R) (GA-8872)
deoxyribonucleic acid—polypeptides, radiation effects on, γ, 23:45344

NUCLEIC ACID, RIBO-
ability of leukocyte, to transfer information for antibody synthesis in x-irradiated mice, 21:41311 (AD-648964)
absorption spectra for, microwave, 23:48263
activation of arginine and glutamine enzymes by, 22:20982(R) (COO-1498-4)
activity of uv-irradiated ribonuclease on, method for measuring, 21:26380
aminoacylation of transfer, effects of organic compounds on, 24:13736 (ORNL-4466, pp 41-62)
aminoacylation of transfer, kinetics of, 23:9303 (ORNL-4343, pp 33-52)
analysis by thin-layer chromatography, 22:14428 (ORNL-4196, pp 33-44)
analysis for tritium by extraction and scintillation counting, 25:28984
analysis for tritium by precipitation on glass-fiber filters and scintillation counting, 25:45
analysis of nucleotide sequences in transfer, 21:10238 (ORNL-3999, pp 132-3)
analysis of pulse-labeled, in bovine lens, 22:28283 (ORNL-4100, pp 75-96)
analysis of rabbit pancreas, for trace amounts of copper, gold, manganese, and zinc by neutron activation and radiochemical separation, 23:49763
analysis of transfer, 22:14429 (ORNL-4196, pp 44-54)
analysis of transfer, computer processing of liquid scintillation counting data in, 23:9303 (ORNL-4343, pp 33-52)
analysis of transfer, for impurities, spectrophotometric methods for, 23:9303 (ORNL-4343, pp 33-52)
analysis of, in embryonic and adult chick lens, 21:10236 (ORNL-3999, pp 65-78)
analysis of, using uv analyzer, 24:13736 (ORNL-4466, pp 41-62)
auxin-induced synthesis of, in sections of Pisium sativum, effects of deuterium oxide on, 23:38471
base ratios in, determined by analysis of activated phosphorus and paper chromatography, 21:17960
base ratios of early and late messenger, of T2 bacteriophages, effects of varying chemical and physical conditions on, 21:22318
base sequences of messenger, of Pseudomonas effusa, effects of uv-irradiated transcribing DNA on, 21:32578
binding of arginine transfer synthetase, to transfer ribonucleic acid and arginine of Escherichia coli, 24:13659 (COO-1498-8)
binding of pulse-labeled, to ribosomes in E. coli, effects of magnesium-ion concentration on, 21:6409
binding of transfer, to amino acids during synthesis of proteins, catalytic effects of synthetases on, 22:51302(R) (HUX-2643-42)
binding to phenylalanyl-RNA synthetase, 22:28286 (ORNL-4100, pp 153-9)
biological activity of DNA in synthesis of, 21:22359
biophysical studies on, 21:8678 (ORNL-3999, pp 166-75)
book: Nuclear Physiology and Differentiation, 23:43725
chain configuration of, effects of heat and hydrogen peroxide on, 22:23448
characterization and function of enzymes methylating ribosomal, 22:40615(R) (EUR-3889)
chromatographic properties of leucyl, from normal and T_2-infected E. coli, 21:8679 (ORNL-3999, pp 176-206)
comparison of molecules of, in animal cells by oligonucleotide analysis, 25:11074(R) (AECL-3777)
complexes with DNA in liver of irradiated rats, 24:23122
complexes with ribosomes during synthesis of proteins, 22:51302(R) (HUX-2643-42)
complexes with uranium in relation to elimination from man, 23:38443
composition and structure of messenger, tracer study of, 23:50240
conformation of, calculation of potential energies for, 22:12202 (UCRL-17966)
content in bone marrow, effects of AET and callicrein on, 21:4814(R) (EUR-2477.f(Vol.2))
content in tumor cells, use for detecting cellular degeneration, 21:34708
content of aminoacyl, in normal and virus-infected mammalian cells, 22:28289 (ORNL-4100, pp 178-201)
content of animal cells, oligonucleotide analysis for comparison of, 25:49319 (AECL-3961)
content of bones of rabbits, effects of plutonium-239 uptake on, 22:25971
content of cells in pancreas of mice, effects of actinomycin D on, 22:14910(R) (COO-1244-12)
content of cytoplasm and mitochondria, from Neurospora, comparison of, 22:28286 (ORNL-4100, pp 153-9)
content of Escherichia coli, heavy water effects on, 23:22242
content of heart of rats, effects of hypertrophy on, 24:34015 (ACRH-1000-173)
content of human epithelioma cells, relation of, to radiosensitivity, 23:50901
content of Micrococcus radiodurans, determination of rate of increase in, 22:23410(R) (NYO-3319-17)
content of nucleosides in, of bacteria and yeasts, analysis of, 22:30413 (ORNL-4100, pp 146-7)
content of nucleotides in, analysis of sequence for, 22:30414 (ORNL-4100, pp 148-51)
content of pea seedlings, effects of cesium-137 toxicity on, 22:10739 (BNWL-480, pp 127-51)
content of plastids in corn leaves, 22:28288 (ORNL-4100, pp 166-77)
content of rat organs, effects of uranyl nitrates on, 23:50322
content of reticulocytes in rats, 22:12750(R) (RLO-1377-3)
content of ribosomes in lens cells, 22:28283 (ORNL-4100, pp 75-96)
content of TMV-infected tobacco plants, 22:28289 (ORNL-4100, pp 178-201)
content of transfer, in mitochondria of Neurospora, 22:30414 (ORNL-4100, pp 148-51)
content of, in cytoplasm of x-irradiated Paramecium, effect of temperature on, 21:9033
determination by ligand-exchange chromatography, 22:14429 (ORNL-4196, pp 44-54)
determination in Tetrahymena pyriformis W. by neutron activation methods, 21:27922
determination of formylmethionine-accepting transfer, optimum conditions for, 24:13736 (ORNL-4466, pp 41-62)
determination of leucine- , phenylalanine- , and valine-accepting transfer, 22:14429 (ORNL-4196, pp 44-54)
determination of phosphorus-32- and tritium-labeled, by liquid scintillation counting of polyacrylamide gel slices, 25:31835
determination of phosphorus-32-labeled, efficiency of Cherenkov counting method for, 23:11800
determination of protozoan, using activation analysis, 21:32579
determination of radioisotope-labeled, by paper disc technique, elimination of metabolically generated artifacts from labeled base precursors in, 25:28993
determination of transfer, automated method for, 22:14429 (ORNL-4196, pp 44-54)
determination of transfer, fractional factorial method for optimizing conditions for, 23:9303 (ORNL-4343, pp 33-52)
determination of transfer, optimum conditions for, 24:13736 (ORNL-4466, pp 41-62)
determination of tritiated, separated by sucrose gradient centrifugation, development of scintillation cocktail for, 25:39438
dtto, 24:48764
effect of, on mitotic rate in uv irradiated grasshopper neuroblast cells, 21:16333
effects of depressed synthesis of, on survival of irradiated L cells, 25:26969
effects of extracts of yeast, on DNA synthesis in liver of irradiated mice, 21:8854
effects of in mice, on pigmentation of hair, injections of γ-irradiated, 22:25735
effects of tritium-labeled, on bacteria and bacteriophages, lethal and mutagenic β, 24:31923
effects of viral, on human chromosomes, aberrant, 24:25443
effects of, in mosaic virus on infection of tobacco plants, 21:20425 (STI/DOC-10/66)
effects of, on irradiated ascites tumors in mice, 21:20309
effects of, on restoration of artichoke rhizomes following x irradiation, 21:14771
effects on ATP content of liver of x-irradiated guinea pigs, 24:36702
effects on genetic transcription in irradiated Escherichia coli, mechanisms for, 21:24379
effects on growth of Physarum polycephalum, 22:43475(R) (COO-1432-4)
effects on γ-radiosensitivity of Staphylococcus aureus, 22:15125(R) (RLO-1730-2)
effects on immunological status of lymphoid cells, 23:24521
effects on regeneration of amputated limbs of x-irradiated salamanders, 23:50824
effects on repair of DNA synthesis in x-irradiated intestine tissue cultures from chicken embryos, 24:12106
effects on repair of uv-irradiated genetic information in Escherichia coli, 22:40970
effects on restoration of resistant and sensitive strains of yeast following radiation, 21:20441
effects on size of nucleus and nucleus-cytoplasm ratio in cells of epithelium of x-irradiated axolotl, 22:51362
effects on synthesis of proteins, 21:43331
effects on synthesis of tryptophan pyrrolase in γ-irradiated rat liver, 24:16973
effects on uv-radiosensitivity of ribosomes of Escherichia coli, messenger, 23:9896
effects on x-radiosensitivity of division delay of ovarian cells of hamsters, synthesis of, 22:49519
effects, x radiosensitivity of lymphocytes, 25:26903
electromagnetic field effects on content of, in viscera of rabbits, 23:50839
electrophoresis of, 23:9303 (ORNL-4343, pp 33-52)
electrophoresis of, equipment and method for studying, 24:13736 (ORNL-4466, pp 41-62)
enzymatic transfer of sulfur from cysteine to, in Escherichia coli extracts, 21:22229 (ACRH-26, pp 85-94)
enzyme effects on, of membranes of irradiated erythrocytes, 21:6668
estimation of purified, by cupric ion catalyzed orcinol reaction, 23:26687 (UCLA-12-706, pp 45-72)
extraction from brains of trained rats, effects of, on behavior of untrained rats, 22:20977 (COO-825-35)
extraction of informational, from spleen cells, 21:39349
formation by uv-irradiated E. coli incubated in acridine dyes, 21:18010
formation of templates of, in lens cell differentiation, 21:10236 (ORNL-3999, pp 65-78)
fractionation of rat and rooster, 25:49099 (UCLA-12-815, pp 1-36)
fractionation of tritium-labeled, by sucrose gradient centrifugation, 25:37899 (ANL-7770, pp 118-30)
function and structure of, 21:11002 (BNL-10722)
function and structure of ribosomal, from liver, 22:14906 (BNL-50057, pp 123-37)
helical stability of yeast transfer, effects of water-d_2 on, 25:46682
helix formation in, 21:3374 (UCRL-16806, pp 5)
inactivation of transfer, by ultraviolet, 21:6459
incorporation of tritium-labeled orotic acid into nuclear fractions of, effects of x radiation on, 23:41250
initiation of antibody synthesis by, in spleen cells of mice, 21:39349
isolation and characterization of, from mitochondria of Tetrahymena, methods for, 22:1926(R) (NYO-3588-6)
isolation and identification of heart muscle, 23:47953 (UCLA-12-724, pp 23-33)
isolation by zonal centrifugation, method for, 22:48809 (UCRL-50414)
isolation from brain of trained rats, effects of, on behavior of controls, 22:20976 (COO-825-34)
isolation from Rous sarcoma virus, 22:7953(R) (NYO-910-61)
isolation of low molecular weight, from ribosomes in liver cells of rat, 21:47053(T) (LA-tr-67-90)
labeling of 5' nucleotides with phosphorus-32 in, of mammalian tissues, 24:29625
labeling with carbon-14 in algal flagellates, effects of antibiotics on, 21:13072 (COO-1117-10)
labeling with carbon-14 tritium by in vitro methylation, method for, 22:461
lability of tritium-labeled, in cultures of embryo cells of mice, effects of acid-fixation on, 23:22196
life spans of ribosomal, in nongrowing tissue, 21:8675 (ORNL-3999, pp 134-9)
measurement of total transfer by phosphate analysis of oligonucleotides, 21:10238 (ORNL-3999, pp 132-3)
metabolism in cells, tracer study of molecular mechanisms for, 23:45617
metabolism in cultured crown gall tumor from Datura following x irradiation, 21:24668
metabolism in frog eggs, preparation of phosphorus-labeled-nucleic acids for studies of, 25:26617
metabolism in man with leukemia, autoradiographic study of, 23:16430
metabolism in Nicotiana glutinosa, effects of, on photoreactivation of tobacco mosaic virus, 22:4706(R) (RLO-1952-2)
metabolism in nuclei of cultured HeLa cells, effects of radiotoxins on, 23:50367
metabolism in nuclei of Ehrlich ascites cells, 22:12173(R) (NYO-3621-5)

metabolism in oocyte nucleoli of Triturus, 22:28283 (ORNL-4100, pp 75-96)
metabolism in rats with strontium-90-induced chloroleukemia, effects of chemotherapeutic agents on, 25:32447
metabolism in Tetrahymena, regulatory role of histones in, 25:10400 (UCLA-12-788)
metabolism of, effects of colchicine on, 21:22241(R) (ORO-3546-3)
methylation of mammalian, 21:12951(R) (LA-3610)
methylation of transfer, effects of uv-induction on enzymes for, 22:38214
molecular characteristics of, 24:39450(R) (AECL-3451)
molecular structure of, use of optical rotary dispersion to determine, 22:28286 (ORNL-4100, pp 153-9)
molecular weights of transfer, method for determining, 21:45503 (ORNL-4145, pp 243-59)
nucleotide content of, of radioinduced mutants of cotton, comparison of, to initial form, 22:43284
nucleotides of, effects on γ-irradiated mice, 21:20290
optical density of, effects of salt content on, 22:14428 (ORNL-4196, pp 33-44)
optical properties of, 21:45506(R) (UCRL-17520)
phosphorus-32 activity in, of goiter and thyroid carcinoma, 21:12781
phosphorus-32 content of, in Drosophila, 22:23463
phosphorus-32 content of, of spinach chloroplasts, effects of light on, 24:557
phosphorus-32 distribution in nucleotides of, in liver of rats, 23:31636
phosphorus-32 uptake by, in liver and mammary glands of rats, effects of progesterone and stilbestrol on, 24:21067
phosphorus-32 uptake by, in rat heart in vitro nd in vivo, effects of aldosterone on, 24:48386
phosphorus-32 uptake by, in rat lymphoid tissues, effects of dose on tracer studies using β, 23:16239
phosphorus-32 uptake by, in roots, effects of 8-ethoxycaffeine on, 23:35610
phosphorus-32 uptake by, of chick embryo, effects of albumin on, 23:16229
photobiology and photochemistry of, 24:36123(R) (RLO-2212-4)
photochemistry of, exposed to uv radiation, implications in genetics, review of, 21:12771
photolysis of, role in photoreactivation of dimers produced by uv, 25:42267(R) (RLO-2225-T-15-3)
photoproduct yields in uv-irradiated, Monte Carlo and random distribution computer programs for calculation of, 21:20096
preparation and structural analysis of mammalian, 21:22477 (BNL-994, pp 124-39)
preparation of labeled, methods for, 22:12746 (EUR-3669)
preparation of leucine transfer and phenylalanine transfer, from mixtures of tRNA from E. coli, 22:12747 (ORNL-4094, pp 14-18)
preparation of, in plasmodia of Physarum, 21:1844(R) (COO-1432-2)
preparation of, method for, 21:11002 (BNL-10722)
production of free radicals in, use of EPR for, 24:9765
production of phenylalanine transfer, 22:14563 (ORNL-4139, pp 19-22)
production of transfer, 22:14563 (ORNL-4139, pp 19-22)
properties of, chemical, biological, physical, 21:16261(R) (EUR-3059.f)
purification of transfer and leucyl-transfer, synthetase from sugar beet root, partial, 25:44249 (COO-1313-27)
purification of transfer, reversed-phase chromatographic processes for, 21:45503 (ORNL-4145, pp 243-59)
radiation chemistry of, review of uv, 21:24369
radiation effects on 4-thiouridine in, of Escherichia coli, uv, 24:609
radiation effects on acceptor function of, specific to different amino acids, 22:23421
radiation effects on acceptor reactions of yeast transfer, with tyrosine and valine, effects of dose on cobalt-60 γ, 23:33646
radiation effects on activities of transfer, x, 23:17929
radiation effects on activity of messenger, in silkworm larvae, carbon-14 tracer study of cobalt-60 γ, 23:6388
radiation effects on activity of transfer, in, 25:29715
radiation effects on activity of transfer, uv, 22:51442
radiation effects on adaptive function of, in Azotobacter, x, 22:19259
radiation effects on alanine-soluble, uv, 21:17994
radiation effects on base composition of messenger, in Escherichia coli, recovery from uv, 23:38490
radiation effects on biological activity of transfer, of Escherichia coli, liver, and yeast, x, 22:51421
radiation effects on biological activity of, in cells in relation to degree of radiation injuries, uv, 22:38234
radiation effects on biosynthesis of, in cultured HeLa cells, x, 23:45869
radiation effects on chromatin templates for synthesis of, γ, 25:18916
radiation effects on coliphage, protective effects of cysteamine against γ, 21:36648
radiation effects on complexes with DNA in cesium chloride density gradient system, cobalt-60 γ, 24:50712
radiation effects on components of, chemical analysis of uv, 22:19286
radiation effects on composition of, in loach embryos, 22:51388
radiation effects on concentration of, in human kidney, cobalt-60 γ, 23:26695
radiation effects on content in cytoplasm of lens cells of rat eyes, spectrophotometric determination of, 21:32766
radiation effects on content of cytoplasmic, in liver, x, 21:12802
radiation effects on content of nucleotides in, of guinea pig brain, protective effects of folic acid against x, 23:4878
radiation effects on content of, in adrenal glands of rats, x, 22:14957
radiation effects on content of, in amoebae, γ, uv, 24:7985
radiation effects on content of, in barley and wheat, effects of seed exposure on γ, 23:16434
radiation effects on content of, in bone marrow and spleen of rats, protective effects of Mumie against x, 25:16231
radiation effects on content of, in cells of rat spinal cord and spinal ganglia, 21:6438
radiation effects on content of, in deoxyribonucleoprotein in spleen and thymus of mice, effects of heparin on, 25:24410
radiation effects on content of, in diploid and haploid yeast cells, 23:14134
radiation effects on content of, in Escherichia coli, γ, 22:26008
radiation effects on content of, in fetal rats in relation to growth, cobalt-60 γ, 24:23325 (CONF-690501-, pp 375-9)
radiation effects on content of, in fragmented and whole amoeba, γ, 21:28686(T) (ANL-Trans-475)
radiation effects on content of, in frog embryos, uv, 22:25996
radiation effects on content of, in hypertrophic kidney of rats, γ, 22:40920
radiation effects on content of, in leaves of salvia, phosphorus-32 β, 22:36410
radiation effects on content of, in liver of mice, 23:10088
radiation effects on content of, in livers of mice, local x, 24:23113
radiation effects on content of, in mammary tissues of cows, γ, 21:26630
radiation effects on content of, in mice livers, effects of actinomycin on x, 24:21213
radiation effects on content of, in nerve cells of rabbits following exposure of brain stem, 24:5999
radiation effects on content of, in organs of rats, effects of sodium gallate on x, 24:50713
radiation effects on content of, in rat adrenals, effects of ACTH on x, 23:16231
radiation effects on content of, in rat brain, in utero x, 22:49249
radiation effects on content of, in rat kidneys, x, 21:26533
radiation effects on content of, in rat testes, phosphorus-32 β, 24:34691
radiation effects on content of, in rat tissues following prenatal exposure, whole-body γ, 23:10050 (ORO-661, pp 14-15)
radiation effects on content of, in shoots of corn and radishes, effects of dose on x, 22:33977
radiation effects on content of, in spleen and thymus of mice, quantitative analysis of electron, cobalt-60 γ, and x, 23:2939
radiation effects on content of, in spleen cells of rats, effects of homologous bone marrow transplants on x, 25:24388
radiation effects on content of, in spleen of mice, protective effects of bone marrow transplants against x, 22:19251
radiation effects on content of, in Tetrahymena, effects of heat on mixed γ and neutron, 23:6558 (AD-671943)
radiation effects on content of, in tumor cells of rats, combined effects of cooling on x, 21:39334
radiation effects on content of, in wheat, latent γ, 23:17943
radiation effects on content of, of brain of mice, deuteron, 23:38772
radiation effects on degradation of, by RNAase, β, 22:2485
radiation effects on developmental increases in content of, in brain of young rats, 100 to 1500 R x, 24:23105 (CONF-690501-, pp 857-75)
radiation effects on distribution of, in pituitary gland of mice, effects of dose on uv, 22:6732
radiation effects on double- and single-stranded, of poliovirus, kinetics of uv, 21:34587
radiation effects on fate of fowl plague virus, in cultured chick fibroblasts, uv, 24:34578
radiation effects on formylmethionyl, in Escherichia coli, uv, 25:13364
radiation effects on frequency of nucleotide pairs in, of Datura innoxia, x, 23:29383
radiation effects on heterogeneity of rat liver, whole-body γ, 25:42280
radiation effects on hybridization of cultured mouse leukemic cell, effects of dose on, 25:46725
radiation effects on incorporation of carbon-14-labeled orotic acid into, of rat liver, x, 23:41244
radiation effects on incorporation of carbon-14-labeled uridine into, of cultured neural tissue, x, 24:34630(R) (UCB-34-P-82-X-1)
radiation effects on infective, of phage MS2, in comparison with effects of nitrous acid, uv, 24:34785
radiation effects on infectivity of, from foot-and-mouth disease virus, cobalt-60 γ, 22:52045
radiation effects on infectivity of, of tobacco mosaic virus, uv, 22:28321
radiation effects on level of guinea pig, γ, 21:26525
radiation effects on messenger, in relation to mutations, review of mechanisms in, 23:43746
radiation effects on messenger, uv, 22:43223
radiation effects on metabolism and synthesis of, in liver cells of rats, tracer study of x, 21:41374
radiation effects on metabolism in Ehrlich ascites tumor cells, tritium tracer study on x, 25:52180
radiation effects on metabolism in soybean seeds in relation to variety, γ, 25:52262
radiation effects on metabolism of pulse-labeled, in rat fetus liver, x, 21:22245
radiation effects on metabolism of wheat embryo, γ, 21:36503
radiation effects on metabolism of, in algae, γ, 21:45847
radiation effects on metabolism of, in crown gall tissue cultures, phosphorus-32 tracer study of x, 22:8482
radiation effects on metabolism of, in embryos of barley, phosphorus-32 tracer study of effects of developmental stage and tissue differentiation on x, 22:28360
radiation effects on metabolism of, in HeLa cells, 21:20089
radiation effects on metabolism of, in PHA-transformed lymphocytes, x, 22:28629 (ORNL-4100, pp 104-9)
radiation effects on metabolism of, in rat liver and intestine, x, 21:24545(R) (EUR-3263.e)
radiation effects on metabolism of, in rat thymocytes, in vitro x, 25:44773
radiation effects on metabolism of, in rats, effects of fat content of diet on, 22:45444
radiation effects on metabolism of, in spleen of rats fed diets of differing fatty acid contents, 21:26376
radiation effects on metabolism of, in testis of rats, protective effects of DNA against x, 23:11939(T) (AEC-tr-6646/4A, pp 159-63)
radiation effects on nature of catabolism of, by Escherichia coli, x, 22:23475
radiation effects on nucleotide composition of, from cotton seeds, γ, 21:34586
radiation effects on paramagnetic resonance of, effects of menadione or riboflavin on γ, 21:41370
radiation effects on phosphorus-32 uptake by, of ascites hepatoma cells in rats, combined effects of carcinostatics on cobalt-60 γ, 22:31025
radiation effects on photoreactivation of, in tobacco mosaic virus, uv, 21:18188
radiation effects on polymerase activity in plant, γ, 25:42716(R) (COO-1313-29)
radiation effects on pulse-labeling of, with phosphorus-32, correlation of, with catalase activity in yeasts, γ, 22:19252
radiation effects on ratio of, to DNA in slime molds, 22:43480
radiation effects on reaction of psoralen with, role of uracil in uv, 22:47454
radiation effects on structure of, ionizing, 22:23448
radiation effects on structure of, uv and x, 21:8701
radiation effects on synthesis in protozoa, γ and uv, 21:9022 (COO-78-143)
radiation effects on synthesis in rat thymocytes, x, 21:1718
radiation effects on synthesis of, 21:43333
radiation effects on synthesis of amphibian embryo, effects of dose on x, 25:57944
radiation effects on synthesis of Bacillus subtilis, as function of DNA template activity, 25:29467
radiation effects on synthesis of barley seed, γ, 25:46743
radiation effects on synthesis of hybrid DNA-, in pea embryos, tracer study of γ, 22:43237
radiation effects on synthesis of messenger, effects of 5-fluorouracil and uracil on uv, 25:27123
radiation effects on synthesis of messenger, in rats 2 to 24 hrs after exposure, acute, 24:27534
radiation effects on synthesis of messenger, on DNA by RNA polymerase, ionizing or uv, 24:34090
radiation effects on synthesis of mitochondria-associated, uv, 23:22246
radiation effects on synthesis of mouse kidney cell, γ and uv, 25:55129
radiation effects on synthesis of phage-specific, uv, 23:2993
radiation effects on synthesis of ribosomal precursor of, in yeast, uv, 25:55138
radiation effects on synthesis of, at various sites in HeLa cells, uv microbeam, 22:36217
radiation effects on synthesis of, by ascites hepatoma cells of rats, in vitro and in vivo x, 22:30957
radiation effects on synthesis of, by Escherichia coli infected with phi x 174, uv, 24:31859
radiation effects on synthesis of, by Escherichia coli, effects of phi x 174 infection on uv, 24:31859
radiation effects on synthesis of, by L cells in vitro, x, 23:6568 (N-68-23533)
radiation effects on synthesis of, by mammalian cells, 21:45514
radiation effects on synthesis of, by Pisum, cesium-137 β and γ, 22:47469
radiation effects on synthesis of, by Saccharomyces vini, γ, 22:47640
radiation effects on synthesis of, by seeds of peas, tracer study of ionizing, 22:28388
radiation effects on synthesis of, by slime mold, uv, 23:50935
radiation effects on synthesis of, by synchronous HeLa and human leukemic cells, tracer study of x, 22:8436(R) (NYO-910-58)
radiation effects on synthesis of, during restoration of regeneration in limbs of axolotl, x, 23:29372
radiation effects on synthesis of, during tryptophan pyrrolase induction in rat liver, 23:43687
radiation effects on synthesis of, effects of wavelength on uv, 21:30792
radiation effects on synthesis of, effects on division of mitosis hamster cells with and without intact messenger, 24:21270
radiation effects on synthesis of, in animal cells, laser, 23:41420
radiation effects on synthesis of, in ascites cells, uv, 23:35957
radiation effects on synthesis of, in barley plants, effects of seed exposure on γ, 23:6607
radiation effects on synthesis of, in cells of Drosophila, mice, and rats, x, 24:34120
radiation effects on synthesis of, in cells of Ehrlich ascites carcinoma of mice, uv, 24:27685
radiation effects on synthesis of, in cervical cancer cells, 21:12942
radiation effects on synthesis of, in Chlamydomonas, synergistic effects of actinomycin D or chloramphenicol on γ, 21:34824

radiation effects on synthesis of, in Chlorella, γ, 23: 24530
radiation effects on synthesis of, in Chlorella, γ, 23:6353 (SGAE-BL-29/1968)
radiation effects on synthesis of, in cotyledons of peanut seeds, x, 22:31014
radiation effects on synthesis of, in cultured Chinese hamster cells, effects on, on mitosis, x, 23:33627
radiation effects on synthesis of, in cultured fibrosarcoma and L cells, electron and γ, 25:52176 (A/CONF.49/P-358)
radiation effects on synthesis of, in cultured HeLa cells, γ, 22:28310
radiation effects on synthesis of, in cultured mammalian cells, x, 23:9834(R) (NYO-910-70)
radiation effects on synthesis of, in Dictyostelium, effects of mitotic stage on, 24:27721
radiation effects on synthesis of, in eggs of Bombyx mori, γ, 22:28373
radiation effects on synthesis of, in endometrial epithelium of mice, whole-body x, 25:27031
radiation effects on synthesis of, in erythrocytes of frogs, ionizing, 23:12024
radiation effects on synthesis of, in erythrocytes of chickens, uv, 23:45669
radiation effects on synthesis of, in Escherichia coli, effects of reductone on uv, 25:13610
radiation effects on synthesis of, in Escherichia coli, effects of glucose, histidine, thymine, or uracil starvation on uv, 22:47451
radiation effects on synthesis of, in Escherichia coli, effects of dose and genetic strain on γ, 25:42729 (NYO-2804-40)
radiation effects on synthesis of, in Escherichia coli, effects of acriflavine on uv, 22:49263
radiation effects on synthesis of, in Escherichia coli, effects of acriflavine on uv, 24:36698(R) (NYO-3893-15)
radiation effects on synthesis of, in Escherichia coli, effects of dose on uv, 23:33629
radiation effects on synthesis of, in fetal rat livers following exposure in utero, cobalt-60 γ, 24:34097
radiation effects on synthesis of, in filamentous cells of Salmonella typhi, uv, 21:24686
radiation effects on synthesis of, in germ cell nuclei of male rats, x, 22:51418
radiation effects on synthesis of, in granular cells of human epidermis, uv, 22:10726
radiation effects on synthesis of, in hamster cells, x, 22: 28274 (ANL-7278, pp 250-82)
radiation effects on synthesis of, in HeLa cells, carbon-14 and tritium β, 22:6719 (UCSF-10-P-2-33)
radiation effects on synthesis of, in HeLa cells, inhibitory x, 25:26983
radiation effects on synthesis of, in HeLa cells, x, 24: 31854
radiation effects on synthesis of, in immunized mouse spleen, polyacrylamide gel electrophoresis studies on x, 25:29476
radiation effects on synthesis of, in intestinal epithelium of mice, comparison with effects of x radiation, 23: 18119
radiation effects on synthesis of, in kidney T-cells, effects of BudR on uv, 24:50770
radiation effects on synthesis of, in kidneys and regenerating liver of rats, relation of histone phosphorylation to γ, 23:50292
radiation effects on synthesis of, in L cells of mice, effects of tritium-labeled thymidine on β, 22:19274
radiation effects on synthesis of, in L cells, effects of energy deprivation on x, 23:2946
radiation effects on synthesis of, in liver in mice following partial hepatectomy, tracer study of fast neutrons and x, 25:6635 (CONF-691106-, pp 462-79)
radiation effects on synthesis of, in liver of guinea pigs, whole-body 2000 rad x, 24:34100
radiation effects on synthesis of, in liver of rats, effects of calf thymus, dactinomycin, histones, and trypsin on, 25:16027
radiation effects on synthesis of, in liver of Triturus viridescens, effects of hypoxia on x, 22:47489
radiation effects on synthesis of, in loach embryos, 21: 22724
radiation effects on synthesis of, in lung cells of mice, combined effects of influenza virus on x, 22:31012
radiation effects on synthesis of, in mammalian cells, review of uv, 25:21806
radiation effects on synthesis of, in microcysts of Myxococcus xanthus in relation to germination, uv, 24:16997
radiation effects on synthesis of, in mouse livers, whole-body γ, 25:39934
radiation effects on synthesis of, in mouse tissues, combined effects of estradiol with x, 21:20393
radiation effects on synthesis of, in nucleolus of HeLa cells, autoradiographic study of uv, 22:28314
radiation effects on synthesis of, in pea seeds, mechanism of γ, 25:35245
radiation effects on synthesis of, in plants, effects of seed exposure on x, 23:29343(R) (COO-1313-22)
radiation effects on synthesis of, in Pseudomonas effusa, uv, 23:20446
radiation effects on synthesis of, in rabbit nerve cells, whole-body x, 22:36183
radiation effects on synthesis of, in radiosensitive mutants of Saccharomyces, uv and x, 22:38240
radiation effects on synthesis of, in rat liver cells, x, 21: 22255
radiation effects on synthesis of, in rat liver, effects of actinomycin, DNAase, histones, and trypsin on, 24: 16983
radiation effects on synthesis of, in rat livers, methods for determining, 25:26641
radiation effects on synthesis of, in rats, combined protective effects of antibiotics, bone marrow, and vitamins against, 21:43454
radiation effects on synthesis of, in regenerating liver of rats, x, 22:45388
radiation effects on synthesis of, in seeds of peas, cobalt-60 γ, 22:23470
radiation effects on synthesis of, in slime mold, ionizing, 22:25713 (COO-78-163, pp 64-125)
radiation effects on synthesis of, in spleen cells of mice, uv, 21:39349
radiation effects on synthesis of, in Stentor coeruleus, γ and uv, 21:45593
radiation effects on synthesis of, in synchronized Chinese hamster cells, effects of cycloheximide on x, 25:32557
radiation effects on synthesis of, in uv-irradiated E. coli, quantitative analysis of, 21:16315
radiation effects on synthesis of, induced by influenza virus in chick fibroblasts, combined effects of actinomycin D on x, 23:31658
radiation effects on synthesis of, on templates of bacteriophage DNA, γ, 22:38193(R) (EUR-3912)
radiation effects on synthesis of, review of mechanisms of, 22:40612
radiation effects on synthesis of, uv and x, 21:8701
radiation effects on TMV, effects of, on multiplicity reactivation, uv, 23:17995
radiation effects on TMV, uv, 25:46729
radiation effects on tobacco mosaic virus, photoreactivation following uv, 23:48286
radiation effects on transcription of messenger, from specific genes in Escherichia coli, phosphorus-32 β, 22:28376
radiation effects on transfer, biological activities of uv, 23:20119
radiation effects on transfer, ionizing, 22:40568
radiation effects on transfer, of macrophages in relation to antibody synthesis, γ and uv, 22:28391
radiation effects on uptake of orotic acid by, in cytoplasm and nuclei of rat liver cells, tracer study of x, 24:14404
radiation effects on uridine incorporation into, of nerve tissue of chickens and rats, carbon-14 tracer study of x, 25:4457(R) (UCB-34-P-82-9)
radiation effects on uridine incorporation into, of cultured tissues of central nervous system, x, 23:45644 (UCB-34-P-82-8)
radiation effects on, in bacteriophages, effects of, on infectivity and replication in Escherichia coli, uv, 22: 33989
radiation effects on, in bacteriophages, fast proton, 23: 41511
radiation effects on, in fish embryos, x, 22:51353
radiation effects on, in mammalian cells, review of early, 22:40553
radiation effects on, in normal and denervated muscles of rabbits, whole-body x, 22:49217
radiation effects on, in plant cells, effects of, on auxin metabolism, uv, 21:43330
radiation effects on, in rat thymocytes in vitro, whole-body x, 21:32793
radiation effects on, in relation to production of antibodies in rabbits, uv, 22:14928
radiation effects on, in tobacco mosaic virus, uv, 21: 26687
radiation effects on, of bacteria and bacteriophages, review of ionizing and uv, 22:49251
radiation effects on, of bacteriophages, protective effects of glycerol and molecular structure against γ and x, 23:16241
radiation effects on, of erythrocytes of chickens, fast neutron, 23:926
radiation effects on, of Escherichia coli, protective effects of cysteamine and enzymes against uv, 23:10023
radiation effects on, of Euglena, effects of dose and temperature on γ, 22:33771
radiation effects on, of f2 phage, photoreactivation of uv, 24:19374(R) (ORO-3630-7)
radiation effects on, of labeled chicken embryos, phosphorus-32 β, 24:32213
radiation effects on, of mammalian cell cultures, tritium β, 22:43456
radiation effects on, of potato virus x in relation to infectivity, uv, 23:45977
radiation effects on, of rats in relation to central nervous system, x, 25:58098
radiation effects on, of sex chromosomes of Drosophila, x, 24:25463
radiation effects on, of viruses, effects of riboflavin and vitamin A on light and uv, 22:4708
radiation effects on, review of mechanism of uv, 24: 50717
radiation effects on, x, 21:22400
radioinduced binding of, to psoralen, uv, 21:45550
radioinduced breaks in, of ascites tumor cells, rejoining of, x, 23:24520
radioinduced changes in conformation and inactivation of transfer, in Escherichia coli, uv, 22:33746
radioinduced changes in molecular structure of, in guinea pig skin, x, 23:50347
radioinduced decrease of content of, in dorso-lateral prostates of rats, x, 25:13366
radioinduced degradation of ribosomal, in Escherichia coli and Micrococcus lysodeikticus, effects of dose and oxygen on uv and x, 24:34121
radioinduced degradation of, in Escherichia coli, effects of arginine depletion on uv, 24:36698(R) (NYO-3893-15)
radioinduced degradation of, in Escherichia coli, role of enzymes in x, 23:50368
radioinduced degradation of, in starved Escherichia coli, uv, 23:33641
radioinduced dimerization of pyrimidine in tobacco mosaic virus, effects of methanol, proflavin, salt, and temperature on, uv, 21:28400
radioinduced dimerization of uracil in transfer, uv, 23: 20118
radioinduced hybridization of DNA with messenger, x, 21:16278
radioinduced inactivation of bacteriophage, fast proton, 25:16387
radioinduced inactivation of double and single stranded, from encephalomyocarditis virus, uv, 23:38898
radioinduced inactivation of infectivity of, isolated from tobacco mosaic virus, photoreactivation of uv, 25: 26653
radioinduced inactivation of synthesis of, for phenylalanyl, effects of log dose on γ, 22:30946
radioinduced inactivation of transforming, of tobacco mosaic virus, effects of frequency on reversal of uv, 22:4580
radioinduced inactivation of, from phage f2, uv, 21: 30778
radioinduced inactivation of, from potato virus X, effects of wavelength on uv, 25:27108
radioinduced inactivation of, from TMV, effects of deuterium on photoreactivation, uv, 23:26690
radioinduced inactivation of, from tobacco mosaic virus, photoreactivation of uv, 24:31844(R) (UCB-34-P-116-X-8)
radioinduced inactivation of, in tobacco mosaic virus in pinto bean plants, photoreactivation spectrum for uv, 23:43704
radioinduced inactivation of, in tobacco mosaic virus, reaction mechanisms for uv, 23:31648
radioinduced inactivation of, in viruses, photoreactivation of uv, 21:22802(R) (UCB-34-P-116-2)
radioinduced inactivation of, of tobacco mosaic virus, quantum yield for uv, 23:22444
radioinduced increase in quantity of, in nerve cells of rabbits, x, 21:39359
radioinduced inhibition of synthesis of, in epithelium of small intestine in rats, x, 24:34689
radioinduced inhibition of synthesis of, x, 21:32718
radioinduced liberation of, from rat megakaryocytes, x, 24:4682
radioinduced mutation for distribution of methylated bases in, of Saccharomyces cerevisiae uv and x, 22: 8502
radioinduced phosphorescence of, uv, 22:51302(R) (HUX-2643-42)
radiolysis in TMV, effects of in vitro or in vivo exposure on photoreactivation of uv, 24:7739
radiolysis in TMV, tritium tracer study of uv, 24:7741
radiolysis of aqueous solutions of, protective effects of phenylalanine against γ, 23:8047
radiolysis of transfer, in air-saturated solutions, x, 22: 33460
radioprotective effects in bacteria, uv, 25:27122
radioprotective effects in bacteria, x, 25:27120
radioprotective effects of highly polymerized, on survival of in vitro x-irradiated rat thymocytes, 21:24459
radioprotective effects of injections of marrow, on life spans and mortality in mice, 21:4833
radioprotective effects of, on cancerous tissues, review of in vivo, 22:33875
radioprotective effects of, on guinea pigs, x, 21:41463
radioprotective effects of, on intestine of chicken embryos in culture, x, 22:40733
radioprotective effects of, on rats, γ, 22:6849
radioprotective effects of, on survival of mice, x, 24: 19328
radioprotective effects of, review of, 21:45767
radiosensitivity in Euglena cells, use of carbon-14-labeled uracil for chromatographic studies of, 21:22823
radiosensitivity of tobacco mosaic virus, effects of coat protein on uv, 22:49266
reactions with phenylalanine RNA synthetase from Neurospora, 22:28286 (ORNL-4100, pp 153-9)
reactions with phenylalanine, effects of methylation on, 22:28286 (ORNL-4100, pp 153-9)
reactivation of uv inactivated tobacco mosaic virus, multiplicity, 22:51529
removal of, from mitochondria, 21:8676 (ORNL-3999, pp 143-52)
replication in bacteria, fungi, and virus, 23:16274
research at CRNL during 1969, 24:39425(R) (AECL-3565)
role in production of antibodies in rats, 22:40518(R) (RT/BIO-(68)3)
role in radiation-mutagenesis in Drosophila melanogaster, 21:24534
role of DNA in synthesis of, 21:12783
role of, in multiplication of influenza viruses, 21:16545
separation by solvent extraction using substituted ammonium compounds, effects of sodium chloride on, 23:363 (ORNL-4272, pp 192-217)
separation from calf liver and E. coli, method for reversed-phase chromatographic, 25:34468(R) (ORNL-TM-3390)
separation from various sources by reversed-phase chromatography, 23:35260(R) (ORNL-4234)
separation of crude mixtures of transfer, by column chromatography, 22:12747 (ORNL-4094, pp 14-18)
separation of DNA and ribonuclease from mixed feed of, 22:27864 (ORNL-4204, pp 16-21)
separation of fractions of, from marrow of irradiated rabbits, 21:34610
separation of ribosomal, by reversed-phase chromatography, 24:271 (ORNL-4422, pp 276-99)
separation of transfer, 22:14563 (ORNL-4139, pp 19-22)
separation of transfer, by chromatography, 21:45503 (ORNL-4145, pp 243-59)
separation of transfer, by reversed-phase chromatography, 24:271 (ORNL-4422, pp 276-99)
separation of transfer, by reversed-phase chromatography, 23:49895(R) (ORNL-4235)
separation of transfer, from bacteria and mixtures, methods for, 23:363 (ORNL-4272, pp 192-217)
separation of transfer, from Escherichia coli, reversed-phase chromatography method for, 23:363 (ORNL-4272, pp 192-217)
separation of transfer, stability of column packing in chromatographic, 22:16646 (ORNL-4075, pp 22-3)

solvent partition of, between aqueous salt solutions and trichlorotrifluoroethane, 21:8675 (ORNL-3999, pp 134-9)
sorption of phosphorus-32-labeled, in anthracene phosphor of flow-through scintillation detectors, 23:624
sorption of phosphorus-32-labeled, in plastic phosphors of flow-through scintillation detectors, 23:624
species in liver of rats, effects of ethionine on, 22:28289 (ORNL-4100, pp 178-201)
stability in Escherichia coli following chloramphenicol inhibition, carbon-14-labeled methionine tracer study of, 22:12158 (BNWL-480, pp 107-26)
stability to thermal denaturing in vitro, effects of bis-(2-aminopropyl) disulfide and cysteamine on, 25:49217
structure in viruses, effects of mercury on, 23:31266 (UCRL-50629)
structure of, 21:3374 (UCRL-16806, pp 5)
structure of, linear sequence of bases and three-dimensional arrangement of molecule in relation to, 23:9361 (UCRL-18216, pp 45-80)
synthesis by chick embryo cells following infection with uv-irradiated Newcastle Disease Virus, 25:16054
synthesis by chromatin, effects of physical state of chromosomes on, 23:33626(R) (ORO-3546-7)
synthesis by Escherichia coli infected with different bacteriophages, 21:13078
synthesis by Escherichia coli, effects of canavanine on, 21:47007(R) (COO-1562-2)
synthesis by Escherichia coli, effects of methionine on, 21:28427(R) (BNWL-335(Rev.))
synthesis during cell cycle of Anacystis nidulans, 24:36742
synthesis during immune reactions in rats, 22:28286 (ORNL-4100, pp 153-9)
synthesis during spermatogenesis in Asellus, tracer study of, using autoradiography and tritium-labeled uridine, 23:38430
synthesis in bone marrow cells of rats, effects of erythropoietin on, 23:767 (ACRH-1000-67)
synthesis in brain of mice and rabbits, carbon-14 and tritium tracer study, 23:41204
synthesis in brain of rabbits, 22:38193(R) (EUR-3912)
synthesis in cell cultures after exposure to carbon-14-labeled nitroquinoline oxide, 25:8746
synthesis in cells from regenerating rat liver, 22:51302(R) (HUX-2643-42)
synthesis in cultured human cells, tracer studies using tritium-labeled-precursors and autoradiography, 25:21534
synthesis in cultured mammalian cells, effects of, on DNA synthesis, early and late, 23:9834(R) (NYO-910-70)
synthesis in cultured neuroblasts, effects of chromatin condensation on, 22:49178(R) (ORO-3546-6)
synthesis in different cell types in human skin, in vitro tracer study of, using tritium-labeled uridine and autoradiography, 24:29632
synthesis in domestic fowl, use of DNA-RNA hybridization to determine organ-specific, estrogen-induced, 23:47954 (UCLA-12-724, pp 71-87)
synthesis in Ehrlich ascites cells, effects of uv-inactivated Sendai virus on, 24:23403
synthesis in erythroblasts of chickens, effects of deuterium oxide on, 22:12802
synthesis in Escherichia coli following infection with uv-irradiated T2 phage, 23:7955
synthesis in Escherichia coli, ability of lethally uv-irradiated bacteriophage phi x 174 to inhibit, 24:14633
synthesis in Escherichia coli, effects of content of immature ribosomes on, 22:12158 (BNWL-480, pp 107-26)
synthesis in Escherichia coli, effects of cysteine on, 23:8033
synthesis in Escherichia coli, effects of deuterated media on, 25:49086
synthesis in Escherichia coli, effects of spermidine on, 23:778
synthesis in Escherichia coli, effects of T-even bacteriophage infection on sulfur incorporation during, 23:8016(R) (ACRH-29)
synthesis in Escherichia coli, reaction mechanisms for, 21:22229 (ACRH-26, pp 85-94)
synthesis in grasshopper embryos, effects on recovery from x-radioinduced prophase reversion of, 25:26911
synthesis in grasshopper neuroblast, effects of actinomycin D on, 22:28407(R) (ORO-2575-41)
synthesis in γ-irradiated Pisum roof meristem, effects of temperature on, 21:11120
synthesis in hamster embryos, tritium tracer study of cytological changes during nuclear, 24:9734
synthesis in HeLa cell cultures, effects of material from liver of γ-irradiated rats on, 23:35843
synthesis in host cell, effects of uv-radiosensitivity of encephalomyocarditis virus in inhibition of, 22:8659
synthesis in isolated nuclei of Drosophila, carbon-14 and tritium tracer study of, 23:33585
synthesis in lens epithelial cells, effects of actinomycin D on, 22:28283 (ORNL-4100, pp 75-96)
synthesis in liver of rats, effects of insulin on, 22:28287 (ORNL-4100, pp 160-4)
synthesis in lymphocytes, effects of deuterium oxide on, 23:7932(R) (RLO-581-26)
synthesis in mitochondria of Tetrahymena, mechanism of, 22:1926(R) (NYO-3588-6)
synthesis in pea epicotyl sections, effects of heavy water on, 24:563
synthesis in phytohemagglutinin-treated hepatoma ascite cells, effects of, on radiosensitivity, 22:33942
synthesis in plants, phosphorus-32 tracer study of precursors in, 23:35581(R) (COO-1377-10)
synthesis in regenerating lens of Triturus, 22:28283 (ORNL-4100, pp 75-96)
synthesis in relation to cell radiosensitivity, 23:50808 (PHS-999-RH-33, pp 5-22)
synthesis in relation to mitosis in cultured mammalian cells, 22:53498 (LA-3848, pp 11-20)
synthesis in relation to oral regeneration in Stentor coeruleus, 22:53498 (LA-3848, pp 11-20)
synthesis in ribosomes of Amoeba proteus, phosphorus-32 tracer study of, 23:29302
synthesis in Stentor coeruleus, effects of actinomycin D, hydroxyurea, and puromycin on, 21:45593
synthesis in thymus gland of rats, effects of AET, cysteamine, 2-mercaptoethanol, and penicillamine on, tracer study of, 25:4592
synthesis in thymus, effects of cysteamine on, in relation to radioprotective mechanisms, 24:12128
synthesis in tobacco and tobacco mosaic virus, effects of actinomycin D, cytochrome C, and kinetin on, 22:4706(R) (RLO-1952-2)
synthesis in tobacco mosaic virus, double-stranded forms as intermediates in, 25:2551(R) (COO-873-28)
synthesis in uv-irradiated bacteria, effects of acriflavine on, 22:49644(R) (NYO-3893-1)
synthesis in uv-irradiated Escherichia coli, effects of 5-fluorouracil on, 22:40969
synthesis of leucine-containing, in phage-infected Escherichia coli, 22:28289 (ORNL-4100, pp 178-201)
synthesis of new species of transfer, in uv-radioinduced mutants of Euglena gracilis in relation to ability to form chloroplasts, 24:7743
synthesis of phage α messenger, relation of x radiation effects on phage DNA to, 22:25783
synthesis of viral, in chick embryo cells, effects of uv-irradiated Newcastle disease virus on, 23:47960
synthesis of, effects of chloramphenicol on, 22:30414 (ORNL-4100, pp 148-51)
synthesis of, effects of DNAase and γ-radioinduced damage to DNA templates on, 24:25393
synthesis of, effects of γ-irradiated DNA on, 21:41363
synthesis of, effects of inhibitors and γ radiation on mitotic delay in sea urchin eggs, kinetics of, 21:14743
synthesis of, effects of uv radiation on, in Escherichia coli, 21:1845(R) (NYO-3511-2)
synthesis of, effects on radioinduced mutations in Drosophila germ cells, 21:22396
synthesis of, in amoeba, cytoplasmic control of, 21:10797
synthesis of, in cell cultures, mechanism of action of metabolic inhibitors on, 21:14569
synthesis of, in Escherichia coli, effects of methionine on, 21:14547 (BNWL-280, pp 88-91)
synthesis of, in fetal rat liver, 21:8677 (ORNL-3999, pp 153-8)
synthesis of, in HeLa cells, effects of uv-irradiation of various cellular sites on, 21:14608
synthesis of, in living tissues, effects of radiation and radioprotective compounds on, 21:8744
synthesis of, in Paramecium, correlation with circadian rhythm, 21:14776
synthesis of, in tobacco mosaic virus, 21:3374 (UCRL-16806, pp 5)
synthesis of, lectures on, 22:37628 (ISS-68/1)
synthesis of, tracer study of genetic code for, 23:45617
synthesis on γ and uv-irradiated DNA, 24:21082
thorium-232 uptake by, in rat liver, 22:51371
transfer, conference on genetic code, 21:32601
translation of messenger, effects of suppression of radioinduced mutations on, 21:22394
tritium exchange measurements on Escherichia coli transfer, effects of aminoacylation on, 23:19727
tritium-labeled, effects of growth in presence of, on viability of E. coli, 21:20025(R) (COO-1603-1)
uptake by radioactive precursors, by x-irradiated Ehrlich ascites tumor cells, effects of anoxia and glucose on, 24:34135
uptake of infectious, by cells, effects of various factors on, 21:22289
uptake of labeled, by lymphoid cells of mice, 21:16262 (USNRDL-TR-1080)
uptake of phosphorus-32-labeled, by poliovirus, 21:45848
uptake of, by plasmodia of Physarum, 21:1844(R) (COO-1432-2)
uridine incorporation into, by liver of roosters, effects of estrone on in vitro, 21:20034 (UCLA-12-612, pp 15-36)
use in protection of yeast against radiation injury, 21:20441
use of bacterial, for protection of gamma-irradiated mice and rats, 21:10932
use of intranuclear tritium-labeled, in human bladder tumors for diagnosis of malignant stage, 25:29585
use of phosphorus-32-labeled, to study effects of endotoxins on spleen cell proliferation in mice, 23:38389
use to restore radioinduced damage in cells and organisms, review of, 22:40766
x radiation effects on biosynthesis of, in Ehrlich ascites carcinoma cells and rat liver, 21:22293
x radiation effects on content and synthesis of, in Saccharomyces, x, 21:24683
x-ray-diffraction analysis of the distribution of beef pancreas, in ribosomes, 21:25805
chondroitinsulfuric acid—ribonucleic acid, radiolysis at 77°K, EPR studies on protective effect of polyanions in x, 22:2143
cysteine—ribonucleic acid, radiolysis at 77°K, EPR studies on protective effect of cysteine in x, 22:2143

bound states (anti N — N), Bethe—Salpeter equation in ladder approximation for, 24:15566
bound states (π—N), Bethe—Salpeter equation in ladder approximation for Regge trajectories of, (T), 25:20007
bound states in Woods—Saxon well, computer program for, (T), 24:45800 (RT/FI-(69)30)
capture by deuterium, polarization in, (T), 21:38221
capture by deuterium, theory for radiative, 24:15973
capture by lead-208, cross-section calculations using collective and direct formalisms, (T), 22:37340(R) (EANDC(E)-89(U))
capture by nuclei at high energies, effective charge factor for E1, (T), 25:5839
capture by nuclei in giant resonance region, cross sections for, (T), 24:47609
capture by nuclei, spin-orbit interaction in, (T), 22:9977
cascade calculations for, Monte Carlo program for intranuclear, 23:34616
chiral symmetry from divergence requirements for πN system, construction of Lagrangian with, 23:3716
chiral-invariant Lagrangian with π, N, Δ(1236), and rho, 24:35644
classification, interactions, and properties in W(3)-symmetric bootstrap model, 23:49126
clustering in low-density neutron-star matter, (T), 25:13819
composite structure from e + N interactions at high energies, 24:24285
correlation with A in nuclear matter, nonlinear equation for function for, (T), 25:20001 (DEMO-70/19)
correlations from electron elastic and quasi-elastic scattering by helium-4 at high energies, short-range nucleon-nucleon, 25:17421 (LNF-70/47)
correlations in nuclei, short-range, (T), 24:24678
cosmic-ray yield functions, Gross transformation, and mean free paths, (E), 22:13283
coupling constant for epsilon anti NN, tree approximation for ratio to epsilon ππ coupling constant, (T), 25:22815
coupling constant for epsilonN, broken scale invariance for, 25:9762
coupling constant for etaN, upper limit for, (T), 24:8649
coupling constant for KAN, differential cross sections for γ + p → K⁺ + Λ backward interactions at 1 and 2 GeV for, (E), 25:52992 (LAL-RI-71-3)
coupling constant for N anti Nπ system, 24:15566
coupling constant for N(1688)N eta' vertex, 23:10779
coupling constant for NAK from continuous dispersion sum rule for K + N interactions, 24:35655
coupling constant for NAK weakly dependent on anti KN unphysical-region parametrization, K + N scattering dispersion relation for, (T), 24:52131
coupling constant for πN from analysis of N + N interactions at 25 MeV, (E/T), 21:19021
coupling constant for πN from analysis of p + p interactions at 0 to 400 MeV, 22:35003
coupling constant for πN in current-field algebra, 25:9762
coupling constant for πN in soft-pion limit, SU(2) x SU(2) symmetry for, 24:45535
coupling constant for πN, model Hamiltonian for, 25:17546
coupling constant for πN, perturbation theory for Goldstone symmetry for hadronic corrections to Goldberger—Treiman relations for, (T), 25:41040
coupling constant for πN, residue of quasipole for determining, 21:37827
coupling constant for πN, tests of long-range charge independence in N + N interactions from, (T), 25:36522
coupling constant for πNΔ(1236), from p-wave scattering length for π + N interactions, 24:3684
coupling constant for πNN, from model-independent analysis of forward elastic π⁻ + p and π⁺ + p interactions, (T), 25:20003 (JINR-E2-5561)
coupling constant for S*NN, relation to coupling constant for S*ππ, (T), 25:25409
coupling constant of anti KNY* from K⁻ + d → Λ + π⁻ + p interactions at 400 MeV/c, (E/T), 24:24254
coupling constant of eta NN from N + N interactions, 23:39752
coupling constant ωN relative to πN, six-dimensional field theory for ratio of, 23:1670
coupling constant πN relative to ωN, six-dimensional field theory for ratio of, 23:1670
coupling constant shifts of, off-shell reciprocal bootstrap model for, 23:32661
coupling constants for γNN*, test of N(1400) dominance of nucleonic form factors from, 22:15733
coupling constants for KN, use of meson—nucleon dispersion relations for determination of, 22:15802
coupling constants for Λ anti K N from KN forward dispersion relation, 21:44384
coupling constants for meson—nucleon system, contribution to intermediate states of anti N + N interactions, (T), 24:52133
coupling constants for meson—nucleon, two-point function with positive mass distribution in nonlinear spinor theory for, 23:32705
coupling constants for N—rho from π + N sum rules in t channel, 21:44381
coupling constants for NAK and NΣK systems from KN forward dispersion relations, (T), 22:1448
coupling constants for NAK, PCAC hypothesis for, (T), 25:30904
coupling constants for NN*, saturation of charge-current algebra for weak, 21:11792
coupling constants for NΣK, PCAC hypothesis for, (T), 25:30904
coupling constants for π—N system for resonance baryon decays, 21:37812
coupling constants for π—N, for electromagnetic mass splittings of baryon octet, 21:33662
coupling constants for πN and πNN* from current algebra, 22:24632
coupling constants for πN, approximate bounds from analyticity, crossing, and unitarity on, 22:44439
coupling constants for πN, radiative corrections to, 22:52987
coupling constants for rhoNN and rhoNN*, current-algebra sum rules for, 22:24597
coupling constants for rhoNN, in unified field theory, 23:3726
coupling constants for Σ(1385)NK from K + N → K + N and anti K + N → anti K + N interactions, dispersion sum rules for, 24:13087
coupling constants for, Adler—Weisberger relation for weak, 23:23441
coupling constants AKN and ΣKN from energy-dependent finite-energy sum rule for K⁺ + p interactions, prediction for, 22:22404
coupling constants of N*Nπ, regularity of, 24:49494
coupling constants of π—N, radiative corrections to, 23:7151
coupling constants of, bootstrap model of baryons in W(3) symmetry for ratios of, 23:25633
coupling constants of, empirical test of tensor meson dominance from, (T), 25:9764 (DESY-70/58)
coupling constants of, test of tensor meson dominance from, (T), 25:12216
coupling constants rho NN, dispersion theoretic calculation of two-π effects on amplitudes of forward N + N → N + N and anti N + N → anti N + N interactions for determination of vector, 22:39383
coupling of A_1NN on-mass shell, helicity-flip property of, 25:53234
coupling of D_{13} πN state to S_{11} πΔ and S_{11} rho N states in π⁻ + p interactions at 400 to 700 MeV, (T), 23:8811
coupling of DNN and ENN, neutral axial-vector currents for predictions for, 25:40989
coupling of γNΔ(1236), dipole, 23:7120
coupling of γNN(1525) from saturation of current algebra at infinite momentum, 23:32659
coupling of AKN, backward differential cross sections of K⁻ + n → Λ + π⁻ and π + N → N + π interactions for, 24:40388
coupling of AKN, review of forward dispersion relations for, (T), 25:30902
coupling of AN to virtual ΣN for Λ + N scattering and Λ binding in nuclear matter, (T), 25:43648
coupling of ANK in asymptotic SU(3) symmetry, 24:45571
coupling of N anti N π from N + anti N interactions, Bethe—Salpeter equations in ladder approximation for, 24:18170
coupling of NγN*, sum rules for electromagnetic, 21:27334
coupling of NNπ, relation with ΔΔπ, (T), 24:52030
coupling of ωN, rigorous inequalities from positivity and duality in zero-width approximation for, (T), 25:50130
coupling of P' trajectory to K - N system, 24:35656
coupling of P' trajectory to π - N system, 24:35656
coupling of π - N system with rho, relation with low-energy parameters for, 24:35656
coupling of πN from divergence conditions, chiral-dynamic model of, 24:47450
coupling of πN, broken chiral symmetry for corrections to soft pion theorems for Goldberger—Treiman relation for, 24:37722 (UR-875-310)
coupling of πN, effect on nuclear forces of second-order nonlinear term in, (T), 25:20021
coupling of πN, forward dispersion relations for constant of, 24:6726
coupling of πN, nonlinear Lagrangian transformations of, 24:47451
coupling of πNN from meson dominance in meson—nucleon interactions, 23:42675
coupling of rho NN for saturation of π + N superconvergence sum rules, 22:46451
coupling of rhoNN from meson dominance in meson—nucleon interactions, 23:42675
coupling of rhoπN, divergence conditions for, 25:33747
coupling of Roper resonance to γ—N system, sum rules for, 24:10724
coupling of ΣNK in asymptotic SU(3) symmetry, 24:45571
coupling shifts for πNN and πNN*, Dashen—Frautschi method for calculating, 22:9614
coupling to deuterons, form-factor normalization condition for, 21:15362
coupling to deuterons, threshold anomalies for, 23:36956
coupling to mesons, static SU(6) for, 22:46491
coupling to Regge poles, field-theoretic model for, 22:20252
coupling to vector mesons, 21:5370
coupling with γ and Δ(1236), current algebra calculation of, 22:3323
coupling with mesons, lectures on, 24:37407
coupling with mesons, N + N forward dispersion relations for, 22:24683
coupling with octet of pseudoscalar mesons, mass operator in SU(3) symmetric, (T), 25:20046
coupling with relativistic scalar meson field, Nelson model for, 23:30814
coupling with Yukawa interactions, tachyon—nucleon, 24:20217

couplings of πNN and πNN* in Chew—Low model, electromagnetic perturbations on, 22:46440
couplings of πNN and πNN* in Chew—Low model, electromagnetic perturbations on, 22:46441
current density of, definition in symmetric pseudoscalar meson theory, 21:4051
decay in nuclei, SU(6) estimate of effective nonleptonic parity-violating coupling in strangeness-conserving, 23:34634
decay N $\rightarrow$ N + π, effect of strong interaction on weak parity-violating vertex for, 25:36458
decay N $\rightarrow$ N + rho$^-$, parity violating internucleon potential from Schwinger terms for, 24:13013
decay N $\rightarrow$ N + vector meson, evidence from parity-forbidden α decay for noncanceling seagull and Schwinger terms in, 25:30931
decay N $\rightarrow$ N* + γ (virtual), superconvergent sum rule and SU(6)/sub W/ symmetry for M1 form factor for, 22:15729
decay of, baryon conservation in, (E), 22:17851
decay of, electromagnetic corrections to beta, 22:11636
decay of, experimental tests of baryon conservation in, 21:37694
decay of, model for T violation in beta, 24:10704
decays N $\rightarrow$ N + ω and N $\rightarrow$ N + phi, form factors for, 22:37166
decays of, dispersion-theory version of PCAC hypothesis for weak leptonic, 22:3360
degeneracy in early Universe, (T), 24:28061
density in nuclei, corrections for oscillations in calculations of, 25:17961
detection of cosmic, performance of cloud chamber for, 24:33942
deuteron elastic scattering at 11 to 40 MeV, K-matrix calculation of polarization in, (T), 24:52411
dipole moment of, nucleon Compton-effect amplitude for sum rules for, (T), 25:30776 (JINR-P2-5679)
distribution in nuclei, calculations using Fermi-gas theory, (T), 22:14093
distributions for Monte Carlo cascade calculations, two-dimensional, (T), 21:13898 (ORNL-4002)
distributions in nuclei, effect on hadron reactions with nuclei at high energies, 25:47906
electric dipole moment of, model for CP violation with intermediate vector boson for, (T), 23:16950
electric dipole moment of, model for upper limits of, 22:44379
electric dipole moments of, commutation rules of field algebra for sum rule predictions for, 23:42627
electric dipole moments of, SU(6)/sub W/ algebra for, 21:15377
electric polarizability of, symmetric quark model for, 25:27983
electric polarization and magnetic moments of, SU(6) predictions for, 21:7533
electromagnetic properties and excited levels of, model of electron excitation for relating, 22:26596
electromagnetic radii of, use of field—current identities for calculation of, 22:50337
electromagnetic radius of, sidewise dispersion relations for relation with π electromagnetic radius, 22:32086
electromagnetic self-energy of, effect of off-mass-shell form factors on, 24:15513
electromagnetic structure of, algebra generated by moments of current and, 23:1612
electromagnetic structure of, e + N experiments for determining, (T), 22:13718
electromagnetic structure of, quark model for, 22:9538
electron quasi-elastic scattering by, form factors for, (T), 21:31872
emission from nuclear meson (μ^-) capture, polarization in, (T), 22:16077
emission from nuclei by electron scattering, effects of short-range correlations on, (T), 25:50834
emission from proton reactions with beryllium-9 and helium-4 at 660 MeV, threshold detector study of angular distributions and number of, (E), 22:11582
emission in electron scattering by nuclei, (T), 22:9964
emission in nuclear reactions, angular-momentum effects on, (T), 21:5572
energy and angular distributions in copper shielding from 50- to 400-MeV electrons, intranuclear cascade model and electron—photon cascade calculations for, 23:49074 (ORNL-4443)
energy and eigenvector of ground state of, 21:2469
energy eigenstates of many-body systems of, expectation value for, 23:1927 (AD-671630)
energy eigenvalues of four-body systems of, bounds on, (T), 21:10097
energy levels in two- and three-body systems, calculations using strong coupling model with Yukawa potential, 24:1898
energy levels of four-body systems of, (T), 22:1595
energy levels of systems with charge- and spin-independent pairing interactions, seniority-zero, (T), 21:38418
energy levels of, effects on linear energy transfer in heavy ion beams, 21:12874
exchange between two identical nuclear cores, interaction induced by, (T), 25:17994
exchange contributions to amplitudes of π + N charge-exchange interactions, 24:18189
exchange forces in ΔN multibaryon systems, Δ(1236) $\rightarrow$ π + N decay for, (T), 24:45553
exchange in anti p + p $\rightarrow$ anti p + p interactions at 1.63 to 2.20 at large angles, (E), 25:7546
exchange in Δ(1236) production in π + N and e + N interactions, ladder diagrams with, 23:51879 (DESY-69/33)
exchange in e + N and γ + N interactions, Δ(1236) production amplitudes from Bethe—Salpeter wave function with, 23:51879 (DESY-69/33)
exchange in elastic scattering of heavy ions by identical nuclei, resonant, (T), 24:49741
exchange in γ + N $\rightarrow$ π + N interactions, Bethe—Salpeter equation in ladder approximation for Δ(1236) production from, 23:46641 (DESY-69/22)
exchange in γ + N $\rightarrow$ π^0 + N backward interactions, effects of absorptive corrections for, 23:51867(R) (NYO-1984-13)
exchange in γ + p $\rightarrow$ π^0 + p interactions at 660 to 780 MeV, backward anomaly from, (E), 22:34824 (AD-448108)
exchange in K$^-$ + p $\rightarrow$ π + Σ interactions at 1 to 3 GeV/c, duality for, 24:1599
exchange in nuclear reactions by tunneling through potential barrier, (T), 21:46823
exchange in nuclear reactions, finite-range effects in DWBA calculations for, 22:18317
exchange in π + N charge-exchange interactions, partial waves from, 23:18912
exchange in π + N interactions, ladder approximation in partial wave dispersion relations for, 22:24648 (DESY-68/2)
exchange in π + N interactions, source theory for, 24:5263
exchange in π^- + p interactions near 1 GeV, peripheral model for, (T), 25:5376
field interactions with boson fields in models of quantum field theory, 24:15664
field theory for, asymptotic behavior of Green functions in quantum, 21:21298
field-theoretic model for symmetric description of Roper resonance and, 22:15799
flux from nuclear spallation reactions, performance of gold foil detectors for measurement of high-energy, 24:44265
flux in cosmic radiation at atmospheric depth of 976 gcm^{-2} at 12 to 15 GeV, spark chamber study of ratio to π for, (E), 25:43621
form factor and magnetic dipole of, sum rules for isovector, 21:27334
form factor and mean-charge radius of, rho dominance for, 24:3562
form factor and structure function in parton model, electromagnetic, 25:59431
form factor at asymptotically great momentum transfer, (T), 23:7108
form factor effects on total and differential cross sections of τ + n $\rightarrow$ e$^-$ + p and anti τ + p $\rightarrow$ e$^+$ + n interactions, electromagnetic, (T), 24:18125
form factor for γNN* from analysis of π^0 electroproduction, transition, 22:26609
form factor for γNN*, e + p $\rightarrow$ e + p + π^0 interactions for, (E), 25:22658 (DESY-70/65)
form factor for three-body system of, electric, 24:30953
form factor for, cross sections for e + p $\rightarrow$ e + n(p) + π^0(π^+) interactions near threshold for axial-vector, (E), 24:12921
form factor for, field—current identity for isovector, 24:1605
form factor for, model with linearly rising Regge trajectories for isovector, 23:39645 (LNF-69/25)
form factor for, realistic spectral function for isovector part for asymptotic behavior of electromagnetic, (T), 25:40936
form factor from amplitude of π + π $\rightarrow$ N + anti N and anti N + N $\rightarrow$ π + π interactions, electromagnetic, (T), 22:5530
form factor from chiral invariant Lagrangians, high-momentum transfer behavior of, 25:7588
form factor from e + N $\rightarrow$ e + N + π + π interactions using current algebra and PCAC method, measurement of axial-vector, 22:34903
form factor from e + N interactions below 6 GeV, review of experiments on, 22:22269 (CONF-670923-, pp 59-77)
form factor from e + N interactions in vector dominance model and broken symmetry, electromagnetic, 25:47792
form factor from multiple quark and analysis of consistency relations among diffraction cross sections for p + p, anti p + p, π + p, and π + π elastic interaction diffraction cross sections, (T), 22:32116
form factor from O(4,2) dynamics, isoscalar, 22:5625
form factor from π + N interactions in Veneziano model, rho contribution to, 24:18217
form factor from threshold dominance in sidewise dispersion relations for e + N $\rightarrow$ N + π interactions, 23:42607
form factor in bootstrap theory, electromagnetic, 21:25266
form factor in current algebra models, relation between commutator ambiguities and, 22:29658
form factor in Fermi quark models, 23:32645 (DESY-69/17)
form factor of composite, nonrelativistic composite model for structure function relation with electromagnetic, (T), 25:5372 (CNRS-CPT-70-P-331)
form factor of γNΔ vertex from e + p interactions at 1.5 to 6 GeV, (E), 23:5513
form factor of N—anti N bound state, asymptotic behavior of electromagnetic, 22:50365
form factor of NNπ vertex, phase representation for, 24:12959
form factor of, axial-vector, 24:49518
form factor of, axial-vector, 24:10706
form factor of, dipole model of rho for, 23:5636
form factor of, dispersion theories for electromagnetic, 23:39662
form factor of, electric, 22:29657
form factor of, high-momentum transfer behavior of electromagnetic, 21:18952
form factor of, τ + N and e + N interactions for axial-vector, (E), 23:30734
form factor of, phenomenological analysis of infinite resonance model for electromagnetic, 25:12153
form factor of, π form-factor zero from phase shift for isovector, 23:3732
form factor of, relativistic description of magnetic, 24:47404
form factor of, rho and rho' dominance in dispersion theory calculation of isovector, 22:34913
form factor of, rho NN coupling constant from electromagnetic, 21:37740
form factor of, SO(4,2) group for axial vector, (T), 25:5401 (DEMO-70/6)
form factor of, SU(3) x SU(3) representation mixing for Pauli, 24:18250
form factor of, threshold expansion for radius of, 25:9722
form factor of, threshold theorem for radius of, 24:49394
form factor of, vector-meson dominance from, 24:24280
form factor, formulation of electromagnetic, 23:18841
form factors above 6 GeV, (E), 22:11569 (SLAC-PUB-372)
form factors and mean charge radius from vector dominance model, 25:12141
form factors at high momentum transfers in extended particle model, electromagnetic, (T), 24:42902
form factors for N—N* from SU(2) x SU(2) algebra, weak, 21:33742
form factors for N-N* transition, asymptotic chiral symmetry predictions for, 23:18920
form factors for rho production, axial-vector, (T), 25:17456
form factors for spinor states of, 24:13188
form factors for, analysis of electromagnetic, 21:5370
form factors for, asymptotic behavior of electromagnetic, (T), 21:42295
form factors for, class of quantum fields for electromagnetic, 23:49159
form factors for, composite-particle model for electromagnetic, 22:11647
form factors for, current algebra for relations among, 22:3490
form factors for, current algebra in infinite momentum frame for, 24:20169
form factors for, divergence condition for sum rules for isovector, 21:18939 (DESY-67/2)
form factors for, formal solution of current algebra for approximate expressions for, (T), 23:39661
form factors for, generalized vector dominance for ratio of two gamma functions for electromagnetic and axial-vector, 24:8629 (COO-264-525)
form factors for, high-energy theorems in stochastic field theory for electromagnetic, 24:35688
form factors for, isoscalar charge and magnetic moment, (T), 21:46522
form factors for, isovector, 21:15319
form factors for, nonrelativistic Fermi quark model for, 23:39650
form factors for, soft pion summations and chiral cancellation for calculating electromagnetic, (T), 22:50320 (NYO-2262-TA-191)
form factors for, SU(2) x SU(2) current algebra for π + N, rho + N, and A$_1$ + N interactions for, 24:35658
form factors for, superconvergent sum rules for electromagnetic, 24:10702
form factors for, vector dominance model for, 21:31553 (DESY-67/13)
form factors for, Veneziano model for, (T), 25:3394
form factors for, vertex function for, (T), 25:5383
form factors from analysis of γ + N elastic scattering cross sections, 24:24284
form factors from antisymmetrical wave function in quark model, 22:3443
form factors from Coulomb scattering, (E/T), 23:49072 (CERN-69-22)
form factors from current algebra and Regge model, asymptotic, 25:36437
form factors from current algebra, Regge poles, and Veneziano model, axial-vector, 25:59356
form factors from e + N elastic interactions, electromagnetic, 22:3326
form factors from e + N interactions, asymptotic behavior of, (T), 23:8770 (UCSD-10-P-10-48)
form factors from e + N interactions, model for q^{-4} dependence of electromagnetic, 23:21079
form factors from e + p $\rightarrow$ e + p interactions, extended-particle-quark model for, (T), 24:52024
form factors from e + p interactions, phenomenological analysis of inelastic, (T), 24:20100
form factors from e$^-$ + N interactions, 21:33641
form factors from electron-nucleon scattering at high energy, 21:25262
form factors from photoproduction sum rules in static approximation, relation for, 22:34915
form factors from pole dominance and Veneziano model for π + N $\rightarrow$ π + N and π + N $\rightarrow$ N + A$_1$(rho) interactions, electromagnetic and axial, (T), 25:12144
form factors from π + N dispersion relations, 22:44448
form factors from transverse polarization measurement in elastic e + N interactions at high energies, 24:12994
form factors in generalized vector dominance theory, electromagnetic and axial-vector, 24:40323
form factors in quark—parton model, 25:59391
form factors in quasi-independent quark model, electromagnetic, (T), 23:13066
form factors in space-like asymptotic region, O(3,1) analysis of electromagnetic, 23:36874
form factors in terms of rho^0, ω, and phi resonances, electromagnetic, 23:25554
form factors in vector-dominance model, fitting of electromagnetic, 22:37166
form factors of, 23:49096
form factors of composite, asymptotic behavior of, 22:37108
form factors of N—N* vertices from Ward identity and sidewise dispersion relation, 23:34610
form factors of nucleon—meson vertex, relation of higher order regularized Yukawa functions to electromagnetic, 23:3680
form factors of, analytic continuation of electromagnetic, 21:46507
form factors of, based on quark interactions, 23:7144
form factors of, bounds on elastic and inelastic, (T), 24:40313

form factors of, breakdown of scaling law for electromagnetic, 24:18120
form factors of, C invariance for electromagnetic, 25:33679
form factors of, chiral symmetry in predictions for vector and axial-vector, 24:3719 (COO-264-523)
form factors of, contribution of A_1(1080) resonance to axial vector, 23:10818
form factors of, current algebra and PCAC constraints on asymptotic behavior of, 24:12996
form factors of, current algebra relations between electroproduction amplitudes and, 24:52028
form factors of, current-algebra sum rules for pion electroproduction amplitude and, 21:35286
form factors of, dipole model of rho for isovector, 23:5618
form factors of, dispersion-theoretic calculation of isovector electromagnetic, 23:25563
form factors of, effect of higher N* resonances on $\pi + \pi \rightarrow$ N + anti N and anti N + N $\rightarrow \pi + \pi$ amplitudes for electromagnetic, 24:3593
form factors of, effect of soft pseudoscalar π exchange on, 25:9782
form factors of, electromagnetic, 21:4021
form factors of, electromagnetic, 23:10784
form factors of, electromagnetic, 22:46362
form factors of, electromagnetic, 22:11626
form factors of, extended-particle model based on quark model with arbitrary number of quark—antiquark pairs for electromagnetic, (T), 25:22780
form factors of, from annihilation and $\pi + \pi$ interactions, 22:9583
form factors of, group dynamics predictions for electromagnetic, 22:37173
form factors of, high-energy behavior of, 25:59339
form factors of, infinitely rising Regge trajectories for electromagnetic, (T), 24:40316
form factors of, inverse mass approximation to saturation of algebra of vector densities for electromagnetic, 22:7475
form factors of, isovector electromagnetic, 23:7120
form factors of, isovector part of electromagnetic, 24:8607
form factors of, lower bound for decrease of electromagnetic, 23:30731
form factors of, lower limit in large momentum transfer region for decreasing electromagnetic, 23:15016 (IFVE-STF-68-32-K)
form factors of, mass dispersion relations for asymptotic constraints on, 25:1454
form factors of, mixed representations in U(3) x U(3) for electromagnetic, 22:24704
form factors of, model for electromagnetic, 24:52017
form factors of, model for electronmagnetic, 24:18122
form factors of, model for vector and axial vector, 24:24307
form factors of, model of electromagnetic, 24:18119
form factors of, model with linearly rising Regge trajectories for electromagnetic, 24:12971
form factors of, nonresonant π—π contributions to electromagnetic, 21:37740
form factors of, O(4,2) dynamic model for electromagnetic, 23:7164
form factors of, off-mass-shell, 25:3745
form factors of, quark model for electromagnetic, 21:4019
form factors of, quasi-independent quark model for relation between electric and magnetic, 22:22346 (ITF-67-52)
form factors of, Regge pole effect on contribution of $\pi + \pi \rightarrow$ N + anti N and anti N + N $\rightarrow \pi + \pi$ amplitude to electromagnetic, 24:13061
form factors of, Regge pole theory and systems of integral equations for convergence of electromagnetic, 24:10702
form factors of, Regge-pole model for electromagnetic, 22:13695
form factors of, Regge-pole model for isovector, 21:17076
form factors of, relativistic extensions of SU(6) for electromagnetic, 23:16982
form factors of, review of e + p interactions at 0 to 10 GeV energies for inelastic electromagnetic, (E/T), 25:52995
form factors of, review of weak and electromagnetic, (E/T), 23:49104
form factors of, rho + rho' model for isovector, 24:8598
form factors of, soft-pion summations and chiral cancellation for electromagnetic, 24:8601
form factors of, spectral functions from extrapolation of, 22:3337
form factors of, superconvergence dispersion relations and asymptotic behavior of isovector, 23:18857
form factors of, superconvergent dispersion sum rules for model for electromagnetic, (T), 25:12147
form factors of, superconvergent sum rule and SU(6)/sub W/ symmetry for electromagnetic, 22:15729
form factors of, test for N(1400) dominance of nucleonic, 22:15733
form factors of, theory and review of, 23:10782
form factors of, theory of isovector and isoscalar, 22:11611
form factors of, use of sidewise dispersion relations for electromagnetic, 22:52960
form factors of, vector-meson-dominant model and off-mass-shell, 24:15513
form factors of, virtual exchange of soft nonchiral pseudoscalar π pairs for momentum-transfer-dependent damping of, (T), 25:1529 (NYO-2262-TA-224)
form-factor sum rules for, nonforward retarded commutator, 21:15342
gravitation theory for, Dirac equation in Riemann space for energies in, 21:25250
intensity of cosmic, in lower atmosphere, (E), 21:29029
intensity of cosmic, latitude knee, (T), 23:10470
interaction anti K + N $\rightarrow$ A + π, Deck effect with K exchange in, (T), 23:42682
interaction anti N + N, high-energy behavior of Bethe—Salpeter amplitudes for, 24:13113
interaction potential induced by weak interactions, parity-violating, 22:50418
interaction potentials for, derivation from one-meson-exchange amplitudes, 24:24617
interaction potentials for, derivation from scattering phase shifts, 24:20439
interaction vertex for NNπ in renormalized sigma model, 25:22781
interaction vertex for NNrho, Schwinger and sea-gull terms in parity-violating weak, 25:3338
interactions 3A + N, phenomenological potentials for, (T), 25:1567
interactions A_1 + N $\rightarrow$ A_1 + N in quark model commutators in charge algebra, sum rules for, 25:1535
interactions A_1 + N, cross sections for, (E/T), 23:23368
interactions A_1 + N, integral form of PCAC and Weinberg sum rules for coupling constant for, 22:13731
interactions A_1 + N, SU(2) x SU(2) current algebra for nucleon vertex functions for, 24:35658
interactions above 10^{14} eV, (E), 22:2821
interactions above 1000 GeV in emulsions, shower production in, (E), 23:16952
interactions anti K + N $\rightarrow$ anti K + N at 0 to 550 MeV/c, scattering lengths for, (E/T), 22:32168
interactions anti K + N $\rightarrow$ anti K + N at 400 to 1200 MeV/c, energy-independent partial-wave analysis for P_{01}(1800) and P_{11}(1850) production in, (T), 25:25433
interactions anti K + N $\rightarrow$ anti K + N at 800 to 1200 MeV/c, resonance production in, (E), 23:39607 (AD-687143)
interactions anti K + N $\rightarrow$ anti K + N below 1.4 GeV/c, hyperon resonances in phase-shift analysis for partial-wave amplitudes of, 24:3652 (UCRL-50617)
interactions anti K + N $\rightarrow$ anti K + N, coupling of N(1470)KA from superconvergence sum rules for, (T), 24:18214
interactions anti K + N $\rightarrow$ anti K + N, dispersion sum rules for Σ(1385)NK coupling constants from K + N $\rightarrow$ K + N interactions and, 24:13087
interactions anti K + N $\rightarrow$ anti K + N, finite-energy sum rules for exchange degeneracy of Y* resonances from, (T), 23:15130
interactions anti K + N $\rightarrow$ anti K + N, SU(3) chiral Lagrangian model for total cross sections of, (T), 25:28037
interactions anti K + N $\rightarrow$ anti K + N, SU(3) x SU(3) chiral Lagrangian model for total cross sections and scattering lengths for, (T), 25:14703 (TID-25639)
interactions anti K + N $\rightarrow$ anti K + π + N, dual five-point function for phenomenological analysis of, (T), 25:53188
interactions anti K + N $\rightarrow$ anti K* + N* at high energies, quark model for test of additivity from joint decay distribution from, 22:13735
interactions anti K + N $\rightarrow$ eta + A at low energies, angular distributions and cross sections for, (T), 23:25640
interactions anti K + N $\rightarrow$ eta + A at low energies, cross sections and angular distributions for, 23:1640 (COO-264-445)
interactions anti K + N $\rightarrow$ K + Ξ, dispersion sum rules for invariant amplitudes of, (T), 24:52094
interactions anti K + N $\rightarrow$ K + Ξ, superconvergent sum rule for Σ(1385) couplings in, 23:21117
interactions anti K + N $\rightarrow$ K + Ξ, Y* Ξ K coupling constants from superconvergence sum rules for, 24:8655
interactions anti K + N $\rightarrow$ A + π + rho, Deck effect with K exchange in, (T), 23:42682
interactions anti K + N $\rightarrow$ ω(phi) + Y* at high energies, quark model for test of additivity from joint decay distribution from, 22:13735
interactions anti K + N $\rightarrow$ π + Σ at 0 to 550 MeV/c, π—Σ scattering lengths from, (E/T), 22:32168
interactions anti K + N $\rightarrow$ π + Σ, analytic structure of partial wave amplitudes for, 24:1668
interactions anti K + N $\rightarrow$ π + Σ, criterion for three-quark bound state determination for A(1405) in, (T), 24:1600
interactions anti K + N $\rightarrow$ π + Σ(A) at 400 to 1200 MeV/c, test of duality predictions from partial-wave analysis of, (E/T), 25:43642 (UCR-34-P-107-B-106)
interactions anti K + N $\rightarrow$ π + Σ(A) at high energies, tests of Regge-pole and strong-absorption models for, (T), 25:12206
interactions anti K + N $\rightarrow$ π + Σ(A), SU(3) x SU(3) chiral Lagrangian model for total cross sections and scattering lengths for, (T), 25:14703 (TID-25639)
interactions anti K + N $\rightarrow$ π + Σ(A), SU(3) x SU(3) chiral Lagrangian model for total cross sections of, (T), 25:28037
interactions anti K + N $\rightarrow$ π + Y, Regge poles and SU(3) symmetry for, 22:1439
interactions anti K + N $\rightarrow$ rho + Y* at high energies, quark model for test of additivity from joint decay distribution from, 22:13735
interactions anti K + N $\rightarrow$ Σ + π, A(1405)—baryon—pseudoscalar meson coupling from dispersion relations for, 22:15809
interactions anti K + N $\rightarrow$ Σ(1385) + π, formalism for partial-wave analysis of, 23:42686
interactions anti K + N $\rightarrow$ Σ(A) + π at 400 to 1200 MeV/c, energy-independent partial-wave analysis for P_{01}(1750), S_{11}(1730), P_{11}(1550), and D_{13}(1660) production in, (T), 25:25433
interactions anti K + N $\rightarrow$ vector meson + A(Σ), photon—vector meson analogy model for γ + N $\rightarrow$ K + A(Σ) interaction relation with, 22:46366
interactions anti K + N at 0 to 1200 MeV/c, Argand diagrams and resonance parameters from multichannel phase-shift analysis of anti KN, Yπ, and Y$\pi\pi$ final states in, (T), 25:45765
interactions anti K + N at 0 to 1400 MeV/c, energy-dependent multichannel M-matrix fits to partial-wave analyses of, (T), 25:59476
interactions anti K + N at 1.850 to 2.250 GeV, review of partial-wave analysis of, (T), 25:1532 (UCRL-19843)
interactions anti K + N at low energies, finite-energy sum rules as test of multichannel effective-range analysis of, 23:23491
interactions anti K + N at low energies, forward dispersion relation for, 22:3447
interactions anti K + N at low energies, implications for SU(3) symmetry breaking in Y_0*(1405) couplings, 21:44377
interactions anti K + N at low energies, in review of anti KAp coupling constant, (T), 25:25464
interactions anti K + N at low energy, derivative sum rules for parameters of, 23:32737
interactions anti K + N below 1200 GeV/c, multichannel K matrix analysis of baryon resonance production in, (T), 25:25434
interactions anti K + N, current commutators and mass extrapolations for s- and p-wave amplitudes of, 22:44441
interactions anti K + N, formulation of Reggeized absorption model with exchange degeneracy for elastic and charge-exchange, (T), 25:53159
interactions anti K + N, hyperon production in partially latent quasidynamical, (T), 25:9752
interactions anti K + N, K_2^0 $\rightarrow$ K_1^0 regeneration at high energies for strange baryon resonances in, (T), 22:34932 (JINR-P1-3788)
interactions anti K + N, local models for, (T), 25:36505 (PAM-71.1)
interactions anti K + N, modified dispersion relations for KNA and KNΣ coupling constants for, 22:20257
interactions anti K + N, predictions of quark model with additive baryon exchange for pseudoscalar meson and baryon production in backward, (T), 25:47883
interactions anti K + N, πAΣ coupling from forward dispersion relations for, 23:42652
interactions anti K + N, review of SU(3) symmetry for dispersion relations for forward, 23:18823 (CONF-671217-, pp 370-588)
interactions anti K + N, rho trajectory from generalized superconvergence relations for, 24:20156
interactions anti K + N, scattering length and low-energy behavior from K-matrix analysis of K^- + p interactions, 23:46725
interactions anti K + N, scattering length for, (T), 22:15680 (ORO-2504-117)
interactions anti K + N, soft-meson current-algebra calculations of complex scattering lengths for, 23:15123
interactions anti K + N, SU(3) x SU(3) chiral Lagrangian model for scattering lengths for, (T), 25:28037
interactions anti K + N, Veneziano formula for Regge fits to, 23:46722
interactions anti K^0 + N $\rightarrow$ K + Ξ at 2 to 5 GeV/c, Regge cut model for near-forward differential cross sections for, 25:59483
interactions anti K^0 + N, asymptotic behavior of amplitudes of, 23:16957(T) (BNL-tr-243)
interactions anti K^0 + N, cross section differences between K^0 + N and, 24:5315
interactions anti A + N $\rightarrow$ anti Σ + N, boundary-condition model for, 21:15334
interactions anti N + N $\rightarrow$ 2π, field—current identity for nucleon isovector form factor from, 24:1605
interactions anti N + N $\rightarrow$ 3π, parametrization of amplitudes for, 23:46689
interactions anti N + N $\rightarrow$ 4π, current algebra and PCAC for double soft π production from, 21:9778
interactions anti N + N $\rightarrow$ 5π, amplitudes for boson resonance production in, 21:13707
interactions anti N + N $\rightarrow$ anti K + K + π in generalized Veneziano model, 25:45733
interactions anti N + N $\rightarrow$ anti K + K, nucleon isoscalar form factors from amplitude for, (T), 21:46522
interactions anti N + N $\rightarrow$ anti N + N at large angles, additivity and factorizability in quasi-independent quark model for, 23:49153 (ITF-69-24)
interactions anti N + N $\rightarrow$ anti N + N, analyticity properties of helicity amplitudes of, 22:9580 (CEA-R-3303)
interactions anti N + N $\rightarrow$ anti N + N, differential cross sections and form factor for, (T), 25:5372 (CNRS-CPT-70-P-331)
interactions anti N + N $\rightarrow$ anti N + N, dispersion theoretic calculation of two-π exchange effects on amplitudes of forward, 22:39383
interactions anti N + N $\rightarrow$ anti N + N, finite-energy sum rules for amplitude from quasipotential equation for, 23:32757 (ITF-69-30)
interactions anti N + N $\rightarrow$ anti N + N, kinematical singularities, crossing matrix, and kinematical constraints for helicity amplitudes for, 22:29770
interactions anti N + N $\rightarrow$ anti N + N, O(4) symmetry and Regge pole theory for, 21:42421 (UCRL-17738)
interactions anti N + N $\rightarrow$ anti Y + Y, quark model for, 21:9781
interactions anti N + N $\rightarrow$ γ + γ, (n - p) mass difference from partial-wave amplitudes for, 23:18865
interactions anti N + N $\rightarrow$ K + anti K + π at rest, four-point Veneziano functions for mass spectra and angular distributions in, (T), 25:9765 (NP-18578)
interactions anti N + N $\rightarrow$ N + anti N, use of finite-energy sum rules for unequal mass bootstrap, 24:3618
interactions anti N + N $\rightarrow$ N + anti N, Veneziano representation for, 24:3637
interactions anti N + N $\rightarrow$ N*(Y*) + anti N*(Y*) at high energies, quark model for test of additivity from joint decay distribution from, 22:13735
interactions anti N + N $\rightarrow$ pseudoscalar + vector mesons, Regge pole model for t-channel, 22:48373

interactions anti N + N → π + ω at high energies, superconvergence relations for, 22:17940 (DESY-67/38)
interactions anti N + N → π + π, effects of higher N* resonances on nucleon electromagnetic form factors from amplitudes of, 24:3593
interactions anti N + N → π + π, generalized isospin matrices for projection operators for, 23:39742
interactions anti N + N → π + π, nucleon electromagnetic form factor from amplitude of, (T), 22:5530
interactions anti N + N → π + π, O(4) symmetry and Regge-pole theory for, 21:42426
interactions anti N + N → π + π, O(4) symmetry and Regge pole theory for, 21:42421 (UCRL-17738)
interactions anti N + N → π + π, Regge pole effect on contribution to nucleon electromagnetic form factors from, 24:13061
interactions anti N + N → π + π, Regge poles in forward, 22:7489 (UCSD-10-P-10-29)
interactions anti N + N → π + π, spin-flip coupling constant f*—N—N from, 22:44448
interactions anti N + N → π + rho at high energies, superconvergence relations for, 22:17940 (DESY-67/38)
interactions anti N + N → π + rho, multichannel N/D equations for bound-state mass of π in, (T), 25:12202
interactions anti N + N → π + rho, nucleon isoscalar form factors from amplitude for, (T), 21:46522
interactions anti N + N → π + rho(ω), coupling constant relations from superconvergence relations for, 22:34972
interactions anti N + N → π, axial vector renormalization and Goldberger—Treiman relation for, 22:7498
interactions anti N + N → rho + π, two-channel model for, 21:40213
interactions anti N + N → two pseudoscalar mesons, relation between amplitudes for backward elastic meson—nucleon interactions and, 21:46533
interactions anti N + N → Y + anti Y at high energies in O(3,1) symmetry, 22:34975
interactions anti N + N → Y + anti Y, conspiracy relation for, 22:29686
interactions anti N + N above 350 MeV, matter—antimatter separation in model for, (T), 23:34596
interactions anti N + N and N + N at high energies, upper bounds on cross section differences for, 24:33018
interactions anti N + N at 0.3 to 2.0 GeV/c, s and t channel effects in elastic, 22:50385
interactions anti N + N at 2.6 GeV/c, two-pion-exchange contributions to, 22:46467
interactions anti N + N at 50 to 300 MeV, boundary-condition model for, 21:15335
interactions anti N + N at high energies, formulas with multiple rescatterings by arbitrary Regge poles for elastic and charge-exchange, (T), 24:52097
interactions anti N + N at high energies, multiperipheral model for total cross sections of, 23:36920
interactions anti N + N at high energies, multiple-scattering corrections in quark model for, 22:50366
interactions anti N + N at high energies, Regge pole model for forward charge exchange, (T), 22:13744 (IPNO/TH-108)
interactions anti N + N at high energies, Regge pole exchange models for elastic, 24:8641
interactions anti N + N at high energies, Reggeized eikonal formulation for, 23:51867(R) (NYO-1984-13)
interactions anti N + N at high energies, review of properties of secondary particles produced from, 21:46550
interactions anti N + N at high energies, review of experiments on, 21:31578
interactions anti N + N at high energies, review of multiple production in annihilation, (E), 22:39253(T) (ORNL-tr-1538-A)
interactions anti N + N at high energies, review of statistical model for cross sections for meson production in, (T), 25:14680 (INP-719)
interactions anti N + N at high energies, rho' conspiracy for forward charge-exchange, 22:20277
interactions anti N + N at high energies, shower enhancement of branch-point contribution to total cross sections for, 24:28550
interactions anti N + N at high energies, SU(3) symmetry and exchange degeneracy in Regge pole—cut model for, (T), 25:12217
interactions anti N + N at high energies, translation of symmetry properties of helicity amplitudes for polarization in, 23:46656
interactions anti N + N at high momentum transfers, analysis of elastic, 21:27383
interactions anti N + N in meteor showers in atmosphere, evidence for, (E), 21:9699
interactions anti N + N in nuclei, meson exchange in, (T), 23:31056 (JINR-P4-4376)
interactions anti N + N in quark model, real part of amplitude for, 21:25279
interactions anti N + N in urbaryon model, cross sections for forward elastic, 21:35300
interactions anti N + N to 300 MeV, OBE potential models for, 22:26644
interactions anti N + N, absorptive Veneziano model for, (T), 24:49533
interactions anti N + N, asymptotic behavior of amplitudes for, 22:37167
interactions anti N + N, behavior of Regge residues near zero momentum transfer, 23:5710
interactions anti N + N, Bethe—Salpeter equation in ladder approximation for vector bound states in, 24:18170
interactions anti N + N, coherence and interference effects in, 23:13088 (ANL/HEP-6812, pp 198-214)
interactions anti N + N, comparison between on-shell and off-shell calculations for, 22:3456
interactions anti N + N, conference on, 23:13083 (ANL/HEP-6812)
interactions anti N + N, confluence of Regge trajectories and SU(2)/sub W/ symmetry for, 22:9660
interactions anti N + N, diffractive Regge pole model and conspiracy relation for, (T), 24:8643
interactions anti N + N, dispersion sum rules for, 21:33698
interactions anti N + N, dispersion sum rules for, 21:25315 (JINR-P2-3253)
interactions anti N + N, effect of annihilation on matter—antimatter separation in blackbody radiation, 24:26432
interactions anti N + N, exchange degeneracy and backward superconvergence in, 22:39381
interactions anti N + N, existence of heavy meson resonances from bound states in, 25:1520
interactions anti N + N, expansion of partial wave amplitudes for, 22:48375
interactions anti N + N, formulation of Reggeized absorption model with exchange degeneracy for elastic and charge-exchange, (T), 25:53159
interactions anti N + N, isospin dependence of cross sections for annihilation, (T), 22:24641
interactions anti N + N, mass and width of quasinuclear levels in, (T), 24:10756
interactions anti N + N, model for analysis of multiple π production in, 24:28569
interactions anti N + N, model for strong short-range absorption in, 23:1637
interactions anti N + N, multiple particle production in, (T), 21:7502
interactions anti N + N, O(4) expansion of helicity amplitudes of, 23:15099
interactions anti N + N, O(4) expansion of helicity amplitudes of, 23:13095
interactions anti N + N, O(4) formalism for off-shell, 22:46408
interactions anti N + N, O(4) symmetry and Regge pole theory for, 21:29619
interactions anti N + N, one-, two-, and three-pion exchange in, (T), 23:39750
interactions anti N + N, optical-model calculation for polarization in, (T), 23:8810
interactions anti N + N, ω and rho production in, 21:23331
interactions anti N + N, polarization experiments to test T and CPT invariance in, 23:5658
interactions anti N + N, poles in amplitude of, 22:41757
interactions anti N + N, production of exotic resonances in Regge pole analysis of, 23:42661
interactions anti N + N, π Regge pole conspiracy for, 21:35305
interactions anti N + N, π Regge trajectory in Bethe—Salpeter equation for, 24:13052
interactions anti N + N, ππππN anti N five-point function for, (T), 24:45521
interactions anti N + N, quark pair production in, (T), 21:15332
interactions anti N + N, Regge pole model with diffractive correction for, (T), 24:42903
interactions anti N + N, Regge trajectory of π in O(4) group formalism for, 24:18169
interactions anti N + N, relation with N + N interactions, 21:37794
interactions anti N + N, relativistic one-boson-exchange model for meson spectrum in bound states of, (T), 25:3358 (DESY-70/49)
interactions anti N + N, resonance structures (2190), (2345), and (2380) in cross sections for, 23:49149
interactions anti N + N, review on, 23:39710
interactions anti N + N, saturation of superconvergence sum rules for, 22:22389
interactions anti N + N, selection rules for production of two resonance particles in final state of, (T), 23:34584
interactions anti N + N, SU(3) and exchange degeneracy in Regge-pole-cut analysis of total cross sections for, (E/T), 25:14660
interactions anti N + N, sum rules for meson—nucleon coupling constants for contribution to intermediate states of, (T), 24:52133
interactions anti N + N, superconvergence relation for backward, (T), 21:44358
interactions anti N + N, superconvergence sum rules for, 21:37791
interactions anti N + N, superconvergence sum rules for amplitude of, 22:7499
interactions anti N + N, symmetry and quark model predictions for, 23:13088 (ANL/HEP-6812, pp 198-214)
interactions anti N + N, t - u crossing symmetry in Veneziano model for meson trajectories in, (T), 25:1561
interactions anti N + N, tests of basic assumptions of complex angular momentum method for helicity amplitudes of, 22:9578
interactions anti N + N, theory of linearly rising trajectories for annihilation, 25:9769
interactions anti N + N, unified description of quark-model exchange degeneracy predictions for, 24:10769
interactions anti N + N, unitary restrictions on dynamical groups for amplitude of, 22:13829
interactions anti N + N, unitary symmetries for, 23:15109
interactions anti τ + N → l⁺ + N + π, cross sections for, (T), 22:44393
interactions anti τ + N → l⁺ + N, cross sections for, (T), 22:44393
interactions anti τ + N → anti l + N + π in (3,3) resonance region, kinematics and model of single π production in, (T), 23:8777
interactions anti τ + N → Δ(1236) + l, differential cross section for lepton polarization in, 22:3358
interactions anti τ + N → Λ + π + anti μ, S-wave πΛ phase shift from, 23:23488
interactions anti τ + N → μ⁺ + hadrons in underground cosmic-ray experiments, μ⁺ inelasticity in, 24:42933
interactions anti τ + N → μ⁺ + meson + baryon, urbaryon model of hadrons for, 25:59394
interactions anti τ + N → N + μ, coupling of nucleonic and muonic currents in, (T), 22:26622
interactions anti τ + N → N + W⁺⁻ + μ⁺⁻ below 500 GeV, total cross section for, (T), 23:30740
interactions anti τ + N → N* + μ, N* production in, (T), 21:15312
interactions anti τ + N → Y + l⁺, weak boson theory for, 23:5581
interactions anti τ + N at high energies, electron and polarized baryon production from, (T), 21:9762
interactions anti τ + N at high energies, lectures on current commutators, dynamical models, and quantum electrodynamics for μ⁺ and hadron production in, (T), 25:22761 (INP-712(Vol.1), pp 1-52)
interactions anti τ + N, deep inelastic, (T), 25:22775
interactions anti τ + N, form factors and differential and total cross sections for Δ and Σ resonance production in, (T), 25:12174
interactions anti τ + N, helicity formalism for general formula and time reversal invariance and PCAC for hadronic current in resonance production in antilepton and arbitrary-spin baryon or baryon resonance production in, 24:3609
interactions anti τ + N, Pomeron and Adler sum rules from diffractive model of scaling for ratio of cross sections of τ + N interactions with cross sections of, (T), 24:47415 (LNF-70/27)
interactions anti τ + N, Regge pole model for hadron production in, (T), 25:14635 (NYO-4204-9)
interactions anti τ/ sub μ/ + N → N + π + μ⁺ in heavy-liquid bubble chamber, cross sections for, 21:33591 (CERN-67-12)
interactions anti τ/sub l/ + N → N* + anti l, differential cross sections for, 21:35294
interactions anti p + N at 3 GeV/c in emulsions, K and π emission in annihilation, (E), 22:46332
interactions anti p + N at 5 GeV/c in emulsions, cross sections for, (E), 25:1401
interactions anti p + N at 5 GeV/c in emulsions, preliminary results for, (E), 22:39261
interactions anti p + N at 5 GeV/c, review of, 23:18795 (CONF-671217-, pp 589-695)
interactions anti p + N, isolation of Pomeranchuk contribution to total cross section for, (T), 24:13098
interactions at 20 to 100 MeV, equations for three-body, (T), 22:7637(R) (COO-1573-33)
interactions at high energies in cosmic radiation, model for isobar and pionization component of, 24:24379
interactions at high energies, derivation of optical potential for, 23:16968
interactions at high energies, dynamical statistical model for elastic, 22:1452
interactions at high energies, review of, (E), 25:7679 (CONF-690608-, pp 167-87)
interactions at low and intermediate energies, conference on, 24:26366
interactions at low energies, phase-shift analysis of high-precision (p,p) polarization data at 19.7 MeV for, 22:3256
interactions at very high energies, fireball model with N* excitation and particle anisotropy from pionization process in, (T), 25:17473
interactions α + N, resonating-group calculation of effective potential for, (T), 24:10909
interactions d + N, two-pion exchange contribution to form factor for, (T), 23:8820
interactions Δ + N, quasi-nuclear model for many-baryon resonance production in potential, (T), 25:30895 (NP-18779)
interactions Δ + N, quasi-nuclear model for production of two- and three-baryon resonances in, (T), 25:9803 (ITEF-759)
interactions Δ + N, quasinuclear model for two- and three-baryon nuclei resonance production in potential, (T), 25:7690
interactions e + N → Δ(1236), dispersion relations solution for, 22:3328
interactions e + N → e + hadrons in dispersion-theoretic models, Bjorken limit and scaling behavior of structure functions for, 25:17430
interactions e + N → e + N + π + π (soft), nucleon axial-vector form factor from, (E), 23:30734
interactions e + N → e + N + π + π using current algebra and PCAC method, measurement of nucleon axial-vector form factor from, 22:34903
interactions e + N → e + N + π (soft), nucleon axial-vector form factor from, (E), 23:30734
interactions e + N → e + N + π in (3,3) resonance region, kinematics and model of single π production in, (T), 23:8777
interactions e + N → e + N + π, at threshold energy, current algebra and PCAC hypothesis for, 22:50331
interactions e + N → e + N + π, dispersion relation theory of π production in, 22:24604
interactions e + N → e + N + π, dispersion relations for partial-wave amplitudes of, 23:23414
interactions e + N → e + N + π, photon—vector-meson analogy model for, 23:42598
interactions e + N → e + N + X, crossing relation with lepton pair production in strong interactions, (T), 24:10726 (JINR-E2-4791)
interactions e + N → e + N, scaling, Pomeranchuk trajectory, and J = 1 fixed poles from finite-energy sum rule analysis of virtual Compton, (T), 25:43584 (ITF-71-27-E)
interactions e + N → e' + N*, N* → N + π, electromagnetic transition form factors for, (T), 21:2416
interactions e + N → e + N*⁺, C violation in, (T), 21:29475
interactions e + N → e + N₁₁*, form factors for γ NN* vertex from, (T), 21:2420

interactions e + N → e + π + N, reconstruction scheme for amplitude of, 22:13702
interactions e + N → A + K, use of current algebra and PCAC hypothesis for amplitudes of, 22:15715
interactions e + N → N + π, nucleon and electron electromagnetic form factors from threshold dominance in sidewise dispersion relations for, 23:42607
interactions e + N → N*, form factors and vertex amplitudes for, (T), 22:5534
interactions e + N → π + N at high energies and large momentum transfers, (T), 22:5539
interactions e + N → π + N at high energies, Regge formalism for meson (π) electromagnetic form factor from, 24:3592
interactions e + N → π + N at low energies, dispersion theory of low-energy limits for, 22:46436
interactions e + N → π + N at low energies, PCAC hypothesis for threshold cross sections for, (T), 25:5333
interactions e + N → π + N at threshold, current algebra sum rules for physical amplitudes of, 23:39658
interactions e + N → π + N, choice of frame in mass extrapolation in vector dominance model for, (E), 24:28502 (DESY-70/11)
interactions e + N → π + N, computer program and Born approximation for cross sections for, (T), 23:1614
interactions e + N → π + N, evaluation of multipoles for, (T), 23:16948
interactions e + N → π + N, Jost—Lehmann—Dyson representation for covariance of retarded commutators for, (T), 24:42920
interactions e + N → π + N, kinematical singularities in gauge invariance for amplitudes of, (T), 25:38693
interactions e + N → π + N, momentum transfer dependence of γNN* vertex in dispersion theoretical model for, 23:46651
interactions e + N → π + N, on-shell subtracted dispersion relations and low-energy theorems and sum rules from current algebra for, (T), 25:3368
interactions e + N → π + N, π form factor from production in, 23:5572
interactions e + N → π + N, review of vector dominance model for π production in, (T), 25:53076
interactions e + N → π + N, sum rule for axial vector form factor and mass of axial-vector meson in, (T), 24:47399
interactions e + N → π + N, time reversal violation effects in, (T), 23:3781
interactions e + N → π + N, vector-meson dominance for π + N → rho + N interactions relation with, (T), 25:53074
interactions e + N → $\pi^0(\pi^+)$ + N near Δ(1236), Born terms for longitudinal cross section for, 24:12974
interactions e + N → π^+ + N, test of vector dominance model in cross sections for, (E/T), 25:40927
interactions e + N → $\pi^+(\pi^-)$ + N at low energies, current algebra for, (T), 25:7584 (DNPL/R-8)
interactions e + N → Σ + K, use of current algebra and PCAC hypothesis for amplitudes of, 22:15715
interactions e + N at 6 GeV in lead absorber, lateral distributions for electromagnetic cascade production from, (E), 21:40165 (IAE-1201)
interactions e + N at high energies and large momentum transfer, one-particle-exchange diagrams for π production from, (T), 22:11628
interactions e + N at high energies and large momentum transfers, production of soft mesons in, (T), 23:34619
interactions e + N at high energies in renormalizable theory, deep inelastic, 24:47407
interactions e + N at high energies, asymptotic cross sections for, (T), 23:51893
interactions e + N at high energies, composite structure of nucleons from, (E/T), 24:24285
interactions e + N at high energies, conserved vector current hypothesis and current commutators for relation with τ + N interactions for, (T), 25:53106
interactions e + N at high energies, constitution of electric current from asymptotic behavior of cross sections for inelastic, (T), 23:10789
interactions e + N at high energies, differential cross sections and vector dominance model for pseudoscalar meson production in, (T), 25:22727 (ITF-70-72)
interactions e + N at high energies, form factors from transverse polarization measurement in elastic, 24:12994
interactions e + N at high energies, inelastic, (T), 22:22343 (CONF-670923-, pp 109-27)
interactions e + N at high energies, lectures on current commutators, dynamical models, and quantum electrodynamics for hadron and electron production in, (T), 25:22761 (INP-712(Vol.1), pp 1-52)
interactions e + N at high energies, longitudinal photoabsorption cross sections for, 24:15507 (SU-1206-217)
interactions e + N at high energies, review of experiments on inelastic, 22:22271 (CONF-670923-, pp 128-55)
interactions e + N at high energies, review of inelastic, (T), 25:53072
interactions e + N at high energies, vector meson dominance model for cross sections and vector meson spin density matrix elements for phi, ω, and rho production in, 23:36867 (DESY-69/18)
interactions e + N at low and intermediate energies, conference on, 24:26365
interactions e + N at low energy, equal-time commutators for π production in, 25:7606
interactions e + N at very low energies, review of π^+ and π^0 production in, (E/T), 25:56404 (CONF-701121-8)
interactions e + N below 6 GeV, review of experiments on nucleon form factor from, 22:22269 (CONF-670923-, pp 59-77)
interactions e + N beyond resonance region, model with π form factor for π production in, (E/T), 25:43583 (DESY-71/22)
interactions e + N for test of current commutation relations, minimum electron energy for, 21:29499
interactions e + N in parton model, scaling in deep inelastic, 25:59431
interactions e + N in Regge theory, pion production in, 23:46648
interactions e + N review of duality and resonance behavior in inelastic, (E/T), 25:12068 (SLAC-PUB-842)
interactions e + N up to 2 GeV, installation for analysis of, 22:44567
interactions e + N, absence of form factor in e^3 corrections to amplitudes of, 25:30819
interactions e + N, asymptotic behavior of amplitude for one-hadron production in, 24:37687
interactions e + N, asymptotic behavior of form factors from, (T), 23:8770 (UCSD-10-P-10-48)
interactions e + N, asymptotic behavior of N* production in, 22:39319
interactions e + N, asymptotic properties of structure functions for inelastic, 23:16949
interactions e + N, Bethe—Salpeter wave function with single nucleon and meson (π) exchange γNN*-transition potentials for Δ(1236) production amplitudes in, 23:51879 (DESY-69/33)
interactions e + N, breakdown of scaling invariance in generalized Bjorken limit of perturbation theory for meson production in, (T), 25:1438 (AD-706834)
interactions e + N, broken scale invariance for kinematic moments of production cross sections of, (T), 24:52003 (ORO-2504-159)
interactions e + N, broken-scale invariance for current-commutator scheme for asymptotic sum rules for particle production cross sections in, 24:10709
interactions e + N, class of asymptotic limits for π production in, 25:45696
interactions e + N, coincidence experiments for N* production in, 24:24271
interactions e + N, comparison of vector-meson dominance predictions with π production in, 25:27982 (DESY-71/12)
interactions e + N, current algebra and PCAC constraints on asymptotic behavior of nuclear form factors from, 24:12996
interactions e + N, current algebra sum rules for nucleon form factors and pion production amplitude in, 21:35286
interactions e + N, current commutators near light cone for generalized scaling laws for inelastic, (T), 24:49386
interactions e + N, Deser—Gilbert—Sudarshan representation for structure functions for particle production in, (T), 25:3329
interactions e + N, dimension of scale-invariance-breaking Hamiltonian from longitudinal structure function in inelastic, (T), 25:47803
interactions e + N, dispersion relation predictions of multipoles for π production in, 24:52031
interactions e + N, e—μ equality from elastic, 23:5512 (SLAC-PUB-502)
interactions e + N, effect of electromagnetic structure of nucleons on equivalent photon spectrum for peripheral, 22:26598
interactions e + N, electromagnetic form factors from elastic, 22:3326
interactions e + N, electromagnetic structure of nucleons from, 23:8713 (TID-24667, pp 113-36)
interactions e + N, empirical relation of π^+ + p → π^0 + missing mass interactions with inelastic, (T), 25:30795
interactions e + N, equal-time commutators from broken conformal invariance for asymptotic sum rules for particle production in, (T), 24:49567 (IFPTH-7/70)
interactions e + N, field theoretic model for deep inelastic, 23:21075
interactions e + N, final-state interactions and T-violating effects in single π production in, 24:24412
interactions e + N, fixed-t dispersion relations for P_{33} resonance production in, (T), 25:30801
interactions e + N, form factors and vertex amplitudes for elastic, (T), 22:5534
interactions e + N, gauge invariance and Borne approximation in π production in, 24:18143
interactions e + N, hadronic electromagnetic mass difference relation with inelastic, (T), 24:12993
interactions e + N, hadronic s-channel helicity conservation for 2π production in diffractive, (T), 25:12165
interactions e + N, inelastic form factors for nucleon resonance production in, (T), 22:22356
interactions e + N, infinite multiplets for lepton pair annihilation channel in deep inelastic, (T), 25:47819
interactions e + N, kinematics and saturation of sum rules for inelastic, 22:22352
interactions e + N, lectures on, (T), 25:22726 (INP-712(Vol.1), pp 97-106)
interactions e + N, light-cone expansions for sum rules for deep inelastic, (T), 25:47791
interactions e + N, low-energy theorems and sum rules for π production amplitudes of, 23:44627
interactions e + N, mass-dispersion and current algebra theory for double-π production in, (T), 23:10778
interactions e + N, model dependence of form factors for inelastic, (T), 22:39715
interactions e + N, model for excitation of nucleon from, 22:3334
interactions e + N, model for excitation of nucleons in, 22:26596
interactions e + N, model for hadrons as extended objects for particle production in deep inelastic, (T), 25:53151
interactions e + N, model for q^{-4} dependence of electronmagnetic form factors from, 23:21079
interactions e + N, models with isobar resonances for deep inelastic, (T), 25:17442
interactions e + N, momentum-transfer dispersion relations for π^+ and π^- production in, 24:37702
interactions e + N, multiperipheral model for scaling property of structure functions for deep inelastic, (T), 25:19959
interactions e + N, nucleon electromagnetic form factors for, 22:46362
interactions e + N, nucleon electromagnetic structure determination from, (T), 22:13718
interactions e + N, nucleon electromagnetic structure from, (T), 22:17900
interactions e + N, nucleon form factor at asymptotically great momentum transfer from, (T), 23:7108
interactions e + N, nucleon form factors from, 23:15031
interactions e + N, nucleon structure determination from N* production in, (T), 25:40937
interactions e + N, octet dominance on light cone for particle production in deep inelastic, (T), 25:50104
interactions e + N, one- and two-pion exchange in, (T), 21:37856
interactions e + N, Orsay electron linac experimental facility for studying, 23:52089
interactions e + N, overlapping resonance model of deep inelastic, (T), 24:49369 (NYO-4076-9)
interactions e + N, overlapping resonance model of deep inelastic, 25:30782
interactions e + N, parameters from inelastic, 23:5512 (SLAC-PUB-502)
interactions e + N, parton model with Poisson distribution for inelastic, (T), 24:45471
interactions e + N, PCAC hypothesis and current algebra analysis of cross sections for pion production in, 25:53061
interactions e + N, pion-gauge conditions for N* production in, 24:5268
interactions e + N, polarization asymmetry in inelastic, 24:32995
interactions e + N, Pomeranchuk exchange contribution to virtual γ + N Compton interactions from inelastic, 23:27780
interactions e + N, Pomeranchuk trajectory and fixed poles in virtual Compton amplitude for, 25:33648
interactions e + N, positivity restrictions among structure functions for polarized inelastic, 25:45706
interactions e + N, production of strongly interacting W boson in, 24:12988
interactions e + N, π production and form factors from, 22:3326
interactions e + N, quantum electrodynamics test from elastic, 22:5636
interactions e + N, Regge pole model for hadron production from, (T), 25:14635 (NYO-4204-9)
interactions e + N, relativistic gauge-invariant model for N* production in, 24:3570
interactions e + N, relativistic model for inelastic form factors, widths, and locations of N* production in, (T), 25:59337
interactions e + N, review of deep inelastic, (T), 25:9706 (SLAC-PUB-843)
interactions e + N, review of elastic and inelastic, (E/T), 23:51876 (DESY-69/21)
interactions e + N, review of elastic, (E/T), 23:49156
interactions e + N, review of experimental data on N* production in, 24:24282
interactions e + N, review of nucleon structure from experiments on, 22:22272 (CONF-670923-, pp 156-95)
interactions e + N, review of π production from, 22:1403 (SLAC-PUB-355)
interactions e + N, review of vector dominance model for total cross sections for particle production in, (T), 25:53076
interactions e + N, review of vector meson dominance in hadron production in, (E/T), 25:1361 (DESY-70/31)
interactions e + N, review of, (E/T), 25:1439(T) (BNL-tr-372)
interactions e + N, review on theoretical aspects of inelastic, 24:21964
interactions e + N, scaling and duality in, 25:30787
interactions e + N, structure functions rapid approach to universality in inelastic, (T), 25:14610
interactions e + N, SU(6)/sub W/ symmetry for higher baryon resonance production in, 22:35058
interactions e + N, sum rule for inelastic, 25:33613
interactions e + N, superconvergence and current algebra for production amplitude of, 22:20176
interactions e + N, theory for N*(1236) production from, 21:18938 (DESY-67/1)
interactions e + N, theory of N* (1236) production in, 21:46514
interactions e + N, vector dominance model and broken symmetry for nucleon electromagnetic structure from, 25:47792
interactions e + N, vector meson dominance predictions for single π production in, (T), 25:30789
interactions e + N, vector-meson dominance model of diffractive production of vector mesons in, 24:10708
interactions e^- + N → e^- + N + π, multipole amplitudes for, 21:31557
interactions e^- + N → e^- + N + π, reduction scheme of amplitudes for, (T), 21:7481 (JINR-P2-3062)
interactions e^- + N → e^- + N at high energies and low momentum transfers, Compton scattering cross sections for two-photon-exchange contribution to, (T), 25:59372
interactions e^+ + N → e^+ + N at high energies and low momentum transfers, Compton scattering cross sections for two-photon-exchange contribution to, (T), 25:59372
interactions e^- + N, nucleon form factors from elastic and inelastic, 21:33641
interactions e^- + N, PCAC restrictions on π-production amplitudes in, 21:9747

interactions epsilon + N → epsilon + N, self-consistent calculation of Roper-resonance Regge trajectory in, 25:7676
interactions eta + N at 250 MeV/c, total cross section for, (E), 23:23359 (LNF-69/4)
interactions eta + N in photon reactions with complex nuclei at 1.1 GeV, total cross section for, (E), 23:18782
interactions eta + N, coupling constants and physical operators for, 21:21249
interactions γ + N, chiral-invariant Lagrangian for differential cross sections for, 24:35644
interactions γ + N → 2π + N, current algebra description of, 21:25264
interactions γ + N → A_1 + N, hard-meson current algebra for peripheral, 24:8699
interactions γ + N → A_1 + N, hard-pion current-algebra calculation of cross section for, 23:3722
interactions γ + N → Δ + rho⁺(rho⁻), relation of electromagnetic moments of charged rho to, 25:30799
interactions γ + N → Δ (1920) → rho⁰ + N in vector-meson dominance model, cross sections for, 22:50325
interactions γ + N → Δ(1236) + π at 0.7 to 1 GeV, angular distribution asymmetry of π emission in, (T), 25:9798
interactions γ + N → Δ(1236) + π, static multipole moments of Δ(1236) from saturating superconvergence sum rules in, 23:27778
interactions γ + N → Δ(1236) in lead nuclear field, high-energy neutron detection from cross sections for Coulomb, (T), 24:21955 (UR-875-295)
interactions γ + N → Δ(1236), dispersion relations solution for, 22:3328
interactions γ + N → Δ(1950) → rho + N, differential cross section and rho density matrix elements for, 25:53086
interactions γ + N → Δ(2420) → rho + N, differential cross section and rho density matrix elements for, 25:53086
interactions γ + N → Δ(2420) → rho⁰ + N in vector-meson dominance model, cross sections for, 22:50325
interactions γ + N → Δ⁰ + ω, OPE amplitude and ωπγ coupling constants from, 25:27990
interactions γ + N → eta + N at high energies, Regge pole model for eta production in, 22:24607
interactions γ + N → eta + N, phase shift analysis for, 22:1404 (TH-177)
interactions γ + N → eta (X) + N, differential cross sections, angular-distribution asymmetries, and recoil nucleon polarization in Regge pole theory for, 24:28503 (ITF-70-10)
interactions γ + N → γ + baryon and γ + N → vector meson + baryon, photon—vector-meson analogy model for relation between, 23:25557
interactions γ + N → γ + N at high energies, test of vector dominance model in Regge trajectory effects in forward Compton, (T), 25:22730
interactions γ + N → γ + N in s- and u-channel, contribution to amplitude for baryon resonance production, (T), 22:22357
interactions γ + N → γ + N, dynamical theory for, 21:25287
interactions γ + N → γ + N, method for derivation of low-energy theorem from amplitude of Compton, 22:44364
interactions γ + N → γ + N, π⁰ → 2γ and eta⁰ → 2γ decay rates from superconvergence relations of Compton, (T), 22:34907
interactions γ + N → γ + N, scale invariance and external mass dependence of Regge residues in multi-Veneziano model for amplitude of Compton, (T), 25:22738
interactions γ + N → γ + N, sum rules and field algebras for Compton, (T), 25:38709
interactions γ + N → γ + N, sum rules for nucleon dipole moment from Compton-effect amplitude of, (T), 25:30776 (JINR-P2-5679)
interactions γ + N → K + Λ (Σ), photon—vector meson analogy model for anti K + N → vector meson + Λ (Σ) relation with, 22:46366
interactions γ + N → K(π) + Λ(Δ), Stichel theorem for, (T), 25:17439
interactions γ + N → Λ + K, use of current algebra and PCAC hypothesis for amplitude of, 22:15715
interactions γ + N → meson + baryon, dynamic quark model predictions for, 21:44349
interactions γ + N → meson + N*, production and decay distributions of final states from polarized, 23:5576
interactions γ + N → N + 2π, use of PCAC hypothesis and current commutation relations for multiple soft-pion production in, (T), 22:44359
interactions γ + N → N + A_1, Regge exchange formalism for differential cross section for, (T), 24:28514
interactions γ + N → N + e⁻ + e⁺ in diamond crystals, use to analyze high energy photon polarization, 21:17020 (CONF-660918-, pp 207-13)
interactions γ + N → N + l⁺ + l⁻ at high energies, ω - rho interference in, 25:5325 (DNPL/R-7, pp 115-38)
interactions γ + N → N + mesons at high energies in SU(3)-symmetric Regge pole model, branching ratios for, 21:42311
interactions γ + N → N + neutral vector meson, quark model for, 23:18877 (ITF-68-36)
interactions γ + N → N + ω⁰, use of linearly polarized photons as parity filter in, 22:37106
interactions γ + N → N + phi⁰, quark model with electromagnetic current with SU(3) singlet and octet components for differential cross section relations for, (T), 25:22866
interactions γ + N → N + pseudoscalar meson, s-channel helicity conservation effects on t-channel Regge cuts in amplitudes of, (T), 25:22736
interactions γ + N → N + π at high energies, translation of symmetry properties of helicity amplitudes for polarization in, (E/T), 23:46656
interactions γ + N → N + π at low energies, current commutators and mass extrapolation theory for parameters of multipole amplitudes of, 22:39330
interactions γ + N → N + π in (3,3) resonance region, kinematics and model of single π production in, (T), 23:8777
interactions γ + N → N + π, chiral Lagrangians formalism for, 25:9726
interactions γ + N → N + π, current algebra study of low-energy behavior of amplitudes for, 22:9550
interactions γ + N → N' + π, current conservation for amplitudes of, 21:42332
interactions γ + N → N + π, currents and current commutators for amplitude of, 22:11706
interactions γ + N → N + π, helicity formalism for, 21:40167
interactions γ + N → N + π, model for N* production in, 22:3451
interactions γ + N → N + π, nucleon magnetic moment relations from modified PCAC hypothesis for, (T), 22:44358
interactions γ + N → N + π, Reggeization of kinematically free amplitudes for, 23:27811
interactions γ + N → N + π, rho—π—γ vertex calculation from modified PCAC hypothesis for, 22:37121
interactions γ + N → N + π, strong-cut Reggeized absorption model for backward, 24:35661
interactions γ + N → N + π, sum rule for π form factor from, 22:34927
interactions γ + N → N + π, vector dominance model for N* production from, 21:31553 (DESY-67/13)
interactions γ + N → N + π(eta), sum rules using boson—fermion commutation relations for, 21:18948
interactions γ + N → N + π⁰ at high energies, mesons (rho) and (ω) trajectories with different slopes for, 24:3572
interactions γ + N → N + rho, N*(2600) production in, (T), 23:15046
interactions γ + N → N + rho⁰, use of linearly polarized photons as parity filter in, 22:37106
interactions γ + N → N + rho⁰, vector dominance model for N* production from, 21:31553 (DESY-67/13)
interactions γ + N → N + rho⁰(ω⁰), quark model with electromagnetic current with SU(3) singlet and octet components for differential cross section relations for, (T), 25:22866
interactions γ + N → N + V (V = rho⁰, ω, or phi), vector dominance, ω—phi mixing, and suppression of phi production in, (T), 23:7112
interactions γ + N → N + vector mesons, quark model for, 22:20184
interactions γ + N → N* + π⁰, test for Regge cuts in angular momentum plane from, (T), 22:22354
interactions γ + N → N** → π + N, resonant amplitudes and cross section for, 21:35287
interactions γ + N → N*, excitation function for N_{11}*(1688) doublet production from, (T), 21:40175
interactions γ + N → N*, form factor for γNN* vertex from, 22:26607
interactions γ + N → N*, suppression of Roper resonance production, (T), 24:40301
interactions γ + N → ω + N at high energies, peripheral model and photon dissociation for, (T), 24:52015
interactions γ + N → ω + N(N*) at 9.1 GeV in deuterium and hydrogen targets, counter study of cross sections for, (E), 25:14512
interactions γ + N → phi + N, distinction between Freund and CHN classification of Pomeranchukon in, 23:46660
interactions γ + N → π + Δ at high energies, contribution of low-energy theorem, 25:14622
interactions γ + N → π + Δ in quark model, cross sections for, (T), 25:1448
interactions γ + N → π + Δ, conspiracy relations in Regge pole theory for, 24:52014
interactions γ + N → π + Δ, sum rules for, 23:42629
interactions γ + N → π + Δ(1236) below 6 GeV, models for, 22:22345 (CONF-670923-, pp 337-75)
interactions γ + N → π + Δ(1236), contributions of $^3/_2^-$ and $^3/_2^+$ intermediate resonances in multipole analysis of, (T), 25:45699
interactions γ + N → π + Δ(1236), production and decay angular distributions for, (T), 22:7468 (UCRL-17867)
interactions γ + N → π + Δ(1236), Regge pole model with calculation of rho, A_1, and π trajectories for differential cross sections and isobar polarization density matrix for, (T), 24:24309
interactions γ + N → π + Δ(1236), superconvergence relations in, 24:52030
interactions γ + N → π + Δ(N), behavior of helicity amplitudes in t channel for, 24:18111 (CONF-690330-, pp 161-4)
interactions γ + N → π + N + γ + γ, perturbation theory for, 22:39335
interactions γ + N → π + N + γ, perturbation theory for, 22:39335
interactions γ + N → π + N above and below 500 MeV, (E/T), 21:5402
interactions γ + N → π + N at 1 to 2 GeV, review of N* production and quark model calculations for, (E/T), 25:33516 (INP-713(Vol.2), pp 49-54)
interactions γ + N → π + N at 210 and 225 MeV, amplitudes, isotopic components, and π + N interaction constant and scattering length difference from phenomenological analysis of, 24:8581(T) (CERN-Trans-68-14)
interactions γ + N → π + N at high energies in O(4) symmetry, conspiracy of Regge poles in, 22:3336
interactions γ + N → π + N at high energies, fixed poles in backward, (T), 23:15044
interactions γ + N → π + N at high energies, generalization of Frautschi—Margolis model for Regge-cut multiple-scattering corrections to differential cross sections of, (T), 24:51999 (AD-705700)
interactions γ + N → π + N at high energies, Lorentz group for Regge pole analysis of phenomenological, 23:44628
interactions γ + N → π + N at high energies, O(3,1) symmetry for conspiring Regge trajectories in, 23:3778
interactions γ + N → π + N at high energies, polarization parameters and target asymmetry for, (T), 25:47775 (DESY-71/27)
interactions γ + N → π + N at high energies, Regge cut multiple scattering corrections to, 23:46642 (NP-17999)
interactions γ + N → π + N at high energies, Regge parametrization for backward π⁺ and π⁰ production in, (E/T), 24:52008
interactions γ + N → π + N at high energies, research at Southeastern Massachusetts Univ., June 1969 to Feb. 1971, (E), 25:33517(R) (NYO-4115-1)
interactions γ + N → π + N at high energies, spin structure of amplitude for, 21:21173
interactions γ + N → π + N at high energies, vector dominance model for relation with vector meson production in π + N interactions for, 24:10721
interactions γ + N → π + N at low energies, current algebra calculation of π production in, 23:32653
interactions γ + N → π + N at low energies, dispersion theory of low-energy limits for, 22:46436
interactions γ + N → π + N at low energies, PCAC hypothesis for threshold cross sections for, (T), 25:5333
interactions γ + N → π + N at threshold, current algebra sum rules for physical amplitudes of, 23:39658
interactions γ + N → π + N below 1 GeV, review of, (T), 25:45694 (LNF-70/54)
interactions γ + N → π + N below 6 GeV, models for, (E), 22:22345 (CONF-670923-, pp 337-75)
interactions γ + N → π + N in quark model, cross sections for, (T), 25:1448
interactions γ + N → π + N in Regge pole theory, conspiracy condition and superconvergence relations for, 21:42314
interactions γ + N → π + N in Regge theory, 23:46648
interactions γ + N → π + N in resonance region, review of quark model of baryons for, 24:6700 (CALT-68-219)
interactions γ + N → π + N in second resonance region, amplitudes of, (T), 24:40300
interactions γ + N → π + N in SU(3)-Regge-pole model, saturation of superconvergence sum rules for, 21:44321
interactions γ + N → π + N in vector dominance model and Regge model, Δ(1236) trajectory contribution to backward, 25:5332
interactions γ + N → π + N near threshold, pole approximation in dispersion relations and vector dominance hypothesis for vector-meson-exchange contributions to, (T), 25:3647
interactions γ + N → π + N with nucleon exchange, Bethe—Salpeter equation in ladder approximation for Δ(1236) production in, 23:46641 (DESY-69/22)
interactions γ + N → π + N, A-dominance model for, 22:7473
interactions γ + N → π + N, baryon Regge-pole contributions to helicity amplitudes for, 25:1446
interactions γ + N → π + N, chiral dynamics for low-energy limit of, 23:39648
interactions γ + N → π + N, chiral Lagrangian model for single π production in, 23:36885
interactions γ + N → π + N, class of quantum fields for, 23:49159
interactions γ + N → π + N, comparison of π⁰ + p → rho⁰ + n interactions at 15 GeV/c with, 25:33569
interactions γ + N → π + N, computer program for calculating parameters of, (T), 24:52001 (LNF-69/59)
interactions γ + N → π + N, conspiracy and gauge invariance in Veneziano model for, 23:51897
interactions γ + N → π + N, conspiracy test in, 22:5540
interactions γ + N → π + N, continuous dispersion sum rules and Regge intercepts for, (T), 24:40320
interactions γ + N → π + N, continuous-moment sum rules for pion conspiracy hypothesis in, 23:7111
interactions γ + N → π + N, continuous-moment sum rules for, (T), 25:12207
interactions γ + N → π + N, Coulomb coupling, gauge invariance, and Regge theory of, 24:10718
interactions γ + N → π + N, direct photon—vector meson coupling scheme for wide-angle pair production in, (T), 21:17129
interactions γ + N → π + N, dispersion analysis of π production in, 23:32652
interactions γ + N → π + N, dispersion relation theory of π production in, 22:24604
interactions γ + N → π + N, dispersion relations for partial-wave amplitudes for, 21:7482
interactions γ + N → π + N, dispersion theory for, 21:18944
interactions γ + N → π + N, divergences of vector and axial vector currents for, 21:23346 (JINR-E2-3196)
interactions γ + N → π + N, dynamical models for superconvergence sum rules for, 22:39458
interactions γ + N → π + N, equal-time commutators and non-Regge behavior of amplitudes for, 24:24313
interactions γ + N → π + N, equivalent experimental set ups for polarization measurements in, (T), 25:53077
interactions γ + N → π + N, evaluation of multipoles for, (T), 23:16948
interactions γ + N → π + N, evidence for B—rho' conspiracy from sum rules for, 23:3682
interactions γ + N → π + N, evidence for isotensor electromagnetic current from, (T), 24:30488

interactions γ + N → π + N, finite-energy sum rules and ω Regge pole residue functions for, 22:34898 (NP-17489)
interactions γ + N → π + N, fixed poles in first-order weak and electromagnetic amplitudes for, 23:5568
interactions γ + N → π + N, fixed-t dispersion relations for π production in, 23:5573
interactions γ + N → π + N, gauge invariance and Regge-pole sum rules for, 21:27336
interactions γ + N → π + N, generalized dispersion sum rules for A_1 trajectory and residue function in, 22:44381
interactions γ + N → π + N, information from vector dominance model on, 23:5558
interactions γ + N → π + N, isotensor electromagnetic current in, (T), 25:14604
interactions γ + N → π + N, kinematic constraints on Regge-pole residues in, 22:11683
interactions γ + N → π + N, kinematic singularities of Regge pole residues in, 21:31591 (NP-16821)
interactions γ + N → π + N, kinematical singularities in gauge invariance for amplitudes of, (T), 25:38693
interactions γ + N → π + N, low-energy theorems and sum rules for amplitudes of, 23:44627
interactions γ + N → π + N, method for deriving angular correlations for, 22:41774 (NP-17531)
interactions γ + N → π + N, moving cut contributions to amplitude for, 23:34565
interactions γ + N → π + N, multiple-scattering corrections in form of Regge cuts for, 24:10711
interactions γ + N → π + N, multipole amplitudes for, 21:31557
interactions γ + N → π + N, N* production in, 23:10766
interactions γ + N → π + N, O(4) symmetry for kinematic limitations for amplitude of, 23:21136 (IFVE-STF-68-46-K)
interactions γ + N → π + N, perturbation theory for cross sections of one- and two-photon, (T), 25:1453
interactions γ + N → π + N, photon—vector-meson analog model for relations between π + N → rho + N interactions and, 22:39323
interactions γ + N → π + N, polarization theorems in, (T), 24:49378
interactions γ + N → π + N, pole terms in fixed angle approach for, 22:3325
interactions γ + N → π + N, relativistic reconstruction of amplitudes at arbitrary angles, 25:53062
interactions γ + N → π + N, review of continuous-moment sum rules for near-forward, 24:18187 (CONF-690330-, pp 202-16)
interactions γ + N → π + N, review of vector dominance model for π production in, (T), 25:53076
interactions γ + N → π + N, saturation of superconvergence sum rule for, 21:21156
interactions γ + N → π + N, simple harmonic forces in nonrelativistic quark model for N* production in, (T), 25:9788
interactions γ + N → π + N, simple phenomenological regularity for near-forward zeros in amplitudes of, 24:6728
interactions γ + N → π + N, Stichel theorem for, (T), 25:17439
interactions γ + N → π + N, structure of helicity amplitudes for, (T), 24:49475
interactions γ + N → π + N, SU(3) x SU(3) symmetry and vector dominance model for sum rules for, 23:51972
interactions γ + N → π + N, sum rules for, 23:42629
interactions γ + N → π + N, superconvergence sum rule relating nucleon magnetic moments and amplitude for, 21:42309
interactions γ + N → π + N, T invariance of bootstrapped currents for, 21:18958
interactions γ + N → π + N, time reversal violation effects in, (T), 23:3781
interactions γ + N → π + N, unitarity condition for matrix elements for, 22:35154
interactions γ + N → π + N, use of Lorentz group in Regge pole analysis of, (T), 22:50321 (UCRL-18377)
interactions γ + N → π + N, vector dominance in, (T), 22:32085
interactions γ + N → π + N, vector dominance model for polarized and unpolarized, 23:49080
interactions γ + N → π + N, vector dominance model for relation between π + N → rho + N interactions and, 24:24272
interactions γ + N → π + N, vector dominance of invariant amplitudes for, 23:49078
interactions γ + N → π + N, vector meson dominance of k^2 dispersion relation for invariant amplitudes for π production in, (T), 25:59351
interactions γ + N → π + N, vector-dominance model for, 24:42914
interactions γ + N → π + N, vector-meson dominance for polarized, 23:42613
interactions γ + N → π + N, Veneziano parametrization for, 23:42624
interactions γ + N → π + N, zero-mass-limit for low-energy theorems for, 23:51883 (UCRL-19220)
interactions γ + N → π + N*, low-energy theorem from current algebra for, 22:11620
interactions γ + N → π + N*, vector dominance model for, 25:30784
interactions γ + N → π + N*, vector dominance model predictions for, (T), 23:42596
interactions γ + N → π + π + N, current algebra and PCAC hypothesis for, 23:3668
interactions γ + N → π(1060)(eta(1070)) + N, Stichel theorem for, (T), 25:17439
interactions γ + N → π(eta) + N, Regge absorption model for forward, (T), 25:56452 (CALT-68-313)
interactions γ + N → π° + N at 12 GeV at large angles, Regge pole theory for differential cross sections of, (T), 25:14598
interactions γ + N → π° + N at high energies, test of Regge pole hypothesis from π° production from, 22:1414
interactions γ + N → π° + N in quark model, cross sections for, (T), 25:1448
interactions γ + N → π° + n, differential cross sections, angular-distribution asymmetries, and recoil nucleon polarization in Regge pole theory for, 24:28503 (ITF-70-10)
interactions γ + N → π° + N, effects of absorptive corrections for N and Δ exchange in backward, 23:51867(R) (NYO-1984-13)
interactions γ + N → π° + N, ω Regge residue functions and finite-energy sum rules for, 22:34921
interactions γ + N → π° + N, PCAC hypothesis from s-wave threshold amplitudes of, (E/T), 25:59373
interactions γ + N → π° + N, Regge cuts due to absorption in, (T), 25:43601
interactions γ + N → π° + N, spin-independent isovector part of amplitude for, (T), 21:17085
interactions γ + N → π° + N, superconvergence sum rules for, 21:27338
interactions γ + N → π° + N, test for Regge cuts in angular momentum plane from, (T), 22:22354
interactions γ + N → π° + N_{33}*(1236), current commutator for coupling constant and N_{33}* magnetic moment from (T), 21:9735
interactions γ + N → π⁺ + n at 2 to 4 GeV, absorption correction in, (T), 22:41776
interactions γ + N → π⁺ + N at high energies, multiple scattering corrections to, 23:27765 (NP-17871)
interactions γ + N → π⁺ + N at high energies, π conspiracy residues and trajectories in, 22:37100 (IC-68/40)
interactions γ + N → π⁺ (π⁻) + N near threshold, dispersion relations for, (E/T), 24:28472
interactions γ + N → π⁺ (π⁻) + N, low-t theorems for, 24:40312
interactions γ + N → π⁺(π⁻) + Δ Coulomb couplings and Born-term analysis for, 25:30785
interactions γ + N → π⁺(π⁻) + Δ, low t theorem formulation by minimal gauge invariant extension of π exchange in, 24:26391 (CALT-68-245)
interactions γ + N → π⁻(π⁺) + Δ⁺⁺(Δ⁻), conspiracy and duality in model for forward cross sections of, (T), 25:3318
interactions γ + N → π⁺(π⁻) + N and π + N → vector mesons + N, vector dominance predictions for relation between, 23:32651
interactions γ + N → π⁺(π⁻) + N at low energies, current algebra for, (T), 25:7584 (DNPL/R-8)
interactions γ + N → π⁺(π⁻) + N, low t theorem formulation by minimal gauge invariant extension of π exchange in, 24:26391 (CALT-68-245)
interactions γ + N → π⁺(π⁻) + N, low-t theorems for, 24:40312
interactions γ + N → π⁺(π⁻) + N, SU(3) x SU(3) with vector dominance and Regge pole model for sum rule for, 23:42609
interactions γ + N → π⁺(π⁻) + N, SU(3) x SU(3) with vector dominance and Regge pole model for sum rule for, 23:42609
interactions γ + N → π⁺(π⁻) + N, test of pure and absorptive Regge models from finite-energy sum rules for differential cross sections for, (T), 24:49372 (SINP-TH-69-8)
interactions γ + N → π⁺(π⁻) + N, tests of Regge pole-cut models from differential cross sections of, (T), 25:22740
interactions γ + N → rho + Δ, minimal gauge-invariant one-vector-meson-exchange model for, 24:37696
interactions γ + N → rho + N, coherent, 24:35657
interactions γ + N → rho + N, differential cross sections for Δ(1950) and Δ(2420) production in, (T), 24:26393 (DESY-70/8)
interactions γ + N → rho° + N in nuclei, Glauber model for coherent production in, 24:18110 (CONF-690330-, pp 152-60)
interactions γ + N → rho° + N in nuclei, rho°—N total cross section estimate from, 21:33712
interactions γ + N → rho° + N, dynamical effects of instability in, (T), 25:43604
interactions γ + N → rho° + N, modified vector dominance in algebra of vertex strengths for, 23:49095
interactions γ + N → Σ + K, use of current algebra and PCAC hypothesis for amplitudes of, 22:15715
interactions γ + N → vector meson + Δ(1236), photon—vector meson analogy model for π + N → π + Δ(1236) interactions relation with, 22:46366
interactions γ + N → vector meson + N, conspiracy relations in Regge-pole theory for, 22:34922
interactions γ + N → vector mesons + N in Regge pole theory, kinematic singularities and zeros for, (T), 22:44356
interactions γ + N above 100 GeV, feasibility of multibody production in, (E), 25:1369 (UH-511-81-70)
interactions γ + N at 0.4 to 1 GeV in emulsions, cross sections for, (E), 23:14944
interactions γ + N at 1 to 3 GeV, angular distributions for forward π⁺ production, (T), 22:20193
interactions γ + N at 10^{13} to 10^{14} eV, π production in, (E), 24:21913
interactions γ + N at 150 to 300 MeV, single π production by, (T), 23:1881 (ORNL-TM-2364)
interactions γ + N at 160 to 230 MeV, total cross sections for π⁺ and π⁻ production in, 23:30729
interactions γ + N at 180 to 1000 MeV, amplitude relations with π + N → π(eta) + N amplitudes, (T), 24:3591
interactions γ + N at 2.0 GeV/c, magnetic spectrometer and differential gas Cherenkov counter study of cross sections for e and μ production from, 21:33590
interactions γ + N at 2.0 to 3.0 GeV/c, magnetic spectrometer and differential gas Cherenkov counter study of cross sections for π⁻ and π⁺ production from, 21:33590
interactions γ + N at 2.6 to 16 GeV, natural-spin—parity exchanges and cross section approximations for pseudoscalar meson and nucleon production in, (T), 24:26396
interactions γ + N at 300 to 800 MeV, isobar model of Compton, (T), 21:44330
interactions γ + N at 6 GeV, angular-defining counter study of wide-angle μ pair production in, (E), 22:22276 (CONF-670923-, pp 409-51)
interactions γ + n at 60 to 750 MeV, differential cross section for Compton, 22:13705
interactions γ + N at 60 to 750 MeV, nucleon electromagnetic structure from Compton, 22:13705
interactions γ + N at high energies and small momentum transfer, SU(3) symmetry and Regge pole model for pseudoscalar and neutral vector meson production in, 22:48347
interactions γ + N at high energies in SU(3) quark model, vector meson production in, (T), 25:9713
interactions γ + N at high energies, cross sections for baryon—antibaryon pair production in, (T), 24:42958
interactions γ + N at high energies, dispersive sum rules for amplitudes of π production in, 23:49077
interactions γ + N at high energies, effect of final-state interactions on properties of rho production in, 24:28513
interactions γ + N at high energies, forward π production from, (T), 21:35283
interactions γ + N at high energies, longitudinal distances in, (T), 23:51893
interactions γ + N at high energies, meson production in, 24:20114
interactions γ + N at high energies, model for partial waves for, 24:18185 (CONF-690330-, pp 181-7)
interactions γ + N at high energies, moving two-Reggeon cut contribution to amplitude of pseudoscalar meson production in, (T), 24:20179
interactions γ + N at high energies, multiple-scattering corrections to cross sections for π⁺ production in, (T), 23:23411
interactions γ + N at high energies, quark model for neutral vector meson production from, 21:21175
interactions γ + N at high energies, quark model for total cross section relations for, (T), 25:14595 (ITF-70-63-P)
interactions γ + N at high energies, review of vector dominance model for hadron production from, (E/T), 24:6705
interactions γ + N at high energies, space—time picture of, 23:32671
interactions γ + N at high energies, sum rules in vector dominance model for vector meson production in, 22:46357 (JINR-E2-3926)
interactions γ + N at high energies, sum rules in vector dominance model for integral of total cross section relation with meson—nucleon interactions, 22:46357 (JINR-E2-3926)
interactions γ + N at high energies, test of CP violation in γ → 2γ transitions in pair production in, (T), 22:24699
interactions γ + N at high energies, test of cross section sum rules for nucleon magnetic moments from forward Compton, (T), 22:22347 (JINR-E2-3715)
interactions γ + N at low and intermediate energies, conference on meson production in, 24:26366
interactions γ + N at low energies, C violation in π production in, (T), 21:7485
interactions γ + N at low energies, dispersion relation-calculation of scattering amplitude for Compton, 22:20188
interactions γ + N at low energies, equal-time commutation relations and PCAC for total amplitude of 2π production in, 22:29666
interactions γ + N at low energies, Kroll—Ruderman theorem and Born approximation for p-wave multipoles for π production in, 25:9724
interactions γ + N at low energies, Panofsky ratio and SU(6) for π production from, 21:9751
interactions γ + N at low energy, equal-time commutators for π production in, 25:7606
interactions γ + N at nucleon resonance, determination of real part of amplitude for Compton, 24:26390 (AD-694033)
interactions γ + N at threshold to 1.5 GeV, collection of data for differential cross sections, recoil polarization, and asymmetry ratio for π production in, (E), 25:38632 (CERN-HERA-70-1)
interactions γ + N below 1.5 GeV, graphs and tables for π production from, (E), 21:15251 (CALT-68-108)
interactions γ + N below 1.5 GeV, review of experiments and theory for single π production in, 22:32089
interactions γ + N below 2.0 GeV, generalized interference model for eta production in, 23:46645
interactions γ + N below 400 Mev, ππ phase shift for Compton, (T), 23:13065
interactions γ + N below 6 GeV, magnetic spectrometer and differential gas Cherenkov counter study of high-mass Y* production in K excitation functions for, 21:33590
interactions γ + N below meson rest energy, harmonic meson production from, (T), 21:896
interactions γ + N from inelastic e + N interactions, Pomeranchuk exchange contribution to virtual Compton, 23:27780
interactions γ + N in nuclei, dispersion sum rule for anomalous magnetic moment of nucleon from, 21:33657
interactions γ + N in O(3,1) symmetry, high-energy behavior of forward Compton, 22:24705
interactions γ + N in O(4) symmetry, exchange of odd-parity Regge trajectories for forward peaks in, 21:33777
interactions γ + N in oxygen-16, impulse approximation for meson (π⁺) production from, (T), 21:35427
interactions γ + N in Regge pole model, helicity amplitudes for forward Compton, 21:37751

interactions γ + N in Regge pole theory, cross-section relations for π, eta, and K production in, 22:17905
interactions γ + N in resonance region, single π production in, 24:24277
interactions γ + N in strong electromagnetic field, final-state interaction for electron production in (T), 25:43606
interactions γ + N in SU(3) quark model, pseudoscalar-meson production in, (T), 25:3321
interactions γ + N in Veneziano model, nucleon electromagnetic mass difference from forward Compton, 24:13010
interactions γ + N in Veneziano model, off-shell single-current amplitude for charged π production in, 25:9725
interactions γ + N with polarized coherent bremsstrahlung, multipole amplitudes from analysis of cross sections for π^+ production in, 24:1538
interactions γ + N, amplitude for vector meson production from, (T), 21:4016
interactions γ + N, analysis of dispersion relations for Compton, 23:8776
interactions γ + N, analysis of experimental tests of vector meson dominance in π and rho° production in, 23:46646
interactions γ + N, angular correlations for pseudoscalar meson production in, (T), 22:24579
interactions γ + N, annihilation amplitude for vector meson production in, (T), 25:50103
interactions γ + N, anomalous real parts of amplitude for ω production and elastic, 25:45704
interactions γ + N, approximate saturation of collinearized algebra of vector densities in group theoretic limit for N* production from, 21:44308
interactions γ + N, Bethe—Salpeter wave function with single nucleon and meson (π) exchange γNN*-transition potentials for Δ(1236) production amplitudes in, 23:51879 (DESY-69/33)
interactions γ + N, Bjorken limit for Compton, 24:47405
interactions γ + N, C and T noninvariance and quantum electrodynamics deviations for wide-angle electron pair production from, 21:40274
interactions γ + N, chiral SU(2) x SU(2) Lagrangians for π production in, 23:18916
interactions γ + N, classical charge-symmetric field theory for cross sections for scalar meson production in, (T), 25:59338
interactions γ + N, conspiracy relations for, 22:44406
interactions γ + N, contribution from Compton graph to cross section for lepton pair production in, (T), 22:24588
interactions γ + N, cosmic-ray properties from μ + N inelastic interactions from validity of Weizsaker—Williams approximation for absorption in, 24:3607
interactions γ + N, current algebra for pion pair production in, 23:13098
interactions γ + N, current commutation algebra for meson production near threshold from, 21:29482
interactions γ + N, cut conspiracy and π evasion in π^+ and π^- production in, 23:18918
interactions γ + N, derivative amplitudes for π production, 25:28000
interactions γ + N, deuteron form factors from π^0 production, 21:42387
interactions γ + N, differential cross sections and finite-energy sum rules for π production in, (T), 23:5615
interactions γ + N, differential cross sections for π production in, (T), 25:30801
interactions γ + N, dispersion analysis of multipole amplitudes of meson (π) production in, 23:36876
interactions γ + N, dispersion relation calculation of Δ(1236) resonant partial amplitude for π production in, 22:34906
interactions γ + N, dispersion sum rule for spin effects on, 21:33657
interactions γ + N, dispersion sum rules for Compton, 21:37749
interactions γ + N, dispersion sum rules in static model for virtual π production from, (T), 22:1449
interactions γ + N, Drell—Herne—Gerasimov sum rules for absorption, 22:3333
interactions γ + N, duality and fixed poles in π production from, (T), 24:28519
interactions γ + N, electric dipole amplitudes and p-wave amplitudes for π^+ and π^- production in, (E), 23:14938
interactions γ + N, electromagnetic current SU(3) structure in relations among differential cross sections in quark model for neutral vector meson production in, (T), 25:1443 (ITF-70-41)

interactions in nuclei, gauge invariance of two-body, (T), 23:13335
interactions in nuclei, generalized seniority breaking of two-body, 22:24892 (IPNO/TH-121)
interactions in nuclei, hard-core and three-particle repulsive potentials for, (T), 23:19328 (ITF-68-66)
interactions in nuclei, isospin and number-conserving formalism for pairing, (T), 22:14071 (IPNO/TH-110)
interactions in nuclei, matrix for central forces for irreducible form of central, 21:19311
interactions in nuclei, method of bosons for transcription of quasi-particle in ideal space for, 23:16970
interactions in nuclei, pairing approximation for, (T), 22: 7751
interactions in nuclei, pairing, (T), 21:17431
interactions in nuclei, pairing, (T), 22:3798
interactions in nuclei, pairing, (T), 22:1741
interactions in nuclei, pairing, (T), 22:11944(R) (AECL-2780)
interactions in nuclei, parity conservation and time-reversal invariance in, 21:4003 (INP-494/PL/PH)
interactions in nuclei, range of residual, (T), 23:15514
interactions in nuclei, repulsive potential for, (T), 22: 5878
interactions in nuclei, soft-core central potentials for singlet-even and triplet-even states, (T), 21:2809
interactions in nuclei, structure of matrix elements of, (T) , 24:38339
interactions in nuclei, SU(3) matrix elements for, 22: 26679 (NP-17357)
interactions in nuclei, surface delta, (T), 21:17421
interactions in nuclei, survey of two-nucleon studies on, 23:47065
interactions in odd-parity spin triplet states, separable non-local two-nucleon potential for, (T), 22:1728
interactions in p-shell nuclei, effects of pairing correlations on, (T), 25:12409
interactions in single-particle nuclear model, nonlocal, (T), 21:1146
interactions in single-particle potentials, wave functions for zero relative angular momentum, 21:30065
interactions in three-body system of, dynamical calculations for, (T), 24:52115
interactions in three-body system of, separable expansions of two-body T-matrix for, (T), 25:5432
interactions in three-body systems, (T), 22:20770
interactions in three-body systems, research program on, (E), 22:39636(R) (ORO-3398-12)
interactions in three-body systems, tensor force for, (T), 22:44756
interactions in three-body systems, weak, (T), 23:13203
interactions in three-nucleon systems, test of Tabakin nucleon—nucleon separable potentials in, 23:45001
interactions in triplet even state, nonstatic effects of OPEP in, 21:35530
interactions K + N → hyperon + hadron, evidence of violation of quark model prediction for, (E/T), 25: 47891
interactions K + N → K + Δ, Pomeranchon contributions to amplitudes for, 24:13109
interactions K + N → K + N at high energies, prediction of slope changes in, (T), 25:25444
interactions K + N → K + N at high energies, quasipotential approach for spin effects in, (T), 25: 36504 (JINR-E2-5770)
interactions K + N → K + N at intermediate energies, interference model for forward, 24:13091
interactions K + N → K + N at low energies, angular distributions and cross sections for, (T), 23:25640
interactions K + N → K + N at low energies, cross sections and angular distributions for, (T), 23:1640 (COO-264-445)
interactions K + N → K + N, boundary curves of double spectral functions in Mandelstam representation for amplitudes of, 24:21980
interactions K + N → K + N, continuous-moment sum rules for A_2-type Regge poles and A_2' production in, 24:1612
interactions K + N → K + N, dispersion sum rules for Σ(1385)NK coupling constants from anti K + N → anti K + N interactions and, 24:13087
interactions K + N → K + N, factorized Regge amplitudes for superconvergence relations for, 22: 34990
interactions K + N → K + N, finite-energy sum rules for crossover problem in, 22:22405
interactions K + N → K + N, finite-energy sum rules for crossover problem in, 22:34982 (NP-17490)
interactions K + N → K + N, finite-energy sum rules for u-channel baryon Regge exchanges, 24:8652
interactions K + N → K + N, method for spin—parity determination of resonances in, 23:21103
interactions K + N → K + N, Pomeranchon contributions to amplitudes for, 24:13109
interactions K + N → K + N, superconvergence sum rules for amplitudes of forward elastic, 22:50401
interactions K + N → K + N, superconvergent sum rules for, 22:32161
interactions K + N → K + N, vacuum pole contributions to inelastic scattering cross sections for two-Reggeon cut in, (T), 25:33586
interactions K + N → K* + Δ, π conspiracy in, 22: 5594
interactions K + N → K* + Δ, π trajectory exchange in, 22:11681
interactions K + N → K* + N in K^+ + d → K + π + 2N interactions at 865 to 1365 MeV/c in bubble chamber, production mechanisms for, (E), 25:25311 (UCRL-20248)
interactions K + N → K* + N* at high energies, quark model for test of additivity from joint decay distribution from, 22:13735
interactions K + N → K* + N, Pomeranchon contributions to amplitudes for, 24:13109
interactions K + N → K* + N, production of D- and S-wave Z* resonances near 1830 MeV in, (T), 25: 17504
interactions K + N → K* + N, quark model for selection rules for diffraction dissociation in, 24:3661
interactions K + N → K* + π + N, Deck effect for, 21:37806
interactions K + N → K* + π + N, Deck-model calculations for doubly charged K*π systems in, 23: 15118
interactions K + N → K*(890) + N at 2 to 13 GeV/c, Regge-pole analysis of, 23:25622
interactions K + N → K*(890) + N at high energies, Regge-pole model for, (E/T), 24:52106
interactions K + N → K*(890) + N, B-conspiracy and dips in C = -1 exchange contribution to, 22:26650 (NP-17430)
interactions K + N → π + Λ(Σ), method for spin—parity determination of resonances in, 23:21103
interactions K + N → vector meson (tensor meson) + N, tests of basic assumptions of complex angular momentum method for, 22:9578
interactions K + N above 5 GeV/c, Regge pole model for, 22:20210 (CERN-67-24(Vol.2))
interactions K + N and anti K + N at low energies, complex singular potential model of, 22:32167
interactions K + N around 1 GeV/c, isospin-0 partial cross sections for, (E), 23:3651
interactions K + N at 1.5 to 4 GeV/c, overlap of t and u exchanges in backward, (E/T), 23:44661
interactions K + N at 2 to 20 GeV/c, behavior of diffraction maximum in inelastic, (T), 25:56504
interactions K + N at 25 to 65 GeV, exotic trajectories for energy dependence of cross sections for, (T), 25: 33741
interactions K + N at 600 to 650 MeV/c, evaluation of dispersion relations for, (T), 25:47872
interactions K + N at high energies in emulsions, cross sections for, 21:27307
interactions K + N at high energies in Regge-pole model, inconsistency of crossover phenomena for, (T), 22:3310
interactions K + N at high energies, bounds on amplitudes and oscillations in diffraction-peak region for, (T), 25:19990
interactions K + N at high energies, dispersion relations for forward amplitudes of elastic, 21:17118
interactions K + N at high energies, formulas with multiple rescatterings by arbitrary Regge poles for elastic and charge-exchange, (T), 24:52097
interactions K + N at high energies, phenomenological model for, 23:1632 (CEA-R-3479)
interactions K + N at high energies, Pomeranchon SU(3) assignment for total cross section of, (T), 22: 24653
interactions K + N at high energies, Pomeranchuk trajectory and cross sections for, 24:37797
interactions K + N at high energies, Regge pole description of two-body exchange, 24:24380
interactions K + N at high energies, Regge pole model for resonances in, 22:39407(T) (UCRL-Trans-1364)
interactions K + N at high energies, Regge pole model for resonance production from, 22:20244
interactions K + N at high energies, Regge pole models for, 23:21108
interactions K + N at high energies, Regge poles with absorption for, 24:18151 (CONF-690330-, pp 166-80)
interactions K + N at high energies, shadow scattering and Regge singularities in phenomenological analysis of, 21:23337
interactions K + N at high energies, shower enhancement of branch-point contribution to total cross sections for, (T), 24:28550
interactions K + N at high energies, SU(3) symmetry and exchange degeneracy in Regge pole—cut model for, (T), 25:12217
interactions K + N at high energies, test of violation of Pomeranchuk theorem from finite-energy sum rules for, 24:47458
interactions K + N at high energies, violation of Pomeranchuk theorem and logarithmically increasing cross sections for, (T), 24:30530
interactions K + N at low and intermediate energies, partial-wave amplitudes for, 25:53220
interactions K + N at low energies, current-commutator sum rules for, 21:25306
interactions K + N at low energies, existence of K-mesic nuclei from assumption of positive sign of real part of amplitude of, (T), 25:20002 (IFVE-STF/SPK-70-30)
interactions K + N at low energies, forward dispersion relations for, 21:37830
interactions K + N at low energies, ΛNK and ΣNK coupling constants from sum rules for, 22:15800
interactions K + N at low energies, model for, 22: 22409
interactions K + N at low energies, model with effective Lagrangian and vector boson exchange for, 22:13769
interactions K + N at low energies, properties of P and P' trajectories from amplitudes of elastic, 22:41818
interactions K + N at low energies, s- and p-wave phase shifts for, 24:47448 (SINP-TH-67-17)
interactions K + N at low energies, vector-meson-dominance sum rules for, (T), 25:36519
interactions K + N at low energies, $Y_0^*(1405)$ and $Y_1^*(1385)$ production and properties from, (E), 21: 23314 (BNL-994, pp 70-102)
interactions K + N at low energy, partial-wave amplitudes for elastic, 21:25296
interactions K + N at low, intermediate, and high energies, Veneziano model for, (T), 25:33729 (INR-P-1228)
interactions K + N at low, intermediate, and high energies, Veneziano model for, 25:36507
interactions K + N in current algebra, hard-kaon corrections to scattering length sum rules for, 25: 38752
interactions K + N in K^+ + n → K^0 + p interactions at 600 MeV in deuterium bubble chamber, K^0 angular distributions and p polarization for phase shifts for, (E), 25:36417
interactions K + N in mesic atoms, (T), 21:42695
interactions K + N in Regge pole model, superconvergence sum rules for, 22:13761
interactions K + N in SU(3) Regge-pole theory, relations among charge-exchange differential cross sections for, 21:29557
interactions K + N in Veneziano model, amplitude for, 24:18207
interactions K + N in Veneziano model, elastic widths for Y* resonances from, 24:1592
interactions K + N, amplitude superconvergence calculations using perturbation theory and Lee model, 22:50405
interactions K + N, asymptotic conservation of helicity for, 25:3398
interactions K + N, axial-vector coupling constant renormalization for, 21:9785
interactions K + N, baryon Regge exchange in backward elastic, 23:46735
interactions K + N, bootstrap dynamics model for, 21: 15348
interactions K + N, calculation of elastic scattering lengths using vector meson exchange for, 23:3843
interactions K + N, chiral U(3) x U(3) phenomenological Lagrangian for, 25:7667
interactions K + N, constraints on polarization due to s-channel unitarity in, (T), 24:3665
interactions K + N, continuous-moment sum rules for Regge parameters of, 24:1590
interactions K + N, coupling constants from forward dispersion relations for, 22:29698 (AECD/TP-22)
interactions K + N, cross-channel isospin analysis of peripheral single π production in, (T), 25:17490
interactions K + N, cross-channel isospin analysis of peripheral single rho production in, (T), 25:17490

interactions K + N, current commutators and mass extrapolations for s- and p-wave amplitudes of, 22: 44441
interactions K + N, currents and current commutators for scattering lengths and low-energy parameters for, 22:11706
interactions K + N, degeneracy of Regge trajectories and finite-energy sum rules for, (T), 24:42956
interactions K + N, determination of NAK and NΣK coupling constants from forward dispersion relations for, (T), 22:1448
interactions K + N, dual models for large-angle, 25: 25429
interactions K + N, effect of symmetry breaking of chiral SU(3) x SU(3) on scattering lengths for, 23: 25678
interactions K + N, empirical analysis of differences and sums of angular distributions for duality in, (T), 25: 59477
interactions K + N, exchange degeneracy in Reggeized absorption model for, 25:30874
interactions K + N, exchange degeneracy, absorption, and loops in, 24:52092
interactions K + N, extension of Veneziano model for, 24:18186 (CONF-690330-, pp 189-201)
interactions K + N, finite-energy sum rules for ω-like Regge-pole exchange in, 23:49167
interactions K + N, finite-energy sum rules for Regge-exchange amplitudes for, 23:5632
interactions K + N, finite-energy sum rules from phase shift analysis of, 22:26659
interactions K + N, fixed-u zero-moment finite-energy sum rules for, 24:3658
interactions K + N, formulation of Reggeized absorption model with exchange degeneracy for elastic and charge-exchange, (T), 25:53159
interactions K + N, formulation of Reggeized absorption model with exchange degeneracy for elastic and charge-exchange, (T), 25:53159
interactions K + N, forward dispersion relations and sum rules for, 24:3678
interactions K + N, forward dispersion relations for NKΣ coupling constant for, 22:17963
interactions K + N, generalized superconvergence sum rule for total cross sections of, 24:35656
interactions K + N, imaginary part of Regge trajectories for, 25:28036
interactions K + N, K_1^0 → K_1^0 regeneration at high energies for strange baryon resonances in, (T), 22: 34932 (JINR-P1-3788)
interactions K + N, KAN coupling constants from dispersion relations for, 22:1441
interactions K + N, low-energy s- and p-wave phase shifts for, 21:21239
interactions K + N, Λ anti K N coupling constant from forward dispersion relation for, 21:44384
interactions K + N, model of exchange-degenerate Regge trajectories for charge-exchange, 24:18221
interactions K + N, modified dispersion relations from crossing-even forward amplitude of, 23:3739
interactions K + N, modified dispersion relations for KNΛ and KNΣ coupling constants for, 22:20257
interactions K + N, modified Pomeranchuk theorem for lower bounds on elastic and charge-exchange, 25: 59474
interactions K + N, NAK coupling constant from continuous dispersion sum rule for, 24:35655
interactions K + N, NAK coupling constant weakly dependent on anti KN unphysical-region parametrization from dispersion relation for, (T), 24: 52131
interactions K + N, ω-like Regge pole exchange in, (T), 24:52086 (AD-705553)
interactions K + N, partial wave analysis for baryon resonance production in, 22:48313 (CERN-68-23(Vol.2), pp 431-96)
interactions K + N, partial wave analysis of, 25:53180 (UCRL-20655, pp 176a-89)
interactions K + N, particle exchange and Regge-pole exchange in Veneziano model for, 25:56518
interactions K + N, PCAC conditions on amplitudes for, 21:9784
interactions K + N, pAK and pΣK coupling constants from forward dispersion relations for, 22:9595
interactions K + N, Poisson distribution for bounds, multiplicity, and energy dependence of inelastic, (T), 25:30899
interactions K + N, pole dominance method for calculation of scattering length and phase shifts for, 24:18202
interactions K + N, pole-dominance method for calculating scattering lengths and phase shifts for, 24: 13103
interactions K + N, Pomeranchuk theorem for total cross sections for, 24:24388
interactions K + N, Pomerancuk P and P' parameters in crossing-even, 23:3731
interactions K + N, predictions for K^0 regeneration from Pomeranchuk theorem for, 24:28551
interactions K + N, predictions of quark model with additive baryon exchange for pseudoscalar meson and baryon production in backward, (T), 25:47883
interactions K + N, quark model for elastic and inelastic charge-exchange, 22:3419
interactions K + N, Regge amplitude and superconvergence relation for, 22:46450
interactions K + N, Regge cut model for charge-exchange, 25:33745
interactions K + N, Regge models of asymptotic behavior of amplitudes for forward elastic, 25:3357
interactions K + N, Regge residue parameters and scattering lengths from Veneziano model for, 24:1592
interactions K + N, Regge-pole parameters from superconvergence relations for, 22:3425
interactions K + N, relation of exchange degeneracy to finite-energy sum rules and total cross sections for, 23: 46726
interactions K + N, relations between spin density matrix elements for production of vector and tensor mesons in, (T), 22:37155
interactions K + N, resonance saturation of sum rules for, 21:25312
interactions K + N, review of experiments on Y* production from, 21:31597
interactions K + N, review of forward peak in inelastic, 22:39265 (CERN-68-7(Vol.1), pp 60-110)
interactions K + N, review of, (E/T), 25:7550 (CONF-690608-, pp 237-68)
interactions K + N, rho trajectory from generalized superconvergence relations for, 24:20156
interactions K + N, rho-dominant sum rules for, 24: 13094
interactions K + N, s-channel spin-nonflip amplitude in pomeron exchange in, (T), 25:33738
interactions K + N, scattering lengths of, (E/T), 23: 13038
interactions K + N, SU(3) and exchange degeneracy in Regge-pole-cut analysis of total cross sections for, (E/T), 25:14660
interactions K + N, SU(3) sum rules for charge-exchange, 21:29553
interactions K + N, SU(6) invariance in S-wave, 22: 48348
interactions K + N, SU(6) invariance model for s-wave, 22:34994
interactions K + N, subtractions in dispersion relations for, 21:15350
interactions K + N, sum rules and relations between coupling parameters for π + N and, 21:46527
interactions K + N, sum rules for vacuum Regge pole parameters for, 23:49157
interactions K + N, sum rules from current algebra and dispersion relations for, 21:21235
interactions K + N, superconvergence sum rules for combination of elastic π + N, π + π, π + K, and, 22:48297
interactions K + N, Σ(1385)Σπ coupling from superconvergence sum rules for, 23:32728
interactions K + N, tabulation of kinematic quantities for, (E), 22:17858
interactions K + N, test of Regge-pole absorption model from polarization in, 25:50140
interactions K + N, unified description of quark model exchange degeneracy predictions for, 24:10769
interactions K + N, unsubtracted dispersion sum rules for, (T), 22:39409
interactions K + N, use of continuous moment sum rule for analysis of Regge-pole parameters for, 22:48321
interactions K + N, Veneziano formula for Regge fits to, 23:46722
interactions K + N, Veneziano model for, 23:44664
interactions K + N, Veneziano model with spin for amplitude of three-body hadron production in, (T), 25: 30889
interactions K + N, violation of Pomeranchuk theorem in, 24:33019
interactions K^0 + N in nuclei, optical model consistency for regeneration phase and real part of forward amplitude for, 25:38744
interactions K^0 + N, asymptotic behavior of amplitudes of, 23:16957(T) (BNL-tr-243)
interactions K^0 + N, cross-section differences between anti K^0 + N and, 24:5315
interactions K_2^0 + N → Λ^0 + n + π at 120 MeV in argon, copper, and lead, cross sections for, (T), 21: 33699 (JINR-P1-3375)
interactions K_2^0 + N → Σ^0 + n + π at 120 MeV in argon, copper, and lead, cross sections for, (T), 21: 33699 (JINR-P1-3375)
interactions K^+ + N → K + π + N, graphical illustration of isospin analysis of, 25:28039
interactions K^- + N → K + π + N, graphical illustration of isospin analysis of, 25:28039
interactions K^+ + N → K^0 + N at 1.080 to 3.0 GeV/c, energy dependence of cross sections and production and decay angular distributions for, (T), 24:49491 (UCRL-19774)
interactions K^- + N → K^{*0} + N, SU(3) x SU(3) with vector dominance and Regge pole model for sum rules for, 23:42609
interactions K^+ + N → K^{*0} + N, SU(3) x SU(3) with vector dominance and Regge pole model for sum rules for, 23:42609
interactions K^+ + N → K^0 + p + p at 5.5 GeV/c, partial cross section and momentum transfer distribution for, (E), 25:59305
interactions K^+ + N → K^+ + N, complex angular momentum method with j-plane branch points for, (E/T), 24:45427 (ITEF-754)
interactions K^+ + N → K^+ + N, complex angular momentum method with Regge cut contribution to, (E/T), 24:52098
interactions K^- + N → K^- + N, complex angular momentum method with j-plane branch points for, (E/T), 24:45427 (ITEF-754)
interactions K^- + N → K^- + N, complex angular momentum method with Regge cut contribution to, (E/T), 24:52098
interactions K^- + N → Λ + π and π^- + p → Λ + K^+, test of (K^*,K^{**}) exchange degeneracy in, (E/T), 24:51966
interactions K^- + N → Λ + π at 1 to 1.85 GeV/c, partial-wave analysis of, (E), 25:59303
interactions K^- + N → Λ + π at 1660 to 2215 MeV, partial-wave analysis of Σ(1910) and Σ(2035) production in, (E/T), 22:34854
interactions K^- + N → Λ + π^- + π^0, Σ(1660) production and sequential decay from, (E), 22:48231
interactions K^- + N → Λ(Σ) + π at 400 MeV/c below anti K + N threshold in deuterium bubble chamber, angular distributions, Y* production, and dynamical nature of Λ(1405) from, (E), 25:40888
interactions K^- + N → π + Λ at 1.5 to 1.9 GeV, duality diagram predictions for, 25:25430
interactions K^- + N → π + Λ, duality diagrams for exchange degeneracy in, 25:33757
interactions K^- + N → π + Σ at 1 to 3 GeV/c, duality for K^* exchange amplitude and resonance amplitude in, (T), 24:1599
interactions K^- + N → π + Σ at 1.5 to 1.9 GeV, duality diagram predictions for, 25:25430
interactions K^- + N → π + Σ, duality diagrams for exchange degeneracy in, 25:33757
interactions K^- + N → π + Σ, models of Σ(1405) as CDD pole and bound state of, 25:30876
interactions K^- + N → Σ^- + phi at 3 GeV/c, differential cross sections for, (E), 25:1423
interactions K^- + N → Y + meson at 2.24 and 3.00 GeV/c, quark model for amplitudes of, 22:22395
interactions K^- + N and K^- + 2N in nuclear emulsions, search for Ap(2110) resonance in, (E), 24:12956
interactions K^+ + N at 0.4 to 3.4 GeV/c, review of total cross sections for, (E), 25:1412 (UCRL-19844)
interactions K^- + N at 0.4 to 3.4 GeV/c, review of total cross sections for, (E), 25:1412 (UCRL-19844)
interactions K^+ + N at 0.9 to 60 GeV/c, dispersion relations with violated Pomeranchuk theorem for real parts of amplitude for forward, (T), 25:38749
interactions K^- + N at 0.9 to 60 GeV/c, dispersion relations with violated Pomeranchuk theorem for real parts of amplitude for forward, (T), 25:38749
interactions K^- + N at 2.3 to 2.5 GeV/c in emulsions, hyperfragment production from, 21:33625
interactions K^- + N at 3 GeV/c, cross sections of final states in, (E), 24:51977
interactions K^- + N at 3.6 to 5.0 GeV/c, production of J/sup PC/ = 0^{++} K_1^+ K_1^0(1030) enhancement in, (E), 23:5542
interactions K^+ + N at 780 MeV/c, sign of K_1^0 - K_1^0 mass difference from spark chamber study of, (E), 21: 46469 (UCSD-10-P-10-104)
interactions K^- + N at 780 MeV/c, sign of K_1^0 - K_1^0 mass difference from spark chamber study of, (E), 21: 46469 (UCSD-10-P-10-104)
interactions K^- + N at high energies in bubble chamber, (E), 22:34849(R) (NYO-3178-5)
interactions K^- + N at intermediate energy, dual structure of amplitudes for, 25:59504
interactions K^- + N at low and intermediate energies, review of bubble chamber and counter experiments on, 25:53181 (UCRL-20655, pp 190a-202)
interactions K^+ + N at low energies, Pomeranchuk trajectory for amplitudes of, 22:35151
interactions K^- + N at rest, Λ production from, (E), 21:9716
interactions K^- + N below 65 GeV, difference of total cross sections for K^+ + N and, (E), 25:5294
interactions K^+ + N below 65 GeV, differences of total cross sections for K^- + N and, (E), 25:5294
interactions K^+ + N in beryllium-9 at 950 MeV/c, differential cross sections for, (E), 21:7466 (PPAD-601-F)
interactions K^+ + N in broken SU(3) x SU(3), scattering length for S-wave, 25:33744
interactions K^- + N in carbon and iron at 12 GeV/c, phi and rho production from, 21:27294
interactions K^+ + N in effective chiral Lagrangian model, S-wave scattering lengths for, 23:18921
interactions K^- + N in freon bubble chamber, Λ trapping probability from, (E), 25:5299
interactions K^+ + N in K^+ + d interactions at 865 to 1365 MeV/c in bubble chamber, partial cross sections for, (E), 25:25311 (UCRL-20248)
interactions K^- + N in kaonic atoms, x-ray yields from, 24:52105
interactions K^- + N in urbaryon model, cross sections for forward elastic, 21:35300
interactions K^+ + N in urbaryon model, cross sections for forward elastic, 21:35300
interactions K^+ + N near 1 GeV/c, production of very broad elastic structure A(1780) in, (E), 24:10683
interactions K^- + N on bound nucleons at low energies, effect of A(1405) on, (T), 25:12213
interactions K^+ + N, Argand diagram analysis of s-channel helicity amplitudes of, 25:28035
interactions K^- + N, Argand diagram analysis of s-channel helicity amplitudes of, 25:28035
interactions K^- + N, cross sections for elastic and charge-exchange, 22:17871
interactions K^+ + N, cross sections for elastic, (E), 22: 17871
interactions K^- + N, current algebra and Regge pole theory for, 21:29522
interactions K^+ + N, current algebra and Regge pole theory for, 21:29522
interactions K^+ + N, dispersion relations with violated Pomeranchuk theorm for amplitude of charge exchange, (T), 25:38749
interactions K^- + N, dispersion relations with violated Pomeranchuk theorem for amplitude of charge exchange, (T), 25:38749
interactions K^- + N, double strangeness exchange in, 24:24391 (JINR-P2-5028)
interactions K^- + N, duality and non-Pomeranchuk contributions o cross sections for, (T), 24:45533
interactions K^- + N, duality condition for resonance contribution to backward, (T), 25:12215
interactions K^+ + N, evidence of S = 1, I = 0 resonance from forward amplitude of, 21:27379
interactions K^+ + N, finite-energy sum rules from phase shift analysis of, 22:26659
interactions K^- + N, finite-energy sum rules from phase shift analysis of, 22:26659
interactions K^+ + N, formulation of SU(3) X SU(3) chiral Lagrangian with gauge fields for scattering lengths of, 23:39776 (NYO-3399-194)
interactions K^+ + N, forward dispersion relations in Regge-pole analysis of, 21:928
interactions K^- + N, isolation of Pomeranchuk contribution to total cross section for, (T), 24:13098

interactions K^- + N, Λ production from, (E), 21: 13677(R) (AD-641991)
interactions K^+ + N, model with broken exchange degeneracies and secondary trajectories in charge and hypercharge exchange in, 24:21985
interactions K^- + N, model with broken exchange degeneracies and secondary trajectories in charge and hypercharge exchange in, 24:21985
interactions K^- + N, models for production mechanisms in, 23:21112
interactions K^+ + N, models for production mechanisms in, 23:21112
interactions K^- + N, pole dominance model for calculation of scattering length and phase shifts for, 24:18202
interactions K^- + N, pole-dominance method for calculating scattering lengths and phase shifts for, 24: 13103
interactions K^+ + N, Pomeranchuk theorem for total cross sections for, 24:24388
interactions K^- + N, Pomeranchuk theorem for total cross sections for, 24:24388
interactions K^- + N, Regge models of asymptotic behavior of amplitudes for forward elastic, 25:3357
interactions K^+ + N, S = +1, I = 0 resonance production from, (T), 21:25289 (HEP-67-2)
interactions K^+ + N, SU(3) symmetry predictions for, 22:20142
interactions K^+ + N, SU(3) x SU(3) chiral Lagrangian with gauge field for scattering lengths of, 24:18210
interactions K^- + NN at rest, Λ production from, (E), 21:9716
interactions $K^-\pi^+\pi^-$ + N in K^- reactions with bromine, carbon, fluorine, and neon at 5.5 to 12.7 GeV/c in bubble chamber, (E), 25:19910 (LAL-1242)
interactions I + N, hadronic helicity conservation in inelastic, (T), 25:53100 (NYO-4204-14)
interactions Λ + N → Λ + N, crossed-channel boson-exchange model for total and differential cross sections for, (T), 25:33767 (NP-18838)
interactions Λ + N → Λ + N, multichannel calculation of cross sections and phase shift for, 25:53232
interactions Λ + N → N + N in SU(6) symmetry, weak, 24:18249
interactions Λ + N → N + N weak and strong interaction amplitudes for, 22:5548
interactions Λ + N → N + N, kP invariance and SU(6) for weak, 21:9827
interactions Λ + N → N + N, spin and isospin dependence of weak, 21:5376
interactions Λ + N → N + N, tadpole model for weak, 24:8613
interactions Λ + N + N, review of three-body forces in, (T), 24:47461 (CONF-690557-(Vol.1), pp 244-75)
interactions Λ + N → Σ + N, multichannel calculation of cross sections and phase shifts for, 25:53232
interactions Λ + N → Σ + N, N/D matrix method for, (T), 25:33767 (NP-18838)
interactions Λ + N at 10 to 40 MeV, cross sections for, (T), 23:34621
interactions Λ + N at high energies, Regge pole model for cross sections for, 24:52129
interactions Λ + N at low energies, coupled-channel effective-range analysis of, 25:7691
interactions Λ + N at low energies, ΛN coupling to virtual ΣN channel effects on, (T), 25:43648
interactions Λ + N at low energies, multichannel calculation of scattering lengths and effective ranges for, 25:53233
interactions Λ + N below 1.500 GeV/c in deuterium bubble chamber, momentum and angular distributions and cross sections for, (E), 25:1396 (UCRL-20077)
interactions Λ + N below 18 MeV, phenomenological charge-symmetry breaking in, (T), 24:52140
interactions Λ + N from Λ + d interactions at 100 to 300 MeV/c, core potential for, (T), 25:38757
interactions Λ + N in A = 50 hyperfragments, stimulated, (T), 21:4241
interactions Λ + N in decay of hyperfragments, (E), 21:25233
interactions Λ + N in helium-4, spin—orbit force determination for, (T), 21:29565
interactions Λ + N in hyperfragments, spin dependence of weak, (E), 24:47375 (CONF-690557-(Vol.2), pp 925-9)
interactions Λ + N in hypernuclei, (T), 22:17973
interactions Λ + N in hypernuclei, energy-dependent potential for, (T), 22:37286
interactions Λ + N in hypernuclei, review on, 24:26444 (INR-1151)
interactions Λ + N in light hypernuclei, (E/T), 22: 24526
interactions Λ + N in Λ—^{7}Li, splitting of states from, (T), 21:35426
interactions Λ + N in Λ-H^3 and Λ-He^3, attractive and repulsive tensor interactions for, 23:32760
interactions Λ + N in Λ-He^4, Λ-He^5, and ΛΛ-He^6, hyperfragment structure from parameters for, 23: 27824
interactions Λ + N in Λ-He^6—Λ-Li^6 isodoublet, 2π exchange int, (T), 22:39435
interactions Λ + N in Λ-He^7, spin-dependence of, 21: 19186
interactions Λ + N in ΛΛ—Be^{11}, 2π and K ranges for, (T), 22:5602
interactions Λ + N in ΛΛ-Be^{10} and ΛΛ-He^6, (T), 21: 21462
interactions Λ + N in ΛΛ-C^{14}, 21:37838
interactions Λ + N in nuclear matter, (T), 22:24687
interactions Λ + N in nuclear matter, 2π-exchange three-body, (T), 21:38417
interactions Λ + N in nuclear matter, binding energy from tensor, 24:15604
interactions Λ + N in nuclear matter, potentials for, 22: 52991
interactions Λ + N in nuclei, Λ binding energy from phenomenological potentials for, (T), 23:30762 (CONF-690503-1)
interactions Λ + N in p-shell hypernuclei, ΛNN repulsive forces from, (E/T), 21:19018
interactions Λ + N in p-state of Λ-O^{17}, (T), 25:12226
interactions Λ + N, analysis for Λ-^{3}H and Λ-^{3}He binding energies, 21:25318
interactions Λ + N, charge-symmetry breaking in, (T), 25:59515
interactions Λ + N, charge-symmetry violating effects of γ—π exchange potential in, 23:27812
interactions Λ + N, cross sections of Λ + d interactions at 100 to 300 MeV/c as probe of core potential for, (T), 25:43651
interactions Λ + N, effect of tensor force on Λ binding in nuclear matter, (T), 24:49543
interactions Λ + N, effect on nonmesic decay of light hypernuclei, (T), 22:52992
interactions Λ + N, effects on binding energy of Λ-H^3 and effective range parameters of Λ + p interactions, 23:15155
interactions Λ + N, effects on Λ binding energy in nuclear matter from short-range repulsion in, (T), 25: 20023
interactions Λ + N, exact solution of Faddeev equations for hypertritium for analysis of, 24:18233
interactions Λ + N, hard-core potentials for, (T), 21: 7478(R) (COO-1371-36)
interactions Λ + N, hyperfragment multiplet structure from proximity or overlap of singlet and triplet, (T), 23:42694
interactions Λ + N, interaction potentials for, (T), 24: 20468
interactions Λ + N, Λ binding energy in Λ-He^4, Λ-He^5, and ΛΛ-He^6 for parameters of, (T), 23:42694
interactions Λ + N, Λ binding energy in nuclear matter for, 24:15597 (INP-681, pp 59-80)
interactions Λ + N, Λ binding energy in nuclear matter for, (T), 24:47473 (CONF-690557-(Vol.2), pp 826-41)
interactions Λ + N, ΛN tensor force for scattering, 25: 12668
interactions Λ + N, matrix elements of ΛN potential in hypernuclei from phase shifts for, 24:1773
interactions Λ + N, OBE model for, 21:2482
interactions Λ + N, OBE model for, 22:24682
interactions Λ + N, OBEP calculations of scattering lengths and effective ranges for, (T), 25:50160
interactions Λ + N, one-boson-exchange potential model for, (T), 25:3416
interactions Λ + N, one-pion-exchange contribution to, 21:40236
interactions Λ + N, phenomenological analysis of s-shell light hypernuclei for, (T), 24:47462 (CONF-690557-(Vol.1), pp 276-332)
interactions Λ + N, phenomenological ΛN potentials for total cross sections and noncentral components in, (T), 24:47477 (CONF-690557-(Vol.2), pp 912-24)
interactions Λ + N, potential for, (T), 23:32758
interactions Λ + N, potential-well depth for, (E), 21: 40152
interactions Λ + N, potentials for, (T), 21:29876
interactions Λ + N, potentials for, (T), 22:13927(R) (USC-136-132)
interactions Λ + N, potentials for, (T), 23:17103(R) (ANL-7481)
interactions Λ + N, potentials from s-shell hyperfragments, (E/T), 22:14105
interactions Λ + N, potentials from s-shell hypernuclei, (T), 21:38421
interactions Λ + N, review of, 25:12232
interactions Λ + N, review of hyperfragment binding energy for study of, 21:40238
interactions Λ + N, review of theory for, 23:16966 (INR-P-927)
interactions Λ + N, review of weak and strong, 21: 37781
interactions Λ + N, review of, (T), 23:44680
interactions Λ + N, separable nonlocal potential for, 21:31606 (INR-783/VII/PL)
interactions Λ + N, tensor-force effects on helium-5, (T) , 24:15784
interactions Λ + Σ at low energies, scattering lengths and phase shifts for, (T), 22:5605
interactions μ + N → μ + N + X, crossing relation with lepton pair production in strong interactions, (T), 24:10726 (JINR-E2-4791)
interactions μ + N → τ + W + N, cross sections for scalar and vector W-meson production in, 25:30818
interactions μ + N at 5 GeV/c in nuclear emulsions, particle production in inelastic, (E), 23:46594
interactions μ + N at high energies at 13.6 to 36.4 GeV underground, angular distributions and inelastic cross section of anomalous, (E), 24:40241
interactions μ + N at high energies, analogous excited-baryon-model hypothesis for, 24:30524
interactions μ + N at high energies, fireball mechanism for cross sections for meson production from, (T), 24: 3612 (SJC-P-68-6)
interactions μ + N at high energies, inelastic, (T), 22: 22343 (CONF-670923-, pp 109-27)
interactions μ + N at high energies, lectures on current commutators, dynamical models, and quantum electrodynamics for hadron and μ production in, 25: 22761 (INP-712(Vol.1), pp 1-52)
interactions μ + N, cosmic-ray properties from validity of Weizsaker—Williams approximation and Bjorken sum rule for inelastic, 24:3607
interactions μ + N, e—μ equality from elastic, 23:5512 (SLAC-PUB-502)
interactions μ + N, implications for cosmic ray phenomena from deep inelastic, (T), 24:28522 (LNF-69/56)
interactions μ + N, positivity restrictions among structure functions for polarized inelastic, 25:45706
interactions μ + N, quantum electrodynamics test from elastic, 22:5636
interactions μ + N, review of, 21:42373
interactions μ + N, review of elastic and inelastic, (E), 25:53007
interactions μ^+ + N at 10.1 GeV/c in emulsions, energy spectrum, angular distributions, and cross sections for secondary particles in, (E), 24:20058
interactions μ^+ + N at 10.1 GeV/c in emulsions, partial and integral cross sections and energy dependence of total cross sections for inelastic, (E), 24:20059
interactions μ^+ + N at 14.6 GeV/c in emulsions, energy spectrum, angular distributions, and cross sections for secondary particles in, (E), 24:20058
interactions μ^+ + N at 14.6 GeV/c in emulsions, partial and integral cross sections and energy dependence of total cross sections for inelastic, (E), 24:20059
interactions μ^+ + N at high energies, total cross sections for W production in, (T), 25:17453 (COO-1573-73)
interactions μ^- + N, coupling constants for, (E/T), 23: 10939 (JINR-E4-4092)
interactions μ^- + N, hyperfine effects n radiative capture, (T), 24:35928
interactions N + ^{3}He and N + ^{4}He at 0.03 to 1 GeV, bibliography on, 23:27821 (LA-4143)
interactions N + anti N → Y + anti Y, modified Lorentz pole analysis of amplitude for, 23:27813
interactions N + anti N* → π + π, superconvergence sum rules for, 22:29694
interactions N + α at 66 to 312 MeV, calculations using non-relativistic crossed partial-wave expansion, (T), 23:19381
interactions n + d → n + d at 0.1 to 2000 MeV, review and data compilation on (E/T), 24:15598 (LA-DC-10638)
interactions N + d → N + d at 14.4 and 22.7 MeV, polarization in, (T), 24:21992
interactions N + d → N + d at 200 to 600 GeV, forward, (T), 24:52137
interactions N + d → N + d at high energies, mechanism for polarization in Glauber approach for, (T), 24:24402
interactions N + d → N + d at high energies, review of, (T), 24:45546
interactions N + d → N + d at small momentum transfers, spin effects in, 23:21124 (JINR-P2-4272)
interactions N + d → N + d, differential and total cross section relations for, (T), 25:14730 (JINR-P2-5444)
interactions N + d → N + d, solution of N/D equations for, (T), 24:52119
interactions N + d at 0.03 to 1 GeV, bibliography on, 23:27821 (LA-4143)
interactions N + d at 14 and 23 MeV, elastic cross section and nucleon polarization in spin-dependent three-body, (T), 25:14740
interactions N + d at high energies, deuteron polarization in elastic, (T), 23:13105
interactions N + d at high energies, Regge-pole model for, 21:42395
interactions n + d at low energies, review of nonrelativistic theory for, 22:22415
interactions N + d at low energy, anomalous effective range expansion for doublet, (T), 23:13200
interactions N + d below 40 MeV, phase shifts and inelastic scattering parameters for, (T), 25:43799
interactions N + d in GeV region, dispersive impulse approximation for elastic, 22:46473
interactions N + d with channel spin conservation, spin-correlation relations for, (T), 21:33874
interactions N + d, calculation of elastic scattering lengths using vector meson exchange for, 23:3843
interactions N + d, capture cross sections for, 22:5140
interactions N + d, dispersion theoretical calculation of vertex function for, (T), 25:56527
interactions N + d, elastic and inelastic, (T), 22:27291
interactions N + d, exchange terms and phenomenological imaginary interaction for inelastic, 25:50157
interactions N + d, method of summation of diagrams for analysis of inelastic, 21:29564
interactions N + d, modification of Glauber formula for violation of Pomeranchuk theorem in, (T), 25:1566
interactions N + d, polarization effects on cross section in Glauber approximation for, (E/T), 23:15147
interactions N + d, relativistic three-body problem for, (T), 24:51985
interactions N + d, separable approximation for, (T), 24:52138
interactions N + d, simplifications for formulation of radiative, 23:39666
interactions N + d, solution of Faddeev equations for, 22:9621
interactions N + d, use of polarized beams and targets, 21:13713 (SLAC-PUB-256)
interactions N + meson → N + meson, model for N* production in, 22:3451
interactions N + N → d + 2π at 991 MeV, dibaryon enhancement and π π s-wave interaction from, 23: 49136
interactions N + N → d + boson, model of intermediate nucleon-isobar decay for, 25:56525
interactions N + N → Δ(1236) + Δ(1236), contribution to N—N potential in zero-parameter model, 22:46469
interactions N + N → Δ(1236) + Δ(1236), expansion of spin-nonflip helicity amplitudes along 0(4) for factorization relations for, 24:30511 (IFVE-STF-69-26)
interactions N + N → γ + N + N, consistent treatment in one-boson-exchange model for N + N exchange currents for, 23:51950 (DESY-69/28)
interactions N + N → N' + Δ + π, isospin analysis of, (T), 25:20030
interactions N + N → N + Δ + rho, isospin analysis of, (T), 25:20030
interactions N + N → N + Δ in Regge pole model, π conspiracy in, 22:39369
interactions N + N → N + Δ, production mechanisms of, (T), 22:37155

interactions N + N → N + Δ, production mechanisms of, (T), 22:37155
interactions N + N → N + Δ(1236), contribution to N—N potential in zero-parameter model, 22:46469
interactions N + N → N + Δ(1236), N/D unitary isobar model for, 24:49545
interactions N + N → N + N + γ in OBE model, 24:47480
interactions N + N → N + N + γ in soft photon region, elastic NN phase shifts from, (E/T), 25:59520
interactions N + N → N + N + γ, bremsstrahlung amplitude for, (T), 23:13059
interactions N + N → N + N + γ, general form of amplitude of bremsstrahlung production in, (T), 22:39425 (JINR-P2-3803)
interactions N + N → N + N + γ, Low approximation for, (T), 23:13067
interactions N + N → N + N + γ, Low approximation for bremsstrahlung production in, 22:39426 (JINR-P2-3830)
interactions N + N → N + N + γ, relativistic and gauge-invariant calculations of cross sections for, 23:42599
interactions N + N → N + N + γ, review of, (E), 23:25647
interactions N + N → N + N + γ, review of, (E), 25:59241 (CONF-710915-2)
interactions N + N → N + N + γ, review of, (E/T), 25:17372 (UCD-CNL-EX-130)
interactions N + N → N + N + γ, S-matrix approach to, (T), 24:40422
interactions N + N → N + N + γ, sum rule calculation of velocity-dependent force effect on cross section for, (T), 23:42597
interactions N + N → N + N + π at 500 to 800 MeV, amplitude for soft-pion production in, (T), 24:3696
interactions N + N → N + N + π at 600 MeV, isobar model for ratios of π^+ to π^- to π^0 total production cross sections for, (T), 25:38754
interactions N + N → N + N + π at high energies, formulas for phase shift analysis of, 22:35021
interactions N + N → N + N + π near threshold, cross sections for π production in, (T), 23:44675
interactions N + N → N + N + π near threshold, soft-pion calculation of, 22:41828
interactions N + N → N + N + π, Burnett—Kroll theorem for soft-pion emission in, (T), 24:49535
interactions N + N → N + N + π, dispersion relations and current—field algebra for hard-pion production in nonrelativistic, (T), 25:30898
interactions N + N → N + N + π, finite-mass corrections to cross sections for S-wave, 24:24406
interactions N + N → N + N + π, lectures on kinematics and phenomenological and dynamical models for, (T), 25:56810 (CERN-71-14, pp 155-228)
interactions N + N → N + N + π, Pomeron-exchange contribution to amplitude for, 25:47893
interactions N + N → N + N + π, relativistic phase-space volumes for πN angular correlations in, 25:7680 (JINR-P2-4917)
interactions N + N → N + N + π, soft-pion predictions for, 24:49499
interactions N + N → N + N + rho, absorption peripheral model for, (T), 22:5606
interactions N + N → N + N + W, detection of W from μ polarization in W → μ + τ decay from, 23:32682
interactions N + N → N + N + W, μ polarization effect in proposed experiment for search for W in, 24:51930 (TID-25473(Vol.4), pp 187-9)
interactions N + N → N + N + W, peripheral one-pion model for cross sections for, 22:35011
interactions N + N → N + N at 0 to 400 MeV, one-meson-exchange potentials for phase shift analysis for, 22:11694
interactions N + N → N + N at 23 to 630 MeV, calculation of amplitudes in T = 0 and T = 1 states for, 22:20272 (JINR-P1-3702)
interactions N + N → N + N at high energies, classical meson source for bremsstrahlung model for, (T), 24:6733
interactions N + N → N + N at high energies, formulas for phase shift analysis of, 22:35021
interactions N + N → N + N at large angles, additivity and factorizability in quasi-independent quark model for, 23:49153 (ITF-69-24)
interactions N + N → N + N at low and high energies, effects of nucleon structure on, 23:27826
interactions N + N → N + N at low energies, relation with high-energy phenomena in theory for, 22:35013
interactions N + N → N + N at t = 0, amplitudes for, 23:44732
interactions N + N → N + N below 3.0 MeV, theory for one- and two-pion exchange in, 22:39430
interactions N + N → N + N below 350 MeV, hard- and soft-core static potential representations of, 23:42698
interactions N + N → N + N in Regge pole theory, 22:20353
interactions N + N → N + N* + π, isospin analysis of, (T), 25:20030
interactions N + N → N + N* + rho, isospin analysis of, (T), 25:20030
interactions N + N → N + N, analytic approach to amplitudes at t = 0 for, 23:8849 (CALT-68-174)
interactions N + N → N + N, boundary curves of double spectral functions in Mandelstam representations for amplitudes of, 24:21980
interactions N + N → N + N, daughter structure of conspiring Regge-pole families from analyticity constraints for, 23:7185
interactions N + N → N + N, differential and total cross section relations for, (T), 25:14730 (JINR-P2-5444)
interactions N + N → N + N, dispersion theoretic calculation of two-π exchange effects on amplitudes of forward, 22:39383
interactions N + N → N + N, dynamical theory for, 21:25287
interactions N + N → N + N, finite-energy sum rules for amplitude from quasipotential equation for, 23:32757 (ITF-69-30)
interactions N + N → N + N, Lorentz pole and kinematic constraints on helicity amplitudes for, 22:26640
interactions N + N → N + N, minimal solutions to conspiracy and Regge pole family classification in, 23:39745 (LNF-69/23)
interactions N + N → N + N, modified Born approximation for, 22:44453
interactions N + N → N + N, optical theorem formulation for imaginary part of all nonvanishing spin amplitudes of forward, 24:33056
interactions N + N → N + N, polarization experiments for T invariance test in, 22:24707 (JINR-P2-3716)
interactions N + N → N + N, Regge pole model for invariant functions for, 23:51952
interactions N + N → N + N, relativistic extension of determinantal formalism for overlapping thresholds for, 24:13037
interactions N + N → N + N, relativistic one-boson-exchange model for, (T), 25:53224 (DESY-71/34)
interactions N + N → N + N, spin structure of multiple, (T), 24:47446
interactions N + N → N + N, strong coupling field meson theory for phase shift calculations for, 22:29715 (DESY-68/9)
interactions N + N → N + N, strong initial- and final-state interactions in parity-violating, 21:29568
interactions N + N → N + N, tests of basic assumptions of complex angular momentum method for helicity amplitudes of, 22:9578
interactions N + N → N + N, unitarity constraints on helicity-flip amplitudes in, 25:22851
interactions N + N → N + N, unitarization of Born approximation for, 22:46543
interactions N + N → N + N, vacuum pole contributions to inelastic scattering cross sections for two-Reggeon cut in, (T), 25:33586
interactions N + N → N + N, velocity-dependent boson exchange potentials in Born approximation for, 22:3467
interactions N + N → N + N*, N/D unitary isobar model of, 25:1557
interactions N + N → N + N*, Regge pole theory for dynamics of, 23:21123 (JINR-E2-4286)
interactions N + N → N + π + N, graphical illustration of isospin analysis of, 25:28039
interactions N + N → N* + N* at high energies, quark model for test of additivity from joint decay distribution from, 22:13735
interactions N + N → N* + N, graphical form of duality for Pomeranchukon exchange in, 23:21092
interactions N + N → N* + N, quark model for selection rules for diffraction dissociation in, 24:3661
interactions N + N → N* + N(N*) below 3 GeV, isobar model for angular distributions for phenomenological Δ(1236) production in, (T), 25:17517 (ORNL-TM-3132)
interactions N + N → π + d at high energies, formulas for phase shift analysis of, 22:35021
interactions N + N → π + N + N at high energies, formulas for observables and partial expansions for phase shift analysis for, 23:51957
interactions N + N → π + N + N at high energies, invariance under Poincare transformations and form of amplitude for, 23:51957
interactions N + N → π + N + N, factorization test for Pomeranchukon in, 25:3395
interactions N + N above 1 GeV, cross sections and multiplicity distributions of charged particle production in, (E), 24:21929
interactions N + N above 1 GeV, multiplicity distribution of charged secondaries from, (T), 24:10765
interactions N + N above 1 GeV, review of properties of secondary particles produced from, 21:46550
interactions N + N above 1.0 TeV, transverse momentum and four-momentum transfer of recoil protons in, (T), 21:4057 (INR-736/VI/PH)
interactions N + N above 10^{12} eV, transverse momentum lower limit and four-momentum transfer of recoil protons from, (E), 21:15261
interactions N + N above 100 GeV, cross sections from observation of cosmic-ray lunar shadow, 21:34491
interactions N + N above 200 GeV in emulsions, review of multiple production from, 22:9509 (INR-P-826/VI/PH)
interactions N + N above 400 MeV, phase shift representations for, 21:37863
interactions N + N above 5 GeV/c, Regge pole model for, 22:20210 (CERN-67-24(Vol.2))
interactions N + N above 70 GeV, statistical thermodynamics of hadron gas and liquid drops for multiple meson production in, (T), 25:22846
interactions N + N and anti N + N at high energies, upper bounds on cross section differences for, 24:33018
interactions N + N and anti N + N in quark model, real part of amplitude for, 21:25279
interactions N + N and electromagnetic form factors, O(4,2) model of baryons for, 22:46466
interactions N + N at 0 to 3 GeV, one-boson-exchange model of elastic, (E/T), 25:20025
interactions N + N at 0 to 300 MeV, unitary scattering amplitudes for, (T), 22:7637(R) (COO-1573-33)
interactions N + N at 0 to 350 MeV, s-wave effects for one-boson-exchange potentials, (T), 23:25956
interactions N + N at 0 to 400 MeV, calculations of phase shifts and mixing parameters using separable potentials, (T), 23:7336
interactions N + N at 0 to 400 MeV, separable potential fits to phase shifts and partial wave mixing parameters for, (T), 23:32759
interactions N + N at 0.17 to 310 MeV, soft-core potentials for, (T), 22:20754
interactions N + N at 0.310 to 11 GeV, review of phase shifts for, 24:18234
interactions N + N at 0.4 to 100 GeV in emulsions, fireball formation in, (E), 24:24234
interactions N + N at 1 to 100 TeV in emulsion stack, analysis of cosmic, 21:27301
interactions N + N at 1 to 100 TeV, aleph N* resonance in, (E/T), 24:20138
interactions N + N at 1 to 100 TeV, transverse momenta for, 21:23345
interactions N + N at 1 to 450 MeV, scattering matrix for, 23:44671
interactions N + N at 1 to 750 MeV, phase-shift analysis of, (E/T), 23:15494 (UCRL-71436)
interactions N + N at 10 to 270 MeV, solution of Nambu—Salpeter—Bethe equation for $^3P_1$ state, 21:27384
interactions N + N at 10 to 350 MeV, relativistic two-pion-exchange effects in, 24:13119
interactions N + N at 10 to 700 MeV, phase-shift analysis of, (T), 23:21406
interactions N + N at 10^{11} to 10^{13} eV, proposed experiment for average characteristics and angular distributions for, (E), 25:36416
interactions N + N at 100 keV to 1 GeV, bibliography on, (E/T), 22:52937 (LA-4002)
interactions N + N at 100 to 3000 GeV, meson multiple production, multiplicity, and fireball production in, (E), 25:1402
interactions N + N at 1000 TeV in emulsions, inelasticity of jets in, (E), 22:29622
interactions N + N at 147 MeV, phase analysis of, 21:40242
interactions N + N at 147 MeV, phase shift analysis of, 21:4058 (JINR-E1-2953)
interactions N + N at 18.2 and 23.1 MeV, unambiguity of phase shift analysis for, 23:34617
interactions N + N at 2.6 GeV/c, two-pion-exchange contributions to, 22:46467
interactions N + N at 20 MeV, phase-shift analysis using r-criterion for testing phase-shift sets, (T), 22:42098 (JINR-E1-3899)
interactions N + N at 210 MeV, phase-shift analysis of, (T), 22:24681
interactions N + N at 23.1 MeV, phase shift analysis of, (E), 21:3977 (JINR-E1-2952)
interactions N + N at 23.1 MeV, phase-shift analysis for, 21:2481
interactions N + N at 25 MeV, determination of πN coupling constant and elastic-scattering matrix from, (E/T), 21:19021
interactions N + N at 25 to 310 MeV, one-boson-exchange model parameters from phase shifts for, 21:17138
interactions N + N at 25 to 330 MeV, tensor meson exchange effects on elastic, 21:35315 (JINR-E1-3420)
interactions N + N at 25 to 350 MeV, description using one-boson-exchange potentials with higher-order momentum-dependent terms, (T), 22:9967
interactions N + N at 25 to 3500 MeV, graphs for scattered particle energies and angles for, 21:44351 (ORNL-TM-1945)
interactions N + N at 3 GeV/c, review of, (E/T), 21:37860
interactions N + N at 300 to 800 MeV, review of, (E), 25:33535 (LA-4640)
interactions N + N at 310 to 740 MeV, review of experiments on polarization from, (E), 22:13646 (UCRL-17408(Rev.))
interactions N + N at 400 GeV, Wilson chamber and ionization calorimeter study of, (E), 22:15672
interactions N + N at 400 to 800 MeV, meson-exchange contributions to, (T), 24:40412
interactions N + N at 5.5 to 28 GeV and 0.7 to 27.6 TeV, recession-velocity analysis of multiple π production in, (E/T), 23:49046
interactions N + N at 50 to 635 MeV, T-invariance violation in, 25:33773
interactions N + N at 510 to 670 MeV, Wolfenstein and transfer depolarization parameters from triple scattering in, (E), 24:28480 (UCRL-19451)
interactions N + N at 550 to 1400 MeV, partial-wave absorptions of elastic amplitudes for, (T), 21:11776
interactions N + N at 630 MeV, least square theory for phase-shift analysis of, 21:29562 (JINR-P1-3268)
interactions N + N at 630 MeV, method for discriminating statistical hypotheses at close values of chi^2 for phase shift analysis of, 22:24678
interactions N + N at 630 MeV, phase shift analysis of, 22:39434
interactions N + N at 630 MeV, phase shift analysis for, 22:5598 (JINR-P1-3525)
interactions N + N at 735 MeV, phase shift analysis of elastic, 24:3702
interactions N + N at 800 GeV in emulsion, hadron production in cosmic ray, (E), 23:5530
interactions N + N at 800 to 1400 MeV, single-pion production in, (T), 21:11776
interactions N + N at 95 and 310 MeV, two-boson-exchange contribution to, 23:15150
interactions N + N at high and superhigh energies, Monte Carlo method with energy—momentum conservation law for analytical approximations for reconstruction of inelastic, (T), 25:59472 (JINR-P2-6022)
interactions N + N at high energies and large momentum transfers, statistical soft meson model for elastic and inelastic, 23:34619
interactions N + N at high energies and low momentum squared, dependence of residue of Pomeranchuk pole on momentum squared and amplitudes in quark model for Regge, 23:49120

interactions N + N at high energies in emulsions, cross sections for, 21:27307
interactions N + N at high energies in emulsions, multiplicity and angular distribution of secondaries in, (T), 22:32060
interactions N + N at high energies in parton model, cross sections for inelastic, 25:12222
interactions N + N at high energies in Regge-pole model, inconsistency of crossover phenomena for, (T), 22:3310
interactions N + N at high energies in slab, nucleon penetration from nuclear cascade calculations for, 24:20177
interactions N + N at high energies with large momentum transfer, chiral SU(2) x SU(2) symmetry for, 22:35015
interactions N + N at high energies, absorption model for form factors for, 21:40240
interactions N + N at high energies, asymptotic behavior of amplitudes for forward elastic, 22:29718
interactions N + N at high energies, behavior of total cross sections for, 24:18227
interactions N + N at high energies, bounds on amplitudes and oscillations in diffraction-peak region for, (T), 25:19990
interactions N + N at high energies, conference on, (E/T), 24:37803 (JINR-P1-3971)
interactions N + N at high energies, dynamics from four-momentum transfer in, 22:46460
interactions N + N at high energies, eikonal model for elastic and charge-exchange, 24:52146
interactions N + N at high energies, extended structure theory for form factors for, 22:17941
interactions N + N at high energies, fifth-interaction coupling from large-angle, 25:14706
interactions N + N at high energies, formulas with multiple rescatterings by arbitrary Regge poles for elastic and charge-exchange, (T), 24:52097
interactions N + N at high energies, multiperipheral model for total cross sections of, 23:36920
interactions N + N at high energies, multiple-scattering corrections in quark model for, 22:50366
interactions N + N at high energies, O(3,1) partial-wave analysis of off-forward, 23:21125
interactions N + N at high energies, production and decay of resonances in peripheral, (T), 23:34573 (COO-1051-32)
interactions N + N at high energies, quark model for, 22:39367
interactions N + N at high energies, quasipotential theory of, 25:59442
interactions N + N at high energies, radiation-type eikonal model for uncorrelated meson production in, 24:28567
interactions N + N at high energies, Regge pole exchange models for elastic, 24:8641
interactions N + N at high energies, Regge pole model for forward, (T), 22:13744 (IPNO/TH-108)
interactions N + N at high energies, Regge pole theory and broken SU(3) symmetry in model for, 21:27342 (JINR-P2-3251)
interactions N + N at high energies, Regge pole theory and exchange degeneracy for cross section relations with meson—nucleon interactions, 22:46535 (JINR-P2-3944)
interactions N + N at high energies, Regge poles with absorption for, 24:18151 (CONF-690330-, pp 166-80)
interactions N + N at high energies, Reggeized eikonal formulation for, 23:51867(R) (NYO-1984-13)
interactions N + N at high energies, Reggeon-diagram Gribov-technique for multiple rescattering in, 24:10783
interactions N + N at high energies, review of experiments on, 21:31578
interactions N + N at high energies, review of Regge pole theory for elastic and charge-exchange, 24:5310
interactions N + N at high energies, review of statistical model for cross sections for baryon and meson production in, (T), 25:14680 (INP-719)
interactions N + N at high energies, rho' conspiracy for forward charge-exchange, 22:20277
interactions N + N at high energies, shower enhancement of branch-point contribution to total cross sections for, 24:28550
interactions N + N at high energies, spin-dependent effects in, (E/T), 24:5313
interactions N + N at high energies, statistical model for π shower production in, 22:39427
interactions N + N at high energies, statistical potential model for forward and large-angle, 21:25356
interactions N + N at high energies, straight-line particle paths approximation for functional integration in quantum field theory for meson production in, (T), 25:17498 (JINR-E2-5217)
interactions N + N at high energies, structure of currents for, 21:29558
interactions N + N at high energies, SU(3) symmetry and exchange degeneracy in Regge pole—cut model for, (T), 25:12217
interactions N + N at high energies, summation of asymptotics of amplitudes for, 22:46531 (JINR-E2-3917)
interactions N + N at high energies, total cross sections for W boson production in, (T), 25:33594 (JINR-E2-5748)
interactions N + N at high energies, transversity amplitudes for polarization parameters and resonance decay distributions for, (T), 22:20273
interactions N + N at high energies, unitary condition of S-matrix for multiple meson production in, 21:35351
interactions N + N at high momentum transfers, analysis of elastic, 21:27383
interactions N + N at intermediate energies, review of structure in, 23:25648
interactions N + N at intermediate energies, review of, (E/T), 24:8564
interactions N + N at low and high energies, review of formalism for, 24:18235
interactions N + N at low energies, bremsstrahlung production in, (T), 25:3756
interactions N + N at low energies, charge independence of, 22:52994
interactions N + N at low energies, deuteron constraints on scattering parameters for, (T), 24:24394
interactions N + N at low energies, effective range approximation for Hulthen and Morse potentials for, 22:22416
interactions N + N at low energies, experimental testing of analyticity structure of S-matrix for, (T), 21:42384
interactions N + N at low energies, formulas for polarized scattering for phase-shift analysis of, (T), 22:52993
interactions N + N at low energies, inversion problem with separable potentials for, 23:19012
interactions N + N at low energies, multipole expansion of one-boson exchange potential for, (T), 25:14739
interactions N + N at low energies, one-boson-exchange potential for S-scattering parametrization for, (T), 25:14739
interactions N + N at low energies, Pomeranchuk trajectory for amplitudes of, 22:35151
interactions N + N at low energies, review of, 23:25648
interactions N + N at low energies, review of resonance production in, 22:32151
interactions N + N at low energies, scattering length and effective range from Nambu—Salpeter—Bethe equation for $^1S_0$ state of, (T), 24:52148
interactions N + N at low energies, three-body formalism for, 22:5604
interactions N + N at low energies, two-pion exchange contribution to potential for, 22:1453
interactions N + N at low energies, universal theory of primary interactions for, 24:45551
interactions N + N at low energy, analysis of $^1S_0$ scattering lengths and effective ranges for, 25:56529
interactions N + N at low energy, one-boson-exchange potentials for, (T), 23:15349
interactions N + N at small distances in nuclei, (T), 21:37855
interactions N + N at ultrahigh energies, model for multiple meson production in, (T), 24:47444
interactions N + N at ultrahigh energies, parton model for multiplicity, asymmetry, and inelasticity in, (T), 25:1562
interactions N + N at very high energies in cosmic-ray jets, fireball mechanism for particle production in, 25:12230
interactions N + N at very high energies, angular and energy distributions of secondary particles from, (T), 25:7658 (JINR-P2-5331)
interactions N + N at very high energies, angular and energy distributions of particles produced in, (T), 25:30870(T) (ORNL-tr-2433)
interactions N + N at very high energies, model for propagation of cosmic radiation through atmosphere from, 22:46464
interactions N + N at very high energies, uncorrelated jet model for particle spectra in, 25:22852
interactions N + N at very high energies, unitary symmetry tests from large-angle, 21:25325
interactions N + N below 1 GeV/c, direct data analyses and phenomenological dispersion relations, (T), 25:30882
interactions N + N below 3 GeV, one-boson-exchange models for, 25:56532
interactions N + N below 330 MeV, meson model of nuclear forces for elastic, 21:17135 (JINR-P4-3135)
interactions N + N below 330 MeV, models for, (T), 23:5946(R) (ORO-3765-1)
interactions N + N below 330 MeV, one-boson-exchange potentials for, (T), 22:27286
interactions N + N below 350 MeV in nuclei, separable potential for, 22:7527
interactions N + N below 350 MeV, one-boson-exchange-type potential in triplet even state for, (T), 24:42985
interactions N + N below 350 MeV, phenomenological aspects of, (T), 25:14734
interactions N + N below 350 MeV, scattering length and nuclear matter binding energy from, (T), 25:14734
interactions N + N below 400 MeV, two-pion-exchange contribution to, 25:22845
interactions N + N in $^1S_0$ state, effective range theory based on Nambu-Salpeter-Bethe equation for, (T), 23:13112
interactions N + N in cascade theory calculations for particle reactions with nuclei at high energies, method for sampling inelastic, 22:7525 (JINR-P2-3561)
interactions N + N in common potential well, Bethe—Goldstone equation for, 24:52720
interactions N + N in cosmic jets, emission model for multiple particle production in, 25:53238
interactions N + N in cosmic nucleus—nucleus peripheral collisions in emulsions, resonance production from, (E), 22:15671 (INR-P-816/VI/PH)
interactions N + N in cosmic ray energy region, characteristic difference of π + N and, 24:20172
interactions N + N in deuterium (p,2p) and helium-3 (p, d) reactions, final-state, (E), 22:26810
interactions N + N in even—even N = Z nuclei, charge-symmetric pairing, (T), 23:9052
interactions N + N in finite nuclei, effective, (T), 22:27310
interactions N + N in fireball model, angular distribution of multiple meson production in, 23:10827
interactions N + N in GeV range, low-energy models for, (T), 25:30854
interactions N + N in ground-state nuclei, observation of correlation effects in, (T), 23:9022 (TID-24667, pp 325-9)
interactions N + N in heavy nuclei, residual, (T), 21:35437(R) (EANDC(E)-76(U))
interactions N + N in heavy nuclei, review of Thomas—Fermi statistical approximation for meson theory of, (T), 25:17953(T) (BNL-tr-368)
interactions N + N in infinite nuclear matter, effective potential for, (T), 25:31416
interactions N + N in intermediate region, three-pion-exchange effects in, 22:13774
interactions N + N in ladder approximation with π exchange, Bethe—Salpeter equation for, 25:30909
interactions N + N in light nuclei, bound states with coupling constant for two-body, 23:18878 (ITF-68-45)
interactions N + N in many-body systems, scattering formalism for, (T), 22:14109
interactions N + N in many-body systems, time-retarded, (T), 22:14103
interactions N + N in meson (π^+) (π^-,NN) and photon (γ,2N) reactions with double-magic nuclei, general formalism in terms of partial wave analysis for potential scattering in, 23:42982
interactions N + N in momentum space, nonstatic effects and origin of repulsive core from, 23:39749
interactions N + N in nuclear emulsions, nucleon isobar production in, 22:24533
interactions N + N in nuclear many-fermion systems, meson theory for, 22:11979 (IPNO/TH-100)
interactions N + N in nuclear matter, hard core in two-body potential for, (T), 22:27249
interactions N + N in nuclear matter, nonlocal separable potential for, (T), 22:35398
interactions N + N in nuclear scattering, accuracy of off-shell amplitudes for, (T), 21:30046
interactions N + N in nuclear single-j shell, exact values of isopairing Hamiltonian for, 21:38390
interactions N + N in nuclei at 200 GeV, properties of secondary particle production in, (E), 24:21928
interactions N + N in nuclei at high energies with intranuclear cascades, statistical calculations for inelastic, 23:30754(T) (ORNL-tr-2123)
interactions N + N in nuclei, analysis for core polarization effects using RPA and first-order perturbation theory, (T), 24:13440
interactions N + N in nuclei, auxiliary potential method for deduction of matrix elements from scattering data, (T), 24:3981
interactions N + N in nuclei, boundary-condition model of, (T), 22:27285
interactions N + N in nuclei, calculation of reaction matrix elements for, (T), 23:13345
interactions N + N in nuclei, charge symmetry of, (T), 21:21602
interactions N + N in nuclei, consistent treatment in one-boson-exchange model for exchange currents from, 23:51950 (DESY-69/28)
interactions N + N in nuclei, core-polarization contributions to effective shell-model potential for, (T), 24:6953
interactions N + N in nuclei, determination of two-body potentials for, (T), 22:39699
interactions N + N in nuclei, effective potential for, (T), 23:1935 (UCRL-18445)
interactions N + N in nuclei, effective, (T), 22:27312
interactions N + N in nuclei, effective, (T), 23:5954
interactions N + N in nuclei, electron and proton scattering by nuclei for correlations in, (E/T), 22:5499 (INP-567/PL/PH)
interactions N + N in nuclei, equivalent nonlocal potentials for, (T), 22:26855
interactions N + N in nuclei, gauge invariance of, (T), 22:27313
interactions N + N in nuclei, Hamiltonian operator for velocity-dependent, (T), 22:42107
interactions N + N in nuclei, intranuclear cascades with many-particle interactions from, (T), 22:37164
interactions N + N in nuclei, isospin invariance of pairing force Hamiltonian for, (T), 22:37391
interactions N + N in nuclei, isospin- and number-conserving formalism for pairing, (T), 22:30073
interactions N + N in nuclei, lectures on soft-core potentials for, (T), 23:17128 (MIT-2098-518)
interactions N + N in nuclei, meson exchange in, (T), 23:31056 (JINR-P4-4376)
interactions N + N in nuclei, method for calculating shell-model matrix elements from scattering phase shifts, (T), 21:44754
interactions N + N in nuclei, models for, 21:17136 (JINR-P4-3136)
interactions N + N in nuclei, nonstatic potentials for, (T), 22:44793
interactions N + N in nuclei, number-conserving formalism for pairing, (T), 23:5943 (IPNO/LA-68/24)
interactions N + N in nuclei, off-energy-shell t-matrix elements for local potentials with hard cores, (T), 22:42108
interactions N + N in nuclei, pairing, (T), 22:18320
interactions N + N in nuclei, parity-nonconserving one-pion-exchange potential for, 25:47900
interactions N + N in nuclei, Perey relation for equivalent local and non-local, (T), 24:11027 (LAL-1223)
interactions N + N in nuclei, phenomenological potentials for, (T), 22:39703
interactions N + N in nuclei, phenomenological potential parameters for, (T), 22:32713
interactions N + N in nuclei, potential models for, (T), 22:32716
interactions N + N in nuclei, properties of many-particle interactions from cascade calculations and, 22:29700(T) (ORNL-tr-1800)
interactions N + N in nuclei, properties of spin-orbit, (T), 24:8940
interactions N + N in nuclei, π and meson resonance exchange contribution to nuclear forces in, 22:39431
interactions N + N in nuclei, realistic one-boson-exchange potentials for, (T), 22:53248
interactions N + N in nuclei, realistic potentials for, (T), 22:32720

interactions N + N in nuclei, realistic potentials for, (T), 22:32714
interactions N + N in nuclei, renormalization for core polarization, 21:40502
interactions N + N in nuclei, repulsive core in, (T), 22:27284
interactions N + N in nuclei, research progress on effective, (T), 23:1928 (AD-671692)
interactions N + N in nuclei, residual, (T), 23:19362
interactions N + N in nuclei, search for weak, (E), 22:27226
interactions N + N in nuclei, separability of residual two-body, (T), 23:13338
interactions N + N in nuclei, separable potentials for, (T), 22:5809(R) (ANL-7354)
interactions N + N in nuclei, separable potentials for, (T), 22:5758
interactions N + N in nuclei, separable potentials for, (T), 23:31068
interactions N + N in nuclei, shell-model description of tensor forces in residual, (T), 23:47072
interactions N + N in nuclei, single separable potential for, 24:1870
interactions N + N in nuclei, soft-core Hamada—Johnston potential for, (T), 22:44801
interactions N + N in nuclei, soft-core potential for, (T), 22:3682
interactions N + N in nuclei, spin-orbit potential from cluster model for light nuclei, (T), 22:1704 (BMwF-FBK-67-69)
interactions N + N in nuclei, tests for P and T violation in weak, 21:29601
interactions N + N in nuclei, triplet—odd, (T), 23:19346
interactions N + N in nuclei, velocity-dependent potentials for, (T), 22:11981
interactions N + N in O(4) symmetry, exchange of odd-parity Regge trajectories for forward peaks in, 21:33777
interactions N + N in pre-asymptotic region, angular distributions and amplitude structure for inelastic, (T), 25:59497
interactions N + N in proton reactions with nuclei at 20 to 600 GeV, Glauber model for, 24:21994
interactions N + N in quantum field theory, s-channel helicity nonflip amplitude of, 25:53292
interactions N + N in quark model, sum rules relating, (T), 21:15318
interactions N + N in Regge pole theory, contribution of two-rho cuts to partial-wave amplitude for, 22:13776
interactions N + N in sd-shell nuclei, effective, (T), 23:5973
interactions N + N in three-body systems, potentials for, (T), 22:39731
interactions N + N in three-body systems, separable nonlocal hard-core potential for, (T), 22:20771
interactions N + N in triplet states, effective potential for, (T), 23:17143
interactions N + N in U(6,6) and chiral-dynamic models, one-pion-exchange and two-pion-exchange contributions to, 25:17520
interactions N + N in U(6,6) and chiral-dynamic models, phase parameters for, 25:17521
interactions N + N in urbaryon model, cross sections for forward elastic, 21:35300
interactions N + N multiple particle distributions in strong, 21:7502
interactions N + N near 210 MeV, comparison of nuclear potential models with phase shift analyses of, (E/T), 23:15148
interactions N + N near 25 MeV, phase-shift analysis of, 21:21615
interactions N + N near 50 MeV, phase shift analysis of elastic, 21:37841
interactions N + N of, Tabakin potential in, 25:5825
interactions N + N through Peierls mechanism, Faddeev equations for, 23:10826
interactions N + N to 3 GeV, in OBE model, phase shifts for, (T), 24:40426
interactions N + N to 350 MeV, phenomenological phase-parameter fits to, 22:15817
interactions N + N to 400 MeV, separable nonlocal potential for phase shifts and scattering lengths of, 24:6731
interactions N + N up to 30 GeV, statistical calculations for inelastic, 23:3753 (JINR-P2-4066)
interactions N + N up to 300 MeV, noncentral velocity-dependent potential for, (T), 23:17131
interactions N + N with large momentum transfer, Serber model for, (T), 22:1451
interactions N + N with massive scalar- and pseudoscalar-meson exchange, covariant integral equations for low-energy, 24:13040
interactions N + N with vector-meson exchange, radiative corrections to relativistic eikonal amplitude for, (T), 25:59453
interactions N + N with virtual meson exchange, high-energy approximation for multiple, 24:30527
interactions N + N, $^1S_0$ phase shift of, 23:39751
interactions N + N, 2π exchange contribution in, 21:2483
interactions N + N, absorptive Veneziano model for, (T), 24:49533
interactions N + N, analysis of comparison procedure for extracting two-nucleon scattering parameters from final-state, (T), 25:34193
interactions N + N, analysis of potential concept for, (T), 24:43575
interactions N + N, analysis of rank-two separable potentials for inverse scattering, (T), 23:52184
interactions N + N, analysis using generalized seniority scheme, (T), 24:20436
interactions N + N, analytic helicity amplitudes and Regge-pole formulas for differential cross sections for, 22:3448
interactions N + N, analytic properties of Feynman diagrams in quantum field theory for, 22:20218
interactions N + N, analyticity properties and asymptotic behavior of partial-wave amplitudes of, 22:20276
interactions N + N, approximate Bethe—Salpeter equation for calculation of phase parameters for, 25:30912
interactions N + N, asymmetry coefficient in γ angular distribution from neutron capture by cadmium-113 for parity-violating weak, (E), 24:3720
interactions N + N, asymptotic behavior of amplitudes for, 22:37167
interactions N + N, Bethe—Salpeter equation in pion ladder approximation for P- and D-wave states of, 24:1622
interactions N + N, bibliography on experimental aspects of, 21:9697 (AERE-Bib-149)
interactions N + N, boson-exchange in, (T), 22:17977
interactions N + N, bound on double spectral function for class of Yukawian potentials for, 22:1455
interactions N + N, bounds on πN coupling constant for ghosts in amplitudes for, 22:44439
interactions N + N, bremsstrahlung production cross sections for, (E), 21:40432 (WASH-1074)
interactions N + N, calculation of elastic scattering lengths using vector meson exchange for, 23:3843
interactions N + N, calculation of force in, (T), 25:7692
interactions N + N, calculation of one-pion-exchange diagram in U(6,6) for, 25:20021
interactions N + N, calculation of scattering phase shifts using one-boson-exchange amplitudes, 24:43529
interactions N + N, charge-dependent effects in low-energy, 25:43960
interactions N + N, charge-dependent effects of photon—pion exchange process in, (T), 23:5639
interactions N + N, Chou—Yang model for diffractive dissociation production in, 24:45502
interactions N + N, comparison between on-shell and off-shell calculations for, 22:3456
interactions N + N, conference on, 21:37734
interactions N + N, conservation laws for intranuclear cascade calculation for nucleon reactions with nuclei from inelastic, 22:22410 (JINR-P4-3714)
interactions N + N, continuous-moment sum rules for, (T), 25:12207
interactions N + N, contributions of heavy pseudoscalar mesons to, 23:39752
interactions N + N, coupling constant for πN for tests of long-range charge independence in, (T), 25:36522
interactions N + N, coupling constants from bootstrap sum rules for amplitudes of, (T), 25:33770
interactions N + N, covariant O(4) propagator for M = 1 exchange in, 23:46781
interactions N + N, criterion for weak perturbing systems for elastic, 22:13865
interactions N + N, cross sections for hadron and γ, γ → 2μ, production relative to cross sections for hadron and W production in, (E/T), 25:5266 (IFVE-SEF-69-81)
interactions N + N, cross-channel isospin analysis of peripheral single π production in, (T), 25:17490
interactions N + N, cross-channel isospin analysis of peripheral single rho production in, (T), 25:17490
interactions N + N, crossing symmetry in Veneziano model for, (T), 25:1561
interactions N + N, current algebra method for Adler—Weisberger sum rule for, 23:39635
interactions N + N, derivation of one- and two-pion exchange contributions to field theoretic potential for, 23:15153
interactions N + N, determination of potentials from scattering phase shifts using Marchenko theory, (T), 23:49450
interactions N + N, determination of potentials from partial-wave amplitudes for, 22:9708
interactions N + N, determination of scattering lengths using Watson-Migdal theory of final-state interactions, (T), 22:35366 (ORNL-4217, pp 82-95)
interactions N + N, diffractive Regge pole model and conspiracy relation for, (T), 24:8643
interactions N + N, direct approach for T-matrix half off energy shell for, (T), 25:50148 (ORO-3765-34)
interactions N + N, dispersion calculation of parity violating amplitude for, 25:45717
interactions N + N, dispersion sum rules for, 21:25315 (JINR-P2-3253)
interactions N + N, dual quark—parton model for, 25:56481
interactions N + N, duality concept for Pomeranchuk term for, 25:3375
interactions N + N, dynamic conditions for Regge poles in, 21:4064
interactions N + N, effect of form factors in OBE model of, 23:25654
interactions N + N, effect of higher πN resonances on, 23:42696
interactions N + N, effect of π mass difference on, 24:24396
interactions N + N, effect of π mass difference on phase parameters for, 24:40424
interactions N + N, effect of second-class currents on weak, 22:26670
interactions N + N, effect of tensor forces in residual, (T), 25:3766
interactions N + N, effect on two-body sum rules from nonlocality of potential for, (T), 25:14732 (NP-18648)
interactions N + N, effective potential for Hartree—Fock calculations, (T), 22:32718
interactions N + N, effects of higher baryon resonances on two-pion-exchange contribution to, 21:44389
interactions N + N, effects of mass and coupling-constant differences on π and rho exchange contributions to, (T), 25:20021
interactions N + N, effects of relativistic elastic unitarity on low-energy, (T), 23:45000
interactions N + N, effects of self-energy term on pairing calculations, (T), 23:1940
interactions N + N, eikonal approximation for inelastic amplitude in quantum field theory model for single scalar meson production in, 24:26446 (JINR-E2-4955)
interactions N + N, electromagnetic contributions to, (T), 23:9020 (TID-24667, pp 271-86)
interactions N + N, electromagnetic effects of, 22:48258
interactions N + N, equivalence between velocity-dependent and static potentials for, 23:52028
interactions N + N, equivalent potentials and many-body forces in many-body systems for, 21:13906
interactions N + N, eta, ω, and sigma coupling constants from forward dispersion relations for, 21:21257
interactions N + N, exchange degeneracy in Reggeized absorption model for, 25:30874
interactions N + N, existence of subsidiary Regge trajectories with singular residues in, (T), 21:9810
interactions N + N, experiment on weak, (E), 22:35311
interactions N + N, experimental facilities at Los Alamos Meson Physics Facility for proposed study of, 25:33535 (LA-4640)
interactions N + N, feasibility of polarized proton target to search for W production in, (E), 25:33542
interactions N + N, feasibility of search for W in, (E), 25:5267 (IFVE-SEF/STF-69-46)
interactions N + N, Feynman diagrams for unitary representations of SL(2,C) symmetry for, 22:20284
interactions N + N, field—current identity for nucleon isovector form factor from NN rho vertex in, 24:1605
interactions N + N, field-theoretic model of two-pion-exchange potential for, 25:3414
interactions N + N, field-theoretical potentials for, (T), 22:20755
interactions N + N, finite square-well potential for, (T), 23:15525
interactions N + N, formulation of potentials using meson theory, (T), 22:30092
interactions N + N, formulation of Reggeized absorption model with exchange degeneracy for elastic and charge-exchange, (T), 25:53159
interactions N + N, general properties of angular-momentum dependent potential for, 21:42385
interactions N + N, generalized mutiperipheral model for properties of partial cross sections for K anti K production in, (T), 25:36422
interactions N + N, hard-core effect in two-body, 24:10788
interactions N + N, infinite dimensional symmetry schemes for, 21:33745
interactions N + N, internucleon potential with parity nonpreservation for weak, 22:13816
interactions N + N, kinematic scaling in quark model for, 24:45534
interactions N + N, kinematic singularities of transversity amplitudes of, 22:41874
interactions N + N, left-hand-cut contributions in partial-wave dispersion relations for, (T), 23:5974
interactions N + N, Levinson theorem and N/D method for partial-wave amplitudes of, 22:20275
interactions N + N, local approximation to one-pion-exchange potential for, 25:30911
interactions N + N, local phenomenological potentials for, (T), 23:11056
interactions N + N, Lorentz group for Regge pole analysis of phenomenological, 23:44628
interactions N + N, Lorentz group representations for amplitude expansion at vanishing four-momentum transfer in, 22:15794
interactions N + N, meson (π) type-III conspiracy of Feynman amplitude in, 23:23462
interactions N + N, meson exchange in, (T), 22:53245
interactions N + N, meson exchange theory for, 21:37854
interactions N + N, meson theory for, 21:21250 (UCSD-10-P-10-21)
interactions N + N, meson—nucleon coupling constants from forward dispersion relations for, 22:24683
interactions N + N, minimal solutions of conspiracy problem for, 24:1665
interactions N + N, model for analysis of multiple π production in, 24:28569
interactions N + N, model with epsilon and delta for analysis of, 24:20175
interactions N + N, models for anti N + N interaction in theory for, 21:37794
interactions N + N, Monte Carlo simulation of high-multiplicity peripheral, (T), 24:37780(T) (NP-tr-1904)
interactions N + N, moving branch points in angular momentum plane in inelastic, 21:42388
interactions N + N, multiplicity, angular, and energy distributions of secondary particles from, (E/T), 24:10772
interactions N + N, μ pair background from γ → μ⁺ + μ⁻ and W production in, (T), 24:42886
interactions N + N, N + N interactions from single hard π production in nonrelativistic, (T), 25:43653
interactions N + N, Nambu—Salpeter—Bethe equation for $^1S_0$ phase shift of, (T), 24:42984
interactions N + N, Nambu—Salpeter—Bethe equation for $^3P_0$ bound state, 24:8676
interactions N + N, nonlocal potential approach in relativistic, (T), 25:5827
interactions N + N, nonlocal separable potentials for, (T), 21:34070
interactions N + N, nonrelativistic potential for, (T), 23:34811
interactions N + N, nuclear and particle theory from ultrahigh-intensity accelerator study of, 25:9810
interactions N + N, nuclear matrix element deduction from phase shifts in, (T), 23:44999
interactions N + N, nuclear structure calculations from, 21:37859
interactions N + N, nucleon—meson form factor and meson density distribution for, 23:27827

interactions N + N, numerical evaluation of separable potentials for singlet and triplet partial waves of, 22: 24676 (LA-DC-8138)
interactions N + N, O(4) propagators, Toller poles, and Regge poles for forward, 23:10828
interactions N + N, O(4) symmetry and Regge pole theory for, 21:29619
interactions N + N, O(4) symmetry for Regge poles in, 22:39464
interactions N + N, off-energy-shell behavior of partial-wave amplitude for, 23:32772
interactions N + N, off-energy-shell t matrix for local singular-core, (T), 24:24629
interactions N + N, off-shell effects for separable potentials for inverse, (T), 25:50145 (CONF-690732, pp 13.1-39)
interactions N + N, off-shell perturbative method and on-shell Dashen—Frautschi method for scattering-length shifts for, 22:15818
interactions N + N, one- and two-pion exchange in, (T), 21:37856
interactions N + N, one-, two-, and three-pion exchange in T = 0, (T), 23:39747
interactions N + N, one-, two-, and three-pion exchange in, (T), 23:39750
interactions N + N, one-boson exchange model, review of, (T), 22:11994
interactions N + N, one-boson-exchange approximation for, (T), 25:20024
interactions N + N, one-boson-exchange model with uncorrelated $\pi\pi$ interactions for partial waves for, 23: 39743 (ITF-69-35)
interactions N + N, one-boson-exchange models for calculating potential for, 24:37804 (NYO-4032-22)
interactions N + N, one-boson-exchange potential for, 22:9624
interactions N + N, one-boson-exchange potential for, 23:27827
interactions N + N, one-boson-exchange potentials for, (T), 22:27281
interactions N + N, one-boson-exchange potentials for, (T), 22:27283
interactions N + N, one-boson-exchange potentials for, (T), 23:25955
interactions N + N, one-boson-exchange type potential for, (T), 24:30534
interactions N + N, one-meson-exchange in, 21:37852
interactions N + N, one-pion-exchange contribution to weak parity violating potential for, 22:13777
interactions N + N, origin of repulsive core and spin-orbit forces in, (T), 21:40479
interactions N + N, Pade approximation for, 25:40975
interactions N + N, pairing Hamiltonian for, (T), 22: 30075
interactions N + N, parity nonconservation in weak, 23:18946
interactions N + N, parity-violating and strong potentials in, 25:20488
interactions N + N, parity-violating potential for, 22: 24680
interactions N + N, parity-violating potential for, 22: 50418
interactions N + N, partial wave analysis of, 25:53180 (UCRL-20655, pp 176a-89)
interactions N + N, partial-wave spinor amplitudes for, 22:48374
interactions N + N, particle theories from, 21:37892
interactions N + N, peripheral model for, 21:11823
interactions N + N, phase shifts for relativistic, 21: 33721
interactions N + N, phase shifts in SU(4) for, 21:934
interactions N + N, phase-shift analysis for separable potentials, (T), 23:25957
interactions N + N, phase-shift analysis using chi-squared minimization, (T), 21:21580 (UCRL-14627-T)
interactions N + N, phenomenological local charge-independent soft-core potential with central spin-orbit and tensor terms for, 24:30532 (BMBW-FBK-70-5)
interactions N + N, Poisson distribution for bounds, multiplicity, and energy dependence of inelastic, (T), 25:30899
interactions N + N, Poisson distribution of secondary soft mesons from multiple production in, 25:53228
interactions N + N, Poisson distribution of secondary mesons in straight-line paths approximation for, (T), 25:3407 (JINR-E2-5329)
interactions N + N, polarization experiments to test T and CPT invariance in, 23:5658
interactions N + N, pole models for, (T), 22:20751
interactions N + N, potential for isospin triplet state of, (T), 24:20445
interactions N + N, potential formulation using Coulomb T-matrix, (T), 22:37287
interactions N + N, potential representation of, (T), 25: 7889
interactions N + N, potentials for many-body bound states, (T), 22:39730
interactions N + N, potentials for, (T), 22:17977
interactions N + N, production of exotic resonances in Regge pole analysis of, 23:42661
interactions N + N, properties for use in calculations of nuclear structure properties, (T), 24:24670
interactions N + N, properties of velocity-dependent potentials for, 22:17975
interactions N + N, π Regge pole conspiracy for, 21: 35305
interactions N + N, π—π S-wave model for phase shift for, 21:46547 (IPNO/TH-88)
interactions N + N, πeta system exchange in, (T), 21: 21252
interactions N + N, quark model for elastic and inelastic charge-exchange, 22:3419
interactions N + N, quark pair production in, (T), 21: 15332
interactions N + N, quark-model inequality for total cross sections for, 22:24688
interactions N + N, quasi-potential smoothness in eikonal representation of quantum field theory models for, (T), 25:41072
interactions N + N, quasipotential smoothness in eikonal approximation in quantum field theory models for, (T), 25:5387 (JINR-E2-5365)
interactions N + N, reconstruction of forward scattering matrix amplitude for, 21:37802 (JINR-P2-3374)
interactions N + N, reconstruction of matrix amplitudes for forward, 22:20245
interactions N + N, Regge asymptotic behavior of amplitude for forward, 23:1651
interactions N + N, Regge behavior of amplitudes for forward elastic, 23:1704 (LPTHE-TH-68/15)
interactions N + N, Regge cut contributions to asymptotic behavior of forward amplitudes of, 21: 37843
interactions N + N, Regge models of asymptotic behavior of amplitudes for forward elastic, 25:3357
interactions N + N, Regge pole model for invariant functions of, 23:10832
interactions N + N, Regge pole model with diffractive corrections for charge-exchange, (T), 24:42903
interactions N + N, Regge—quark model for, 21:35295 (AD-651038)
interactions N + N, Regge-pole formulas for differential cross sections for quasi-two-body, 21:15354
interactions N + N, regression and discriminating experiments for, (T), 22:5607
interactions N + N, regularity of multiplicity distribution of charged secondaries from, 24:3683
interactions N + N, relation between high- and low-energy phenomena in elastic, (T), 22:26667 (LYCEN-6801)
interactions N + N, relation between matrix elements and phase shifts for, (T), 24:13407
interactions N + N, relation of duality to s helicity structure at vertex of Pomeron and meson exchanges in, (T), 24:42986
interactions N + N, relation of exchange degeneracy to finite-energy sum rules and total cross sections for, 23: 46726
interactions N + N, relations between coupling parameters for π + N and, 21:46527
interactions N + N, relative yields for production of heavy stable particles in, 23:3755 (UCID-10169)
interactions N + N, representation of amplitudes as continual integrals over paths in quantum field theory for, (T), 25:50146 (JINR-E2-5851)
interactions N + N, repulsive core in potentials for, 24: 16004
interactions N + N, rescattering amplitude for, (T), 23: 13344
interactions N + N, research progress on elastic, (T), 23:1928 (AD-671692)
interactions N + N, review of, 25:1564
interactions N + N, review of basic features and experimental aspects of, 25:7890
interactions N + N, review of dispersion relations in, (T), 22:11995
interactions N + N, review of effects on nuclear forces from, (T), 25:17953(T) (BNL-tr-368)
interactions N + N, review of elastic, 21:37845
interactions N + N, review of meson effects on, (T), 24:45547
interactions N + N, review of nuclear structure studies by, 21:42699
interactions N + N, review of phase shift analysis for amplitudes of π production from, 21:37862
interactions N + N, review of time reversal invariance in, (E), 24:35684 (JINR-P1-5056)
interactions N + N, review on potentials for, 24:43571
interactions N + N, review on, (T), 25:53834
interactions N + N, S- and P-wave effective range parameters for, 24:15606
interactions N + N, s-channel helicity conservation in diffraction, 24:24337
interactions N + N, saturation of sum rules from current algebra and Schwinger terms in quark model for, 22: 24679

interactions N + N, scattering amplitudes from nuclear scattering experiments at very high energy, (T), 23: 9025 (TID-24667, pp 359-68)
interactions N + N, scattering matrix for relativistic, (T) , 21:4065
interactions N + N, scattering matrix from p + p interactions at 350 to 750 MeV, 22:35014
interactions N + N, scattering matrix from p + p interactions at 0 to 400 MeV, 22:35003
interactions N + N, separable expansions of two-body T-matrix for, (T), 25:5432
interactions N + N, separable potential for, (T), 22: 44762
interactions N + N, short- and long-range charge independence in, 22:37165
interactions N + N, short-wave repulsion in, 22:35022
interactions N + N, simultaneous determination of two parameters in s-wave, (T), 24:42913
interactions N + N, single hard π production in N + N nonrelativistic interactions for, (T), 25:43653
interactions N + N, singlet effective-range parameters of Mongan separable potential for, (T), 25:56859
interactions N + N, soft-core and spin-orbit potentials for, (T), 22:14067(R) (BMwF-FBK-67-81)
interactions N + N, soft-core Morse potential and velocity-dependent potentials for, (T), 22:9971
interactions N + N, soft-core potential model for, (T), 24:13034
interactions N + N, soft-photon theory of bremsstrahlung production in, 22:37116
interactions N + N, soft-pion theorem for determination of intermediate range, 25:36525
interactions N + N, solution of Faddeev equations with arbitrary form of potential for, (T), 25:22839 (JINR-P4-5510)
interactions N + N, solution of Lovelace—Faddeev equations for local potential, (T), 22:27290
interactions N + N, source function in Chew—Low model for potential for, 21:29566
interactions N + N, spin correlation tensor for polarized, (T), 22:11692
interactions N + N, spin-dependent effects in, (T), 22: 7505 (UCRL-17903)
interactions N + N, status of experimental studies on, (E), 22:11996
interactions N + N, straight-line path approximation for Feynmann graphs for relativistic eikonal representation form of amplitude of, (T), 25:45767 (JINR-E2-5827)
interactions N + N, strong coupling potential for phase shifts of elastic, 23:10830
interactions N + N, strong coupling S-wave solutions with hard core including higher-spin isobars in, (T), 23:3752 (DESY-68/49)
interactions N + N, strong-coupling meson field theory with hard core for, 23:18933
interactions N + N, SU(3) and exchange degeneracy in Regge-pole-cut analysis of total cross sections for, (E/T), 25:14660
interactions N + N, sum rules connecting multipion production cross sections for, 22:7512
interactions N + N, sum rules for, (T), 24:52133
interactions N + N, superconvergence sum rules for, 21:21256
interactions N + N, tabulation of kinematic quantities for, (E), 22:17858
interactions N + N, tau criterion for unambiguity of phase shift analysis for, 23:34618
interactions N + N, tensor meson exchange in elastic, (T), 21:25314 (JINR-P2-3188)
interactions N + N, test for Regge cuts in amplitudes for, (T), 22:44456
interactions N + N, test of quark-model predictions for infinite-energy cross sections for, 22:34948
interactions N + N, tests for Regge cuts in, 22:5608
interactions N + N, theory of, 22:3458
interactions N + N, three-dimensional Bethe—Salpeter equations for, 24:24393
interactions N + N, three-pion-exchange contribution to, (T), 24:8682
interactions N + N* through Peierls mechanism, Faddeev equations for, 23:10826
interactions N + N, transformation from O(3) to O(2,1) bases in SL(2,C) for forward, 22:15831
interactions N + N, twelve-dimensional group predictions for invariant amplitudes from, 21:31630
interactions N + N, two- and three-body bound-state results for Tamagaki potential for, (T), 23:37325
interactions N + N, two-meson (π) exchange potential with nucleon-pair effects for, (T), 21:25575
interactions N + N, two-meson (π) exchange potential with nucleon-pair effects for, 21:27387
interactions N + N, two-pion exchange contribution to, 25:36526
interactions N + N, two-pion exchange contribution for forces in, 24:49938
interactions N + N, two-pion-exchange contributions to phase shifts for, 23:15149
interactions N + N, two-pion-exchange contribution to, 25:9807
interactions N + N, uncertainties in test of long-range charge independence for, 24:10749
interactions N + N, unified description of quark-model exchange degeneracy predictions for, 24:10769
interactions N + N, unitary Pade approximants for, 24: 37808
interactions N + N, unitary Pade approximants for bound state and scattering, 23:18926
interactions N + N, universal theory of primary interactions with exchange of scalar isoscalar meson (epsilon) for phase shift calculation for, 24:10778 (SU-1206-216)
interactions N + N, universal theory of primary interactions for, 23:18932
interactions N + N, use of Pade approximant for phase shift analysis of, (T), 23:1650
interactions N + N, use of polarized beams and targets for, 21:13713 (SLAC-PUB-256)
interactions N + N, use of πN and $\pi\pi$ interaction parameters for amplitudes of, 22:1456
interactions N + N, velocity dependent one-boson-exchange potential in Born approximation for phase shift for, 21:46553
interactions N + N, velocity-dependent, 25:17998
interactions N + N, velocity-dependent potential for, (T), 22:20487
interactions N + N, velocity-dependent potentials in one-boson exchange formalism, (T), 22:20752
interactions N + N, velocity-dependent potentials for calculating scattering phase shifts in, (T), 23:25967
interactions N + N, Veneziano model for, 24:45550
interactions N + N, Veneziano model with spin for amplitude of three-body hadron production in, (T), 25: 30889
interactions N + N, violation of reciprocity in deuteron stripping reactions from time reversal violating potential in, (T), 24:6740
interactions N + N, with infinite repulsive core, 23: 51956
interactions N + N, zero-parameter model of, 22:46469
interactions N + N*, bootstrap models for, 22:32170
interactions N + N*, Faddeev equations for investigating Peierls mechanism in, 23:8817
interactions N + p at 14.5 and 23.1 MeV, use of polarized proton target for, 22:5501
interactions N + p at low energies, use of polarized proton target for studying, 21:21137
interactions N + p, Gribov—Morrison parity rule and helicity conservation in diffractive π production in, 25:22833
interactions N + p, spin correlation tensor for polarized, 21:17139

interactions N + t at 0.03 to 1 GeV, bibliography on, 23:27821 (LA-4143)
interactions N + W → nW + N, analysis of divergences in unrenormalizable theory with parity nonconserving, 23:21084
interactions N* + N, isovector form factor for electromagnetic coupling constant for, 22:15721
interactions N+ N at high energies, Regge-pole theory of elastic and charge-exchange, 21:25317
interactions τ + N → baryon resonance + μ, baryon resonance → baryon + π, polarization correlations in, 22:26613
interactions τ + N → baryons + μ, polarization correlations in, 22:26613
interactions τ + N → Δ(1236) + l, differential cross section for polarized lepton production in, (E/T), 22:3358
interactions τ + N → Δ(1236) + l, spin-3/2 polarization in, (E/T), 22:3361
interactions τ + n → e⁻ + p at 2 GeV, electromagnetic form factors for energy functions of total cross sections and angular functions of differential cross sections, (T), 24:18125
interactions τ + N → l + meson + baryon, urbaryon model of hadrons for, 25:59394
interactions τ + N → l + N + π at low energies, s-wave and p-wave multipoles for, 24:15537
interactions τ + N → l + N* + π, amplitude of π threshold production in, 21:31574
interactions τ + N → l + N + π, nucleon axial-vector form factor from, (E), 23:30734
interactions τ + N → l + N + π, weak axial-vector vertex in, 21:5377
interactions τ + N → l + N at high energies, intermediate exotic meson model for, 24:49414
interactions τ + N → l + N, absence of form factor in e² corrections to amplitude for, (T), 25:53113
interactions τ + N → l + N, nucleon axial-vector form factor from, (E), 23:30734
interactions τ + N → l + W + N(N*) at 1 to 20 GeV, cross sections for, (T), 24:52042
interactions τ + N → l⁻ + N + π, cross sections for, (T), 22:44393
interactions τ + N → l⁻ + N, cross sections for, (T), 22:44393
interactions τ + N → leptons + hadrons, high-energy behavior of differential cross section of, 22:50348
interactions τ + N → μ + Δ(1236), Feynman diagram calculation for, 22:44398
interactions τ + N → μ + N + π, isobaric-model analysis of, 21:21190
interactions τ + N → μ + N in atmosphere μ flux from, (T), 24:35636 (JINR-E2-5092)
interactions τ + N → μ + W + N, cross sections for scalar and vector W-meson production in, 25:30818
interactions τ + N → μ⁻ + hadrons in underground cosmic-ray experiments, μ⁻ inelasticity in, 24:42933
interactions τ + N → μ⁻ + meson + baryon, urbaryon model of hadrons for, 25:59394
interactions τ + N → μ⁻ + N in propane bubble chamber, background for, (E), 24:15459 (CERN-69-28, pp 145-58)
interactions τ + N → μ⁻ + p + N' in heavy-liquid bubble chamber, axial form factor for, 21:40140
interactions τ + N → μ⁻ + W⁺ + Λ, CP violation in strong cubic intermediate vector boson model for, 23:36971
interactions τ + N → μ⁻ + W⁺ + N, μ⁻ angular and momentum distributions for, (T), 25:59414
interactions τ + N → N + l + γ, relation between nucleon form factor and amplitude for, 21:17079
interactions τ + N → N + μ, coupling of nucleonic and muonic currents in, (T), 22:26622
interactions τ + N → N + W⁺ + μ⁻, differential cross section for, (T), 24:40346
interactions τ + N → N + W⁺⁻ + μ⁻⁺ below 500 GeV, total cross section for, 23:30740
interactions τ + N → N* + l, differential cross sections for lepton polarization in, 21:35294
interactions τ + N → N* + l, polarization effects and cross sections for, (T), 23:25582
interactions τ + N → N* + μ, N* production in, (T), 21:15312
interactions τ + N → τ + N, method for separating nuclear effects in neutrino reactions (τ,pμ⁻) with nuclei for study of, (T), 24:52045
interactions τ + N → τ + N, strong quadratic and strong cubic intermediate vector boson models for, 23:25594 (CERN-69-7, pp 371-89)
interactions τ + N → π + N, time reversal violation effects in, (T), 23:3781
interactions τ + N → W⁺ + μ⁻ + N, strong quadratic intermediate vector boson model for, 23:25594 (CERN-69-7, pp 371-89)
interactions τ + N above 1 GeV in freon and propane bubble chambers, structure factors in meson (μ⁻) and hadron state production cross sections in, (E), 24:3506
interactions τ + N above 5 GeV, proposed 25-foot bubble chamber study of vector meson production, ΔS = ΔQ and ΔS = 2 tests, and heavy μ searches in, 24:50596 (TID-25473(Vol.2), pp 109-11)
interactions τ + N at 1 TeV, W-pair strong-interaction model and cross section limits on, 23:3686
interactions τ + N at 5 to 100 GeV, performance of proposed 25-foot bubble chamber for study of total and inelastic cross sections and Adler test for, 24:50595 (TID-25473(Vol.2), pp 97-107)
interactions τ + N at high energies in freon and propane, duality—parton model for deep inelastic, (T), 25:30809
interactions τ + N at high energies, analogous excited-baryon-model hypothesis for, 24:30524
interactions τ + N at high energies, circular polarization of bremsstrahlung from, (T), 21:7453
interactions τ + N at high energies, conserved vector current hypothesis and current commutators for relation with e + N interactions at high energies for, (T), 25:53106
interactions τ + N at high energies, cross sections for π, rho, and A_1 production in, 24:18145
interactions τ + N at high energies, current algebra and parton models for, 25:5345
interactions τ + N at high energies, damped residue function and asymptotic limit of scaling function in duality model for inelastic, (T), 25:28006
interactions τ + N at high energies, electron and polarized baryon production from, (T), 21:9762
interactions τ + N at high energies, intermediate boson effects in, (T), 21:4030
interactions τ + N at high energies, kinematic analysis of inelastic, 24:40341
interactions τ + N at high energies, lectures on current commutators, dynamical models, and quantum electrodynamics for μ⁻ and hadron production in, (T), 25:22761 (INP-712(Vol.1), pp 1-52)
interactions τ + N at high energies, μ spectra from, (T), 25:59417
interactions τ + N at high energies, review of, (T), 25:3334 (NYO-4204-3)
interactions τ + N at high energies, total cross sections for W production in, (T), 25:17453 (COO-1573-73)
interactions τ + N for test of current commutation relations, minimum neutrino energy for, 21:29499
interactions τ + N in aluminum-27 at 6 GeV, one-photon exchange for W production from, (T), 21:21192
interactions τ + N in current algebra, cross sections for π production in, 23:5645 (NP-17659)
interactions τ + N in duality model, q^1 dependence of Regge residue functions for inelastic, 25:3336
interactions τ + N in heavy-liquid bubble chamber, test of PCAC hypothesis for, (E/T), 24:15463
interactions τ + N in propane bubble chamber Δ(1236) and multimeson production in, (E), 23:25505 (CERN-69-7, pp 73)
interactions τ + N in scalar theory, test of Adler theorem from inelastic, 25:7613
interactions τ + N underground, sum rules for W effects on μ spectra from, 22:39346
interactions τ + N, absence of form factor in e³ corrections to amplitudes of, 25:30819
interactions τ + N, broken-scale invariance for current-commutator scheme for asymptotic sum rules for particle production cross sections in, 24:10709
interactions τ + N, charged and neutral lepton currents with strange neutrino in, 24:20121
interactions τ + N, cross sections for μ, W, N, and hadron production in, (T), 24:52044
interactions τ + N, deep inelastic, (T), 25:22775
interactions τ + N, dimension of scale-invariance-breaking Hamiltonian from longitudinal structure function in inelastic, (T), 25:47803
interactions τ + N, equal-time commutators from broken conformal invariance for asymptotic sum rules for particle production in, (T), 24:49567 (IFPTH-7/70)
interactions τ + N, final-state interactions and T-violating effects in single π production in, 24:24412
interactions τ + N, form factors and differential and total cross sections for Δ and Σ resonance production in, (T), 25:12174
interactions τ + N, helicity formalism for general formula and time reversal invariance and PCAC for hadronic current in resonance production in lepton and arbitrary-spin baryon or baryon resonance production in, 24:3609
interactions τ + N, light-cone expansions for sum rules for deep inelastic, (T), 25:47791
interactions τ + N, lower bounds for cross sections for inelastic, (T), 24:49411
interactions τ + N, multiple hadron production cross sections for, (T), 23:3698
interactions τ + N, octet dominance on light cone for particle production in deep inelastic, (T), 25:50104
interactions τ + N, parton model with Poisson distribution for inelastic, 25:40945
interactions τ + N, Pomeron and Adler sum rules from diffractive model of scaling for ratio of cross sections of anti τ + N interactions with cross sections of, (T), 24:47415 (LNF-70/27)
interactions τ + N, positivity restrictions among structure functions for inelastic, 25:45706
interactions τ + N, Regge pole model for hadron production from, 25:14635 (NYO-4204-9)
interactions τ + N, saturation of sum rules for, 22:17913
interactions τ + N, second-class G-parity properties in elastic scattering, (T), 25:56854
interactions τ + N, space-time picture for longitudinal distances in, 23:49093
interactions τ + N, structure functions for vector and axial vector currents in deep inelastic, (T), 25:36455 (ORO-3992-24)
interactions τ + N, sum rule for vector—axial-vector interference form factor in inelastic, (T), 24:40342
interactions τ + N, threshold theory for single π production in, (T), 25:47814
interactions τ/ sub μ/ + N → N + π + μ⁻ in heavy-liquid bubble chamber, cross sections for, 21:33591 (CERN-67-12)
interactions τ/sub μ/ + N → N + μ⁺ + μ⁻ + τ + ..., form factor effects on total cross section for, 23:25581 (JINR-E2-4370)
interactions of correlated pairs with π⁻ in helium-4, (T), 22:1442
interactions of cosmic, at 2 to 3 TeV in emulsions, π⁰ production with large energy transfer in, (E), 22:22307
interactions of cosmic, fireball model for, 22:3452 (INP-555/PL/PH, pp 75-8)
interactions of cosmic, in upper atmosphere layers, (E/T), 22:2822
interactions of greater than or equal to 10^{13} eV cosmic, in nuclear emulsions, (E), 22:13269
interactions of primary cosmic, in atmosphere, (T), 22:2824
interactions of two, dispersion methods in charged scalar static model for, 25:9817
interactions of very-high-energy, generation of meson clouds in, (T), 22:2837
interactions of, bootstrap theory and axial vector current for matrix element for, 22:24635
interactions of, Bubnov—Galerkin method for solving three-body, (T), 21:4059 (JINR-P-2890)
interactions of, channel approach and formal theory for, 21:2524
interactions of, comparison of models for relation of amplitude for deuteron production in deuteron interactions with amplitude for nucleon production in, (T), 25:59514
interactions of, current algebra method for, 23:39635
interactions of, dispersion sum rules for electromagnetic and strong, 21:4012 (JINR-P2-2930)
interactions of, dual-symmetric theory for, 24:52087
interactions of, energy dependence of probability of three-body inelastic, (T), 23:8814 (JINR-P2-4176)
interactions of, energy level dependence in strong coupling approximation with Yukawa potential for two- and three-body, (T), 23:15145 (ITF-68-80)
interactions of, four-dimensional Bialynicki—Birula model for amplitude of, 21:15398 (JINR-P2-3114)
interactions of, four-dimensional unitary relativistic Bialynicki—Birula model of amplitude of, 22:13855
interactions of, Hilbert—Schmidt expansion for solution of Faddeev equations with square-well potential for binding energy and scattering length for three-body, 24:26445 (ITF-69-91)
interactions of, hyperspherical functions for three-body, 25:53042
interactions of, irreducible tensor operator formalism for three-body potentials for, (T), 23:19377
interactions of, isospin and spin in model for, 21:33685
interactions of, matrix elements in translation-invariant oscillation states for three-body, 23:51953
interactions of, parity nonconserving forces in, 23:5640
interactions of, rectangular central potential for three-body, (T), 23:30764 (ITF-69-19)
interactions of, relation between current-density and charge-current algebras for, 23:46629
interactions of, review of three-nucleon problem in, 23:25648
interactions of, separable expansion of two-body t matrix for three-body, 23:30763 (ITF-69-8)
interactions of, separable expansion of two-body t-matrix for three-body, (T), 24:52117
interactions of, simplifications for formulation of radiative three-body, (T), 23:39666
interactions of, single attractive and repulsive separable potential for three-body, (T), 22:53242
interactions of, SU(3) for nonleptonic four-fermion ΔS = 1, 21:11801
interactions of, theory for universal primary, 22:7458
interactions of, variational calculations on three-body problem with realistic local potentials for, 23:32775
interactions of, variational solutions of Faddeev equations for local potentials for, 24:52212
interactions of, velocity-dependent potentials for, (T), 22:30062
interactions ω + N in γ reactions with nuclei at 5.7 GeV, Cherenkov counter study of total cross sections for, (E), 25:1362 (DESY-70/33)
interactions ω + N, amplitude for forward, (E/T), 25:40860
interactions ω + N, coupling constants and physical operators for, 21:21249
interactions ω + N, cross sections from ω photoproduction on nuclei at 5.7 GeV, (E), 25:3247
interactions ω + N, use of helicity amplitudes in superconvergent sum rules for, 22:3423
interactions p + N → 2N + 2π at 24 GeV/c in emulsions, N(1240) production in, (E), 24:40252
interactions p + N → p + N above 10^{13} ev in emulsions, cross section for, (E), 23:23346
interactions p + N at 0.5 to 1.2 GeV, polarization parameter from, (E), 21:37684
interactions p + N at 1.0 GeV, use of wire spark chamber as magnetic spectrometer for studying, 21:39260
interactions p + N at 10 to 1000 GeV in carbon nuclei, calorimeter study of effective cross sections for inelastic, 21:29445
interactions p + N at 10 to 35 GeV/c in beryllium, empirical formulas for K⁻, K⁺, and anti p production from, 21:31605 (BNL-11479)
interactions p + N at 14 GeV in nuclear emulsions, distribution of secondary protons from, (E), 21:5355
interactions p + N at 17 and 24 GeV/c in emulsions, velocity-space images for analysis of, (E), 22:22313
interactions p + N at 2.88 and 3.95 GeV in copper, counter study of distribution of Fermi momenta of nucleons in copper from anti p production from, 21:33606
interactions p + N at 2.9 GeV in beryllium and platinum, counter study of particle production from, 21:33606
interactions p + N at 20 GeV in emulsions, analysis of asymmetric separation of charged secondary particles from, (E), 22:32052
interactions p + N at 20 GeV, angular distribution of secondary charged particles in inelastic, (E), 23:32620
interactions p + N at 20.8 GeV, in emulsions, correlations between longitudinal and transverse components of momenta of secondary particles in, (E), 25:33546
interactions p + N at 210 MeV, upper limits for two parity-violating parameters from asymmetries in, (E), 25:12094

interactions p + N at 22.6 and 24 GeV/c in nuclear emulsions, multiplicity and angular distributions in meson production, (E), 23:5537
interactions p + N at 22.6 and 24 GeV/c, angular distribution of multiple particle production in, (E), 23:39606
interactions p + N at 22.8 GeV in emulsions, (E), 21:3981
interactions p + N at 22.8 GeV/c, contribution of baryon excited states to multiple particle production in, (T), 21:42391
interactions p + N at 23 GeV/c in emulsion nuclei, hyperfragment production from, (E), 21:33602
interactions p + N at 23 GeV/c in nuclear emulsions, primary energy estimation for, (E/T), 23:10951
interactions p + N at 24 GeV in emulsions, p + N elastic cross section in TeV region from, (E/T), 21:44266
interactions p + N at 27 GeV in emulsions, energy of charged baryons from, (E), 21:3983
interactions p + N at 28 GeV, upper limit for W production from, (E), 23:49045
interactions p + N at 28 GeV, upper limit on production cross sections for W boson in, 25:47733
interactions p + N at 28 GeV/c in nuclear emulsions, effective target mass in inelastic, (E), 23:32614
interactions p + N at 30 GeV, intermediate boson production in, (E), 21:867 (NEVIS-153)
interactions p + N at 600 MeV in nuclei, isobar model for π production and nuclear shape from, (T), 22:24665
interactions p + N at 70 GeV, meson-focusing device for neutrino beam production from, 22:11629 (NP-17198)
interactions p + N at 70 GeV, search for q = $^2/_3$ diquarks in, (E), 25:40873
interactions p + N at 83 GeV, elastic cross sections for primary cosmic, (E), 25:38653
interactions p + N at 9 GeV in emulsions, fast deuteron emission in very large stars from, 21:29439 (INR-775/VI/PH)
interactions p + N at high energies, Regge pole model corrected by absorption for, 23:51930
interactions p + N in beryllium and iron at 4.5 to 6.0 GeV/c, antideuteron production from, (E), 21:27300 (NEVIS-159)
interactions p + N in beryllium and iron at 8.5 to 10.0 GeV/c, lower limits for quark production in, (E), 21:27300 (NEVIS-159)
interactions p + N in beryllium at 10 and 34 GeV/c, empirical formulas for particle production in, 21:25313 (BNL-11299)
interactions p + N in copper at 3.5 to 6.1 GeV, antiproton production from, (E), 21:27300 (NEVIS-159)
interactions p + N in emulsion nuclei at 24 and 1000 GeV, TeV-region cross section for elastic, (E), 21:44260 (INR-802/VI/PH)
interactions p + N in emulsion nuclei at 24 GeV/c, gray-track selection of, 23:30703
interactions p + N in emulsions at 24 and 27 GeV/c, analysis of small size stars from, (E), 21:3980
interactions p + N in emulsions at 24 and 27 GeV/c, π and p production from, 21:29442
interactions p + N in emulsions at 6.2 GeV/c, isobar model analysis of, 21:3979
interactions p + N in helium-4 at high energies, real part of amplitude for, (T), 21:27515 (INP-534/PL)
interactions p + N in nuclear emulsions at 19.8 GeV, identification of two- and three-pronged events using delta electrons, 21:2368
interactions p + N in TeV region, elastic cross section determination from p + N interactions at 24 GeV in emulsions, 21:44266
interactions p + N in tungsten, upper limit for W production in, (E), 21:23314 (BNL-994, pp 70-102)
interactions p + N, helicity of virtual photon emitted in μ pair and hadron production in, (E/T), 24:26448
interactions phi + N in quark model, phase of forward amplitude for elastic, 25:7655 (DESY-70/53)
interactions phi + N, γ + p and γ + d interactions and photon reactions with carbon at 6.3 to 9 GeV for total cross sections and amplitude of, (E), 25:47711
interactions phi + N, phase of forward amplitude for, 25:38744
interactions phi + N, spectrometer study of phase and forward cross sections for phi production in photon reactions with carbon at 6.0 to 7.4 GeV for real-to-imaginary part of amplitude of, (E), 25:47706 (DESY-71/26)
interactions phi + N, total cross section for, (E/T), 23:23627(T) (SLAC-Trans-92)
interactions π + N → (n - 1)π + N, slope of Pomeranchuk trajectory from multi-Veneziano model for, 23:21121
interactions π + N → (rho,ω) + N, kinematic singularities of Regge pole residues in, 21:31591 (NP-16821)
interactions π + N → 2π + N at low energies, final-state mass spectra relation with two-body forces for, (T), 25:43643
interactions π + N → 2π + N below 1 GeV, models for single π production in, 21:17113 (LA-DC-8617)
interactions π + N → 2π + N below 1 GeV, static model approximation for single meson (π) production in, 24:8663
interactions π + N → 2π + N, crossing relations in Regge pole theory for, 21:37815
interactions π + N → 2π + N, interference effects in peripheral rho production in, (T), 23:15141
interactions π + N → 2π + N, partial-wave and exchange amplitudes and amplitudes for peripheral production of N* and rho for, (T), 24:6721
interactions π + N → 2π + N, Regge residues in Veneziano model for density matrices for spin-1 and -2 resonances from meson (π) exchange in, 23:51933
interactions π + N → 2π + N, spin effects on mass spectra for N(1470) in, (T), 23:46739
interactions π + N → 2π + N, three-channel N/D equations via quasi-two-body channels for amplitude of, 24:24372
interactions π + N → A_1 + N, graphical form of duality for Pomeranchukon exchange in, 23:21092
interactions π + N → A_1(eta)(rho) + N, helicity-channel effects on cross sections for, (T), 24:10776
interactions π + N → A_2 + N, selection rules for diffraction dissociation in, 25:47889
interactions π + N → Δ + π, Reggeization of kinematically free amplitudes for, 23:27811
interactions π + N → Δ + rho, Reggeization of kinematically free amplitudes for, 23:27811
interactions π + N → Δ(1236) + π at high energies, quark model for backward, (T), 25:1539
interactions π + N → Δ(1236) + π, formalism for partial-wave analysis of, 23:42686
interactions π + N → Δ(1236), method for deriving angular correlations for, 22:41774 (NP-17531)
interactions π + N → e + e* + N, N* → N + γ coupling constants from amplitudes for, 21:35280
interactions π + N → e* + e- + N, direct photon—vector meson coupling scheme for wide-angle pair production in, (T), 21:17129
interactions π + N → eta + Δ(1236) in O(3,1) symmetry, 22:24710
interactions π + N → eta + N at low energies, angular distributions and cross sections for, (T), 23:25640
interactions π + N → eta + N at low energies, cross sections and angular distributions for, 23:1640 (COO-264-445)
interactions π + N → eta + N, Breit—Wigner models and effective-range approximations for, (T), 25:14702 (PAM-70-8)
interactions π + N → eta + N, dispersion theoretic model for S_{11}(1525) resonance and cross sections for, 25:59486
interactions π + N → eta + N, factorized Regge amplitudes for superconvergence sum rules for, 22:34990
interactions π + N → eta + N, model for S-wave phase shift and eta production in, (T), 24:20160
interactions π + N → eta + N, N* production in, 23:10766
interactions π + N → eta + N, NNeta coupling constant from dispersion relation for, 22:50395
interactions π + N → eta + N, phase shift analysis for, 22:1404 (TH-177)
interactions π + N → eta + N, Veneziano model for Regge trajectories in amplitude of, 24:1606
interactions π + N → eta + N*, modified Lorentz pole analysis of amplitude for, 23:27813
interactions π + N → eta(sigma) + N, simple phenomenological regularity of near-forward zeros in amplitudes of, 24:6728
interactions π + N → f* + Δ, π conspiracy in, 22:5594
interactions π + N → f* + Δ, π trajectory exchange in, 22:11681
interactions π + N → f* + Δ(1236), distorted-wave one-pion-exchange prediction for, 22:46467
interactions π + N → f* + N, absorptive OPE model with form factors for, (E/T), 21:33706
interactions π + N → f* + N, approximation to OPE model for spin-density matrix elements for, 24:18206
interactions π + N → K + hyperons, kinematic singularities and threshold relations for amplitudes of, 22:35145
interactions π + N → K + Λ at low energies, angular distributions and cross sections for, (T), 23:25640
interactions π + N → K + Λ at low energies, cross sections and angular distributions for, 23:1640 (COO-264-445)
interactions π + N → K + Λ, Veneziano model for resonance spectra in s, t, and u channels of, 24:13096
interactions π + N → K + Λ(Σ), method for spin—parity determination of resonances in, 23:21103
interactions π + N → K + Σ at low energies, angular distributions and cross sections for, (T), 23:25640
interactions π + N → K + Σ at low energies, cross sections and angular distributions for, 23:1640 (COO-264-445)
interactions π + N → K + Σ, inelastic channel effects on Δ_{33} resonance position and width from, 21:31599
interactions π + N → K + Σ, kinematical structure of helicity amplitudes for, (T), 25:22829
interactions π + N → K + Σ, removal of kinematic singularities from amplitudes of, 22:44427
interactions π + N → K + Σ, Veneziano model for resonance spectra in s, t, and u channels of, 24:13096
interactions π + N → K + Σ(1660), Σ(1660) production in π^+ + n → K* + ($\Sigma\pi$)* interactions at 2.5 GeV/c in deuterium bubble chamber for excitation function for, (E), 22:29639
interactions π + N → K + Σ(A) at high energies, tests of Regge-pole and strong-absorption models for, (T), 25:12206
interactions π + N → K + Y, Regge poles and SU(3) for, 22:1439
interactions π + N → mπ + N, one-pion-exchange model for effective mass spectrum of π system in, (T), 25:59496
interactions π + N → N + A_1(rho), nucleon electromagnetic and axial form factors from pole dominance and Veneziano model for, (T), 25:12144
interactions π + N → N + e- + e*, differential and total cross sections for, (T), 21:35312
interactions π + N → N + e- + e*, reconstruction scheme for amplitude of, 22:13702
interactions π + N → N + e- + e*, reduction scheme of amplitudes for, (T), 21:7481 (JINR-P2-3062)
interactions π + N → N + eta, dispersion-theoretic techniques for, 21:23339
interactions π + N → N + kπ, nucleon momentum spectra from duality diagrams for, 25:53193
interactions π + N → N + neutral vector meson, quark model for, 23:18877 (ITF-68-36)
interactions π + N → N + ω, projections on exchanged systems with well-defined quantum numbers for, 22:13758
interactions π + N → N + π + π at 1.3 to 1.7 GeV, summary of data on, 24:21987
interactions π + N → N + π + π, mass dependence of slopes in differential cross sections in models for, 24:47390
interactions π + N → N + π + π, review of experimental methods for $\pi\pi$ scattering and unique set of phase shifts for, 23:36905 (COO-1428-126)
interactions π + N → N + π, fixed cuts in Regge pole theory for backward, 24:40385 (COO-264-550)
interactions π + N → N' + π, generalized isospin matrices for projection operators for, 23:39742
interactions π + N → N + π, AKN coupling constant from backward differential cross sections for, 24:40388
interactions π + N → N + π, Regge cuts in Veneziano model for backward, 24:15578 (COO-264-529)
interactions π + N → N + π, strong-cut Reggeized absorption model for backward, 24:35661
interactions π + N → N + π, tight coupling in semiclassical theory for, 22:26661
interactions π + N → N + rho → N + π + π, Treiman—Yang analysis for exchange of leading Toller pole and validity of O(3,1) expansions for, 23:44685
interactions π + N → N + rho + π at 5.1 GeV/c, production mechanism and mass spectra for, (E), 25:38678
interactions π + N → N + rho, strong-cut Reggeized absorption model for backward, 24:35661
interactions π + N → N + rho, tight coupling in semiclassical theory for, 22:26661
interactions π + N → N + vector meson, daughter structure of conspiring Regge-pole families from analyticity constraints for, 23:7185
interactions π + N → N* below 3 GeV, isobar model for angular distributions for phenomenological Δ(1236) production in, (T), 25:17517 (ORNL-TM-3132)
interactions π + N + N, Faddeev equations for investigating Peierls mechanism in, 23:8817
interactions π + N → N, unitary restrictions on dynamical groups for amplitude of, 22:13829
interactions π + N → N*, quark model for cross section of, 22:5574
interactions π + N → N*(1100) at high energies, equivalent-potential method for amplitude of, 22:11668
interactions π + N → N(1525), method for deriving angular correlations for, 22:41774 (NP-17531)
interactions π + N → ω + Δ Regge pole analysis of, 22:9598
interactions π + N → ω + Δ, Regge pole and cut model for rho exchange in, 24:3671
interactions π + N → ω + Δ(1236), Lorentz-pole analysis of, 22:39408
interactions π + N → ω + N at 4.19 GeV, cross sections and density matrix for, (E/T), 25:1526 (ITF-70-39)
interactions π + N → ω + N at high energies, instability of exchange particle in, (T), 24:52015
interactions π + N → ω + N at high energies, Regge pole model of, 23:39737
interactions π + N → ω + N at high energies, Regge pole model for differential and total cross sections and t dependence of density matrix elements for forward, (T), 25:20008
interactions π + N → ω + N, contribution of B-meson exchange to, (T), 24:35662
interactions π + N → ω + N, Regge pole and cut model for rho exchange in, 24:3671
interactions π + N → ω + N*, modified Lorentz pole analysis of amplitude for, 23:27813
interactions π + N → ω + N*, O(3,1) symmetry and Lorentz states of exchange trajectories for, 22:34985
interactions π + N → ω + N*, projections on exchanged systems with well-defined quantum numbers for, 22:13758
interactions π + N → ω + N(Δ) at high energies, model independent analysis for separation between exchange of natural and unnatural parity in, (T), 25:53184
interactions π + N → ω + N(Δ), rho°—ω mixing effects on spin density matrix of ω in, (T), 25:12208
interactions π + N → ω + N(Δ), tests of Regge pole model with absorption in, 23:32753
interactions π + N → ω (phi) + N* at high energies, quark model for test of additivity from joint decay distributions from, 22:13735
interactions π + N → ω(rho) + N at high energies, production and decay of resonances in peripheral, (T), 23:34573 (COO-1051-32)
interactions π + N → π + Δ (1920) at 7.5 GeV, peripheral properties of inelastic, (T), 21:2468
interactions π + N → π + Δ (2400) at 7.5 GeV, peripheral properties of inelastic, (T), 21:2468
interactions π + N → π + Δ at 8 GeV/c, production mechanisms of, (T), 22:37155
interactions π + N → π + Δ, dispersion sum rules for, 23:46728
interactions π + N → π + Δ, kinematic singularities and threshold relations for amplitudes of, 22:35145
interactions π + N → π + Δ, N$\Delta\gamma$ coupling constants and sum rules from unsubtracted dispersion relations for, 25:36508
interactions π + N → π + Δ, quark model for, 21:31602
interactions π + N → π + Δ, spin—isospin formalism in quark model for amplitudes of, (T), 24:40410 (RLO-1388-570)
interactions π + N → π + Δ(1236), photon—vector meson analogy model for γ + N → vector meson + Δ(1236) interactions relation with, 22:46366
interactions π + N → π + Δ(π + N) at 339 to 480 MeV, partial-wave analysis of, (T), 25:14728

interactions π + N → π + Λ + K at 7 GeV/c, production of N*(1700) in, 25:59307
interactions π + N → π + N + γ, model-independent calculation of differential cross sections for, (T), 24: 8653
interactions π + N → π + N + γ, quadrupole moment from N* width in, (T), 23:32648(T) (NP-tr-1784)
interactions π + N → π + N + γ, rho radiative decay width from Veneziano-type amplitude for π + π → π + γ interactions in, (T), 25:22803
interactions π + N → π + N + γ, Veneziano amplitude for γ + π → π + π interactions for, 24: 40314
interactions π + N → π + N and π + N → π + π + N, N and N'(1470) resonances in coupled two-channel bootstrap calculation of, 23:42679
interactions π + N → π + N at 1.5 to 3.5 GeV, data on, (E), 24:21987
interactions π + N → π + N at 10 to 65 GeV, Regge pole-Regge cut model for cross sections of, (T), 24: 49487 (COO-264-555)
interactions π + N → π + N at asymptotically large energies and momentum transfer, relations between amplitudes and polarizations of, 23:7143
interactions π + N → π + N at high energies, quark model for backward, (T), 25:1539
interactions π + N → π + N at high energies, quasipotential approach for spin effects in, (T), 25: 36504 (JINR-E2-5770)
interactions π + N → π + N at high energies, sign of scattering angle cosine at branch points of partial-wave amplitude in s-plane for, 23:49154
interactions π + N → π + N at high energies, spin-dependent droplet model for, (T), 25:53199
interactions π + N → π + N at low energies, angular distributions and cross sections for, (T), 23:25640
interactions π + N → π + N at low energies, cross sections and angular distributions for, (T), 23:1640 (COO-264-445)
interactions π + N → π + N at low energies, Pade approximants for phase shifts of, 22:32146
interactions π + N → π + N at low energies, peripheral model for $\pi\pi$ phase shifts from, (T), 24: 40370
interactions π + N → π + N below 1.6 GeV, resonances in partial-wave analysis for total cross sections, angular distributions, and recoil nucleon polarization in, 24:3650 (CEA-R-3578)
interactions π + N → π + N below 2 GeV, parametrization of amplitude of, 23:30755
interactions π + N → π + N below 700 MeV, review of dispersion relations for, 23:39741
interactions π + N → π + N in lead 208 at 19 and 40 GeV/c, ratio of real to imaginary part of amplitude of, (E/T), 24:18222 (INP-686)
interactions π + N → π + N two-variable expansion and crossing symmetry for amplitude of, 24:13108
interactions π + N → π + N* (2200) at 7.5 GeV, peripheral properties of inelastic, (T), 21:2468
interactions π + N → π + N, analyticity properties of helicity amplitudes of, 22:9580 (CEA-R-3303)
interactions π + N → π + N, basic assumptions for dual amplitudes of, (T), 25:50126 (NP-18967)
interactions π + N → π + N* below 1 GeV, partial-wave analyses of angular distribution for, 22:1447
interactions π + N → π + N, boundary curves of double spectral functions in Mandelstam representation for amplitudes of, 24:21980
interactions π + N → π + N, chiral symmetry with rho—γ analogy for, 24:18191
interactions π + N → π + N, constraints on partial waves of helicity amplitudes from analyticity, unitarity, and crossing symmetry in, (T), 25:1531 (SU-1206-231)
interactions π + N → π + N, crossed-channel unitarity for lower bounds on amplitudes of, 22:26647
interactions π + N → π + N, crossing matrices for fundamental triplet of SU(3) summetry for, 22:20291
interactions π + N → π + N, dispersion sum rules for amplitude linear combinations with π + Σ → π + Σ amplitudes, (T), 24:52094
interactions π + N → π + N, dynamical theory for, 21:25287
interactions π + N → π + N, finite-energy sum rules for u-channel baryon Regge exchanges in, 24:8652
interactions π + N → π + N, graphical method for study of isospin dependence and charge independence of cross sections for, 21:44379
interactions π + N → π + N, kinematical singularities, crossing matrix, and kinematical constraints, for helicity amplitudes for, 22:29770
interactions π + N → π + N, MacDowell symmetry for kinematic singularities of, 22:15861
interactions π + N → π + N, methods for analysis of, 25:41019
interactions π + N → π + N, N* production in, 23: 10766
interactions π + N → π + N, N_3^* (1238) production from multichannel, (T), 21:23342
interactions π + N → π + N, nucleon electromagnetic and axial form factors from pole dominance and Veneziano model for, (T), 25:12144
interactions π + N → π + N, numerical solution of unitarity—analyticity equations for, 22:29713
interactions π + N → π + N, phenomenology of Poincare group for time-like and light-like cross-channel expansions for, 23:49152 (IS-T-324)
interactions π + N → π + N, Regge pole and absorptive cut models for backward, (T), 25:25423
interactions π + N → π + N, Regge theory and SU(3) representation mixing for, 23:44657 (IS-T-291)
interactions π + N → π + N, relativistic extension of determinantal formalism for overlapping thresholds for, 24:13037
interactions π + N → π + N, s-channel helicity conservation in diffraction, 24:24337
interactions π + N → π + N, simple phenomenological regularity of near-forward zeros in amplitudes of, 24:6728
interactions π + N → π + N, spin structure of multiple, (T), 24:47446
interactions π + N → π + N, spin-independent Pomeron in, 24:40398
interactions π + N → π + N, superconvergent sum rules for backward, 23:15136
interactions π + N → π + N, universality of two-pion isovector coupling for, 24:33016 (DESY-70/18)
interactions π + N → π + N, up—down ambiguity for I = 0 s-wave π + π interactions from phase shifts for, (T), 25:50128 (RPP/C-22)
interactions π + N → π + N, vacuum pole contributions to inelastic scattering cross sections for two-Reggeon cut in, (T), 25:33586
interactions π + N → π + N, vector current and universality for, (T), 25:53167
interactions π + N → π + N*, helicity amplitude superconvergence relations for, 23:51936
interactions π + N → π + N*, multiple-scattering formalism for, 22:48320
interactions π + N → π + N*, N_3^* (1238) production from multichannel, (T), 21:23342
interactions π + N → π + N*, PCAC theory for threshold amplitude of, 23:5634
interactions π + N → π + N*, pion gauge condition for baryon parity doublet in, 25:14705
interactions π + N → π + N*, rho exchange in N* production in, (T), 21:17120
interactions π + N → π + N*, s-channel helicity conservation constraints on t-channel exchanges in, (T) , 25:28028 (SU-1206-242)
interactions π + N → π + N*, U(6,6) and superconvergent sum rules for, 21:21233
interactions π + N → π + N*, U(6,6) symmetry for superconvergent sum rules for, 22:3430
interactions π + N → π + N(1470), anomalous magnetic moment for, 25:53201
interactions π + N → π + N(1518), superconvergent relation for $\pi D_{13}D_{13}$ coupling constant for, 23:18910
interactions π + N → π + N(Δ) below 1.8 GeV, two-channel model for πN S_{31}, P_{31}, and P_{13} inelastic resonances with repulsive background, (T), 24:3685
interactions π + N → π + π + N at 1.25 and 1.59 GeV/c, predictions for π as Regge pole and elementary particle for dipion mass near rho region in, 22:17971
interactions π + N → π + π + N at 290 to 480 MeV, Olsson—Yodh model for partial wave analysis of, (T), 24:24384
interactions π + N → π + π + N at 350 to 600 MeV, determination of triangle graph contribution and estimate of $\pi\pi$-scattering amplitude at low energies from, (E), 23:3649
interactions π + N → π + π + N at high energies, predictions of dual-resonance model for $\pi\pi\pi$N anti N five-point function for, (T), 24:45537
interactions π + N → π + π + N at high energies, Regge-pole model for, 25:3399
interactions π + N → π + π + N at threshold to 600 MeV, constraints on phase-shift analysis of, 21:15349
interactions π + N → π + π + N below 1 GeV, partial-wave analysis of three-body angular momentum states in, 21:33708
interactions π + N → π + π + N in nuclear emulsions, computer program for processing track data for studying, 22:6646
interactions π + N → π + π + N, amplitudes for current algebra production of π + π interactions, 22: 29695
interactions π + N → π + π + N, angular momentum analysis and models for Δ(1236) production in, 24:26443
interactions π + N → π + π + N, azimuthal dependence of $\pi\pi$ scattering in, 22:9597
interactions π + N → π + π + N, chiral SU(3) x SU(3) phenomenological Lagrangian for analysis of, 24:18168
interactions π + N → π + π + N, chiral-dynamics calculation of cross sections for, 24:35654
interactions π + N → π + π + N, constraints on phase shift analysis from angular distributions from, (T) , 22:13766
interactions π + N → π + π + N, cross sections for π + π interactions from modified extrapolation procedure for, 23:18894
interactions π + N → π + π + N, current algebra for coupling-constant sum rules in, 22:44436
interactions π + N → π + π + N, dispersion theory for, 21:33714
interactions π + N → π + π + N, effective Lagrangians for, 24:49497
interactions π + N → π + π + N, evidence for sigma resonance from OPE model for, 23:25623
interactions π + N → π + π + N, extraction of $\pi\pi$ phase shifts at low energy from, 23:49143
interactions π + N → π + π + N, extrapolation model for π + π interactions from, (T), 24:35649
interactions π + N → π + π + N, factorization test for Pomeranchukon in, 25:3395
interactions π + N → π + π + N, graphical illustration of isospin analysis of, 25:28039
interactions π + N → π + π + N, low-energy production model for, 24:13095
interactions π + N → π + π + N, multi-isobaric model in s channel for, 21:7517
interactions π + N → π + π + N, N* production in, 23:10766
interactions π + N → π + π' + N', nondual property of π in, (T), 25:22817
interactions π + N → π + π + N, partial wave analysis in, 25:53182 (UCRL-20655, pp 220a-49)
interactions π + N → π + π + N, partial waves and exchange models with peripheral N* and rho production in, 24:3676
interactions π + N → π + π + N, peripheral-model determination of $\pi\pi$ phase shifts from, 22:26652
interactions π + N → π + π + N, phenomenological analysis for, 21:9807
interactions π + N → π + π + N, soft-pion calculation of, 23:36927
interactions π + N → π + π + N, transition amplitude for, 21:2476
interactions π + N → π + π + N, unitarity for, 21: 23341
interactions π + N → π + π + N, unitarized Veneziano model for S-wave I = 0 π + π interaction from, 24:1583
interactions π + N → π + π + N, unitarized Veneziano model for π + π amplitudes from peripheral, 24:1582
interactions π + N → π + π + π + N, chiral SU(3) x SU(3) phenomenological Lagrangian for, 24:18168
interactions π + N → π + π + π + N, diffraction dissociation model with duality for, 25:41021
interactions π + N → π + rho + N at high energies, Regge-pole model for, 25:3399
interactions π + N → π + rho + N, Deck effect for, 21:37806
interactions π + N → π + rho + N, Regge-pole exchange model for πrho mass distributions in, 22: 20266
interactions π + N → π + rho + N, Reggeized double-peripheral-model analysis of, 23:25659
interactions π + N → π* + N, quark model for selection rules for diffraction dissociation in, 24:3661
interactions π + N → π(eta) + N at 180 to 1000 MeV, amplitude relations with γ + N amplitudes, (T), 24:3591
interactions π + N → π(γ) + N, contributions of spin-J baryon poles to amplitudes of, (T), 25:53203
interactions π + N → π(rho) + Δ(1236), helicity-channel effects on cross sections of, (T), 24:10776
interactions π + N → π(rho) + N below 1.8 GeV, two-channel model for πN S_{31}, P_{31}, and P_{13} inelastic resonances with repulsive background in, (T), 24:3685
interactions π + N → rho + Δ at high energies, O(3,1) symmetry for cross sections and conspiracy relations for, 23:25638
interactions π + N → rho + Δ in Regge pole model, π conspiracy in, 22:39369
interactions π + N → rho + Δ, behavior of helicity amplitudes in t channel for, 24:18111 (CONF-690330-, pp 161-4)
interactions π + N → rho + Δ, existence of forward peak in, (T), 23:15132
interactions π + N → rho + Δ, π conspiracy in, 22: 5594
interactions π + N → rho + Δ, π trajectory exchange in, 22:11681
interactions π + N → rho + N and π + N → rho + N*, Regge-pole model for pion-exchange, 22:7494
interactions π + N → rho + N at high energies, model independent analysis for ω-exchange contribution to, (T), 25:53184
interactions π + N → rho + N at high energies, pole-vector-dominance model and current conservation in, 24:20154 (ITF-69-70)
interactions π + N → rho + N at high energies, sign of scattering angle cosine at branch points of partial-wave amplitude in s-plane for, 23:49154
interactions π + N → rho + N at high energies, vector dominance and current conservation for t-channel helicity relations in Regge models for, 24:35659
interactions π + N → rho + N in O(3,1) symmetry, high-energy behavior of differential cross sections for, (T), 24:8662
interactions π + N → rho + N in Regge pole model, π conspiracy in, 22:39369
interactions π + N → rho + N* at high energies, quark model for test of additivity from joint decay distributions from, 22:13735
interactions π + N → rho + N, conspiracies for forward, 22:9603
interactions π + N → rho + N, conspiracy equations for, 22:20222 (INP-555/PH, pp 107-14)
interactions π + N → rho + N, coupling-constant sum rules from fixed-momentum-transfer dispersion relations for, 21:29556
interactions π + N → rho + N, diffractive Regge pole model and conspiracy relation for, (T), 24:8643
interactions π + N → rho + N, direct photon—vector meson coupling scheme for wide-angle pair production in, (T), 21:17129
interactions π + N → rho + N, forward and near forward limits in Regge pole theory for, 22:37158
interactions π + N → rho + N, general classification of conspiracy relations for, 21:42363
interactions π + N → rho + N, hard-meson current algebra for peripheral, 24:8699
interactions π + N → rho + N, hard-pion current-algebra calculation for, 23:3722
interactions π + N → rho + N* in Regge pole model, decay angular correlations for, 22:24661
interactions π + N → rho + N, kinematic constraints on helicity amplitudes for crossing matrix for, (T), 24: 10736
interactions π + N → rho + N, kinematic constraints on Regge-pole residues in, 22:11683
interactions π + N → rho + N, O(4) classification of invariants and differential cross sections for, (T), 25: 14757
interactions π + N → rho + N, photon—vector-meson analogy model for relations between γ + N → π + N interactions and, 22:39323
interactions π + N → rho + N, π exchange in, 24: 30522 (CONF-690521-, pp 533-61)
interactions π + N → rho + N, reaction mechanism for rho production in, 22:9611
interactions π + N → rho + N, Regge pole model for rho production in, (T), 23:13102

interactions π + N → rho + N, Regge pole model with diffractive corrections for, 24:42903
interactions π + N → rho + N, Reggeization of π exchange in, (T), 25:38751
interactions π + N → rho + N, superconvergent sum rules for, 21:42380
interactions π + N → rho + N, vector dominance hypothesis and Regge pole exchange for, 22:48273
interactions π + N → rho + N, vector dominance model for relation between γ + N → π + N interaction and, 24:24272
interactions π + N → rho + N, vector-meson dominance for e + N → π + N interactions relation with, (T), 25:53074
interactions π + N → rho + N*, O(3,1) symmetry and Lorentz states of exchanged trajectories for, 22:34985
interactions π + N → rho + N*, Regge pole model for differential cross sections and decay angular correlations in, 22:24658
interactions π + N → rho + N*, Regge recurrences of inelastic resonances in, 22:5580
interactions π + N → rho + N*, vector dominance model for, 25:30784
interactions π + N → rho + π + N at high energies, effect of spin on amplitude of, (T), 23:44663
interactions π + N → rho + π + N, Deck multiperipheral model for A_1 production in, 22:26660
interactions π + N → rho + π + N, spin and parity analysis of A_1-region πrho system produced via double Regge mechanism, 23:51948
interactions π + N → rho(ω) + N, method for deriving angular correlations for, 22:41774 (NP-17531)
interactions π + N → sigma + N, helicity conservation in, 25:56517
interactions π + N → sigma + N, kinematic constraints on Regge-pole residues in, 22:11683
interactions π + N → sigma + N, kinematic singularities of Regge pole residues in, 21:31591 (NP-16821)
interactions π + N → Σ + K, charge independence in, (E/T), 23:46729
interactions π + N → Σ(1385) + K, effect of (πK) exchange in t-channel on Σ(1385) production in, (T), 23:27819
interactions π + N → vector meson + Δ, Reggeization of helicity amplitudes for, 23:1643
interactions π + N → vector meson + N, helicity conservation in, 25:56517
interactions π + N → vector meson + N, Reggeization of helicity amplitudes for, 23:1643
interactions π + N → vector meson (tensor meson) + N, tests of basic assumptions of complex angular momentum method for, 22:9578
interactions π + N → vector mesons + Δ, conspiracy relations for, (T), 22:22400
interactions π + N → vector mesons + N, conspiracy relations for, (T), 22:22400
interactions π + N → vector mesons + N, Lorentz pole and kinematic constraints on helicity amplitudes for, 22:26640
interactions π + N → W + N, peripheral one-pion model for cross sections for, 22:35011
interactions π + N → X^0(960) + N*, method for determining spin—parity of X^0(960) from forward, (T), 25:36494
interactions π + N above 1 GeV, cross sections and multiplicity distributions of charged particle production in, (E), 24:21929
interactions π + N above 1 GeV, multiplicity distributions of charged secondaries from, (T), 24:10765
interactions π + N above 1 GeV, review of properties of secondary particles produced from, 21:46550
interactions π + N above 200 GeV in emulsions, review of multiple production from, 22:9509 (INR-P-826/VI/PH)
interactions π + N above 5 GeV/c, absorptive model corrections to Regge pole exchange in, 25:3390
interactions π + N above 5 GeV/c, Regge pole model for, 22:20210 (CERN-67-24(Vol.2))
interactions π + N at (1236 MeV)^2, finite-energy sum rules for, (T), 22:52989
interactions π + N at 0 to 700 MeV, Born approximation potential for phase shifts for, (T), 25:36510
interactions π + N at 0 to 700 MeV, Coulomb scattering amplitude and Coulomb and nuclear phase shifts for differential cross sections for, (T), 22:13754 (ORNL-4197)
interactions π + N at 1 to 10 GeV/c, analysis of elastic and charge-exchange, (E/T), 22:9607
interactions π + N at 1 to 2 GeV, partial waves from rho, N, and Δ exchange in charge-exchange, 23:18912
interactions π + N at 1 to 8 GeV, single-particle exchange model for inelastic, (T), 25:17513
interactions π + N at 1.7 to 18.4 GeV/c, absorptive potential with hard core for elastic, (T), 23:5633
interactions π + N at 1.98 to 3.5 GeV/c, phase shift analyses of elastic, (T), 25:20012
interactions π + N at 10 to 100 GeV/c, spectrometer for studying baryon exchange in elastic scattering, 24:52318 (TID-25473(Vol.3), pp 165-76)
interactions π + N at 10 to 65 GeV, Regge pole—cut model for forward differential and total cross sections for, (T), 25:41012
interactions π + N at 10^{11} to 10^{13} eV, proposed experiment for average characteristics and angular distributions for, (E), 25:36416
interactions π + N at 16 GeV/c in nuclear emulsions, effective target mass in inelastic, (E), 23:32614
interactions π + N at 17 GeV in emulsions, analysis of multi-prong, (E), 22:34863
interactions π + N at 17 GeV in Ilford G-5 emulsions, multiple Coulomb scatterings in, 21:1599
interactions π + N at 17.2 GeV in emulsion nuclei, cascade model analysis of, 21:33617
interactions π + N at 17.2 GeV, central and peripheral inelastic, (E), 22:24549
interactions π + N at 17.2 GeV/c in emulsions, charged particles and single slow recoil proton production in, (E), 22:34984
interactions π + N at 17.2 GeV/c, pion and proton energy spectra for, review of, 23:18795 (CONF-671217-, pp 589-695)
interactions π + N at 2 to 15 GeV/c, one boson exchange models for, (T), 22:27088(R) (COO-1051-21)
interactions π + N at 2 to 20 GeV/c, behavior of diffraction maximum in inelastic, (T), 25:56504
interactions π + N at 2 to 6 GeV/c, polarization and spin-rotation predictions from Regge fit to, 23:42673
interactions π + N at 2 to 6 GeV/c, validity of interference model for, 22:17968
interactions π + N at 2 to 6 GeV/c, validity of interference model for, 22:46455
interactions π + N at 2.75 to 10 GeV/c, experimental data for reconstruction of energy and angular dependence of amplitudes in near forward, (E/T), 25:43640 (LYCEN-7110)
interactions π + N at 240 to 650 MeV, resonance production and existence of S_{11} and P_{11} from phase shift analysis of, (T), 25:47858(T) (CERN-Trans-71-21)
interactions π + N at 25 to 3500 MeV, graphs for scattered particle energies and angles for, 21:44351 (ORNL-TM-1945)
interactions π + N at 25 to 65 GeV, exotic trajectories for energy dependence of cross sections for, (T), 25:33741
interactions π + N at 28 to 1270 MeV, space—time shifts and cross sections for relativistic wave packet collisions for time duration of, 22:15795
interactions π + N at 28 to 1270 MeV/c, time shifts for s-wave elastic, 22:20260
interactions π + N at 3.5 and 17.2 GeV/c in emulsion nuclei, hyperfragment production from, (E), 21:33602
interactions π + N at 30 to 65 GeV/c, multiple-scattering quark-model predictions of total cross sections for, (E/T), 24:37794
interactions π + N at 300 to 700 MeV, phase-shift analyses of, 21:7516
interactions π + N at 310 to 1450 MeV, N* resonances from phase-shift analysis of, 25:1546
interactions π + N at 385 to 1700 MeV/c, energy continuation of energy-independent phase shift analysis for resonance-like structure in, (T), 25:30871 (UCRL-20250)
interactions π + N at 4 GeV/c, one-particle exchange model for, 22:9608
interactions π + N at 400 to 1500 MeV, review of phase shift calculations for, 23:16932
interactions π + N at 5.9 to 18.2 GeV/c, phenomenology of complex-spin negative-mass-squared resonance tachyons in angular distributions of charge-exchange, (T), 25:56500 (ORO-3992-18)
interactions π + N at 50 to 500 GeV/c, Reggeized multiple-scattering quark model for, 24:45525
interactions π + N at 6 GeV/c, internal symmetry restrictions on spin-density matrix for, 23:15143
interactions π + N at 6 to 55 GeV, complex angular momenta theory for, (E/T), 25:3381 (JINR-P2-5320)
interactions π + N at 7.5 GeV, Adair analysis of, 21:2472
interactions π + N at 7.5 GeV, generalized polar approximation of peripheral, (T), 21:2471
interactions π + N at 720 to 1180 MeV/c, cross sections and angular distributions for, (E), 23:14969 (SLAC-PUB-531(Exp.))
interactions π + N at 8 and 17 GeV in emulsions, isobar model analysis of, (E), 21:3993
interactions π + N at fixed u, finite-energy sum rules for amplitudes of, 24:24370
interactions π + N at fixed u, superconvergence relations for, 22:9606
interactions π + N at high and low energies, dispersion sum rules for, 21:37803 (JINR-P2-3383)
interactions π + N at high and superhigh energies, Monte Carlo method with energy—momentum conservation law for analytical approximations for reconstruction of inelastic, (T), 25:59472 (JINR-P2-6022)
interactions π + N at high energies and all angles, optical model for, (T), 25:43571
interactions π + N at high energies in emulsions, cross sections for, 21:27307
interactions π + N at high energies in emulsions, multiplicity and angular distribution of secondaries in, (T), 22:32060
interactions π + N at high energies in parton model, cross sections for inelastic, 25:12222
interactions π + N at high energies in Regge pole model, use of sum rule for, 21:44370 (IS-1690)
interactions π + N at high energies in Regge-pole model, inconsistency of crossover phenomena for, (T), 22:3310
interactions π + N at high energies, Adler—Weisberger relation for total cross sections of, (T), 24:40394
interactions π + N at high energies, analysis of microcausality for, 22:24571(T) (LA-tr-68-6)
interactions π + N at high energies, arbitrariness in Byers—Yang model for amplitude relations for elastic and charge-exchange, 24:3688
interactions π + N at high energies, asymptotic behavior of amplitude of elastic, 21:15337
interactions π + N at high energies, asymptotic behavior of forward amplitudes for, 23:1639 (BNL-12811)
interactions π + N at high energies, asymptotic theorems and SU(2) symmetry for ratio of real to imaginary part of amplitude for, 23:21144
interactions π + N at high energies, bounds on amplitudes and oscillations in diffraction-peak region for, (T), 25:19990
interactions π + N at high energies, conference on, (E/T), 24:37803 (JINR-P1-3971)
interactions π + N at high energies, conspiracy between Regge trajectories in charge-exchange, 22:3421
interactions π + N at high energies, continuous-parameter sum rules for rho and rho' trajectories for, 22:39398 (IC-68/48)
interactions π + N at high energies, Coulomb interference in, 22:46434
interactions π + N at high energies, determination of P and P' Regge pole parameters for, 22:35002
interactions π + N at high energies, diffraction dissociation and multipion production in, (E), 24:24252
interactions π + N at high energies, dispersion sum rules for forward, 21:17132
interactions π + N at high energies, dispersion sum rules for, 21:37804 (JINR-P2-3385)
interactions π + N at high energies, dispersion sum rules for parameters of, (T), 21:44383
interactions π + N at high energies, dispersion sum rules and Regge pole model for amplitudes of, 23:21110
interactions π + N at high energies, extended structure theory for form factors for, 22:17941
interactions π + N at high energies, Fermi—Yang model for total cross sections for, (T), 21:21237
interactions π + N at high energies, fermion Regge poles in elastic and inelastic, 23:36949
interactions π + N at high energies, field-theoretic calculation with meson exchange and simple nucleon, Δ, and rho poles for amplitudes with fixed and Regge poles and polarizations and cross sections for, 24:5293 (NYO-2262-TA-207)
interactions π + N at high energies, finite-energy sum rules for relation between low- and high-energy amplitudes for, 24:13081 (INP-682, pp 138-55)
interactions π + N at high energies, fixed-branch-point model for diffraction, 23:49165
interactions π + N at high energies, formulas with multiple rescatterings by arbitrary Regge poles for elastic and charge-exchange, (T), 24:52097
interactions π + N at high energies, gradient-coupling model for soft-neutral-pion emission in, 22:3438
interactions π + N at high energies, γ_5 gauge invariance for helicity conservation in, (T), 25:3403
interactions π + N at high energies, impact-parameter representation of amplitudes for, 22:35000
interactions π + N at high energies, linear Regge trajectory fits of, (T), 25:14723
interactions π + N at high energies, meson pole phenomenology of forward elastic and charge-exchange, (T), 25:1482 (CONF-691202-, Paper 1)
interactions π + N at high energies, model for partial waves for, 24:18185 (CONF-690330-, pp 181-7)
interactions π + N at high energies, modified scaling law for large-angle elastic, 25:17512
interactions π + N at high energies, moving two-Reggeon cut contribution to amplitude of vector meson production in, 24:20179
interactions π + N at high energies, multichannel approach for peripheral, 22:3449
interactions π + N at high energies, multichannel calculations in peripheral model for, 21:18993
interactions π + N at high energies, multiple scattering and bootstrap formalisms for structure in, 24:5298
interactions π + N at high energies, multiple-scattering corrections in quark model for, 22:50366
interactions π + N at high energies, non-Pomeranchuk Regge cuts for minima and polarization in elastic and charge-exchange, (T), 25:20006
interactions π + N at high energies, non-Regge behavior of amplitudes of, 24:21989
interactions π + N at high energies, P and P' Regge pole parameters for, 22:32163
interactions π + N at high energies, phenomenological model for, 23:1632 (CEA-R-3479)
interactions π + N at high energies, polarization effects in vector meson production in, 21:40234
interactions π + N at high energies, Pomeranchon SU(3) assignment for total cross section of, (T), 22:24653
interactions π + N at high energies, Pomeranchuk trajectory and cross sections for, 24:37797
interactions π + N at high energies, Regge and non-Regge damping in field theoretic model for, 24:26439
interactions π + N at high energies, Regge cuts for finite-energy sum rules for total cross sections of forward, (T), 25:22824
interactions π + N at high energies, Regge pole analysis of, 24:5299
interactions π + N at high energies, Regge pole description of two-body exchange, 24:24380
interactions π + N at high energies, Regge pole exchange models for elastic, 24:8641
interactions π + N at high energies, Regge pole model for resonance production from, 22:20244
interactions π + N at high energies, Regge pole model for resonances in backward, 22:39391 (CERN-68-7(Vol.1), pp 460-70)
interactions π + N at high energies, Regge pole model for resonances in, 22:39407(T) (UCRL-Trans-1364)
interactions π + N at high energies, Regge pole parameters for spin-flip, 23:46849
interactions π + N at high energies, Regge poles in forward elastic, 21:29541
interactions π + N at high energies, Regge singularities in complex angular momentum plane in, 24:20152 (BNL-50212, pp 159-247)
interactions π + N at high energies, Regge trajectories of definite O(4) for forward production processes from, 21:29540
interactions π + N at high energies, Reggeon-diagram Gribov-technique for multiple rescattering in, 24:10783
interactions π + N at high energies, restrictions of behavior of amplitude of, 23:19003 (ITF-68-38)

interactions π + N at high energies, review of multiple meson (π) and (K) production in, (E), 24:20157
interactions π + N at high energies, review of Regge pole theory for elastic and charge-exchange, 24:5310
interactions π + N at high energies, review of Regge pole models for, (T), 25:25425
interactions π + N at high energies, review of, (E), 25:7653 (CONF-690608-, pp 143-64)
interactions π + N at high energies, scattering amplitude model for, 24:49606
interactions π + N at high energies, shadow scattering and Regge singularities in phenomenological analysis of, 21:23337
interactions π + N at high energies, shower enhancement of branch-point contribution to total cross sections for, (T), 24:28550
interactions π + N at high energies, spin dependence of, 21:42461
interactions π + N at high energies, spin dependences in forward and Regge poles in backward, (T), 22:24675
interactions π + N at high energies, spin-dependent effects in, (E/T), 24:5313
interactions π + N at high energies, SU(3) symmetry and exchange degeneracy in Regge pole-cut model for, (T), 25:12217
interactions π + N at high energies, summation of asymptotics of amplitudes for, 22:46531 (JINR-E2-3917)
interactions π + N at high energies, test of violation of Pomeranchuk theorem from finite-energy sum rules for, 24:47458
interactions π + N at high energies, total cross sections and Pomeranchuk theorem for, (T), 24:49527
interactions π + N at high energies, total effective cross sections for acausal, (T), 25:56502
interactions π + N at high energies, vacuum exchange amplitudes from family of generalized superconvergent sum rules for, 22:32148
interactions π + N at high energies, vacuum Regge exchange contributions to, 22:48317
interactions π + N at high energies, violation of Pomeranchuk theorem and logarithmically increasing cross sections for, (T), 24:30530
interactions π + N at high-energy limit, total cross section for, (T), 24:49515
interactions π + N at intermediate and high energies, dispersion sum rules for analysis of Regge-pole, interference, and resonance models for, 23:36950
interactions π + N at intermediate energies, interference model and finite-energy sum rules for, 22:24630
interactions π + N at intermediate energies, unitarized interference model and partial wave projections for, (T), 24:42966
interactions π + N at low and high energies, dispersion sum rules for, 22:20247
interactions π + N at low and intermediate energies, local duality in invariant amplitudes for, 25:9796
interactions π + N at low and intermediate energies, N/D analysis of Regge amplitudes for, 24:15589
interactions π + N at low and intermediate energies, partial-wave amplitudes for, 25:53220
interactions π + N at low and intermediate energies, Regge poles for, (T), 25:56497 (FRNC-TH-33)
interactions π + N at low and intermediate energies, three-channel model for p-wave, 25:12221
interactions π + N at low and medium energies, lectures on, (T), 25:56807 (CERN-71-14)
interactions π + N at low and medium energies, mass extrapolation technique for S-wave amplitude of, 25:33752
interactions π + N at low energies and in unphysical region, fixed-t dispersion relations for real parts of partial-wave amplitudes for, 23:18906
interactions π + N at low energies, amplitudes and first derivative at crossing symmetry point for, (T), 24:6726
interactions π + N at low energies, ansatz for nucleon on Regge trajectory for, 21:4047
interactions π + N at low energies, chiral dynamics for analysis of single-pion production, 23:42678
interactions π + N at low energies, chiral dynamics for, (T), 22:9667
interactions π + N at low energies, chiral transformations for, (T), 22:22435
interactions π + N at low energies, current algebra determination of P-wave scattering lengths and S-wave effective ranges for, 21:37824
interactions π + N at low energies, current and field commutators for Ward identities for, (T), 23:13103
interactions π + N at low energies, current-commutator sum rules for, 21:25306
interactions π + N at low energies, dispersion sum rules for, 23:30758
interactions π + N at low energies, dispersion theories for, 23:39662
interactions π + N at low energies, dispersion theory of low-energy limits for, 22:46436
interactions π + N at low energies, dispersions relations and axial-vector coupling constant for, 21:25307
interactions π + N at low energies, duality from Regge parametrization for P_{11} and S_{11} partial waves in, (T), 25:12211
interactions π + N at low energies, dynamical model for, 21:29545
interactions π + N at low energies, effect of quasipoles on forward amplitudes of, 21:37827
interactions π + N at low energies, equal-time commutators for, 23:15112 (MIT-2098-509)
interactions π + N at low energies, equal-time commutators for amplitudes of, 23:39740
interactions π + N at low energies, gradient coupling theory and soft-pion technique for s-wave scattering lengths for, 24:5305
interactions π + N at low energies, hard-pion current algebra calculation of scattering lengths and phase shifts for, 25:41009
interactions π + N at low energies, high-energy contributions to, 22:1440
interactions π + N at low energies, isobar model for explicit amplitude of radiative, 22:29666
interactions π + N at low energies, lectures on, (T), 25:56496 (CERN-71-14, pp 101-54)
interactions π + N at low energies, model Hamiltonian for, (T), 25:17546
interactions π + N at low energies, N/D dispersion relation calculation of phase shifts for, 24:24383
interactions π + N at low energies, one-particle-exchange model for phase shifts for, 22:17971
interactions π + N at low energies, parity doubling and asymmetric fermion trajectories for dynamics of, 22:20270
interactions π + N at low energies, PCAC hypothesis and current commutation relations for p-wave amplitudes of, 21:40231
interactions π + N at low energies, PCAC hypothesis and derivative coupling meson theory for, 21:40230
interactions π + N at low energies, PCAC hypothesis for, (T), 22:9592
interactions π + N at low energies, phase shifts for, 23:36943
interactions π + N at low energies, properties of P and P' trajectories from amplitudes of elastic, 22:41818
interactions π + N at low energies, π production in, (T), 23:13098
interactions π + N at low energies, quantum field theories with shadow states for s- and p-wave, (T), 25:47862 (ORO-3992-45)
interactions π + N at low energies, Regge rho-exchange parameters for, 21:37805
interactions π + N at low energies, Regge structure of rho poles from, 21:37807
interactions π + N at low energies, review of resonance production in, 22:32151
interactions π + N at low energies, rho contribution to, (T), 24:45528
interactions π + N at low energies, rho contributions to, 24:28554
interactions π + N at low energies, rho-exchange model for amplitude of charge-exchange, 22:41822
interactions π + N at low energies, s-wave scattering lengths for, (T), 24:42971
interactions π + N at low energies, self-consistency condition from gauge principle for, 22:46454
interactions π + N at low energies, short-range repulsion in broken chiral symmetry for mass and width of $\Delta(1236)$ in, (T), 25:25471
interactions π + N at low energies, short-range repulsion in broken chiral symmetry for masses lifetimes and coupling constants for p-wave resonances in, (T), 25:25471
interactions π + N at low energies, static pair suppression in P- and S-wave, 24:1602
interactions π + N at low energies, status of experiments on, 23:8738 (TID-24667, pp 575)
interactions π + N at low energies, strip unitarization in Veneziano model for, (T), 24:49490 (SINP-TH-69-6)
interactions π + N at low energies, two-channel N/D calculation of p_{11} wave for, 21:17117
interactions π + N at low energies, unitarity corrections to parameters in soft-pion calculations for, 22:20259
interactions π + N at low energies, Veneziano model for, 24:3654
interactions π + N at low energies, Ward identities and dispersion relations with duality in, (T), 25:50139
interactions π + N at low energies, Ward identity techniques for s- and p-wave amplitudes for, (T), 25:36513
interactions π + N at low energies, Ward-identity techniques for s- and p-wave amplitudes for, 25:1549
interactions π + N at low energy, current commutation relations and PCAC hypothesis for, 22:11672
interactions π + N at low energy, hard pion technique in current algebra for scattering lengths of, 23:32751
interactions π + N at low energy, partial-wave amplitudes for elastic, 21:25296
interactions π + N at rest, current—field equal-time commutators and hard-pion techniques for, (T), 24:52101
interactions π + N at $T = {}^3/_2$ and $J = {}^1/_2$, Regge poles and phase shifts for, 21:932
interactions π + N at threshold to 13 GeV/c, predictions of isospin invariance in backward, (E/T), 25:59287
interactions π + N at threshold, electromagnetic corrections to chiral symmetry for S-wave scattering lengths for, (T), 25:20044
interactions π + N at ultrahigh energies, model for multiple meson production in, (T), 24:47444
interactions π + N at vanishing momentum transfer, SO(4) symmetry for amplitudes of, 22:44434
interactions π + N at very high energies, angular and energy distributions of secondary particles from, (T), 25:7658 (JINR-P2-5331)
interactions π + N at very high energies, angular and energy distributions of particles produced in, (T), 25:30870(T) (ORNL-tr-2433)
interactions π + N below 1.5 GeV, dispersion relations from phase shift analysis of, 22:34977 (AD-666680)
interactions π + N below 1.6 GeV, phase shift analysis of elastic, 22:15807
interactions π + N below 100 MeV, phase shift analysis of, (E), 23:8739 (TID-24667, pp 576-9)
interactions π + N below 18 GeV, reconstitution of scattering amplitudes satisfying the moment sum rules for total cross sections of, (T), 23:51947
interactions π + N below 2 GeV, multi-resonance structure in P_{11} state in, (T), 23:10821
interactions π + N below 2 GeV/c, interference model for near-forward, 23:46727
interactions π + N below 270 MeV, phase shifts from fixed-t dispersion relations for, 25:45749
interactions π + N below 290 MeV, phenomenological chiral Lagrangian model for π production in, 23:23484
interactions π + N below 700 MeV in D_{13} state, (T), 24:49504
interactions π + N below 8 GeV, Regge pole model and complex momenta for, 21:40218 (NP-16952)
interactions π + N in backward direction, finite-energy sum rules for, 23:32727
interactions π + N in cascade theory calculations for particle reactions with nuclei at high energies, method for sampling inelastic, 22:7525 (JINR-P2-3561)
interactions π + N in chiral U(3) x U(3), s- and p-wave scattering lengths for, 21:44365
interactions π + N in cosmic jets, transverse momentum and four-momentum transfer of recoil protons in, 22:7443
interactions π + N in cosmic-ray energy region, characteristic difference of N + N and, 24:20172
interactions π + N in current algebra, S-wave phase shifts from unitarized amplitudes for, 23:42670
interactions π + N in dispersion theory, high-energy limits for charge-exchange, 22:34987
interactions π + N in duality framework, Pomeranchon plus resonance model for elastic, 24:13109
interactions π + N in emulsions at 4.4 GeV/c, isobar model analysis of, 21:3979
interactions π + N in final state, effect on backward π production in γ + d interactions at 1 GeV, 23:39733
interactions π + N in GeV range, low-energy models for, (T), 25:30854
interactions π + N in $I = 1/2$, $J = 1/2^+$ state, multichannel potential model of, 23:10820
interactions π + N in $I = J = 1/2^+$ state, dispersion theory and multichannel potential of, (T), 23:1646
interactions π + N in infinite-component field, Regge amplitude for, (T), 25:41022
interactions π + N in ladder approximation, use of Pade approximants for Bethe—Salpeter equation for, 22:44428
interactions π + N in modified interference model, duality concept from analysis of, (T), 24:42972
interactions π + N in narrow resonance model, 25:45728
interactions π + N in nuclei at 200 GeV, properties of secondary particle production in, (E), 24:21928
interactions π + N in nuclei at high energies with intranuclear cascades, statistical calculations for inelastic, 23:30754(T) (ORNL-tr-2123)
interactions π + N in nuclei, intranuclear cascades with many-particle interactions from, (T), 22:37164
interactions π + N in nuclei, properties of many-particle interactions from cascade calculations and, 22:29700(T) (ORNL-tr-1800)
interactions π + N in O(4) symmetry, exchange of odd-parity Regge trajectories for forward peaks in, 21:33777
interactions π + N in P_{11} channel, daughter trajectories for nucleon isobars from, 23:27818
interactions π + N in P_{11} state, amplitudes for, 21:9801
interactions π + N in P_{11} state, analysis of, 21:19004
interactions π + N in P_{11} state, CDD poles in N/D calculation of, 23:27807
interactions π + N in P_{11} state, inelastic effects in, (T), 23:3734
interactions π + N in P_{11} state, N/D approach to, 21:46536
interactions π + N in P_{11} state, nucleon dynamical status determination from amplitude of, 22:3450
interactions π + N in pre-asymptotic region, angular distributions and amplitude structure for inelastic, (T), 25:59497
interactions π + N in pseudoscalar field theory, Pade approximation method for calculation of S-matrix for, 24:37802
interactions π + N in π^- reactions with nuclei at 600 to 1600 MeV, optical potential strength for, (E), 22:15681 (PPAD-630-F)
interactions π + N in quantum field theory without cut-off, mass and width of N* resonance from, 23:27814
interactions π + N in quantum field theory, partitioning technique for amplitude of, 22:7507
interactions π + N in quantum field theory, production amplitudes for, 21:42376
interactions π + N in quark model, real part of amplitude for, 21:25279
interactions π + N in quark model, sum rules relating, (T), 21:15318
interactions π + N in Regge pole theory, 22:20353
interactions π + N in Regge pole theory, amplitude in kinematic region of backward, 21:33704
interactions π + N in sigma model, first diagonal Pade approximant for elastic, 25:22822
interactions π + N in static limit, two-channel calculation of, 21:19016
interactions π + N in static model, sum rule for axial-vector current renormalization for, 21:13712
interactions π + N in SU(3) Regge-pole theory, relations among charge-exchange differential cross sections for, 21:29557
interactions π + N in urbaryon model, cross sections for forward elastic, 21:35300
interactions π + N in urbaryon rearrangement model, dip-bump structure of cross sections for, 25:12219
interactions π + N in Veneziano model, amplitude for, 24:18207
interactions π + N in Veneziano model, Δ and N trajectory widths from, 23:36938
interactions π + N in Veneziano model, polarization in charge-exchange, 25:9793
interactions π + N in Veneziano model, Regge cuts for backward, (T), 24:45527
interactions π + N in Veneziano model, rho contribution to nucleon form factor from, 24:18217
interactions π + N in Virasoro model, Regge behavior, crossing symmetry, and analyticity in amplitude for, 23:42681

interactions π + N interactions at high energies, comparative evaluation of models for backward, (T), 25:17508
interactions π + N near backward direction, fixed finite-energy sum rules for, 22:34986
interactions π + N near threshold energy, pseudoscalar—pseudoscalar coupling theory for s-wave, 23:8808
interactions π + N to 2 GeV, data compilation for elastic, 22:17864 (CEA-R-3401)
interactions π + N to 2.8 GeV/c, phase shift analysis of elastic, 24:28553
interactions π + N up to 2.5 GeV/c, polarization at forward angles and amplitudes for elastic, (E/T), 21:42370
interactions π + N up to 30 GeV, statistical calculations for inelastic, 23:3753 (JINR-P2-4066)
interactions π + N with fixed nucleon source, model of coupling constant renormalization for, 25:1547
interactions π + N, (T), 21:18969 (NP-16640)
interactions π + N, 3-pole N/D approximation in static model for Δ(1236) production in, (T), 25:1540
interactions π + N, absorption Regge cut in backward, 25:53206
interactions π + N, absorptive corrections in Regge pole model for charge-exchange polarization in, 22:35004
interactions π + N, action of S-transformation on integrals of motion in strong coupling theory for, 24:10741
interactions π + N, Adler—Weisberger relation for amplitude of, 22:3483 (CERN-67-24(Vol.1), Paper 2)
interactions π + N, Adler—Weisberger relation for absorption cross section for, 23:23441
interactions π + N, Adler—Weisberger sum rule for, 21:21240
interactions π + N, Adler—Weisberger sum rule for, 21:31594
interactions π + N, amplitude superconvergence calculations using perturbation theory and Lee model, 22:50405
interactions π + N, analysis of, 22:3427
interactions π + N, analysis using partial-wave dispersion relations in W plane for, 21:44372
interactions π + N, analytic continuation of partial amplitudes in unphysical region for resonance production in, 23:46720 (JINR-P2-4535)
interactions π + N, analytic helicity amplitudes and Regge-pole formulas for differential cross sections for, 22:3448
interactions π + N, analytic properties of Feynman diagrams in quantum field theory for, 22:20218
interactions π + N, analytical and numerical study of bound-state solutions to Bethe—Salpeter equation for, 22:39414
interactions π + N, analyticity and broken SL(2,C) symmetry for Regge families for, 23:5631
interactions π + N, analyticity constraints and superconvergence relations for, 22:37140
interactions π + N, analyticity domain of forward amplitude of, 21:33793
interactions π + N, Argand diagrams for partial-wave projections of Regge amplitudes of, 22:32147
interactions π + N, Argand diagrmas and loops for analysis of resonances in charge-exchange, 23:36944
interactions π + N, Argand loop from partial-wave projection of Regge-pole exchanges in, 24:37790
interactions π + N, asymptotic behavior of B/sup +-/ spin-flip amplitudes for, 23:15134
interactions π + N, asymptotic behavior of force function for, (T), 24:47455
interactions π + N, asymptotic conservation of helicity for, 25:3398
interactions π + N, asymptotic predictions for dispersion relations for forward, 23:15060
interactions π + N, asymptotic predictions for forward dispersion relations for, 21:31604
interactions π + N, axial-vector coupling constant renormalization for, 21:9785
interactions π + N, axiomatic analyticity domain extension for elastic, 22:3415
interactions π + N, Ball—Zachariasen trajectory for polarization in elastic and charge-exchange, (T), 25:47877
interactions π + N, baryon Regge exchange in backward, 23:46735
interactions π + N, baryon trajectories in direct channel and polarization in charge-exchange, (T), 21:18996
interactions π + N, baryon trajectories without MacDowell partners for resonance spectra from, 24:37792
interactions π + N, behavior of partial wave amplitudes at s = 0 for, 23:51937
interactions π + N, bootstrap models for, 22:32170
interactions π + N, bound-state solutions to Bethe—Salpeter equation for N* production from, 21:42356 (UCRL-17671)
interactions π + N, bound-state solutions to Bethe—Salpeter equation for, 22:37154
interactions π + N, bounds on coupling constants in existence theorems for Low equation for, 24:10766
interactions π + N, bounds on fundamental length from dispersion relations for, 25:7666
interactions π + N, calculation of elastic scattering lengths using vector meson exchange for, 23:3843
interactions π + N, calculation of mean characteristics of EAS with interchange of parameters for, 23:42007
interactions π + N, calculation of partial-wave amplitudes on left-hand cut for, 24:18296
interactions π + N, causality and analyticity for resonant waves in, 22:3416
interactions π + N, causality violation and nonlocality from dispersion relation analysis of, 22:35001
interactions π + N, CDD effects in partial-wave dispersion relations for Δ(1236) production in, 24:1673
interactions π + N, charge-exchange in forward, (T), 21:5402
interactions π + N, Chew—Low model for, 23:49197
interactions π + N, Chew—Low model for resonance production in p-wave, 21:29544
interactions π + N, Chew—Low type equations for, 24:49437
interactions π + N, chiral algebra conditions for amplitudes of, 21:25290 (ISS-67/6)
interactions π + N, chiral algebra conditions on amplitudes of, 21:29537
interactions π + N, chiral dynamics for, 21:25286
interactions π + N, chiral dynamics for S-wave scattering lengths for, 23:32698
interactions π + N, chiral dynamics for, (T), 24:18184 (CERN-69-29, pp 31-45)
interactions π + N, chiral Lagrangian calculation of scattering length for, 23:15122
interactions π + N, chiral SU(2) x SU(2) Lagrangians for, 23:18916
interactions π + N, chiral symmetry for, 21:44412
interactions π + N, chiral transformations for, (T), 24:40408
interactions π + N, chiral U(2) x U(2) symmetry for current x current structure of, 24:3686
interactions π + N, chiral-invariant Lagrangian for S-wave scattering lengths and N* production parameters, 24:35644
interactions π + N, classification of N(1400) in multiplet of broken SU(3) from, 22:37179
interactions π + N, complex Regge poles in backward, (T), 25:59495
interactions π + N, complex Regge poles in cut j plane for charge exchange, (T), 25:3402
interactions π + N, conditions from current commutation relations on, 21:930
interactions π + N, conference on, 24:5294
interactions π + N, conservation laws for intranuclear cascade calculation for nucleon reactions with nuclei from inelastic, 22:22410 (JINR-P4-3714)
interactions π + N, consistency conditions from duality for, (T), 25:9792
interactions π + N, consistent approach for continuous moment sum rules for, 23:25634
interactions π + N, constraint relations from crossed-channel unitarity for, 24:13057
interactions π + N, constraints and unequal-mass kinetics using baryon trajectories for elastic, (E/T), 23:8809
interactions π + N, constraints on asymptotic behavior of amplitudes for, 22:48324
interactions π + N, constraints on Regge pole parameters from family of dispersion sum rules for, 23:21116
interactions π + N, constraints on Regge-pole parameters from dispersion sum rules for, 23:27802 (NP-17887)
interactions π + N, continuous moment sum rules for nonvanishing asymptotic total cross sections for, 22:34998
interactions π + N, continuous-moment sum rules for forward, 24:49528
interactions π + N, continuous-moment sum rules for Regge parameters of, 24:1590
interactions π + N, continuous-moment sum rules for, (T), 25:12207
interactions π + N, continuous-parameter sum rules for forward, 23:34601
interactions π + N, continuous-spin pole exchange for elastic, 25:30892
interactions π + N, contribution of baryon resonances to cross sections for, 21:9786
interactions π + N, contribution of Δ(1236) to elastic, 25:33743
interactions π + N, contribution of J less than or equal to 3/2 resonances to u-channel exchange potential in, 21:15343
interactions π + N, convergence of finite-energy sum rules in nonforward directions in, 24:40389
interactions π + N, corrections to Breit—Wigner shape of N*(1236) resonance from, 21:29551
interactions π + N, corssing relations for center-of-mass- and Breit-system canonical amplitudes for, 24:20168
interactions π + N, Coulomb corrections to charge-exchange and elastic, 25:45753
interactions π + N, Coulomb corrections to phase shifts for, 23:32731
interactions π + N, coupling constant from current-algebra sum rules and Veneziano amplitude for, 25:56516
interactions π + N, coupling constant from spin-flip dispersion relation for, 22:32166
interactions π + N, covariant O(4) propagator for M = 1/2 exchange in, 23:46781
interactions π + N, cross section sum rules for, 21:42368
interactions π + N, cross sections for multiple soft-π production in, 25:30887
interactions π + N, cross-channel isospin analysis of peripheral single π production in, (T), 25:17490
interactions π + N, cross-channel isospin analysis of peripheral single rho production in, (T), 25:17490
interactions π + N, crossing relations and Born terms for, 21:929
interactions π + N, crossing symmetric Regge amplitude for, 23:15126
interactions π + N, crossing symmetry for elastic, (T), 21:4102
interactions π + N, crossing-symmetric amplitude in Veneziano model for charge-exchange and elastic, 24:35810
interactions π + N, current algebra and PCAC for threshold theorem for, 21:31603
interactions π + N, current algebra and rho + rho'(1600) dominance model for S-wave scattering lengths for, 22:20269
interactions π + N, current algebra determination of low-energy parameters for, 24:5303
interactions π + N, current algebra for superconvergence sum rules for, 21:46594
interactions π + N, current algebra for, (T), 25:53191
interactions π + N, current algebra method for Adler—Weisberger sum rule for, 23:39635
interactions π + N, current algebra on mass shell for fixed-momentum dispersion relations for, 24:15579 (INP-681, pp 193-210)
interactions π + N, current algebra on mass shell for, (T), 25:25427
interactions π + N, current-algebra sum rule for spin-flip amplitude of, 22:44435
interactions π + N, current-algebra sum rules for P-wave scattering lengths, 21:37810
interactions π + N, current-algebra technique for calculation of p-wave scattering length for, 24:3684
interactions π + N, currents and current commutators for scattering lengths and low-energy parameters for, 22:11706
interactions π + N, D-spin formalism for diffractive exotic hadron production in, (T), 25:17466 (COO-264-570)
interactions π + N, daughter trajectories for, 23:1651
interactions π + N, decomposition of Bethe—Salpeter amplitudes for, 22:39417
interactions π + N, deduction of Chew—Low type equations and origin of cut-off function for, 21:37818
interactions π + N, derivation of Chew—Low equations and origin of cutoff function in static models for, 21:7512 (JINR-P2-3054)
interactions π + N, derivation of finite-energy sum rules for forward, (T), 25:25424
interactions π + N, derivation of Veneziano-type representation for, 24:52102
interactions π + N, derivatives of baryon trajectories from Khuri amplitudes for, (T), 24:42976
interactions π + N, determination of amplitudes for, 21:42371
interactions π + N, determination of f' trajectory parameters from superconvergence dispersion sum rules for, 22:26654
interactions π + N, determination of P' Regge-trajectory intercept for, 21:9800
interactions π + N, determination of Regge parameters for, 22:32132
interactions π + N, differential cross section for backward, 23:44658
interactions π + N, differential cross sections for backward, (T), 22:50389 (KFKI-21/1968)
interactions π + N, differential cross sections for charge exchange, (T), 25:5294
interactions π + N, differential cross sections in crossed form for, (T), 24:8665
interactions π + N, diffraction scattering model for charge-exchange polarization and elastic, 23:32843
interactions π + N, dipole rho trajectory for charge-exchange, 23:5636
interactions π + N, direct-channel Regge poles for finite-energy sum rules for amplitudes of, 25:9801
interactions π + N, direct-channel Regge—Mandelstam analysis of charge-exchange, 23:15204
interactions π + N, dispersion relation calculation of scattering lengths for, 23:32746
interactions π + N, dispersion relation extension for, 21:37829
interactions π + N, dispersion relations and Pomeranchukon decoupling for amplitude of, 25:17511
interactions π + N, dispersion relations for complex t values from axiomatic field theory for, 21:21229
interactions π + N, dispersion relations for forward, 23:15202
interactions π + N, dispersion sum rule for amplitude of, 22:9612
interactions π + N, dispersion sum rules for, 21:42362
interactions π + N, dispersion sum rules for amplitudes of, 22:7523
interactions π + N, dispersion sum rules for fixed-u amplitudes of, 25:14709
interactions π + N, dispersion sum rules for N* production from, 22:17952
interactions π + N, dispersion sum rules from modified amplitudes for, 22:44413
interactions π + N, dispersion sum rules in static model for amplitude of elastic, (T), 22:1449
interactions π + N, dispersion theoretic derivation of PCAC consistency condition and rho-dominance in, 23:15133
interactions π + N, dispersion theoretic model for Δ(1650), N(1700), and Δ(1670) as rhoN bound states in, 25:53218
interactions π + N, dispersion theory for, 22:3446
interactions π + N, dispersion-relation calculation of low-energy s-wave, 22:3432
interactions π + N, dispersion-theoretic approach to current algebra for, 21:17127
interactions π + N, distant contributions to isovector form factors from annihilation and ππ dynamics for elastic, 23:15135
interactions π + N, dual models of reciprocal bootstrap doubling for, 24:18197
interactions π + N, dual quark—parton model for, 25:56481
interactions π + N, duality and non-Pomeranchuk contributions to cross sections for, (T), 24:45533
interactions π + N, duality and Regge amplitudes for charge-exchange, 23:42777
interactions π + N, duality and Regge behavior from finite-energy sum rules for, 24:15686
interactions π + N, duality classes for, 24:52090
interactions π + N, duality concept for Pomeranchuk term for, 25:3375
interactions π + N, duality for real part of amplitude for, 25:47887
interactions π + N, dynamical calculations for three-body, (T), 24:52115
interactions π + N, dynamical content of vector dominance sum rules for, 21:42361

interactions π + N, dynamical model for negative-parity Regge trajectories in, 21:15361
interactions π + N, dynamics of, (T), 21:15340
interactions π + N, effect of CDD pole in amplitude for I = 1/2, J = 1/2$^+$, 21:18998
interactions π + N, effect of rhoN and πN* final states on elastic, (T), 22:24670
interactions π + N, effect on partial-wave absorptions in p + p interactions at 1 GeV, 22:32174
interactions π + N, effect on Regge parameters from phase shift ambiguity effects on finite-energy sum rules for amplitudes of, (T), 25:17500
interactions π + N, effective Lagrangians for, 23:34603
interactions π + N, effects of d- and f-wave, on energy level shifts of mesic atoms, 21:25309
interactions π + N, effects of imaginary part of Regge trajectories on differential cross sections for backward, 25:28036
interactions π + N, effects of one-boson-exchange models on N + N potential with sigma from, 24: 37804 (NYO-4032-22)
interactions π + N, effects of resonance scattering on, 22:52979
interactions π + N, effects on local condensation of matter and antimatter in black-body radiation from Δ production in, (T), 23:46732
interactions π + N, effects on partial-wave p + p interactions at 1 GeV from s-state, (T), 22:7524 (ISS-67/25)
interactions π + N, eigenvalue problem for partial waves for, 21:27371
interactions π + N, elastic unitarity and phase equality of amplitudes of, 22:50406
interactions π + N, electromagnetic corrections in dispersion relations for forward, 22:17951 (JINR-P2-3670)
interactions π + N, electromagnetic effects in dispersion relations for forward scattering, (T), 23:3743
interactions π + N, energy dependence of slope of diffraction amplitude for, 25:53197
interactions π + N, energy variation of baryon angular distributions from, (T), 21:17119
interactions π + N, epsilon and f* exchange in, 25: 7661
interactions π + N, epsilon(700) and f*(1260) exchange in t-channel of, (T), 25:9802
interactions π + N, equation of state in hydrodynamic theory for multiple particle production in, 24:21971
interactions π + N, equivalent potential for N exchange in, 21:4046
interactions π + N, equivalent potential method for amplitudes of relativistic, 21:17106 (UCRL-17311)
interactions π + N, equivalent-potential method for amplitude of, 21:19003
interactions π + N, exchange degeneracy in Reggeized absorption model for, 25:30874
interactions π + N, existence and uniqueness of solutions to Low equation for, (T), 25:7670
interactions π + N, existence of I = 3/2, J = 1/2$^+$ πN resonance for saturation of sum rules for, 23:36937
interactions π + N, expansion of partial wave amplitudes for, 22:48375
interactions π + N, experimental test of rising trajectories and falling residues for, 22:7510
interactions π + N, extension of Veneziano model for, 24:18186 (CONF-690330-, pp 189-201)
interactions π + N, fermion Regge poles and phase shift relations for, 21:11772
interactions π + N, fermion Reggeization without parity doubling in Van Hove model for, 24:13097
interactions π + N, Feynman-diagram models for fermion daughter trajectories in, 25:1543
interactions π + N, field theory of chiral symmetry for, 22:5628
interactions π + N, finite-energy sum rules for backward, 23:3745
interactions π + N, finite-energy sum rules for Regge bootstraps for resonance production in, (T), 25:17503
interactions π + N, finite-energy sum rules in nonforward directions for, 24:24389
interactions π + N, finite-energy sum rules with complex conjugate Regge poles for, 25:22835
interactions π + N, finite-transform sum rules for, 24: 28557
interactions π + N, fixed pole in partial-wave amplitude for, 25:17510
interactions π + N, fixed poles and dip mechanisms for s-channel helicity conservation in, (T), 24:49520
interactions π + N, fixed-energy dispersion relations for partial-wave amplitudes of, 21:4054
interactions π + N, fixed-pole effects on exchange-degenerate Regge residues, 25:30878
interactions π + N, fixed-t dispersion relations for effective-range parameter for S-wave, (T), 25:20010
interactions π + N, fixed-u finite-energy sum rule calculations of, 25:3396
interactions π + N, fixed-u sum rules in, 21:42379
interactions π + N, form factor of N* resonance in, 21: 4055
interactions π + N, formulation of Reggeized absorption model with exchange degeneracy for elastic and charge-exchange, (T), 25:53159
interactions π + N, formulation of SU(3) X SU(3) chiral Lagrangian with gauge fields for scattering lengths of, 23:39776 (NYO-3399-194)
interactions π + N, forward dispersion relations for energy behavior of d waves in, (T), 22:32144
interactions π + N, gauge invariance and soft-pion techniques for constraints between π production amplitude and amplitude of, (T), 25:36515
interactions π + N, gauge principle and sum rule for zero-mass-pion, 21:27369
interactions π + N, generalized interference model for resonance and Regge pole production in, 23:32741
interactions π + N, generalized multiperipheral model for properties of partial cross sections for K anti K production in, (T), 25:36422
interactions π + N, generalized potential and P_{33} phase shift for, 25:59485
interactions π + N, generalized potential for partial-wave amplitudes of, 22:20268
interactions π + N, generalized superconvergence sum rule for total cross sections of, 24:35656
interactions π + N, generalized Ward—Takahashi identities and current algebra for, 22:13681
interactions π + N, global and infinitesimal nonlinear chiral transformations of Lie group for Lagrangian dynamics for, 24:20203
interactions π + N, Gribov—Pomeranchuk phenomenon in N/D method for, 22:20220
interactions π + N, Harari model for forward scattering amplitudes in, (E/T), 23:7147
interactions π + N, Harari—Freund ansatz related to finite-energy sum rules for nonflat Pomeranchuk trajectory for, 23:51944
interactions π + N, helicity conservation in diffraction scattering and duality in, 24:40390
interactions π + N, helicity coupling constant for amplitudes of, 22:1436
interactions π + N, helicity of virtual photon emitted in μ pair and hadron production in, (E/T), 24:26448
interactions π + N, helicity structure of Regge couplings in, 25:53195
interactions π + N, high-energy behavior of Bethe—Salpeter amplitudes for, 24:13113
interactions π + N, high-energy consistency conditions and superconvergence sum rules for partial-wave amplitudes of, 21:42381
interactions π + N, high-energy contributions to current-algebra sum rules for, 24:3639
interactions π + N, higher unitarily coupled channels in, 21:23342
interactions π + N, homogeneous Lorentz group expansion of partial-wave amplitudes for charge-exchange, 21:44428
interactions π + N, identification of direct-channel Regge-pole terms with resonance amplitude in, 25: 7675
interactions π + N, inclusion of fermions in meromorphic amplitudes for invariant representation in spin-space decomposition of amplitudes of, (T), 24: 40397
interactions π + N, inelastic unitarity in one-channel N/D calculation of partial-wave amplitudes for, 24: 18218
interactions π + N, inequalities for partial waves for, (T), 25:43641 (SU-1206-249)
interactions π + N, inequalities for partial waves of, 25:53216
interactions π + N, infinite momentum sum rules for N* production in, (T), 23:13098
interactions π + N, interference models for forward, 24:37785
interactions π + N, interference of t- and u-channel amplitudes in Regge model for, (T), 24:49530
interactions π + N, intermediate-energy region contribution in dispersion sum rules for Regge residue functions for amplitudes of, 24:33017 (IFVE-STF-69-43)
interactions π + N, invariant amplitudes in unphysical region for, 25:59481
interactions π + N, invariant varieties of Chew—Low equation for, (T), 25:50136 (JINR-P2-5906)
interactions π + N, isobaric saturation of Adler—Weisberger sum rule for resonance production from, 21:40223
interactions π + N, isolation of Pomeranchuk contribution to total cross section for, (T), 24:13098
interactions π + N, isospin invariance violation in, 22: 41839
interactions π + N, isospin-1/2 amplitudes in, 21:4049
interactions π + N, isospin-3/2 vector K existence prediction from dual model theories from spin—isospin interchange in Yukawa, (T), 24:49498
interactions π + N, kinematic singularities of transversity amplitudes of, 22:41874
interactions π + N, kinematical singularities and helicity amplitudes for π and higher-spin baryon production in, (T), 25:53200
interactions π + N, ladder approximation in partial wave dispersion relations for Δ(1236) production in, 22:24648 (DESY-68/2)
interactions π + N, ladder approximation in partial-wave, 23:15131
interactions π + N, ladder diagrams with nucleon exchange and Pade approximants for amplitudes of Δ(1236) production in, 23:51879 (DESY-69/33)
interactions π + N, lectures on, 23:1606
interactions π + N, linear fermion trajectories and absence of MacDowell doublets for parity doubling in, 24:28558
interactions π + N, low-energy constraints on π production amplitudes in, (T), 22:3434
interactions π + N, low-energy parameters from dispersion relations for inverse forward amplitude of, (T), 23:39738
interactions π + N, low-energy parameters of, (T), 23: 32755
interactions π + N, low-energy π + π interaction from phase shifts for, 25:59463
interactions π + N, low-energy π + π phase shifts from dispersion relations for backward, (T), 25:36520
interactions π + N, low-energy theorem for on-shell, 23:46723
interactions π + N, low-energy theorems from dispersion relations and crossing symmetry for, 23: 23493
interactions π + N, magnitude of sigma term from chiral symmetry breaking and scale invariance in, 25: 41018
interactions π + N, magnitude of sigma-commutator from extrapolation of amplitude for, 25:41017
interactions π + N, mass and width of Δ(1236) from, 24:18194
interactions π + N, mass extrapolation method for S-wave amplitude of, 25:33753
interactions π + N, masses of both external π lines continued to zero in, 24:20167
interactions π + N, mechanisms for dip in cross sections for, 23:23489
interactions π + N, meson Regge exchanges for analysis of dispersion sum rules and, 24:13111
interactions π + N, method for summing virtual soft pion dependence in, (T), 22:50320 (NYO-2262-TA-191)
interactions π + N, method for systematic errors in theoretical fits to forward, 25:7677
interactions π + N, microcausality for forward dispersion relations for, 23:39722 (COO-264-498)
interactions π + N, model for P_{11} resonance as bound state of, 22:17964
interactions π + N, model for Pomeranchukon exchange in total cross sections for, 25:36512
interactions π + N, model for Regge cut contribution to charge-exchange, 23:42778
interactions π + N, model of fermion trajectory for, 25:9790
interactions π + N, model of s- and p-wave, 22:44446
interactions π + N, model with N, N*, rho, and epsilon exchanges for scattering lengths of, 23:18917
interactions π + N, model with short-range repulsion for p-waves of, (T), 25:1528 (JINR-P2-5302)
interactions π + N, modified finite-energy sum rule for dual structure in charge-exchange, (T), 24:49488 (NP-18417)
interactions π + N, modified finite-energy sum rule for dual structure in charge-exchange, (T), 25:41003
interactions π + N, modified Pomeranchuck theorem for lower bounds on cross sections for elastic, 25: 59474
interactions π + N, modified superconvergence relations in Regge pole theory for, 21:42378
interactions π + N, modified Veneziano model for, 24: 42973
interactions π + N, modified Veneziano model for, 24: 49492
interactions π + N, Monte Carlo simulation of high-multiplicity peripheral, (T), 24:37780(T) (NP-tr-1904)
interactions π + N, multichannel N/D model with second pole for S-wave amplitude of, 24:24368
interactions π + N, multichannel N/D parametrization of partial-wave amplitudes for, 23:18922
interactions π + N, multiplicity, angular, and energy distributions of secondary particles from, (E/T), 24: 10772
interactions π + N, n + p $\rightarrow$ d + π^0 interactions from threshold to 720 MeV for testing charge independence of, (E), 23:42548 (PURC-2137-9)
interactions π + N, N trajectory from strip approximate N/D equations for, 23:36933
interactions π + N, N, Δ, and rho exchange contributions to amplitudes for charge-exchange, 24: 18189
interactions π + N, N, Δ, and rho exchange contributions to charge-exchange, (T), 24:49514
interactions π + N, N* resonances from rho Regge exchange in charge-exchange, (T), 22:20256
interactions π + N, N/D calculations for D_{13} and P_{11} waves in, (T), 25:7669
interactions π + N, N/D calculations of partial-wave dispersion relations for, 24:5301
interactions π + N, N/D method for S-matrix calculations of p-wave scattering length for, (T), 25: 7660 (NP-18553)
interactions π + N, N/D method off mass shell for, 21:4056
interactions π + N, nonforward superconvergence relations for, 22:20262
interactions π + N, nonlinear chiral Lagrangian for, (T), 24:43012
interactions π + N, nonlinear chiral symmetric Lagrangians for, 23:44659
interactions π + N, nonlinear Lagrangian models invariant under generalized chiral groups SL(4,C) and SL(12,C) for, 22:22425
interactions π + N, nonlinear Lagrangians with chiral SU(2) x SU(2) symmetry, 24:3659
interactions π + N, nonlinear phenomenological Lagrangians for, 24:5337
interactions π + N, nonlinear realization of chiral SU(2) x SU(2) symmetry in curved isospin space for, 23: 27843
interactions π + N, nucleon as bound state in, 21:9795
interactions π + N, nucleon matrix elements in chiral symmetry breaking calculations from phase shifts and dispersion relations for, 25:20051
interactions π + N, numerical solutions to unitarity—analyticity equations for elastic, 23:15124
interactions π + N, off-mass shell corrections to amplitudes of, 23:32729
interactions π + N, off-mass-shell corrections to current-algebra calculation of S-wave scattering length for, 23:3735
interactions π + N, off-mass-shell effect on amplitude of vector meson production in, (E), 23:42598
interactions π + N, off-shell calculation of P_{11} phase shift in, 25:47871
interactions π + N, on-mass-shell current-algebra calculations of fixed-t dispersion relations for invariant amplitudes of, 24:10763
interactions π + N, on-mass-shell version of spin-flip sum rule for, 23:34606
interactions π + N, on-shell subtracted dispersion relations and low-energy theorems and sum rules from current algebra for, (T), 25:3368
interactions π + N, one- and two-pion exchange in, (T), 21:37856
interactions π + N, one-channel Castillejo-Dalitz-Dyson poles in, 21:918
interactions π + N, one-pion-exchange model for f* and S* production in, 22:24668

interactions π + N, optimal determinantal approximation for P_{11} phase shift in, 23:32726
interactions π + N, origin and limit of Pomeranchuk violating amplitude in, 24:21984
interactions π + N, P and P' Regge pole parameters from sum rules for elastic, 22:41811
interactions π + N, P- and F-wave solutions of relativistic quantum mechanics for baryon exchange with cutoff in, (T), 24:40449 (DESY-70/21)
interactions π + N, P- and F-wave solutions to relativistic Schoedinger equation for, 25:47863
interactions π + N, Pade approximation for, 25:40975
interactions π + N, parametrization for theory of two-pion-exchange in N + N interactions, 21:44389
interactions π + N, parity doubling and asymmetric fermion trajectories from N* resonance spectrum in, 22:20270
interactions π + N, parity violation from longitudinal polarization of recoil nucleon in, 25:59487
interactions π + N, partial wave analysis for baryon resonance production in, 22:48313 (CERN-68-23(Vol.2), pp 431-96)
interactions π + N, partial wave dispersion relations for, 21:25310
interactions π + N, partial wave relations from fixed-t dispersion relations for, 24:40392
interactions π + N, partial-wave amplitudes from coherent elastic meson (π^-) scattering by helium-4, (E/T), 25:38677
interactions π + N, partial-wave analysis of Regge amplitudes for, (T), 23:18908
interactions π + N, partial-wave dispersion relations for N^*_{33} production in, (T), 22:29710
interactions π + N, partial-wave spinor amplitudes for, 22:48374
interactions π + N, particle exchanges and generalized potentials for, 24:47456
interactions π + N, particle—resonance mixing effect in N_3^* production from, 21:46544
interactions π + N, PCAC consistency condition and rho contribution to S-wave scattering lengths for on-shell, (T), 24:49489 (SINP-TH-68-2)
interactions π + N, PCAC hypothesis and P Regge trajectory intercept for consistency condition on isospin symmetric amplitude of, 22:24672
interactions π + N, peripheral models for resonance and kinematical peaks in, 22:24674
interactions π + N, phase contours for amplitude of, 22:17970
interactions π + N, phase contours for amplitude of, 22:37156
interactions π + N, phase contours for amplitudes of, 22:39395 (CERN-68-7(Vol.2), pp 55-73)
interactions π + N, phase contours of amplitudes for, (T), 22:7506 (UCRL-17921)
interactions π + N, phase shift analysis of, 23:15266
interactions π + N, phase shift analysis of elastic, (T), 23:1928 (AD-671692)
interactions π + N, phase shift dispersion relation for partial-wave analysis of, 22:22396
interactions π + N, phase shift in P_{33} state for, 22:17959
interactions π + N, phase shifts from particle exchange and elastic unitarity in, (T), 21:5389 (NYO-2262-103)
interactions π + N, phase-shift analysis of, 22:11670
interactions π + N, phenomenological analysis of γ + N —, π + N interactions at 210 and 225 MeV for constant and scattering length difference for, 24:8581(T) (CERN-Trans-68-14)
interactions π + N, phenomenological dispersion relations and phase shift analysis of, 24:5296
interactions π + N, phenomenological Lagrangian and dispersion theory for chiral algebra from chiral dynamics for, 24:5309
interactions π + N, phenomenological Lagrangian method for chiral SU(2) x SU(2) for Adler—Weisberger and Goldberger—Treiman relations and Adler consistency theorems for, 23:46717
interactions π + N, photon—vector-meson analogy model for, 23:42598
interactions π + N, pionic form factors of πNN and πNN* vertices in off-shell, 21:25303
interactions π + N, polarization of recoil protons in, 21:35310
interactions π + N, pole dominance method for elastic, 23:5614
interactions π + N, Pomeranchuk theorem and isospin invariance for Pomeranchuk—Okun rule for, 24:26441
interactions π + N, possible existence of new N* state in, (E/T), 24:45529
interactions π + N, predictions of multiperipheral model for, (T), 24:40377
interactions π + N, predictions of quark model with additive baryon exchange for pseudoscalar meson and baryon production in backward, (T), 25:47883
interactions π + N, production and decay of 2π and 3π resonances from, (T), 23:15092
interactions π + N, production of exotic meson resonances in backward, 24:49526
interactions π + N, $\pi\pi\pi$N anti N five-point function for, (T), 24:45521
interactions π + N, quark model for elastic and inelastic charge-exchange, 22:3419
interactions π + N, reaction matrix theory for, 23:7146
interactions π + N, real axis singularities in partial wave amplitude for, 21:27457
interactions π + N, real part of non-flip amplitude in charge-exchange, 25:47890
interactions π + N, reconstruction of amplitudes from experimental data for, 25:59498
interactions π + N, Regge amplitude and superconvergence relation for, 22:46450
interactions π + N, Regge cuts and asymptotic sum rules for amplitudes of forward, 25:9800
interactions π + N, Regge cuts for unitarized finite-energy sum rules for charge-exchange, (T), 25:43637 (DESY-71/24)
interactions π + N, Regge daughter trajectories in backward elastic, 23:1704 (LPTHE-TH-68/15)
interactions π + N, Regge dips in cross sections for charge-exchange, 23:5637
interactions π + N, Regge exchange amplitudes for bound state and resonance spectra from, 22:17953
interactions π + N, Regge models of asymptotic behavior of amplitudes for forward elastic, 25:3357
interactions π + N, Regge parameters from finite-energy sum rules for charge-exchange, 24:24362
interactions π + N, Regge pole absorption theory for dip structure mechanism for meson and nucleon production in, (T), 25:53185
interactions π + N, Regge pole and absorptive cut model for dip structure in backward, 25:33746
interactions π + N, Regge pole and cut model for forward charge-exchange, 25:45757
interactions π + N, Regge pole conspiracy in, 23:5598
